The intense toxicity of the 'Blood Demon Elysi' was too dreadful; even a Late Stage Divine Emperor who was Enlightened could be poisoned to death if their Physical Body was weaker. Emperor Qing was indeed incapable of making contact with the opponent.

Having collected Emperor Qing, Luo Feng was then able to go all out in hand-to-hand combat with the Blood Demon Elysi.

"This fierce poison." Luo Feng resisted the Blood Demon Elysi with his Endless Blood Sea, but in doing so, he also came into contact with it. The terrible poison contained within the Blood Demon Elysi naturally transferred into the Blood Sea, and began to rapidly infiltrate and spread.

"Die." The Blood Demon Elysi had great confidence in its own toxicity; even though they were lower-level beings, they were born Primordial Lives, entities meant to break free from cages! Its poison was extremely frightening.

Sometimes, with its deadly poison alone, it could repel or even kill Late Stage Divine Emperor Enlightened Ones.

"Whoosh—"

Luo Feng's Blood Sea Undying Body was vast enough; without much consideration, he instantly struck back with a claw.

The enormous fluffy claw was simply too big! Its sweep covered a wide area; the Blood Demon Elysi had nowhere to hide and was forcefully torn apart by the fluffy claw.

The instant it was touched and torn, the Blood Demon Elysi naturally divided, splitting into billions of parts, billions of tiny 'centipedes' that merged into the Endless Blood Sea.

"A single strike has shattered my True Body!" After being struck by the claw, the Blood Demon Elysi was also startled, "So vicious?"

The power of this claw was too terrifying to withstand; it had no choice but to completely divide along with the attack.

"Hiss Hiss Hiss~~~~"

The world turned upside down!

The Blood Sea was boundless!

"Xuanqing Sky!"

The Xuanqing Sky Annihilation Array Map within Luo Feng's body operated at full force, enveloping a vast area with the Endless Blood Sea, wrapping up the 'billions of tiny centipedes' within its range and collecting them all into the Blood Sea Eye.

Inside the Blood Sea Eye, the Array operated, imprisoning billions of tiny 'Blood Demon Elysi' within a space cage.

Countless tiny Blood Demon Elysi fiercely retaliated, causing the space cage to tremble as if it were about to shatter.

"Undying Heart, quell!"

Suddenly a green treasure pearl appeared, and under its guidance, with it as the core, numerous channels extended throughout Luo Feng's physical body and even spread into the infinite Blood Sea.

With this network of channels sprawling everywhere, the might of the Endless Blood Sea increased several-fold, and its toughness shot up by dozens of times, acquiring a hint of an undying charm.

The Blood Sea Eye, as the core of the 'Undying Blood Sea Body,' was now merged within this green treasure pearl.

With the enhancement of the 'Undying Heart,' the stability of the Blood Sea Eye soared, as did the rigidity of the space cage, forcefully suppressing the billions of tiny Blood Demon Elysi.

"Hiss～～"

Inside the Blood Sea Eye, rolling Blood Waves condensed into a fuzzy claw, whose terrifying might crushing the tiny Blood Demon Elysi.

One claw, two claws, three claws... With each swipe, large numbers of Blood Demon Elysi were crushed to pieces.

"No, no!"

"How is this possible? He's not even listed among the Elders of Yulan City, how could he be so strong?"

As billions of tiny Blood Demon Elysi were continuously crushed, they struggled in vain. First, they couldn't escape, and second, the greatly enhanced might of the 'Undying Blood Sea Body' wielding the fuzzy claw was far too terrifying. Merely six swipes, and Luo Feng had torn apart the hidden 'Life Core of the Blood Demon Elysi.' Once the Life Core split open, all Blood Demon Elysi naturally merged into one, revealing its true form.

"I..."

In that moment of death, Blood Demon Elysi couldn't believe that its journey of growth would end today!

"Finally, I've killed it." Looking at the huge corpse of the Blood Demon Elysi, Luo Feng also breathed a sigh of relief, "I had to use both of my treasures to kill it."

Just with the Palm World, he couldn't trap the Blood Demon Elysi.

Only with the 'Blood Sea Undying Body' enhanced by the Undying Heart could he comprehensively suppress the Blood Demon Elysi. Only then did he have the opportunity to inflict heavy damage with each claw, and even kill it.

"I can also count myself as having killed a Low-Level Primordial Life at the Late Stage of Divine Emperor." Luo Feng was somewhat wistful.

At the Elder level, only a few could kill a Low-Level Primordial Life at the Late Stage Divine Emperor in a one-on-one fight.

Luo Feng also knew that he had relied on the power of treasures.

Without the 'Undying Heart' and the 'Palm World,' these two treasures, his own strength would drastically decrease. He couldn't possibly deal with this Blood Demon Elysi.

"Hm? It's dead, yet this virulent poison is still seeping through?"

Luo Feng frowned.

Within the Endless Blood Sea, supported by the 'Undying Heart,' the spread of the virulent poison was greatly slowed.

But it was only slowed! The area affected by the poison was constantly expanding without the slightest reduction.

"This virulent poison can't be destroyed." Luo Feng couldn't care for too much. With a thought, he separated all the 'Energy' that had come into contact with Blood Demon Elysi, discarding all that were tainted with poison.

He divided a vast portion, about one-twentieth, of the Endless Blood Sea.

Poisonous invasion!

Luo Feng watched as the separated one-twentieth of the Blood Sea was quickly eroded away completely by the poison, eventually leaving behind only a mass of distorted, vast virulence.

This virulent mass was a dark black sphere about three thousand kilometers in diameter, constantly twisting and tumbling with countless thread-like substances within it.

Suddenly, this ball formed of twisted threads rapidly collapsed and shrank, finally condensing into a fist-sized 'black liquid.'

"I actually can't handle it." Luo Feng watched in shock, he dared not to directly touch this virulent poison.

This is the specialty of Low-level Primordial Lives.

After all, they are beings born to break out of the Cage, possessing some incomprehensibly special characteristics.

Some of them hide away, beyond the ken of Cultivators.

There are even some that can break through the many defenses of

Yulan City and infiltrate directly into the city. In every epoch, there are Cultivators within the city who are assassinated by these infiltrating Low-level Primordial Lives.

Luckily for Luo Feng, he resides in the Inner City, and his stay has been short, so he has not yet encountered such an event.

"The Elysi Poison can also fetch a high price, better to store it away for now." Luo Feng immediately used a storage treasure to collect this fist-sized black liquid.

Storing the Elysi Poison must be done with care, as it cannot touch any living matter. Once it touches, it will immediately seep through and erode. Unless one breaks out of the Cage, their own energy form cannot eliminate this virulent poison.

"Hurry and leave, can't linger." In an instant, Luo Feng transformed into a blood shadow, silently merging into the heavens and earth to depart.

The first rule of hunting: After killing a Low-level Primordial Life, immediately leave the battlefield.

After traveling for a moment.

Luo Feng then released the black Flying Boat and also released Emperor Qing.

Although Emperor Qing was still a bit uncomfortable, he was now able to remain absolutely coherent.

"Escaped?" Seeing his surroundings, Emperor Qing quickly remarked, "Blood Demon Elysi has a strong tracking ability. If it failed in its assassination, it might secretly pursue us, or even call for companions."

"Don't worry, it's dead," Luo Feng said.

Emperor Qing was stunned.

"The Blood Demon Elysi was tricky to deal with. I had to exert all my strength, and it was not easy to kill it," Luo Feng said, "Now we've

moved quite far from the battlefield and are relatively safe, let's continue the hunt."

Chapter 318 - 25 The Largest Race

"Blood Demon Elysi has been slain?"

Emperor Qing felt a tumultuous surge within his heart.

These innate Primordial Life forms, although their moves are crude, each possessed enormously tenacious life force!

To defeat is easy, to kill is hard!

According to the experience in the Nine Rivers Sacred Realm, Enlightened Cultivators of the same level, when facing Low Level Primordial Life one-on-one, generally hold a slight advantage. But to kill them is extremely difficult. Hence the need for several team members to hunt together.

"Luo Feng, with his own strength, has killed a Late Stage Divine Emperor Low Level Primordial Life. Such power is considered extremely strong even among the Elders," thought Emperor Qing. "Even Elder Tian He is not to be feared!"

Even if Elder Tian He has accumulated profound strength, as long as he hasn't reached the Half Primordial Level, he couldn't possibly slay Luo Feng with such might.

Even if Elder Tian He has a slight upper hand... Luo Feng's name will still spread throughout Yulan City!

"Good, let's continue hunting."

Emperor Qing calmed his emotions and drove the black Flying Boat forward.

"Brother Luo Feng, this should be the last time we hunt together as a team," Emperor Qing sighed. "I thought I could be of some help, but who would have thought I wouldn't be able to lift a finger, even becoming a burden to you."

The threat posed by Late Stage Divine Emperor Low Level Primordial Life is too great. Just like the previous Elysi Poison, if even a bit touched Emperor Qing, this very avatar of him would be annihilated.

"Brother Emperor Qing was able to reach the Middle Stage of Divine Emperor within a single Reincarnation Era in the Land of Origin," Luo Feng smiled. "Such talent, surpassing even that of the two countries' Ancestors. In the future, let alone at the Elder level... there's even hope for Half Primordial!"

Emperor Qing chuckled upon hearing that.

He indeed had this confidence.

But Emperor Qing also understood... He would need to endure through long years, with immense hardship, born into death, struggling immensely to touch upon the Half Primordial. That was probably the limit for his lifetime,

But for Luo Feng with such a growth rate, the Half Primordial Level seems within easy reach, with utterly no obstruction!

"Perhaps it's only by breaking out of the Braided Cage that Brother Luo Feng will spend long years. With his talent, it's possible he could leap out of the Braided Cage," Emperor Qing thought.

He also knew that leaping out of the Braided Cage was very difficult.

In the Dark Sacred Realm, Late Stage Divine Emperor Enlightened ones are the minimum threshold, and Half Primordial Level beings are everywhere. This place gathers countless powerful beings from numerous worlds, yet 'leaping out of the Braided Cage' remains a legend!

Difficult, difficult, difficult!

"I wonder if Luo Feng's potential could leap out of the Braided Cage

and become Primordial Life," thought Emperor Qing.

...

As the two conversed, they remained vigilant. Luo Feng's Biomimetic Eye of Destruction in his brow constantly observed his surroundings, and the Xuanqing Sky Annihilation Array Map within him was always operating, forming a vast Domain that protected everything around him.

Previously, when ambushed by Blood Demon Elysi, it was precisely the Array Formation Domain that allowed Luo Feng to save Emperor Qing in time.

"Hmm?"

Luo Feng's Biomimetic Eye of Destruction peered into the distance ahead to the left.

There was a cluster of clouds concealing the area, but Luo Feng could still manage a glimpse through them, spotting creatures covered in blue-white Scale Armor with eight hooves each, and every one of them had a Single Horn, radiating coldness, naturally forming clouds.

"Fifteen Frost Soul Watchers," Luo Feng's eyes gleamed with excitement.

In the Nine Rivers Sacred Realm, lower-level Primordial Life consists of many different races.

In terms of numbers, the Frost Soul Watchers come first. Their numbers are terrifyingly large. Even the hunters of Yulan City have seen thousands of Frost Soul Watchers acting in unison, with three of them at the level of Divine Emperor Perfection among such a formidable force… Against such a large team... no cultivator in Yulan City dares to obstruct them.

They mostly act in groups outside.

A lone Frost Soul Watcher is a rare occurrence.

A solitary Frost Soul Watcher is generally one that has failed the

competition for leadership and been exiled. To vie for leadership, one must certainly be at the level of Divine Emperor Perfection.

Therefore, encountering a Frost Soul Watcher acting alone is even more frightening and dangerous.

"Fifteen Frost Soul Watchers?" Emperor Qing said in surprise on the side, "It looks like a small squad."

"Judging by their stature, breath, and scale armor patterns, they should all be at the Middle Stage of Divine Emperor," Luo Feng determined, "Although Frost Soul Watchers are numerous among the lower-level Primordial Lives, all other aspects about them are quite ordinary."

Concealment, escape, attack, self-defense… they know a little of everything, but every aspect is quite ordinary.

"These fifteen Frost Soul Watchers, let's try to take them out in one fell swoop," Luo Feng said, "Emperor Qing, you help too."

"Hmm," Emperor Qing nodded, "I will try to block them."

...

The cloud cluster's flying speed wasn't fast, and the fifteen Frost Soul Watchers stood there, watching all around. Though their observation capabilities were far inferior to Luo Feng's Secret Technique 'Biomimetic Destruction Eye,' they still knew a bit about the art of observation.

They were very patient, vigilantly watching in all directions.

Once they spotted 'prey,' they would set off collectively.

Lower-level Primordial Lives love hunting 'cultivators.' But Frost Soul Watchers are a very ferocious race, and these large numbers occasionally devour other lower-level Primordial Lives as well.

"Whoosh~~~~"

The Endless Blood Sea suddenly appeared, with the boundless blood-

color spreading throughout heaven and earth.

The Blood Sea enveloped the cloud cluster and the fifteen Frost Soul Watchers within it.

"There are cultivators!" All fifteen Frost Soul Watchers turned to look at the two figures in the center of the Endless Blood Sea, Luo Feng and Emperor Qing's figures.

"Kill."

The Blood Sea was devouring and twisting the cloud cluster, but the cloud cluster completely resisted the erosion of the Blood Sea. Meanwhile, Emperor Qing was also setting up a Sword Array from a distance.

"The cultivator controlling the Blood Sea should be a Late Stage Divine Emperor Enlightened One. The one next to him is much weaker," they assessed.

"Together, we can break the Blood Sea and tear both of them to pieces," they plotted.

The fifteen Frost Soul Watchers were not the least bit afraid. If three or five Elders made a move, they would not hesitate to flee.

But merely one Elder?

They are best at collective combat. Teams of fifteen dare to fight a Late Stage Divine Emperor Enlightened One.

"Boom～～～"

The fifteen Frost Soul Watchers moved in unison, spreading icy chills all around. The cold air transformed the cloud cluster into a single entity, protecting the fifteen of them and completely blocking Luo Feng's Blood Sea invasion.

"Cultivators, die!"

The massive clouds transformed into huge, terrifying claws, grasping towards Luo Feng. Despite strenuous resistance, Luo Feng was torn

apart by the colossal claws and merged into the Endless Blood Sea as waves of blood.

"He excels at transforming into a Blood Sea, but his physical combat is rather mediocre." The fifteen Frost Soul Watchers instantly exchanged thoughts, "Destroy its Blood Sea."

Instantly, their combined colossal cloud began to frenziedly absorb the blood waves.

"Rip."

The Endless Blood Sea suddenly erupted in rage.

"Xuanqing Sky, a thin line between heaven and earth!"

A 'light' infused with the aura of life and death instantly pierced through their massive cloud, as well as the body of one of the Frost Soul Watchers. In the moment of penetration, the Life Core within was shattered. Carrying the blood waves, the light swept past the Frost Soul Watcher's body, which disappeared into thin air.

"Hmm?" The remaining fourteen Frost Soul Watchers were shocked, "His Endless Blood Sea is adept at formations, and its power is quite formidable."

"Continue absorbing the Blood Sea; the smaller it gets, the weaker his formations will be."

The massive cloud ferociously absorbed, temporarily suppressing the energy from the Blood Sea that was engulfed.

"These naturally born Primordial lives all have quite bizarre talents." Luo Feng was intentionally showing weakness at this moment, fearing that these prey would be solely focused on escaping. If the opponents all escaped with their full strength, he would have limited capability to intercept them.

First, allow these Frost Soul Watchers to see the possibility of 'victory'.

The Endless Blood Sea released by Luo Feng was merely 'one percent'

of the real Blood Sea's energy reserve, but among cultivators, it was considered a normal physical body, so the Frost Soul Watchers didn't suspect anything.

"Hiss!"

The Light of Life and Death pierced through the massive cloud once again, taking another Frost Soul Watcher with it.

"We have already absorbed thirty percent of the Blood Sea; he won't last much longer." At this moment, the Frost Soul Watchers were unwilling to give up, crazily absorbing the Blood Sea, its expanse visibly shrinking at the speed visible to the naked eye.

"Hiss!" "Hiss!" "Hiss!"

Afterward, the Light of Life and Death struck three more times, resulting in three more Frost Soul Watchers falling dead.

By now, the Endless Blood Sea had significantly reduced in size.

"Hiss."

The sixth Light of Life and Death couldn't even penetrate the cloud anymore.

"His Blood Sea is only left with thirty percent, formation power greatly weakened, he's no longer a threat to us." The remaining ten Frost Soul Watchers grew even more frenzied, with the death of five comrades only intensifying their murderous intent.

"You low-level Primordial beings do have some tricks. However, you are no match for me." Suddenly, a bloody shadow tried to escape.

"Escape?"

All ten Frost Soul Watchers turned towards that one blood shadow simultaneously.

An invisible fluctuation enveloped the blood shadow.

Talent—Soul Freeze!

The Soul Freeze formed by the ten Frost Soul Watchers simultaneously wasn't particularly strong. Even without the Lie Yuan Technique, Luo Feng could withstand it easily, at most affecting his Escape Skill. Moreover, he had the protection of the Lie Yuan Technique and the Undying Heart.

The Undying Heart provides protection to the soul as well. This Soul Freeze had no real effect on Luo Feng.

"Ah." The escaping blood shadow seemed momentarily disrupted, the Escape Skill broken, revealing his physical form.

"Cultivator, you cannot escape," the ten Frost Soul Watchers were all very excited, as the massive cloud suddenly became incomparably huge, aiming to completely devour all the Blood Waves, including the silhouette of Luo Feng.

"Is that so?" Luo Feng appeared to be in a frenzy.

"Boom." He transformed into a fleeting shadow, forcefully piercing through the Blood Waves. A blurry claw swept past one of the Frost Soul Watchers, cracking open another Frost Soul Watcher's Life Core and taking away a corpse.

"What?" The remaining nine Frost Soul Watchers felt disconcerted. The already greatly weakened Cultivator had taken away another one.

"About time!"

Luo Feng was not willing to delay any longer. First, the number of Frost Soul Watchers had dropped from fifteen to nine, which meant the threat level was less than half of what it was before. Second, within the Elder Hunting Area, battle engagements must be swift, as dragging it out could lead to accidents.

"Rumble~~~~"

The Endless Blood Sea unfolded, and a towering figure appeared. The towering figure had an 'Undying Heart' within its body; led by the Undying Heart, countless vessels extended throughout its entire body and also spread throughout the entire Endless Blood Sea.

The Undying Blood Sea Body, utilizing the 'Undying Heart,' its might instantly surged several times over.

"Swoosh."

As the Undying Blood Sea Body fully erupted, Luo Feng's right hand also transformed into a huge, fuzzy claw. With the Immortal Body driving this claw... this claw instantly tore through the massive cloud, as well as ripping apart the ranks of the Frost Soul Watchers, killing two Frost Soul Watchers on the spot.

"He's been hiding his strength."

"He's not just any ordinary Elder!"

"Escape."

The remaining seven Frost Soul Watchers realized they had been tricked. In an instant, they transformed into seven rays of light, as swift as the Light of the Spirit. The resistance brought by the Blood Waves was minimal, and the seven rays of light rapidly attempted to flee.

However, in terms of escape skills, even though they were capable, they were far inferior to the likes of Blood Demon Elysi. Luo Feng clearly saw the seven rays of light.

"Swoosh!" The Blood Waves churned, and the world seemed to turn upside down.

"Suppress!"

The entire Blood Sea space pressed down.

In an instant, it trapped five of the rays of light, confining them within the Blood Sea Eye.

As for the other two escaping rays of light.

One encountered Luo Feng's fuzzy claw, which deployed the 'Palm World' to envelop it, while the other light ray was obstructed by Emperor Qing's Sword Array.

Soon, these Frost Soul Watchers were all captured and killed one by one.

"I actually managed to capture them all," Luo Feng was quite excited. A single Frost Soul Watcher was manageable, but when fifteen combined into a team, the difficulty skyrocketed. By feigning weakness, he was able to trap the opposition completely.

"Fifteen Frost Soul Watchers, that's almost worth two hundred million Primordial Crystals," Emperor Qing was also quite buoyed. He had finally contributed significantly.

"Let's leave this place first," Luo Feng was also very lucid, not daring to linger too long in the battlefield.

The two of them immediately maneuvered the black Flying Boat and swiftly flew away.

Just a few dozen breaths later.

Nine even more terrifying Frost Soul Watchers arrived at the scene. Their gazes penetrated the Void, their cold aura affecting the vast surrounding area as they meticulously searched for any traces of the battle.

Chapter 319 - 26 Death Crisis

"One of my teams has been completely wiped out; not a single one managed to escape," said one of the nine Frost Soul Watchers with a terrifying aura. "The strength of these cultivators is relatively strong this time."

"The homeland has been attacked, and I have already reported it. I believe that leaders are already tracking them down."

There is an enormous quantity of Low Level Primordial Life. If it is just the outermost perimeter being attacked, they won't care too much because the outer range is too vast, and hunting down those cultivators would be too difficult.

But an attack on the homeland, the Low Level Primordial Life groups would quickly dispatch forces from all directions to hunt them down.

"These cultivators, with their small numbers and weak strength. If it weren't for city sanctuaries protecting them, we would have devoured them all by now."

"They can hide within their cities, occasionally coming out to launch sneak attacks." These Frost Soul Watchers were quite discontent.

In terms of overall strength, Low Level Primordial Life are much stronger than cultivators.

But one side has the protection of cities, where they can safely cultivate and draw sustenance from them to their heart's content.

"It will be comfortable once we breach another city. Then we can devour those cultivators to our heart's content."

"Yes, I heard that after the last attack on 'Beiyang City,' our kin in the vicinity of Beiyang City had a feast on the cultivators that are rarely

seen. There were several hundred million of them in the city."

"It's a pity that breaching a city is too difficult."

The Nine Rivers Sacred Realm's thirty-five cities require 'Merit' to apply for construction, and the cities are exchanged for the tremendous city Secret Treasures using Merit, along with joint control by Hall Masters and Elders, making them extremely secure.

Even with their powerful strength, the Low Level Primordial Life find it difficult to breach cities head-on.

Only with internal and external collusion is there hope of breaching a city.

Every breach of a city is a horrifying catastrophe for the city.

Senior Yuan and the others established the 'Nine Rivers Sacred Realm' as a place to temper the younger generation. They already made arrangements favoring cultivators. If even under these circumstances the cities of cultivators are breached, it would only mean the cultivators themselves are too incompetent.

"Huff."

The nine Frost Soul Watchers were casually chatting and at the same time flying at super high speed atop clouds, patrolling in all directions.

...

"Primordial Wild Hoof Leader, a 'Late Stage Divine Emperor Blood Demon Elysi' and fifteen 'Middle Stage Divine Emperor Frost Soul Watchers' have been killed in your territory. It is suspected that an Elder has entered the homeland to start hunting," a message was conveyed.

"Understood."

A terrifying thunder burst forth from the vast river, bathed in thunder and began to patrol its territory immediately.

The Elder Hunting Area is very close to the Nine Rivers.

"Coming to hunt in my territory." The terrifying figure within the thunder traversed the Void at incredible speed.

The vast territory surrounding Yulan City is home to Low Level Primordial Life of many species, among which the 'Primordial Wild Hoof' clan is a species with fewer numbers but generally strong individuals.

Within the territory surrounding Yulan City, there is only one of the Primordial Wild Hoof clan who has achieved Divine Emperor Perfection, who naturally is also the clan leader.

'Divine Emperor Perfection Level' Low Level Primordial Life are still very rare.

For a species as numerous as the Frost Soul Watchers, in the vicinity of Yulan City, there may be several at the Divine Emperor Perfection Level.

But for the vast majority of species, there may be only one at the Divine Emperor Perfection Level, or perhaps none at all.

The so-called 'Elder Hunting Area' within the homeland of Low Level Primordial Life is divided into territories overseen by leaders. This is the greatest danger of Elder hunting.

After all, these Low Level Primordial Life also possess high intelligence. They would not foolishly allow themselves to be hunted.

To kill one in the homeland would trigger a pursuit.

******

Inside the black Flying Boat.

"We've killed fifteen Middle Stage Divine Emperor Frost Soul Watchers; none of them escaped," Emperor Qing said excitedly, "By value, this team of Frost Soul Watchers is slightly more valuable than the previous Blood Demon Elysi."

Luo Feng nodded.

A Late Stage Divine Emperor Blood Demon Elysi has an extremely high poison value, so its corpse can sell for around 150 million Primordial Crystals, considering its Merit Points worth about 10 million Merit Points. So the total price is about 160 million Primordial Crystals.

The fifteen Frost Soul Watchers, including Merit, should be able to sell for around 190 million Primordial Crystals.

"We can almost return now," said Luo Feng, "My original plan was to return after hunting two Late Stage Divine Emperor prey. Now we're about there."

"We should be more cautious," Emperor Qing agreed, "The Elder Hunting Area is the homeland of the Low Level Primordial Life activity range. There are too many powerful beings."

They encountered prey twice.

Once was a Late Stage Divine Emperor Blood Demon Elysi, and the other time was a team of Frost Soul Watchers. This indicates that in the homeland region, the number of Low Level Primordial Life and their strength are vast.

"Huff."

After deciding, Emperor Qing immediately drove the black Flying Boat, carefully starting the return journey towards Yulan City.

Luo Feng observed the surrounding area.

"My strength is still a little too dangerous in the Elder Hunting Area," thought Luo Feng to himself.

The Elders occasionally dare to come, partly because they are Avatars, and also do not bring 'Undying Heart' 'Palm World' and such extremely precious treasures. So even if an Avatar perishes, it wouldn't be a big loss.

Luo Feng, carrying two treasures, was naturally more careful.

"When my strength advances further, it will be suitable to frequently come to hunt in the homeland," contemplated Luo Feng.

If his Life and Death Dao advances further, reaching the Middle Stage of Divine Emperor!

As the Dao of Fusion, the 'Middle Stage Life and Death Dao of Divine Emperor' should be comparable to the Perfect Level of a common Dao! At that time, his strength should be considered at the level of a Hall Master. As long as he didn't venture into the inner parts of the Nine Rivers, his safety would be relatively high.

"However, it has been nine hundred epochs since I arrived in Yulan City, and my Life and Death Dao has only just reached the Early Stage of Divine Emperor. To reach the Middle Stage of Divine Emperor, I will face even greater obstacles, and it's expected to take a considerable amount of time," Luo Feng pondered.

His current cultivation was going smoothly, without encountering any bottlenecks.

Some cultivators were stuck at bottlenecks, unable to make any further progress—that was real suffering.

"I should do as Senior Yuan and the others said, it's best not to look at other cultivators' inheritances and rely solely on my own exploration, making each step solid enough," Luo Feng thought, having not purchased any 'Half Primordial Inheritance' thus far.

Like a blank slate, looking at other cultivators' inheritances would only contaminate my path.

Reliance on self-exploration! My every gain stems from a clear understanding of the essence, making it solid.

"Luo Feng is really too strong."

As Luo Feng pondered his cultivation, Emperor Qing, who was next to him, was still shocked by the gains from this venture, "To have such a harvest just from visiting the Elder Hunting Area, he must be considered one of the stronger elders by now."

"At this rate, won't it be a short time until he reaches the level of the three Hall Masters?" Emperor Qing thought, "Perhaps the entire structure of Yulan City will change because of Brother Luo Feng."

"No... with Brother Luo Feng's talent, he might not even regard Yulan City highly."

Emperor Qing's emotions were complex.

In his eyes, the three high and mighty Hall Masters of Yulan City may not hold much importance to Brother Luo Feng.

Hu!

Each lost in their own thoughts, the black Flying Boat sped through the sky at an incredibly high speed.

Suddenly—

In the distance, a terrifying bolt of lightning appeared, looking towards them from afar.

"Hm?" Luo Feng and Emperor Qing both were startled and dared not be distracted by other thoughts.

"It is, it is, it is..." Emperor Qing couldn't believe what he was seeing —a fearsome bolt of lightning in the distance. The sheer terror of its presence, even from a great distance, gave Emperor Qing a chill. It was an aura far surpassing that of Blood Demon Elysi.

Luo Feng also stared into the distance.

Instinctively, a strong sense of threat warned Luo Feng, making his soul tremble.

"Primordial Wild Hoof Clan... an existence at Divine Emperor Perfection level," Luo Feng's soul shuddered at the terrible aura without a doubt of it being at Divine Emperor Perfection level, "It must be the leader of the Primordial Wild Hoof Clan."

As a rare species in the vicinity of Yulan City, there should be only one at the level of Divine Emperor Perfection, naturally, it would be

the leader.

The Primordial Wild Hoof, at first glance is entirely black, but upon closer inspection, it faintly radiates a deep blue hue. Its huge body is covered with layers of Scale Armor, and on both sides of its head are sharply curved horns.

Its eyes, full of lightning, looked at Luo Feng and Emperor Qing, causing a tremor in their hearts.

"Brother Luo Feng," Emperor Qing knew something bad was happening.

"You go hide first, I'll have to find a way to escape," Luo Feng quickly stowed Emperor Qing away, as well as the black Flying Boat.

Luo Feng had no thoughts of defeating the opponent.

His intention was to escape!

"Divine Emperor Perfection level, and it's a member of the Primordial Wild Hoof Clan!" Luo Feng knew this was the gravest threat he had faced since he arrived in the Nine Rivers Sacred Realm.

There are many races among the Low-Level Primordial Life, each with different talents. Frost Soul Watchers were jack-of-all-trades but master of none. Blood Demon Elysi specialized in stealth and poison, but its capability in direct combat was average.

Primordial Wild Hoof was different!

Its racial talent was incredibly powerful! Among beings of the same level, it was considered an extremely strong existence.

In terms of physical body, among the same level Low-Level Primordial Lives, it was undoubtedly one of the most terrifying.

The three Hall Masters had once killed Divine Emperor Perfection level Low-Level Primordial Lives one-on-one. But on one hand, all three Hall Masters possessed sufficiently powerful treasures, and on the other hand, they had a countered their opponents.

If they encountered a 'Divine Emperor Perfection level Primordial Wild Hoof', even the three Hall Masters would probably be helpless.

"You dare to hunt in my territory." A deep voice echoed across the vast expanse of the Void, as the Primordial Wild Hoof Leader coldly watched Luo Feng, "You are a newly promoted elder of Yulan City? Your avatar will not be making an escape."

The words had hardly fallen.

Boom!!!

The surrounding vast Void suddenly solidified into terrifying green lightning, which struck directly at Luo Feng.

The lightning came too fast, leaving Luo Feng no chance to dodge.

"Bang!!!"

The lightning struck Luo Feng directly.

In Luo Feng's body, the presence of the 'Undying Heart' greatly enhanced the resilience and defensive capabilities of the Undying Blood Sea Body, giving it an undying quality. Now, having taken this hit from the fearsome lightning, Luo Feng was somewhat dazed, but his body managed to withstand it.

"The Undying Heart truly lives up to its name—so resilient," Luo Feng breathed a sigh of relief, being able to withstand the lightning strike meant there was still a possibility to escape.

"Huh?"

The distant Primordial Wild Hoof Leader was slightly surprised, and then it made its move.

Boom!

With its movement!

Bathed in lightning, its terrifying figure spanned heaven and earth in an instant, ripping through the sky! Its mere aftershock caused

billions of miles of the surrounding space to begin fracturing layer by layer, allowing a glimpse of the outermost, blurry shadows of the Secret Patterns.

Under a twisted and torn sky, Luo Feng tried his best to dodge, but the terrifying figure had already reached him!

Chapter 320 - 27 Between Life and Death

"Boom——"

Too ferocious!

Luo Feng desperately tried to dodge, but he was still grazed by the massive frame of the Primordial Wild Hoof Leader; it was just a 'graze,' and Luo Feng felt a terrifying force ravaging his entire body. His physical body, which had more than a thousand times the Perfect Divine Body Energy Reserve, and was fortified by the 'Undying Heart,' had its defensive abilities soar dramatically.

The Secret Treasure 'Undying Heart' only multiplies power and other aspects by a few times. Even a more powerful Half Primordial Level Secret Treasure could achieve this level. But its greatest strength lies in the two words 'Undying.'

Combining the mysteries of Life and Destruction, its ability to preserve life is naturally extremely strong.

"Boom." Luo Feng was grazed and instantly sent flying backward. However, his body remained intact, with no injuries.

The ferociously charging Primordial Wild Hoof Leader, however, slightly turned its head, continuously keeping a firm gaze on Luo Feng. When it noticed that Luo Feng had withstood its 'graze,' there was a flash of excitement in its eyes.

Its hoof claws were as fast as lightning, and stomped out fiercely!

The hoof claw, infused with Thunder, stomped out from up close. Luo Feng had no time to react and was struck by the hoof claw.

The hoof claw was too massive! Luo Feng appeared far too small in comparison.

"Bang!" The trampling hoof claw, more than ten times more ferocious than the previous 'graze,' had a terrifying force that shocked Luo Feng. His 'Undying Blood Sea Body' could no longer withstand it, unable to maintain the physical form.

With this trampling, Luo Feng could only burst open by going with the momentum, turning into an Endless Blood Sea.

Only by turning into a blood sea could he unload as much of the terrifying trampling force as possible.

"Even with the blessing of the Undying Heart, I can't withstand the trampling of the Primordial Wild Hoof," Luo Feng was shocked but it was within his expectations. This race was known as 'Primordial Wild Hoof Clan' because their trampling was their most dreadful move.

With a physical body that is top-tier within its level, the trampling of the Primordial Wild Hoof reached an unbelievable level of might.

The trampling might of a Late Stage Divine Emperor Primordial Wild Hoof can reach the threshold of The Enlightened at Divine Emperor Perfection.

Divine Emperor Perfection? Under such trampling might, the Undying Blood Sea Body would be forced to burst open, unable to maintain its Physical Body form.

With Luo Feng's strength, also possessing the Undying Heart and Palm World, he should generally be able to preserve his life with relative ease, even when encountering a Low Level Primordial Life at Divine Emperor Perfection.

However...

He encountered the Primordial Wild Hoof Leader!

"He actually withstood my trampling?" The Primordial Wild Hoof Leader was somewhat surprised; in Yulan City, only three Hall Masters could stand up to it in a direct fight. Ordinary Elders dare

not resist it head-on, only trying to escape for their lives with various Secret Techniques.

The vast, boundless Endless Blood Sea, within which were the 'Undying Heart' and 'Xuanqing Sky Annihilation Map' both bolstering it, made the defense and resilience of the blood sea extremely strong.

"With the vastness and resilience of my Undying Blood Sea Body, one trampling consumed two percent of my Energy Reserve?" Luo Feng was astonished.

"Whoosh."

While still astonished, Luo Feng also took action.

A furry claw suddenly extended from the blood sea without any warning, and when it extended, it was already beneath the abdomen of the Primordial Wild Hoof Leader.

"Rip!"

Luo Feng, understanding the principle of Life and Death, fully activated the lethal move of the Innate Secret Treasure 'Palm World'! Luo Feng didn't use it to suppress with a world, knowing it would be futile. What he utilized was the tearing and destructive power of the claw.

The claw was exceedingly sharp.

Fortified by the power of the 'Undying Blood Sea Body,' and driving the Secret Patterns within the claw, it was Luo Feng's strongest strike! Luo Feng even believed that such a strike might pose a substantial threat to a Half Primordial Level powerhouse.

This claw, suddenly extending from the blood sea, was too sudden and fast. The massive Primordial Wild Hoof Leader didn't even have the chance to dodge, or perhaps it simply disdained to avoid the move.

"Slash——"

Luo Feng felt his claw, with five knife-sharp fingertips, penetrate the

shallow white Scale Armor of the Primordial Wild Hoof Leader's abdomen. According to the materials from some corpses in the Nine Rivers Sacred Realm, the Scale Armor of the Abyss Wild Hoof Clan generally had hundreds of layers.

"Sss." Luo Feng's all-out effort with one claw, managed to barely pierce and penetrate two layers of Scale Armor.

"It has layers, and I only managed to pierce two despite going all out?"

At this moment, Luo Feng finally understood.

What it meant for its physical body to be one of the top amongst those born as Primordial Life Forms of the 'Low Level Primordial Life clans.'

"Hm?"

Suddenly taking this claw, the Primordial Wild Hoof Leader was somewhat surprised; its surface Scale Armor showing slight cracks? The formless Thunder flowed, naturally restoring the cracked Scale Armor.

"ROAR!!!" The Primordial Wild Hoof Leader suddenly let out a roar.

This roar!

It was like thunder rumbling, the sound impacting in all directions, causing the Endless Blood Sea to roll and shake, and even the surface of the blood sea was obliterated by the shockwaves.

The roar also impacted Luo Feng's Spiritual Will. Of course, after reaching the Early Stage of Divine Emperor in the Life and Death Dao, Luo Feng's Spiritual Will naturally climbed to 'Divine Emperor Perfection' level, although not at its extreme.

But with such a level of Spiritual Will, plus the Lie Yuan Technique and the bolstering of the Undying Heart, it could still withstand the impact of this roar.

"Boom boom boom."

As the roar echoed, the Primordial Wild Hoof Leader started to charge, and every hoof claw trampled fiercely upon the Endless Blood Sea.

Although the might of the trampling now was not as powerful as the originally charged hoof claw, now it was a continuous trampling, with about fifty to sixty percent of the previous force. But it was a relentless assault.

"Rumbling～～～" This entire world trembled and shattered, with phantom Secret Patterns of the Nine Rivers Sacred Realm's sealing chains appearing.

Under the relentless trampling of the Primordial Wild Hoof Leader, the energy of Luo Feng's Endless Blood Sea was swiftly depleting.

In a few moments, thirty percent was consumed.

"Blood Sea Heaven and Earth!"

Suddenly, the entire Blood Sea unleashed its might, a blood-red haze shrouding heaven and earth.

At this moment, it was hard to distinguish directions, as the world of blood had already started to transform into the Xuanqing Sky. Trapped within the Xuanqing Sky, the Primordial Wild Hoof Leader could not see anything beyond it.

"Quick, escape!"

The moment Luo Feng utilized a part of the Blood Sea to evolve into the Xuanqing Sky and trap the Primordial Wild Hoof Leader, he hesitated not, immediately splitting into three avatars.

Each of the three avatars employed Secret Techniques, their speed skyrocketing to the ultimate limit, fleeing in different directions.

"Hmph!"

The Primordial Wild Hoof Leader let out a cold snort, its form suddenly expanding massively, almost becoming half the size of the entire Xuanqing Sky! Its gigantic head, with two horn-like blades,

began to move.

Ripping sound—

Everything was being cut by the two blade-like horns! Even the Xuanqing Sky was being sliced apart by this terrifying force.

The Xuanqing Sky shattered.

The vision of the Primordial Wild Hoof Leader penetrated the Void, instantly locking onto the three escaping avatars.

"Escape?"

The Primordial Wild Hoof Leader raged uncontrollably.

Boom, boom, boom!!!

Three immensely powerful bolts of Thunder coalesced in the heavens and earth, each bolt of Thunder homing in on the three avatars of Luo Feng who had fled to extreme distances! The avatars were struck by the sudden lightning, two of them unable to withstand, directly obliterated.

Only one avatar survived the Thunder and escaped even faster.

"Swoosh." That sole escaping avatar suddenly commandeered a Flying Boat, fleeing at an even more rapid pace!

The Primordial Wild Hoof Leader opened its mouth wide, spewing out Thunder plasma, the Thunder rampaging in all directions, annihilating the surrounding Blood Sea that had trapped it beneath its might.

This Blood Sea accounted for perhaps one-tenth of Luo Feng's Energy Reserve. Under the relentless, powerful strike of the Primordial Wild Hoof Leader, it too was completely annihilated.

Beneath the Thunder, the Blood Sea ceased to exist.

"Leave a weaker avatar behind." The Primordial Wild Hoof Leader burst forth fiercely, rapidly pursuing the avatar that was

commandeering the Flying Boat.

...

Luo Feng swiftly fled, commandeering the Flying Boat.

However, the Primordial Wild Hoof Leader locked onto his aura from afar and relentlessly pursued. The Primordial Wild Hoof Leader was too fast, transforming into Thunder, tracing its route and caught up entirely in just over ten breaths' time.

"Can't escape." Luo Feng, commanding the Flying Boat, watched the scene unfold before him.

"Die."

The hoof of the Primordial Wild Hoof Leader already shrouded him.

"It's over." Luo Feng watched powerlessly at this scene.

...

At the site where the Primordial Wild Hoof Leader and Luo Feng had just begun their battle, the chaotic world gradually returned to calm, with the energies between heaven and earth also slowly recovering.

Suddenly—

An endless stream of energy between heaven and earth abruptly converged, transforming into the form of a human male, none other than Luo Feng.

Luo Feng, with the aid of the secret treasure Undying Heart, could enter the state of 'Between Life and Death'.

The Undying Heart, encapsulating the mysteries of both life and destruction, possessed extremely strong life-saving capabilities.

Like those proficient in the Life Path, even if blasted into nothingness, they could still spiritually regenerate from oblivion, partially restoring their Life Form.

Utilizing the 'Undying Heart', when Luo Feng was attacked into nothingness, he seamlessly transformed a greater part of the Blood Sea into nothingness, merging the energy into the world. He could thus maintain this state for a short duration.

After a period, he would restore his Life Form.

Maintaining the state of 'neither life nor death', which Luo Feng termed 'Between Life and Death', in this state, his own energy truly transformed into nothingness, only his Spiritual Will merging with the world. This is the weakness!

If the enemy was strong enough to sense Luo Feng's Spiritual Will, they would not be deceived.

Luo Feng's Spiritual Will, with the aid of the 'Undying Heart', perfectly concealed all signs of life, remaining in a state of neither life nor death, enduring.

This lasted for ten breaths' time.

Afterwards, he would revive once more from nothingness into a Life Form.

"Finally deceived that Primordial Wild Hoof Leader." Luo Feng immediately released the Void Netherworld Pupil Ship, commandeered the ship, and vanished into the crevices of the Void in an instant, disappearing without a trace with astounding speed.

The speed of the Void Netherworld Pupil Ship was far faster than the other avatar that controlled the Water Drop Flying Boat.

...

"Ripping sound."

As the avatar was completely pulverized by the hoof claw, the Primordial Wild Hoof Leader looked at the remaining Water Drop Flying Boat with confusion, lightly nudged it, carefully examining the interior of the Flying Boat.

The inside of the Flying Boat was also empty, devoid of treasures.

"Just a Divine Emperor Late-Stage Flying Boat, and no other treasures? Not even the corpse of a Low Level Primordial Life slain?" The Primordial Wild Hoof Leader realized at this moment, "He still escaped!"

"These Cultivators, too cunning!"

None of the Elders it met could withstand a few of its blows head on, but with all manner of bizarre Secret Techniques and escapes, some could still save their lives.

Chapter 321 - 28 New Elder Luo Feng

Luo Feng piloted the Void Netherworld Pupil Ship, not daring to relax in the slightest, and put all his effort into controlling the ship.

In Yulan City, there were many Flying Boat class Secret Treasures, but Luo Feng chose the 'Void Netherworld Pupil Ship' because the Secret Patterns of this ship were profoundly mysterious and similar to the path of the 'Eye of Life and Death'.

The materials for refining this ship were sourced from several types of Low Level Primordial Life from the Void Lineage, making the ship incomparably integrated with the Void.

"With the 'Netherworld Eyes' of the ship, one can more clearly perceive the structure of the heavens and the Void." Luo Feng piloted the Flying Boat, agilely navigating through the Void, where ordinary methods could no longer trace its presence.

The creator of this Flying Boat had reached Half Primordial Level in both Life and Destruction paths, a realm much higher than the current Luo Feng. Even with all his effort, Luo Feng could only utilize fifty to sixty percent of this Flying Boat's capabilities.

"Sigh—"

As Luo Feng scouted the surroundings, he spared no effort in hurrying along.

"We have completely flown out of the Elder Hunting Area." Luo Feng still did not dare to slacken, worried that the Primordial Wild Hoof Leader was still tracking him, so he flew for a long time until he was thoroughly out of the conventional hunting area before he relaxed.

"Void Netherworld Pupil Ship, suppress all fluctuations of aura. Even more powerful than my own techniques for concealing life aura." Luo Feng revealed a smile.

"The Primordial Wild Hoof Leader is too powerful, I simply can't fight against it. If it saw through my Fake Death Secret Method, this avatar would have completely died there, losing the Undying Heart and the Palm World." Luo Feng thought inwardly.

Losing these two treasures would be a too huge loss.

Luo Feng was too overconfident.

After perfecting the Undying Blood Sea Body, even among Elders it was considered a formidable Secret Technique, and with two Secret Treasures, Luo Feng felt that he had chances of escaping life from a typical Divine Emperor Perfection Low Level Primordial Life, which is why he dared to try entering the Elder Hunting Area, only to encounter the 'Primordial Wild Hoof Leader'.

"Primordial Wild Hoof Leader is not the strongest among Low Level Primordial Life." Luo Feng thought, "In Nine Rivers Sacred Realm, there are even more powerful Low Level Primordial Life known as 'Super Limit Level'! Facing a Super Limit Level, I fear not even having a chance to resist and would be wiped out instantly."

Sources for Super Limit Level Low Level Primordial Life materials usually come from the Dark Sacred Realm.

After all, in the Dark Sacred Realm, Super Limit Levels are common! All sorts of strange, powerful, and even special rare species of 'Low Level Primordial Life' are placed there. They confront the strongest Cultivators selected from countless worlds!

Nine Rivers Sacred Realm…

Divine Emperor Perfection Level Low Level Primordial Life is very rare, let alone Super Limit Level, that is myth.

"I thought I was careful enough, but I still underestimated the danger," Luo Feng thought, "This time, returning to Yulan City, I must make good use of these spoils of war to comprehensively enhance my

strength."

Luo Feng then thought and also released Emperor Qing.

After coming out, Emperor Qing, seeing Luo Feng, finally relaxed and then laughed, "Brother Luo Feng, I was really worried just now, afraid that you were killed by that Primordial Wild Hoof Leader."

"Facing the Primordial Wild Hoof Leader, there's simply no way to fight." Luo Feng also shook his head, "I can only try every possible method to escape, I barely managed to escape with my life by relying on a life-saving Secret Technique. But I also suffered great losses."

His own body's energy reserve was left with a little more than twenty percent.

All other energy reserves were depleted during the combat and escape processes.

"Being able to escape is already something to be proud of." Emperor Qing said, "According to the intelligence, facing the Divine Emperor Perfection Level Primordial Wild Hoof Leader, only three Hall Masters have the strength to confront it head-on. All other Elders must flee upon encountering it, and most of them can't even escape."

Luo Feng nodded.

With the Undying Heart enhancing the Undying Blood Sea Body, and his energy being robust enough, yet only a few exchanges left him with a little over twenty percent of his energy reserve.

"You're right, being able to escape is already quite good," Luo Feng said with a smile.

"Where have we flown to now?" Emperor Qing looked towards the vast landscape outside.

"We've already flown out of the normal hunting area, it won't be too long before we'll arrive at Yulan City," Luo Feng said.

Emperor Qing's expression changed slightly: "Brother Luo Feng, when we left Yulan City before, we were followed! At that time, it was you

who dealt with the tracker, now returning to Yulan City, the Deceit Workshop might have ambushes."

Luo Feng nodded.

Elder Tian He, wanting to use him to make a statement, had sent trackers who were killed by himself, Tian He most likely has even stronger killing intent now!

"The closer we get to Yulan City, the more likely we are to encounter an ambush," Luo Feng nodded, "If Elder Tian He wants to make a statement using me, he can only act outside the city."

Inside the city, actions are generally stealth attacks with Secret Techniques, leaving no traces.

Direct combat? Only outside the city. Unless one is prepared to sever ties with the entire Elder Hall.

The Elder Hall—three Hall Masters and over three hundred Elders, who also control the entire city's formation! All of them together, even a 'Super Limit Level Low Level Primordial Life' would lose its life.

The rules of the city are the foundation for the three Hall Masters and the Elders to continuously gain immense benefits; of course, they wouldn't destroy the rules."

"Brother Luo Feng, how do you plan to handle this?" Emperor Qing looked at Luo Feng.

"Just fight them openly!" Luo Feng grinned, "He wants to use me to make a statement, I might as well use him as a stepping stone!"

Earning resources does not only come from hunting.

When one's strength is strong enough, like those Elders, their frequency of hunting is very low; the primary way they earn resources...is from various benefits obtained normally within the city.

"Once my strength is sufficient, the vast resources of Yulan City, even if I can't eat meat, I can still drink some soup."

At the beginning of one's growth, naturally one needs to find ways to obtain various resources.

"My current strength is somewhat inferior to my peak state," Luo Feng slightly frowned.

His Undying Blood Sea Body, as the energy reserve increases, so does the strength, but it's not unlimited; '500 times the Perfect Divine Body Energy Reserve' is the peak state.

Even with many energy reserves, the only increase is in reserves; there is no enhancement in burst power.

A hundredfold Perfect Divine Body Energy Reserve can exert about fifty percent of strength.

Two hundredfold Perfect Divine Body can exert nearly eighty percent of strength.

Three hundredfold Perfect Divine Body can exert about ninety percent of strength.

The higher it goes, the smaller the increment in enhancement.

Five hundredfold can exert a hundred percent of strength.

"At this moment, I can exert eighty percent of my strength," Luo Feng thought, "That should be enough to face Elder Tian He! If not, I can still summon more avatars from Yulan City to come here."

He was cultivating in the Land of Origin, and every time he came to the Nine Rivers Sacred Realm, he brought sufficient energy reserves.

Over time, the velocity at which Luo Feng's various avatars absorbed energy increased, becoming somewhat comparable to that of the Small Universe.

...

Not far outside the East City Gate of Yulan City. A huge Deceitful Shadow Formation had already been set up, patiently waiting for Luo Feng to walk into the trap.

"Luo Feng and Emperor Qing went out hunting, they should be returning soon," thought the three avatars of the Mist Teeth God Emperor, dispersed and utilizing the Formation Diagram to deploy the Deceitful Shadow Formation, covering a sufficiently vast surrounding area.

"Elder Tian He originally dispatched four raiding teams to set up Deceitful Shadow Formations to guard the four city gates," the Mist Teeth God Emperor slightly shook his head, "Who would have thought, they, hearing about one of my avatars being crushed, found out... there might be an Elder behind Luo Feng, none of them wanted to block the city gates anymore."

The raiding team members were mostly not Source World powerhouses, each having only one True Body.

They joined the Deceit Workshop for resources, not to die.

Knowing this matter involved a conflict between two Elders! None of the four raiding teams wanted to take the risk. Elder Tian He couldn't force them. Even if the three Hall Masters personally ordered it, the Cultivators in the city likely wouldn't pay attention to such a suicidal task.

In the end, Elder Tian He could only ask four Source World powerhouses in the Deceit Workshop to deploy the formation using avatars.

The Mist Teeth God Emperor was one of them!

Source World powerhouses, just deploying formations with avatars. As long as the conditions were right, they were still willing to do it.

"Sigh."

The Deceitful Shadow Formation was so vast, and being relatively close to the city gate, it had completely sealed off the vast area outside the East City Gate! To enter the East City Gate, one must enter this Deceitful Shadow Formation.

If it were other Cultivators, the Deceitful Shadow Formation would not obstruct them.

The Deceitful Shadow Formation was only maintained for these few days, and in such a short period, given the hunting frequency of the teams in Yulan City, since the Mist Teeth God Emperor deployed the formation, he hadn't encountered a single hunting team.

"Hmm?" the Mist Teeth God Emperor suddenly looked towards the distance.

A ship had already entered the range of the Deceitful Shadow Formation, the formation enveloped it, and immediately sensed two familiar life auras.

"Mist Teeth, it's you again?" Luo Feng flew out of the Void Netherworld Pupil Ship.

Mist Teeth looked at Luo Feng from a distance: "Luo Feng, quickly let the Elder protecting you reveal himself."

"The Elder protecting me?" Luo Feng was surprised, he immediately understood, the Deceit Workshop side didn't believe Luo Feng, Emperor Qing could reach the Elder level so quickly, they thought he had requested support from a powerful Elder.

Luo Feng laughed: "There isn't any Elder protecting me, it was me who crushed you with one claw."

Mist Teeth was taken aback.

"I won't kill you either, quickly send word to Tian He, let him come here," Luo Feng said, "If he doesn't come, I might just enter the city."

Mist Teeth in this formation wanted to stop him, Luo Feng instantly determined... Mist Teeth, this Source World powerhouse, probably prepared to die this time, not carrying any valuable treasures.

Luo Feng naturally didn't want to waste energy dealing with Mist Teeth.

"You're asking Elder Tian He to come over?" Mist Teeth looked at Luo Feng and nodded, "Okay, Elder Tian He will be here soon."

...

Near the East City Gate, in a cave mansion.

Elder Tian He resided here, to him, if that Elder wanted to save face, he would definitely return through the East City Gate.

"Hmm?"

Elder Tian He originally sat there, leisurely carving, when suddenly he received a message from Mist Teeth.

"Luo Feng is that Elder? And he asked me to come over?" Elder Tian He felt both amused and disappointed, "I thought it was some other Elder, turns out it's just a newly promoted Elder."

Newly promoted Elder, just stepping into this level, weak accumulation, the battle spirit Elder Tian He had been longing for quickly faded.

"He crushed Mist Teeth with one claw, seems he has a powerful Secret Treasure?"

"Truly overestimating oneself! Just became an Elder, obtained a powerful Secret Treasure. He thinks he can challenge me?" Elder Tian He stood up, "Well then, I'll use fifty percent of my strength and finish him off."

In one step, Elder Tian He had already left the cave mansion, and in another step, his figure blurred and he had already arrived at the city gate, viewing from a distance the silhouette of a black-haired man in the Deceitful Shadow Formation outside the city gate.

The black-haired man also looked over from afar.

"A newly promoted Elder." Elder Tian He slightly shook his head.

Chapter 322 - 29 Luo Feng Battles Elder Tian He

Luo Feng and Elder Tian He looked at each other from a distance.

Mist Teeth God Emperor immediately returned quietly to the city, and Emperor Qing also took the Void Netherworld Pupil Ship back to the city. Elder Tian He didn't intercept them, his target after all was Luo Feng.

"Elder Tian He." Luo Feng looked at the other party; Elder Tian He was clad in a white robe, his appearance handsome, skin like crystal jade, and even a faint halo of light protected him, with an aura that was unremarkable and ordinary.

"I thought there was some Elder who wanted to have a match with me." Elder Tian He said softly with a chuckle, "Only now do I realize, it's merely a junior who has just made a breakthrough. Is this the confidence behind your disrespect?"

"Why should I show you respect?"

Luo Feng looked surprised, "Are you one of the three Hall Masters, or are you the Master of the Deceit Workshop?"

At this moment, around the East City Gate of Yulan City, there were guards, some members of the Deceit Workshop, and some cultivators who came to observe. Even the number of cultivators watching was increasing rapidly.

"An Elder-level confrontation."

"It's happening outside the East City Gate, they are going to clash!" Many cultivators received the news, and they were quite excited to come and watch the battle.

An Elder-level confrontation in Yulan City was quite rare, and the opportunity to 'watch closely' was even more precious.

"One side is Elder Tian He, one of the eight Deputy Workshop Masters of the Deceit Workshop! To be a Deputy Workshop Master of the Deceit Workshop... must be extraordinary. The other party is God Emperor Luo Feng, not so well-known, his claim to fame is just slaying a Deceit Workshop's marauding team. It looks like he's a newly promoted Elder-level strength."

"Elder Tian He has profound accumulations, the other Luo Feng's accumulations are shallow in comparison."

The watching cultivators communicated their thoughts to one another through whispers.

They were all within the territory of Yulan City, protected by layers upon layers of the city's defensive formations, not at all concerned about being affected by the battle, and thus could watch comfortably.

...

Outside the East City Gate, at this moment there were only Luo Feng and Elder Tian He! No other cultivator dared to step out of the East City Gate even by a single step.

"A new Elder with such confidence." Elder Tianhe was not angry at all, "I guess, is it because you've obtained a powerful Secret Treasure? Hence the full confidence?"

Luo Feng looked at the other party.

"You are too young, and your experience is too little."

Elder Tian He shook his head gently, "If you had ventured through the Dark Sacred Realm! You would realize, your little bit of chance isn't worth mentioning in the Dark Sacred Realm."

The Dark Sacred Realm, where the strongest cultivators from countless worlds gather, is filled with dazzling talents, and there are quite a few who are qualified to receive treasures from the Infinite Space Treasure Vault worth more than one hundred thousand Reward

Points.

"The Dark Sacred Realm indeed gathers numerous strong cultivators. However, Elder Tian He, what are you in the Dark Sacred Realm?" Luo Feng looked at him.

"I spent a long time in the Dark Sacred Realm, and I've made some progress," Elder Tian He said with a smile while looking at Luo Feng. "Although I'm nothing special in the Dark Sacred Realm, I can still teach you a lesson."

"Show me what you've got," Luo Feng said while looking at the other party.

Elder Tian He casually extended a finger, and from the tip, a point of light shone. This point rapidly expanded, engulfing billions of kilometers in an instant and forming a huge Formation Diagram.

Within the scope of the Formation Diagram, illusory grey birds began to generate.

Before making a move, Luo Feng had already collected information about his opponent, knowing that Elder Tian He had deep accumulations and was skilled in various methods. 'Formation Diagram' was one of Elder Tian He's specialties.

Elder Tian He had profound expertise in crafting Formation Diagrams and Daoist Soldiers.

Luo Feng stood there, and with a single thought, an Endless Blood Sea surged beneath him. Simultaneously, the Xuanqing Sky Annihilation Map inside his body began to operate, naturally forming a Formation with the Endless Blood Sea.

Along with piercing screeches, numerous illusory grey birds dashed across the Void towards Luo Feng, plunging into the Endless Blood Sea.

"Whoosh—"

Each illusory grey bird was like a sharp sword, piercing through parts of the Blood Wave, then ultimately perishing engulfed and eroded by

the Blood Wave.

"Your Physical Body Method is quite interesting; it's comparable to a Low-Level Primordial Life at the Late Stage Divine Emperor." Elder Tian He said with a laugh, yet the wholeness of the Formation Diagram was consolidating into a huge and terrifying grey bird.

This massive grey bird posed a frightening menace, and Luo Feng also faintly felt threatened.

"Yo!"

A shrill cry that pierced the heavens followed, and the massive grey bird sped towards Luo Feng's physical body with astonishing speed.

"Xuanqing Sky, a line between Heaven and Earth!"

The Formation condensed into a Light of Life and Death, immediately confronting the bird, forcibly piercing through the creature's body, making the bird become unreal and twisted.

"Is this all you've got?" Luo Feng stood there, "Elder Tian He, where's your Daoist Soldier? What about your close combat techniques? Show me all your moves."

"A pure energy-condensed Daoist Soldier is indeed weaker," Elder Tian He looked at the scene, "Today, I carry with me a few hundred crafted Daoist Soldiers; give them a try."

With a wave of his hand,

a number of wooden bird carvings flew out. These bird carvings quickly enlarged after being released, each one's might not inferior to the massive grey bird from before.

"Hundreds of Daoist Soldiers?" Luo Feng looked on seriously, sensing the power of these bird carvings; these Daoist Soldiers seemed somewhat clumsy, but their strength was quite formidable, akin to 'Late Stage Divine Emperor Bloodline Cultivators'. However, when added together by the hundreds, the outcome was terrifying.

"Boom, boom, boom!!!"

Under the command of the Formation, the natural formation of the Daoist Soldiers' battle array posed a severe threat to Luo Feng.

"Stronger than expected," Luo Feng thought to himself. When hundreds of massive flying creatures surged out simultaneously, it was as though a large group of Low Level Primordial Life had launched an assault. Instinctively, Luo Feng activated the 'Undying Heart' at the very first moment. With the Undying Heart as the core, innumerable vessels spread, rapidly extending throughout the entire Endless Blood Sea.

Luo Feng had a premonition that without relying on the Undying Heart, his Undying Blood Sea Body would suffer significant injuries under the attack of hundreds of Daoist Soldiers.

His own Energy Reserve was only a little more than two hundred Perfect Divine Body reserves; he couldn't afford to deplete it so carelessly.

"Booming—"

Hundreds of massive flying creatures, coordinating with Formation, merged their might into one, striking fear into the hearts of all Cultivators observing from Yulan City.

But suddenly, a massive Blood Wave, billions of kilometers tall, rose up, blocking these gigantic flying creatures like mountains. The flock of flying creatures didn't hesitate and smashed into it, shattering numerous Blood Waves in an instant.

Yet, the might of these flying creatures was rapidly diminishing.

"The Undying Blood Sea Body, empowered by the Undying Heart, only increases its might by a few times. But the defense is increased by dozens of times. Even a full-force stomp from the Primordial Wild Hoof Leader only depleted two percent of my Energy Reserve. These Daoist Soldier assaults can't harm me at all."

In front of the Primordial Wild Hoof Leader, Luo Feng dared not claim to be 'undying'. But at his own level, Luo Feng's 'Undying' was indeed fitting.

"Booming—"

The two sides clashed.

Under the leadership of the Formation, hundreds of Daoist Soldiers either struck like raging thunder, condensed like a sword, or gathered like an axe chopping down... The might of the Daoist Soldiers was indeed terrifying.

"How is this possible?" Elder Tian He frowned, "I released these Daoist Soldiers and yet they couldn't force him to use that gigantic claw."

He remembered clearly that it was a giant, fuzzy claw that pinched Mist Teeth to death.

"In front of my Daoist Soldier Formation, he still has strength to spare?" Elder Tian He couldn't believe it.

The Daoist Soldier Formation was his usual method.

He usually couldn't be bothered to fight personally, just casually releasing some Daoist Soldiers to confront the enemy.

"Crack."

Under the empowerment of the Undying Heart, the might of the Xuanqing Sky Annihilation Formation also greatly increased, and the Endless Blood Sea mercilessly grinded away, finally breaking apart some of the wooden carved flying creatures.

These flying creatures were each meticulously carved by Elder Tian He, integrated with Formation Diagrams, and forged into Daoist Soldiers.

...

More and more Cultivators were observing from Yulan City, with members of various powers watching the battle.

"Elder Tian He's hundreds of Daoist Soldiers, striking together with a Formation, are actually at a disadvantage?"

"This Luo Feng, a newly advanced Elder-level existence, is so powerful?"

Everyone was somewhat surprised.

"Elder Tian He will probably have to resort to his true methods now."

"It looks like he's going to give it his all."

The observers were all eagerly anticipating.

...

Elder Tian He stood there, with a casual wave of his hand, and the hundreds of Daoist Soldiers in the distance all flew back to him, which he then easily stowed away.

"No wonder you're so confident," Elder Tian He said with a smile. "You've easily blocked my Daoist Soldier Formation! I underestimated you."

Luo Feng looked at his opponent.

He was very clear that in order not to allow the Undying Blood Sea Body to suffer too much depletion, he already used the Undying Heart in front of the Daoist Soldier Formation.

"The fundamental Great Dao I've cultivated over the long years is the 'Formation Diagram Path', and I've refined Daoist Soldiers with the Formation Diagrams," said Elder Tian He with sentiment. "These Daoist Soldiers have been my support as I grew from weak to strong over the endless years."

"But as an Enlightened One, I've cultivated to the Late Stage Divine Emperor but reached a bottleneck that I couldn't overcome no matter what. I realized that as I groped in the dark, I must have taken the wrong path."

Elder Tian He gazed at Luo Feng, "In the Dark Sacred Realm, I've learned the heritages of other Cultivators, over a hundred kinds of heritages, absorbing their essence and integrating them into myself..."

"Even though I've learned many techniques, I've never been able to reach Perfection."

Elder Tian He chuckled, "Strictly speaking, the Primordial Bloodline Route that I cultivated later did reach Perfection. That path was the simplest."

As soon as these words fell.

Elder Tian He no longer restrained himself, releasing a terrifying aura that swept across all directions. Silver Secret Patterns even began to emerge on the surface of his skin.

"Primordial Bloodline at the Half Primordial Level?" Luo Feng looked at his opponent.

Luo Feng understood that once one cultivates the Bloodline Path in addition to other techniques, the Bloodline Will would contaminate one's own will. The mysteries of the bloodline could even become integrated with one's own Enlightenment insights, which constituted a form of contamination of the Dao.

Thus, for those of the Enlightened One Lineage, once the Primordial Life Bloodline integrated into their bodies, the hope of making progress in their Path of Enlightenment would become slim. From then on, they would usually focus mainly on the Bloodline Path.

"As a member of the Enlightened, during my time in the Dark Sacred Realm, I exchanged my Battle Merit for a High Level Primordial Life Bloodline," Elder Tian He said to Luo Feng. "With this, I integrated it into my Physical Body, forming the foundation of my Bloodline Cultivation. I explored its potential and nurtured the Eternal Night Netherworld Kite Body, and for this bloodline body, I even created a set of the 'Eternal Night Battle Technique.'"

Elder Tian He stood there, with a silvery gray aura sweeping through the heavens and earth, his presence terrifying, and with an invisible will impacting those around him.

Chapter 323 - 30 Victory and Defeat

Although Elder Tian He's aura was terrifying, Luo Feng did not care.

Because he had long known that Elder Tian He's strongest ability was the Body Close Combat Method.

Luo Feng even felt a bit sentimental.

In Elder Tian He, Luo Feng saw the common predicaments of cultivators from the Dark Sacred Realm.

"After completely hitting a bottleneck in cultivation, they would try all methods to find a path that might lead them out of the Braided Cage," thought Luo Feng. Elder Tian He had learned over a hundred inheritances, yet he ultimately chose the bloodline path.

The bloodline path, where Elder Tian He had reached the Half Primordial Level, just one step further and he could achieve the Ultimate Awakening, escaping the Braided Cage! This path at least held a sliver of a chance to 'escape the Braided Cage'."

"Facing bottlenecks, endless years could not bring further progress. Cultivators of the Dark Sacred Realm would exhaust every method," Luo Feng pondered, "I wonder what kind of bottleneck I will encounter in the future."

"Luo Feng, let's see whose physical body is stronger, yours or my Eternal Night Netherworld Kite Body?"

After Elder Tian He spoke, he vanished out of thin air.

However, the Biomimetic Eye of Destruction on Luo Feng's forehead could see, a subtle fluctuation flashed by, and it had already reached

his proximity, where Elder Tian He's fingers swept past his chest like blades.

"Hiss hiss hiss—" A sharp edge cut across his chest.

Luo Feng stood there, watching the scene with interest.

The robe formed from his own energy, also fortified by the 'Undying Heart,' remained unmarked even as the sharp edge cut across the chest of his robe.

"My Body Secret Technique 'Undying Blood Sea Body', based on the Star Tower Blood-colored Scale, inherently has some undying effects. With the Secret Treasure 'Undying Heart' enhancing it, why should I fear your attack?" Luo Feng clearly saw the whole process of Elder Tian He's move.

"Swoosh." "Swoosh." "Swoosh."...

As Elder Tian He moved, he transformed into a covert airstream, which Luo Feng would not have been able to see without the Biomimetic Eye of Destruction.

During the rapid movements, he continuously slashed Luo Feng's body, slashing over ten times in a blink, but failed to damage the robe at all.

"Elder Tian He, is that all you've got?" said Luo Feng.

Previously, Luo Feng used the Endless Blood Sea along with the Formation to block and annihilate those hundreds of Daoist Soldiers. This time, however, he responded to his enemy in his physical body form.

"Your protective robe, is it indestructible?" Elder Tian He appeared far away, surprised, "You, as a new Elder, certainly have plenty of treasures. But however tough the robe might be, the endurance limit of your life form ultimately has a ceiling."

Elder Tian He's body suddenly transformed, his stature burgeoned, and even grew three pairs of silvery-gray wings on his back, his body covered in silvery-gray fur, his head transforming, eventually

becoming a gigantic avian humanoid.

This appearance also excited many onlookers atop the walls of Yulan City.

"Eternal Night Netherworld Kite!"

"Is this Elder Tian He's 'Eternal Night Netherworld Kite Body'?" Many onlookers had purchased Divine Emperor's intelligence, which contained this information about Elder Tian He.

The giant silvery-gray avian humanoid radiated strong waves of will; after all, it was cultivated based on the 'High Level Primordial Life Bloodline', which had great potential and also bore Elder Tian He's hope of escaping the Braided Cage.

At this moment, Luo Feng also became a bit more solemn.

"Hmph!"

Elder Tian He flapped his three pairs of wings, instantly reaching close to Luo Feng, and his claw was already striking down.

Unlike Luo Feng's huge, furry claw, Elder Tian He's current claw was much more lean and fierce.

"Boom——"

This claw strike went straight towards Luo Feng's head.

Luo Feng did not even dodge, he directly met it with a palm, as if he intended to hold up the entire sky!

Bang~~~

Their hard blows clashed! Elder Tian He aimed to deplete Luo Feng's energy with terrifying might, but in this hard clash, Elder Tian He detected the power of Luo Feng's palm. Although Elder Tian He had a slight advantage, the margin was too small.

"A new Elder, and his body is this strong?" Elder Tian He frowned slightly, his three pairs of wings flapping, and his devastating claws

continuously struck down, yet Luo Feng boldly met each strike with his palm.

"Rise!"

Luo Feng yelled.

The Endless Blood Sea immediately raised huge waves, engulfing Elder Tian He in an instant.

The Xuanqing Sky Annihilation Formation operated!

The Blood Sea, binding and strangulating Elder Tian He from all directions, hindered his huge form, slowing his wing flapping significantly, reducing his eruptive might, naturally weakening each claw strike, even putting him at a disadvantage when clashing directly with Luo Feng.

"Elder Tian He, your moves are quite weak," Luo Feng laughed heartily, as his majestic form battled against the immense bird man.

The Blood Sea's binding and strangulation, plus the physical body combat, indeed gave Luo Feng the upper hand.

The physical body form along with the Endless Blood Sea, this was the complete form of the 'Undying Blood Sea Body'.

"I'm still at a disadvantage?" Elder Tian He felt quite suffocated; in Yulan City, facing many troubles, normally the Eternal Night Netherworld Kite Body was enough, and in his original plans, relying on the Eternal Night Netherworld Kite Body, he should have killed Luo Feng's avatar by now.

Who would have thought, up till now, he still hadn't forced out that super-gigantic claw!

"If fifty percent strength is not enough, then let it be one hundred percent!" Elder Tian He's eyes flickered with blood light.

He had never fully unleashed his power in Yulan City, and of course, this powerful method had only been perfected over hundreds of millions of years.

"Boom!!!"

Elder Tian He's hair below, the skin surface began to show the Formation Diagram. Dense Formation Diagrams covered every inch of skin, even the surface of Elder Tian He's eyeballs, were emerging with Formation Diagrams.

If one could peek inside his body, every drop of blood within him would bear the imprint of formation diagrams.

Formation diagrams are the fundamental path through which Elder Tian He has grown from weakness to his current strength.

He used formation diagrams to refine Daoist soldiers.

He even attempted to treat his 'Eternal Night Netherworld Kite Body' as a Daoist soldier, imprinting countless formation diagrams upon his body to further unlock the potential of his bloodline, aiming for the 'Ultimate Awakening.'

Although he was far from reaching Ultimate Awakening, the fusion of formation diagrams and the Eternal Night Netherworld Kite Body indeed significantly enhanced the power of the latter.

"Hmm?" Luo Feng, with his Biomimetic Destruction Eye, though unable to see inside Elder Tian He, could see densely packed formation diagrams emerging on the skin beneath the hair. These formation diagrams circulated with golden light, drastically boosting Elder Tian He's aura.

"This strength?"

"Does Elder Tian He have this strength?"

Among the spectators on the city wall of Yulan City, several elders' avatars, who were quite familiar with Elder Tian He, immediately determined... this had already surpassed the abilities recorded about Elder Tian He.

"He has countless formation diagrams imprinted on his skin."

"It seems he has successfully fused the formation diagrams with the

Eternal Night Netherworld Kite Body."

These elders were secretly astonished.

The Great Dao has intersections; different cultivation systems indeed had the potential to combine, but achieving this was extremely difficult.

...

Elder Tian He's body faintly glowed with golden light as his eyes integrated with formation diagrams stared at Luo Feng, his voice booming: "This is my first time going all out in Yulan City, Luo Feng, this is your honor!"

The words had just fallen.

Boom—

Elder Tian He's massive three pairs of wings vibrated, completely shredding the surrounding Endless Blood Sea, and a terrifying claw strike directly hit Luo Feng's chest.

"Bang!" Luo Feng felt the overwhelming force, involuntarily flying backward, crashing into the Blood Sea.

"Boom!"

At this moment, Elder Tian He ferociously pursued Luo Feng, one claw causing countless Blood Waves to explode, his wings beating causing numerous Blood Seas to break and ascend, already consuming some of the Blood Sea.

"I'm injured?" Luo Feng was surprised.

Despite being enhanced by the Undying Heart, Elder Tian He could hurt him!

Luo Feng also realized that he should not underestimate the top powerhouses of countless worlds! These powerhouses each had their opportunities. He had not learned any 'Half Primordial Inheritance' to explore his path without interference.

But those cultivators who practiced numerous inheritances, integrating wisdom from all aspects into themselves, also followed a very powerful path.

"Compared to these elders who have been around for innumerable years, my accumulations are still too shallow," Luo Feng clearly knew that these elders mainly wandered in the Dark Sacred Realm and lacked many treasures in the Nine Rivers Sacred Realm, hence their power was somewhat inferior.

"Boom!" "Boom!" "Boom!"

Elder Tian He's immense three pairs of wings commanded terrifying authority, annihilating everything around, causing countless Blood Waves to ascend. He continued to cover Luo Feng with claw after claw, completely suppressing him in the fight.

"Elder Tian He, your accumulation is indeed deeper than mine," Luo Feng spoke, "This battle can also come to an end now."

Boom—

Suddenly, Luo Feng stretched out his hand, and his arm swelled, his palm transforming into a gigantic shaggy claw!

With the enhancement of the Undying Heart, Luo Feng's power could rival Elder Tian He's 'Eternal Night Netherworld Kite Body.' Now controlling this claw, Luo Feng's divine power was also activating the secret patterns inside the claw, boosting its might.

Compared to Luo Feng fighting bare-handed, using this claw dramatically brought a surge in power.

"Hm?" Elder Tian He saw the gigantic shaggy claw, its might too strong, and he realized he could not overcome it.

This one claw could even tear apart two or three scales of the Primordial Wild Hoof Leader.

Boom—

Under this one claw!

Covering heaven and earth, dividing heaven and earth, it became a world of its own cage.

In this world cage, Elder Tian He had no escape and could only resist with full force. With a resounding boom, the massive claw ripped apart, still tearing apart two of his wings, blood flying, Elder Tian He showing a hint of powerlessness.

From just one exchange, it was clear the disparity in power was too significant, there was no chance to fight!

"At least, you forced me to use this claw," Elder Tian He silently sighed, he knew about Luo Feng's gigantic shaggy claw, but Luo Feng had never used it, which frustrated Elder Tian He.

Only at the last moment did he finally force Luo Feng's move.

Though he lost, Elder Tian He was quite satisfied.

"I lost!"

Elder Tian He's remaining wings closed, instantly transforming into a streak of golden light, instantly penetrating the world membrane formed by the 'Palm World,' and in a flash, he had escaped to inside East City Gate.

Seeing this, Luo Feng's right hand instantly returned to normal, the Endless Blood Sea converging into one, once again becoming an ordinary-looking black-haired man.

Yet, at this moment...

Many spectators on the walls of Yulan City were in disbelief as they watched the black-haired man, who after that gigantic one claw strike, even Elder Tian He was instantly seriously injured and fled?

Chapter 324 31 Fame Spreads Through Yulan City

Under the gaze of the onlookers on the walls of Yulan City and guards at the East City Gate, the black-haired man Luo Feng took only a few steps before he entered the East City Gate and met up with Emperor Qing who was already there.

"Brother Luo Feng, you won, you overwhelmingly won!" Emperor Qing was even more excited than Luo Feng, "In the presence of numerous cultivators, your direct power completely suppressed Elder Tian He! This battle, I believe, will spread throughout the entire Yulan City within a day."

Luo Feng simply smiled.

If it was a clash in the wilderness, intelligence organizations might still need to confirm the authenticity of the encounter.

But this time, the clash occurred outside the East City Gate, watched by hundreds of thousands—the authenticity of this battle is unquestionable!

"It seems I've stepped on Elder Tian He to make my name known throughout Yulan City," Luo Feng thought, which was also part of his plan. Already possessing Elder Level strength, yet still painstakingly hunting for resources, would be too pitiful.

Moreover, the Elder Hunting Area is uncontrollable in terms of risk! Without further breakthroughs in strength, Luo Feng had no intention of continuing to hunt.

"Let's go, let's deal with the spoils of war."

Controlling the Void Netherworld Pupil Ship, Luo Feng and Emperor

Qing quickly left the East City Gate, heading directly for the Primordial Hall in the Inner City.

The scene of the Void Netherworld Pupil Ship flying away was also under the watch of hundreds of thousands of onlookers.

"Impressive."

"That giant fluffy claw must be a formidable secret treasure. With this secret treasure, Elder Tian He was completely defeated!"

"Relying on the power of the secret treasure alone, in terms of realm accumulation, he is probably not as good as Elder Tian He."

"Elder Tian He's 'Eternal Night Nightingale Body', I heard, requires exchanging a high-level Primordial Life Bloodline, which is worth much more than many secret treasures. Without the Eternal Night Nightingale Body, Elder Tian He wouldn't qualify to make Luo Feng Divine Emperor use that secret treasure claw."

"Divine Emperor Luo Feng faced his enemy empty-handed all along, only using the secret treasure claw in the end."

"Elder Tian He did not show all his strength; his avatar in the Dark Sacred Realm is where his strongest power lies."

There were also debates among cultivators.

Elder Level beings, already on the top echelons in Yulan City, are subjects of admiration for many weaker cultivators; their battles are meticulously studied by many cultivators over long years.

...

A cave mansion in the Inner City.

Kumo's master 'Yu Yong' resides here.

"Elder Tian He lost to Luo Feng Divine Emperor in a battle?" Living in the Inner City, Yu Yong couldn't get to the East City Gate in time to watch the battle, so he had to purchase the detailed battle scene from the intelligence organization.

Given the sheer number of onlookers, the information was sold very cheaply.

"This giant claw defeated Elder Tian He in one move?" After watching the entire battle, Yu Yong's heart trembled a bit, "If it had been me facing Luo Feng back then, I probably would have been torn apart by that claw immediately."

He neither had an avatar, nor did he have a foundation as deep as Elder Tian He.

Elder Tian He managed to escape from Luo Feng's hands; he, however, would not have had that capacity.

"The path of cultivation is tremendously dangerous."

"One wrong move can lose the whole game!"

Yu Yong was very cautious.

After arriving at the Nine Rivers Sacred Realm, he preferred to be slower and more cautious, not willing to take too many risks. But Kumo joined the Deceit Workshop, constantly plundered, and used the workshop's resources to reach the mid-stage Divine Emperor level, almost catching up to his master Yu Yong.

"Haste makes waste; taking it slowly might let one go further." Yu Yong felt a sensation of perfection in the vast bloodline within him at that moment, "My Primordial Bloodline is inferior to Elder Tian He's. But after being continuously sculpted and tapping into the potential over long years, I finally reached the Half Primordial Level."

He reached the Half Primordial Level in just a few decades.

Always researching various secret techniques to exploit bloodline talents. But upon hearing about the battle between Luo Feng and Elder Tian He, Yu Yong suddenly had the idea to head to the Dark Sacred Realm.

"Reached the Half Primordial Level, want to break out of the cage? Opportunities in the Dark Sacred Realm are the most abundant."

"Such dazzling talents like Luo Feng are many, and it's difficult for them to break out of the cage. I'm much weaker in talent; if I don't strive hard now, then I'll have even less hope."

Deep longing shone in Yu Yong's eyes.

Before the chance to break out of the cage, he was willing to risk everything. Because on the path to growth, he had far too many regrets.

"Sigh."

On the day Luo Feng's name spread throughout Yulan City, Yu Yong, a Half Primordial Level Bloodline Cultivator, quietly piloted the Flying Boat alone away from Yulan City, preparing to go through the Holy Mountain teleport to the Dark Sacred Realm.

******

Yu Yong piloted the Flying Boat away from the Inner City.

Luo Feng and Emperor Qing, however, piloted the Void Netherworld Pupil Ship, came to the Inner City, heading straight for Primordial Hall.

"Hmm?"

When Luo Feng and Emperor Qing arrived at the first floor of the Primordial Hall, they found that the heads of all thirteen shops there had unexpectedly all gathered, eagerly welcoming Luo Feng.

"We've seen Divine Emperor Luo Feng."

"We have all heard the news that Divine Emperor Luo Feng defeated Elder Tian He." These heads were all very enthusiastic. If they previously interacted with Luo Feng as peers, now they showed a few more bits of respect.

They all worked for major powers and naturally showed more respect to beings at the Elder Level.

Luo Feng looked at the thirteen heads before him and said with a

smile, "Everyone is quite well-informed."

These thirteen powers monopolizing the business of buying low-level Primordial Life corpses at Primordial Hall, in terms of background and capabilities, are certainly not inferior to forces like the Insect Nest, Shadow Tower, or other plundering powers.

After all, in terms of 'earning resources,' theft and plunder can never compete with monopolizing the trade of Primordial Life Materials.

"Luo Feng Divine Emperor has returned from this hunt, I presume there are some Spoils of War?" asked his old friend Bu You with a smile.

"Indeed, there are some." Luo Feng nodded, "Let's see, what price can you offer?"

As he spoke, Luo Feng displayed the Spoils of War.

A Late Stage Divine Emperor Blood Demon Elysi, fifteen Frost Soul Watchers, and several Early Stage Divine Emperor prey. Luo Feng also displayed the potent venom of the Blood Demon Elysi.

"A Late Stage Divine Emperor Blood Demon Elysi? What a treasure!" one manager after another exclaimed with fiery eyes.

For Cultivators who use poison, the corpse of Blood Demon Elysi is treasure all around.

"For the corpse of the Blood Demon Elysi plus the Merit Points and that potent venom, I can give one hundred and sixty million Primordial Crystals," his old friend Bu You immediately quoted a very sincere price.

"One hundred and sixty-five million Primordial Crystals." A higher bid came instantly.

"I am willing to offer one hundred and eighty million Primordial Crystals!" A rock giantess bid, shocking the other managers around, as this price would not only yield no profit but also incur some losses.

The rock giantess smiled at Luo Feng: "My 'Elder Xingyi' sends his

regards to Luo Feng Divine Emperor."

"Elder Xingyi?" Luo Feng understood, acknowledging the friendly gesture from the other party.

Elder Xingyi.

Proficient in life healing and also skilled in various potent poisons! A fearsome Elder within the top twenty ranks of Yulan City, whose strength and position are comparable to the master of Deceit Workshop.

A Late Stage Divine Emperor Blood Demon Elysi, in the hands of Elder Xingyi, a supremely skilled poison user, one hundred and eighty million Primordial Crystals is not at a loss.

These Elders, ranking within the top twenty, are all unfathomably deep, almost approaching the level of the three Hall Masters.

Elder Xingyi, who practices dual paths, just like the master of Deceit Workshop, has also reached Late Stage Divine Emperor in both paths, and they have even developed powerful combined Secret Techniques! This brings their strength close to the three Hall Masters.

Because these Elders are almost all strong figures of the Source World with Avatars, they mostly rely on mutual interest and cannot be coerced.

Even the three great Hall Masters cannot coerce individuals like the master of Deceit Workshop or Elder Xingyi.

"Elder Xingyi is quite courteous towards me," thought Luo Feng.

"Please thank Elder Xingyi for me," Luo Feng said with a smile.

Finally, after fervent bidding from thirteen managers, the price of these Spoils of War turned out to be much higher than expected, selling for 395 million Primordial Crystals.

Luo Feng and Emperor Qing then left the Primordial Hall together.

"Who does business like this, willingly incurring losses to make a

purchase?" Emperor Qing couldn't believe it. The prices for Low Level Primordial Life Corpses are quite transparent, and variance shouldn't be this large; yet this time it was several million higher than estimated.

Not only investing the profit but even incurring losses.

"Just this once," Luo Feng said, "It's the Elders behind them trying to make nice, which is why they're willing not to make a profit. Next time I hunt... that will be a normal transaction."

"Here's your share," Luo Feng handed a bag of Primordial Crystals to Emperor Qing.

Emperor Qing glanced at it. It contained a whopping 39.5 million Primordial Crystals.

This made Emperor Qing somewhat emotional; partnering with a formidable being and merely getting a tenth share amounted to a high sum.

He, a Mid-stage Divine Emperor Cultivator, typically had to team up with several peers on his level to stand a chance of killing a 'Mid-stage Divine Emperor Low Level Primordial Life'. During this process, various dangers could also arise.

A failure, with the Avatar dying in battle, could even result in loss of carried treasures. Hunting was a gamble with potential gains and losses.

Accumulating 39.5 million Primordial Crystals was not easy.

"This is our last time teaming up," said Emperor Qing, holding the bag of Primordial Crystals with a smile, "and it allowed me to earn a tidy sum. For a long time, I won't need to worry about resources."

In order to make a breakthrough to Mid-stage Divine Emperor, he had exhausted his savings. This time, however, he managed to regain a significant amount.

"I won't be hunting for a while either. Next time I go hunting, shall I take you along to see the sights?" Luo Feng smiled, indicating a

fundamental breakthrough in his strength was anticipated in his next hunt.

"No, no, that wouldn't be necessary. I'd only hold you back. I'd rather not go," Emperor Qing immediately declined.

"Haha..." Luo Feng laughed, "I'll go check out other merchants first."

"All right," Emperor Qing nodded, then asked, "By the way, are you changing your Cave mansion? With your strength, Brother Luo Feng, staying in mines doesn't quite fit."

That was the Cave mansion Emperor Qing rented during his Early Stage Divine Emperor, Luo Feng's strength still residing there, even sharing it! Indeed, it no longer matched his status.

Luo Feng nodded: "I do plan to change to a different cave mansion."

The energy supply in Emperor Qing's mansion was insufficient; Luo Feng's absorption of energy was already inadequate. Moving forward as his power advanced further, the demand for energy would only increase.

Emperor Qing nodded.

They would inevitably part ways eventually.

"When the time comes, I will reserve a section of my mansion for you, Emperor Ming, and Di Fu. Would you like to live together?" Luo Feng offered.

Emperor Qing smiled: "Of course! Who would refuse to live with an Elder?"

Luo Feng nodded and then flew away.

Emperor Qing watched his departing figure.

"Such is the path of Cultivation," thought Emperor Qing, "There are gatherings and partings!"

Different talents tread different paths.

Perhaps they become companions for a phase of the journey, but ultimately, paths diverge.

"At least Brother Luo Feng and I were once companions, walking a segment of the Cultivation path together." Emperor Qing smiled, turned, and also left.

Chapter 325 - 32 Various Invitations

Yulan City, Inner City Core Area, within an ordinary cave mansion.

A slightly chubby man with deep blue skin sat watching, a pair of soft antennae on his head and glasses on his nose, grinning as he observed a battle recording within a dossier.

"Tian He, you actually lost to a newly promoted Elder." The chubby man said with a laugh while looking at Elder Tian He beside him.

"I am wholly convinced by my defeat!" Elder Tian He joked with self-deprecating humor, then he turned to the chubby man, "Workshop Master, aren't you interested in having a contest with him?"

The chubby man chuckled.

He was the master of the Deceit Workshop.

"There's no need for comparison. His cultivation base is still relatively shallow and was only relying on an external object." The Deceit Workshop Master shook his head. At least for that last claw strike Luo Feng revealed, the Deceit Workshop Master was confident he could suppress it.

The primary reason Elder Tian He was willing to join the Deceit Workshop was none other than the Deceit Workshop Master himself! The Deceit Workshop Master practiced two different Dao paths and was even attempting to fuse the two into one.

"Even within the Dark Sacred Realm, there are many who cultivate two or three Dao paths simultaneously. However, it's exceedingly rare to find those who can fuse different 'Dao' paths into one."

"Among the top twenty powerhouses of Yulan City, in terms of potential, the Deceit Workshop Master is the first."

Elder Tian He knew his own potential was limited, even forced to choose the Bloodline Path. He naturally needed to latch onto a powerful benefactor and he chose the Deceit Workshop Master.

"Tian He."

After reviewing all the detailed intelligence on Luo Feng, the Deceit Workshop Master finally spoke with a smile, "Prepare one billion Primordial Crystals and have your subordinates deliver them to Luo Feng as your apology to him."

"Apology?" Elder Tian He couldn't help but protest, "We are both Elders; why should I apologize to him? And what I have in Yulan City is only an avatar, why should I curry favor with him?"

Elders generally have the Clone Technique and naturally carry a sense of pride. To admit defeat outside the East City Gate was already a blow to Elder Tian He's prestige. And now to offer an apology?

"Listen to me," the Deceit Workshop Master commanded.

Once someone decided to follow him, they needed to do things according to his rules.

If Elder Tian He did not listen to him, the Deceit Workshop Master would only distance himself from Elder Tian He.

Elder Tian He hesitated, but eventually nodded: "Fine! I will arrange the apology!"

"Workshop Master, I don't understand why we are treating him with such courtesy." Elder Tian He looked at the Deceit Workshop Master for an explanation.

"Look at the intelligence, he has only been in Yulan City for a little over a thousand epochs." The Deceit Workshop Master said with a laugh, pointing at the detailed intelligence hovering in front of him, "At the beginning, he seemed to be at the Early Stage Divine Emperor Level, but in just over a thousand epochs, he became strong enough

to suppress you. What kind of cultivation speed is that?"

"Workshop Master! The intelligence also stated 'seemed to be at the Early Stage Divine Emperor Level'," Elder Tian He argued, "When he first arrived in Yulan City, it wasn't possible to accurately verify his strength. There was a member of the Insect Nest who attempted to steal from him, but still failed, unable to discern his true strength. Later when Luo Feng openly took action, he singlehandedly defeated our raiding team. At that time, it was clear that his strength was much stronger than that of a mid-stage Divine Emperor Cultivator."

"In my opinion, when he first came to Yulan City, his real strength should have been at the Mid-stage Divine Emperor Level. Only after acquiring resources from Yulan City did he breakthrough his bottleneck, stepping into the Late Stage Divine Emperor."

The Deceit Workshop Master gently shook his head: "I don't engage in speculation, I only consider the facts."

"The fact is... this Luo Feng, when he first came to Yulan City, was even sharing a lease with Emperor Qing, and he was buying the cheapest materials in the city. Clearly, he was very poor." the Deceit Workshop Master said, "But in just a little over a thousand epochs, he has become a Late Stage Divine Emperor Cultivator. Think about it, how long did you and I take, how many billions of Primordial Crystals worth of resources did we spend to reach the Late Stage of Divine Emperor?"

Elder Tian He was taken aback.

How much had he sacrificed to become a Divine Emperor at the Late Stage?

"Even if one becomes Half Primordial Level, so what?" Elder Tian He said, "Our foundation lies in the Dark Sacred Realm."

"No more questions, you will understand in the future," the Deceit Workshop Master declared.

"Yes, I will go arrange the apology right away," Elder Tian He stood up to go.

The Deceit Workshop Master watched Elder Tian He leave.

Subsequently, "Woosh—" an invisible fluctuation emerged, and a shadowy figure appeared in midair, a man radiating endless fervor.

"Wei Yang Palace Master," the Deceit Workshop Master addressed him.

The Wei Yang Palace Master, his face as if carved from stone, deep eyes emotionless, was an extremely dominant and authoritarian figure, a Half Primordial Cultivator, who after eons of trials in the Dark Sacred Realm, had established a foundation in the Nine Rivers Sacred Realm through an avatar.

Upon arriving, he had even managed to suppress the City Builder, the Yuan Xiang Palace Master, to become the most powerful Hall Master in Yulan City. The resources and benefits he received in Yulan City were also the most amongst the three Hall Masters.

"I heard your Deceit Workshop's Elder Tian He was defeated by one called Luo Feng?" The Wei Yang Palace Master looked at the Deceit Workshop Master, a rare smile on his face. His pride was such that within the city, very few could gain his attention, but the Deceit Workshop Master was clearly one of them.

"This Luo Feng has extraordinary potential. Even if he leaves for the Dark Sacred Realm in the future, it's very possible he will leave behind an avatar in Yulan City," said the Deceit Workshop Master, "The Yulan City of the future might very well be decided by him!"

"Oh?"

Wei Yang Palace Master's spectral figure smiled, "You rate him so highly?"

The Deceit Workshop Master did not say more.

"Yulan City is under the collective control of the three of us Hall Masters, if he is strong enough, then it will simply go from three Hall Masters to four," said Wei Yang Palace Master with a smile, "But for now, he still has a long way to go in terms of strength."

"It seems the Palace Master has thought this through very carefully," the Deceit Workshop Master nodded in agreement.

"Brother Yuan," Wei Yang Palace Master said, "With your talent, you should have caught up to me by now. The two paths you're cultivating, you still haven't had a breakthrough? The next expedition is about to start, you're still not participating?"

"I'm not participating," the Deceit Workshop Master said with a slight smile.

Wei Yang Palace Master nodded.

He and the Master of Deceit Workshop were also friends in the Dark Sacred Realm.

Then the communication was abruptly cut off.

"Luo Feng?"

The Master of Deceit Workshop pondered.

He established the Deceit Workshop; inherently, he was not of a kind nature. His 'Deceit Realm Dao' was filled with darkness and malice.

"He actually causes my 'Deceit Realm Heart' to feel fear?" the Master of Deceit Workshop muttered to himself. When watching the battle footage, the 'Deceit Realm Heart' condensed within him was trembling with fear, instinctively afraid of this Luo Feng.

"In the Dark Sacred Realm, there are some cultivators that cultivate both paths, elevating them to the Half Primordial Level," pondered the Master of Deceit Workshop, "But they still can't escape the Braided Cage."

"There is a legend in the Dark Sacred Realm that cultivating both paths is not enough; only by fusing the two paths into one can one undergo a qualitative change and possibly escape the Braided Cage."

"I have been cultivating and have only managed to elevate my 'Deceit Realm Dao' to the Early Stage of Divine Emperor." The Master of Deceit Workshop shook his head slightly.

He has reached the Late Stage Divine Emperor in his dual cultivation before deciding to follow the path of fusion. The fusion at that stage is too difficult; only after an endless era has the 'Deceit Realm Dao' reached the Early Stage of Divine Emperor.

He even slowed down his other two paths, worried about being on the wrong track.

"The path of fusion has a broader future. Just at the Early Stage God Emperor Level... it is comparable to the ordinary path of a Late Stage Divine Emperor. If the fusion path can reach 'Half Primordial,' it is indeed likely that one could escape the Braided Cage." The Master of Deceit Workshop naturally had both ambition and patience.

"As for this Luo Feng, let's take a closer look." The Master of Deceit Workshop did not want to make an enemy but neither did he want to get too close.

...

In the core area of Yulan City lies a cave mansion, which, in terms of area, is only a few times larger than Emperor Qing's.

"This is the new cave mansion I've rented." Luo Feng led Emperor Qing, Emperor Ming, Di Fu, and the others as they toured the new mansion.

"The energy supply here is vast." Emperor Qing sensed the energy that even liquefied into mist in the air, "It should be sufficient for a Half Primordial Level cultivator to absorb at full strength."

Emperor Ming and Di Fu also felt invigorated.

"I never thought I could live in the core area of Yulan City." Di Fu couldn't help but remark with emotion; any cave mansion in this core area was outrageously expensive to rent.

"How much is the rent here?" Emperor Ming curiously asked.

"5000 Primordial Crystals per epoch," Luo Feng answered, feeling the pinch himself. There was no way around it, as he had already rented one of the smaller ones in the core area.

"5000 Primordial Crystals for just one epoch? Merely staying here for ten thousand epochs would cost 50 million Primordial Crystals?" Emperor Ming and Di Fu were both astounded; such a housing expense is continuous, and without sufficient strength, one really wouldn't dare rent such an expensive place.

Luo Feng had no choice.

With the increase in strength, he absorbed energy faster and naturally needed to choose a better cave mansion. This cave mansion, at the very least, would ensure adequate energy supply even after 'Life and Death Dao' reached the Middle Stage of Divine Emperor.

"Hmm?" Luo Feng suddenly sensed someone knocking at the door.

Just having moved in, and there's already someone knocking?

"I'll go check it out." Di Fu volunteered and went to the courtyard gate.

Di Fu actively went to open the door and saw an elder standing outside. The elder's aura was restrained, but the slight release of energy still gave Di Fu a bit of a shock.

"Young friend Di Fu?" The elder saw Di Fu, immediately recognized him, and enthusiastically said, "I am here on the orders of my Workshop Master to present Luo Feng Divine Emperor with an invitation. Our Workshop Master will personally visit tomorrow."

Di Fu immediately took the invitation, and only then did the elder leave with a smile.

"An invitation?" Di Fu quickly delivered the invitation to Luo Feng's hands.

Luo Feng opened it to see a few simple sentences written on the invitation, mainly expressing an interest in hiring Luo Feng as the Garrison Commander of Yundan Building. Further details would be discussed in person when the Workshop Master of Yundan Building visited the next day.

"This is the third one today who wants to hire me," Luo Feng laughed

as he looked at the invitation.

"Brother Luo Feng's strength is among the top even among Elders! The forces of Yulan City aren't fools; some with weaker foundations probably all want to hire Brother Luo Feng," Emperor Qing said with a smile. "Brother Luo Feng, you should compare multiple offers and see who provides better conditions."

Luo Feng nodded.

Yulan City seems comparatively safe, but in reality, there are still some crises. For instance, there are Low Level Primordial Life forms that can infiltrate Yulan City, and there are also cultivators who may hurt others in the shadows.

Therefore, the larger the business, the more it needs sufficient martial might for protection.

Even Yulan City itself requires enough martial power! Otherwise, even with the protection of the city walls, they may not withstand an assault from Low Level Primordial Life groups.

...

On the first day Luo Feng moved into his new cave mansion, he received a total of twelve invitations, with the backgrounds of the inviting parties ranging from strong to weak.

The most significant was from one of the three great Hall Masters, 'Yuan Xiang Palace Master,' the city builder of Yulan City, who had sent an invitation for Luo Feng to visit his own mansion.

Those with weaker backgrounds were ordinary Elders, not as strong as Elder Tian He! But these ordinary Elders were more willing to spend a great cost to win over Luo Feng.

Apart from the twelve invitations, Luo Feng also received an apology gift from Elder Tian He worth a hundred million Primordial Crystals, which surprised him greatly!

"This Elder Tian He is a powerhouse from the Source World; I pose no threat to him. And yet he would send an apology gift?" Luo Feng

looked at the cloth bag in his hand, which contained 100 million Primordial Crystals.

Chapter 326 - 33 Choice (End of Episode)

Elder Tian He has gifted it, so naturally, I accepted it.

"These twelve invitations," Luo Feng sat in the courtyard, looking at the night scene of Yulan City and slightly furrowed his brows, "the other eleven invitations can all be set aside. The key one is... the invitation from Yuan Xiang Palace Master."

"The three great Palace Masters, and only Yuan Xiang Palace Master invited me?"

Luo Feng was somewhat puzzled.

This did not match the intelligence he had!

Among the three great Palace Masters, there was no need to mention Master Gai Tao who focused on Artifact Refining. The Elders around him were all interested in Artifact Refining. Naturally, he would not take the initiative to invite Luo Feng.

But it was quite odd that Wei Yang Palace Master did not send an invitation.

"Wei Yang Palace Master, likes to recruit Elders the most! Although he joined Yulan City later, he has won over the most numerous tier of Elders in the entire city! He usually invites any newly-promoted Elders," thought Luo Feng, "but he didn't invite me!"

There are more than 700 beings with the strength of the Elder tier in the city, and 327 have passed the test to acquire the status of an Elder.

It was because Wei Yang Palace Master warmly courted many Elder

tier beings that he held the strongest influence in the city.

"It just so happens that I also dislike the way Wei Yang Palace Master conducts his affairs," Luo Feng thought.

The forces of theft and plunder all belonged under Wei Yang Palace Master's command.

"I'll go see Yuan Xiang Palace Master tomorrow!" Luo Feng was curious about Yuan Xiang Palace Master, who was after all the founder of Yulan City!

...

As the builder of Yulan City, the cave mansion of Yuan Xiang Palace Master was originally the largest in the city. Later, however, Wei Yang Palace Master took over several mansions to merge into one, forcefully making it much larger than Yuan Xiang Palace Master's mansion.

Luo Feng arrived at the main gate of the cave mansion.

"Luo Feng Divine Emperor?" The main gate was wide open, a slender man stood there, smiling at Luo Feng, "The Palace Master has been waiting for Luo Feng Divine Emperor. Your Excellency, please follow me."

This slender man, dressed in a loose robe, had thick body hair.

"Thanks to 'Earth Third' General," Luo Feng said politely.

Under Yuan Xiang Palace Master, there were three Puppets, each possessing the power to rival a Perfect Level Low-Level Primordial Life. In other words, these three Puppets... If ranked among Yulan City's Divine Emperors, all could be placed within the top fifty.

"Worthy of being the one who built Yulan City, profound depth, even servants have such formidable strength," Luo Feng thought. This was much stronger than the foundations of the Ancestors from the two nations of Land of Origin.

Walking inside this massive mansion, shortly after, in a garden, Luo

Feng saw a figure sitting on the ground smiling towards him: "Luo Feng, come, take a seat."

Although Luo Feng had already obtained information on the other party, this was still the first time he saw Yuan Xiang Palace Master's true appearance.

Yuan Xiang Palace Master's appearance was not too handsome, but he naturally carried an endless charm. Luo Feng couldn't help but feel a sense of goodwill upon seeing him.

"Master, your subordinate will take his leave," said Earth Third General respectfully.

Yuan Xiang Palace Master smiled and nodded slightly.

Luo Feng then walked over and sat down opposite Yuan Xiang Palace Master.

"This Yuan Xiang Palace Master's aura is indeed very weak," Luo Feng observed closely, also sensing that even as Yuan Xiang Palace Master sat, there was a faint sense of weariness about him.

To feel weary at such a level of cultivation? This was quite incredible.

Even Luo Feng could feel that Yuan Xiang Palace Master's Life Fire was struggling to support him.

"An old ailment," Yuan Xiang Palace Master personally poured wine for Luo Feng and said with a smile, "Originally when I went hunting for Super Limit Level Low-Level Primordial Life with some friends, having gotten used to hunting, who would have thought one Super Limit Level Primordial Life would breakthrough, turning into a High-Level Primordial Life!"

"Coming face to face with a High-Level Primordial Life at close range, and I ended up like this," Yuan Xiang Palace Master sighed.

"No way to resolve the contamination?" Luo Feng asked.

Yuan Xiang Palace Master looked at Luo Feng with a smile: "As

recorded in the experiences of the Dark Sacred Realm, only by freeing one's Spiritual Will from the Braided Cage can one rid oneself of this contamination. This is the only way to get rid of it."

Facing High-Level Primordial Life, they were killed on the spot.

As a powerhouse of the Source World, with the Avatar in his home Source World sharing memories, it was also contaminated. Clearly, that High-Level Primordial Life had a strong killing intent, wishing to completely eradicate these Cultivators.

Luckily, Yuan Xiang Palace Master had the Source World's protection and a Secret Technique to guard his Spiritual Will, which allowed him to barely save his life.

"From then on, I could only focus on cultivating my Spiritual Will." Yuan Xiang Palace Master smiled, "Additionally, being too bored, I exchanged Merit Points and applied to build a city in Nine Rivers Sacred Realm, which is this Yulan City."

Luo Feng listened.

The Battle Merit required for building a city was extremely high. Yuan Xiang Palace Master was evidently very powerful originally, having accumulated a lot of Battle Merit. After being contaminated, during the city-building process, the strength he showed was even stronger than that of Wei Yang Palace Master.

The reason he ranked second in the city was due to the fact that being contaminated, maintaining his own clarity was already not easy. Naturally, if he could avoid action, he would not act. He had no interest in vying for power or profit.

On one hand, there was Yuan Xiang Palace Master, who did not vie for power or profit and hardly ever took action.

On the other hand, there was Wei Yang Palace Master who recruited various strong beings and often took action. Wei Yang Palace Master's influence was naturally stronger.

"I've heard that Yuan Xiang Palace Master rarely invites Divine Emperors," Luo Feng said. "Why did the Palace Master invite me this

time?"

"You are different."

Yuan Xiang Palace Master looked at Luo Feng, "Yesterday after you defeated Elder Tian He, I inquired about you with two Divine Emperors from Land of Origin in the Dark Sacred Realm."

Luo Feng was startled.

He inquired in the Dark Sacred Realm about the two Divine Emperors from Land of Origin? The two Ancestors?

"Although my power has weakened now, I still have some standing," Yuan Xiang Palace Master said with a smile. "I found them, and they briefly told me about you."

"In just over a thousand years, from eternal true god to Early Stage Divine Emperor."

"Another thousand years, from Early Stage Divine Emperor to Late Stage Divine Emperor! Even overpowering Elder Tian He," Yuan Xiang Palace Master looked at Luo Feng, "You are much stronger than I was when younger."

Luo Feng was secretly astonished.

The other party knew all his information.

"I have no malicious intentions," Yuan Xiang Palace Master said with a smile. "The current me is just struggling to survive. The difficulty of breaking through the Braided Cage with my Spiritual Will is too high; I don't even know if I have a chance in this life."

"But I founded Yulan City with my own hands, and I can feel that the infiltration of the low-level Primordial Life into Yulan City is growing stronger," said Yuan Xiang Palace Master, looking at Luo Feng. "I worry that one day Yulan City will be breached. At that time, hundreds of millions of Cultivators within will face a terrible calamity."

Luo Feng nodded.

Where a city is established, it is also natural for it to face destruction.

"I know Wei Yang's nature; he is extremely selfish," sighed Yuan Xiang Palace Master. "He came to Yulan City for the purpose of earning resources. Once the situation turns sour, he will only save himself."

"This city was built by me, and the hundreds of millions of Cultivators who have come here are also my responsibility," said Yuan Xiang Palace Master. "I do not wish to see a calamity where hundreds of millions of Cultivators perish gruesomely!"

"That's why I invited you here."

Yuan Xiang Palace Master looked at Luo Feng, "Your talent is incomparable to the likes of Wei Yang! Once you have grown sufficiently, your power alone will far surpass that of all the Elders combined!"

"As long as your strength is enough, I can transfer the greatest authority of the 'City Builder' to you when the time comes," said Yuan Xiang Palace Master to Luo Feng.

"The City Builder's authority?" Luo Feng was surprised.

"Yes, the rules within the city were set by me," Yuan Xiang Palace Master said, looking at Luo Feng. "I am willing to give Wei Yang Palace Master more benefits now to bind him to us. I can also reduce his benefits if needed."

"Of course, your strength must surpass both Wei Yang and Gai Tao," explained Yuan Xiang Palace Master.

"What level of strength would be considered to have surpassed them both?" Luo Feng asked.

"Both of them are Enlightened at the Half-Primordial Level with considerable accumulation, and possess no shortage of treasures," smiled Yuan Xiang Palace Master. "To completely surpass them, you must at least cultivate two paths, reaching the Half-step Primordial Level in both. Then... I can transfer the City Builder's authority to you."

To master two paths at the Half-Primordial Level?

Currently, both my Life and Destruction are at the mid Divine Emperor stage, and the Life and Death Dao is even at the Early Stage Divine Emperor.

"I still have a long way to go," said Luo Feng.

"With your talent, it won't take long," Yuan Xiang Palace Master said with a smile. "I have encountered such an exceptional talent as yours in the Dark Sacred Realm. I believe that within ten thousand eras, you can reach this level."

When Yuan Xiang Palace Master was at full strength, he was already a peerless powerhouse in the Dark Sacred Realm.

If the two Founders are considered to be at the bottom of the Dark Sacred Realm.

Then Yuan Xiang Palace Master is already standing at a higher level!

"The Palace Master really believes in me," said Luo Feng.

Yuan Xiang Palace Master flipped his hand, handing Luo Feng a spatial bracelet with a smile, "A little gift for our first meeting."

This spatial bracelet was without an owner, and Luo Feng could sense it with a thought.

Upon sensing...

Luo Feng was a bit stunned.

Inside the spatial bracelet were mountains of Primordial Crystals, not just individual pieces but chopped into large blocks. A large piece like this could be worth one Primordial Crystal in itself.

"Fifty billion Primordial Crystals?" Luo Feng was somewhat dazed.

"Just a little token," Yuan Xiang Palace Master said with a smile. "It's nothing worth mentioning."

Luo Feng thought for a moment but still accepted the gift.

This gift was significant.

By accepting, he now owed a huge favor! However, these fifty billion Primordial Crystals were of great assistance to him at present.

Seeing Luo Feng accept it, Yuan Xiang Palace Master nodded with a slight smile, "For now, you just need to focus on Cultivation. No need to concern yourself with other matters within the city."

Luo Feng nodded: "Thank you, Palace Master."

...

After watching Luo Feng leave,

Yuan Xiang Palace Master was in a complex mood.

"The contamination keeps permeating and torturing me, and its influence grows stronger on me by the day. I don't know when I will completely collapse, my consciousness obliterated," said Yuan Xiang Palace Master, feeling quite powerless. "Before I perish, I'll do something for the billions of Cultivators."

Having lived in Yulan City for so long, he inevitably grew attached.

He knew that a city could hardly exist forever. But he hoped that Yulan City would last as long as possible.

In Luo Feng, he saw hope.

"Palace Master, in the outer city's Cloud Nine District, Cultivator 'Qu Feng Divine Emperor' from cave mansion 331297 is suspected to be controlled by low-level Primordial Life," a voice rang out next to Yuan Xiang Palace Master's ear.

"Monitor all movements and associations of this 'Qu Feng Divine Emperor' within the city," Yuan Xiang Palace Master instructed. "Try to find more infiltrators."

"Yes," the voice replied respectfully.

Yuan Xiang Palace Master was rather fatigued.

The natural gifts of low-level Primordial Life beings were diverse. Despite Yuan Xiang Palace Master trying every possible method, he could not prevent some from infiltrating.

Those who infiltrated and went on a killing spree did not bother him much! What worried him were those who had been lying in wait, not making a move. These lurkers, once they erupted, would pose a huge problem.

...

At this moment, Luo Feng was also returning to his own cave mansion.

"By accepting this gift, I have effectively taken a side among the three Palace Masters of Yulan City," Luo Feng chuckled as he looked at the spatial bracelet on his wrist. From the information he had, he was already more inclined towards Yuan Xiang Palace Master.

"Reach that realm within ten thousand eras? The Palace Master has quite some faith in me."

With a smile, Luo Feng flew into his own cave mansion.

(End of this episode)

Taking a break tomorrow, the next episode starts in two days.

Chapter 327 - 1: Luo Feng's Joining

Luo Feng received twelve invitations, out of which he needs to visit Yuan Xiang Palace Master in person.

The other eleven are all Elders, mostly not as strong as Luo Feng, who sent their visitation cards first and then came to visit him one after another.

"Haha, Brother Luo Feng easily crushed Elder Tian He in battle, truly making a name for himself in Yulan City," a man in a purple robe said with a laugh.

"Vice Hall Master Zhuo Jiu, please have a seat," Luo Feng had already prepared some fruits and wine.

Both sides sat down.

"I joined Qianbao Hall at the invitation of Brother Qianbao," the man in a purple robe sighed, "In the blink of an eye, it's already been hundreds of millions of epochs!"

"Qianbao Hall is indeed quite famous among the merchants in Yulan City," Luo Feng nodded in praise, "Regarding the quality of Weapon Secret Treasures they sell, they should be ranked in the top three in Yulan City."

Luo Feng was just saying something nice.

In reality, Qianbao Hall barely ranks third in the Weapon Secret Treasures industry in Yulan City.

"It's already quite an achievement," the man in a purple robe said, "In Yulan City, Master Gai Tao leads in this Weapon Secret Treasures

industry, with his single entity holding more than fifty percent of the market. The other merchants have a hard time surviving."

Luo Feng listened.

The core strength of Qianbao Hall is their mastery in Artifact Refining by Master of Thousand Treasures Hall, who wholeheartedly dedicates himself to Artifact Refining and is not willing to be distracted by trivial matters. Vice Hall Master Zhuo Jiu is responsible for sales and many other matters.

These two Elder-level beings lead the Qianbao Hall.

"In the industry of Weapon Secret Treasures, security is very important," the man in a purple robe lamented, "After all, as the number of Weapon Secret Treasures increases, their value becomes extremely high! Whether it's Cultivators or Low Level Primordial Life who infiltrate, they always think about seizing them."

Luo Feng nodded, for such top-notch large merchants, being robbed once can mean losses calculated in 'billions of Primordial Crystals'! For people like the Master of Thousand Treasures Hall, it would be extremely painful.

"Precious Secret Treasures can be worth tens of millions of Primordial Crystals. Just a hundred of them amounts to a huge fortune," Luo Feng remarked sentimentally.

"During a theft millions of epochs ago, we lost over twenty billion Primordial Crystals," the man in purple self-mockingly said, "That incident almost cleaned out all of our publicly displayed Weapon Secret Treasures, it severely wounded us, and even to this day, we haven't been able to confirm the real identity of the raiders!"

What's a theft of a weak Cultivator, after all?

In Yulan City, real raids target large merchants.

"With Brother Qianbao and me in Qianbao Hall, and with us two Elders and the support of our Formation, we were still robbed, unable to even ascertain the identity of the opponents!" the man in purple sighed, "Actually, from another aspect, it can be deduced that... the

raiders should be some being ranked among the top twenty in the city."

Only overpowering strength can achieve this.

"This is why we come to invite you, Brother Luo Feng," the man in purple looked at Luo Feng, "Brother Luo Feng, you could easily defeat Elder Tian He. In terms of strength, you would definitely rank among the top hundred in Yulan City. With Brother Qianbao and me joining forces, plus the defensive Formation of Qianbao Hall, no one in Yulan City could think about raiding us unless three Palace Masters make their move."

The power Luo Feng displayed indeed far exceeds that of a common Elder.

"As long as you join our Qianbao Hall, you will naturally become a Vice Hall Master, with a status comparable to mine and Brother Qianbao's," the man in purple said, "and each epoch, we can give you 10,000 Primordial Crystals."

10,000 Primordial Crystals each epoch, which if over many epochs, would amount to 1 billion Primordial Crystals.

This is also the rather normal income for those at the Elder level! They don't need to venture outside the city to continuously have income.

Although less than hunting, it's safer and sustainable.

"Of course..." the man in purple continued, "Joining any side comes with a bonus. We can give a bonus of 200 million Primordial Crystals. You know, after that previous raid, our loss in Qianbao Hall was quite substantial. Thus, these 200 million Primordial Crystals need to be paid in two installments. One when Brother Luo Feng joins, and another after ten thousand epochs."

"200 million Primordial Crystals as a bonus? And split in two?" Luo Feng looked at him.

Generally, the bonus for an Elder-level existence is about 200 million.

But I am not ordinary! If my strength were less than Elder Tian He, Qianbao Hall wouldn't have come to invite me.

"It might seem a bit less," the man in purple smiled and said, "but Brother Luo Feng, you come from Source World with many Avatars. You can completely join several houses. And my Qianbao Hall is also under Wei Yang Palace Master."

"You know, Yuan Xiang Palace Master was severely injured, and nowadays he almost doesn't make a move anymore. The future of Yulan City will be decided by Wei Yang Palace Master!" the man in purple said, "By joining Qianbao Hall, you naturally become one of Wei Yang Palace Master's own."

Luo Feng nodded: "I understand the terms you offered, Brother Zhuo Jiu; frankly, they are a bit low compared to other invitations."

The man in purple's face slightly changed, "Yes, Brother Luo Feng, you have many Avatars, please give us a hand or two, and Qianbao Hall will certainly remember this favor."

"I'll think about it," Luo Feng stood up, signifying the end of the meeting.

The man in purple had no choice but to stand and leave.

"Just deploying an Avatar and still fussing over so little!" He was quite dissatisfied, but there was nothing he could do, as Qianbao Hall is now rather strapped for funds.

...

Visits from one Elder-level being after another, Luo Feng had interactions with each of them.

Before meeting with Yuan Xiang Palace Master, Luo Feng indeed prepared, planning to send Avatars to join several forces to secure substantial income to support his early phase of Cultivation.

But ever since receiving the '50 billion Primordial Crystals' gift from Yuan Xiang Palace Master, Luo Feng's thoughts changed.

"Emperor Qing brother."

Luo Feng and Emperor Qing met.

"These past couple of days, quite a few Elder-level beings have come to visit Brother Luo Feng," Emperor Qing said with a smile.

"Eleven houses invited me, help me see which one suits best," Luo Feng waved his hand, and many pieces of information floated in the air, precisely the details of the eleven invitations.

Emperor Qing looked up at this information, memorizing it in a glance.

"Brother Luo Feng, how many houses are you planning to join?" Emperor Qing asked.

"Just one," Luo Feng said.

"Just one? With so many Avatars... shouldn't you earn a bit more?" Emperor Qing couldn't help saying, with eleven houses inviting, all offering billions as a one-time payment. If it were him, Emperor Qing, he would definitely choose several.

Luo Feng shook his head: "Just pick one, it can be from the Neutral Camp or from Yuan Xiang Palace Master's side."

"Yuan Xiang Palace Master's camp is relatively weak now," said Emperor Qing. "Among the eleven families, there are four from the neutral camp, and two are with Yuan Xiang Palace Master. In terms of conditions, Dan Tower offers better ones, and the 'Changqing Building Owner' also has a good reputation. But choosing Dan Tower... the trouble will be greater, as Dan Tower and Insect Nest have always had conflicts."

"No pain, no gain," Luo Feng nodded. "I also lean towards Dan Tower, so let's go with it."

Out of eleven invitations, Luo Feng chose only one—Dan Tower!

"Emperor Ming, Di Fu!" Luo Feng called out.

Soon, Emperor Ming and Di Fu arrived promptly.

"Brother Luo Feng," said Emperor Ming.

"What is it, any good news?" Di Fu smiled.

"Take a seat."

Luo Feng looked at the three present, "Many factions in Yulan City invited us, and I have decided to choose 'Dan Tower,' to take on the role of Vice Building Owner! According to what Changqing Building Owner said before, I also invite the three of you to join."

For Dan Tower, as one of the factions, arranging three positions for Emperor Qing, Emperor Ming, and Di Fu was easily manageable, which also helped secure Luo Feng better.

"The three of you, willing to join together?" Luo Feng asked.

"Willing, of course willing," Di Fu immediately said.

"Couldn't ask for more," Emperor Ming also didn't hesitate.

"To obtain resources without taking risks, who would refuse such a good deal?" Emperor Qing was also satisfied; as a Mid-stage Divine Emperor Enlightened One, joining a faction would generally mean middle or high-level positions.

But those middle and high-level positions are very limited, who would hire him if not enough trust was there?

Because of Luo Feng's relation, Dan Tower also invited all three of them.

Emperor Qing just needed to arrange an avatar to take up a position, and then he could have a steady income.

"Since all of you agree, then I'll contact Changqing Building Owner," Luo Feng nodded.

…

In the Weapons Secret Treasures industry, within Yulan City, Master Gai Tao's faction is an absolute Overlord, occupying more than half of the market share.

But in the alchemy industry, it's fiercely competitive, with no single faction having a particularly large share.

Dan Tower is one of the top forces in Yulan City's pharmaceutical industry.

"Brother Luo Feng, Brother Luo Feng! I finally waited for you!" an excited silver-haired elder greeted warmly, "So many visited you yesterday, and I was quite uneasy. I was afraid our little Dan Tower couldn't invite you. Today, when I received your message, I was excited all the way until now!"

Luo Feng, unlike the typical elders.

Conservatively speaking, Luo Feng is among the top hundred in strength in Yulan City.

Even various factions in Yulan City believe that Luo Feng Divine Emperor might have the strength of the top fifty.

Such a being! Garrisoning a faction, that would be much more stable.

"From now on, I will be a member of Dan Tower!" Luo Feng smiled, "Luo Feng, greetings to the Building Owner."

"Brother Luo Feng, don't be so polite, no need for that," the silver-haired elder smiled warmly.

The silver-haired elder then sighed, "Speaking of which, I am also one of the oldest Elders who built the city with Yuan Xiang Palace Master. But Yuan Xiang Palace Master has been contaminated by High Level Primordial Life and hardly intervenes anymore. We old folks are not having a good time either, especially after the Insect Nest Master came to Yulan City, he has targeted me everywhere."

"Oh?" Luo Feng was surprised.

"The Insect Nest Master, too, is adept at Alchemy Techniques," the

silver-haired elder disdainfully said, "Insect Nest Master, can extract some essence of life and turn it into medicine. However, his school is bloody and evil, which I really don't admire."

The silver-haired elder sighed, "Unfortunately, with the Insect Nest Master being strong and domineering, he resorts to other tricks since he can't compete with me in normal business."

"Now with Brother Luo He, it's different," the silver-haired elder looked at Luo Feng, "Brother Luo He, you can study our Dan Tower's Formations! Whatever Formation you need to assist you, just speak up. I will buy the suitable Formation."

"Also, here's the agreed remuneration, five hundred million Primordial Crystals," the silver-haired elder took out a cloth bag in a flip of his hand, the one-time payment he offered was obviously on the higher end.

This Elder, who built the city with Yuan Xiang Palace Master, is quite strong in terms of wealth accumulation.

"This five hundred million Primordial Crystals, Building Owner should take back," Luo Feng smiled, "I plan to convert them all into various auxiliary Elixirs within Dan Tower."

"Oh?" The silver-haired elder was delighted upon hearing this.

Using them all to buy Elixirs, that could somewhat recoup some of the losses.

"Even if the three palace masters come to buy Elixirs, they would also get the lowest seven parts price," the silver-haired elder looked at Luo Feng, "Brother Luo Feng, as my Dan Tower Vice Building Owner, you get the same purchasing price as me, the lowest six parts price."

Changqing Building Owner, if taking some Elixirs, also has to pay in Primordial Crystals, even at six parts price, this price has almost no profit. But at least, it would convert the accumulated Elixirs into an income of 'five hundred million Primordial Crystals,' which pleased Changqing Building Owner greatly.

"Six parts price? Thank you, Building Owner," Luo Feng expressed his

gratitude.

"You're welcome," the silver-haired elder laughed, "By the way, Brother Luo Feng, are your three hometown old friends willing to come to Dan Tower?"

"They are naturally willing," Luo Feng said, "As for what they will do, Building Owner, please assign them roles based on their abilities."

"Alright," the silver-haired elder's smile grew even brighter.

Fellow Cultivators from the same Source World naturally have an unusual relationship.

By securing those three, it ties up the relationship with Luo Feng to some extent.

As relying solely on resources to entice is not quite stable enough.

"With Luo Feng Divine Emperor here, Dan Tower's business can operate normally," the silver-haired elder thought, the previous days were too stifling! Knowing the conflict between Dan Tower and Insect Nest, there were no Elder-level beings willing to join Dan Tower.

Until today, they finally waited for Luo Feng.

Chapter 328 - 2 Primordial Bloodline, The Most Perfect Answer

The Dan Tower occupies a vast area, after all, it is the top power in the alchemy industry of Yulan City. While its location isn't as good as Luo Feng's cave mansion, its area is several hundred times larger.

There are over a hundred large and small pavilions within the Dan Tower, the largest of which is the main pavilion open to the public, and it is also the main pavilion where elixirs are sold.

The other pavilions are mostly where the alchemists reside and conduct their alchemy.

"Buzz."

At the main pavilion, Luo Feng sensed the formation of the entire grand construct of the Dan Tower with a thought. The Changqing Building Owner did not obstruct and allowed Luo Feng to perceive the detailed formation of the Dan Tower.

"The current formation of the Dan Tower is mainly suitable for me," Changqing Building Owner said, "Brother Luo Feng, take a look and see how to arrange a formation that suits you. As for the materials you need to purchase for the formation, just mention them, there's no need to be frugal!"

Fixed arrays generally have much greater power than 'movable arrays'.

"Hmm," Luo Feng studied for a moment and then communicated a list of materials for setting up the formation to Changqing Building Owner.

"Lord, the list of formation materials is estimated to cost around 30 million Primordial Crystals," Luo Feng said.

"Very good, very good," Changqing Building Owner showed a happy expression, "I was afraid it wouldn't be expensive enough! I will immediately arrange an avatar to purchase the materials."

Luo Feng was quite satisfied with Changqing Building Owner's character.

One reason he chose the Dan Tower was because of Changqing Building Owner's good reputation!

Before long, Changqing Building Owner had bought the formation materials back.

"Brother Luo Feng, it's up to you," Changqing Building Owner handed the formation materials to Luo Feng.

Luo Feng looked at the formation materials and nodded slightly.

With his experience and vision, he could design the most suitable fixed array for himself! This fixed array consists of a total of thirty-six formations in coordination. As they are all fixed arrays, on average the cost of each formation is nearly a million Primordial Crystals.

"Boom～～～"

Above the Dan Tower's building complex center, Luo Feng floated, controlling numerous formation materials and began setting them up one by one.

Setting up a formation is akin to constructing a spaceship. Like a spaceship, there are systems that stabilize the body, those responsible for speed, for power, for scouting... Only when various systems work together does it make a spaceship.

Luo Feng's array setup was much more complicated. The formations he purchased pushed the limits of 'life and death' combinations in Yulan City and even exceeded his current control limit.

These thirty-six different formations all involve the mysteries of the

Half Primordial Level. And as each Cultivator's understanding of the 'Half Primordial Life Path' is different, it makes it even harder for Luo Feng.

With his current strength, he could only exert three to four-tenths of the array's potential power.

"Done."

It took Luo Feng half a day to complete the array without any negligence.

"Buzz." With a thought from Luo Feng, his consciousness instantly permeated the entire grand array, which naturally started operating. Invisible fluctuations spread around the Dan Tower, with all its might converging.

"Although this fixed formation only exerts a small part of its power, it is still much more powerful than my 'Xuanqing Sky Annihilation Map'. It even has a greater increase in power than the 'Undying Heart'," Luo Feng marveled inwardly.

This is the advantage of a fixed formation.

After setting up the array, Luo Feng flew back to the main pavilion.

"Brother Luo Feng, you've worked hard," Changqing Building Owner had been watching from the side.

"It's a minor matter, and since I'll be stationed here long-term, the stronger the formation, the safer the Dan Tower will be," Luo Feng said with a smile, "By the way, Lord, I'm looking to purchase a large batch of Low Level Primordial Life Materials, it's quite a large scale, who do you think is suitable to buy from?"

"Quite a large scale?" Changqing Building Owner asked, "How much?"

"At least over 2 billion Primordial Crystals," said Luo Feng.

Changqing Building Owner was somewhat surprised.

According to intelligence, Luo Feng hadn't been in Yulan City for

long, and logically he shouldn't have accumulated much wealth.

But 2 billion Primordial Crystals! Even for some of the Elders who have been accumulating for a long time, it would be difficult to come up with this amount at one time.

"This is a big deal," Changqing Building Owner thought for a moment, "In Yulan City, there are thirteen houses dealing in Low Level Primordial Life Materials. In my opinion, Elder Xingyi is the best choice for such a scale of business."

"Elder Xingyi, who has an excellent reputation, can be trusted not just with transactions of 2 billion Primordial Crystals, but even tenfold that amount," said Changqing Building Owner, "This Elder Xingyi is quite significant as the Direct Disciple of an invincible existence in the Dark Sacred Realm."

"An invincible existence in the Dark Sacred Realm?" Luo Feng was astonished.

The Dark Sacred Realm, where many elite Cultivators from countless worlds converge, who dares to call themselves invincible there?

Changqing Building Owner's eyes showed envy: "Even the most dazzling and talented become mediocre there. To be a member of the Pinnacle level in the Dark Sacred Realm... is already an incredible feat. As for being invincible, it remains a legend, and just hoping to catch a glimpse is wishful thinking."

Luo Feng held his breath.

Invincible in the Dark Sacred Realm?

"Elder Xingyi is such a Disciple of this caliber," Changqing Building Owner continued, "His business dealings are absolutely honest."

"Alright," Luo Feng had previously sold the Blood Demon Elysi corpse to Elder Xingyi's shop, which offered a high price, and Luo Feng also obtained Elder Xingyi's communication imprint.

...

Luo Feng's cave mansion.

"Buzz."

Luo Feng contacted Elder Xingyi and sent over a purchase list.

The space in front of him twisted and then a figure appeared. He had a body like a tree with branches growing all over his surface. His face was dotted with green blossoms, and he wore a radiant smile.

"Brother Luo Feng, you want to purchase so many materials?" Elder Xingyi was somewhat astonished, "I think, instead of buying those various small pieces of material, you don't need to purchase Low Level Primordial Life Bloodlines separately."

"Please, Elder Xingyi, purchase the materials based on the shopping list." Luo Feng said.

"Sure." Elder Xingyi smiled and said, "This is quite a big deal, you know, the prices for various materials from Low Level Primordial Life are very clear."

Luo Feng nodded.

He had sold many corpses of Low Level Primordial Life before and was clear about the other party's costs.

"This is the lowest price I can offer." Elder Xingyi sent over a price list.

Upon reviewing it, Luo Feng was quite pleased.

Elder Xingyi was indeed generous.

"Let's settle on this then." Luo Feng said.

"Good." Elder Xingyi showed delight upon hearing this, "The materials you are purchasing are quite rare. Even if all thirty-five cities of the Nine Rivers Sacred Realm were to gather them, it would still be troublesome. I will send some materials from the Dark Sacred Realm. I estimate that in three days, we can make the trade."

"Do I need to pay a deposit?" Luo Feng asked.

"No need." Elder Xingyi didn't care, "In three days, I will come to your cave mansion."

"Good, then we'll do as Elder Xingyi has said." Luo Feng nodded.

...

Three days later.

Elder Xingyi arrived at Luo Feng's cave mansion.

Elder Xingyi wore a loose robe, underneath which a body like tree bark was revealed, and his head even had some branches and leaves growing; his smile brimmed with endless vitality, instinctually endearing him to Luo Feng.

"Brother Luo Feng, please take a look." Elder Xingyi took out a space bracelet for Luo Feng to inspect.

Luo Feng checked with a thought.

Many materials from Low Level Primordial Life, along with several intact Primordial Bloodlines!

Each bloodline was preserved with great care.

Luo Feng sensed these bloodlines and confirmed their levels, understanding their basic mysteries.

"Correct." Luo Feng also took out a cloth bag, "2.83 billion Primordial Crystals."

This was Luo Feng's most extravagant purchase to date.

"Brother Luo Feng, if you want to buy 'Superlimit Bloodlines' in the future, you can also come to me any time." Elder Xingyi laughed, "What the Nine Rivers Sacred Realm doesn't have, I can help you procure from the Dark Sacred Realm."

"That's really too expensive, maybe in the future." Luo Feng

remarked.

After obtaining that 5 billion Primordial Crystals from Yuan Xiang Palace Master, Luo Feng could start 'wealthy purchasing methods', but he couldn't just buy anything he desired. He still needed to pursue cost-performance and efficiency.

******

Luo Feng made a purchase from Elder Xingyi, then bought various auxiliary Cultivation medicines worth 500 million Primordial Crystals from Dan Tower, and carefully prepared some gifts for his mentor Emperor Chu, Mountain Sitting Guest, Primal Chaos City Lord, and others before quietly leaving Yulan City.

Carrying such precious items, Luo Feng naturally brought along the Undying Heart, Palm World, and discreetly left Yulan City.

Luo Feng once again returned to the Land of Origin.

Inside Star Tower.

"Boom~~~"

All the materials and items purchased were laid out.

Luo Feng opened the 'Eye of Life and Death' from his forehead and under its observation, comparable to High Level Primordial Life, the deep mysteries of these materials and each bloodline can be scrutinized.

"This is an Early Stage Divine Emperor offspring from the Low Level Primordial Life 'Nirvana Fire Tribulation Snake Clan'." Luo Feng looked at the fifteen types of fragmented materials laid out in front of him - there were teeth, scales, bones, membranes…

"I have contemplated it for a long time, and with the Eye of Life and Death, I've thoroughly studied these fifteen kinds of materials."

"I've already completed the various mysteries of an Early Stage 'Nirvana Fire Tribulation Snake Clan' Divine Emperor in my mind."

Luo Feng turned to look at the jade stone holding the complete bloodline burning with a black flame.

"This is a refined complete bloodline of an Early Stage Divine Emperor from the 'Nirvana Fire Tribulation Snake Clan'. A complete bloodline contains all the mysteries." Luo Feng was quite expectant, "Now let's see, how much difference there is between the mysteries I've completed in my mind and the complete bloodline."

In the past, he used the 'poverty purchasing method', getting bits and pieces and comprehending the mysteries from them, eventually completing them in mind to form a whole.

"Buzz."

Luo Feng's Eye of Life and Death observed the bloodline burning with black flame.

"Hm?" Luo Feng was slightly startled.

"The mysteries I've completed in my mind are too crude."

"This is natural perfection."

Luo Feng learned a great deal.

He observed more than a dozen fragmented materials with the 'Eye of Life and Death', studying them in depth and completing them in his mind. It was like solving a problem! And a complete bloodline was the 'perfect answer' naturally born in the vast Primordial Space.

After finishing the problems and comparing them with the answer, Luo Feng understood the gap.

"Life and Destruction can be combined like this? I've learned something." Luo Feng was delighted, carefully experiencing these methods of combining the mysteries.

It seemed just a complete bloodline of 'Early Stage God Emperor Level Low Level Primordial Life', but for Luo Feng at this moment, the gains were still immense! After all, these beings were born to break out of their confines.

Chapter 329 - 3 Insect Nest Master

The Eye of Life and Death on Luo Feng's brow opened. This complete bloodline burning with black flames appeared multilayered in his observation, with countless secret patterns interwoven in each layer. Ultimately, these layers fused perfectly into a whole, forming a bloodline that was born to leap beyond the Braided Cage.

"Such an integration, and it can leap out of the Braided Cage?" Luo Feng was dazzled.

Merely a low-level Primordial bloodline of the early stage Divine Emperor had revealed the secret to leaping beyond the Braided Cage before Luo Feng's eyes.

"The supplemental schemes I conceived before are full of flaws."

"Back on Earth, my homeland often said, 'Learn from the nature of heaven and earth!' Now as I comprehend the 'Primordial Biological Bloodline' nurtured by nature, it seems like another form of learning from heaven and earth." Luo Feng's heart was devout.

"Let alone the complete fusion of Life and Death—even just the 'integration methods' are varied."

"I need to refine them one by one."

Luo Feng immersed himself in it.

The first integration method…

The second integration method…

The complete refinement of each method was immensely difficult. It

required understanding the essence of their bonding from countless secret patterns before ultimately distilling a universally applicable integration method.

During his comprehension, Luo Feng also consumed auxiliary cultivation treasures that significantly enhanced his speed of cognitive processes. After all, for a Divine Emperor-level mind, delving into the mysteries of leaping beyond the Braided Cage was still quite strenuous.

Even then, it took Luo Feng more than one epoch to fully comprehend the 'Nirvana Fire Tribulation Snake Bloodline' of the early-stage Divine Emperor.

"Although I distilled numerous Life and Death integration methods, I still lack the fundamental 'perfect union.'" Luo Feng thought to himself, "Countless integration methods must achieve perfect union to truly leap beyond the Braided Cage."

"This is the weakest lifeform to leap beyond the Braided Cage." Luo Feng sighed inwardly, "I can't even grasp its essence."

"Among the Innate Primordial Lives, the 'Early-Stage Divine Emperor Level' is indeed the weakest."

"This one bloodline has already taught me so much."

Luo Feng was quite content.

From merely the weakest bloodline, he had managed to distill a full nineteen Life and Death integration methods.

If these integration methods were applied to his 'Life and Death Dao,' his strength would naturally see significant improvement!

"No rush to fuse them into the Life and Death Dao; let me accumulate first."

"The second bloodline—the 'Ghost Hunter Bloodline' of the Early-Stage Divine Emperor—I had previously supplemented its fragmented materials according to twelve disconnected schemes, but those schemes were noticeably flawed." Luo Feng pondered.

Using the newly comprehended nineteen Life and Death integration methods as a basis, Luo Feng began revising and supplementing.

It took him a full million days before Luo Feng was satisfied with the newly completed scheme.

Only then did he begin examining the Early-Stage Divine Emperor 'Ghost Hunter Bloodline' with his Eye of Life and Death.

"Hmm?"

"About sixty to seventy percent similarity." Luo Feng's face lit up with joy.

Compared to the crudeness and flaws of the first bloodline's supplementation,

The second bloodline's supplementation already showed the embryonic form of a 'perfect answer.'

"The direction is right." Luo Feng grew more and more encouraged, scrutinizing the Ghost Hunter Bloodline in deeper detail.

With an ample supply of cultivation resources, Luo Feng felt himself making constant progress! At this moment, the only factor hampering his cultivation speed was his own rate of comprehension. Even a Divine Emperor-level thought process seemed insufficiently fast.

If it were a High-Level Primordial Life, their comprehension speed might be tens of thousands of times faster than his.

"Take it slow."

"If the speed is slow, simply spend more time."

At this moment, Luo Feng felt an increasing sense of gratitude toward Yuan Xiang Palace Master, whose fifty billion Primordial Crystals were proving immensely helpful. Perhaps Yuan Xiang Palace Master had carefully considered this before gifting such a fortune. This sum was more than enough for a Divine Emperor to achieve a wealthy cultivation, provided there were no extravagant expenditures.

Luo Feng's gaze swept over the bloodlines arranged nearby.

Early-Stage Divine Emperor Bloodlines totaled 323.

Middle-Stage Divine Emperor Bloodlines totaled 257.

Late-Stage Divine Emperor Bloodlines totaled 152. Though these first three types appeared abundant, Luo Feng's wealth allowed him to afford them with ease. They cost a total of 8.3 billion Primordial Crystals.

Thirty-six Perfection-level Divine Emperor Bloodlines were purchased, costing 19.2 billion Primordial Crystals. These bloodlines were Luo Feng's greatest focus, as they represented Low-Level Primordial Lives who had pushed their own bloodlines to their ultimate limits, vividly showcasing the mysteries of bloodlines. Given the rarity of Low-Level Primordial Lives embodying both Life and Death at the Divine Emperor Perfection Level in the Nine Rivers Sacred Realm, these bloodlines were scarce. Elder Xingyi specifically sourced and delivered a batch from the Dark Sacred Realm.

Each bloodline was accompanied by over ten sets of matching materials.

This time, Luo Feng also bought some missing materials, spending a hefty sum. Including the bloodlines, the total expenditure reached 28.3 billion Primordial Crystals! This was still significantly discounted by Elder Xingyi.

"Fortunately, a Low-Level Primordial Life corpse can yield a significant number of bloodlines, and the price remains within an acceptable range." Luo Feng thought.

On the Land of Origin, those Primordial Bloodline Creatures cultivated by the two nations' ancestors were far from entities capable of leaping beyond the Braided Cage. In aspects such as vitality, they remained markedly inferior. Moreover, the nations' ancestor-level bloodline refinement techniques were quite rudimentary, often extracting only a few bloodlines from a single creature.

But in the Nine Rivers Sacred Realm, the utilization of a Low-Level Primordial Life corpse was pushed to its limits! Any waste equated to losing Primordial Crystals!

Simply extracting blood from the entire body could yield ten or more complete bloodlines.

Significant skeletal structures, hooves, and claws could further be utilized for artifact refining, alchemy, or even puppet crafting.

"Whether in the Nine Rivers Sacred Realm or the Dark Sacred Realm, there are too many strong entities, and the competition for trade is brutally fierce. Every technique is refined to near perfection. The largest cost of selling various treasures is the material cost." Luo Feng reflected to himself.

A weapon at the Divine Emperor Perfection Level—if it was a common piece requiring less material—could be purchased for merely a million Primordial Crystals.

A more complex Divine Emperor Perfection-level battleship might cost two to three million Primordial Crystals.

It's only the large-scale, movable formations priced typically above five million Primordial Crystals.

"In the Dark Sacred Realm, Half Primordial-level Enlightened ones are numerous. Such Weapon Secret Treasures rarely fetch exorbitant prices." Luo Feng thought.

Truly rare items,

Such as those exchanged from the Infinite Space Treasure Vault, like the Undying Heart, were exceptionally precious.

The materials of World-Level Primordial Lives couldn't be hunted, and each piece was tremendously expensive!

As for treasures exchanged from Infinite Space valued over ten thousand reward points, they were always aids for leaping beyond the Braided Cage—like the 'Eye of Life and Death.' The quantity refined by Senior Yuan and others was strictly limited; each one was

priceless and even prohibited from being taken out of the Source World. If a cultivator died, such treasures would always be reclaimed by Infinite Space. For example, the Eye of Life and Death had already passed through the hands of many previous users.

...

Nine Rivers Sacred Realm, Yulan City.

Within a grand cave mansion, a massive spherical creature was coiled.

The surface of the spherical creature intermittently manifested faces —resentful, frenzied, slumbering, laughing, indifferent... Various expressions emanated their influences over the surrounding area! Although Low-Level Primordial Lives often infiltrated the city, no intruder had ever dared to approach this colossal lair.

This was the Insect Nest!

A peculiar and eerie life form—its mere existence rivaled the power of three Hall Masters.

The Insect Nest's surface was riddled with countless holes, with cultivators frequently flying in and out.

At the core of the Insect Nest.

"Master, over the past epoch, our elixir sales have dropped by nearly half." An elderly man spoke respectfully.

"How could sales decline so drastically?"

A graceful and beautiful woman sat there, mildly surprised.

Through her long cultivation journey, her resources came from multiple sources, including the operations, thefts, and raids conducted across her Insect Nest's sphere of influence. Naturally, all income retained a share for the Insect Nest Master.

Merely elixir sales—for just an epoch—were inconsequential to her.

But if this trend persisted, it would be frustrating.

"The Dan Tower has massively increased output during the last epoch. Their elixirs of the same tier are slightly cheaper than ours. Some factions in the city have directly shifted to bulk purchases from the Dan Tower, causing our sales to drop." The elder reported.

"Changqing Building Owner is this bold?" The woman was astonished. "Who gave him such courage?"

"During your closed-door cultivation, Yulan City welcomed a newly ascended Elder-level powerhouse named Luo Feng. He's already joined the Dan Tower." The elder informed.

The woman nodded faintly, then began reviewing the latest intelligence on Yulan City.

After reading through the reports, she understood the situation.

"A newly ascended powerhouse, capable of suppressing Tian He?" Her gaze turned cold. "Though aware of the conflict between Dan Tower and me, he dares to meddle?"

"Simply continue normal sales; other matters don't concern you." She instructed. "You may leave."

"Understood." The elder obeyed and retreated.

The woman sat quietly, gazing toward the direction of the Dan Tower.

"The city isn't suitable for open action. Let the 'Spiritual Avatar' meet this Luo Feng Divine Emperor." She remained seated, yet from the vast Insect Nest, an imperceptible stream of spiritual power emerged.

Once the spiritual stream left, the surface of the Insect Nest regained its calm, no longer manifesting faces.

"Hmph."

The spiritual power condensed into the woman's likeness, moving through Yulan City's skies.

In her ordinary state, she remained undetectable to others.

"Hmm?"

Yulan City's multicolored layers of defense systems swept over the woman's avatar.

"It's the Insect Nest Master?"

"Why would she dispatch a Spiritual Avatar?"

Among the three Elder-controlled defense systems, her presence was noted, but they refrained from intervention. After all, the Insect Nest Master was an Elder of Yulan City, and her avatar's activity within the city was entirely legitimate.

"Arrived."

In mere moments, the Insect Nest Master's spiritual avatar reached the entrance of the Dan Tower. She raised her head to observe the sprawling complex.

...

Within the Dan Tower complex resided two Elder-level individuals—the Changqing Building Owner and, naturally, Luo Feng.

Luo Feng was currently attuned to the formations he'd deployed across the Dan Tower.

"These thirty-six layers of Life and Death Formations were refined by various senior cultivators who each possess unique achievements in the art of Life and Death integration." Luo Feng considered. "Previously, some aspects eluded me."

"But after comprehending Primordial Bloodlines, I now understand them better." Luo Feng reflected. "Some elements within these formations even appear clunky and rudimentary."

Though these seniors had other opportunities, none possessed the Eye of Life and Death. Even if they bought Primordial Bloodlines, they couldn't observe their complete structure—they could only view

fragments and infer from them.

"Hmm?"

Luo Feng abruptly sensed an eerie and chilling pulse—faint yet dauntingly terrifying through mere contact.

His Lie Yuan Technique, constantly active, automatically shielded against the cold intrusion.

"Who's there?"

With a single thought, Luo Feng increased the power of the thirty-six formation layers while also activating his Biomimetic Destruction Eye. He then spotted a spiritual womanly figure standing at the entrance of the Dan Tower's main building.

——

Special thanks to "Bookfriend20241008072526081" and "Ai Ling Xin" for the support as new Alliance Hierarchs!

Also, thanks to the Old Alliance Leader Lao K for repeated generosity!

Thanks for everyone's support!

Chapter 330 - 4 Lie Yuan Technique Strikes!

The biomimetic Eye of Destruction on Luo Feng's brow could see the figure of the spiritual woman, yet he could not recognize her. This was because the 'Insect Nest Master's' True Body and Spiritual Avatar had distinctly different appearances and auras.

"The Insect Nest Master?" Changqing Building Owner, relying on the Dan Tower Formation, managed to glimpse the figure of this spiritual woman. His expression changed abruptly upon sighting her.

He had had far too many dealings with the Insect Nest Master and had even encountered her Spiritual Avatar before.

"Changqing!"

The spiritual woman stood there, coldly looking at the Changqing Building Owner, her spiritual fluctuations transmitting, "Just because this Divine Emperor Luo Feng joined your Dan Tower, you think you can ignore me? Expanding your business at will?"

"I'm not expanding at will; it's just normal competition," replied the Changqing Building Owner. "My prices remain the same as before; I've merely started offering stable supplies. My prices for elixirs of the same tier have always been lower than those of your Insect Nest, so naturally, the parties in Yulan City prefer to buy from me."

"Heh, heh."

The spiritual woman looked at the Changqing Building Owner and laughed, a wanton laugh. "In front of me, do you think you have the right to compete normally?"

Changqing Building Owner felt a heavy pressure in his heart.

"It seems I've been too lenient with you for too long," the spiritual woman sighed. "That's my mercy at fault!"

"Insect Nest Master, you and I are both Cultivators from the Source World, and we both possess Avatars," the Changqing Building Owner said angrily. "You cannot truly harm me, so why must you bully me?"

"Every time I see you, I'll trample over you. What can you do about it?" The spiritual woman sneered coldly, her gaze shifting to Luo Feng in the not-too-distant area. "And this must be Divine Emperor Luo Feng? Are you certain you want to meddle in the matters between me and the Changqing Building Owner?"

"You'd better think it through! If you get involved, expect to pay the price!" The spiritual woman stared at Luo Feng.

"I've already taken the reward from the Building Owner," Luo Feng said calmly. "I am now the Vice Building Owner of Dan Tower. I have no intention of making an enemy of the Insect Nest, but regardless, I must safeguard Dan Tower."

"I see."

The spiritual woman nodded. Her eyes suddenly turned pitch black as she spoke in a deep voice, "I'd like to see what kind of strength you have to act so insolently in front of me!"

"Brother Luo Feng, be careful. This is her Spiritual Avatar, adept at spiritual pollution," the Changqing Building Owner transmitted through voice communication.

"I know." Luo Feng had already anticipated facing the Insect Nest Master when he accepted the Changqing Building Owner's invitation.

The information about the Insect Nest Master was no secret in Yulan City.

The Insect Nest Master, even when she was weak, endured intense spiritual pollution. After reaching the Late Stage of the Divine Emperor in the Enlightened One Lineage, she seemed unable to achieve Perfection, likely because the pollution was too severe. As such, she switched to cultivating the Bloodline System, using all her

accumulations in the Dark Sacred Realm to exchange for a high-level Primordial Bloodline—the 'Infinite Cicada Tomb' bloodline.

This bloodline actually thrived on spiritual pollution; the more severe the pollution she endured while maintaining a sliver of clarity, the stronger the power of her bloodline grew.

It was said…

That if her spiritual will could break free from the Braided Cage and she accumulated enough spiritual pollution, she could fully unleash the true power of the 'Infinite Cicada Tomb,' triggering the ultimate awakening of her bloodline and ascending as a High-Level Primordial Life.

"This time, she has come as a Spiritual Avatar, so her methods are purely spiritual," Luo Feng thought. "In the Dark Sacred Realm, she has done everything she can to enhance her spiritual pollution. With the 'Infinite Cicada Tomb' bloodline, she can still maintain clarity. However, when her pollution touches other Half Primordial Level experts… even if they can resist, they would require a long time and great effort to gradually purge themselves of the pollution."

Even among the Elders, with their spiritual wills reaching the Half Primordial Level, many were deeply apprehensive of the 'Insect Nest Master.'

But Luo Feng had no fear.

"The Undying Heart inherently resists spiritual erosion. Moreover, I carry the Secret Technique left by Senior Yuan: the 'Lie Yuan Technique.' With these dual methods, why should I fear her pollution? That would be the joke of the ages!" Luo Feng mused.

"Luo Feng!"

The spiritual woman grinned at Luo Feng, her smile widening.

Whoosh——

The spiritual woman appeared before Luo Feng and gently embraced him!

This was the power of the spirit, transcending the concept of speed! In one thought, she had already ensnared him, her ethereal form covered by distorted, maddened faces.

The moment Luo Feng was embraced, everything around him vanished.

In that instant…

Luo Feng 'saw' a massive, illusory insect nest towering before him, imprisoning countless consciousnesses. The faces of these trapped consciousnesses writhed and struggled. The illusory insect nest also began corroding Luo Feng.

"How many cultivators have you killed? And not just killed but actively devoured their souls, forcing them to become part of you?" As he was invaded, Luo Feng instantly grasped the Insect Nest Master's methods.

This Insect Nest Master, by choice, had absorbed countless souls, not annihilating them but integrating them into her insect nest, where their 'consciousnesses' would remain forever trapped.

Though she appeared to be a single cultivator, the Insect Nest Master actually contained the consciousnesses of billions of creatures.

But her dominant consciousness was the ruler. The rest were mere sustenance!

"I carry the pollution alone. How much could I possibly endure alone? So, I let them bear it with me, to share the burden."

"This is what I call the power of the collective. Hahaha… Luo Feng, now experience the pollution I endured during my Infinite Nightmare!"

The voice of the Insect Nest Master reverberated, and her corruption spread.

This was precisely why many Elders avoided her at all costs. Her pollution, borne by billions of consciousnesses, was far worse than simply eliminating a few Avatars.

"Hm? What's this?"

The Insect Nest Master was taken aback.

She tried every tactic she knew for several breaths' time but failed to find even the smallest flaw or crack, unable to corrupt Luo Feng in the slightest.

"Insect Nest Master, even if you persist with your cultivation, devouring the souls of countless cultivators and leaving them in eternal torment, scum like you should have died long ago," Luo Feng spoke with murderous intent.

At that moment, Luo Feng resented nothing more than his current lack of strength!

After all, the Insect Nest Master hailed from the Source World and possessed multiple Avatars, making her incredibly difficult to truly kill.

"No wonder you dared to aid the Changqing Building Owner. So you have a way to resist spiritual corruption. I came merely as a Spiritual Avatar to warn you this time, but next time, I'll bring my True Body —"" sneered the Insect Nest Master, aware she could do nothing to Luo Feng.

"You, warning me?"

"You pathetic scum!"

"Lie Yuan Technique!"

Without mercy, Luo Feng struck.

Eclipsing into Divine Emperor Perfection in spiritual will long ago, Luo Feng had recently gained a faint insight into breaking free from the Braided Cage while studying the Primordial Bloodline, achieving an almost flawless union—a synergy of all mysteries.

His understanding of the Lie Yuan Technique deepened, infusing it with the essence of natural perfection.

"Annihilation!"

With his spiritual will pushing the limits below the Braided Cage, and his newfound insight breathing life into the Lie Yuan Technique, Luo Feng unleashed his strike.

A small, slowly rolling miniature star appeared within the 'sight' of the Insect Nest Master.

This star was far smaller and more ordinary than before, yet it represented a spirit more condensed, its aura perfectly restrained.

"Boom——"

The Insect Nest Master's Spiritual Avatar could not escape upon witnessing this rolling miniature star.

"A spiritual technique?" The Insect Nest Master's Spiritual Avatar felt indifferent, having engaged in innumerable battles of the mind. Why fear Luo Feng's mental attack?

"Boom!"

That miniature star struck the Spiritual Avatar of the Insect Nest Master, transforming her feminine form into a massive illusory insect nest—her most stable form.

Yet even in this form, the illusory insect nest was torn apart, pierced through, and crushed by the star.

"Impossible!" The Insect Nest Master was incredulous.

The mental star Luo Feng unleashed was so small, so plain! Yet impervious to resistance!

At that moment, the Insect Nest Master realized the star carried a faint essence of natural perfection, reminiscent of her 'Infinite Cicada Tomb' bloodline.

"He must have inherited the Secret Techniques left by Senior Jin and the others," she thought in agony.

Her disrupted illusory insect nest imploded, shattering millions of fused souls within. For those souls, destruction brought not despair but liberation, their final moments marked by serene smiles, signaling the collapse of the nest's carefully maintained corrupt equilibrium.

"Not good. My Spiritual Avatar's damage has unhinged the pollution. I must retreat at once."

Taking the strike, the Insect Nest Master's Spiritual Avatar soared away, vanishing toward her lair.

"Luo Feng! You've caught me off guard with your formidable spiritual technique today, but I'll reclaim this loss!" Her escaping Spiritual Avatar's voice boomed around Luo Feng and the Changqing Building Owner before fading into silence.

As a purely spiritual being, her speed, both in attack and retreat, far surpassed any physical form.

Luo Feng could only manage one Lie Yuan Technique strike before she vanished into the void out of reach.

"Pure Spiritual Avatars escape so quickly," Luo Feng remarked.

Beside him, the Changqing Building Owner stared in astonishment.

"You defeated the Insect Nest Master?" The Building Owner could hardly believe it. He had only invited Luo Feng to hold the fort with the support of the fixed array, not expecting the defeat of the Insect Nest Master!

Who was the Insect Nest Master? Beneath the Three Hall Masters of Yulan City, there were figures like the Insect Nest Master, Master of Deceit Workshop, and Elder Xingyi. Their strength was qualitatively different from ordinary Elders.

Ordinary Elders might reach the Late Stage Divine Emperor through a single path. But the likes of the Insect Nest Master and Master of Deceit Workshop had strength equivalent to mastering two paths at the Late Divine Emperor Stage.

"I only defeated her Spiritual Avatar, nothing more," Luo Feng said seriously.

He understood clearly that if the Insect Nest Master brought her True Body, equipped with multiple Secret Treasures, the danger would be far greater than that posed by a mere Spiritual Avatar.

...

"Damn Luo Feng."

Inside her vast insect nest, the returning Spiritual Avatar of the Insect Nest Master was in immense pain.

Luo Feng had no idea just how much trouble his Lie Yuan Technique strike had caused her! This was far worse than losing several Avatars.

"The pollution is out of control!"

"I must stabilize it, stabilize it!"

She could no longer afford thoughts of retaliation or concern herself with the outside world.

Chapter 331 - 5 Middle Stage of Divine Emperor, Life and Death Dao

Inside one of the small towers among the Dan Tower complex.

Emperor Ming and two of his subordinates were inspecting the Dan Pills.

"Phew."

Countless Dan Pills floated densely in midair.

"Heart Cleansing Pills, 935 of superior quality, 72 of supreme quality." One of the subordinates observed the Dan Pills and stated his assessment.

For Dan Tower's alchemists, creating medium-grade pills was considered a major failure, let alone producing waste pills.

"Accurate." The other subordinate confirmed after inspecting.

Emperor Ming glanced at the pills, nodded in satisfaction, and carefully divided them into two separate groups for storage.

Currently, he served as the Deputy Hall Master of Dan Tower's Heart Clearing Hall, responsible for the easiest task: identifying and collecting pills, specifically Heart Cleansing Pills. Heart Cleansing Pills were the most commonly sold foundational pills in Dan Tower, accounting for about thirty percent of its total sales.

As for collecting materials and alchemy itself, those required more specialized individuals.

"These pills have already been checked once by the alchemists, then inspected and stored by me here. Before selling, a final inspection will be conducted as well—nothing could possibly go wrong," thought Emperor Ming, feeling at ease.

Dan Tower's most intricate and crucial part lay in alchemy, but his abilities weren't suitable for meddling in that.

"By following Brother Luo Feng, I can still serve as the Deputy Hall Master of Heart Clearing Hall in Dan Tower, earning two hundred Primordial Crystals per epoch. Living so leisurely for ten thousand epochs means accumulating two million Primordial Crystals." Emperor Ming was quite pleased with his work.

With this income, along with free residence in Luo Feng's cave mansion, he could still manage to amass a fortune.

"Deputy Hall Master, the production of Heart Cleansing Pills has steadily increased over the last epoch," remarked one of the subordinates. "I've heard the Insect Nest people aren't pleased."

"Do you think the Insect Nest will make a move?" The other subordinate seemed concerned.

Although they were just ordinary members, they were quite informed and aware of the ongoing conflict between Insect Nest and Dan Tower.

In the past, Dan Tower had conceded, but now it was rapidly expanding its production. Given the Insect Nest's domineering style, how could it remain tolerant? Naturally, these ordinary members were a bit uneasy.

"Why panic? The Dan Tower Owner and Luo Feng Divine Emperor themselves are stationed here—you have nothing to fear," Emperor Ming reprimanded.

"Deputy Hall Master, you're from Source World and aren't scared, but we are! We've even temporarily canceled our external accommodations and moved entirely into Dan Tower." The two subordinates spoke with visible worry.

In the Dan Tower complex, personnel like Luo Feng or the key alchemists were provided with private cave mansions suitable for retreats and cultivation.

But for those at the very bottom, there weren't any dedicated places for training in seclusion. Living permanently inside the Dan Tower meant their cultivation routines were far from ideal.

"You've even canceled your rentals?" Emperor Ming was startled.

"We don't dare to leave Dan Tower at all. If the Insect Nest can't deal with the Tower Owner or Luo Feng Divine Emperor, they might vent their anger on us instead." The two subordinates spoke with great caution as they didn't possess any spiritual avatars.

Emperor Ming nodded in acknowledgment.

Through Luo Feng, Emperor Ming had learned that the Insect Nest Master's spiritual avatar had already clashed once with Luo Feng! It was anticipated that the Insect Nest Master might attempt revenge again.

"You must indeed be careful," Emperor Ming advised.

In confrontations at the level of the Insect Nest Master and Luo Feng, he knew he couldn't provide any meaningful assistance.

...

The members of Dan Tower were somewhat uneasy but couldn't give up such a lucrative job. They could only exercise caution.

Luo Feng and Changqing Building Owner were also fully prepared!

Since they had initiated "normal competition," preparation for conflict with the Insect Nest Master was inevitable.

"Her spiritual avatar suffered a setback; given her temperament, she'll definitely retaliate," Changqing Building Owner spoke resolutely.

"If her true body intervenes, I'll have to rely on formations for defense," Luo Feng replied with awareness, "but as long as I focus

solely on defense, I am confident in holding my ground."

"Defense alone will suffice," Changqing Building Owner laughed. "After all, this is Yulan City. Within the city, there are laws forbidding mutual slaughter! Therefore, she can't act recklessly here."

Outside the city, she could unleash her aggression.

But inside, there were numerous restrictions.

"Given her vindictive nature, I estimate she'll strike within a few epochs," Changqing Building Owner predicted.

"I'll keep one of my avatars stationed here long-term, just waiting for her arrival," Luo Feng smiled.

Time passed.

Epoch after epoch went by. In the blink of an eye, ten epochs had elapsed, and the Insect Nest Master had not made a move.

"Hmm?"

Both the vigilant Luo Feng and Changqing Building Owner were baffled.

"The Insect Nest Master took a loss and then held back?" Changqing Building Owner couldn't believe it. "That's entirely out of character for her!"

In all of Yulan City, who didn't know that the "Insect Nest Master" was tyrannical! As one of the three leaders of theft and plunder forces, the Insect Nest Master stood side by side with the Master of Deceit Workshop and the Shadow Tower Owner—all notorious figures.

However, the Master of Deceit Workshop and Shadow Tower Owner usually acted cautiously and calculatedly.

The Insect Nest Master, on the other hand, operated with a domineering approach: submitting to her meant flourishing, defying her meant annihilation.

"Could it be that after her spiritual avatar clashed with Luo Feng, she determined it wasn't worth the risk?" Changqing Building Owner speculated.

"I used secret techniques to wound her, but I estimate it was nothing more than a minor injury," Luo Feng replied with perplexity. "Such a minor injury shouldn't matter much at all."

During that clash within the illusory Insect Nest, his Lie Yuan Technique had sliced a wound. Yet compared to the entirety of the illusory Insect Nest, that wound was far from substantial.

"Perhaps issues in the Dark Sacred Realm are delaying her revenge," Changqing Building Owner suggested.

"Hmm." Luo Feng nodded.

...

Years flowed by.

Luo Feng and the Dan Tower Owner continued to wait patiently, prepared at all times to fend off an attack from the Insect Nest Master.

Unconsciously, over two hundred epochs had elapsed.

Within the vast interior of the Insect Nest.

"Finally stabilizing the contamination." Even the Insect Nest Master's face bore signs of exhaustion.

The sudden loss of billions of souls had left her reeling.

These imprisoned souls, tortured across endless ages yet remaining intact, were integral to her power. Losing such a great number had truly pained her.

"After consuming another batch of cultivators from my homeland, I have finally stabilized my spiritual power and suppressed the contamination completely," the Insect Nest Master reflected.

In her homeland, the Source World, everything served as nourishment for her.

Countless cultivators' lives were hers to consume at any time.

Though her soul capacity was vast, it was nonetheless limited.

"While the contamination is now under control, any direct clash between my true body and Luo Feng wielding his Will Secret Technique might cause another major setback." After spending such a long time stabilizing herself, the Insect Nest Master was in no mood to suffer another hit from the Lie Yuan Technique.

"I need a sufficiently powerful Secret Treasure that can resist mental attacks." The Insect Nest Master muttered, feeling troubled.

While she did possess a mighty Secret Treasure, it was situated within the Dark Sacred Realm! Given the dangers of the Dark Sacred Realm —where challenges arose constantly and where even Half Primordial-level entities were common—she prioritized using her treasures there.

"The Dark Sacred Realm remains my top priority!"

"As for Yulan City, I'll find a way to purchase a suitable treasure. Without adequate protection for my spiritual will, I won't confront Luo Feng again." The Insect Nest Master contemplated. "Unfortunately, the extensive losses I've suffered mean I can only muster thirty billion Primordial Crystals at the moment."

Items like the "Undying Heart," which offer sufficient protection for spiritual consciousness while matching one's own essence, were exceedingly rare. Purchasing such treasures for thirty billion Primordial Crystals would be considered just a fair market price.

These treasures were extremely difficult to acquire.

If a powerhouse wanted to sell such an item, it was often purchased by their close allies at exorbitant rates immediately.

"Without a treasure, I'll have to bear this grievance," thought the Insect Nest Master, feeling irked.

Normal elders, whose spiritual will reached its peak bottleneck, would only sustain minor injuries from Luo Feng's Lie Yuan Technique and recover quickly.

Ironically, it was the Insect Nest Master who felt more vulnerable to Luo Feng's Lie Yuan Technique.

...

Three hundred epochs had passed since Luo Feng's clash with the Insect Nest Master's spiritual avatar. During this time, Luo Feng experienced nothing but calm days in Yulan City.

Land of Origin, inside the Star Tower.

Luo Feng sat cross-legged, his brow marked by the Eye of Life and Death, focusing on the 195th sample of early Divine Emperor-level Primordial Bloodline.

Each strand of Primordial Bloodline unveiled a hint of the mystery that lay "outside the cage." Luo Feng could sense countless intricate Secret Patterns merging in perfect unity, forming an innate masterpiece! Yet he knew that his own path was far from achieving such perfection.

Nonetheless, Luo Feng could also sense his growth.

The more he delved into these Bloodlines, the more he uncovered patterns. His understanding of the integration of Life and Destruction had reached profound depths, allowing his conception to achieve ninety percent similarity with the Primordial Bloodlines.

"Simple integration is too ordinary."

"True fusion of Life and Destruction transforms everything."

Luo Feng's mind spontaneously surged with inspiration, pushing him toward attempting true fusion.

Suddenly, a fully fused path surfaced in his heart!

"The Life and Death Dao has broken through?" Luo Feng exclaimed in

pleasant surprise, "So quickly?"

Previously, when he advanced the Life and Death Dao from the Ultimate Realm of Godly King to the Early Stage of Divine Emperor, Luo Feng had done so through deliberate contemplation and study.

This time, his advancement came naturally, stemming from profound insights gained through the exploration of Primordial Bloodlines. When the accumulated knowledge reached critical depth, the Life and Death Dao transitioned naturally into the Middle Stage of Divine Emperor.

"I truly owe thanks to Yuan Xiang Palace Master; with his gift of fifty billion Primordial Crystals, I've been able to afford such abundant resources for my cultivation and understanding." Luo Feng felt thoroughly satisfied.

Over the past three hundred epochs, he had frequently used various auxiliary elixirs sourced from Dan Tower.

These aids greatly accelerated his comprehension of Primordial Bloodlines.

"I haven't even finished studying the complete set of early Divine Emperor-level Bloodlines yet. Higher-level mid-stage, late-stage, and even perfected Bloodlines await." Luo Feng brimmed with confidence.

Now, his Life and Death Dao had ascended to the Middle Stage of Divine Emperor.

When he fully analyzed the remaining Bloodlines, where might his Life and Death Dao lead?

"Boom～～～"

As Luo Feng conjured a thought.

An Endless Blood Sea materialized around him—the Middle Stage of Divine Emperor's Life and Death Dao represented an evolution in quality compared to the previous stage.

"The Middle Stage of Divine Emperor's Life and Death Dao should

rival ordinary paths at the Half Primordial Level." Attempting to perceive its magnitude, Luo Feng gauged the immense leap encompassed in his advancement.

This vast improvement in his Dao far surpassed the strength offered by artifacts like the "Undying Heart" or the "Palm World."

"Haha, this is a day worth celebrating," enthused Luo Feng, his heart stirring with excitement. "Ah, I've yet to deliver the gifts I prepared for my masters!"

After returning to the Land of Origin, his focus had been entirely consumed by the study of Primordial Bloodlines. Only now did he feel free.

"Let's pay a visit to each of my masters."

Carrying his gifts, Luo Feng set off initially toward the Chu Capital to visit his master, Emperor Chu.

———

Highly recommend Wandering Toad's new book, *Sword Shouting Spirit Sky*. It's an excellent martial arts novel.

Chapter 332 - 6 Disciples and Master

In a secluded courtyard within Chu Capital.

Emperor Chu leisurely flipped through a tome. His current status in the Land of Origin was lofty and unassailable, carefree and unbothered—no one dared provoke him. Even certain duties that emperors were obligated to fulfill had been exempted by the Primogenitor on his behalf. Emperor Chu now focused his entire mind on comprehending the Great Dao of the Ultimate Realm.

"Hmm?" Emperor Chu looked up in surprise. A man dressed in black with black hair appeared above the courtyard before descending down.

"Luo Feng." Emperor Chu rose with a smile. "How do you have the time to visit me?"

He was well aware that his disciple's focus was primarily outside the Source World! The two nations' Ancestors, Emperor Qing, and the others were the same—they rarely made appearances in the Land of Origin.

"Master," Luo Feng greeted with a smile. "I visited the Nine Rivers Sacred Realm and managed to gather some resources. I've prepared cultivation treasures for you, Master."

"You still think of me…" Emperor Chu grinned widely, evidently pleased.

Luo Feng waved his hand, and next to him appeared an array of cultivation treasures. Each item was meticulously placed with care. The faint energy naturally emanating from the numerous rare artifacts of the Nine Rivers Sacred Realm rendered Emperor Chu

slightly dizzy. Yet amidst the dizziness, his thoughts quickened, and inspiration began to surface.

"These are the auxiliary treasures I collected in the Nine Rivers Sacred Realm. Based on Master's life form level, I believe these are the most suitable treasures—92 types in total. Master can try each one to see which suits you best," Luo Feng explained. "I will now send the methods of usage for these auxiliary treasures to Master."

Emperor Chu received the communication.

Even as the Emperor of Flame Wind Ancient Country, Emperor Chu had only heard of three of the ninety-two rare treasures before, as he had found them too expensive to acquire.

"Master cultivates the Path of Destruction. While in the Nine Rivers Sacred Realm, I sought out various inheritances related to it," Luo Feng said. "Anything below the Divine Emperor level was cheap—I bought over a hundred of them. Master can use them as references."

"Oh." Emperor Chu listened attentively.

"And this one!" Luo Feng flipped his hand, presenting a book. "These are my personal reflections on the 'Path of Destruction.' Master should read it more often."

Currently, what Master needed most was to comprehend the Ultimate Realm of the Path of Destruction.

The "Path of Destruction" written by Luo Feng did not exceed the scope of the Ultimate Realm of the Godly King. However, after witnessing countless fusions of life and destruction transcending the Braided Cage, Luo Feng's understanding of destruction had grown ever deeper.

Looking back, writing a book on the "Path of Destruction" was naturally extraordinary.

Luo Feng also intended to give Morosa a version spanning up to the early stage of the Divine Emperor level. Though Morosa relied mostly on consuming resources to achieve the Ultimate Realm, his chances to break through to the Divine Emperor were minuscule. Yet,

occasional support might someday lead to a miracle.

"How much Primordial Crystal did you spend on all these treasures?" Emperor Chu asked as he gazed upon the myriad treasures carefully arranged before him.

"Not much, not much," Luo Feng replied vaguely—it was merely about a million Primordial Crystals! Given his current standing, it was indeed a trivial amount.

Emperor Chu looked at the book Luo Feng had personally written.

"Of the ninety-two auxiliary treasures you've given me, I had only heard of three before. It's clear these must be incredibly costly." Emperor Chu sighed. "And this tome you personally wrote—it must have taken a long time to complete, didn't it?"

"Luo Feng."

Emperor Chu gazed at Luo Feng. "You've only been outside the Source World for a thousand-plus epochs—there's no need to trouble yourself with looking after your Master! You should focus entirely on your own cultivation. Though I've never ventured beyond the Source World myself, I've long understood that the outside is fraught with danger and survival is incredibly difficult."

"In the world beyond the Source World, survival depends on one's own grit! Competing against the experts of countless realms. I, as your Master, live peacefully in the Land of Origin, but you face extreme dangers out there."

Emperor Chu and the other Emperors were all well aware of the terror awaiting outside the Source World.

"Your cultivation is far more important. Wait until you've truly established yourself before you think of looking after me again." Emperor Chu glanced at the generous gifts, reluctant to accept them. "These treasures—go exchange them back for Primordial Crystals."

"That won't be necessary."

Luo Feng waved it off. "Rest assured, Master—I ventured into the

Nine Rivers Sacred Realm, which is comparatively less perilous, far safer than the Dark Sacred Realm. In the Nine Rivers Sacred Realm, I'm already among the top tier. There are but a few stronger than me."

"Don't deceive your Master!"

Emperor Chu shook his head. "We Emperors of the Imperial Clan are destined to venture beyond the Source World. Regarding the Nine Rivers Sacred Realm, I have some shallow knowledge, even as recorded by the Primogenitor. The Primogenitor himself admitted that he wouldn't dare claim to be among the top tier there! There are plenty stronger than him!"

Luo Feng pondered.

In Yulan City alone, there were dozens stronger than the two nations' Ancestors.

Across the thirty-five cities of the Nine Rivers Sacred Realm, there must be thousands stronger.

"Indeed, there are many in the Nine Rivers Sacred Realm stronger than the two nations' Ancestors," Luo Feng acknowledged before meeting his Master's gaze. "But compared to me, there truly aren't many."

"Hmm?" Emperor Chu scrutinized Luo Feng. "Are you saying you're stronger than the two nations' Ancestors?"

"Yes, considerably stronger," Luo Feng replied without hesitation.

"Stronger by a level?" Emperor Chu was stunned.

A full level?

"I've recently broken through." Luo Feng smiled faintly. "Master is the first to know aside from myself."

Emperor Chu's heart churned in monumental waves.

How long had the two nations' Ancestors spent cultivating? They had

endured countless Reincarnation Eras of the Land of Origin! Even ventured into the Dark Sacred Realm.

His own disciple, Luo Feng, had spent how much time in the Nine Rivers Sacred Realm? A mere thousand-plus epochs, and yet he had surpassed the two nations' Ancestors by a full level? It was horrifying!

"Master, can you accept these gifts now?" Luo Feng asked.

"I'll take them, I'll take them," Emperor Chu replied, finally snapping out of his shock. He reminded, "The more dazzling your talents, the more you must remain steady!"

"Don't worry, Master," Luo Feng said.

"Sit down quickly."

Emperor Chu waved his hand to collect the treasures and said, "Tell me more about the Nine Rivers Sacred Realm. My understanding of it largely comes from the Imperial Clan's records. Even Emperor Qing refuses to share much detail with me."

"Alright. I'll give you a thorough rundown," Luo Feng agreed, smiling as he poured wine for his Master and himself before sitting down to chat.

...

They talked for a long time before Luo Feng bid farewell.

Remaining in the courtyard, Emperor Chu felt an emotional sigh escape him.

"Back when I took Luo Feng as my disciple, I thought to nurture him well, believing his exceptional talent might allow him to accompany me in ventures beyond the Source World." He reflected, "Who would have imagined that he's already surpassed the two nations' Ancestors by a full level?"

"My disciple, Luo Feng…"

Emperor Chu didn't know what to say.

His disciple's talent was utterly extraordinary—a meteoric rise!

Even the trio of Emperor Yan, Emperor Xi, and Emperor Wu had suffered two deaths and one escape because they slightly blocked his path. Emperor Xi and Emperor Wu were ultimately slain by the Flame Wind Primogenitor.

"The Primogenitor truly has greater foresight than me." Emperor Chu felt mixed emotions. "I wonder just how far my disciple will go."

******

Luo Feng also paid a visit to Mountain Sitting Guest.

Mountain Sitting Guest, whose strength was much inferior to Emperor Chu's, received gifts Luo Feng had prepared with care, though they amounted to only about ten thousand Primordial Crystals in total. His physical form couldn't endure excessively expensive treasures.

"Master, these are tomes I acquired in the Nine Rivers Sacred Realm—most suited for your 'World Lineage.' There are also dozens of artifact refining scriptures among them." Luo Feng presented the tomes as gifts to his Master.

In the Nine Rivers Sacred Realm, scriptures below the Divine Emperor level were exceedingly cheap.

In Yulan City alone, where millions of cultivators resided—most of whom stood at the level of Ultimate Realm Life Forms—many were content selling scriptures for one or two hundred Primordial Crystals.

"Very good." Mountain Sitting Guest smiled approvingly at the gifts.

Luo Feng's feelings for Mountain Sitting Guest far surpassed those for Emperor Chu.

Without Mountain Sitting Guest, there would be no Earth Human Clan.

The Star Tower, the Nine Volume Manual, the Lie Yuan Technique—all were brought to him by his Master, Mountain Sitting Guest. Luo

Feng had always held deep gratitude.

"Luo Feng, you know your Master's talent and comprehension. In terms of Great Dao insight, I've yet to reach the Second Realm of the Godly King." Mountain Sitting Guest chuckled. "You don't have to expend excessive energy on me."

"Having achieved vengeance and now enjoying peaceful days, your Master is already very content," Mountain Sitting Guest added.

Luo Feng could sense the profound serenity and dispassion in his Master.

Understanding Mountain Sitting Guest's past, Luo Feng realized his greatest concerns—his most cherished loved ones—had perished long ago.

Decades of life afterward had been driven solely by the pursuit of vengeance.

With Luo Feng's assistance, vengeance had been fulfilled, and his Master's desires ultimately quieted.

Cultivation?

His Master had little ambition to pursue it further.

"Master, these inheritances can serve as entertainment if nothing else," Luo Feng said.

"Very well. I'll take my time exploring these gifts," Mountain Sitting Guest replied with a smile. "Perhaps I might advance further and reach the Second Realm of the Godly King."

Luo Feng didn't linger long with Mountain Sitting Guest, as he sensed his Master's enthusiasm for conversation had waned.

"Time, space…"

Mountain Sitting Guest sat quietly, summoning a mirror before him. Within its reflection stood a woman teaching a young boy.

"The Primordial Cosmos exerts lesser restrictions, allowing slight reversals in time and space to revive weaker beings. But the temporal weight of the Land of Origin is far too immense—reversing time and resurrecting the dead is impossible here." Mountain Sitting Guest sighed.

"Senior Sister…"

Mountain Sitting Guest gazed at the reflected woman. She was preserved in this mirror-like secret treasure, which carried imprints of his memories.

The mirror contained a repository of countless recollections—his moments with his Senior Sister, with his fellow disciples and brothers, and with his friends.

He often passed time gazing upon the mirror.

"How I long to return to the past…" Mountain Sitting Guest closed his eyes. "Even just for a fleeting moment—afterward, I'd gladly accept death."

...

After delivering his gifts to each of his Masters, Luo Feng could sense their joy—but only Mountain Sitting Guest appeared indifferent to material offerings despite his visible smile.

"Master's regrets… I still cannot resolve them." Luo Feng remained powerless.

After presenting his gifts, Luo Feng resumed a peaceful life.

In Yulan City, the Insect Nest Master didn't trouble him, and the Dan Tower's business flourished day by day.

Luo Feng currently had no plans for hunting expeditions. Instead, he was fully immersed in studying a series of Primordial Bloodlines. Each comparison of his "inner completion" against the "perfect solution" of the Primordial Bloodline brought him abundant insights.

In tranquility like flowing water, another thousand-plus epochs

passed unknowingly.

Chapter 333 - 7 Shrouded in Shadow

Yulan City.

A thin veil of rain draped over the vast heavens and earth. Luo Feng, restless amidst the silence, stepped out of his cave mansion.

"The more I understand, the more I realize how difficult it is to 'escape the braided cage.'" Luo Feng pondered. His current aim wasn't to achieve a breakthrough in the Life and Death Dao but to comprehend the mysteries of the Primordial Bloodlines—how they achieved 'perfect union, seamlessly natural.'

Perfect union, seamlessly natural, would lead to entirely breaking through the braided cage and reaching a new realm.

"I've spent considerable time—five full cycles of study—on the 323 varieties of Early Stage Divine Emperor Primordial Bloodlines before setting them temporarily aside." Each new bout of comprehension would yield something new, though the returns diminished as time went on.

Luo Feng had invested nearly 1,500 epochs acquiring and studying these Primordial Bloodlines.

Most of these 1,500 epochs were devoted to comprehending Early Stage Divine Emperor Primordial Bloodlines.

Only recently did he start studying the Middle Stage Bloodlines, and currently, he had managed to meticulously analyze 34 types.

"Every variety of Middle Stage Divine Emperor Bloodline has brought me tremendous insights. I've delved into 34 of them in succession, and my soul aches with exhaustion," Luo Feng thought. For these

roughly 1,500 epochs, he had constantly been using various auxiliary treasures to aid cultivation, which had taken a toll on his soul.

Only now did he decide to rest.

"I can feel it..."

"Every piece of Primordial Bloodline draws me closer to 'escaping the braided cage.' I must thoroughly study these Primordial Bloodlines. There's no room for impatience!"

Luo Feng treasured these resources greatly.

At this moment, Luo Feng had the intuition that, with enough time and effort to consolidate his understanding, he could soon upgrade the Life and Death Dao to the Late Stage Divine Emperor level. However, he wasn't in a rush.

The deeper the accumulation, the more profound the understanding of the Life and Death Dao, thereby fortifying the stability of his chosen path.

"No need to rush," he reassured himself.

Once the Life and Death Dao reached the Late Stage Divine Emperor, it would elevate him above even the Three Hall Masters in rank. In the Dark Sacred Realm, he would shine as an unparalleled figure.

Yet now, he could almost touch this realm!

At times, Luo Feng wondered—was he truly a peerless prodigy?

Other cultivators remained trapped at some bottleneck, unable to break through.

Step by step, Luo Feng ascended naturally to higher realms.

"Compared to other cultivators, perhaps I am able to grasp the essence of the Dao more directly," Luo Feng pondered. Many cultivators struggled endlessly at the periphery of the Great Dao, while Luo Feng could see and seize its core truth with clarity.

"I see many cultivators as mediocre. Perhaps in Senior Yuan's eyes, I too might appear mediocre," Luo Feng chuckled lightly.

The fine rain continued to fall.

For once, Luo Feng refrained from cultivation, taking pleasure in admiring the city he resided in.

"Hahaha... hahahaha..." A grim laughter rang out from the distance.

Luo Feng turned to look.

Yulan City sprawled across vast lands. Beside a lake stood an elder drinking wine and laughing mournfully. The sorrow embedded in the laughter was palpable even to Luo Feng.

"An Ultimate Realm Godly King?" Luo Feng instantly discerned the elder's power. He quickly suppressed his own aura, letting it barely reach the Divine Emperor threshold.

Luo Feng approached.

"Old fellow, what weighs so heavily on your heart?" Luo Feng produced a jug of wine and tossed it toward the elder.

The elder caught the jug without much thought, took a sip, and his eyes lit up. He nodded in approval: "Good wine! I was merely feeling irked earlier. Laughing it out helps, hahaha..."

"Irked?" Luo Feng asked, observing him.

"I, an Ultimate Realm Godly King, have spent ages here in Yulan City doing odd jobs, still having to pay residence fees, cave mansion rental fees, and more. After tens of thousands of epochs, I just managed to save a bit of wealth," the elder replied. "I finally bought some breakthrough-assisting elixirs, but on my way back, I discovered the elixirs were gone."

"Gone?" Luo Feng deduced.

An Ultimate Realm Godly King wouldn't simply lose their treasures. There was only one likely explanation—they had been stolen.

Luo Feng himself had experienced theft upon arriving in Yulan City.

"Those of us weak Ultimate Realm Godly Kings often don't even notice when we're robbed," the elder lamented. "In the past, I didn't care much when I was stolen from. But this time, it was the hard-earned fortune I had used to purchase auxiliary elixirs. Now, it's all gone."

"It's too difficult, far too difficult."

"Earning Primordial Crystals is difficult, surviving is difficult, cultivation is difficult," the elder said with complexity in his tone.

Yet, after taking a couple more sips, the elder laughed again. "Still, despite the hardships, at least in Yulan City, there's hope for cultivation."

"Indeed, there's hope," Luo Feng nodded. Everyone who came to Yulan City did so in pursuit of greater progress on the cultivation path.

"Thank you for the fine wine, old friend," the elder said with a smile before departing.

Life as a cultivator must continue forward.

Watching the elder leave, Luo Feng murmured, "This is the normal life of Yulan City's bottom tier."

Di Fu and Emperor Ming, upon arriving at Yulan City, faced similar struggles—finding even the most ordinary jobs proved immensely challenging!

The majority of cultivators in Yulan City, totaling in the billions, belonged to this bottom-tier population. Unable to hunt Low-Level Primordial Life due to lack of strength, they sought ways to serve the strong, merely to earn a fraction of resources. Still, they were prone to theft while having to pay residence fees and cave mansion rental fees.

"Hmm?" A short distance away, the elder suddenly froze, staring at the wine jug in his hand.

Within the jug was an invisible seal hiding a piece of Primordial Crystal.

This one piece of Primordial Crystal was equivalent to ten thousand Primordial Crystals.

"Ten thousand Primordial Crystals?" The elder turned rapidly, searching for Luo Feng's figure by the lakeside, but he was nowhere to be seen. At this moment, the elder realized that the man from earlier was no ordinary individual.

"Thank you, senior," the elder murmured in gratitude, resisting the urge to draw attention to himself. Instead, he immediately hurried toward his cave mansion. He dared not carry such a massive sum of Primordial Crystals around.

...

Walking through Yulan City, Luo Feng observed the numerous bottom-tier cultivators scattered throughout. Most lacked steady, long-term employment.

For many factions, maintaining long-term personnel was a heavy burden. Even at a mere 20 Primordial Crystals per epoch, over a hundred thousand epochs, or a million epochs, the costs would become staggering.

Thus, most factions preferred temporary workers, hiring more during busy periods and dismissing them during lulls.

"Even so, bottom-tier cultivators are the most vulnerable to theft." Luo Feng noticed multiple thefts occurring as he wandered through the city. "They're impoverished, weak, and can't afford treasures such as the Illusion Realm Maze."

"Huff."

A Flying Boat soared past in the distance.

Luo Feng sensed five cultivators aboard, judging from their aura—all likely Divine Emperor Early Stage Enlightened. He guessed they had recently returned from a hunt.

"In Yulan City, even those who escape the bottom tier, with greater strength at the Divine Emperor Early Stage Enlightened level, must risk their lives to hunt."

"Even Divine Emperor Middle Stage Enlightened cultivators often take on these hunting roles. Only a rare few manage to secure key positions in major factions."

Luo Feng reflected.

Take Emperor Qing, for instance—a Divine Emperor Middle Stage Enlightened cultivator who, due to Luo Feng's connection, had landed a desirable post in the Dan Tower. Otherwise, with so many powerful individuals in the city, why would the Changqing Building Owner choose him?

Within Yulan City, few truly led comfortable lives. Over ninety-nine percent faced persistent hardship.

"Even in the face of so much adversity, they all came here."

"For the sake of their cultivation journey."

Luo Feng reached the entrance of the cave mansion belonging to one of three major predatory factions—the Insect Nest.

Even from a great distance, the enormous, towering spherical entity was visible. Its surface featured countless frenzied faces embedded within, and numerous holes allowed a constant stream of cultivators to come and go.

"The Insect Nest Master," Luo Feng remarked calmly.

Though he hadn't hurried to reach the Late Stage of the Life and Death Dao...

Even at the Middle Stage, when coupled with Life and Destruction already at Late Divine Emperor levels, plus his extensive years of research into Primordial Bloodlines, Luo Feng's foundation was profoundly robust, allowing him to formulate numerous Secret Techniques.

He didn't place much importance on the Three Hall Masters and naturally regarded the Insect Nest Master even less.

"The Infinite Primordial Space contains countless Source Worlds and even more innumerable billions of worlds," Luo Feng mused. "Regardless of whether or not there's an Insect Nest Master, Master of Deceit Workshop, or Shadow Tower Owner, there will always be those willing to steal and plunder."

For resources, no means were too extreme.

In the Nine Rivers Sacred Realm's thirty-five cities, every city faced similar challenges.

Even if Luo Feng became a city lord and forcibly dismantled predatory groups like the Insect Nest, theft and plunder would remain unavoidable.

...

"Luo Feng came to my cave mansion and is staring at me?"

This massive Insect Nest was the physical body of the Insect Nest Master.

Standing outside, Luo Feng gazed at the Insect Nest without hesitation, naturally drawing the attention of the Insect Nest Master.

"I haven't yet procured a suitable mental Secret Treasure," the Insect Nest Master thought worriedly. "I'll have to endure this for now. But once the treasure is in my possession, I'll show Luo Feng the cost of provoking me!"

A sudden mental transmission echoed within the Insect Nest—

"Insect Nest Master, I'm right outside your cave mansion, staring at your massive body. Are you pretending not to notice me?" Luo Feng's voice resounded.

"Luo Feng—" The Insect Nest Master burned with anger, glaring at Luo Feng as she transmitted her reply, "You've crossed the line."

"You went to the Dan Tower and directly attacked me. I'm merely standing outside your cave mansion and speaking a few words—is that overstepping?" Luo Feng's transmitted voice carried a playful humor.

The Insect Nest Master fell silent.

"Your courage is far smaller than the rumors suggest." Seeing the master's silence and lack of retort, Luo Feng dismissed any further interaction and departed without lingering.

The Insect Nest Master had swallowed her pride.

"For him to dare provoke me must mean he has some backing," the master speculated, her instincts sharpened by countless years of existence.

...

As Luo Feng wandered the streets of Yulan City...

Within a modest cave mansion located in the city's outer district...

Two weak cultivators gathered.

"Prepare yourselves; 'The King' will soon enter Yulan City," a thin cultivator transmitted mentally.

"The King is finally coming?" An elderly cultivator grew excited. "I will immediately mobilize my subordinates and prepare them."

"The King's arrival must remain known only to the leaders," the thin cultivator cautioned. "Everyone below the leaders must stay in the dark."

"Rest assured, my subordinates believe this is simply another ordinary infiltration and assassination mission. Such operations have been common in the past," the elderly cultivator assured. "The truth of the plan remains with me alone."

The thin cultivator nodded via mental transmission, "Get ready and wait patiently. When The King enters Yulan City, he'll communicate

directly with us leaders."

The elderly cultivator's eagerness showed, "We've waited so long for this. Finally, we'll tear Yulan City apart—its billions of cultivators will be a feast to savor. Once we've devoured enough cultivators, we'll have a chance at regaining our freedom."

Out in the broader world, killing even one cultivator posed significant challenges.

But breaching Yulan City would present billions of cultivators as ready prey!

"Wait patiently; the day is near," the thin cultivator promised with a faint smile.

Chapter 334 - 8 Insect Nest Visitation

Luo Feng had been in Yulan City for quite some time. Although he had heard of low-level Primordial Life sneaking into the city and launching assassinations, he had yet to encounter one himself.

His thoughts were entirely focused on cultivation, and he hadn't even applied for the 'Elder Examination.' To Luo Feng, becoming an Elder would divert his attention; he needed to concentrate solely on cultivation!

"Swish, swish, swish～～～"

Outside the Dan Tower Main Building, figures descended one after another, completely blocking the main entrance. This made the customers who came to purchase elixirs somewhat uneasy. One by one, they hurriedly moved away to avoid trouble.

"It's the Insect Nest."

"Cultivators from the Insect Nest! Looks like the Insect Nest and the Dan Tower are about to clash. We'd better stay out of this."

Many customers quickly fled the scene.

Chaos erupted near the Dan Tower Main Building. The attendants and mid-to-high-level staff were apprehensive as they looked at the figures of the cultivators outside the building.

"What's the Insect Nest doing here?"

"Since Luo Feng Divine Emperor joined our Dan Tower, we've been expanding our business for 1,500 eras! The Insect Nest hasn't made a move, but now they suddenly show up?" The Dan Tower members

were somewhat panicked and immediately reported upwards.

Soon, the news reached Changqing Building Owner and Luo Feng.

"Brother Luo Feng, members of the Insect Nest have mobilized on a large scale and surrounded the Dan Tower Main Building," Changqing Building Owner transmitted. "However, under the regulations of Yulan City, they wouldn't dare go too far. It's probably a negotiation visit!"

"Let's observe their intentions for now," Luo Feng said with a hint of curiosity.

The Insect Nest's leader had tolerated things for so long; had they finally run out of patience?

...

Dan Tower Main Building.

A towering, scale-armored man led a group of Insect Nest cultivators into the building. His cold gaze and prominent, thick-scaled tail made him stand out. As he walked into the Dan Tower, the vast space seemed to contort around him, making him its center.

The invisible pressure caused the Dan Tower members to tremble with fear.

"Elder Sa Luo, there's no need to intimidate the juniors," Changqing Building Owner appeared, and the building's formation began operating naturally, suppressing the terrifying aura of the towering scale-armored man.

Elder Sa Luo, one of the seven top figures of the Insect Nest, was at the Elder level.

"Building Owner Changqing," Elder Sa Luo said coldly. "I'm not here for you."

"Oh?" Changqing Building Owner realized that the Insect Nest's intentions differed from what he had initially thought.

"Bring out your Dan Tower's 'Gu Qingyuan Alchemist'!" Elder Sa Luo declared coldly.

"Gu Qingyuan?"

Changqing Building Owner frowned slightly but still gave an order, "Go and summon Gu Qingyuan to come here."

"Understood." A subordinate immediately left.

"Elder Sa Luo, Alchemist Gu Qingyuan is one of our seven High Level Alchemists in the Dan Tower. I hold him in high regard," Changqing Building Owner said with a smile. "I'm curious how he has offended you?"

Elder Sa Luo cast a sidelong glance at Changqing Building Owner.

Changqing Building Owner relied on alchemy for resources, while Elder Sa Luo was a battle specialist who frequently hunted in the Dark Sacred Realm. Naturally, he didn't think much of Changqing.

"You'll understand soon enough," Elder Sa Luo said indifferently.

Changqing Building Owner slightly furrowed his brows.

Both sides fell silent, their members not daring to make a sound.

Shortly after—

Alchemist Gu Qingyuan arrived.

Dressed humbly, the middle-aged man had the strength of a Mid-stage Divine Emperor Enlightened cultivator. His alchemy technique was unmatched; aside from Changqing Building Owner, he was the best among the Dan Tower's seven High Level Alchemists.

"You're here," Gu Qingyuan said, glancing at Elder Sa Luo and his group.

"Did you think hiding in the Dan Tower would keep you safe?" Elder Sa Luo's eyes filled with killing intent. "You truly have guts! In Yulan City, you dared to assassinate two of my mid-stage Divine Emperor

Enlightened subordinates. According to the city's regulations, killing cultivators within its borders means you deserve death!"

"Do you have evidence?" Gu Qingyuan calmly asked.

Rage flickered in Elder Sa Luo's eyes.

Of course, he lacked evidence!

The Insect Nest had paid a heavy price to deduce that the culprit was Gu Qingyuan!

"Two Mid-stage Divine Emperors?" Changqing Building Owner said in surprise. "In Yulan City, without disturbing the city's defense systems, it's nearly impossible to silently kill such powerful individuals… even at the Elder level."

"He used poison," Elder Sa Luo explained. "I asked two friends for assistance to investigate past time-space traces and causality, confirming the poison was his doing."

"Why would I poison two of your Insect Nest members for no reason?" Gu Qingyuan questioned doubtfully.

"Your sole disciple was killed during a raid," Elder Sa Luo gazed at Gu Qingyuan. "You suspected my two subordinates were responsible."

"Indeed,"

Gu Qingyuan nodded and sighed. "My only disciple was killed. He worked carefully to accumulate resources through Artifact Refining Skills within the city. But he was still targeted! Just for purchasing a treasure, he was ambushed and killed while returning to his cave mansion. Before he died, he transmitted a message to me, revealing the two culprits. They were members of your Insect Nest."

"A deathbed transmission?" Elder Sa Luo scoffed. "It could very well have been other raiders in disguise! In Yulan City, disguise techniques are endless. Determining the culprits requires sufficient evidence."

Gu Qingyuan stared at Elder Sa Luo. "My disciple was weak, and I am

merely an ordinary alchemist. I lack the ability to poison two mid-stage Divine Emperor Enlightened individuals. You also said that identifying culprits in Yulan City demands conclusive evidence."

Elder Sa Luo glared at the alchemist.

He knew full well that Gu Qingyuan was the murderer.

"So, the Insect Nest made an error?" Elder Sa Luo asked. "Gu Qingyuan, come with me. Cooperate with the investigation and prove your innocence! Take him away!"

"On what grounds?"

"Without evidence, why take him?"

Other Dan Tower alchemists voiced their anger.

"Elder Sa Luo!" Changqing Building Owner interjected, "You intend to forcibly take Gu Qingyuan without evidence?

"Because I'm an Elder!" Elder Sa Luo shot a cold glance at Changqing Building Owner and displayed a time-space projection. "With evidence of past time-space showing Gu Qingyuan in close proximity to the deceased, coupled with causality traces, I suspect him as the culprit. I also have Elder De You's issued decree. Does that give me the right to take him for investigation?"

Elder Sa Luo was enraged.

Two key subordinates had been poisoned within the city—what leader could endure such a loss?

"We can't let them take Brother Gu."

"If he's taken, he's as good as dead."

"Once taken away, whether he's the culprit or not will be decided entirely by them."

Other alchemists spoke up in succession; Gu Qingyuan was well-respected among the Dan Tower alchemists.

"You aim to stop me? I have evidence of suspicion, I have Elder De You's decree, and I personally came as an Elder to apprehend a suspect. You plan to obstruct me?" Elder Sa Luo looked at Changqing Building Owner.

Changqing Building Owner knew that if he intervened, he would lack justification.

Under reasonable suspicion, Elder Sa Luo indeed had the authority to forcibly act and take the suspect.

"And you lot…" Elder Sa Luo's gaze swept across the furious alchemists. "I'm speaking with the Building Owner; how dare you interrupt? Record every single one of their names!"

"Understood," his subordinates replied promptly, eyeing the alchemists one by one.

The alchemists paled and grew uneasy.

"Gu Qingyuan, rest assured. I'll meet with Elder De You to ensure you receive fair treatment," Changqing Building Owner stated.

"Thank you, Building Owner! Sorry to trouble you!" Gu Qingyuan bowed respectfully, remaining calm despite having prepared for the worst.

"Building Owner, you give him too much credit."

A black-haired, black-clad man appeared.

"Hmm?"

Both sides turned their attention to Luo Feng, whose arrival caused Elder Sa Luo's expression to change slightly. He didn't care much for Changqing Building Owner, but Luo Feng Divine Emperor's reputation soared after toppling Elder Tian He.

"Boom—"

As Luo Feng emerged, an invisible and terrifying aura swept outwards. Elder Sa Luo's expression shifted as he stood unmoved, his

scale armor glowing faintly as he resisted the force. But his subordinate Insect Nest cultivators couldn't withstand it; they were swept off their feet and flung outside by the overwhelming pressure.

"How dare the Insect Nest act presumptuously in my domain?" Luo Feng fixed his gaze on Elder Sa Luo. "You must be Elder Sa Luo."

Elder Sa Luo growled in anger, "Luo Feng! I have suspicion evidence, an Elder De You decree—"

"The Insect Nest's trash, daring to pursue a culprit?" Luo Feng sneered. "Do you even know what your nest is infamous for?"

Elder Sa Luo's face darkened.

At the Elder level, city rules generally required adherence, and direct combat within the city was highly discouraged.

"You—" Elder Sa Luo exclaimed in fury. "You've gone too far!"

"Listen carefully!" Luo Feng's voice was cold as he addressed Elder Sa Luo, his words reaching the ears of the Insect Nest cultivators outside. "My Dan Tower strictly adheres to regulations. Without conclusive evidence, no one has the authority to take away our cultivators. Not you, not even the Insect Nest Master!"

"You dare disrespect the Insect Nest Master?" Elder Sa Luo asked, staring at Luo Feng.

The Insect Nest Master was a formidable power on par with the three Hall Masters, far above the average Elder level.

"Yes, I don't consider him worth my regard."

Luo Feng returned Elder Sa Luo's gaze. "You may convey my exact words to him. I, Luo Feng, will await him at any time!"

Changqing Building Owner stood stunned, looking at Luo Feng as if he were mad. So audacious! Changqing prided himself on maintaining good relations with various factions in Yulan City; he would never dare behave this brazenly.

The gathered cultivators from both sides were also taken aback.

"Luo Feng Divine Emperor?" Gu Qingyuan appeared incredulous. He had already prepared for the worst, even purchasing a 'Substitute Death' treasure.

Luo Feng's words shocked everyone present, brazenly humiliating the Insect Nest Master without reservation.

"Fine then! I'll certainly relay your message exactly as you wish to the Insect Nest Master!" Elder Sa Luo sneered, turning to leave.

"Buzz."

The Life and Death Array activated, enveloping the Dan Tower complex in terrifying waves. Elder Sa Luo found himself trapped, unable to escape or dismantle the formation. He even sensed his own life force weakening and realized he couldn't recover.

The change in circumstances made Elder Sa Luo's expression shift to one of horror.

"What are you doing? In the city, are you planning to attack?" Elder Sa Luo glared at Luo Feng in a mix of anger and alarm.

"You came to my tower acting arrogant and now wish to leave? Such convenience isn't allowed here. Leave one billion Primordial Crystals as reparations—or stay awhile longer at my Dan Tower," Luo Feng said with a calm firmness.

Both sides of cultivators were stunned into silence, unwilling to get further involved.

Elder Sa Luo was caught between panic and rage, calling for assistance from the Insect Nest Master.

——

Thank you to the new Alliance Hierarch, 'Fog and Stars,' for your generous support!

Chapter 335 9 Focus

Insect Nest Headquarters, within the massive spherical creature.

The beautiful woman lay there as if deep in slumber, a transmitted message contacting her.

"Hmm?" The beautiful woman slowly opened her eyes, a hint of curiosity in her expression. "Elder Sa Luo, what is the matter?"

She treated the seven elder-level figures of the Insect Nest with courtesy.

"Insect Nest Master!" Elder Sa Luo transmitted his response. "I've been trapped by Luo Feng in the Dan Tower. He refuses to let me leave and demands I pay one billion Primordial Crystals as compensation before he will release me."

"How did you end up provoking Luo Feng?" The beautiful woman looked puzzled.

"An alchemist in the Dan Tower poisoned and killed two of my subordinates. Here is the detailed report," Elder Sa Luo said, sending all the information.

The beautiful woman reviewed the entire set of details.

"I went to Dan Tower in person, intending to apprehend the alchemist Gu Qingyuan." Elder Sa Luo declared helplessly, "Who would have thought that Luo Feng is so domineering? He trapped me directly with his formation and demanded compensation, not even showing you any respect."

The beautiful woman inquired further, "His formation could trap you, and you had no means of escaping?"

"Yes,"

Elder Sa Luo replied. "The power of the formation was terrifying, completely suppressing me. I couldn't resist."

If he could have broken through the formation by force, he would have done so long ago.

"Moreover, the formation is continuously draining my vitality, making me increasingly weak," Elder Sa Luo added. "Insect Nest Master, Luo Feng is openly insulting us; our Insect Nest cannot tolerate this!"

"Why not tolerate it?" The beautiful woman questioned. "When facing a strong enemy, tolerance is sometimes necessary."

Elder Sa Luo froze.

Strong enemy?

In the eyes of the Insect Nest Master, Luo Feng was a strong enemy?

"As for the billion Primordial Crystals as compensation, there's no need to pay him. You are an elder, with many avatars. Simply abandon the avatar that's been trapped," the beautiful woman instructed.

Elder Sa Luo protested helplessly, "I came to Dan Tower in person, prepared to forcibly seize Gu Qingyuan. Because of this, I carried a full set of Secret Treasures worth over a billion Primordial Crystals."

If it were a regular avatar, he would abandon it without hesitation.

The hard-to-acquire complete set of Secret Treasures was tailored for him, impossible to discard lightly.

"Then offer the compensation," the beautiful woman said.

"If I do, our Insect Nest will lose face completely. Luo Feng is trampling on the reputation of our Insect Nest!" Elder Sa Luo reminded her once more.

"Let him trample!" The beautiful woman ended the communication.

She never cared about such matters.

"Last time, he provoked me outside my cave mansion; now he openly disregards me. Is he pushing me to confront him?" The beautiful woman grew increasingly wary, knowing a simple truth.

The more an enemy wishes to accomplish something, the less you should let them succeed!

"There's already information about me circulating in Yulan City, and Luo Feng has previously engaged with me in spiritual will combat." The beautiful woman thought deeply. "He knows my capabilities yet still pushes me to act? He must have some degree of confidence!"

"Has he gained a stronger spiritual technique?"

"Or perhaps some other unknown method?"

She decided the only response was patience!

Time would reveal Luo Feng's true capabilities.

"As long as Luo Feng is powerful enough, the truth will eventually come to light when he reveals his strengths." The beautiful woman remained calm and composed.

...

The formation surrounding the Dan Tower complex was operating, forcibly trapping Elder Sa Luo and compelling him to provide compensation! The spectacle naturally stunned onlookers, and the news spread rapidly throughout the city.

A Dan Tower—a faction primarily focused on alchemy—dared to provoke one of the three major looting factions, the Insect Nest?

Factions capable of large-scale looting were invariably fearsome. The Insect Nest had its master and seven elder-level figures, with numerous mid-stage Divine Emperor Enlightened individuals!

"Simply trapping Elder Sa Luo like this?" The Changqing Building Owner expressed apprehension.

"I'll handle this matter; don't worry about it," Luo Feng said.

The Changqing Building Owner was truly uneasy! His strength was insufficient to confront the Insect Nest directly or to act tough against them.

"Let's hope Luo Feng doesn't bring disaster upon me," the Changqing Building Owner thought anxiously.

The trapped Elder Sa Luo remained silent for a moment.

Finally, he spoke, his tone noticeably softer: "Luo Feng, this time I trespassed. Please release me."

"Hmm?" The Changqing Building Owner was surprised, while other members of the Dan Tower were astonished.

Did he really yield?

"I've already said: pay one billion Primordial Crystals as compensation, and I'll let you go!" Luo Feng stated coldly, staring at him.

Elder Sa Luo felt profoundly stifled. He was a potent being of the Source World, possessing multiple avatars, and didn't need to take Luo Feng's demands seriously. He yielded in hopes that Luo Feng might waive the billion Primordial Crystal demand.

"Luo Feng, my visit to Dan Tower was for Gu Qingyuan and not directed against you. Do you still insist on a billion Primordial Crystals for compensation?" Elder Sa Luo couldn't help but reply.

"If it were directed against me, a billion Primordial Crystals wouldn't have sufficed," Luo Feng said, shooting a cold glare at Elder Sa Luo. Insect Nest scum needed a lesson! If they were outside the city, Elder Sa Luo would have been crushed instantly!

Even though Elder Sa Luo was fierce, he had no choice but to endure the situation.

Soon after.

Another one of Elder Sa Luo's avatars brought along a billion Primordial Crystals.

"Here is one billion Primordial Crystals as compensation." He presented a bag full of Primordial Crystals.

"You may leave," Luo Feng accepted the compensation and let him go.

As Elder Sa Luo departed, he glanced at Luo Feng and remarked, "Brother Luo Feng, you have my respect." Without saying another word, he left swiftly under the watchful eyes of many onlookers.

"He really offered compensation?" The members of the Dan Tower were in disbelief.

Forcing an elder in the city to obediently provide compensation? Unthinkable.

Elders generally had avatars and were often unyielding, willing to have their avatars dissipate rather than lower their heads.

Unknown to the Dan Tower members, even the Insect Nest Master had chosen to tolerate this matter! Elder Sa Luo naturally sensed something was amiss, opting to suppress his emotions and not bring in reinforcements but instead to offer compensation, concede defeat, and resolve the conflict!

"Senior Luo Feng," Gu Qingyuan, the alchemist, bowed respectfully. "Thank you for saving my life."

Without Luo Feng's deterrence, Gu Qingyuan would have been in mortal peril! Even if he had fled the city after poisoning, the Insect Nest's power would have traced time and causality; Gu Qingyuan would have been facing overwhelming odds.

The death of his sole disciple had filled Gu Qingyuan with killing intent at the time, compelling him to poison the two perpetrators, ready to either escape if possible or face destruction together if not.

"Trust that Sa Luo will no longer target you," Luo Feng said. "You can stay safely at the Dan Tower."

"Yes, Senior."

Gu Qingyuan felt immense gratitude.

"Alright, everyone can disperse now," the Changqing Building Owner said with a smile before pulling Luo Feng aside.

"Brother Luo Feng, this time you openly humiliated the Insect Nest. The Insect Nest Master must have heard about it, yet Sa Luo still obediently paid compensation." The Changqing Building Owner spoke urgently. "Clearly, it wasn't Sa Luo who chose to relent—it was the Insect Nest Master who chose to back down! Why is that?"

Luo Feng seemed thoughtful and then smiled: "Perhaps during our last confrontation, the Insect Nest Master suffered significant injuries? Thus, she willingly chose to yield this time?"

As Luo Feng's cultivation progressed, the application of the Lie Yuan Technique grew ever more terrifying, naturally amplifying his power.

However, Luo Feng's strongest ability remained the combination of the 'Undying Heart' and 'Palm World' during direct combat. Even the Three Hall Masters didn't concern Luo Feng too much, let alone the Insect Nest Master.

"Alright, no need to worry. Whatever they scheme, I'll handle it all." Luo Feng said with a faint smile, before turning and heading to his small building.

He continued focusing on cultivation.

Although he hadn't intentionally pursued the Life and Destruction Fusion, the Life and Death Dao was just one step away from reaching the Late Stage Divine Emperor! It was merely a matter of steady accumulation.

"Once the Life and Death Dao reaches the Late Stage Divine Emperor, I can venture into the Dark Sacred Realm."

"I'll leave an avatar in Yulan City to repay Yuan Xiang Palace Master's kindness, but my main focus must be on exploring the Dark Sacred Realm."

...

Within one of the core cave mansions in Yulan City, inside the tower filled with tens of thousands of terrifyingly powerful creatures—all of Divine Emperor level.

"Hmm? Luo Feng doesn't give the Insect Nest any respect, openly humiliating them, and they tolerate it?"

"Strange, very strange."

"The Insect Nest Master's domineering nature suggests she wouldn't yield unless there was a specific reason. Is she afraid? Of all things, could she truly fear?"

Tens of thousands of creatures looked perplexed.

This tower was the Shadow Tower.

No one knew what the Shadow Tower Master looked like! Among the tens of thousands within the tower, they only constituted part of the Shadow Tower Master. The rest roamed the Dark Sacred Realm and other realms...

He was a being of countless avatars.

Master of Deceit Workshop, Shadow Tower Master, and Insect Nest Master—all established theft and looting factions, each notoriously formidable.

...

"Luo Feng tramples on the Insect Nest's reputation, and Elder Sa Luo obediently compensates with one billion Primordial Crystals?" Elder Xingyi, his branches already blooming with flowers, stood in Yulan City, enjoying an exceptionally exalted status as a direct disciple of a peerless being in the Dark Sacred Realm. Even the Three Hall Masters had to show him respect.

"Luo Feng, newly arrived in Yulan City, co-leased with Emperor Qing, hunting only 'Early Stage Divine Emperor' low-level Primordial Life. Yet now, he can elicit fear from the Insect Nest Master?"

"Showing a glimmer of my master's skill."

Elder Xingyi contemplated.

Even Elder Xingyi rarely saw his own master! Among the illustrious figures of the Dark Sacred Realm, none could compare to his master.

******

In the most expansive cave mansion within Yulan City.

Wei Yang Palace Master sat there, his gaze deep, expressionless, reading the latest intelligence. He was intimately aware of every facet of Yulan City and well-acquainted with Yuan Xiang Palace Master's worsening condition.

He had already prepared himself to take on the role of City Lord.

"Luo Feng?"

Wei Yang Palace Master studied the intelligence, his brow furrowed, "Growing so fast?"

The Master of Deceit Workshop had previously suggested recruiting Luo Feng, but Wei Yang Palace Master had refrained, sensing a potent threat in Luo Feng.

"Insect Nest, Luo Feng behaves so tyrannically, and yet you tolerate it?" Wei Yang Palace Master transmitted the question to the Insect Nest Master.

"He is proficient in the Secret Technique of Spiritual Will and has engaged me in spiritual combat before. I prefer not to provoke him." The Insect Nest Master replied.

"Just spiritual combat?" Wei Yang Palace Master pressed.

"Yes, if I possessed a strong Secret Treasure capable of protecting my

spiritual will, I would have no qualms about teaching him a lesson." The Insect Nest Master responded.

Wei Yang Palace Master asked no further questions.

Moments later.

"Palace Master, what rank should Luo Feng hold in the latest Divine Emperor rankings?" An underling transmitted the inquiry.

Wei Yang Palace Master slightly furrowed his brows and commanded, "Rank him at 33rd."

Chapter 336 - 10 The Lurking Race

The latest rankings of Divine Emperors in Yulan City place Luo Feng Divine Emperor at rank 33.

Although the Insect Nest chose to retreat when facing Luo Feng, Luo Feng ultimately did not engage in a public battle to prove his strength. Rank 33 still reflects his reputation.

All parties in Yulan City thought Luo Feng would take actions to seize more benefits in the city! Yet Luo Feng remained low-key, showing no interest in competing for profit.

In the Inner City, inside an ordinary cave mansion, five cultivators were gathered.

"This Luo Feng Divine Emperor managed to force Elder Sa Luo of the Insect Nest to compensate him with a billion Primordial Crystals! His strength must not be inferior to the Insect Nest Master."

"A single compensation amounted to a billion Primordial Crystals."

"For a powerhouse like Luo Feng Divine Emperor, earning Primordial Crystals is effortless, but we have to risk our lives to earn them."

"Last time we went hunting, the five of us joined forces and barely captured prey worth over nine million Primordial Crystals. We were even chased by a low-level Primordial Lifeform and narrowly escaped."

The five cultivators lamented as they chatted.

"So, Brother Zhang, why did you call us together this time?"

"As we agreed earlier, we weren't planning to hunt for the next ten thousand eras."

These cultivators didn't have avatars; every time they went hunting, they were extremely cautious, as the slightest mistake could cost them their lives.

"Calling everyone together isn't about hunting. It's about a joyous matter." A skinny man smiled. With his laughter, invisible waves instantaneously enveloped two of the cultivators present.

These invisible waves were a mental invasion.

The two affected cultivators were mid-stage Divine Emperor bloodline cultivators, whose spiritual will was inherently influenced by their bloodline. At this moment, the bizarre mental invasion caused them to experience a flood of chaotic memories, leaving them unsure of their identities.

Only a few breaths later.

The two cultivators' pained expressions turned back to normal.

"Haha, two new physical bodies acquired." The skinny man immediately transmitted mentally.

"These cultivators are far inferior to us in terms of mental techniques."

"We were born to transcend the Braided Cage. This 'Enchanting Heart Secret Technique' is an innate secret technique; how could they compare?"

Among the five cultivators present, two were actually low-level Primordial Lifeforms controlling split minds.

"The commander says there will be an operation soon. He told us to behave for now."

"Doesn't matter! The commander cares about the high-level members of the race. As for us low-level ones... The commander never really pays attention to us. Even if there's a major operation, we low-level

ones are useless anyway."

"True."

The two low-level Primordial Lifeforms exchanged thoughts privately.

The low-level Primordial Lifeform species always operated in a strict hierarchy.

Those of the species with 'early stage Divine Emperor strength' were entirely ignored by the commander. Even those at the 'mid-stage Divine Emperor strength' still held low status.

Only those who reached late stage Divine Emperor strength would truly garner the commander's attention.

"We've already killed several cultivators. The more we kill, the easier it is for us to expose flaws. Yulan City's defensive system is intricate and even monitors every cultivator. While we won't be discovered short-term, over time, we will be exposed."

"Then let's hurry and hunt! The more cultivators we hunt, the closer we are to a breakthrough. If we achieve a breakthrough, our bloodline will evolve. Even if we lose some avatars, we'd gain immensely."

"But if we lose many avatars before the bloodline evolution... then it's a loss."

"Continue searching for prey."

Two cultivators promptly left the cave mansion and began to fly leisurely within the city.

Like most cultivators, they wandered around the city, visiting various stores without revealing any abnormalities.

...

At this moment, Luo Feng was in seclusion, cultivating.

Though he had no deliberate pursuit of the 'late stage Divine Emperor' Life and Death Dao, his accumulation continued to deepen. Techniques like his 'Undying Blood Sea Body' and 'Biomimetic Destruction Eye' had both evolved to new levels.

"Swish."

The biomimetic destruction eye on Luo Feng's brow seemed to have become far more profound than before.

The intricacies within the secret treasure 'Eye of Life and Death' were rooted in the fusion of life and death. As Luo Feng delved deeper into the fundamental essence of this fusion, his understanding of the Eye of Life and Death naturally grew richer.

Such a secret technique became increasingly terrifying.

"Boom." Luo Feng's biomimetic destruction eye naturally penetrated the formation of his cave mansion, observing the vast Yulan City.

The multicolored layers of Yulan City's defensive systems appeared intertwined with countless secret patterns in Luo Feng's vision, operating as one cohesive whole under the stewardship of the city commander.

His gaze shifted to the multitude of cultivators within Yulan City.

With his far-reaching observation, many weaker cultivators' physical bodies were transparent to him, allowing him glimpses of their life mysteries. With a single glance, he discerned their cultivation systems, strength, and physical body intricacies.

However, the innermost souls protected by their bodies remained less visible to Luo Feng.

In his observation, these protected souls looked like clusters of blurry light.

"My biomimetic destruction eye has advanced further; I can now vaguely see cultivators' souls." Luo Feng reflected, noting that he hadn't previously been able to catch such a glimpse of those souls.

Each cultivator's soul was diligently safeguarded, protected to the utmost.

"Hmm?" Luo Feng noticed two particular souls among them.

Those two souls each concealed worm-like entities within.

"This is—"

Luo Feng instantly recognized them, "The Enchanting Heart Worm species?"

The species of low-level Primordial Lifeforms capable of infiltrating the Nine Rivers Sacred Realm's city defenses were known to include three major types: the Soul-devouring Snake species, the Enchanting Heart Worm species, and the Void Wanderer species.

The Soul-devouring Snakes and Enchanting Heart Worms were more common.

The Void Wanderers were exceedingly rare and had only appeared a handful of times within the Nine Rivers Sacred Realm.

"The Enchanting Heart Worms excel with their innate secret technique 'Enchanting Heart'! With this single move, those with weak spiritual will are entirely helpless, their souls directly controlled." Luo Feng recalled the intelligence on this species, "An Enchanting Heart Worm itself is akin to a mother worm, capable of spawning numerous offspring worms, reportedly up to nineteen."

Swoosh.

Luo Feng stealthily exited his cave mansion, with his biomimetic destruction eye locked onto the two cultivators controlled by the Enchanting Heart Worms.

Since discovering infiltrating low-level Primordial Lifeforms, Luo Feng naturally wouldn't let them escape.

"Even the elaborate defensive systems of Yulan City rely on meticulous traces to barely detect infiltrator signs," Luo Feng thought, "Whereas my biomimetic destruction eye reveals their souls, exposing

such traces... In terms of observation techniques, I must be one of the best in Yulan City."

In terms of realm, Luo Feng stood among the highest levels in Yulan City.

And his biomimetic destruction eye, derived from the secret treasure 'Eye of Life and Death,' indeed reached extraordinary heights!

...

"Sister Ying Tang, I just acquired some fine wine. Would you like to visit my cave mansion to sample it?" These two cultivators soon invited friends, including two female cultivators.

The two female cultivators readily agreed.

Yulan City's strict regulations ensured reasonable safety. Gatherings among middle and lower tiers of cultivators were commonplace.

"Hmm?"

Luo Feng followed from a distance, slightly furrowing his brow.

"I originally planned to track these two cultivators to uncover more Enchanting Heart Worm avatars." Luo Feng shook his head lightly—he couldn't stand by and let those two innocent female cultivators die.

The two cultivators led the female cultivators into the cave mansion.

Protected by formations, Luo Feng's biomimetic destruction eye faced obstacles in observation.

Even so, he could still see the four figures within through the formation.

However, the formations prevented Luo Feng from viewing their souls.

"Action." Without delay, Luo Feng's figure transformed into Blood Light, forcefully penetrating the formation to enter the cave mansion.

The cave mansions within Yulan City were all rented out officially. These formations, apart from any additional ones set up by residents, already carried original layers connected to the entire city's defense system.

The moment a formation was attacked, Yulan City's defense systems would instantly detect it.

"Swish." When Luo Feng breached the formation, Yulan City's defense systems naturally sensed the intrusion, with invisible waves beginning to cover the area.

...

Inside the cave mansion.

"I'll gladly taste the fine wine you found." The two female cultivators laughed.

"I assure you'll be satisfied." The two 'Enchanting Heart Worm' cultivators smiled brightly.

Suddenly—

All four sensed a terrifying Blood Light forcefully breaching the formation without disguise.

"Who dares act within Yulan City? Breaking through the cave mansion's formation?" The two female cultivators exclaimed in shock.

"This is bad." The two Enchanting Heart Worm cultivators knew trouble was upon them.

But the ferocious Blood Light swept over both of them in an instant!

The newly evolved 'Undying Blood Sea Body,' far more terrifying than the Insect Nest Master's Insect Nest Body, obliterated the Enchanting Heart Worm cultivators in a split second, leaving only corpses.

"Hmm?" As Blood Light coalesced into Luo Feng's figure, he held two worm-like offspring of the Enchanting Heart Worms in his hand.

"Enchanting Heart Worm species?" The two female cultivators finally felt fear at this moment. One was an early-stage Divine Emperor Enlightened, the other a mid-stage Divine Emperor bloodline cultivator. Against slightly powerful Enchanting Heart Worms, neither had any hope of resisting.

The Enchanting Heart Worms relied only on their innate secret technique 'Enchanting Heart'; those who could resist survived, while those who couldn't were controlled—effectively dead.

"Crunch."

Luo Feng stared at the two Enchanting Heart Worm spawns, instantly crushing them into dust, leaving no trace of vitality.

Two agonizing mental screams rang out but couldn't shake Luo Feng in the slightest.

Having exterminated the two spawns, Luo Feng's karmic connection with the 'true body' behind these worms significantly strengthened.

"Brother Luo Feng, thank you for eliminating two low-level Primordial Lifeforms that infiltrated Yulan City." A distant voice echoed, clearly from Yulan City's defense systems acknowledging Luo Feng's actions.

Luo Feng didn't mind, his biomimetic destruction eye focusing intently.

"There they are." The biomimetic destruction eye at Luo Feng's brow spotted two clearer and heavier karmic lines among many. These lines stretched far into the distance and branched off in several directions.

Swoosh!

Luo Feng instantly transformed into nine Blood Light figures, each pursuing different targets along the branching karmic lines.

Chapter 337 - 11 King

In the Outer City District of Yulan City, within an ordinary cave mansion.

"Not good, one of my sub-worms has been discovered." A cultivator within the cave mansion sensed something, slightly puzzled, "How did this sub-worm avatar of mine get exposed?"

The Enchanting Heart Worm clan possesses strong disguising capabilities, infiltrating the soul of cultivators. Many of the defense systems in Yulan City are unable to detect them. Generally, the exposure of one avatar does not affect the others.

"It seems I need to be more cautious." The cultivator thought, remaining inside the cave mansion.

In just a moment——

Boom!

A streak of blood light instantly penetrated the formation of this ordinary cave mansion in the Outer City District, also sweeping past the cultivator.

"Huh?" The cultivator's eyes widened, still in disbelief.

The blood light condensed into the figure of Luo Feng, holding a sub-worm of the Enchanting Heart Worm in his hand.

"These Enchanting Heart Worms are crafty. Usually, only sub-worms enter the city, while the mother worm might be hiding outside the city." Luo Feng frowned, aware that the infiltrating 'Enchanting Heart Worm clan' and 'Soul-devouring Snake clan' are indeed the most dreaded by cultivators. As for the 'Void Wanderer clan', their appearances in the entire Nine Rivers Sacred Realm are extremely

rare, and their threat can be ignored.

Boom! Boom! Boom!

One after another, Luo Feng's avatars, using the Biomimetic Destruction Eye to follow the causality line, hunted down each Enchanting Heart Worm avatar.

"Not good!"

"The cultivator can track my numerous avatars!"

With successive avatars being captured, the other avatars panicked as well.

An Enchanting Heart Worm can only produce nineteen sub-worms, so losing just one is a significant loss.

"Quickly, out of the city!"

In a gathering of cultivators, two exchanged glances and resolutely stood up to leave.

"Xi Ke brother, why are you two leaving so soon?" Other cultivators at the gathering asked.

"Urgent matters."

The two cultivators answered perfunctorily, preparing to leave.

Suddenly——

A streak of blood light pierced through the formation in a flash, sweeping past the two departing cultivators, who fell powerless; the blood light condensed beside them into the figure of Luo Feng.

"Two more sub-worms." Luo Feng looked at the two Enchanting Heart Worm sub-worms in his hand and instantly crushed them.

The gathered cultivators also saw the Enchanting Heart Worm sub-worms and recognized Luo Feng.

"Xi Ke brother and the other were actually controlled by the

Enchanting Heart Worm?"

"The Enchanting Heart Worm must be targeting us, planning to control us?"

The group of cultivators shuddered with fear.

"Thank you, Senior Luo Feng."

The present cultivators, primarily at the level of 'Divine Emperor Early Stage Enlightened', were aware of Luo Feng's intelligence, knowing this powerfully subdued Elder Tian He, ignoring the might of the Insect Nest completely!

"Senior Luo Feng, I am Nanfeng Yu." A woman hurriedly spoke, "Thank you, Senior Luo Feng, for saving our lives."

Luo Feng glanced at the woman, a formal member responsible for sales at the Dan Tower; they had met several times. Luo Feng nodded slightly.

Nanfeng Yu was quite excited.

Swish.

Luo Feng transformed into blood light and vanished.

"Enchanting Heart Worms infiltrating Yulan City are extremely difficult to trace. Yet Senior Luo Feng can hunt them down." The cultivators present were shocked, as their weaker perception failed to detect any trace of the Enchanting Heart Worm when face-to-face.

Confronting the Enchanting Heart Worm, they could only endure the innate Secret Technique 'Enchanting Heart'! This is one reason cultivators highly value spiritual will.

The stronger the spiritual will, the greater the hope to resist 'Enchanting Heart'.

...

Within an ordinary cave mansion in the Outer City District.

A slender cultivator sat cross-legged.

"What is going on?" The slender cultivator mentally linked with companions, "Our Enchanting Heart Worm clan, with its thirty-five branches in the Nine Rivers Sacred Realm, assembled in Yulan City this time! This action must not fail. How did ordinary members of the 'Enchanting Heart Worm clan' launch attacks suddenly? From which branch is the attacking member?"

"It's from my branch." A voice responded, "According to the King's instructions, those below the leader must be kept secret. I brought my clan to Yulan City, only restraining the core forces under my command. As for the middle and lower-level clans… I merely advised caution, without many orders."

"Jiu Yu! As we approach the crucial moment, we must all remain hidden, not act further."

"Occasional attacks by the lower ranks are a common occurrence in every cultivator city. If a prolonged period goes by without any lurking attacks, that would indeed be suspicious." Leader Jiu Yu responded.

"Fine, fine."

The slender cultivator conveyed mentally, "Remember, if ordinary members are exposed, let them die! Don't save companions, to avoid exposing more of our clan."

"Understood."

"We get it."

"The matter of the King is of utmost importance."

Each leader responded.

Low Level Primordial Life forms typically live in the nine rivers, hunting cultivators based on the positions of the thirty-five cities of the Nine Rivers Sacred Realm, forming thirty-five enormous branches.

The Enchanting Heart Worm has a branch around the Yulan City area.

The different branches are far apart and rarely interact.

Yet this time…

Summoned by the King, the thirty-five branches of the Enchanting Heart Worm clan in the Nine Rivers Sacred Realm all responded. Each branch has over half of its core forces quietly converging in Yulan City.

The slender cultivator looked at the elderly cultivator approaching from a distance.

"I have received word that your Enchanting Heart Worm clan members have taken action?" queried the elderly cultivator.

"The lower ranks acted on their own." The slender cultivator spoke mentally.

"The closer we get to the end, the less we can afford any carelessness. This time, the Soul-devouring Snake clan is expending over half its strength across the entire Nine Rivers Sacred Realm. Additionally, the 'Kings' are all prepared. At any cost, we're coordinating internally and externally to completely overthrow Yulan City," the elderly cultivator transmitted telepathically, "Such a massive price cannot allow for any slip-ups."

"This is merely a low-level attack, a trivial matter, nothing to mention. Occasional lurking attacks are the norm for Yulan City." The slender cultivator also used this rationale, "Prolonged periods without attacks would only make the three Hall Masters of Yulan City suspicious."

"Alright then. By the way, when will the King arrive?" the elderly cultivator asked further.

"Be ready to act anytime," the slender cultivator said.

The elderly cultivator stopped questioning.

...

A red-robed cultivator stood watching as a streak of blood light attacked a cave mansion in the sky and swiftly departed.

Though in close contact with one another, Luo Feng did not sense anything amiss with this red-robed cultivator.

According to the intelligence, this cultivator was Luo Feng?" The red-robed cultivator observed, "Seems he should rank among the top twenty in Yulan City."

"However, in the entire Yulan City, the only one worthy of attention is the Wei Yang Palace Master."

The red-robed cultivator looked off towards the city's core area.

"Yuan Xiang Palace Master's injuries have worsened, and he probably no longer dares to make a move. Master Gai Tao is wholly absorbed in artifact refining and essentially very selfish. Faced with a large-scale city siege, he would likely choose to flee at the first opportunity," the red-robed cultivator thought.

"Though Wei Yang Palace Master is also selfish and ruthless, he has invested too much into Yulan City to easily abandon it, treating it as his domain."

"My first target is the Wei Yang Palace Master."

"Eliminate him first."

"With Wei Yang Palace Master dead, the rest will be much easier."

The red-robed cultivator strolled leisurely, remaining inconspicuous among the countless cultivators in Yulan City.

******

Luo Feng stood high in the air, absorbing his avatars into his body.

"I killed a total of fifteen Enchanting Heart Worm avatars," Luo Feng thought, "These fifteen Enchanting Heart Worm avatars were all sub-

worm avatars! They should belong to two different Enchanting Heart Worms."

"Killing these avatars, the two Enchanting Heart Worms should also be heavily weakened."

Facing so many avatars, Luo Feng was also quite troubled.

Just like Source World experts, it's very difficult to kill them completely.

Now Luo Feng faced a similar problem.

"Buzz~~~" "Buzz~~~" "Buzz~~~"

Suddenly, waves of fluctuations descended, enveloping the areas where Luo Feng previously hunted, and inspection teams from Yulan City arrived, starting the rapid capture of numerous cultivators.

"According to Yulan City regulations, when Low Level Primordial Life forms lurk and attack, the thousand cave mansions surrounding the lurking residence must be carefully screened to prevent a Low Level Primordial Life form from attaching."

"According to Yulan City regulations, during the lurking period, all known cultivators must also be carefully screened."

"All cultivators must cooperate with inspections; violators will be executed without mercy!"

The cultivators in each area were taken aback, but upon hearing the patrol team's announcement, they all obediently cooperated.

"When Low Level Primordial Life forms lurk, should you know them, please cooperate with the screening." The patrol team began capturing cultivators one by one; these cultivators were bewildered but dared not resist.

Captures were made everywhere.

Luo Feng watched all of this from afar.

"It's dismal."

"They say to cooperate with inspections, but those who don't hand over a large sum of Primordial Crystals won't get out in a short time."

"Having associated with lurking Low Level Primordial Life forms, they have to be fleeced."

Many cultivators were whispering quietly among themselves.

This was also a common occurrence in Yulan City!

Every time a lurking attack was discovered, a screening would ensue. The screened members, even if not controlled, would be thoroughly extorted.

Suddenly, a patrol team approached Luo Feng, and the patrol team leader respectfully said, "Qiu Feng, thank Luo Feng Divine Emperor for discovering fifteen Enchanting Heart Worm avatars and saving more cultivators!"

Luo Feng watched all this.

"Senior Luo Feng." From afar, a captured female cultivator, seeing Luo Feng, quickly called out; it was Nanfeng Yu!

"Luo Feng Divine Emperor, do you know her?" The patrol team leader Qiu Feng asked.

Luo Feng nodded, "She is a member of my Dan Tower. I can assure you, she is not possessed."

"With Luo Feng Divine Emperor's assurance, it's no problem, release her." The patrol team leader ordered, and Nanfeng Yu was released.

"Thank you, Senior Luo Feng." Nanfeng Yu quickly expressed gratitude.

Luo Feng nodded, his mood sour.

Even though he was hunting Low Level Primordial Life forms 'Enchanting Heart Worm,' tens of thousands of cultivators were

implicated, all going through screening, being extorted! For those ordinary cultivators, earning a bit of Primordial Crystals was not easy.

"Yuan Xiang Palace Master." Luo Feng immediately communicated with Yuan Xiang Palace Master.

"Hahaha, Luo Feng! How did you discover the Enchanting Heart Worm clan? Even managing to identify fifteen avatars?" Yuan Xiang Palace Master responded, seemingly delighted.

Chapter 338 - 12 Commander of the Heaven Patrol Palace

Luo Feng did not hide the truth and transmitted a message: "One of my observation Secret Techniques has recently made a breakthrough. It allows me to observe the soul of a cultivator and determine whether their soul is being controlled."

"You can see it with a single glance?" Yuan Xiang Palace Master was both astonished and delighted.

The infiltration of Low Level Primordial Life into cities was a challenge faced by all thirty-five cities in the Nine Rivers Sacred Realm. The vast majority of cities were unable to detect them, relying instead on subtle clues and the deduction of celestial mechanisms for confirmation.

"If a cultivator is present and there is no Formation concealing them, I can see through over ninety percent of the cultivators at a glance. However, if there are powerful Secret Techniques or Secret Treasures masking them, I will need to examine them one-on-one at close range."

"If a cultivator is hiding inside a cave mansion and its Formation is concealing them, then I won't be able to see clearly," Luo Feng replied.

His 'Biomimetic Destruction Eye' was, after all, an imitative Secret Technique, and its observational capabilities still had many limitations.

"Even so, it's very impressive."

Yuan Xiang Palace Master was overjoyed. "Even in the Dark Sacred Realm, being able to discern at a glance whether someone's soul is

controlled is a rare ability found only among the strongest. In my prime, I did not possess such observational techniques."

"Across the entire Nine Rivers Sacred Realm, there may only be one or two others who can rival you in this ability," Yuan Xiang Palace Master said happily. "With you in Yulan City, its security will be significantly enhanced."

Having such a powerful figure overseeing a city drastically increased the difficulty of Low Level Primordial Life launching assassination attempts. If they infiltrated, they would have to act quickly; long-term lurking increased their risk of being exposed.

"Luo Feng, I hope you can assist us by thoroughly investigating the entire city," Yuan Xiang Palace Master said. "Start with those walking outside! Then, I will issue a notice to the entire city, arranging for all cave mansion Formations to be disabled in phases, so you can check them one by one."

The cave mansions were rented, and Yulan City naturally had control over their Formations.

However, if cultivators had set up their own Formations, Yulan City couldn't forcibly deactivate them; the cultivators themselves would need to disable them.

The plan to phase out and disable all the cave mansion Formations citywide was uniform. No one in the city would dare oppose it.

"I can confirm that there are definitely a good number of Low Level Primordial Life lurking in the city, but we can only detect a minimal amount of evidence," Yuan Xiang Palace Master said with worry. "A comprehensive screening will make things significantly safer."

"Without proper authority, my actions won't carry weight," Luo Feng transmitted. "If I'm to be responsible for a citywide screening, I'll need the position of 'Heaven Patrol Palace Commander' in Yulan City."

"Heaven Patrol Palace Commander?" Yuan Xiang Palace Master hesitated.

The Heaven Patrol Palace was the headquarters for all patrol and guard units in the city.

The position of Heaven Patrol Palace Commander consisted of one main commander and two deputy commanders.

The sole main commander position was currently held by the 'Shadow Tower Lord.' For instance, during the current investigation of tens of thousands of cultivators, ensuring they hadn't been possessed was an effort personally overseen by the Shadow Tower Lord.

The Shadow Tower Lord was highly adept at soul-related techniques, and his one-on-one close examinations could identify anyone possessed.

"The Heaven Patrol Palace Commander is mainly responsible for screening for lurking Low Level Primordial Life," Luo Feng transmitted. "Since I'm being asked to handle this role and may be required to continue doing this in the future, I deserve the corresponding appointment."

Yuan Xiang Palace Master understood as well.

Asking Luo Feng to examine the entire city was clearly not a one-time request.

It would require periodic screenings over time.

"Alright!" Yuan Xiang Palace Master transmitted. "The position of Heaven Patrol Palace Commander is now yours! You can proceed to the Heaven Patrol Palace and coordinate the handover with the Shadow Tower Lord."

Luo Feng nodded slightly.

Each time lurking Low Level Primordial Life were discovered, thousands or tens of thousands of affiliated cultivators would be captured for screening! Batch after batch would be taken in, and although most emerged safely, they would leave with their treasures thoroughly drained.

This systematic exploitation was even more ruthless than the three major looting factions' theft and plundering!

"Wei Yang Palace Master is unfit to manage Yulan City." At present, Luo Feng lacked the upper hand in terms of power, as both sides were on the same level. However, once he elevated his mastery of the Life and Death Dao by another level, his superiority would dominate the entire city. By that point, certain matters would become much easier to handle.

Swoosh—

Luo Feng turned and flew toward the direction of the Heaven Patrol Palace at Yulan City's core.

******

Yuan Xiang Palace Master sat within his cave mansion, his aura somewhat weak.

"Wei Yang, Gai Tao." Yuan Xiang Palace Master directly contacted his two companions.

Whoosh! Whoosh!

Two phantom figures appeared next to him—Wei Yang Palace Master and Gai Tao Palace Master.

"Brother Yuan Xiang." Wei Yang Palace Master greeted him with a polite smile. At his peak, Yuan Xiang Palace Master had been a figure who mastered two and a half Half Primordial Level Paths! Even in the Dark Sacred Realm, his influence was substantial. Many of Yuan Xiang Palace Master's friends were of the same level—a network that spoke for itself.

As long as Yuan Xiang Palace Master was alive, Wei Yang Palace Master had to give him due respect.

"Brother Yuan Xiang, what prompted you to call the two of us so suddenly?" Gai Tao Palace Master asked as well.

"I've decided to hand over the position of Heaven Patrol Palace

Commander to Luo Feng," Yuan Xiang Palace Master said directly.

"Oh?" Gai Tao Palace Master raised an eyebrow and smiled faintly. "I've heard about a strong cultivator named Luo Feng emerging in Yulan City of late."

"Absolutely not."

But Wei Yang Palace Master immediately objected. "The position of Heaven Patrol Palace Commander is of great importance as it concerns the safety of the entire city. Moreover, screening cultivators for possession is an extremely challenging task. Shadow Tower Lord has been doing an excellent job."

"But Luo Feng can do even better," Yuan Xiang Palace Master replied. "Today alone, he captured fifteen avatars of Enchanting Heart Worms because he has a Secret Technique that allows him to determine from a distance with one glance whether a cultivator is possessed."

"How is that even possible?"

Both Wei Yang Palace Master and Gai Tao Palace Master were visibly shocked.

Such a powerful observational Secret Technique?

"With such a technique, he should be able to screen the entire city in less than a day," Wei Yang Palace Master frowned. "Why the need to assign him the Heaven Patrol Palace Commander position?"

Yuan Xiang Palace Master chuckled. "But he said it himself—if he is to painstakingly perform the task, he has but one request: the Heaven Patrol Palace Commander position."

"He's far too greedy!" Wei Yang Palace Master was enraged.

The discovery of lurkers in Yulan City was a regular occurrence, and each screening yielded terrifyingly large profits. The Shadow Tower Lord was technically the one in charge, but the majority of the income ultimately flowed into Wei Yang Palace Master's hands.

Now that Luo Feng was claiming this position, Wei Yang Palace

Master would lose a prime source of continual revenue.

"Just because he claims expertise in observation doesn't make it so," Wei Yang Palace Master retorted. "Finding fifteen Enchanting Heart Worm avatars might have been due to some unusual circumstance."

"Everything must be prioritized for Yulan City's safety," Yuan Xiang Palace Master said solemnly. "If his observational and screening abilities are indeed superior, let him take on the Commander position for now. If he proves to be ineffectual, we can then revoke his appointment."

"I have no objections," Gai Tao Palace Master said.

"Then it's settled," Yuan Xiang Palace Master stated.

Wei Yang Palace Master felt stifled.

Although Yuan Xiang Palace Master was not one to fight over power or profit, when he decided on something, Wei Yang Palace Master could do little to oppose it.

After all, Yuan Xiang Palace Master was the City Builder and held the highest authority.

...

Sitting in his Quiet Room, Wei Yang Palace Master's expression turned grim. He had long foreseen that Luo Feng might pose a certain degree of threat. He had even contemplated that one day a fourth palace master, 'Luo Feng Palace Master,' might emerge. But the threat had arrived far sooner than he expected.

"How long has he been in Yulan City? And he's already taken the Heaven Patrol Palace Commander position from us?" Wei Yang Palace Master was visibly displeased.

The majority of elders held merely honorary positions, responsible for their respective defensive systems and receiving only a fixed income, nothing more.

The Heaven Patrol Palace Commander role, however, was a true

powerhouse position brimming with "tremendous profit!" In the past, Yuan Xiang Palace Master hadn't contended for it, leaving it to Wei Yang Palace Master's faction.

"Shadow Tower Lord!" Wei Yang Palace Master immediately transmitted a message.

"Palace Master." A virtual image of a middle-aged figure appeared nearby.

"Your position as Heaven Patrol Palace Commander has been taken," Wei Yang Palace Master stated.

"What?" Shadow Tower Lord was visibly taken aback. This position was far too lucrative—those sent into the Heaven Patrol Palace never left without all their treasures being drained before they were allowed to walk free.

"It was Yuan Xiang Palace Master's decision, and I couldn't stop it," Wei Yang Palace Master shook his head.

"Who is the new commander?" Shadow Tower Lord pressed for an answer.

"That Luo Feng," Wei Yang Palace Master replied.

"Him?" Shadow Tower Lord frowned. "I already suspected Luo Feng wasn't someone content to remain ordinary when he bested the Insect Nest. But I didn't anticipate him seizing my Commander position on his first major move. Palace Master, are we just going to let him take it?"

"I couldn't persuade Yuan Xiang Palace Master otherwise," Wei Yang Palace Master admitted. "Invite Luo Feng. Bring him to my cave mansion—I will speak with him myself. Should he voluntarily relinquish the Commander role, even Yuan Xiang Palace Master would have no objections."

"Understood." Shadow Tower Lord nodded.

Losing such a continuous and enormous stream of revenue was something neither Wei Yang Palace Master nor Shadow Tower Lord

was willing to tolerate.

...

The core region of Yulan City, the Heaven Patrol Palace.

This was the military headquarters for the many patrol and guard teams and also the location where prisoners were detained.

"Whoosh." "Whoosh." "Whoosh." Patrol teams escorted large groups of cultivators to the Heaven Patrol Palace. These were individuals suspected of having connections with lurking Primordial beings.

The cultivators wore expressions of helplessness, unable to take action against their predicament. They could only curse their bad luck.

"Once you enter the Heaven Patrol Palace, you'll probably be drained clean," the cultivators thought with despair, one by one being escorted in and locked away separately.

Whoosh!

Luo Feng now arrived near the Heaven Patrol Palace as well.

"Brother Luo Feng." A middle-aged man, leading a group of subordinates, stepped forward to greet him. This middle-aged man was one of the Shadow Tower Lord's most common avatars.

"Shadow Tower." Luo Feng looked at him, his heart filled with disdain toward this man. In his eyes, such individuals were the scum of the cultivator world. If it were up to him, he would have executed them all.

"I've received orders to transfer the Commander position to Brother Luo Feng," Shadow Tower Lord said with a smile, noticing Luo Feng's unfriendly demeanor but choosing not to take issue with it. "The Commander position of the Heaven Patrol Palace carries great responsibility; I hope Brother Luo Feng will dedicate yourself to it."

"I understand," Luo Feng replied.

"There's one more important matter," Shadow Tower Lord said with a sly grin. "Wei Yang Palace Master has instructed me to ensure Brother Luo Feng visits his cave mansion. Shall we head there now?"

"Wei Yang Palace Master wants to see me?" Luo Feng mused internally.

The Heaven Patrol Palace Commander position was clearly a coveted "chunk of meat" for Wei Yang Palace Master's faction. Now that Luo Feng seized it, Wei Yang Palace Master was likely not pleased.

Though they viewed it as a treasure trove, Luo Feng had no intention of oppressing tens of thousands of cultivators for riches.

"I've just taken office today, and there's pressing work—the screening of tens of thousands of cultivators," Luo Feng said. "Once I've completed my duties, I'll naturally visit Wei Yang Palace Master."

"Luo Feng." Shadow Tower Lord's figure shifted slightly, blocking Luo Feng's path. "You intend to make Wei Yang Palace Master wait?"

"Step aside!"

Luo Feng's gaze turned cold. "This is the Heaven Patrol Palace. Are you planning to challenge its Commander here?"

The nearby patrol teams were bewildered but instinctively sided with their new Commander.

"Fine, very well." Shadow Tower Lord smirked. "I'll be sure to relay every word you've said to Wei Yang Palace Master." With that, his figure flickered and vanished.

Luo Feng sneered slightly and continued flying toward the main entrance of the Heaven Patrol Palace.

The guards at the main gate had been waiting in anticipation. When Luo Feng approached, they saluted with utmost respect: "Commander!"

Chapter 339 - 13 Luo Feng and Wei Yang Palace Master

Wei Yang Palace Master's cave mansion.

"This Luo Feng is extremely arrogant. Master, you personally invited him, yet he claimed to be too busy. He even said he would visit you only after screening tens of thousands of cultivators and finishing numerous affairs," reported the Shadow Tower Master's apparition.

"Does he think that with Yuan Xiang's support, he can ignore me as well?" Wei Yang Palace Master's sculpted face revealed a faint smile. "Then let him wait. Wait until he comes knocking on my door."

The Shadow Tower Master bowed slightly and vanished in an instant.

Among the elders of Yulan City, the majority followed Wei Yang Palace Master! The most fundamental reason was… Wei Yang Palace Master's overwhelming strength! His expertise in formation techniques was integral to Yulan City's defensive system!

Before Luo Feng arrived, Yuan Xiang Palace Master had already planned to transfer the 'City Builder' authority to Wei Yang Palace Master. Wei Yang Palace Master was naturally the first choice! But when Luo Feng arrived, Yuan Xiang Palace Master was astonished.

Luo Feng's talent and potential far surpassed Wei Yang Palace Master!

Even so, Luo Feng would first need to master two Half Primordial Level Paths before Yuan Xiang Palace Master could grant him the City Builder authority! Achieving such power meant absolute superiority, capable of sweeping away all dissenters.

However, if Luo Feng's cultivation realm was equivalent to Wei Yang Palace Master's or Master Gai Tao's, the former's mastery in

formations was still the most crucial factor for Yulan City's defenses.

"Luo Feng, even Yuan Xiang values you?" Wei Yang Palace Master confronted Luo Feng with the same condescension that a stronger individual would wield.

He was, after all, the number one Divine Emperor in Yulan City, a Half Primordial Level Enlightened One!

His physical body had been cultivated to a frightening degree; one-on-one, he could outright annihilate a Divine Emperor Perfection Level Low Level Primordial Life purely with physical strength! This feat alone underscored his unparalleled physical achievements.

But his most terrifying strength lay in his mastery of formations!

A formation of supreme terror, coupled with his formidable physical body, and supplemented by the powerful Secret Treasures he held due to his lofty status, firmly anchored him as the first in Yulan City.

When Low Level Primordial Life groups sought to attack Yulan City, Wei Yang Palace Master was always regarded as the biggest threat!

"I'm eager to see just how strong you truly are, daring to disregard me." Wei Yang Palace Master's tone was laced with anticipation.

"I'll teach you a lesson."

"No matter who supports you, personal strength is the foundation of authority! Even Yuan Xiang Palace Master must rely on me to guard Yulan City!" Wei Yang Palace Master resolved that this time, he would make sure Luo Feng understood once and for all who truly reigned supreme in Yulan City!

...

In the core area of Yulan City, within a towering hall in the Heaven Patrol Palace.

Luo Feng sat high atop his throne, flanked on each side by rows of guards.

"How many suspicious cultivators have been captured in total?" Luo Feng inquired.

"Reporting to Commander, we've captured a total of 53,622 cultivators." A patrol team captain reported back with deference.

Luo Feng nodded. "Bring them into the hall in batches, and have each of them walk past me."

"Walk past you?"

The guards in the hall were taken aback.

"No more than one thousand cultivators per batch," Luo Feng instructed. "All they need to do is walk past me. Anyone who is possessed will not escape my detection."

"Understood." The guards were startled but followed the orders dutifully.

Very quickly—

Large groups of suspicious cultivators filed into the hall through the main gate and exited promptly through the side door.

Oversight from the patrol team ensured that these cultivators behaved properly, none daring to disrupt order. They also noticed the black-haired, black-cloaked man seated high on the throne in the hall.

Between the man's brows, a third eye—the Biomimetic Destruction Eye—opened, silently observing them.

"Buzz."

An invisible force cloaked the entire hall, permeating deep into the bodies of the cultivators.

Not a single one dared to resist!

Under the force's penetration, Luo Feng's Biomimetic Destruction Eye discerned each cultivator's deep soul structure, perceiving even the

subtlest details.

In this state, Luo Feng deemed it impossible for anyone to evade his scrutiny!

"Commander, during the capture of suspects, seven cultivators committed suicide," the patrol team captain reported reverently. "We unanimously determined that they were likely possessed, so we apprehended those who had been in contact with them as well."

Luo Feng nodded slightly. "Any cultivator who walks out of the hall is free to leave."

"Free to leave?" The patrol team captain and several guards around him were visibly shocked.

Was it really going to be this simple to let them go?

Based on past practice, suspects would be relentlessly extorted!

But no matter how severe the extortion, these ordinary guards would see none of the benefits. All profits invariably went to Wei Yang Palace Master and certain elders.

"My screening process is already underway. Any cultivator leaving the hall signifies that their screening has ended and they may be released," Luo Feng cast a cold glance at the patrol team captain. "Do you have any objections to my decision?"

"None, none at all." The captain was frightened into immediate compliance. After all, this Commander wasn't even afraid of the Shadow Tower Master or Wei Yang Palace Master; what significance did a lowly captain like him have?

Luo Feng gave him one last glance and said nothing further.

The deputy commanders of Heaven Patrol Palace, along with its many captains, were figures Luo Feng hadn't bothered to engage with deeply. He had no interest in dissecting the web of selfish gains within their ranks, but if anyone dared to defy his commands, Luo Feng would immediately enforce the rules, killing ruthlessly as an example!

"Hm?"

Luo Feng suddenly detected an anomaly within the soul of one particular cultivator entering the hall—a lurking Enchanting Heart Worm.

"Even now, someone tries their luck, thinking I won't discover it?" With a mere thought, a beam of blood light enveloped the cultivator, causing him to collapse instantly.

An Enchanting Heart Worm fell directly into Luo Feng's hands.

"Squish." The worm was crushed effortlessly in his grip. Luo Feng's Biomimetic Destruction Eye examined the Causality Line, making it more distinct, allowing him to pinpoint the whereabouts of other avatars of the Enchanting Heart Worm within this chain.

From his cave mansion, Luo Feng immediately dispatched avatars to capture the remaining worm fragments.

"Still other worm fragments exist?" The guards around him were astonished, while the suspicious cultivators visibly paled.

Luo Feng continued his screening uninterrupted.

Of the tens of thousands of cultivators gathered, groups of several hundred passed through the hall at a time. Within moments, the process was completed.

...

Upon discovering additional avatars of the Enchanting Heart Worm, a significant number of patrol team members mobilized yet again, capturing over ten thousand more suspicious cultivators. These captives were promptly escorted to Heaven Patrol Palace, where Luo Feng methodically screened and released them all.

"Are we really being released just like that?"

"Did we just leave Heaven Patrol Palace?"

Some cultivators, having been detained for less than a day, were

freed without losing any Primordial Crystals.

"Not a single extortion attempt?"

"This… this is unbelievable!"

As they glanced back at the imposing Heaven Patrol Palace, the cultivators felt stunned. They had mentally prepared themselves for prolonged imprisonment and relentless exploitation.

"Leave quickly!"

"Why, are you hoping to go back in?"

The palace guards barked commands to usher them away.

The cultivators heaved sighs of relief, swiftly retreating, each feeling deeply fortunate.

"Phew."

Only after this arduous process did Luo Feng finally find a moment to rest. Leaving Heaven Patrol Palace, he flew outward.

"Commander." The guards stationed at the entrance saluted with utmost reverence, watching Luo Feng as he departed.

"The Heaven Patrol Palace Commander used to be the Shadow Tower Master, but now it's Luo Feng Divine Emperor! Luo Feng Divine Emperor merely had us walk through the hall, then released us!"

"Luo Feng Divine Emperor is far superior to the Shadow Tower Master in both investigative Secret Techniques and execution methods. He has no interest in exploiting us even slightly!"

"If only figures like Luo Feng Divine Emperor could rise to power!"

The cultivators exchanged whispered discussions.

Their hearts were aflame with admiration.

With leaders like Luo Feng, common cultivators could enjoy far better days.

However…

The cultivation world was one of survival of the fittest! Those in positions of power who were compassionate remained the exception. Far more common were individuals like Wei Yang Palace Master, Shadow Tower Master, or Insect Nest Master.

...

Once Luo Feng completed his work, he headed to Wei Yang Palace Master's cave mansion.

"Luo Feng Divine Emperor?" The guards at the mansion smirked mockingly. "Our master has been waiting for you for quite some time. Please, come in."

Luo Feng nodded and strode inside.

Within the largest cave mansion in the city, Luo Feng followed the guards for quite some time before reaching a vast courtyard. There, only one figure stood.

Wei Yang Palace Master's form resembled a statue, emotionless. His entire demeanor was akin to a puppet, save for a pair of profound eyes that seemed to encompass infinite worlds, giving Luo Feng a sense of the master's extraordinary nature.

"Luo Feng." Wei Yang Palace Master's gaze landed on Luo Feng, and his emotionless face unfurled into a faint smile. "You, too, are a Source World expert, possess avatars galore, yet couldn't spare a single avatar to meet me earlier. Instead, you had me wait until you finished screening tens of thousands of cultivators. Were you deliberately trying to humiliate me?"

"Screening tens of thousands of cultivators requires full focus and can't be done with distractions," Luo Feng replied calmly, "Meeting the Palace Master deserves my wholehearted sincerity."

"Sincerity?"

Wei Yang Palace Master nodded slightly. "Now that you're done screening, here's my condition: resign as 'Commander of Heaven

Patrol Palace,' and I'll consider you a friend."

"Resigning isn't an option." Luo Feng shook his head.

Wei Yang Palace Master froze momentarily, then spoke coldly again, "I am telling you—resign as Commander!"

Luo Feng looked at him in surprise, then suddenly burst into hearty laughter, "Hahaha, hahaha… amusing, truly amusing!"

Wei Yang Palace Master's face darkened. "Is this funny to you?"

"Of course it's funny." Luo Feng fixed his gaze on him. "Today marks our first meeting, and you dare demand I relinquish my position as Commander? Isn't it the grandest jest imaginable? What arrogance drives you to think you can make such demands of me?"

Wei Yang Palace Master stared back at Luo Feng.

"Hmph."

He snorted coldly.

Black flames ignited out of thin air, encircling Luo Feng's body. The terrifying flames carried power so overwhelming that even a Divine Emperor Perfection Level Low Level Primordial Life would likely suffer serious damage under them.

However, Luo Feng, equipped with his perfected 'Undying Blood Sea Body,' bolstered further by his 'Undying Heart,' had reached a level of physical prowess no lesser than that of a Divine Emperor Perfection Level Low Level Primordial Life—his resilience was undoubtedly astonishing.

"Is this all you've got?" Luo Feng smiled, standing unfazed. "Not even a hair out of place."

Wei Yang Palace Master observed this, smiling faintly. "You do have some talent."

Bound by city laws, direct confrontations couldn't escalate, leaving him to resort to subtle demonstrations to intimidate Luo Feng. Yet,

his flames had proven ineffective, as if Luo Feng regarded them no more than air.

"Luo Feng, in Yulan City, it would be wise to listen to me." Wei Yang Palace Master addressed him coldly. "Follow my lead, and I can help make you a Palace Master in the future."

Luo Feng stared back, chuckling, "In Yulan City, your word holds no weight!"

With that, Luo Feng turned and walked away.

Watching Luo Feng's retreating figure, Wei Yang Palace Master sneered.

"Resisting a mere thread of 'Black Sun Fire,' and you think you can contend with me? Ridiculous!" Wei Yang Palace Master simmered in anger—those bold enough to disrespect him in all of Yulan City were few and far between.

Today, Luo Feng joined their ranks!

Chapter 340 - 14 Forced to Launch

Luo Feng left Wei Yang Palace Master's cave mansion.

"What a piece of trash!" Before this meeting, Luo Feng had already anticipated it, especially since places like the Insect Nest, Deceit Workshop, and Shadow Tower were all under Wei Yang Palace Master's faction. This meeting only confirmed Luo Feng's judgment.

Wei Yang Palace Master, truly a piece of trash!

"To maintain the operation of a city, relying on trade, residence fees, and rental profits—these are understandable," Luo Feng thought. "But still dissatisfied with that, resorting to theft, plundering, and even using the guise of investigating suspicious cultivators... squeezing them even further."

"Wei Yang Palace Master, you truly are trash."

"Luckily, you haven't yet obtained the City Builder authority. If you did, I can only imagine the atrocities you'd commit."

Wei Yang Palace Master and Luo Feng were vastly different.

Wei Yang Palace Master had reached the level of a Half Primordial Enlightened a long time ago, deeply entrenched in this stage, making further progress extremely difficult. He no longer strove for improvement and only sought easy access to more resources. Naturally, he attached great importance to Yulan City.

Luo Feng was different!

Luo Feng's cultivation soared to new heights, and the Nine Rivers Sacred Realm's Yulan City was merely one of many stops on his

cultivation journey.

"Once I accumulate enough, break through in the Life and Death Dao, and obtain the City Builder authority, I'll drive Wei Yang Palace Master out." Luo Feng thought.

"Yuan Xiang Palace Master!"

Walking through Yulan City, Luo Feng transmitted a message to Yuan Xiang Palace Master, "From now on, I intend to start investigating all hidden low-level Primordial lifeforms in the entire city."

"You're going to start the investigation now?" Yuan Xiang Palace Master sounded pleasantly surprised, laughing in his reply. "Brother Luo Feng, you act way faster than the other elders. You've just taken the position of Heaven Patrol Palace Commander, finished screening the suspicious cultivators, and now you're starting a thorough city-wide investigation."

"The formations around every cave mansion in the city currently shield the cultivators inside, making it temporarily impossible to investigate them," Luo Feng explained in his transmission.

Outside the cave mansions, the cultivators accounted for only a small portion of the city's population.

"Start your investigation first. Once you're done, I'll arrange for all cave mansion formations to be closed in batches," Yuan Xiang Palace Master transmitted back.

"Okay," Luo Feng responded.

Naturally, the Eye of Biomimetic Destruction opened at the center of his brows, scanning his surroundings. He could vaguely perceive the souls of numerous cultivators on the streets nearby.

"Whoosh." "Whoosh." "Whoosh." "Whoosh." "Whoosh."

From his cave mansion, five of Luo Feng's avatars flew out.

Each avatar had its Eye of Biomimetic Destruction open.

A total of six Luo Feng avatars divided the city into zones, conducting a meticulous sweep.

At this moment, Yulan City was cloaked in light rain. The cultivators within the city came in diverse appearances, while Luo Feng, with an additional eye at his brow, blended seamlessly into the city's scenery. His six avatars flew casually, surveying area after area.

"Found one lurker, Enchanting Heart Worm avatar."

"Found a second, Enchanting Heart Worm avatar."

...

"Found the ninth, Soul-devouring Snake avatar."

...

Even upon discovering them, Luo Feng refrained from stirring the pot and instead quietly recorded the cultivators' identities. Using Yulan City's detailed database, identifying their designated cave mansion locations was an easy task.

After half a day, all six of Luo Feng's avatars traversed the city in its entirety, finally regrouping.

"Yuan Xiang Palace Master, I've completed the sweep of the entire city. Everyone outside their cave mansions has been screened," Luo Feng transmitted, "I identified a total of twenty-two lurkers."

"Twenty-two?" Yuan Xiang Palace Master was elated. "Once we eliminate them, following the causality line should allow us to capture a batch of additional lurkers."

Luo Feng nodded.

In terms of observational secret techniques, he was unmatched in Yulan City! However, in matters of causality, there were still others stronger than him.

"I'll now organize the elders into teams. They'll exterminate these twenty-two lurkers and follow the causality lines to capture more

lurkers," Yuan Xiang Palace Master transmitted. "This minor affair doesn't require your involvement."

"Understood," Luo Feng responded.

Tracking them via causality was something the elders could handle.

******

The Eye of Biomimetic Destruction allowed Luo Feng to view the entire city. However, the larger the range he observed, the less detailed his vision became; he could only discern the faint aura of many cultivators, making it difficult to probe their physical bodies, let alone their souls.

"Action time." Luo Feng's Eye of Biomimetic Destruction had long locked onto the twenty-two suspicious lurkers.

He saw everything clearly. Twenty-two elder-level figures launched their attacks simultaneously, striking down the twenty-two lurkers in an instant.

Using the causality lines, related avatars were rapidly captured thereafter.

...

In a plain cave mansion in Yulan City's outer district, a red-robed cultivator lived in solitude.

"King, our mid- and low-tier clan members lurking inside Yulan City are being killed one by one," a voice echoed within the red-robed cultivator's mind. "At least thirty clan avatars have died, and the number is quickly increasing."

"Mid- and lower-tier clan members, avatars getting slaughtered?" The red-robed cultivator murmured in confusion, "Why have so many been exposed?"

"This operation's details were known only to leadership-level figures. We carefully restricted core members, but as for mid-tier and low-tier clan members... the constraints weren't strict." The voice explained.

"Naturally, those mid-tier and low-tier clan members are unaware of the importance of the operation. Their true bodies remain outside the city. Those lurking inside are nothing but offspring avatars," the voice added.

"Then there's no need to act,"

The red-robed cultivator responded, "Remain patient. Now is not the time to act."

"Understood." The voice replied.

...

In Yulan City, tracing the twenty-two identified lurkers by Luo Feng along the causality line produced seventy-six additional avatars. Furthermore, implicated suspicious cultivators were sent to the Heaven Patrol Palace in large numbers.

During the capture process, over a hundred of these suspicious cultivators committed suicide.

"Brother Luo Feng truly deserves great credit. This round of screening has already forced out around two hundred lurkers," Yuan Xiang Palace Master was pleased. They had suspected that a considerable number of low-level Primordial lifeforms were hidden.

Previously, uncovering them had been extremely challenging.

Now, things were much smoother.

Luo Feng worked tirelessly, stationed at the Heaven Patrol Palace to screen every suspicious cultivator one by one. These cultivators were captured, interrogated, and released on the same day, without being extorted for treasures, causing widespread discussion within Yulan City.

...

"King, we've lost 205 clan avatars this time. These avatars belonged to 23 clans, with most wielding power at the Middle Stage or Early Stage Divine Emperor levels," the voice reported.

"Ignore it," the red-robed cultivator responded indifferently.

A few Middle Stage and Early Stage Divine Emperor clan members held no significance to the true "City Annihilation Operation."

"Taking advantage of this, I've issued orders for all members to go entirely dormant. No unauthorized actions are permitted," the voice said. "Having lost so many in succession, they are now obediently following orders."

"Patience is key. Once the timing is right, we will move," the red-robed cultivator declared, remaining composed.

He gazed in the direction of Yulan City's core region.

"The elders of Yulan City are clueless about how many clan members have infiltrated. Across the Nine Rivers Sacred Realm, the core members of both the Enchanting Heart Worm and Soul-devouring Snake clans have concentrated here--half of the core strength of their respective branches," the red-robed cultivator mused.

Only those with Late Stage Divine Emperor strength could be considered core members.

Divine Emperor Perfection-level figures are the leaders of a clan branch.

"Boom!"

Suddenly, Yulan City trembled violently, as a terrifying pressure erupted.

The red-robed cultivator was stunned, his gaze piercing through the formation to glimpse the outside, where dense purple light enveloped the entire city.

"Boom!" Another earth-shaking sound reverberated; the city's rain transformed into mist, with an invisible force emanating throughout every corner.

"Boom!" "Boom!" "Boom!"

Explosions thundered through Yulan City as one formation after another detonated! The surge of Heaven and Earth power grew increasingly chaotic and overwhelming, with the city's skies resembling turbulent seas.

Ordinarily, the elders only devoted a fraction of their consciousness to maintaining Yulan City's defensive systems. But during critical moments like siege battles, they concentrated their full strength to bolster the formations, amplifying their power considerably.

This was such a moment—the city's formations were being activated in succession, their might escalating rapidly.

This methodical activation signified that Yulan City was not yet in a state of urgency.

"What's happening? Why are Yulan City's formations operating at full strength?" The red-robed cultivator asked in alarm. "Could the operation be compromised?"

"Impossible."

"All participating core members were strictly constrained; even the detailed operational plans are known only to the leaders," the red-robed cultivator felt unease.

After tens of breaths had passed, the vast array of formations throughout Yulan City erupted fully, their formidable power enveloping every corner of the city. This left the cultivators within tense and anxious.

"I am Yuan Xiang." A soothing voice resonated across the entire city. "Fellow cultivators of Yulan City, do not panic! Our city has developed a method to detect low-level Primordial lifeform lurkers. From this moment, all cave mansion formations will be shut down in batches. Please voluntarily deactivate any personal formations within your residences to facilitate identity verification."

"The entire screening process will be completed within a day," Yuan Xiang Palace Master's voice echoed throughout the city.

"They can screen the entire city now?"

"Wonderful!"

"It's about time we eradicate all the lurking low-level Primordial lifeforms."

Throughout various districts, the vast majority of cultivators cheered. Over ninety percent of the city's cultivators were below the Divine Emperor level, powerless against those lurking low-level Primordial lifeforms—a true nightmare for them!

If the screening successfully removed all of them in one go, subsequent periodic checks would markedly enhance the city's safety.

"King! They're preparing to screen the entire city!" The voice sounded urgent.

The red-robed cultivator naturally heard the city-wide announcement, his expression darkening.

He was the mastermind behind the "Annihilate Yulan City" operation and the first to arrive. The other "Kings" hadn't all gathered yet, as the designated time for the operation hadn't arrived.

"The city's forces require meticulous infiltration, so they've arrived ahead of schedule, and they're all here. However, only thirty percent of our forces outside the city have arrived, with the rest still en route," the red-robed cultivator seethed.

"No matter. Even if we launch prematurely, our low-level Primordial lifeforms may suffer heavier losses, but the probability of annihilating the city remains above ninety percent."

The red-robed cultivator's gaze turned icy.

He realized there was no time to wait.

Delaying further risked exposure to a full-scale screening!

"Transmit my order: Follow the planned operation—begin!" The red-robed cultivator's voice abruptly echoed within the minds of all lurking low-level Primordial lifeforms in the city, an intangible mental wave inspiring their unconditional compliance.

Ps: Rest day tomorrow; the day after, the battle for Yulan City begins!

Chapter 341 - 15 Assassination

"The King!"

"The King is in Yulan City!"

Every low-level Primordial life form lurking within Yulan City felt a surge of fervor in their hearts.

The low-level Primordial lives were notoriously unruly. Even when ordered by their leaders, only the scarce core members would somewhat obey, while the vast majority of middle and lower-tier clans wouldn't care much. They might go centuries without ever meeting their leaders and could perish at the hands of Cultivators at any time! Naturally, they became even more indulgent and unrestrained.

Indulgence, recklessness, and unruliness! These traits had already become traditions among the low-level Primordial lives.

The Enchanting Heart Worm clan, the Soul-devouring Snake clan, and the Void Wanderer clan were the three major species of Lurkers. Once a "King" emerged among these three species, they would possess an inconceivable power to command, even making the Kings of other species willing to heed their orders!

This was because only the "King" of the Lurker species could easily infiltrate cities and assassinate the topmost core members within, significantly reducing the difficulty of breaching the city's defenses.

In the history of the Nine Rivers Sacred Realm, most city breaches—eight out of ten cases—were due to the emergence of a "King" among the three Lurker species.

Once a Lurker King was discovered, the Cultivators of the Nine Rivers Sacred Realm would immediately call for reinforcements! The Dark

Sacred Realm would send terrifying Cultivators to hunt down the Lurker King.

Hence, the birth of a Lurker King was kept in absolute secrecy.

A King only had one chance in their life to breach a city!

Once they failed, under relentless pursuit from the cross-realm forces of the Dark Sacred Realm, survival was impossible.

"This is my only chance, my only chance to regain freedom." The red-robed Cultivator rose to their feet, their gaze icy. To them, the entire Nine Rivers Sacred Realm was a vast cage! After enduring countless hardships, they finally attained Super Limit Level, granting them an opportunity for "freedom."

If they could breach the city! Out of hundreds of millions of Cultivators, they only needed to massacre a fraction to accumulate enough Merit Points.

"Act now!"

The red-robed Cultivator issued the order. At that moment, all the leaders hiding across Yulan City sprang into action, while the other clans continued to lie dormant.

Whoosh!

The red-robed Cultivator emerged from their Cave Mansion, gliding through a faint mist as they flew toward Wei Yang Palace Master's Cave Mansion.

At the same time, another 32 leaders began to head toward Wei Yang Palace Master's Cave Mansion as well.

Under the call of the King, 32 leaders from the Enchanting Heart Worm clan and the Soul-devouring Snake clan, each with the strength of Divine Emperor Perfection, gathered here.

First, several regions across the 35 city zones of the Nine Rivers Sacred Realm had branches where Divine Emperor Perfection Level individuals hadn't yet emerged. The strongest members in those

branches were some Late Stage Divine Emperor clan members, making leader-level members even rarer.

Second, only about half of the leaders were participating in this battle; the rest abstained, so the current participants only represented about half of the elite forces of the two major clans.

"Rumble~~~~"

The gates of Yulan City slammed shut with a deafening roar.

With the gates closed, no Cultivator could enter or leave the city temporarily!

"All Cultivators, return to your respective Cave Mansions immediately, or you may temporarily stay in nearby merchant establishments," Yuan Xiang Palace Master's gentle voice echoed throughout the city. "In a moment, all Cultivators are forbidden to step outside. Anyone fleeing will be treated as a low-level Primordial life form in disguise."

"This inspection will be completed within a day, and all Cultivators must cooperate during the process."

The message resounded.

The scattered Cultivators across various locations began swiftly heading back to their Cave Mansions if they were nearby; those farther away opted to temporarily stay in merchant establishments instead.

As time passed, a massive flow of Cultivators spread across Yulan City, with their numbers outside gradually decreasing.

"Huh?"

The red-robed Cultivator, now close to Wei Yang Palace Master's Cave Mansion, noticed that many of the other 32 leaders were still far off, arriving at varied speeds and distances.

"Deploy the first branch to attack the entire city and draw the Cultivators' attention," the red-robed Cultivator immediately

commanded.

"Yes."

The leader of the first branch responded and promptly initiated the assigned orders.

Suddenly, in various sectors of Yulan City, over two hundred Cultivators emerged from their Cave Mansions simultaneously. These were all avatars of Enchanting Heart Worms or Soul-devouring Snakes.

The attack plan had always designated these avatars for sacrificial missions.

However, these avatars possessed remarkable strength—some were avatars of core clan members. For Cultivators below the Divine Emperor level, it was a swift massacre at the hands of Enchanting Heart Worms and Soul-devouring Snakes, with casualties piling up at shocking speed.

"Hahaha, it's been ages since I killed Cultivators so wantonly."

"In just a blink of an eye, I've already slain over ten."

"With the Merit Points from this massacre, my bloodline will surely evolve to unprecedented heights."

These two hundred Lurkers raged unchecked, no longer worrying about secrecy—the more reckless, the better!

"They couldn't resist during the city-wide investigation? Lurkers already revealing themselves?"

"Wipe them out!"

The Elders in charge of Yulan City's numerous defensive Formations showed no leniency, decisively deploying the Arrays to strike down the rampaging Lurkers.

Rumble~~~~

Thunder and lightning rained down like an unrelenting storm! Within the blink of an eye, every Lurker wreaking havoc across the city was struck, with no room to dodge. Most of them were annihilated instantly, reduced to ashes.

Only three Lurkers managed to withstand the lightning strikes.

"These three must either be Late Stage Divine Emperor True Bodies or leader-level avatars!" One Elder responsible for the Thunder Array communicated this insight to the other Elders.

Late Stage Divine Emperor low-level Primordial lives had exceptionally tenacious Life Forces; even the strikes of a Formation controlled by an Elder couldn't annihilate them from afar.

"They're likely just leader-level avatars."

"These Lurkers are cunning—they almost never send their True Bodies into cities, only avatars."

Boom! Whoosh! Roar!

Within mere breaths, the three Lurkers who had resisted the Thunder strikes were subjected to successive attacks from multiple Formations.

Flames engulfed their bodies.

Invisible winds howled across them.

Freezing air descended upon them like death.

...

Layer upon layer of Formation attacks, each one personally directed by the Elders. Ultimately, all three Lurkers met their demise.

Meanwhile.

Not far from Wei Yang Palace Master's Cave Mansion, the red-robed Cultivator had already rendezvoused with seven other leaders.

"Deploy the second branch to attack the city and hinder them further," the red-robed Cultivator commanded once again.

"Yes!"

With a new order issued.

Another 192 Lurkers charged out of their Cave Mansions. By this point, very few Cultivators remained outside. These unleashed Lurkers attacked every visible Cultivator within sight, even storming merchant establishments to target attendants inside.

"More Lurkers?"

"What's going on? How are there still so many surfacing?"

The numerous Elders controlling the Formations were taken aback.

While the emergence of the first batch of over two hundred Cultivators had been anticipated, the sudden appearance of a second wave totaling 192 seemed increasingly suspicious.

"Slaughter them first."

"Exterminate."

The Elders executed the Arrays, striking from afar.

The 192 Lurkers attacked with reckless abandon, knowing that even if their avatars perished, as long as they killed enough, they'd still garner sufficient Merit Points.

In just three breaths of time, all 192 Lurkers were vanquished. Of course, they also managed to kill hundreds of innocent Cultivators along the way.

"Something isn't right."

Yuan Xiang Palace Master had also noticed the anomaly.

Two consecutive waves of carnage led Yuan Xiang Palace Master to feel uneasy.

"All Cultivators who have yet to return to their Cave Mansions must immediately enter the nearest merchant establishment. Ten breaths of time are all that remain before inspections commence," Yuan Xiang Palace Master's voice resonated.

"Hurry, hurry!"

"Ten breaths is too short!"

The vast majority of Cultivators in Yulan City were below Divine Emperor level, their speed constrained by the rules of the Nine Rivers Sacred Realm. Forced to act swiftly, many rushed toward the nearest merchant establishments rather than their Cave Mansions.

...

The red-robed Cultivator near Wei Yang Palace Master's Cave Mansion was gradually joined by 12 leaders.

"Only ten breaths of time? This operation feels too rushed." The red-robed Cultivator frowned slightly. According to the original plan, at least twenty leader True Bodies were to act simultaneously, ensuring absolute dominance to eliminate Wei Yang Palace Master.

Then they could proceed to defeat others one by one, effortlessly breaching the city.

But now?

The gathered external forces only amounted to 30% of their intended strength!

Their movements inside the city, hampered by Yulan City's full defensive lockdown, were also severely restricted.

"Even if rushed, we have no choice." The red-robed Cultivator's eyes swept toward the nearby leaders. The 12 leaders around them also fully understood the urgency of the situation.

"Enter the Cave Mansion," the red-robed Cultivator transmitted the order.

The 13 moved in unison.

"Boom—"

A terrifying burst ripped apart the front gates of Wei Yang Palace Master's Cave Mansion.

Inside the Cave Mansion, Wei Yang Palace Master sat meditating expressionlessly, controlling the Formations enveloping the entire city and coordinating with other Elders to combat the Lurkers.

"Hmm?" Wei Yang Palace Master instantly stood, looking toward the disturbance.

Twelve ominous presences descended upon them.

Each presence filled Wei Yang Palace Master with dread.

"Twelve leaders, and all True Bodies!" Wei Yang Palace Master could not believe their eyes.

The leaders of the Enchanting Heart Worm and Soul-devouring Snake clans were notoriously difficult to deal with, targeting their enemies' very souls!

Outside the city, Wei Yang Palace Master had confidence in defeating a leader in a one-on-one combat. But against three at once? Confidence dwindled considerably.

"Now, inside the city, I have the aid of the citywide Formations. Even if all 12 True Body leaders attack simultaneously, there's still a trace of survival." Wei Yang Palace Master's heart wavered with unease. "But why would they risk sending all their True Bodies this time instead of relying on avatars?"

Something wasn't adding up!

Wei Yang Palace Master quickly sought aid from Yuan Xiang Palace Master, Master Gai Tao, and other Elders!

"Wei Yang Palace Master, meet your end!"

As the chaotic waves closed in, one presence near Wei Yang Palace Master exploded with unparalleled ferocity.

A red-robed Cultivator materialized as if emerging from the void, invading Wei Yang Palace Master's very soul. Twisting grotesquely, the red-robed figure transformed into a gigantic worm that devoured Wei Yang Palace Master's Spiritual Power in a single gulp.

"Super Limit Level!" Wei Yang Palace Master was both shocked and enraged. Never had they heard of a Super Limit Level entity arising among the Enchanting Heart Worm and Soul-devouring Snake clans within the Nine Rivers Sacred Realm.

Because if such an existence were revealed, the realm would have immediately summoned reinforcements from the Dark Sacred Realm.

"Kill!"

"There's no turning back for us!"

"This is our one and only chance at freedom!"

Boom boom boom boom boom boom boom boom!!!!!!

All twelve True Body leaders, driven to madness, plunged into Wei Yang Palace Master's body, joining their King in the ferocious assault.

Chapter 342 - 16 The Great Change

"A Super Limit Heartworm and twelve Leader Level True Bodies! Help me! Help me!" At this moment, the Wei Yang Palace Master barely managed to struggle as he sent out a distress signal. In the Nine Rivers Sacred Realm's Yulan City, he had multiple avatars.

Spiritual attacks simultaneously affected all avatars.

The avatars in other worlds experienced reduced effects. Particularly within the Source World, under the suppression of the Source World's Supreme Rules, even cross-boundary spiritual attacks were forcibly weakened to the 'Power Limit'.

However, all avatars in the Nine Rivers Sacred Realm were subjected to almost identical levels of lethal spiritual assault.

"Ahhh—"

The Wei Yang Palace Master held Yulan City in high regard. He carried two powerful Secret Treasures suited to himself, both at a level equivalent to the 'Undying Heart' and the 'Palm World', capable of protecting his soul.

But a single 'Super Limit Heartworm' and twelve leaders, all of them specialized in spiritual assaults and using their True Bodies, launched an all-out frenzied attack. Even with the treasures reducing the force by seventy to eighty percent, the remaining pressure of two to three tenths was still enough to make the Wei Yang Palace Master feel despair.

"Wei Yang Palace Master, hold on!" The Yuan Xiang Palace Master, though harboring some dissatisfaction toward the Wei Yang Palace Master, immediately activated the Formation to strike back at the

thirteen physical bodies.

"Wei Yang Palace Master, I'll help you!" Master Gai Tao also acted urgently, casting a three-colored radiance around the Wei Yang Palace Master.

"Wei Yang Palace Master." The Shadow Tower Master, Master of Deceit Workshop, and others all activated Yulan City's Formation in an attempt to rescue him.

The various Elders all sought ways to aid the Wei Yang Palace Master. At this moment, all prior grievances were set aside—everyone shared a single goal: to save the Wei Yang Palace Master.

The importance of the Wei Yang Palace Master to Yulan City's entire defensive system was even greater than that of the Yuan Xiang Palace Master! Though the Yuan Xiang Palace Master had a higher level of cultivation, over ninety-nine percent of his Heart Force was devoted to resisting corruption, rendering his contributions constrained. His significance lay instead in his friendships and influence, which served to deter enemies throughout the city.

"No—"

Only three breaths after the Wei Yang Palace Master's cry for help, all five of his avatars within the Nine Rivers Sacred Realm perished amid an unwilling roar of fury.

Low Level Primordial Lifeforms specializing in spiritual assaults were simply too terrifying.

One Super Limit Heartworm and twelve Leader Level beings, all True Bodies! At this moment in Yulan City, no one felt confident about surviving their all-out siege. Even Luo Feng could probably only hold out for a bit longer.

After all, compared to the Wei Yang Palace Master, Luo Feng currently had an advantage only in Will Secret Techniques! Moreover, Luo Feng at this moment could not yet harness Yulan City's Formation for self-protection.

"Whew."

The Wei Yang Palace Master suddenly opened his eyes, their gaze icy. At this moment, the 'King' had taken possession of his body.

In reality, the physical bodies of the Heartworm and Soul-devouring Snake cultivators they controlled had only served as vessels. Their true forms were the ethereal Heartworms and Soul-devouring Snakes themselves.

"King!" The twelve other Leader Level phantasmal figures spiraling around him grew ecstatic.

"The Wei Yang Palace Master is dead. We can proceed to the next step." The 'Wei Yang Palace Master' revealed a smile.

"Hahahaha…"

"Go!"

Under the King's command, the twelve Leaders instantly burst out of the cave mansion.

Since their presence was now exposed, the Leaders dismissed the need to continue possessing cultivators.

"All of the Wei Yang Palace Master's avatars across the Nine Rivers Sacred Realm have perished." In Yulan City, many elders familiar with the Wei Yang Palace Master could sense through Causality that no avatars of his survived anywhere in the Nine Rivers Sacred Realm.

"This is trouble…" Master Gai Tao's face grew grim.

"It's over." The Shadow Tower Master felt an ominous foreboding. "A King has emerged from the Lurker Species. If it strikes, it will bring about a true decisive battle."

The emergence of a King from any of the three Lurker major species was always a nightmare for the Cultivator Camp.

This nightmare decisively began as their strongest asset, the Wei Yang Palace Master, had already fallen!

...

Luo Feng, with one of his avatars stationed at Yulan City's outer limits, had originally planned to gradually shut down the cave mansion's Formations and conduct a detailed investigation. However, before the Formations were even significantly deactivated, the Wei Yang Palace Master had already been struck down.

"Brother Luo Feng, the Wei Yang Palace Master has been killed by a Super Limit Heartworm and twelve Leaders; each one a True Body." The Changqing Building Owner, an Elder, received the news immediately and relayed it to Luo Feng, who was in the Dan Tower.

"A Super Limit Heartworm?" Luo Feng's expression changed. "This is bad!"

He had foreseen that large-scale investigations might force the hidden Low Level Primordial Lifeforms into desperate counterattacks. But he hadn't expected to flush out a Super Limit Lurker so soon!

Throughout the Nine Rivers Sacred Realm's history, the fall of cities had been predominantly caused by the emergence of Super Limit Lurkers!

"Yulan City has reached the brink of life and death!" Luo Feng immediately realized this. "My large-scale investigation unintentionally provoked them into acting prematurely."

Without his investigation, the war's eruption might have been delayed further.

Giving them more time to prepare and strike when fully ready.

"Brother Luo Feng, the Wei Yang Palace Master is dead!" The Changqing Building Owner quickly informed him again.

Luo Feng had already sensed it.

He had met the Wei Yang Palace Master, establishing some level of Causality. Through this connection, he could discern that no avatars of the Wei Yang Palace Master were left in the Nine Rivers Sacred Realm.

"So quickly? That Super Limit Lurker will undoubtedly target the

other Palace Masters next." Luo Feng recognized the severity of the situation.

"What's that—"

Luo Feng turned to look into the distance, beyond Yulan City.

"What are those?"

On Yulan City's walls, the guards remained at their posts but suddenly froze in astonishment, staring at the horizon.

In the distance appeared a multitude of Low Level Primordial Lifeforms, their forms grotesque and varied. Their sizes ranged from vast to minute, their auras either enigmatic and sinister, blazing hot, icy cold, or illusory and unfathomable...

"Nether Ruins Wind Beast, Blood Demon Elysi, Demon Fire Bird, Frost Soul Watcher, Shu Guang Demon Lord, Primordial Wild Hoof, Frost Nightmare Messenger, Illusionary Pupil River, Void Weaver…" The guards felt their hearts tremble as they observed the countless Low Level Primordial Lifeforms of various species swarming forward.

"So many?"

"And their auras are so terrifying; many are Late Stage Divine Emperor, even Leaders!"

Even Luo Feng, observing from afar, felt a chill. His brows furrowed as the Biomimetic Destruction Eye between his brows scanned for more information. With just one glance, he took in the entire situation around Yulan City.

At this moment, a vast army of Low Level Primordial Lifeforms had entirely encircled Yulan City.

"This is a terrifying Low Level Primordial Life Army. Just the Divine Emperor Perfection Level entities—it's well over two thousand!" Luo Feng was shaken.

"So many Leader Level Low Level Primordial Lifeforms couldn't possibly originate solely from around Yulan City!" The Changqing

Building Owner communicated. "It must be that Leaders from numerous regions across the Nine Rivers Sacred Realm have arrived."

"And there's a Super Limit among them!"

Luo Feng saw it too.

Outside the eastern, western, and southern walls of Yulan City, enormous and hidden forces loomed beyond the Low Level Primordial Life Army.

Thanks to the Biomimetic Destruction Eye, Luo Feng could faintly discern these immense powers—each surpassing his current abilities. Even with the Undying Heart and Palm World, Luo Feng could only hope to survive.

There wasn't even a guarantee of an equal fight.

"This… this…"

"Why are there so many Primordial Lifeforms?"

"So many Leaders, and tens of thousands of Late Stage Divine Emperors!"

The Elders in charge of Yulan City's defenses also observed the enemy forces. Facing such overwhelming odds, their hearts trembled. The entire Elder-level combat forces within the city numbered only a little over seven hundred.

The disparity was staggering! Their only hope lay in using 'Yulan City' as a stronghold.

Yulan City, forged with the Yuan Xiang Palace Master's Merit Points, was a fortress crafted by Transcendent beings who had escaped the Braided Cage. Sheltering inside the city was akin to hiding in an impregnable fortress, capable of withstanding an enemy force a hundred times superior.

But the strongest fortress often fell due to internal betrayal. Now, with the Wei Yang Palace Master slain, the sense of impending disaster was palpable.

"Attack."

From all four sides of Yulan City, the immense Low Level Primordial Life Army surged forward under the command of the Kings outside. Their attacks were coordinated, their same-species techniques amplifying each other, as overwhelming assaults rained down upon Yulan City.

"Hold the line."

"Hold them off!"

The Formations of Yulan City, which had previously been used to hunt down infiltrators within the city, were now fully deployed to defend against the external onslaught.

Within an area of billions of kilometers around Yulan City, the forces of Heaven and Earth roared like tidal waves. A kaleidoscope of dazzling and varied powers was mobilized. The Low Level Primordial Life Army held absolute numerical superiority, crushing Yulan City beneath their relentless offensive.

Yet Yulan City, with its intricately interlocked hundreds of defensive systems, operated in perfect synchrony, standing like an unyielding bastion against all assaults.

"Inside, there's a Super Limit infiltrator! Outside, there's a unified Low Level Primordial Life Army from across multiple regions of the Nine Rivers Sacred Realm. Internal-external collusion, and now with the Wei Yang Palace Master dead, the likelihood of Yulan City's fall exceeds fifty percent."

"If Yulan City falls, nearly every cultivator within will die."

The Elders, though discouraged, managed to stay calm, each having avatars to preserve their existence.

But the mid-to-lower-tier cultivators within the city were panicking.

Without avatars, death for them would be final.

"I refuse to accept this. I endured endless hardships, being the sole

one from my homeworld to escape suffering and attain Transcendence, only to die here."

"We'll hold! The Yuan Xiang Palace Master will save Yulan City again!"

Every cultivator who reached the Nine Rivers Sacred Realm, even the most ordinary among them, was a legend in their own world. Yet now the majority of them could only watch events unfold powerlessly.

The Elders received immense privileges precisely because they bore the responsibility of protecting the city!

They had avatars, were unafraid of death, and could confront the Low Level Primordial Lifeforms with calm determination.

...

"The Wei Yang Palace Master is dead, and the Yuan Xiang Palace Master is seriously injured. If this continues, Yulan City will almost certainly fall." Luo Feng comprehended this dire reality. With his current strength, there was no way to shift the tide.

Inside the Dan Tower.

Luo Feng maintained one of his long-term stationed avatars there.

"Building Owner." Luo Feng immediately approached the Changqing Building Owner.

"Brother Luo Feng." Seeing Luo Feng, the Changqing Building Owner sighed. "This time, the Low Level Primordial Life species planned their attack thoroughly. Fortunately, your large-scale search across the city forced them into an early confrontation, giving us a sliver of hope. But with the Yuan Xiang Palace Master in this frail state, even that slim chance appears out of reach."

"The Yuan Xiang Palace Master's debilitating weakness must have been one of the reasons the Super Limit targeted Yulan City," Luo Feng acknowledged.

Even predators pick the weakest prey!

"Building Owner, the Dan Tower's treasure, the prized Hundred Tribulations Heart Essence, valued at ten billion Primordial Crystals—I need it now!" Luo Feng declared.

The Hundred Tribulations Heart Essence, the Dan Tower's signature treasure, had long been put on display to attract attention. Its exaggerated cost of ten billion had discouraged buyers, leaving it unsold.

Luo Feng could never have afforded to use such extravagant treasures in his earlier cultivation efforts.

According to his original plans…

Luo Feng would gradually comprehend the Primordial Bloodline, accumulate insights, and finally achieve a natural breakthrough in the 'Life and Death Dao'.

Luo Feng, deeply grounded in his cultivation, could easily achieve a breakthrough in one epoch of focused effort.

But the dire crisis demanded immediate progress!

He had no choice but to rely on treasures!

"Ten billion Primordial Crystals—at sixty percent, that's six billion. I'll pay you now." Luo Feng asserted. As a Vice Building Owner, he was entitled to make purchases at sixty percent.

"No need," the Changqing Building Owner shook his head. "It's uncertain if Yulan City can even hold. If the city falls, the Dan Tower's treasures will be lost as well. The Primordial Crystals would mean nothing."

"If we survive, you can settle the payment later." With a faint smile, the Changqing Building Owner produced the Hundred Tribulations Heart Essence.

Encased in transparent Crystal Jade, the item glimmered with a violet-gold liquid imbued with a warm radiance.

"Alright." Luo Feng wasted no time. Taking the Hundred Tribulations Heart Essence in hand, he vanished, reaching his secluded chamber in the Dan Tower in an instant to begin consuming the treasure.

Thank you to the new Alliance Hierarch, 'Meat-loving Abbot,' for your support! This also marks our 200th Alliance Hierarch!

Chapter 343 - 17 I Don't Owe Yulan City

One of the buildings in the Dan Tower complex was exclusively Luo Feng's.

"Hua."

When Luo Feng entered the quiet room, his body naturally split, creating the strongest avatar to remain outside the quiet room and protect it. The so-called strongest avatar carried the two great Secret Treasures, the Undying Heart and the Palm World.

Through long years of cultivation, Luo Feng's energy reserves deepened, and he had sufficient energy reserves in both the cave mansion and the Dan Tower.

"While consuming the treasure, no disturbance is allowed."

Inside the quiet room.

Luo Feng sat cross-legged, and with a flip of his hand, took out a portion of the Hundred Tribulations Heart Essence.

"Hundred Tribulations Heart Essence, I've never consumed such a treasure." Luo Feng was well aware of the wonders of this treasure. According to information, once the Hundred Tribulations Heart Essence is consumed, one's soul seems to undergo numerous trials of life and death, extremely painful.

The reason for such pain is that the speed of soul thinking and comprehension is forcibly raised to an extremely high level, causing the soul burden to become painful.

"Come on."

"I hope my Life and Death Dao can quickly reach the 'Late Stage Divine Emperor,' the faster the better." Luo Feng opened the crystal jade, lightly inhaling, and the purple gold liquid preserved inside flew directly into Luo Feng's mouth.

Upon entry, it was slightly cool, the taste of the Hundred Tribulations Heart Essence could be described as 'supremely delicious,' and Luo Feng's soul trembled, desperately desiring to absorb it.

Once the Hundred Tribulations Heart Essence entered the body, it was quickly absorbed by the soul.

"Boom——"

After absorption, Luo Feng quickly felt pain.

Buzz!

The speed of thought operation surged, at this moment, each instant of thought could reach a full 3,000 times the usual amount of information.

Comprehension also reached an extremely high level. Yet, such a high load made the soul feel like undergoing trials one after another, thus it is called 'Hundred Tribulations.'

"According to my original plan, slowly comprehending and accumulating enough deep knowledge for a natural breakthrough is the best option." Luo Feng thought, "But in that case, I would have to watch countless cultivators die."

Luo Feng couldn't do it.

Just to pursue the 'best effect' in cultivation, coldly watch countless cultivators die? If I were a demon, I could calmly watch it all, even smile while watching other cultivators die.

But Luo Feng walked his path of cultivation, preferring to have imperfections in cultivation than to violate his own heart.

"Although I've consumed the treasure, hoping for a quick breakthrough."

"However, the war has erupted! At the speed of combat between cultivators and Low Level Primordial Life, the war might conclude within a day."

"Can I breakthrough within a day?"

Luo Feng had no certainty.

No matter how strong the auxiliary treasure, it would not dare to claim an assured breakthrough within a day.

"I will do my utmost; the rest, I leave to fate." Luo Feng closed his eyes, focusing all his efforts on comprehending the 'Life and Death Dao.'

Far away in the Land of Origin, the avatar also used the Eye of Life and Death, observing the Primordial Bloodline, fully contemplating how to perfect the Life and Death Dao to the Late Stage Divine Emperor.

...

As Luo Feng urgently secluded himself, the Hall Master and Elders of Yulan City were doing their utmost to control the formations, coordinating hundreds of formations to resist the assault outside the city!

"This time, we investigated the entire city's lurkers, forcing the Low Level Primordial Lives to launch an attack prematurely. Their army outside is not too numerous and far from reaching Yulan City's limit of endurance." Yuan Xiang Palace Master sent a voice transmission to various Elders.

The Elders were also very aware.

To force an attack from the outside and break into Yulan City? The required power was too immense.

"The greatest threat to us is this group of lurkers." Yuan Xiang Palace Master sent a voice transmission, "Master Gai Tao, lead 92 Elders of the Star Array to chase and kill this group of lurkers. The rest of us are responsible for blocking the assault outside the city."

"Okay." Master Gai Tao immediately responded.

"We will cooperate with Master Gai Tao."

Master Gai Tao and 92 Elders no longer paid attention to the outside at this moment. As they coordinated, brilliant stars appeared in the formation above Yulan City, each star's power was quite terrifying. The stars converged right above the leaders and their group.

Whoosh! Whoosh! Whoosh!

Super Limit Level Enchanting Heart Worm and a group of leaders, after leaving Wei Yang Palace Master's cave mansion, headed straight for Master Gai Tao's cave mansion.

Because Yuan Xiang Palace Master's soul was polluted, posing very low threat. As long as they successively kill 'Wei Yang Palace Master, Master Gai Tao,' they will have won more than half of this war.

"Kill!"

Master Gai Tao's eyes were cold. Although his formation skills were slightly inferior to Wei Yang Palace Master, as an Artifact Refining Grandmaster, his formation skills were also considered extremely high. Under his leadership, 92 Elders coordinated perfectly.

Brilliant stars descended from high above, like meteors.

"Shoo!" "Shoo!" "Shoo!" "Shoo!" "Shoo!" "Shoo!"

The stars were incredibly precise, each one drawing an arc and accurately targeting the group of leader-level lurkers. These stars avoided the 'King,' directly targeting the various leaders.

"Hmm?"

The King and the 23 leaders behind him sensed the terrifying stars were already upon them.

"Block it."

The King even took the initiative, using his palms to block six stars in

succession! The body it possessed was that of the Wei Yang Palace Master, and his body was sturdy and strong, able to withstand the impact of six stars with only minor injuries, which were rapidly healing.

"Stop them!"

"There are too many!" The other 23 leaders, although trying to block, quickly collapsed under the dense bombardment of hundreds of stars and could only withstand it physically.

This Star Array inherently possessed the effect of damaging Spiritual Beings.

"No——"

Under the dense barrage of stars, the King and the leaders were all injured, and even one leader's true body was forcibly crushed, killed on the spot.

"A leader has died." This shocked the other leaders.

"The threat from outside was too low, allowing the Elders of Yulan City to organize an array against us." The King also understood this point, with more than three hundred Elders, and only Master Gai Tao as an intact Hall Master. This Star Array had mobilized a Hall Master and 92 Elders... causing Yulan City's external defense capacity to decrease by at least half!

With the defense capability halved, how can it withstand the wild assault from the outside!

If according to the plan, the outside army reached its most perfect state, in a crazy siege, the Elders could only sparingly use formations to kill lurkers. The lurkers would find it much easier to operate.

"All city lurkers, take action." The King sent a remote order, a voice resounding in the heart of every lurking Low Level Primordial Life in the city, "According to the plan, assassinate the Elders separately."

"Yes!"

"Yes!"

All over the city, they responded to the command.

Immediately, the Enchanting Heart Worm clan, Soul-devouring Snake clan set out, roughly half of the core members of the thirty-five branches of the Nine Rivers Sacred Realm. They all moved out at this moment.

Clan members in the Late Stage Divine Emperor were as many as 355! Counting the true bodies and avatars, there were thousands of cultivators possessed by these core members!

As for the avatars of the leaders, there were also hundreds.

The middle and lower-level members didn't know the action plan, and instead, their true bodies didn't enter the city; only avatars did. Naturally, these middle and lower-level members were more fearless.

"Kill."

"Kill."

All over the city, squads of lurkers erupted; at a glance, there were tens of thousands of cultivators! This made the Elders responsible for managing the defense system of Yulan City appear solemn.

"Our task is to kill 'Elder Qiao Ge.'" Ten leader avatars, eight true bodies in the Late Stage Divine Emperor, and hundreds of avatars formed a force, charging straight towards Elder Qiao Ge's cave mansion nearby.

They were lurking here precisely because they were close to Elder Qiao Ge.

"Our task is to kill Elder Tian He." Another squad of lurkers, similarly led by ten leader avatars.

These lurking squads were divided into two types.

One type was led by ten leader avatars, seeking to kill a certain Elder.

The other was deliberately deceiving outsiders, being squads of middle and lower-level lineage.

From the surface, it was difficult for the Elders to distinguish which team was strong and which was weak. After all, these members were all possessing cultivator bodies.

"Master Gai Tao, immediately use the Star Array to simultaneously attack each lurking squad." Yuan Xiang Palace Master immediately ordered.

"Yes." Master Gai Tao and the Elders responded.

Rumble~~~~

In the sky above Yulan City, densely packed stars gathered, numbering in the tens of thousands, and with the increase in number, their power also sharply decreased.

"Kill!"

Master Gai Tao and the 92 Elders were filled with killing intent.

Whizzing, like a meteor shower, tens of thousands of stars fell, attacking each squad separately!

The teams deceiving outsiders, composed of mid and lower-level lineage, suffered heavy casualties under the star assault, with most killed in just one wave of attack! Yet the elite squads led by 'many leader avatars' were able to withstand the star assaults.

"Kill——"

Master Gai Tao, expressionless, coordinated the Star Array and launched a second wave of assault.

Under this second wave of assault, those mid and lower-level lineage squads were completely finished. Only 39 elite squads remained unscathed.

"Everyone, the rest is up to you." Master Gai Tao suddenly reached out to the Elders, "I, Gai Tao, have been refining artifacts in Yulan

City till today, and today I will leave as well."

"What?"

"Gai Tao!"

The Elders, who were doing their utmost to respond, were a bit shocked.

"How can you do this?"

"Brother Gai Tao! You are also a Source World powerhouse, and only an avatar is here! At worst, fight to the death. How can you, as a Hall Master, escape at the critical moment?"

"Gai Tao!" Elders were anxious.

Master Gai Tao was too important; in external combat, a Hall Master was worth two or three dozen Elders. But in the key moments of formation, Master Gai Tao's role was even greater! With his withdrawal, Yulan City's defense capability and ability to respond decreased substantially.

"See clearly! A Super Limit Level lurker leads over 20 leader-level true bodies, heading straight for my cave mansion. They're almost here."

"I, Gai Tao, have been refining artifacts in Yulan City wholeheartedly, having never sought any resources or interested benefits. Since I didn't take these benefits, I naturally don't have to risk my life for Yulan City."

"I refine artifacts here, creating numerous Weapon Secret Treasures, which must not be damaged."

"Everyone, in the years in Yulan City, I owe nothing."

Swoosh!

When the King led the 20 leaders and were only ten breaths away from Master Gai Tao's cave mansion, Master Gai Tao left with his painstakingly refined Weapon Secret Treasures, riding a ship,

instantly soaring into the sky.

As a Hall Master, the high-altitude formation did not intercept him; the ship he was riding on instantly surged out of Yulan City.

"Shoo."

At the moment of exiting the city, the ship disappeared in an instant, reappearing billions of kilometers away, evidently, Master Gai Tao used an escape treasure regardless of the cost.

Participating in 'Space Travel' in the Nine Rivers Sacred Realm was virtually impossible! But as an Artifact Refining Grandmaster, Gai Tao purchased escape treasures long ago in the Dark Sacred Realm.

"Hmm?" Within the Primordial Life Army outside the city, a blue and white figure looked distantly in the direction of Master Gai Tao's escape.

"Ying, do I need to pursue and kill Master Gai Tao?" The blue-white figure remotely communicated.

"No need to mind him, his escape makes our next steps much easier." The 'Wei Yang Palace Master' semblance King looked up and smiled.

Master Gai Tao also had several avatars in the entire city, making it difficult for the lurkers to hunt him down, whether he fled or resisted.

However, Master Gai Tao's cave mansion was also a critical refining site! Master Gai Tao, leading a group of elders, had long been refining many Weapon Secret Treasures there.

"Gai Tao's character, the avatars might not matter, but he wouldn't part with Weapon Secret Treasures."

"As I anticipated, under a slight pressure, he voluntarily fled." The King smiled gently, "Next, let's find Yuan Xiang Palace Master."

...

At this moment, the Yuan Xiang Palace Master and more than three

hundred Elders in Yulan City were disheartened.

Master Gai Tao's desertion was greatly consequential.

Two Hall Masters, one dead and one escaped! Only Yuan Xiang Palace Master remained.

"Has it come to this?" Yuan Xiang Palace Master felt helpless, clearly aware of his situation, with his Heart Force primarily resisting pollution, barely able to manipulate formations. But to fight against 'Super Limit Level Low Level Primordial Life'? It was utterly impossible.

Chapter 344 18 Making a Move

As the Yuan Xiang Palace Master, a being who has mastered two Half Primordial Level Paths, he has endured relentless corruption and torment but remained unyielding. Naturally, he would not give up easily.

"Elders, we all know that the situation has grown dire." Yuan Xiang Palace Master sent a transmission, "Now, outside Yulan City, a massive Low Level Primordial Life Army has us surrounded. In this siege, escaping is something only a handful in the city can accomplish! I, for one, cannot manage such a feat."

The more than three hundred elders understood this as well. Even if they tried to flee, they wouldn't succeed!

Master Gai Tao, who has spent years refining Weapon Secret Treasures, believes the Nine Rivers Sacred Realm is far safer than the Dark Sacred Realm. This is his artifact-refining stronghold, and many of his accumulated Weapon Secret Treasures represent the bulk of his wealth; he cannot afford to lose them. That's why he spared no expense purchasing escape treasures.

Other elders, in terms of wealth, are no match for Master Gai Tao. The life-preserving items they possess provide no guarantee of their survival either.

"If escape is impossible, then we defend to the end."

"I have already requested reinforcements from the Dark Sacred Realm! There is a Super Limit Level Enchanting Heart Worm involved this time, and the Dark Sacred Realm has dispatched a cultivator squad. They will arrive at Yulan City in just over a day."

"As long as we hold out for more than a day, we can secure victory!" Yuan Xiang Palace Master spoke candidly.

The cultivator squad consists of three members, each no weaker than Yuan Xiang Palace Master at his pinnacle. They first need to reach the Teleportation Lake of the Dark Sacred Realm.

Afterward, they must travel from the Teleportation Lake of the Nine Rivers Sacred Realm to Yulan City. Even with rapid travel speed, the total time required is still over a day.

"The 92 elders in the Star Array, continue intercepting the Lurker teams."

"The other elders, disperse your avatars as quickly as possible. If discovered by the Lurker teams, have the avatars self-destruct immediately. We must delay their advance for as long as possible." Yuan Xiang Palace Master issued his orders one by one.

"Understood." All the elders responded in unison.

Previously, Master Gai Tao could have dispersed multiple avatars to delay time. However, Master Gai Tao loathed the gamble because, in the face of terrifying entities like 'The King' and others chasing him, even the slightest hesitation could result in the complete annihilation of all his avatars and treasures.

But at this moment, the elders within the city either had no choice or rejected the idea of escape. Naturally, they did whatever they could to stall.

...

Rumble~~~

With Master Gai Tao gone, the Star Array's power diminished by one-third. However, at this moment, the entire Star Array only targeted three teams out of the 39 elite Lurker squads.

Once the array's power concentrated, these three elite teams began to suffer casualties.

"King, these elders are too cunning; once they detect us, they immediately dissolve their avatars. And they have other avatars too!"

"The array's power is overwhelming. Our team has already lost three core members' True Bodies!"

"King, our team has only 60% of its strength left! These elders are too sly!"

"We succeeded! Elder Qiao Ge's avatar speed is far inferior to our spiritual forms. His fleeing avatars have all dissolved. There's now one less elder inside Yulan City."

A stream of messages reached The King, of which only one was positive news.

The King had anticipated this.

The pressure from the Low Level Primordial Life Army outside wasn't enough; their lurking operations became even more dangerous.

"Hold on. We've already reached Yuan Xiang Palace Master's cave mansion."

The King, along with 30 Leader Level True Bodies, launched an attack here. Originally, there were 32 Leader Level True Bodies among the Lurkers in Yulan City; two had already died during the interception missions.

"Boom——"

The King and his 30 Leaders, each resembling fleeting phantoms, moved at lightning speed, charging towards Yuan Xiang Palace Master's cave mansion with a thunderous roar.

Yuan Xiang Palace Master sat there, smiling as he regarded them.

"You've arrived," Yuan Xiang Palace Master smiled faintly, then simply dissolved.

"Hmm?"

The King and the 30 Leaders landed nearby.

"King, I can't sense any of Yuan Xiang Palace Master's avatars inside

Yulan City anymore," one of the Leaders said with confusion.

"Nor can I," the King murmured, slightly puzzled. He looked up at the array overhead, observing its operations. "But Yuan Xiang Palace Master is one of the City Builders; if he had died, we would've lost his control, and the city's array power should've drastically diminished. Yet… the array's power hasn't changed! He's still alive!"

"Indeed, I am still within Yulan City."

A voice echoed within the cave mansion.

The King and the 30 Leader Level True Bodies carefully tuned their senses.

"I have been battling the corruption, pouring my Heart Force into resistance. I know I'm the greatest weak point of Yulan City—how could I not have prepared?" Yuan Xiang Palace Master's voice rang out. "With just your efforts, you will never find me."

"Damn it!"

The King and the 30 Leaders were visibly irked.

Earlier encounters with Wei Yang Palace Master and Master Gai Tao had gone smoothly, following their plans as those two either died or fled.

Yet now, facing the most vulnerable Yuan Xiang Palace Master, they couldn't even locate him.

"Take a guess—where am I hiding?" Yuan Xiang Palace Master's voice's tauntingly persisted.

"Ignore him. He's just stalling for time."

The King's gaze swept across the 30 Leaders. "Proceed with the next phase of the plan. I will act solo; you divide into five squads and begin assaulting the elders one by one. The more we kill, the weaker the array's power will grow."

"Understood."

The King wasted no more time on Yuan Xiang Palace Master's voice. He quickly split off, initiating attacks on the elders' cave mansions one by one.

"Huff!"

Inside one of the cave mansions.

Elder Qu Yuan couldn't react in time before being struck by the King. Using his Innate Secret Technique, 'Enchanting Heart,' to a level beyond comprehension, Elder Qu Yuan, with only a single precious Secret Treasure—a possession kept in the Dark Sacred Realm—had no means of defense in his Yulan City body. He perished instantly.

One elder's avatars across the Nine Rivers Sacred Realm ceased to exist.

"Next," the King's icy gaze sharpened.

Though Yuan Xiang Palace Master's realm was the highest in Yulan City, even for the King, attacking him was nearly impossible.

But for the other elders, they fell before they even realized the King was there.

When unable to resist, their avatars across the Nine Rivers Sacred Realm were irrevocably destroyed.

...

"Sigh."

In a modest cave mansion within Yulan City's Outer City District, Yuan Xiang Palace Master concealed himself. He wielded a Secret Treasure, completely veiling all traces of light, aura, causality, and presence. Not even Luo Feng using the Biomimetic Destruction Eye could locate Yuan Xiang Palace Master's cave mansion.

Yuan Xiang Palace Master understood his weakness, but he was exceedingly wealthy. Long ago, he had purchased a Secret Treasure capable of perfectly hiding himself. In the Dark Sacred Realm, there were only a handful who could penetrate such concealment.

"Though the elders can disperse avatars, these lurking enemies, being Spiritual Beings, are too fast. The elders are being picked off one by one."

"Forget lasting a day; even half a day might be difficult." Yuan Xiang Palace Master observed the situation, leveraging the array that encompassed the city to understand the dire circumstances.

While the Star Array inflicted losses on the Lurker teams here and there, primarily among their core lineage, the King and the Leaders remained formidable adversaries—eliminating them was a far greater challenge.

******

Inside the Dan Tower.

Luo Feng was in seclusion, cultivating, with his most powerful avatar stationed outside the Quiet Room as a guardian.

"Brother Luo Feng." The Changqing Building Owner quickly arrived.

"Building Owner." Luo Feng looked at him, puzzled.

"Brother Luo Feng, I'm one of Yulan City's elders and a target for these lurking enemies. An elite squad has already approached the Dan Tower." The Changqing Building Owner took out a bracelet and handed it to Luo Feng. "This represents all the treasures within Dan Tower, valued at approximately 27 billion Primordial Crystals. Please help safeguard it, Brother Luo Feng."

"The treasures of Dan Tower? That's too valuable. I'm not confident I can protect them. Building Owner, you should find another way," Luo Feng replied.

"At least you're not an elder, making you less likely to be targeted by the lurkers. Your strength surpasses mine, and your chances of survival are certainly higher." The Changqing Building Owner attempted to persuade Luo Feng. "Even if these treasures cannot be protected, I will not hold it against you. But if they survive… I would be immeasurably grateful! Consider the Hundred Tribulations Heart Essence from before as part of your payment for safekeeping."

"The Hundred Tribulations Heart Essence's cost must still be settled afterward," Luo Feng said as he accepted the bracelet. "I'll help you store the Dan Tower's treasures. I can only promise to do my best!"

"Thank you, Brother Luo Feng." The Changqing Building Owner turned and looked to the outside.

The elite Lurker squad had already arrived at Dan Tower.

"Huff!"

The Changqing Building Owner shot into the sky, fleeing swiftly.

"Kill the Changqing Building Owner."

This elite squad consisted of eight Leader Level avatars, six core lineage True Bodies, and fifty-nine core lineage avatars. A single core lineage True Body alone could threaten the Changqing Building Owner. Together, such a team was terrifying.

"Roar——"

A massive, illusory snake suddenly let out a furious roar. The sound reverberated throughout the Dan Tower complex, striking the fleeing Changqing Building Owner and briefly disturbing his presence.

The Enchanting Heart Worms and Soul-devouring Snakes, of the Low Level Primordial Life species, were spiritual life forms capable of transitioning between illusion and reality. They bore some resemblance to the spiritual beings Luo Feng had confronted in Infinite Space, though clearly more terrifying.

"Hmph!"

Accompanied by an abrupt cold snort.

A mighty blood-colored tidal wave materialized out of nowhere, engulfing the vast surroundings of Dan Tower in an instant. It eradicated the elite Lurker squad's True Bodies and avatars alike.

In a mere moment, all of them had perished—without exception.

"Hmm?" The fleeing Changqing Building Owner observed this scene in stunned disbelief.

"This can't be!" The Changqing Building Owner was incredulous.

...

"This is——"

Watching intently from a concealed cave mansion in the Outer City District, Yuan Xiang Palace Master, hidden from all traces or senses, witnessed the events at Dan Tower unfold.

An entire elite Lurker squad had been annihilated instantly with no chance to resist!

"Enchanting Heart Worms and Soul-devouring Snakes of Late Stage Divine Emperor-level, capable of shifting between reality and illusion, possess extraordinarily tenacious life forces. For someone to annihilate their bodies in one strike, fewer than twenty in the city could achieve it! To eliminate an entire squad in a single move, only Wei Yang Palace Master or Master Gai Tao could manage it." Yuan Xiang Palace Master's eyes lit up.

Master Gai Tao had fled without a fight.

Wei Yang Palace Master had stood strong against 'The King' and twelve Leader True Bodies, resisting for several seconds.

An elite Lurker squad was, in terms of threat, roughly equivalent to a single Leader's True Body.

At Palace Master levels of strength, one could effortlessly destroy such a team.

"Luo Feng, have you reached the realm of a Half Primordial Level Enlightened One?" Yuan Xiang Palace Master quickly sent a transmission. Amidst the death of one Palace Master and the escape of another, it seemed a new Palace Master had emerged within Yulan City.

——

Thanks to the new Alliance Hierarch 'Reader20241130150437038' for the reward! Thank you for your support!

Chapter 345 - 19 City Builder Privileges

"My current strength is roughly equivalent to Wei Yang Palace Master and Master Gai Tao," Luo Feng replied briefly. At this moment, nearly all his focus was devoted to comprehending the Life and Death Dao. At his level, he could divide his thoughts into billions! Especially after ingesting the 'Hundred Tribulations Heart Essence,' his comprehension had greatly increased, and his mental processing speed had skyrocketed three thousandfold.

The conversation with Yuan Xiang Palace Master, including his earlier move to annihilate an elite squad of Lurkers, impacted his focus by less than one-thousandth.

"Equivalent to Wei Yang Palace Master and Master Gai Tao?" Yuan Xiang Palace Master was overjoyed.

"Such strength is not enough to change the situation." Luo Feng showed no excitement.

"Luo Feng!"

Yuan Xiang Palace Master spoke urgently, "I've already requested reinforcements from the Dark Sacred Realm. A team of Cultivators from the Dark Sacred Realm is on its way and will arrive in a little over a day. Our priority is to hold out until this team arrives."

Under the assault of the Low Level Primordial Life Army, Nine Rivers Sacred Realm had no internal capacity to provide support.

Although Nine Rivers Sacred Realm contained two entities who had mastered the 'Two Half Primordial Level Paths,' these individuals only dispatched Avatars, while their most crucial Secret Treasure was stationed in the Dark Sacred Realm, leaving them unable to break

into Yulan City.

"Luo Feng, I hope you'll accept the 'City Builder' authority," Yuan Xiang Palace Master transmitted. "Ever since establishing Yulan City, I've never regarded myself as the City Lord. I understand my severe contamination issues, and I've been waiting for an appropriate successor. You are that ideal successor."

Luo Feng was stunned.

The City Builder authority, handed over to him?

"My strength hasn't thoroughly surpassed that of Wei Yang Palace Master and Master Gai Tao yet," Luo Feng transmitted. "After the war, Wei Yang Palace Master's Avatar is likely to return to Yulan City."

"Don't worry about him; the most critical matter for Yulan City right now is holding its ground!" Yuan Xiang Palace Master communicated urgently. "You've only been in Nine Rivers Sacred Realm for just over 2,500 eras and have already reached the strength of a Half Primordial Level Enlightened one. Your talent far exceeds mine. You taking charge of Yulan City would only be to Yulan City's benefit!"

"Luo Feng, the situation is dire. There's no room for hesitation!" Yuan Xiang Palace Master pleaded.

"Very well, I will accept the City Builder authority," Luo Feng finally agreed without further hesitation.

On one hand, he was confident in himself, believing his strength would quickly surpass Wei Yang Palace Master and the others, sweeping away all opposition.

On the other hand, the stakes were indeed critical at present, affecting the lives of billions of Cultivators in Yulan City. Assuming the responsibilities of City Builder would grant him access to various city benefits and allow him to exert greater power.

"Excellent!"

Yuan Xiang Palace Master transmitted, "Immediately dispatch an Avatar to the Outer City District. I'll provide the detailed address.

Come here, and I will hand over the 'City Building Seal.'"

It was only after receiving the exact location that Luo Feng realized where Yuan Xiang Palace Master had been hiding.

"Your appointment as the leader of Yulan City must remain confidential. No third party may learn of it," Yuan Xiang Palace Master warned. "If word leaks out, the Low Level Primordial Life Lurkers will stop at nothing to hunt you down."

"Understood." Luo Feng acknowledged.

Faced with the unrelenting attacks from King and the True Body leaders, Luo Feng knew he wasn't yet confident enough to withstand such an assault.

Luo Feng made a decision.

His strongest Avatar, stationed outside the Quiet Room as a guardian, waved his hand and retrieved a Void Netherworld Pupil Ship within the Quiet Room. After ingesting the 'Hundred Tribulations Heart Essence,' this Avatar entered the ship for Cultivation.

"With the Low Level Primordial Life Army besieging the city, I cannot fully immerse myself in cultivating." Luo Feng had no choice but to divert some of his attention to managing numerous actions.

At this moment, he had to participate in the city defense efforts.

If he didn't, Yulan City's fall would come even faster, leaving less time for his breakthrough in the Life and Death Dao.

Despite external chaos, the ingestion of the Hundred Tribulations Heart Essence ensured his efficiency in Dao comprehension remained extraordinarily high, continually enhancing his mastery of the Life and Death Dao.

"Hah."

The strongest Avatar quietly departed, leaving only one ordinary Avatar with energy reserves a hundred times that of a Perfect Divine Body stationed at the Quiet Room, fortified by the Dan Tower

Formation.

Given Luo Feng's current realm, even an ordinary Avatar boasted strength surpassing masters like the Deceit Workshop Lord. Combined with the Dan Tower Formation, its power was formidable enough.

...

"King, we pursued Changqing Building Owner at Dan Tower. Unexpectedly, in Dan Tower, we encountered the terrifying Blood Sea Formation, which annihilated our elite Lurker squad entirely," a True Body leader immediately transmitted.

This elite squad included eight Leader Level Avatars. After the Avatars perished, their True Bodies naturally perceived all events.

"The Blood Sea Formation? Dan Tower? That's Cultivator Luo Feng!" King immediately identified. Before launching the war, they had infiltrated well in advance, acquiring detailed intelligence.

"Do we target Luo Feng and attempt to eliminate him?" a leader transmitted, seeking instructions.

"No."

King's gaze turned icy. "At this critical juncture, every bit of our Lurker squad's strength is indispensable! Cultivator Luo Feng is comparable to the Insect Nest Master and the Shadow Tower Owner. This tier of Cultivators possesses numerous Avatars, making them incredibly challenging to kill. With the help of Dan Tower's formations, his strength may even rival the Three Hall Masters."

"During the siege, our priority is eliminating weaker Elders."

"Weak Elders are easier to kill. With each Elder's death, Yulan City's defensive system weakens incrementally." King ordered decisively, "Luo Feng isn't an Elder. Don't waste energy targeting him."

"Understood," the leader complied.

Based on available intelligence, killing Luo Feng would demand more effort than eliminating twenty ordinary Elders combined.

Yulan City harbored over 300 Elders, plus approximately 400 Elder-level figures who hadn't officially assumed the Elder title. These stronger individuals were not priorities for the Lurkers to target.

...

"Haha, no wonder they call him Luo Feng Divine Emperor!"

"Remarkable!"

"In a single move, he annihilated an elite Lurker squad."

Elders overseeing Yulan City's defense system were keenly aware of city-wide developments. Observing the confrontation at Dan Tower, where an elite Lurker squad had been utterly wiped out, they felt elated and rejuvenated.

Reason being: these Lurkers were exceedingly difficult to kill.

They were Low Level Primordial Life forms specialized in mind-based capabilities, with extraordinary agility! While capable of easily hunting Elders, the Elders found it incredibly challenging to counter them.

"To obliterate an elite Lurker squad in one swoop, Luo Feng Divine Emperor's strength should be on par with Wei Yang Palace Master and Master Gai Tao."

"Luo Feng Divine Emperor, if strong enough, should immediately assume the mantle of Hall Master."

"Indeed, with sufficient power, he should be the new Hall Master. Having one more Hall Master would significantly ease our city's defense."

"But his power is likely insufficient. The extensive and intricate formations he deployed at Dan Tower enabled him to vanquish the elite Lurker squad. Outside Dan Tower, it's doubtful he could wield such power." Another Elder disagreed.

"Don't argue, everyone." Yuan Xiang Palace Master transmitted. "At present, I'm being hunted by a Lurker squad and can only remain

hidden. I'm unable to reach Elder Hall, unlock its defenses, and preside over either the Elder or Hall Master trials."

The Elders understood.

Indeed.

Previously, even the most fearsome Lurker squad, led by the Super Limit Level Enchanting Heart Worm, had invaded Yuan Xiang Palace Master's cave mansion, forcing him to hide.

Without the City Builder authority, Elder Hall couldn't be opened, nor could its 'Elder Trial' or 'Hall Master Trial' be initiated. Only by passing these trials could one earn the titles of Elder or Hall Master.

"Palace Master, you must be extremely cautious not to be discovered by the Lurkers. If you're found, Yulan City's defensive system will weaken further, and total defeat will become inevitable." The Elders couldn't bear another blow.

Among the Three Hall Masters, only Yuan Xiang Palace Master still held the line. Without him, Yulan City's defense would fall further.

...

Inside Yulan City.

The Elders, while leveraging the city's defensive systems to fend off external assaults, also devised strategies to intercept and eliminate the Lurker squads.

The Lurker squads, in turn, devised their strategies to hunt down individual Elders.

Both sides fought tooth and nail.

"Enclose them!"

Teams comprising Elder-level Avatars collaborated, while those within the city possessing Elder-level strength but without the Elder title also joined. These individuals hadn't become Elders primarily due to lacking Avatars; their True Bodies resided in the city, and they

had more to lose.

Elder-level teams, using Yulan City's defensive systems, could trace Lurker squads' movements, enabling preemptive strikes and encirclement.

Meanwhile, the Lurker squads leveraged their extraordinary speed!

Both sides possessed unique advantages.

"They're too slippery!"

Elder-level teams repeatedly attempted to encircle the Lurker squads, but the Lurker squads' superior speed allowed them to escape effortlessly. Only high-altitude attacks from Yulan City's formations could hit them; evasion was impossible, so they were forced to counter defensively.

"Huh?"

An elite Lurker squad flying mid-air suddenly noticed surrounding trees and plants shaking while a terrifying toxic mist began spreading everywhere.

Under the toxic fog's pervasive influence, the elite squad lost almost all its members in an instant, leaving the survivors heavily poisoned.

"Such terrifying poison."

"It's Elder Xingyi!"

The squad immediately identified the attacker.

A massive tree suddenly stood up, its trunk bearing a face. Numerous surrounding trees and plants frantically attacked the Lurker squad.

"You despicable Lurkers, all of you deserve death." The tree's visage seethed with murderous intent. The tree was one of Elder Xingyi's puppets devoid of any vital life force, rendering it imperceptible to the Lurkers.

A powerful puppet coupled with a pre-arranged formation at the core

area of the city's defenses laid in wait! Finally, they ensnared a passing Lurker squad.

Using the poison mist formation in conjunction with tree and plant attacks, the squad was annihilated within seconds, leaving none alive.

"Well done, Elder Xingyi."

"Another elite Lurker squad has been wiped out." The Elders expressed their excitement.

Up until now, only Luo Feng and Elder Xingyi had eliminated entire elite Lurker squads. These Lurkers were incredibly devious, deliberately avoiding confrontation with top-tier Elders and targeting weaker ones instead.

"Hmph."

King sat inside a cave mansion. Another Elder had perished, causing all corresponding Avatars in Nine Rivers Sacred Realm to vanish.

"Elder Xingyi? Top-tier Elders are indeed troublesome." King's power certainly allowed him to go against top-tier Elders. However, doing so proved inefficient.

Exhaling sharply.

King focused on hunting weaker Elders. Targeting them meant the Elders couldn't self-destruct their own Avatars in time.

...

Fueled by Yuan Xiang Palace Master's directions, Luo Feng's most potent Avatar traveled swiftly while cautiously observing with the Biomimetic Destruction Eye to avoid Lurker squads and unnecessary conflict.

Exhaling softly, Luo Feng entered a seemingly ordinary cave mansion.

"Yuan Xiang Palace Master, I've arrived."

Luo Feng scrutinized the seemingly mundane cave mansion, finding no traces of life or unusual features.

Suddenly, Yuan Xiang Palace Master's figure materialized from the void nearby.

"Luo Feng." Yuan Xiang Palace Master smiled faintly, nodding slightly.

Chapter 346 - 20 Refinement

Luo Feng was quite surprised: "At such a close distance, I didn't notice anything?"

In terms of realm and secret techniques for detection, Luo Feng considered himself to be quite advanced.

"I bought a secret treasure to hide myself in the Dark Sacred Realm, so I could escape the perception of the Super Limit Level Enchanting Heart Worm," Yuan Xiang Palace Master said solemnly, "Luo Feng, the situation is grave now. That Super Limit Level Enchanting Heart Worm and a group of leaders are continuously attacking and killing the elders! You need to quickly refine this 'City Building Seal'."

Yuan Xiang Palace Master produced a black seal from his hand.

Luo Feng's heart trembled.

Killing low-level Primordial Life forms can accumulate battle merit. Sufficient battle merit can be exchanged for 'World Level Primordial Life Materials', 'complete High-Level Primordial Life corpses', 'secret treasures', 'rare treasures', and other items.

Some treasures equivalent to the Star Tower and Eye of Life and Death can also be exchanged.

According to what Luo Feng knew, building a city requires at least 2 million merit points to exchange, which can build a stable city.

Additionally, a City Builder needs to recruit enough elders to help build the city.

"Even at the most common acquisition price, one merit point is equivalent to 10,000 Primordial Crystals, so 2 million merit points would need 20 billion Primordial Crystals. Not to mention it's very

difficult to acquire such a vast amount of battle merit," Luo Feng felt the City Building Seal was too hot to handle.

Usually, a City Builder wouldn't give the City Building Seal to other cultivators.

"Stop hesitating! While you hesitate, another elder has been killed," Yuan Xiang Palace Master urged, "Once the city falls and Yulan City is massacred, everything will be for naught."

Upon hearing this, Luo Feng immediately reached out to take the black seal.

"Quickly refine it," Yuan Xiang Palace Master urged.

Holding the black seal, Luo Feng began to refine it.

Yuan Xiang Palace Master felt relieved observing this process, feeling a heavy burden lifted from his shoulders.

"Luo Feng," Yuan Xiang Palace Master said as he watched Luo Feng refine the City Building Seal, "In my cultivation journey, I even stood at the pinnacle in the Dark Sacred Realm, accumulating massive amounts of battle merit and numerous treasures over the long years! But after my soul was polluted, I only had one goal, which was for my spiritual will to break free from the braided cage!"

"Only by breaking free from the braided cage can I ignore this pollution."

"I also wanted to build a city, hoping for a different cultivation life to help my spiritual will."

"Since the establishment of Yulan City, the pollution of my soul has worsened, and even maintaining the formation has become strenuous," Yuan Xiang Palace Master said to Luo Feng, "But I have feelings for Yulan City too."

"Today, I have found my successor. I believe you are more suitable to protect this Yulan City than I am," Yuan Xiang Palace Master said, "I will continue to control the formation until this battle for Yulan City is completely over. Then, I will completely let go and devote all my

energy to fighting the pollution."

"Palace Master. As long as one is alive, there is hope in the path of cultivation," Luo Feng said.

"Have you successfully refined it?" Yuan Xiang Palace Master noticed with joy.

Luo Feng nodded slightly: "After refining the City Building Seal, I feel that I can harness a vast energy within Yulan City to strengthen myself."

"As the City Lord, Palace Master, and Elder, you can all mobilize the city's energy. It's just that the proportions differ," Yuan Xiang Palace Master explained, "I am using more than ninety-nine percent of my heart force to combat the pollution, even maintaining the formation is strenuous, so mobilizing the city's energy is naturally more difficult."

By refining the City Building Seal, Luo Feng naturally learned many secret details.

"Familiarize yourself with the City Building Seal and quickly set up your formation," Yuan Xiang Palace Master urged.

"I am already doing it," Luo Feng, in the state of consuming Hundred Tribulations Heart Essence, allocated a small part of his mind, maintaining an excellent state.

...

After refining the City Building Seal, Luo Feng instantly merged with the entirety of Yulan City.

Yulan City, resembling a fortress, is a secret treasure! Within this treasure, numerous intricate secret patterns are embedded, carrying multiple powerful formation diagrams! However, these formation diagrams are too complex, making comprehension and manipulation extremely challenging.

The 'Star Array' is one of the few formation diagrams that elders in Yulan City can manipulate.

"Buzz." Yulan City naturally absorbed the infinite power of heaven and earth, its energy vast and boundless, also supplying countless cultivators within the city to absorb.

As the City Lord, Luo Feng could mobilize 'one-tenth' of the city's energy for his own use! However, the requirements for his realm and the burden on his heart force were substantial.

If he were the Palace Master, he could mobilize a maximum of 'one-thousandth' of the city's energy.

If an elder, they could mobilize a maximum of 'one-ten-thousandth' of the city's energy.

"No wonder each elder in Yulan City manages a defensive system, with hundreds of defensive systems perfectly coordinating," Luo Feng noted while setting up his formation.

The core formation layer of Yulan City has a thousand blank layers.

Each blank layer does not interfere with the others.

The City Lord, Palace Master, and elders each choose a 'blank layer' to set up their formation! No materials are needed, as long as the formation is inscribed, Yulan City can perfectly unleash its power.

"Because they set it up themselves, every elder can perfectly and effortlessly drive the formation," Luo Feng swiftly arranged his formation.

His Life and Death Dao, Life, and Destruction... had already accumulated immense depth. His Life and Death Dao was nearing the 'Late Stage Divine Emperor,' and with such profound accumulation, the formations he arranged were naturally vast and powerful.

"Throughout Yulan City, among the hundreds of formations set up by the Palace Master and elders, Yuan Xiang Palace Master's formation is the absolute strongest. Stronger than my current formations," Luo Feng noted, able to see each formation layer as the City Lord after refining the City Building Seal.

After all, Yuan Xiang Palace Master, who had mastered two and a

half Primordial Level Paths, arranged formations far surpassing Wei Yang Palace Master and Master Gai Tao.

However...

Yuan Xiang Palace Master could no longer unleash the full power of the formation. Such a grand formation required at least one or two percent of his heart force to drive it.

But now, Yuan Xiang Palace Master could only exert a small fraction of his formation's power! Compared to Wei Yang Palace Master and Master Gai Tao, he no longer had any advantage. Within the city, Wei Yang Palace Master even ranked first among the Divine Emperors.

"My pollution has reached an extreme. Those leader-level mind-type low-level Primordial Life forms likely can sense my terrible pollution from afar," Yuan Xiang Palace Master sighed.

At this moment, he felt as if he was constantly on the verge of drowning, barely hanging on.

His frailty led Wei Yang Palace Master to prepare to seize City Builder authority.

His weakness also made the newly emerged 'Super Limit Level Enchanting Heart Worm' target Yulan City, considering it the easiest city to breach.

"The hundreds of millions of cultivators in Yulan City."

"I chose Luo Feng as the City Lord for you. He is rising fast and is much more suitable than me," Yuan Xiang Palace Master, in a daze, saw the image of a golden-scaled female figure.

That high-level Primordial Life broke through in front of him, and her pollution was increasingly infiltrating every part of his mind.

"The gap with high-level Primordial Life is too vast," Yuan Xiang Palace Master silently sighed.

Divine Emperors and high-level Primordial Life belong to two

different life levels.

No matter how many Divine Emperors there are, be it a billion, ten billion, or a trillion... they will all be trampled to death by a single high-level Primordial Life.

Of course, there are some imprisoned high-level Primordial Life forms in the Dark Sacred Realm! They cannot exert their power or transmit any pollution, so cultivators can observe, study, and even dissect them at will.

But if not imprisoned and able to exert their full strength, each high-level Primordial Life is the nightmare of every Divine Emperor.

"Hmm?"

Yuan Xiang Palace Master suddenly changed his expression.

Having given the City Building Seal to Luo Feng, his own authority had decreased, but he had left a backup plan and still held 'Palace Master' authority! He intended to leave only after this war ended.

Relying on his Palace Master authority and the formation he controlled, Yuan Xiang Palace Master could still perceive everything inside and outside the city.

"Another low-level Primordial Life army is coming?" Yuan Xiang Palace Master could see it.

A mighty army approached the South Gate.

Rumble!!!

The new army arrived, and various combined attacks significantly increased the pressure on Yulan City!

...

"Yuan Yan, you've come!" The vast, low-level Primordial Life army surrounding Yulan City also had three terrifying auras. These three terrifying auras were all paying close attention to the newly arrived figure from afar.

"Knowing the action started early, I led my subordinates to hurry, and we finally arrived." A black serpentine figure, resembling a mountain range, this figure contained endless heat, flames rising on its surface, "But it won't be so quick for other Kings to arrive."

"This attack was launched in haste, but Shadow leads the Enchanting Heart Worms and Soul-devouring Snakes to attack the elders with all their might in the city. Yulan City's resistance is gradually weakening. If this continues, I believe we will soon breach the city."

"It's been a long time since we breached a city." The serpentine mountainous figure looked at Yulan City, its eyes burning with passion.

Outside the city, the four 'Kings' and numerous low-level Primordial Life forms exuded a deadly killing intent, all yearning for the moment of breaching the city to slaughter cultivators for evolution and freedom.

...

"One more army, one more King." Yuan Xiang Palace Master frowned, "The pressure is immense, and elders inside are being killed one by one. We've already lost 35 of them."

"With the decreasing number of elders, attacks from outside are getting stronger," Yuan Xiang Palace Master looked at Luo Feng beside him, "Even with Luo Feng joining, it's not enough to hold for long."

This new army required dozens of elders' formations to resist, completely negating the assistance Luo Feng provided.

"Though elders inside, along with some elder-level experts, form teams to hunt down lurkers, it only slows the deterioration of the situation."

"I estimate, we won't hold for another half a day."

Yuan Xiang Palace Master was anxious.

He had tried everything, but according to his judgment, Yulan City

would inevitably fall!

At that moment, while setting up formations, Luo Feng could also sense the worsening situation inside and outside the city and felt the urgency.

"Done."

Finally, Luo Feng completely inscribed a complex Life and Death Array into the core formation layer of Yulan City.

Chapter 347 - 21 Life and Death Array

"I have already set up the formation," Luo Feng looked at Yuan Xiang Palace Master, "we can act at any time."

Yuan Xiang Palace Master instructed, "First, you need to participate in defending the city! Like the other Elder avatars, intercept and kill those lurkers. The fewer low-level primordial life lurkers in the city, the longer we can hold out. Second, your identity must remain confidential! When you use the formation, I will say it was me who deployed it!"

"I understand," Luo Feng nodded.

Once exposed, he would become the target of all.

Under the relentless siege of the super-limit level Enchanting Heart Worm and other leader true bodies, Luo Feng, even with the power of Yulan City, couldn't be sure of his survival.

"Go. You are now the City Lord of Yulan City. If you have any arrangements, send me a message. I will give orders to all sides," Yuan Xiang Palace Master said.

Luo Feng nodded and quietly left the common cave mansion in the outer city district.

Yuan Xiang Palace Master remained hidden, silently watching everything.

"I've done all I can, from here on, it's up to fate," Yuan Xiang Palace Master murmured. Since the new low-level primordial life army joined outside the city, he could calculate that Yulan City wouldn't hold for more than half a day.

But regardless, he must hold out until the last moment.

...

As Luo Feng hurried to the core area of Yulan City, he used the refined City Building Seal to perfectly understand every corner of the city and know the positions of the low-level primordial life lurkers.

"My formation is much weaker than the Star Array. It will target just one elite lurker team," Luo Feng managed the formation while on the move.

Rumble~~~~

An elite lurker team inside Yulan City suddenly saw black and cyan clouds swirling above them. Luo Feng drew on the city's vast energy reserve to amplify the formation's power!

"Not good, a formation is forming right above us, targeting us."

"Be careful."

Despite several attacks, the elite lurker team still had seven leader avatars, five core member true bodies, and 39 core member avatars, working together with layers of illusory waves trying to resist the formation.

Boom! Boom! Boom!

Terrifying lights erupted from the clouds, instantly tearing through the sky and enveloping the team, shattering them in moments.

"How is this possible?"

"This formation is stronger than the Star Array?"

"Yulan City, defending against external attacks and still having such a powerful formation against us?" In an instant, only three core member true bodies barely survived.

But under the continuing terrifying lights, even these three were completely annihilated.

In just over ten breaths, an elite lurker team was wiped out.

The Star Array attacked several teams from a distance, but Luo Feng's Life and Death Array was directly overhead, targeting just this one team, making them feel it was more terrifying.

"Didn't the Star Array disperse? Elders need to fully resist the external attacks, how come there's another array?"

"This array has about five or six-tenths the power of the Star Array."

The Elders were shocked but could precisely evaluate the formation's power.

The Star Array required Master Gai Tao and 92 Elders. Luo Feng's accumulation was deeper, but even with the City Lord's power, his Life and Death Array had five or six-tenths the power of the Star Array.

"It's me," Yuan Xiang Palace Master transmitted, "I am suppressing my injuries and can exert some strength! I will try to kill the lurkers."

"So it's Yuan Xiang Palace Master."

"Ignoring his injuries, even a partial exertion surpasses Palace Master Wei Yang."

"No wonder he masters two and a half primordial-level paths!" The Elders were excited.

Yuan Xiang Palace Master's strength reassured them! Before his corruption, his power was far above Palace Master Wei Yang.

At his peak, Yuan Xiang Palace Master's strength was much scarier, enough to rival twenty Palace Master Wei Yangs!

But at his peak, he pursued escaping the braided cage and never thought of wasting battle merit building a city.

"I too wish to suppress my injuries," Yuan Xiang Palace Master's felt their excitement, but he was weary and powerless.

He understood his condition.

Maintaining clarity was already a struggle.

...

Yulan City core area.

Luo Feng stood in the sky, looking into the distance.

A lurker team saw Luo Feng, immediately turned and fled, avoiding a confrontation.

"These lurkers, mind-type low-level primordial lives, are too fast," Luo Feng sighed, "only with the city's formations can I attack anywhere and effectively hunt them."

Luo Feng continued controlling the formation, and as City Lord, mobilized vast energy to strengthen the formation and attack another elite lurker team.

Rumble~~~

In the distance, terrifying lights struck.

"Hahaha, another one down."

"As expected of Yuan Xiang Palace Master."

The city's Elders were very excited.

Swoosh——

Luo Feng stood in the sky above Yulan City core area as he saw a team of Elder strongmen flying by.

"Brother Luo Feng." The Elder-level strongmen greeted, "No wonder Brother Luo Feng dares to hunt lurkers alone."

Luo Feng looked at the team.

The Elder strongman team had six members, three Elder avatars, and three non-Elders with Elder-level strength, true bodies in the city,

actively defending.

Luo Feng's active hunting made them friendly.

"Too bad these lurkers are too fast," Luo Feng said.

"With Yuan Xiang Palace Master, even partially exerting his strength, he can see us through this tribulation," the Elders were excited.

Yuan Xiang Palace Master's suppression of his injuries and powerful formation gave them hope.

The team spoke a few words with Luo Feng and flew off.

Not as fast as the lurkers, Elder teams patrolled the core area for safety. Many Elders lived there.

"Six Elders with treasures can fight, avoiding the super-limit level Enchanting Heart Worm," Luo Feng thought.

The Enchanting Heart Worm's route was monitored, and avoided.

Only when the 'King' was too fast was there no escape.

"My formation's power is insufficient," Luo Feng frowned. The Star Array was strong enough to destroy leader true bodies.

His formation was half as powerful! Leader true bodies, as Divine Emperor Perfection level mind-type low-level primordial lives, were incredibly resilient, hard to annihilate.

...

"King, our elite squads are suffering too many losses."

"Of our 39 elite lurker teams, 21 are gone, most members dead, survivors hiding in cave mansions, not daring to emerge."

"There's a black and cyan formation, destroying an elite team every dozen breaths, impossible to hide from."

The leaders transmitted to the King.

First the Star Array, then Luo Feng's Life and Death Array, targeted elite squads.

"With Yuan Yan's army outside, Yulan City's defense should be under greater pressure. How can they have such a powerful formation against us?" The King was puzzled.

"King, the remaining elite squads are panicking!"

"If we don't find a solution, our elite squads will collapse."

The leaders sensed their core members' panic, nearing the breaking point.

The King realized this.

Before, the lurkers were fearless, seeing hope as Elders dwindled, and the Star Array dispersed, boosting their morale.

But now, the new black and cyan formation repeatedly attacking, showing no end. How could they not panic?

"All elite squads, disperse and hide," the King ordered.

He didn't care about casualties.

But seeing imminent collapse, there was no need to push.

"Understood."

"Disperse and hide!"

"Disperse and hide!"

The 18 remaining elite teams sighed and scattered, phasing into cave mansions. Mind bodies easily possessed weaker mansions, controlling cultivators, avatars or true bodies.

Under mansion arrays, the cultivators couldn't pinpoint the lurkers' locations.

"Since they're hiding, ignore them," Yuan Xiang Palace Master ordered, "we need to delay time, drag long enough, and we win.

Elder teams consolidate, each strong to handle the super-limit level Enchanting Heart Worm."

The city now had the King and five leader teams attacking.

"Hold them off."

The Elder teams reformed; the smallest had one or two, while Luo Feng, Elder Xingyi, and confident individuals acted alone. The largest had 36 Elder-level strongmen, typically 20.

"Does quantity matter?"

The King, in Wei Yang Palace Master guise, appeared.

Moments before he was afar, now in a 19-Elder team.

Their lack of avatars meant they purchased life-preserving treasures. Elders, having avatars, had few or none.

Whoa!

In an instant, two Elder avatars were dead. The rest resisted with formations.

"Next."

The King vanished.

Comings and goings at will, that's a super-limit existence!

The King, seeing Luo Feng and Elder Xingyi, ignored them. Elder Xingyi was still an Elder, the King didn't want to bother. Luo Feng, not even an Elder, wasn't worth his time.

Cultivators with strong will secret techniques and soul protection treasures weren't worth his time.

He'd spend resources on Wei Yang and Gai Tao Palace Masters but attack other Elders quickly, bypassing those with ordinary will techniques and no soul-protecting treasures.

"If their number falls below a certain point, the city will fall," the

King saw victory approaching.

Chapter 348 22 The Fall of Yulan City

After refining the City Building Seal, Luo Feng returned to the quiet room in the cave mansion and devoted himself entirely to cultivation.

Though he still directed a fraction of his mind to control the Life and Death Array and dispatched an avatar to help intercept the stealth teams in the core area, the current state of consuming the Hundred Tribulations Heart Essence increased his thinking speed by three thousand times. Luo Feng focused more than ninety-nine percent of his thoughts on cultivation.

"Life and Destruction Fusion..."

Luo Feng was rapidly perfecting it in his mind.

However, as a Fusion Dao, reaching its current state made it more vast than the ordinary Half Primordial Level Dao! The difficulty of raising and integrating them to produce a qualitative change was also incredibly high.

Fortunately, Luo Feng had already reached the cusp of success, daring to attempt the breakthrough within a day with the help of the treasures!

"To perfect it completely within a day is still too difficult! If I were given a few more days, I'd be confident," Luo Feng knew that time was tight, so he could only strive to perfect it as quickly as possible.

Suddenly—

"Luo Feng, since you refined the City Building Seal, Yulan City has lost 15 Elders," even Yuan Xiang Palace Master felt powerless, "the Yulan City defense system is almost untenable, and your formation is

needed to help defend the city."

"Is it that bad?" Luo Feng's heart trembled.

Even though the team of Elders worked together, and Luo Feng and his team were intercepting the stealth teams, the Super Limit Level Enchanting Heart Worms and five leader true body teams continued to hunt down Elders one after another.

Their mental attacks naturally annihilated the Elders' avatars in the Nine Rivers Sacred Realm.

"We must block the external army! If we fail, the external army will invade, and it will be the end." Yuan Xiang Palace Master transmitted, "Your formation must also help repel the external attacks."

"Alright." Luo Feng understood.

The army must be stopped outside. If they manage to get inside, they could quickly kill Elders one by one, causing the Yulan City defense system to collapse rapidly. The entire city would then be at their mercy.

"Buzz—"

With a thought, Luo Feng controlled the Life and Death Array, also beginning to enhance the entire defense of Yulan City.

Luo Feng's formation equaled the combined formation power of forty to fifty Elders, instantly easing the defense pressure on Yulan City!

"The Hall Master's formation is also forced to resist the external army."

"The stealth teams inside the city can only be intercepted by the Elder teams."

Even the Elders felt somewhat powerless.

"Hahaha…" The leader-level stealth teams were overjoyed to see the Life and Death Array fully resisting external forces.

"All stealth teams, regroup and kill the Elders!" the King's order was issued again.

The eighteen elite stealth teams, initially scattered and hidden, quickly regrouped. With no formation in the sky targeting them, they had an absolute advantage in speed against the Elder teams, giving them full confidence.

They all felt that victory was getting closer.

"Kill."

The most ferocious in Yulan City was the true body of the King.

As a Super Limit Level existence, the King's power was terrifying! Most of the defense system in Yulan City had to resist the external army, making it unable to deal with the King effectively. The city could only try to delay!

If they couldn't kill the King, he would continue attacking, his techniques being too advanced. Even if the Elders defended cautiously in unison, they could still fall victim.

The King's efficiency in killing Elders was comparable to the combined effort of five leader teams.

...

Each leader team consisted of six true bodies collaborating! Without the presence of the three Hall Masters or powerful formations attacking them, they posed no threat to the leader teams.

"Stop!"

An avatar of Luo Feng, patrolling, instantly transformed into a Blood Sea, intercepting a leader team.

"It's Luo Feng."

"We ignore him, but he comes to us."

"Let's combine our efforts and kill him."

The leaders were annoyed; Luo Feng wasn't even an Elder, so they didn't want to waste time on him. However, Luo Feng transformed into an Endless Blood Sea, covering them with his vast range.

"Destroy—"

The six leaders each used their mental techniques.

This particular Luo Feng avatar didn't possess the Undying Heart or the Palm World. However, as the City Lord, Luo Feng could still mobilize Yulan City's power to protect himself and wield the Lie Yuan Technique for defense. With his cultivation level rising, his understanding of the Lie Yuan Technique deepened.

"Boom—"

The six mental attacks, weakened by Yulan City's power, were forcefully resisted by Luo Feng.

Luo Feng felt various illusions envelop him, disrupting his perception, but under the protection of the Lie Yuan Technique, he remained "awake" and still clearly remembered who he was!

"Even six Divine Emperor Perfection Level mental-type low-level Primordial Lives cannot defeat me," Luo Feng was still vigilant.

The Divine Emperor Perfection Level was already this intimidating.

What about the Super Limit Level? The mental impact would be a qualitative change.

"Get lost—"

"Break!"

The six leader true bodies could be both real and illusory. When their mental techniques were blocked, they materialized and unleashed their horrifying physical power. Combined, they were far more terrifying than Wei Yang Palace Master and Gai Tao Palace Master, instantly shattering the Endless Blood Sea.

Rumbling, the six leader teams broke free from the Endless Blood Sea

and left quickly, not wanting to waste time.

"This Luo Feng must have a powerful Secret Treasure; his mental protection is quite strong. His strength probably ranks in the top ten in Yulan City," the leaders concluded.

They didn't know that this was just one of Luo Feng's ordinary avatars.

Chapter 349 - 22 The Fall of Yulan City_2

"These leader true bodies all act together in groups of six, definitely hard to deal with." Luo Feng watched them transform into illusions and quickly leave, "Even if I borrow the Undying Heart and Palm World to increase my strength several times, it can only be an equal fight against them."

"Even I can't do anything about the leader-level teams, let alone the other elders."

Luo Feng could already foresee the development ahead.

...

Many elders had also predicted it, but what could they do? They could only watch everything happen with open eyes.

The number of elders continued to decrease one by one, the resistance force grew weaker and weaker, even eliminating an elite stealth team became extremely difficult for the elders.

"The number of elders is getting fewer."

In a massive team of elders, led by the Master of Deceit Workshop, with a total of seventeen elders, including Changqing Building Owner.

They looked toward the sky! They could see that the defense formations of Yulan City had decreased by fifty to sixty; the remaining numerous formations struggled more and more to resist the attacks from the outside army.

"Yulan City might be breached at any moment now." The Master of

Deceit Workshop looked up, "So much killing has happened, yet it seems long but actually not even half a day has passed. The aid from the Dark Sacred Realm won't make it in time."

"The only variable now is the Hall Master."

"The Hall Master, after all, is an Enlightened one who has mastered two and a half paths of the Half Primordial Level! Even if contaminated, he might have some desperate measures." The Master of Deceit Workshop thought, "If the Hall Master creates a miracle, Yulan City might hold on until aid arrives."

Besides Yuan Xiang Palace Master, there was no hope visible in Yulan City.

...

"Yulan City."

Yuan Xiang Palace Master, in an ordinary cave mansion in the outer city district, he looked up and sighed softly, "All the elders look to me for a solution, but I know very well, I have no way to save us. Even that Life and Death Array is controlled by Luo Feng."

"I've already done my best."

"Cultivators of Yulan City, I am sorry." Yuan Xiang Palace Master sighed.

Boom—

The low-level Primordial Life army outside the city suddenly erupted from four directions! They had already sensed that Yulan City's defense system was crumbling; at this moment, under a unified command, they all unleashed their maximum power at any cost.

Even the four Kings went all out.

Immediately, an endless barrage of attacks overwhelmed Yulan City's defense formation, surpassing its tolerance limit, and instantly blasted open a huge breach. Countless low-level Primordial Life surged in almost instantly through the breach.

"Hahaha, the city is breached!"

"The city is breached!"

The low-level Primordial Lives crazily flooded in.

As they stormed in, Yulan City's elders urgently controlled the formations, intercepting and killing with all their might! These low-level Primordial Life armies contained many early and middle-stage Divine Emperors. Under the overwhelming onslaught of the formations, these weaker low-level Primordial Lives died in large numbers.

"First, eliminate the elders of Yulan City!"

"Destroy those elders!"

A colossal super-limit level existence that resembled a winding mountain range crashed into the city. It gave an order, leading the way, bringing with it over a thousand Divine Emperor Perfection Level low-level Primordial Lives, all charging toward the core area of Yulan City, aiming to destroy the last resistance force of Yulan City.

"Seal off Yulan City! Don't let a single cultivator escape!"

Troops outside were also ordered to blockade.

"It's over!"

"Yulan City, it's over!"

One by one, the elders watched this scene.

The elders had avatars and could face all this calmly, yet they felt the loss of a city they had strived to defend, losing both their accumulation within the city and the sense of defeat, for a great massacre was imminent.

"No—"

"No, impossible—"

The billions of cultivators inside the city, they were weak and couldn't participate in the defense. But they had always watched the progression of the war anxiously. When Yulan City's defense system was breached, despair washed over them.

Ninety-nine percent of them had their true bodies here!

Death meant complete and utter death.

"How could Yulan City be breached?"

"What about the three Hall Masters? Why didn't they block it?" Many cultivators couldn't accept the reality.

Some cultivators looked at the terrifying super-limit level beings in the sky, at the leader-level existences, and laughed: "Hahaha, I've cultivated till now, transcended my home world, gathered with countless world powerhouses here. Yet I face such a calamity, billions of cultivators walking towards extinction together... this is the end of my path."

"My cultivation path ends here." Many cultivators faced death with calm.

Since they embarked on this path, they were prepared for death.

This day had finally come.

...

"The city is breached."

In Luo Feng's cave mansion, Emperor Qing, Emperor Ming, and Di Fu all looked up.

Emperor Qing and Di Fu both had clone techniques, but Emperor Ming did not.

"Though I have life-saving items, under the blockade of the low-level Primordial Life army, I'm afraid I won't escape." Emperor Ming looked up at the sky, "I knew that the outside world of the Source World was dangerous. The day I left the Land of Origin, I was

prepared for death; I just didn't expect it to come so soon!"

Emperor Qing and Di Fu looked at Emperor Ming.

They both were powerless.

"Why is Brother Luo Feng still in seclusion?" Emperor Qing looked towards Luo Feng's quiet room; relying on the faint causality sensing, he knew that Luo Feng had an avatar still in seclusion and hadn't come out.

The city is breached, yet he's still in seclusion?

...

In the quiet room.

As the City Lord, Luo Feng was undoubtedly aware of everything happening in Yulan City at the moment. He saw the low-level Primordial Life army has already surged into the city, saw that 'slaughter' has begun!

"The city is breached, but I still haven't broken through!" Luo Feng's eyes reddened.

At this moment, his heart was unbelievably anxious.

"Quick, quick, quick!"

"Not enough time!"

Under the influence of consuming the 'Hundred Tribulations Heart Essence,' it was as if he was experiencing a life and death trial, his soul filled with pain. But at this moment, under his strong will, under intense emotions, longing for faster enlightenment, his will imbued, boom—

His soul vibrated fiercely, and the pain suddenly disappeared.

Luo Feng felt an extreme sense of comfort, his soul's thinking and enlightenment speed vastly exceeded the original 'three thousand times cognitive speed,' his comprehension reached unprecedented

levels, and spirit light continuously emerged.

Under this 'mysterious' state, Luo Feng's efficiency in perfecting the Life and Death Dao skyrocketed; he seemed to instinctively know the right approach without needing trial and error, rapidly perfecting it.

In merely a dozen breaths.

"Boom."

A completely transformed 'Life and Death Dao' surfaced in Luo Feng's mind.

"Success! Late-stage Divine Emperor level Life and Death Dao!" At this moment, Luo Feng's heart filled with excitement, but immediately his soul withdrew from that mysterious state, and a pain stronger than before enveloped his soul.

"There's still time." Luo Feng didn't care about the pain at all, his eyes filled with madness.

Boom!

Luo Feng instantly rushed out from the quiet room in his cave mansion!

Chapter 350 - 23 Dividing into Four Factions

Emperor Qing, Di Fu, and Emperor Ming suddenly felt a terrifying aura erupt from inside the cave mansion, and a figure soared into the sky. They immediately recognized that it was Luo Feng!

Luo Feng stood above the cave mansion.

Whoosh! Instantly split, splitting into a total of twenty-three avatars!

Twenty-three Luo Fengs observed the surroundings.

"Emperor Qing, stay inside the cave mansion, don't go out."

Luo Feng instructed, and the twenty-three avatars instantly flew in all directions.

"This... this..."

"Why did Brother Luo Feng create so many avatars?"

"The more avatars, the more each avatar needs to split thoughts for control, and the energy reserves are weak." Emperor Qing, Di Fu, and Emperor Ming were all somewhat confused. Even if Luo Feng possessed strength comparable to the three Hall Masters, splitting many avatars would still reduce his overall power significantly. In the face of the overwhelming army attacking the city, it was completely meaningless.

Emperor Ming chuckled, "Perhaps Brother Luo Feng thinks it's better to fight to the death than just wait for it. I also want to fight to the death, but alas... I can't even fight the weakest low-level Primordial Life. I don't even have the qualification to risk my life."

Emperor Ming was already resigned to death.

"This isn't Brother Luo Feng's character." Di Fu frowned as he watched the twenty-three avatars flying away. "I've seen Brother Luo Feng grow until now, and whenever he takes action, he always has some confidence."

Emperor Qing seemed lost in thought.

At this moment, the garrison avatar of Luo Feng at the Dan Tower, and the avatars patrolling outside, all split, a total of eleven more avatars.

"Huh."

Thirty-four avatars, spread out flying, heading to different positions in the core area of Yulan City.

"My thirty-four avatars will guard the entire core area." Luo Feng had long since planned.

These thirty-four avatars, except for the strongest avatar, which possessed five hundred times the Perfect Divine Body Energy Reserve, carrying the 'Undying Heart' and the 'Palm World.' The other thirty-three avatars each had only a hundred times the energy reserve.

This was all the energy reserves Luo Feng currently had! At this moment, he was fully exerting himself!

...

The core area of Yulan City was the most prosperous, with countless Elder Cave Mansions here. Even at this moment, the elders continued to maintain the various formations of Yulan City, trying to resist the army of low-level Primordial Life.

"It's over."

"The army of low-level Primordial Life is charging towards the core area."

Seeing four Super Limit Level existences leading over two thousand

Divine Emperor Perfection Level and tens of thousands of Late-stage Divine Emperor low-level Primordial Life charging towards the core area, all the elders felt a shiver and despair.

They relied on the defenses of Yulan City to resist the army of low-level Primordial Life.

Without the city's advantage, the disparity between the sides was too great.

This was a hasty assault! Otherwise, the army size would have doubled! With simultaneous attacks from inside and outside, Yulan City would be quickly breached with no chance of resistance.

"The low-level Primordial Life around Yulan City, according to calculations, has only around two or three hundred Divine Emperor Perfection Level, and several thousand Late-stage Divine Emperor. This time... so many came!"

The elders watched intently.

Within the city, originally three Hall Masters, and over 700 Late-stage Divine Emperor Enlightened Ones existed. Without the defenses of Yulan City standing against them, none could resist 'two to three hundred Divine Emperor Perfection and several thousand Late-stage Divine Emperor low-level Primordial Life.'

Now, there were two to three thousand Divine Emperor Perfection! Tens of thousands of Late-stage Divine Emperor! Including Lurkers, there were five Super Limit Level existences!

How to block them?

"Hahaha... Victory!"

"We won!"

In the core area, the five leader teams were wildly ecstatic. This hasty action had made them uneasy. Ultimately, although many core clan members and two leaders had died, they survived till the end!

The city was breached, the army entered the city! They were about to

enjoy the richest feast.

"Wipe out these elders, and we'll have endless fun with millions of cultivators!" These leaders went mad.

Suddenly——

Among Luo Feng's many avatars scattered and flying to guard the core area, one avatar approached one leader team.

"Boom——"

This avatar instantly transformed into a vast blood sea, the blood sea swiftly swallowed the leader team.

"Another Luo Feng?"

"The city has been breached, he dares to hinder us. Let's join forces and kill him first!"

The six leaders of this team were somewhat angry. Their bodies turned real, the powerful Divine Emperor Perfection bodies burst with might, trying to tear apart this blood sea. But they felt the blood sea's immense weight! They struggled to roll over.

"Suppress!"

The vast blood sea, Luo Feng formed a formation with a single thought.

His formation operated with the 'Late-stage Divine Emperor Life and Death Dao' as the core, forcefully suppressing six leaders. Under the suppression of the blood sea formation, they could barely roll, their movement speed like a turtle's crawl.

"Obliterate." Luo Feng simultaneously suppressed with the formation and concentrated the formation's power to strangle one leader's true body.

"Sizzle."

Under the strangling power of the formation, the body of the Divine

Emperor Perfection Enchanting Heart Worm quickly eroded, its vitality dissipated. Soon, its powerful body was torn apart, the formation power infiltrating its core.

"No——" This Divine Emperor Perfection Enchanting Heart Worm couldn't believe it; its powerful life force was completely suppressed, unable to recover. Each erosion took away a part, and under the rapid erosion from Luo Feng's blood sea formation, death quickly approached the Enchanting Heart Worm!

"Help me, help me," it immediately cried out for help from its companions.

"King, save me, save me," it also fearfully begged the king for help.

"Hmm?"

In another part of the core area, the king, resembling Wei Yang Palace Master, looked over distantly. It saw a blood sea hovering, suppressing the six leaders, and one begged in terror.

"How is this possible? The city has been breached; how could there be power capable of threatening a leader-level team?" The king couldn't believe it.

"Save me, save me, no——"

Accompanied by the unwilling, shrill cries, this cry echoed in the king's heart, and other leaders' hearts.

A Divine Emperor Perfection Enchanting Heart Worm died just like that.

Whoosh!

Above the blood sea, Luo Feng's figure emerged.

Luo Feng slightly frowned, looking at the lifeless corpse in the blood sea; the life core had already cracked.

"My Life and Death Dao has reached Late-stage Divine Emperor, yet exterminating a leader team is so troublesome." Luo Feng realized

these leaders' true bodies indeed had very strong life force after making a move.

"This avatar lacks powerful secret treasures, energy reserves are inadequate, and secret techniques aren't strong." Luo Feng understood.

Only a hundred times energy reserve, at his current level, every move contained 'Late-stage Divine Emperor Life and Death Dao.' The weapon secret treasures sold outside weren't as marvelous as his casual moves, no longer meaningful to him.

Only Outliers-created treasures like Undying Heart and Palm World were valuable to him.

But this kind of treasure had to suit him and was naturally rare.

During Luo Feng's contemplation, the strangled leader team under his blood sea formation had lost another leader. As their numbers decreased, the remaining leaders' resistance weakened, dying faster.

"No——"

"King, king!"

These leaders were too despairing, under the suppression of the blood sea formation, they couldn't move at all.

The more died, the faster they died. Finally, all six leaders perished.

"In just over ten breaths, I exterminated a team." Luo Feng looked into the distance.

"Beware of Luo Feng Divine Emperor."

"Luo Feng killed a leader team."

The remaining four leader teams panicked, but Luo Feng's avatars were scattered throughout the core area. An avatar swiftly approached another leader team. That team hastily fled.

"Escape, quickly escape!"

"We are faster, we'll shake him off."

This leader team turned illusory, fully fleeing.

Suddenly——

Whoosh!

While flying, Luo Feng seemed to tear through the heavens and earth, creating a crack in the sky! This scene stunned the fleeing leaders.

Clad in black clothes with black hair, Luo Feng walked in the crack of the sky. With only three steps, a vast blood sea under his feet enveloped the leader team.

"How is this possible? His speed is faster than us?"

"Did he just short-distance teleport?"

"How could he teleport in the strongly suppressed Nine Rivers Holy Realm?"

This leader team felt despair, submerged in the blood sea, unable to accept it.

Luo Feng revealed a slight smile.

"Finally, creating a Flying Escape Secret Technique based on 'Late-stage Divine Emperor Life and Death Dao.'" Luo Feng thought. He had just broken through and immediately fought, too hastily. He hadn't managed to create many secret techniques using the 'Life and Death Dao.'

With the Late-stage Divine Emperor Life and Death Dao as the basis, all created techniques would be extraordinary. But they all needed time to develop.

Luo Feng currently divided into 34 avatars, guarding the core area.

Actually, after consuming 'Hundred Tribulations Heart Essence,' his thinking speed reached three thousand times. Avatars fighting posed little mental burden. His heart force mainly focused on two tasks.

First, utilizing the 'City Building Seal' to re-establish formations within Yulan City's core formation layer! His original formations were too weak; now, they needed to be re-established using 'Life and Death Dao.' Only by utilizing Yulan City, could his formations still cover the entire city under the Nine Rivers Holy Realm's suppression with immense power, threatening the entire low-level Primordial Life army.

Second, Luo Feng was perfecting his secret techniques.

Developing simple techniques like flying, dodging, and enemy slaying were easy for Luo Feng.

The hardest was perfecting the 'Undying Blood Sea Body,' created with Star Tower Blood Scale as the core and 'Undying Heart' as a reference! Luo Feng aimed to elevate it to a higher level, yet short-term hopes were dim. The 'Biomimetic Destruction Eye' also required a long time.

Therefore, Luo Feng focused on creating simpler techniques.

Nevertheless...

What he considered simple techniques were deemed almost impossible by other cultivators!

...

In a common cave mansion in the outer city district.

Yuan Xiang Palace Master could still observe all city movements. He was stunned by everything, especially seeing Luo Feng tear through heavens and earth, achieving short-distance teleportation.

"In the Nine Rivers Holy Realm, someone can tear heavens and earth to fly, achieving short-distance Void travel?" Yuan Xiang Palace Master's eyes brightened, "One avatar can suppress a leader team; has he mastered two Half Primordial Level Paths?"

In the Nine Rivers Holy Realm, space travel was almost impossible. Yet, there were some escape treasures that could short-distance teleport.

Where did those escape items come from?

Precisely from experts like Luo Feng and Peak-time Yuan Xiang Palace Master, who spent efforts to refine them, generally one-time items.

"There's hope, there's hope." Yuan Xiang Palace Master was ecstatic, "If he mastered two Half Primordial Level Paths, he might rescue countless Yulan City cultivators although with heavy casualties."

Yuan Xiang Palace Master had no idea Luo Feng hadn't mastered two Half Primordial Level Paths but had a complete Late-stage Divine Emperor 'Life and Death Dao.'

Two paths needed enough intricate coordination to reach a higher level threshold!

A complete path, just breaking through, already exceeded a higher tier.

Luo Feng, upon breakthrough, had become stronger than Peak-time Yuan Xiang Palace Master! No matter how clever the coordination, it couldn't compare to a complete integral!

Chapter 351 24 Lord Luo!

Thirty-four of Luo Feng's avatars were stationed at each core area of Yulan City.

After obliterating one leader squad and suppressing a second, the remaining three leader squads were filled with terror and started fleeing frantically without hesitation.

"How is Luo Feng so powerful?"

"Why can't an entire leader squad even put up a fight against him?"

These leader squads couldn't accept it. The city had been broken, and they were about to enjoy a feast, only to be met with such disaster suddenly.

"Help!"

"King, help!"

The suppressed second leader squad cried out anxiously for help as one by one they perished. This further heightened the panic among the fleeing leaders.

Throughout the Nine Rivers Sacred Realm, about half of the leader-level powerhouses of the Enchanting Heart Worm tribe and the Soul-devouring Snake tribe had come to Yulan City, but now they were facing their doom!

"Huff." "Huff." "Huff."

One black-clad Luo Feng after another perfected their flying escape technique, the initial massive rift-tearing commotion getting quieter. A blurred rift in the world appeared, and Luo Feng stepped out, crossing great distances.

When Luo Feng transformed into a blood sea, trapping the third leader squad, the remaining fleeing leaders became even more despairing.

"Scatter!"

"Disperse and hide, possess someone!"

The remaining leaders quickly scattered, attempting to possess cultivators.

"Scatter?"

Luo Feng's numerous avatars, initially cloned with 'hundred times energy reserve,' split again into avatars with 'fifty times energy reserve,' drastically increasing their numbers.

With the leaders dispersed, their individual resistance was much weaker than an entire squad.

A 'biomimetic destruction eye' appeared between Luo Feng's brows, locking onto the true body of each leader!

"Huff."

As each Luo Feng avatar walked through the rift, transforming into blood light and sweeping past a leader, they'd kill them in an instant.

Individually, the leaders couldn't withstand even a single move from him.

"Luo Feng!"

The 'King' in Master Wei Yang's guise was indeed furious. It charged towards the nearest Luo Feng avatar. Luo Feng, standing in the high sky, watched the King without flinching, his expression cold.

"I didn't think there'd be such a strong person in Yulan City! It's a good thing Palace Master Yuan Xiang hadn't fully employed you. If he had, breaking Yulan City would've been impossible," the King's voice echoed in Luo Feng's mind.

Luo Feng looked at the 'King' in Master Wei Yang's guise.

Employed?

He was already the city lord of Yulan City, having just made a breakthrough. Luckily, the breakthrough happened in time; if he'd been slower, Yulan City might have been completely destroyed.

"Boom." As the King approached, its innate secret technique 'Enchanting' was already enacted.

In an instant, it completely shrouded Luo Feng's mental consciousness.

This ordinary avatar of Luo Feng did not possess the 'Undying Heart' or 'Palm World'; he felt a massive influx of information flooding his mind, thoroughly disturbing his awareness.

"Who am I?"

"Am I an Enchanting Heart Worm? No... I am, of course, Luo Feng!"

Luo Feng's eyes cleared.

The 'Dao' of the Ultimate Realm of God King had begun to counteract will attacks. The 'Dao' of the Divine Emperor realm, as it became stronger, increasingly obstructed will attacks. This was why weapon secret treasures crafted by Divine Emperors could hinder will attacks.

Luo Feng's 'Life and Death Dao' at the late Divine Emperor stage had reached an incredibly high level. Under its immense obstruction, even the mental will attack of a transcendent-level Enchanting Heart Worm was weakened by seventy to eighty percent in a moment.

Furthermore, with the Lie Yuan Technique guarding him and the power of Yulan City protecting him!

Every ounce of willpower was suppressed; mental confusion abilities were greatly reduced. Luo Feng only received a large amount of information transmitted by 'Innate Confusion'!

He was fully awake, easily filtering through the information, as

though reading a book.

"Suppress." As Luo Feng maintained clarity, this avatar transformed into a blood sea, creating a formation to trap the transcendent-level Enchanting Heart Worm.

"My mental attack is completely ineffective against him? His realm indeed rivals mine!" The King immediately understood.

Divine Emperor Perfection-level low-level primordial beings and half-primordial-level Dao Enlighteners were at the same level.

One side had more resilient life forms, while the other fully understood the essence of the 'Dao.' Without weapon secret treasures, their strengths were similar. However, with weapon secret treasures crafted by 'cage-transcendent beings,' Dao Enlighteners naturally had higher combat power. Both Master Wei Yang and Master Gai Tao could defeat Divine Emperor Perfection-level low-level primordial beings one on one.

Transcendent-level low-level primordial beings at the same level as those mastering two half-primordial-level Daos.

"Luo Feng's realm is no less than ours!"

The King immediately sent a mental message to the other four transcendent-level comrades, "He should have mastered two half-primordial-level Daos!"

"Hmm?"

The four transcendent-level beings, already in Yulan City and quickly heading toward the core area, felt a shock.

"We have five transcendent-level beings and over two thousand Divine Emperor Perfection-level warriors! Attacking together, we could completely annihilate him," the King sent.

One transcendent-level being was comparable to more than twenty Divine Emperor Perfection-level experts.

When over two thousand Divine Emperor Perfection-level experts

joined forces, the resulting might could destroy the world!

"Luckily, we breached the city; otherwise, we couldn't surround him," the King communicated.

"Shadow, I will first join forces with you to entangle him!" A blue-white figure, the fastest flyer, appeared blurry and was already the closest among the four transcendent-level beings to the core area.

...

After the King's mental attack failed, its massive Enchanting Heart Worm body swung and instantly tore apart Luo Feng's blood sea formation, quickly escaping.

Luo Feng's avatar coldly watched.

"Without secret treasures and with only an ordinary avatar, I am still somewhat weaker than a transcendent-level being," Luo Feng realized.

That was also why his most powerful secret techniques 'Undying Blood Sea Body' and 'Biomimetic Destruction Eye' were not yet perfected; ordinary secret techniques lacked deterrent power against transcendent-level beings.

Huff! Huff! Huff!

While Luo Feng clashed with the King, his other avatars had already wiped out the other leaders. After annihilating them, Luo Feng reverted to thirty-four avatars.

Thirty-four avatars continued to guard the core area.

...

"How, how is this possible?"

The elders of Yulan City, who controlled the formations carved into the city, sensing the entire city through them, naturally saw clearly what had just taken place in the core area!

Luo Feng, single-handedly, split into thirty-four avatars and completely exterminated all the leader-level lurkers! Even that 'King' couldn't gain any advantage in its confrontation with one of Luo Feng's avatars and had to retreat empty-handed.

"Single-handedly exterminated thirty Divine Emperor Perfection-level low-level primordial beings?"

"Even a transcendent-level Enchanting Heart Worm couldn't do anything against one avatar?"

"Luo Feng Divine Emperor, he…"

Anyone with eyes could see that Luo Feng's strength had far surpassed the Palace Master level, reaching an even higher tier.

"Luo Feng has mastered two half-primordial-level Daos?"

The elders speculated.

Even in the Dark Sacred Realm, those who mastered two half-primordial-level Daos were at the pinnacle! As for stronger invincible beings? In the Dark Sacred Realm, they were mere legends, rarely seen.

"Luo Feng actually possesses such power?" The Insect Nest Master trembled, "Any Palace Master-level being would probably die in just one or two moves against him now."

"He and I have enmity. Even if Yulan City is defended, there will be no place for me there anymore," the Insect Nest Master realized.

In the world of cultivators, strength was paramount.

Even if Luo Feng wasn't the city lord, his strength to overturn Palace Master-level beings would make him the uncrowned king of Yulan City! If he wanted to expel the Insect Nest, it would have no place to live in Yulan City.

"I'll help defend the city for now and leave once it's safe. His hostility should lessen," the Insect Nest Master decided.

"Luo Feng's strength?" The Master of Shadow Tower, Master of Deceit Workshop, Elder Tian He, Building Master Changqing, and Elder Xingyi were all in shock, each lost in thought.

This level of power made someone the uncrowned king in any city within the Nine Rivers Sacred Realm, and in the Dark Sacred Realm, it placed them at the peak.

"We are saved."

"Yulan City is saved." Many elders were excited, seeing hope.

"Palace Master, Palace Master! We must have Luo Feng Divine Emperor imprint formations in the core area of Yulan City. With his power and the city's formations, we might completely drive off the low-level primordial army."

"Yes, Palace Master, Luo Feng Divine Emperor must imprint the formations as soon as possible," the Master of Shadow Tower also transmitted instantly, "The sooner the better; only Luo Feng Divine Emperor can save Yulan City."

"Palace Master…" The Insect Nest Master and others transmitted urgently.

"Everyone, rest assured, I have already given the City Building Seal to Luo Feng Divine Emperor. From now on, Luo Feng Divine Emperor is the lord of Yulan City!" Palace Master Yuan Xiang transmitted, "Luo Feng, please respond to everyone."

"Everyone." As the city lord, Luo Feng instantly transmitted to all elders, "I have refined the City Building Seal and am now the city lord of Yulan City."

"City Lord."

"Lord Luo."

"With Lord Luo here, Yulan City is saved."

"The billions of cultivators are saved." The elders were all elated.

Luo Feng transmitted, "Everyone, the low-level primordial army won't wait. They'll attack me at all costs! So, I ask all of you to use Yulan City's formations to deal with them."

"Understood."

"We understand."

"City Lord, leave it to us." The elders had seen the hope of victory.

...

The vast low-level primordial army surged towards the core area from all sides. Luo Feng's Biomimetic Destruction Eye observed closely. The most terrifying force was the five transcendent-level beings and over 2600 Divine Emperor Perfection-level entities!

"Kill Luo Feng."

"Destroy each of his avatars."

"Exhaust his energy, and he won't be able to save Yulan City."

At this moment, the five transcendent-level beings, over 2600 Divine Emperor Perfection-level entities, and tens of thousands of late-stage Divine Emperor-level low-level primordial beings were all in a frenzy. Breaking into a city was their best chance to gain freedom in this lifetime!

They had been confined in the Nine Rivers Sacred Realm and yearned for the moment of their freedom.

Luo Feng was the hope of survival for Yulan City's billions of cultivators, but at the same time—

Luo Feng was the greatest obstacle to the low-level primordial army's freedom!

Both sides would stop at nothing!

Chapter 352 - 25 Luo Feng and the Super Limit Level

352 Episode 8 Chapter 25 Luo Feng and the Super Limit Level

"Block them, delay time!"

The elders of Yulan City, one by one, activated the city's formations. The might of many formations attacked the army of low-level Primordial Life, although the army could easily withstand the attacks, their speed was naturally greatly affected.

"Hurry."

"It must be quick!"

"If we delay, Luo Feng will be able to inscribe his formation on Yulan City. The formation he sets up is more terrifying than the combined formations of over three hundred elders! It would be a big problem then!" The five 'Kings' were well aware of the situation.

With such a powerful individual like Luo Feng appearing in Yulan City, the situation became dangerous, but these super-limit level beings were still unwilling to give up.

Without the super-limit level lurkers breaking through from within, the chances of breaking the city were almost nil!

The time to fight desperately was now!

"Shadow, act!" Among the army of low-level Primordial Life, a blue-white figure moved at extreme speed, reaching the core area first.

"Okay." The super-limit level Enchanting Heart Worm also rushed over, intending to unite.

"Are they going to join forces?"

Luo Feng, guarding with thirty-four avatars, observed with the Biomimetic Destruction Eye and sensed every movement in the city with the City Building Seal. Naturally, he knew that these two 'Kings' were going to join forces and come together to attack.

"The super-limit level Shu Guang Demon Lord." Luo Feng observed the blue-white figure. It had eight thick, sharp claws, its whole body covered in blue-white scales, with an upper body resembling a human, also possessing two powerful arms.

Its face was stern, eyes glowing deep blue.

Whoosh.

As it hurried, it flickered like a stream of light. Despite not traversing space, its speed was extremely fast.

"How can I let you unite?"

Luo Feng moved.

The strongest avatar with the Undying Heart and Palm World moved. Luo Feng took a step, walking between the seams of heaven and earth, and within two steps, he was close to that huge blue-white figure.

"Boom～～～"

In an instant, Luo Feng turned into an endless blood sea, intending to drown the huge blue-white figure.

This endless blood sea contained a hundredfold energy reserve and used the Secret Treasure 'Undying Heart' as its core! After comprehending the 'Late Stage Divine Emperor Life and Death Dao,' Luo Feng naturally reached a higher level of understanding of the Undying Heart, driving the Secret Treasure with mysteries even above the Late Stage Divine Emperor Life and Death Dao.

This is the advantage of Secret Treasures, allowing a cultivator to perform beyond their level.

Every drop of water in this endless blood sea was indestructible, the mighty blood waves exerted terrifying binding power.

"Rip!"

Shu Guang Demon Lord, with its massive body and eight thick claws, trampled the Void at great speed, bringing terrifying might to the blood sea. Each claw's sharp tip slashed through the binding of the blood waves.

"Bang! Bang! Bang!" The claws trampled the blood sea, making heaven and earth tremble. Shu Guang Demon Lord forcibly broke through the blood sea's bind, its eyes full of coldness: "Die!"

It didn't hold back at all, using its desperate moves from the start. Its whole body shone with dazzling blue-white light. The massive energy inside it exploded all at once. To the cultivators in Yulan City and the distant low-level Primordial Life Army, they only saw an incomparably dazzling blue-white light burst out, as if a massive light ball appeared between heaven and earth.

The massive light ball enveloped the entire blood sea as if wanting to burn it down.

But the strongest aspect of the Secret Treasure 'Undying Heart' was its defensive tenacity. The blood sea was tough, not even a drop was damaged.

"The Undying Heart is extremely strong in defense, but weaker in offense. Relying solely on the Undying Heart, I can maintain an invincible position and suppress this Shu Guang Demon Lord. But to kill it, that's troublesome."

"To deal with a super-limit level being, using two Secret Treasures is a must."

Luo Feng became increasingly aware of his shortcomings in Secret Techniques. If the Secret Techniques 'Undying Blood Sea Body' and 'Biomimetic Destruction Eye' were perfected to a higher level, it would be much easier to kill a super-limit level being.

...

"The super-limit level Shu Guang Demon Lord is too terrifying."

The elders of Yulan City, seeing the explosive force, felt a chill in their hearts.

Under such a force, any elder would be turned to ashes with just one move.

"Is City Lord Luo Feng being suppressed in front of this super-limit level Shu Guang Demon Lord?" The elders couldn't discern the situation, only seeing Shu Guang Demon Lord's claws trampling the blood sea, and there was endless light burning the blood sea.

...

"My desperate move, couldn't even hurt him at all?" Shu Guang Demon Lord realized that, despite its full strength, every drop of water in the endless blood sea was incomparably tough, not damaged in the slightest. It faintly sensed something was wrong.

Suddenly——

"Boom——"

A colossal furry claw suddenly stretched out from the endless blood sea!

At such close range, Shu Guang Demon Lord couldn't dodge in time, only feeling the world divided and a space prison formed. The colossal furry claw directly grabbed Shu Guang Demon Lord's body.

"How could this be?" Shu Guang Demon Lord exerted its arms, struggling fiercely.

But it found it couldn't resist the furry giant claw, which terrifyingly suppressed its resistance, continuing to tighten! The claw's sharp nails had already shattered many blue-white scales and were gradually piercing into Shu Guang Demon Lord's body.

"What?" Shu Guang Demon Lord's whole body radiated light, layers of light protecting its physical body, struggling to resist.

"It didn't die with one claw? These super-limit level beings are indeed Innate Primordial Lives; their vitality is immensely strong."

Luo Feng was somewhat surprised.

Boom——

The colossal furry claw, grasping Shu Guang Demon Lord's body, forcibly dragged it into the endless blood sea.

The blood sea churned, completely engulfing Shu Guang Demon Lord. The endless Blood Sea Formation operated, layers of binding power constricted around Shu Guang Demon Lord, making it bear the combined suppression of the entire Blood Sea Formation.

"No——" Shu Guang Demon Lord struggled, the blood sea churning, but it couldn't break free.

As it struggled, Luo Feng didn't stop, the colossal furry claw kept attacking Shu Guang Demon Lord, each blow carrying the power to severely wound it.

Each successive strike was terrifying, after more than ten blows, the already tattered body of Shu Guang Demon Lord had multiple bloody holes pierced by the furry claw, no longer able to hide its life core, which was smashed.

Shu Guang Demon Lord's eyes dimmed instantly.

The torn colossal body could no longer resist.

The corpse of the super-limit level 'Shu Guang Demon Lord' floated in the depths of the blood sea.

"Finally killed it." Luo Feng sighed.

For him now, defeating a super-limit level being was easy, but to kill one, he needed both 'Undying Heart' and 'Palm World.' After all, he had just broken through!

With a thought, Luo Feng stored Shu Guang Demon Lord's corpse into his storage treasure.

...

In the eyes of the elders of Yulan City, in the observation of many cultivators, and in the attention of the low-level Primordial Life Army, the clash between 'Luo Feng' and the super-limit level Shu Guang Demon Lord lasted only about seven breaths.

Once caught by that colossal furry claw, dragged into the depths of the blood sea. Shu Guang Demon Lord struggled for a few more breaths, causing the blood sea to churn a bit, then completely died.

This scene shocked both sides!

"This was a super-limit level low-level Primordial Life."

"According to legend, even those Enlightened ones who mastered two Half Primordial Paths need enough accumulation and suitable Secret Treasures to hunt them."

"In less than ten breaths, one-on-one, this super-limit level being was killed?"

The cultivators in Yulan City who witnessed the battle were thrilled and excited.

But the low-level Primordial Life Army was shocked and furious, especially the other four super-limit levels!

"This Luo Feng grew up in Yulan City, not long ago he was less than Palace Master level. Even if he broke through to his current realm, he should be a newly advanced one! How did he so easily kill Shu Guang?"

"Newly advanced, even with powerful Secret Treasures, he shouldn't be this strong."

The four super-limit levels couldn't comprehend.

Palace Master Yuan Xiang was also puzzled.

"Luo Feng's cultivation, as I see it, should be along the paths of life and destruction." Palace Master Yuan Xiang, in an ordinary cave

mansion in the Outer City District, had gleaned Luo Feng's paths from the previous Life and Death Array, "Even if he cultivated both life and destruction to the Half Primordial Level. This requires time to accumulate a perfect combination."

"Perhaps, he has a very powerful Secret Treasure?" Palace Master Yuan Xiang guessed.

In Infinite Space, a Secret Treasure worth over ten thousand reward points can create miracles.

"No matter what, Yulan City is saved this time." Palace Master Yuan Xiang was more confident, "Only, I wonder how many cultivators will die in Yulan City this time. If we can keep it under thirty percent, it would be considered good."

He knew clearly that since the army had entered the city, with over two thousand at Divine Emperor Perfection Level and tens of thousands at the Late Stage Divine Emperor level…

The fall of the city decided there would be many casualties.

...

At the moment of Shu Guang Demon Lord's death, the super-limit level Enchanting Heart Worm immediately became illusory and quickly retreated.

The other three super-limit level beings—the enormous entity of the winding mountains, the multi-tentacled Thunder creature, and the huge black-winged bird—also began to change direction, actively seeking to join forces.

"We can't face him one-on-one."

"We need to unite first, and then the four of us will work together to deal with him!"

"From this battle where he killed Shu Guang, his realm is stronger than ours, and he has powerful Secret Treasures. That furry giant claw… I can sense, it should be refined from the corpse of a high-level Primordial Life."

"These cultivators are granted suitable Secret Treasures. But we have no such suitable treasures. This battle isn't fair!"

"No way around it, this is ultimately a place for the cultivator camp to nurture their descendants. Naturally, they favor these cultivators."

"If we return to the territory ruled by the Ancestor, these cultivators are our food."

These four super-limit levels felt aggrieved, but ever since they were captured by those who escaped from the Lurker's cage and thrown into the Nine Rivers Sacred Realm, they could only obediently follow the rules.

The four super-limit levels proactively united, although this wasted some time, it allowed Luo Feng to focus entirely on inscribing the formation! But they had no choice, for going alone would surely lead to death; even if two joined forces, they might still risk death.

Chapter 353 - 26, 1 vs 4 Modified after:

Luo Feng watched as the overwhelming Low-level Primordial Life Army surged in from all directions.

In his eyes, he could withstand the four Super Limit Level beings! But regardless of the 2600+ Divine Emperor Perfection Level beings or the tens of thousands of Late Stage Divine Emperors, once they got close, a single combined strike from them would be too much. His thirty-four avatars wouldn't hold, and he would have to rely on his movement technique to escape far away.

"I must set up the formation before the army reaches the core area! Once the army arrives, it will completely destroy the core area, with likely nine out of ten elders perishing," Luo Feng understood this point, "Without the elders' assistance, even if I manage to repel this army by myself, there will still be heavy casualties within the city."

To reduce casualties, the elders must be protected.

The elders' formation combined with his own would maximize their defensive power.

"Deploy the formation!"

Luo Feng stood there, almost all his thoughts focused on the core formation layer of Yulan City, rapidly engraving the formation.

Whoosh~~~ Whoosh~~~ Whoosh~~~

The overwhelming army was attacking from all directions simultaneously. The four Super Limit Level beings didn't dare get too close and had already converged at a distance.

"The four of us will join forces and try to distract Luo Feng! If he battles with the four of us, he'll have to divert much of his attention… This way, the speed at which he sets up the formation will significantly decrease."

"Once the army arrives at the core area, it will completely destroy the entire area where the elders live! Without the aid of nearly 200 elders, even if Luo Feng tries to suppress us alone, we should be able to kill enough cultivators and successfully retreat!"

The four Super Limit Level beings were very clear about the situation.

If the city falls, it would be to their advantage.

Luo Feng is too fast, free to come and go, and the Low-level Primordial Life Army can't kill him! But they can exterminate the remaining nearly 200 elders! This would be severing one of Luo Feng's arms.

Otherwise, Luo Feng leading numerous elders together would doubly increase their deterrent power!

"The formation set up by someone mastering two Half Primordial Level Daos would be immensely vast and complex, and would still need some time to complete."

"We need to delay a little more. Regardless, it will be enough time for the army to reach the core area."

The four Super Limit Level beings had calculated and deemed their chances very high!

First, annihilate the elders to weaken Yulan City's deterrent power, then slaughter the cultivators, and finally lead the entire army to escape! That was their plan! The army would likely suffer significant losses, but the four Super Limit Level beings could still survive.

Whoosh! Whoosh! Whoosh! Whoosh!

The four Super Limit Level beings burst forth in speed, charging straight at Luo Feng.

"Four Super Limit Level beings?"

"Can City Lord Luo Feng withstand them alone against four?"

The elders in the city and many cultivators looked up and saw the four enormous figures.

The Enchanting Heart Worm completely revealed its true form, its illusory body appearing and disappearing.

The black, serpentine mountain-like being had black flames surging on its surface, with burning eyes staring at Luo Feng from its massive head.

Another enormous Thunderbolt Tentacle Creature observed Luo Feng with numerous tentacles.

A massive bird exuding endless destruction spread its wings, seemingly covering half the sky.

"Four Super Limit Level beings! Even at my peak, relying on mighty secret treasures, I could only flee in embarrassment facing four Super Limit Level beings," said Yuan Xiang Palace Master, looking up, knowing the difference between one-on-one and one-on-four was vast.

Four Super Limit Level beings could coordinate and simultaneously strike from different angles, tremendously increasing their threat level.

"Luo Feng! Do you dare battle us?" the voice of the Super Limit Level Enchanting Heart Worm echoed in Luo Feng's mind. "Of course, you can also choose to flee, and we four can rampage through the core area, exterminating those elders one by one."

Luo Feng gazed at the four figures.

"One-on-one, you tremble in terror. Four-on-one, you four have confidence," Luo Feng said, as his thirty-four avatars guarded their posts. "I shall grant your wish."

Whoosh!

Luo Feng's strongest avatar took the initiative, stepping forward, moving within the blurred rifts of heaven and earth, charging straight at the four Super Limit Level beings.

Since a battle was inevitable, it had to be fought away from the core area.

Although the battle might affect some innocent cultivators, there was no choice; sacrifices must be made in war! Saving one more elder might save millions of cultivators indirectly.

"Here he comes."

The four Super Limit Level beings stared intently at the black-clad, black-haired figure. This figure walked through the rifts of heaven and earth, taking two steps to reach them.

A wave of mental force instantly struck Luo Feng as the Super Limit Level Enchanting Heart Worm immediately used its innate secret technique, Enchanting Heart. Although Luo Feng could withstand it, he had to divert some heart force and utilize techniques like the Lie Yuan Technique to resist.

"Hmph."

As Luo Feng approached, an overwhelming Endless Blood Sea appeared beneath him, swirling and surging, aiming to engulf the four Super Limit Level beings completely.

In the area below Luo Feng, there were large sections of cave mansions. The cultivators in these mansions looked up at the sky, seeing the swirling vast Blood Sea and the four Super Limit Level beings.

"I hope we are not affected."

"If this level of battle affects us, we might be done for."

The cultivators' hearts trembled as they could only activate the formations within their cave mansions, doing their best to ward off any possible 'aftermath.'

While battling, Luo Feng would try to protect these weaker ones.

But in a 'Super Limit Level' battle, Luo Feng couldn't guarantee that he could fully protect the cultivators while also fighting.

"Boom——"

In the Endless Blood Sea, a massive black serpent-like figure erupted with terrifying flames which burned the Blood Sea everywhere and even attempted to incinerate Luo Feng's soul.

However, the impact on the soul was much weaker compared to the Enchanting Heart Worm's innate secret technique, Enchanting Heart.

That Thunderbolt Tentacle Creature's form gathered endless thunder, madly bombarding the Blood Sea.

"Destroy."

The immense Bird of Destruction, its wings spread out like fog. As its wings flapped, layers of dark energy surged towards the Blood Sea like tidal waves, penetrating through every layer, shaking, twisting, and tearing apart. It also traced the life aura, aiming to shake, twist, and kill Luo Feng's soul.

"Among the four Super Limit Level beings, the Bird of Destruction deals the most damage." At this moment, Luo Feng was subjected to over ten types of attacks.

Material destruction, flames, dark energies, thunder, invisible restraints, tentacles, causality attacks on the soul, energy shocks, twisting and tearing all creation…

Each of these attacks could severely injure a Palace Master Level being, and two or three combined could destroy a Palace Master.

With over ten forces striking simultaneously! Luo Feng, having just recently broken through, had his Life Form Secret Technique incomplete; if not for ordinary avatars, they would have been utterly annihilated under such assault.

But with the 'Undying Heart's' support, the Undying Blood Sea

dramatically enhanced, becoming nearly indestructible.

Regardless of soul or physical body, this 'Blood Sea Body' stubbornly withstood the full-force assault of the four Super Limit Level beings in an instant, with only a minimal amount of 'Blood Sea Water' being consumed. Yet the consumption rate still couldn't match his absorption of Yulan City's energy.

"In true combat, protect yourself first, then seek to kill the enemy," Luo Feng thought to himself.

Protective treasures were incredibly precious. The one he exchanged from the Infinite Space Treasure Vault, the one that suited him, balancing life and destruction, was only the Undying Heart.

"What!" The four Super Limit Level beings were astonished. Despite their full efforts, the vast Blood Sea didn't seem to suffer any noticeable loss.

"Swoosh——"

From within the Blood Sea, a massive furry paw instantly grabbed the Bird of Destruction. The bird, dealing the most damage, let out an extraordinarily sharp cry!

The Bird of Destruction transformed into black mist, its immense form becoming a hazy bird-like shape in midair.

"Rumble——" Luo Feng's furry paw then swiped at the nearby Thunderbolt Tentacle Creature.

The Thunderbolt Tentacle Creature's many thick tentacles immediately tried to entangle and block the paw.

But the terrifying power of the paw forcibly squeezed tight.

"Bang."

On the other side, the black serpentine mountain-like being's tail viciously whipped Luo Feng's paw. The tremendous impact forced Luo Feng's paw to release its grip, allowing the Thunderbolt Tentacle Creature to escape in a panic.

...

The vast Blood Sea, roiling and binding all around.

Thunder, flames, dark erosion spread their forces, and the immensely terrifying furry paw pursued and attacked the four Super Limit Level beings! Each had their techniques, coordinating to protect themselves.

"How is Luo Feng this strong?"

"Even though we four are together, we can't threaten his protective capabilities."

"But his secret treasure paw can threaten our lives."

Though unwilling to admit it, the four Super Limit Level beings were indeed at a disadvantage in this one-versus-four battle.

They couldn't harm Luo Feng.

They could only collaborate to survive!

Despite their disadvantage, the four Super Limit Level beings didn't give up and continued to battle Luo Feng together. The Super Limit Level Enchanting Heart Worm repeatedly used its innate secret technique to interfere with Luo Feng.

"Amazing."

"To be dominant in a four-on-one battle, City Lord Luo Feng is impressive," the elders watching were excited, and the cultivators in the caves below the battlefield were deeply grateful.

Due to Luo Feng's upper hand, he could still divert some thoughts to control Yulan City's energy, reducing the battle's fallout, saving the caves below.

"To be dominant against four Super Limit Level beings. Compared to him, Wei Yang Palace Master is far inferior," the Shadow Tower Master watched, feeling regrets about the conflicts he had with Luo Feng.

...

While battling, Luo Feng looked into the distance.

The Low-level Primordial Life Army was flying towards the core area from all directions! Thus, the distances varied, with the closest army approaching from the East City Gate, now not far from the core area.

"Hahaha, almost there."

"One of the armies is close to the core area," the four Super Limit Level beings were thrilled.

"This army has over 800 Divine Emperor Perfection Level beings and over 12,000 Late Stage Divine Emperors, enough to annihilate the core area!"

They eagerly watched.

...

Since Luo Feng broke through from the Life and Death Dao, he had begun setting up the formation in the Yulan City's core layer immediately.

Basing the formation on the 'Late Stage Divine Emperor Life and Death Dao' naturally made it vast and complex.

"I divided the formation into three layers."

"Set up the first layer first. The most crucial aspect of the first layer is speed!"

No matter how fast the first layer, it only contained the basics of the Late Stage Divine Emperor Life and Death Dao, as Luo Feng simplified it and, with the help of the tripled speed of thought provided by the Hundred Tribulations Heart Essence, quickly set up the simplest first layer.

The formation structure could vary greatly.

Luo Feng chose the 'Three-layered Array' to quickly set up the first

layer, so as to change the tide of war and save more cultivators' lives.

While sensing the Low-level Primordial Life Army approaching, Luo Feng, while battling the four Super Limit Level beings, was fully focused on setting up the formation.

"Done."

At last, as he completed the first layer of the formation, his eyes were filled with excitement.

——

Thanks to the new Alliance Hierarch 'Yaoguang' for the reward! Thank you for the support!

Chapter 354 - 27 Defeated

The Elders of Yulan City controlled numerous formations, desperately trying to fend off the approaching armies from all directions.

"Not good, the nearest army is about to reach the core area."

"Over 800 Divine Emperor Perfection level, and more than 12,000 Late Stage Divine Emperor level troops; we can't stop such an army, and neither can City Lord Luo Feng!"

The elders felt powerless.

A single Divine Emperor Perfection level low-level Primordial Life was equivalent to a Palace Master level entity without Weapon Secret Treasure! It seemed as if over 800 Palace Masters and 12,000 Elders were attacking together, with enough collective power to destroy any obstacle in their path!

"Our avatars may die, but in this battle, victory will ultimately belong to us cultivators!"

"Once Lord Luo Feng finishes imprinting the formation, his formation will be stronger than all the Elders combined and will be enough to repel these low-level Primordial Life armies!"

"We just don't know how many cultivators within the city will perish."

Compared to total slaughter, if more than half of the city's inhabitants could survive, the elders would already consider it very fortunate.

The elders remained relatively calm; they had done everything they could. Even if they died, it would just be their avatars. As long as they eventually achieved victory, most of their resources in Yulan

City could still be preserved.

...

Core Area, Luo Feng's cave mansion.

Emperor Qing, Emperor Ming, and Di Fu looked up, observing the various Luo Feng figures stationed in defense, along with the massive approaching low-level Primordial Life army in the distance.

"Brother Luo Feng first killed a Super Limit level entity," Emperor Qing was greatly astounded. "Now, he is even managing to suppress four Super Limit level entities single-handedly."

Super Limit level entities were already the strongest among the low-level Primordial Life. Luo Feng could fight against four of them simultaneously.

One could say that at this level...

Even if Luo Feng went to the Dark Sacred Realm, despite its higher dangers, greater number of low-level Primordial Life, and overall strength, the threat to Luo Feng would still be exceedingly low.

"Brother Luo Feng stands at the pinnacle level even in the Dark Sacred Realm," Emperor Qing whispered softly.

"Isn't he far stronger than the two ancestors?" Di Fu pondered.

"Of course! The ancestors are only a level above me, akin to the Elder level of Yulan City. In front of Brother Luo Feng now, they wouldn't be able to withstand even one move," Emperor Qing said with conviction. "You know, he has cultivated from an eternal true god to the strongest level in the Land of Origin within a thousand eras. I guessed he would still be very dazzling outside the Source World. But who could have imagined he would be even stronger than I anticipated."

"I've only teamed up with him a few times, and now he's the City Lord of Yulan City!" Emperor Qing exclaimed.

Emperor Ming also looked up, "Perhaps with such potential, Brother

Luo Feng might even break free from the Braided Cage."

"Breaking free from the Braided Cage and becoming a true Primordial Life," Di Fu's heart surged, "If he succeeds, we would have a friend who broke free from the Braided Cage."

"Breaking free from the Braided Cage is not easy," Emperor Qing said. "In the Dark Sacred Realm, breaking free from the Braided Cage is a legend. Brother Luo Feng might face some hardships."

They continued chatting.

Both Emperor Qing and Di Fu had avatars and did not fear death. Emperor Ming, who had moved from despair to seeing a glimmer of hope, had become much more composed.

While the three of them were relatively calm, many cultivators in the core area were becoming increasingly anxious.

"The army is coming!"

"Luo Feng Divine Emperor must hold them off."

"Everything depends on City Lord Luo Feng now." Those living in the core area, many were mid-stage Divine Emperor Enlightened ones. Several were even at stronger levels, mostly possessing true bodies.

They had too many aspirations and pursuits; having walked the path of cultivation to this point, they would naturally not resign themselves to death.

"The entire army is attacking, City Lord Luo Feng won't be able to hold them off," some cultivators who saw the situation clearly sighed, watching death approach.

...

The army was getting close, and each low-level Primordial Life was maddened with excitement, seeming to envision destroying the Elder Cave Mansions and crushing Yulan City's last line of defense, indulging in rampant slaughter.

"Haha, it's almost here."

"We indeed have the potential to slaughter cultivators and then escape." The four Super Limit entities battling Luo Feng were also becoming more excited. Though they were on the losing side, the situation was about to change soon!

In a moment, Luo Feng would need to go all out to repel the low-level Primordial Life army, as their destructive power was far greater than the four Super Limit entities.

Suddenly——

The sky brightened!

The sky over Yulan City became completely illuminated!

All low-level Primordial Lives and cultivators noticed the change, instinctively observing the sky. The originally cloudy weather had vanished, even the faint rain mist within Yulan City had dispersed.

The sky, brightened immensely! Sky-blue, like a vast jade, brightly filled with endless vitality.

"This is——"

The ground of Yulan City also turned pitch-black at the same time; endless blackness, like fog or ink, adhered to the ground.

At this moment!

Blue sky! Black earth!

The ends of heaven and earth, where the blue sky and black earth connected.

"What's happening?"

The vast flying low-level Primordial Life army felt an immense weakness throughout their bodies, their vitality rapidly dissipating. Within just a couple of breaths, they became powerless and fell.

Previously, when fending off the elders' formations, the low-level Primordial Life army merely needed to join forces to form a protective barrier. But now, without sensing any attack, creatures on the fringes of the army began to fall lifelessly to the ground.

On the surface, these low-level Primordial Life corpses bore no signs of injury.

"What's happening?"

"This ——"

"This is a formation, it's a Heaven and Earth Array!"

The low-level Primordial Life army within Yulan City consisted of four units. They moved collectively to avoid being assailed by the elders' formations. However, under the mysterious formation engulfing the entire city, their fellow creatures were dying and falling continuously, arousing their fury.

Swish——

The sky descended with a faint blue mist! The earth also emitted a black mist!

The blue and black mist rapidly enveloped all the low-level Primordial Life armies and the entire city, including all cave mansions and cultivators.

The cultivators felt no threat.

"This black and blue mist?" The cultivators within the city gazed at the intertwined black and blue mist, only sensing an ordinary scene.

But the low-level Primordial Life army knew well the terror of this black and blue mist. They had already formed protective barriers around the army's perimeter, but under the mist's cover, the "hiss hiss hiss" sound quickly eroded and penetrated their defenses.

In some weak spots in the defenses, the mist broke through in the blink of an eye and easily invaded the low-level Primordial Life's bodies, contaminating their life cores. At the slightest touch, the life

core would crack.

In the city, the four low-level Primordial Life armies had many weak points in their defenses breached, causing numerous low-level Primordial Lives to fall dead to the ground.

"Hold fast."

"Hold fast, don't allow any weak points in the defenses."

The low-level Primordial Life armies were exerting all their strength, disregarding the energy drain, creating layer upon layer of defensive barriers frantically protecting all areas.

Despite tightly sealed defenses, some weaker low-level Primordial Lives would still silently perish.

"There are causality curse killing attacks."

"Even through the energy barriers, they can still kill our kind."

These low-level Primordial Lives were quite wise, recognizing the unseen attacks, yet they couldn't fend them off.

As some low-level Primordial Lives died silently, natural weaknesses emerged in the defenses, allowing the external black and blue mist to seep in and erode vitality.

"What do we do, what do we do?"

The four armies were fighting desperately but lacked skill in formations. Under Luo Feng's internal and external array attacks, the black and blue mist continued to break through some nodes, causing casualties.

"Every action of a cultivator in the Nine Rivers Sacred Realm is suppressed by the heavens and earth. But once the formation is inscribed in Yulan City, cultivators not only face no suppression but are bolstered by Yulan City's energy. As the City Lord, I mobilize the energy most prolifically." Luo Feng felt utterly relieved.

Various 'Life and Death Dao' killing techniques could silently claim

the lives of those low-level Primordial Lives!

"This, this——"

The four Super Limit level entities battling Luo Feng felt chills down their spines.

"Luo Feng has successfully arranged the formation! It's stronger than all the elders combined."

"Such a formation can only be arranged by someone who has mastered two Half Primordial Level Paths."

The existence of cultivation in the Fusion Dao was exceedingly rare. Those who reached high levels were even more scarce. Fusion Dao cultivators reaching the Late Stage of Divine Emperor were nearly impossible to find throughout the Dark Sacred Realm.

Hence, all cultivators and low-level Primordial Lives alike would concur——

Beyond the Half Primordial Enlightened, were typically those who mastered two Half Primordial Paths.

"How could such a horrifying formation be set up so quickly?"

"It happened so fast! Much faster than anticipated!"

The four Super Limit entities felt hopeless.

Even Luo Feng's seemingly simple first layer formation rivals the formidable arrays crafted by Yuan Xiang Palace Master and his peers.

"King, what should we do?"

"A causal type invisible attack, continually killing our kind."

"King, the black and blue mist is eroding everything, our energy drains constantly, yet we gain no replenishments. If this continues, we'll only grow weaker."

The four armies panicked, realizing their impending doom.

The cultivator camp, leveraging Yulan City, had continuous energy supplies. Meanwhile, under Luo Feng's array, the low-level Primordial Lives couldn't absorb energy at all.

"We lost."

The four Super Limit entities conceded at this moment, aware that a defeat awaited. Cooperating with nearly two hundred elders and Luo Feng, if they delayed further, even escaping might be impossible.

"All four armies, flee for your lives separately! Escaping the Yulan City boundary offers hope for survival."

"During the escape, you may slaughter cultivators. The more cultivators you kill, even without freedom, you might transform and further advance!"

A voice echoed within the hearts of all Divine Emperor Perfection level low-level Primordial Lives in the four armies.

Chapter 355 - 28 Cultivation Is Difficult

The four super limit level exchanged glances.

To save their lives, they had to let their armies share some of the burden!

"If the four armies focus on escaping without harming the cultivators, given Luo Feng's coordination with the Heaven and Earth Array, he might break us down one by one and eliminate us all." The four super limit level were very aware of this point.

Even with four against one, they were already at a disadvantage, and this was without the formation being fully set up.

With the formation's support, even if the four of them focused solely on survival, they wouldn't last long.

"Once the four armies start slaughtering the cultivators, their destructive power will far exceed ours, forcing Luo Feng to save the cultivators." They understood well the mindset of their armies.

...

The divine emperor perfection level members of the four armies were each leaders of their respective units, following the 'kings' in the hope of capturing the city.

"From the moment we entered the city, I've wanted to slaughter! But the king forced us to first destroy the core area, and now we've ended up in defeat!"

"We've held back for so long, it's time to kill, kill to our heart's content. Maybe if we kill enough cultivators, we can regain our

freedom!"

"We'll retreat while slaughtering, but the retreat speed will be slowed by 30 to 40 percent, and the casualties will be severe!"

"The king wants us to slaughter to lure the cultivators!"

"In the Nine Rivers Sacred Realm, we've always barely survived. With freedom right before us, why not fight for it?"

"This might be our only chance to break through a cultivator city! We'll regret it if we don't slaughter this time!"

The divine emperor perfection level members communicated their thoughts rapidly.

Within a breath's time, the divine emperor perfection level members of the four armies quickly reached a consensus.

They all decided to... retreat while slaughtering!

Though it would affect their escape speed, it also gave them hope for 'freedom'! Even if they couldn't regain their freedom, their bloodlines might advance further!

In fact, when they first entered the city, these armies already wanted to slaughter. But back then, according to the king's orders, they couldn't waste any time and aimed to destroy the core area! They even wanted to completely annihilate Luo Feng's avatar.

Only as the situation continued to evolve did they end up in this current state.

At this moment, the four armies, after being subtly guided by the four super limit level, all chose the same path!

"Retreat!"

"Retreat!"

The four armies all fled towards the city outskirts along the nearest path.

But as the mighty armies fled, they suddenly dropped their flying altitude and simultaneously focused on mass attacks. Thunder, various flames, black wind, curse killings, poisons, and other forces descended, breaking through the obstruction of the 'cyan-black mist' and forcibly affecting numerous cave mansions below!

Luo Feng's Heaven and Earth Array was a large-scale suppression and erosion. These armies, concentrating their power, naturally could break the cyan-black mist.

"Ah——"

"No!"

The cultivators in the cave mansions, already anxious while watching the high-altitude battle, became extremely tense seeing a vast low-level primordial life army directly overhead.

But when the powers indeed swept down, what they felt inside was only despair.

The cyan-black mist had already exerted itself to block, but it could only block part of the power, with the remaining terrifying power still sweeping over them.

"The path of cultivation is full of various calamities. Cultivators fight and kill each other, become entrapped in bottlenecks while comprehending the Great Dao, risk crises while hunting low-level primordial life... Now, it's a heaven-sent catastrophe, the army breaking through the city..." said a middle-aged man sitting there, looking up at the descending power.

He was a cultivator who had come from countless worlds, and this was his true body, having no avatars.

"But, this path of cultivation, it attracts me too much."

The middle-aged man smiled.

From the lowest level of a weak world, he had become infatuated with cultivation as soon as he came into contact with it. Training the physical body, training the mind, practicing swordsmanship... He

evolved continuously, encountered more, and even outlived an entire cycle of his hometown world.

He had traveled to other worlds too, entered even higher-level worlds. He kept gaining more cultivation knowledge and constantly strengthened himself.

"On this path, I, Cang Yu, have no regrets!" Under the terrifying power, the middle-aged man was instantly reduced to dust. Even at the moment of becoming dust, he faced it with a smile.

Boom——

Enormous power swept over numerous cave mansions, killing all the cultivators within.

At this moment, within Yulan City, the four armies retreated simultaneously. While fleeing, they sent out part of their forces to slaughter! Their powers varied, cutting off every possibility of the cultivators' escape.

The cultivators who could reach the Nine Rivers Sacred Realm each had experiences that could be described as legendary!

But at this moment, in the face of this calamity, one by one, they were annihilated.

Such is the path of cultivation!

Besides conflicts and fighting among companions, besides facing bottlenecks in cultivation, one might also encounter external cataclysms!

For example, a Source World getting devoured, a Holy Realm being completely obliterated, even entire worlds dedicated to training Divine Emperors being wiped out... In the face of such cataclysms, individuals are powerless.

...

"The four low-level primordial life armies have started slaughtering." The array of elders watched with changing expressions.

As the City Lord, Luo Feng keenly sensed the situation throughout the city.

At the moment the city fell, Luo Feng had already foreseen this scene.

If the defensive system of Yulan City had stopped all the low-level primordial life armies outside, the losses within the city would have been negligible.

But the city fell!

The low-level primordial life army entered, and once they started slaughtering, the cultivators naturally died in droves.

Earlier, the low-level primordial life focused on winning, aiming to quickly kill their way to the core area. But now, everything had changed!

"All elders, go all out and suppress the four armies." Luo Feng commanded from afar.

"Yes!"

Nearly two hundred elders each deployed their formations, in coordination with Luo Feng's Heaven and Earth Array, to suppress the four armies together! Forcing those armies to allocate more power to self-protection, leaving less power for 'slaughtering.'

"Whoosh!"

Luo Feng's strongest avatar ignored the four super limit level and headed straight for the nearest army.

"Luo Feng is no longer paying attention to us."

"His other avatars are coming."

The four super limit level watched as Luo Feng's other avatars stationed in the core area, a total of ten avatars, moved through the gaps in the Heaven and Earth, heading towards them.

Luo Feng's ordinary avatars, though somewhat weaker than the super

limit level, were now supported by the formation. Ten avatars were enough to entangle the four super limit level.

"Escape."

"Quickly escape."

The four super limit level didn't dare to hesitate and immediately joined forces to fly away into the distance.

Luo Feng did not push too hard; if the four super limit level fought to the death, madly slaughtering, the cultivators would suffer massive casualties too.

...

This army consisted of over 600 divine emperor perfection level, more than 8000 late-stage divine emperors, and some weaker low-level primordial life forms. While dealing with Luo Feng's Heaven and Earth Array and the formations of the elders, they also allocated part of their power to slaughter.

"Whoosh——"

Very suddenly!

Out of the cyan-black mist appeared a huge furry claw, its power terrifying, piercing through the layered defenses of the army in an instant!

"Not good." The members of the army were filled with shock and anger.

The enormous claw pierced through the defensive layers, sweeping through a large number of late-stage divine emperors and some divine emperor perfection levels, causing numerous casualties.

"Repel it."

"It's Luo Feng's secret treasure claw, repel it."

The army moved and suppressed the enormous claw.

"Protect the entire army." More layers of defense tightly protected the whole army.

They quickly assessed the damage from this claw strike.

"Nineteen leader level have died, along with 126 core lineages." The entire army was a bit agitated; their defenses, initially to resist the formations, now had to deal with this targeted strike!

Bear in mind that the explosive power of Luo Feng's strongest avatar exceeded that of the four super limit level, with an instantaneous burst of power comparable to the combined attack of over a hundred divine emperor perfection level!

"Luo Feng's strength is too formidable. We cannot possibly defend against his attacks everywhere; it's impossible."

"And there's the formation aiding him!"

With combined attacks from nearly two hundred elder formations and the Heaven and Earth Array, the burden was already substantial. Moreover, Luo Feng's concealed presence, aided by the formation, made it impossible for them to pinpoint his location.

"Whoosh——"

Another claw, from the midsection of the army, caused over a hundred more deaths!

The army mainly consisted of leader level and core members, as the vast majority were summoned from other areas of the Nine Rivers Sacred Realm; the lower and middle tiers had not been significantly gathered.

"Whoosh." "Whoosh." "Whoosh."

A massive furry claw attacked from different positions within the cyan-black mist.

"We can't determine his location!"

"He's everywhere!"

The entire army was in panic.

In reality, Luo Feng's strongest avatar had merged into the Endless Blood Sea, integrating with the Heaven and Earth Array, almost covering half of the army's area. The range was so vast that, through causality sensing, it felt like Luo Feng was everywhere around them!

"Run, run, run."

"Quickly escape."

Under the repeated attacks of the enormous claw, this army couldn't spare any effort to slaughter cultivators and immediately began to flee frantically.

They fled at full speed, protecting themselves layer upon layer.

How could their escape speed possibly match Luo Feng's pursuit speed?

Luo Feng delivered several more claws.

"Having killed over 200 divine emperor perfection level and 1500 late-stage divine emperors." Luo Feng stopped. If he continued, aided by the formation, he could completely wipe out this army, ensuring none escaped.

But——

While dealing with this army, the other three armies were still slaughtering the cultivators!

"Whoosh."

Luo Feng's strongest avatar, moving through the gaps in the Heaven and Earth, headed towards another army.

"Luo Feng is no longer attacking us." The heavily damaged army noticed the disappearance of the enormous claw and the cessation of attacks. But after losing a third of their forces, all that remained was panic.

While resisting the combined attacks of the Heaven and Earth Array and the elder formations, members were continuously dying!

"We can't attract Luo Feng back again. If he comes again, we'll be completely finished."

"Quick."

After enduring dozens of claw strikes, the army had no more illusions and made a full-speed escape.

...

"Hahaha, we escaped, we escaped."

The four super limit level rushed out of Yulan City, leaving the range of Luo Feng's Heaven and Earth Array and the elder formations.

There were some troops outside the city initially to prevent the cultivators from escaping. But with the defeat, the external low-level primordial life armies had already fled en masse.

"Luckily, the four armies slaughtered, forcing Luo Feng to stop them." The four super limit level, after escaping Yulan City, didn't slow down and continued flying away. After fleeing far enough, they dispersed and escaped separately.

Concealing their auras, dispersing and fleeing.

The four super limit level fled further and further from Yulan City, planning to leave this area entirely and escape to other regions of the Nine Rivers Sacred Realm.

"Escape?"

On the city wall stood four Luo Feng avatars, each with the Biomimetic Destruction Eye on their foreheads.

"Do you think you can escape?"

The four Luo Feng avatars maintained a sufficient distance from the four super limit level, tracking them with the Biomimetic Destruction

Eye, following them from afar!

These four super limit level, once the army inside the city was dealt with, Luo Feng would naturally take care of them one by one!

Chapter 356 - 29 Curtain Falls

The first low-level Primordial Life Army, heavily damaged by Luo Feng, fled with all its might, while the other three armies fled while relentlessly massacring. Everywhere they passed, vast areas of cave mansions turned into rubble, and the cultivators perished without the strength to resist.

When Senior Yuan and the others created the Nine Rivers Sacred Realm, they made the overall power of the low-level Primordial Life far superior to the cultivators to exert enough pressure on them, forcing the cultivators to only hide within the cities.

When the city falls, slaughter is what awaits!

"Damn it."

Luo Feng's eyes were cold as he walked in the gaps between heaven and earth, already nearing the second army.

The second army comprised over 800 Divine Emperor Perfection Level beings and 12,000 late-stage Divine Emperors, making it the strongest of the four armies that invaded the city! Even under the combined assault of Luo Feng's formation and the array of elders, this army sustained relatively minor losses.

"Disperse."

Luo Feng's heart stirred, causing the dark green fog within Yulan City to become illusory and transparent, no longer obscuring vision and allowing the four armies to observe each other from a distance.

"The formation fog has thinned."

"We can see the other three armies."

At this moment, they realized that, apart from the first army which was fleeing frantically, the flight speed of the other three armies had noticeably slowed down as they continued to massacre the cultivators distractedly.

Surrounding the strongest second army, the illusory dark green fog enveloped and shrouded it, with the array of elders besieging it.

Suddenly—

A massive furry claw, without warning, extended from the void. The layers of protection covering the vast army had limited defense capabilities at specific points.

This giant claw instantly pierced through the layers of protective energy at the attacked points, sweeping through numerous low-level Primordial Life forms. These low-level Primordial Life forms, whether at the late-stage Divine Emperor or Divine Emperor Perfection Levels, were torn apart and their life cores shattered upon contact with the claw.

The shattered bodies were also naturally collected within the space contained in the claw.

"Repel it!" The entire army was in a panic, hurriedly combining their efforts to repel the furry claw.

"17 leader-level beings and 213 core clan members were killed." The second army immediately assessed their losses, feeling alarmed.

It was known that the curse killings of the Heaven and Earth Array could not threaten the leader-level beings and were mainly targeted at the core clan members, taking one or two lives each time. Although the deaths added pressure on the army, it was not panicking yet.

But now?

Even the leaders were dying in batches! The leader-level beings were the ruling core of the entire army, and losing so many at once brought panic to everyone.

"It's Luo Feng's secret treasure claw."

"We can't determine Luo Feng's exact position!"

"This secret treasure claw possesses terrifying power and mysterious techniques, which we cannot capture! Furthermore, it's indestructible; we can only barely repel it."

Although the army comprised over 800 low-level Primordial Life forms at the Divine Emperor Perfection Level with various means, they were helpless against Luo Feng.

After all, in terms of power, the terrifying body driven by the undying heart deploying the Palm World already possessed formidable strength. Luo Feng further employed the secret patterns within the Palm World to execute his techniques.

In terms of technique realm, it surpassed the pure late-stage Divine Emperor Life and Death Dao, making the claw's methods seem too mysterious and elusive to these low-level Primordial Life forms relying solely on their bloodline.

"Boom—"

The giant claw attacked unannounced from the rear of the army, killing over 200 more members, including more than ten leader-level beings.

"Boom!" "Boom!" "Boom!" "Boom!" "Boom!" "Boom!"

One swipe after another, Luo Feng didn't stop.

With the support of the Heavenly Earth Formation and the Array of Elders, this army could not do anything to Luo Feng, helplessly watching as their numbers were continuously massacred with growing casualties.

"This... this..."

"If this continues, the entire army might not escape."

The third and fourth armies in the distance saw the scene of Luo Feng

repeatedly attacking the second army through the now-transparent dark green fog.

This sight made them tremble in fear.

"If Luo Feng wipes out that army, he will surely come for us next."

"At his killing speed, an army won't last long."

"Let's flee quickly! We must escape with all our might!"

"We can't be distracted by massacres anymore; we must focus entirely on escaping at full speed. Otherwise, the entire army will be annihilated!"

The third and fourth armies changed their mindset.

Previously, they believed that with the army's combined power, they could still escape while distractedly massacring. Most would survive, especially the leader-level beings. So they were willing to take the risk.

But now? If they don't escape, it's a certain death!

The third and fourth armies quickly reached a consensus within a breath's time: flee immediately!

"We've killed many too."

"Let's escape now."

"If we die here, what good is bloodline evolution?"

Although they had massacred for too short a time to regain their freedom, some members who had slain many still hoped for bloodline evolution.

But the prerequisite was to survive until the moment of receiving 'the gift.'

Whoosh—

Whoosh—

The two armies stopped their massacre and began to flee with all their might!

The surrounding cultivators, who had given in to despair, were astonished to witness this.

"We survived?"

"These low-level Primordial Life armies stopped their massacre and fled with all their might."

The cultivators realized that whatever made the low-level Primordial Life forms cease their massacre must be connected to the most powerful presence in Yulan City.

...

"The two armies ceased their massacre." Luo Feng observed this from afar, knowing that he made the dark green fog become illusory to scare the remaining two armies into witnessing the second army's miserable state, hoping they would flee quickly.

Perhaps more low-level Primordial Life forms might escape the city.

But at the very least, more cultivators would survive.

"Rumble~~~"

Luo Feng continued his frenzied onslaught on the second army, and with the third and fourth armies fleeing, he naturally focused all his power on this second army.

The massive claw attacked time and again.

"Luo Feng, stop."

"If you do not stop, giving us no vitality, we would rather perish and massacre more cultivators."

"We will massacre without hesitation. Before our entire army is wiped out, we can at least slaughter tens of millions of cultivators."

Voices came from all directions.

At the same time, the second army ceased their escape, displaying a posture ready for all-out massacre.

Luo Feng frowned at this sight, the massive claw he extended also retracting.

"To completely annihilate this army will take considerable time. They indeed could massacre over ten million cultivators during that time." Luo Feng understood that their threat was credible.

Seeing the giant claw retract, the low-level Primordial Life forms of the second army breathed a sigh of relief.

Finally, finally, it stopped.

They had deterred this Luo Feng Divine Emperor with their 'mutual destruction' stance.

"We will no longer massacre the cultivators, and you must not attack us." A leader of the second army said.

"The formation of Yulan City will continue to suppress you, but I can stop the secret treasure attacks," said Luo Feng.

"Alright."

"We believe you."

Their only choice was to believe.

"Fast, fast—"

The second army also fled with all their might, at this moment still having over 500 Divine Emperor Perfection Level beings and over 7000 late-stage Divine Emperors, already greatly weakened.

...

At this moment, all four armies in Yulan City fled with all their might, daring not to massacre anymore.

Luo Feng's avatars stood above Yulan City, keeping their eyes on the four armies.

"The strength of City Lord Luo Feng can suppress everything in the Nine Rivers Sacred Realm." The elders felt reassured.

The cultivators of the Nine Rivers Sacred Realm were vastly inferior to those of the Dark Sacred Realm. Luo Feng's power, even at the pinnacle level in the Dark Sacred Realm, was naturally invincible here.

"Over 16 million cultivators died in Yulan City!" As City Lord, Luo Feng instantly assessed the casualties.

The early infiltration of low-level Primordial Life forms caused minor injuries and fatalities.

The main damage came from the four armies' massacre during their escape. Even though Luo Feng fully suppressed them, there were still heavy casualties.

"With so many cultivators dead, do you still wish to leave alive?" Luo Feng's eyes turned icy.

At this moment—

At the core formation layer of Yulan City.

Luo Feng was meticulously engraving the second layer of the formation, nearing completion.

After the city was breached, and Luo Feng broke through to the late-stage Divine Emperor Life and Death Dao, he began setting up the first layer. As the low-level Primordial Life armies were about to reach the core area, he finished the first layer.

Then, the four armies started their retreat, slowing down due to their massacre and escape, unable to exit Yulan City. Luo Feng soon completed the second layer.

"Buzz."

The completion of the second layer naturally combined with the first, forming a unified whole.

...

"It's done."

With a single thought, Luo Feng caused the original 'Heaven and Earth' grand formation of Yulan City to gradually become chaotic, the dark green fog transforming into 'chaos fog,' enveloping and suppressing the four armies.

"Not good—"

The fleeing four armies felt the significantly increased power of the chaos fog, quickly corroding their layers of protection, with invisible assaults added.

"The formation's power has increased."

"It's much stronger."

"Hold steady."

They defended with all their might, but the invisible assaults continuously claimed many members. Almost every breath saw dozens fall.

"How could the formation become so terrifying?" At this moment, they couldn't even muster a mutual destruction stance. Resisting the formation already drained them; any lapse meant instant submersion by the chaos fog.

"Hold, hold on!"

These low-level Primordial Life forms' defense layers constantly showed flaws under the chaos fog's invasion and continuous deaths. Each flaw allowed the fog to penetrate deeper, killing more within the army.

"Quick, rush out!"

The first army, having fled first with all their might, neared the city walls. They made desperate efforts, sustaining casualties every moment, finally breaching Yulan City's perimeter!

Upon breaching, they were overjoyed.

"We survived, we survived."

This army was ecstatic.

At this point, barely over 300 Divine Emperor Perfection Level beings and over 4,000 late-stage Divine Emperors remained, nearly half surviving.

Outside the city, lacking the formation's assistance, Luo Feng dared not face an entire army.

"We were the first to suffer from Luo Feng's onslaught, yet we survived in the end." The first army's members were dazed, seeing the other three armies still suffering casualties through the illusory chaos fog.

But the other three armies still had a considerable distance to the city outskirts.

"They can't escape." The low-level Primordial Life forms quickly calculated.

"Let's go."

There was no hesitation.

The heavily damaged first army quickly fled Yulan City. The remaining second, third, and fourth armies, however, failed to escape.

Chapter 357 - 30 After the Battle

In Yulan City, three low-level Primordial Life armies were already in despair under the formation's cover. They were dying in batches under the invisible Curse Killing. After their protective layers were penetrated by the Chaos Fog, the casualties became even more severe.

"No—"

"Luo Feng Divine Emperor, spare us!"

"We are just trying to survive!"

"Spare us!"

These low-level Primordial Lives, no longer able to threaten, one by one begged for mercy. However, watching this scene, Luo Feng did not show the slightest mercy.

Since the era of the Primordial Cosmos, Luo Feng had experienced numerous wars between races! The enemy's pleas for mercy could not shake him in the slightest.

"You want me to spare you, but who spared the 16 million cultivators who died?"

Luo Feng thought to himself.

Those over 16 million cultivators were slaughtered with no power to resist.

"These Innate Primordial Lives, born to break out of the Braided Cage!" Luo Feng sighed secretly, "Even though they are the weakest 'low-level Primordial Lives,' forming several armies, they can still slaughter cultivators at will."

Cultivators are generally weaker than Innate Primordial Lives!

Even in the Infinite Primordial Space, the Cultivator Camp is weaker than the Innate Primordial Life Camp! Seniors like Senior Yuan and Senior Jin stood at the forefront, shielding the entire Cultivator Camp from the wind and rain.

"No need to think too much. Even I haven't broken out of the Braided Cage yet, so what use is thinking so much?" Luo Feng laughed at himself, flipping his hand to collect all the corpses of the low-level Primordial Life army in front of him.

He is still too weak now.

Any High-Level Primordial Life might be able to seriously pollute him with just one look like the Yuan Xiang Palace Master.

Still too weak!

After Luo Feng collected the corpses left by the three armies, some of the elders were somewhat envious, but none dared to question.

"The City Lord's formation has dramatically increased in power, making it impossible for these low-level Primordial Life armies to escape."

"The City Lord's solo formation setting is several times stronger than what our three hundred plus elders combined could do. Even a thousand elders... probably couldn't match the City Lord!"

The elders were all very aware.

A city like Yulan City, the core formation layer has a maximum of one thousand blank layers, including the City Lord, Hall Masters, and the Elders. So the limit for elder positions is just over nine hundred.

Of course, the resources and benefits of a city cannot attract that many elders. If there were too many elders, the share for each would be too small!

"In the entire Nine Rivers Sacred Realm, thirty-five cities, besides the Yuan Xiang Palace Master, only two others mastered a Half

Primordial Level Path, and they just sent avatars to stay, rarely taking action." Luo Feng collected the many corpses of the three low-level Primordial Life armies and slightly estimated the value, unable to help but marvel, "At this level, they indeed look down on the benefits the City Lord position brings."

The resources allocated to the City Lord of Yulan City were indeed the most.

But does the Yuan Xiang Palace Master care?

At his pinnacle, the Yuan Xiang Palace Master often hunted Super Limit Level and Divine Emperor Perfection Level beings. With the long years of accumulation, his resources were naturally vast, and the wealth far exceeded the Wei Yang Palace Master and Master Gai Tao.

Those at the same level as the Yuan Xiang Palace Master, which one is not extremely wealthy?

Due to the war in Yulan City, Luo Feng harvested a great deal of spoils of war rapidly and became extremely wealthy, quickly realizing that the share of resources from Yulan City was indeed not very tempting.

"In the world of cultivators, the ability to obtain resources is vastly different across levels." Luo Feng also understood the mindset of the Yuan Xiang Palace Master more.

******

The formations in Yulan City all retracted, and the Chaos Fog between heaven and earth also dissipated.

"Is the war over?"

The cultivators in the city were somewhat uneasy. They carefully observed all directions through their cave mansion formations but could no longer see any low-level Primordial Lives.

"It seems to be over."

"There hasn't been any significant commotion in Yulan City either."

Emperor Qing, Emperor Ming, and Di Fu were also observing.

Suddenly—

"All cultivators of Yulan City."

A voice echoed throughout the city, "I am Luo Feng, the new City Lord of Yulan City."

"From now on, all cultivators can freely leave the cave mansions. Yulan City is back to normal, and there is no need to worry about those low-level Primordial Lives anymore."

A few simple sentences echoed in every corner of Yulan City, stirring excitement among the cultivators in the city.

We won!

The war was won!

"Luo Feng? The City Lord of Yulan City?"

"Our Yulan City always had no City Lord before. Now there's a City Lord?"

The cultivators in the city were excited and celebrating, though also quite curious.

As the City Builder, the Yuan Xiang Palace Master never took on the title of 'City Lord' due to severe soul pollution, having long discreetly spread word of wanting to choose a City Lord for Yulan City. This was also the reason for Wei Yang Palace Master's ambitiousness!

"No matter who becomes the City Lord, as long as they can protect Yulan City, they are a good City Lord." Many cultivators came out of their cave mansions.

The sky over Yulan City still had colorful formations providing protection, with light rain falling as if washing away the city's original fear, ferocity, and madness, restoring everything to peace.

"We are still alive."

"The city was broken, but we still won and survived."

Many cultivators felt a sense of emotion.

They all understood that with the city broken, such low casualties were incredibly rare! This new City Lord must be quite extraordinary.

"We don't know yet what strength this City Lord Luo Feng possesses." Many cultivators were curious, not knowing the detailed situation of the war or Luo Feng's strength.

But in a critical moment, taking over as City Lord and protecting the vast majority of cultivators in Yulan City made the cultivators very grateful and supportive of this City Lord.

...

Life in Yulan City began to return to normal, with the Elder Hall overseeing the repairs in areas damaged by the war.

"This war was stirred up by those Super Limit Levels." Luo Feng's strongest avatar had already quietly left the city. Earlier, when the four Super Limit Levels fled, Luo Feng had arranged for his avatar to follow them from afar.

Now it was time to harvest them one by one.

******

In the Elder Hall of Yulan City.

Luo Feng sat in the main seat, with the Yuan Xiang Palace Master sitting beside him. The surrounding elders were all quite excited, very satisfied with the outcome of this battle.

"City Lord."

Suddenly, the Insect Nest Master, in the form of a woman, stepped forward from the crowd of elders.

"Insect Nest Master." Luo Feng looked at her, knowing her information and disliking her.

This kind of Destroyer demon-type was, in Luo Feng's judgment, one of those 'to be killed' categories! Unfortunately, the opponent was a powerhouse from the Source World, so Luo Feng couldn't completely kill her.

"City Lord." The Insect Nest Master smiled slightly, "Earlier, I offended the City Lord! I also know that I, this kind of cultivator... am not liked by the City Lord. I am aware of my situation."

"This war is over, and while defending the city, I gave my all without any slack."

"Now that the work is done! I am willing to offer all my resources in Yulan City to the City Lord. As for myself, I will forever leave the Nine Rivers Sacred Realm!" The Insect Nest Master smiled slightly, and after saying this, her body naturally dissipated.

Her avatars in the Nine Rivers Sacred Realm all self-destructed, taking no treasures or resources.

Luo Feng was slightly surprised to see this scene.

The Insect Nest Master had devoured countless souls, her cultivation path evil and terrifying, and Luo Feng indeed disliked her. But at this moment, the Insect Nest Master had first obediently defended the city, then relinquished all, and finally left the Nine Rivers Sacred Realm completely, surprising Luo Feng with her decisiveness.

"To become such a terrifying demon, she is indeed remarkable." Luo Feng thought.

"City Lord, I too am willing to offer all my resources in Yulan City to the City Lord and, in the future, will forever leave the Nine Rivers Sacred Realm." The Master of the Shadow Tower also stood up and bowed slightly, "It is a fortune for me, Wan Ying, to know the City Lord."

"I too will forever leave the Nine Rivers Sacred Realm." The Master of Deceit Workshop also stood up and bowed slightly, "I believe the City Lord does not wish for raiding forces to continue existing in Yulan City."

The Master of the Shadow Tower and the Master of Deceit Workshop both self-destructed their avatars, choosing to leave the Nine Rivers Sacred Realm forever.

At their level, a simple observation could confirm Luo Feng's way of doing things.

Previously serving as the Heaven Patrol Palace Commander, Luo Feng did not wish to oppress any cultivators and even fully protected as many cultivators as possible while defending the city.

Such a City Lord could not tolerate these raiding forces.

"The other two are fine, but the Master of Deceit Workshop is quite promising." The Yuan Xiang Palace Master watched the scene and said, "A little restraint, and Deceit Workshop's actions will be much more measured."

His character was different from Luo Feng's.

He could tolerate those demons and raiders.

"Cultivators come from different worlds and have different growth environments." Yuan Xiang Palace Master said, "Some worlds force cultivators to become demons! Tolerate different types of cultivators a little."

"After all, such cultivators are plentiful." The Yuan Xiang Palace Master looked at Luo Feng.

Luo Feng smiled, "Plentiful? I cannot manage so many. But in Yulan City, there's no need for raiding and stealing forces."

His capabilities were limited.

But...

He naturally had to manage within his purview!

What should be killed should be killed, and what should be driven away should be driven away!

The original world's environment forced them into becoming demons? But the Nine Rivers Sacred Realm did not force them!

Since Luo Feng decided to be this City Lord, he would not tolerate these forces in his city!

Luo Feng's words made the surrounding elders exchange glances; they all understood that Luo Feng's influence would far exceed the previous three Hall Masters.

Because he alone could destroy all resistance forces in the city!

So when Luo Feng said it, it meant that Yulan City would no longer have any soil for the survival of raiding and stealing forces.

"This City Lord Luo's character is much stronger than the previous three Hall Masters."

"The previous three Hall Masters always needed to consider the elders. But this City Lord Luo, despite seeming to have a good temper, when he decides something... no elder can oppose it."

The elders, from just a few words by Luo Feng, felt that unstoppable will!

"Your ambition is much stronger than mine." The Yuan Xiang Palace Master looked and praised, "However, individual strength is ultimately limited. Even if one breaks out of the Braided Cage, it's difficult to change much."

Luo Feng smiled, saying nothing more.

Individual strength is ultimately limited? That's just because the cultivation isn't strong enough!

"Oh, right." The Yuan Xiang Palace Master suddenly recalled, "I sought aid from the Dark Sacred Realm, and they sent a cultivation team. The team is still on its way; I need to contact them first."

Only a few breaths of time.

"This cultivation team has arrived in the Nine Rivers Sacred Realm."

The Yuan Xiang Palace Master looked up at Luo Feng in surprise, "And they are heading toward Yulan City. They will probably arrive in less than half a day."

Chapter 358 - 31 Cultivator Team

"The emergence of a Super Limit Level Enchanting Heart Worm poses too great of a threat," said Yuan Xiang Palace Master. "The key reason for the fall of Yulan City this time is precisely that Super Limit Level worm."

Luo Feng agreed.

The possibility of the city being breached from the outside was very slim.

Infiltrating from the inside? That would require a Super Limit Level entity capable of stealth! The deaths and escape of Wei Yang Palace Master and Gai Tao Palace Master were consequences of that 'Super Limit Level' Enchanting Heart Worm.

"So this Cultivator Team will still head to Yulan City. Using the causality between us and the Enchanting Heart Worm, they will ascertain its whereabouts," said Yuan Xiang Palace Master. "It must be eliminated as soon as possible."

Luo Feng smiled faintly: "My avatar is already pursuing that Enchanting Heart Worm. It's likely almost done."

Yuan Xiang Palace Master was briefly stunned and then smiled.

Given Luo Feng's ability to suppress a four-on-one fight, chasing down a Super Limit Level Enchanting Heart Worm would indeed not be difficult.

"Even if you kill that Super Limit Level Enchanting Heart Worm, I guess this Cultivator Team will still make a trip to Yulan City," said Yuan Xiang Palace Master.

"Oh?" Luo Feng was somewhat surprised.

"They are probably much more interested in you than in the Enchanting Heart Worm," said Yuan Xiang Palace Master with a slight smile, fully understanding the thoughts of beings at their level.

******

The world was vast.

The Super Limit Level Enchanting Heart Worm became illusory and was fleeing at high speed.

"It's over."

Though the world was vast, there was desperation in the heart of this Super Limit Level Enchanting Heart Worm.

"The sub-worms I dispersed have all been killed by Luo Feng's avatar. He is tracking me from behind, and I can't shake him off." It had no choice. When it came to escape speed, its spiritual body, though fast, could not match Luo Feng, who could teleport short distances through space.

Its sub-worm's strength was instantly wiped out in the face of Luo Feng's avatar. Only the mother worm could withstand Luo Feng's pursuit.

"As soon as he brings the avatar with the Secret Treasure, I'm doomed."

At this moment, it felt utterly powerless.

Despite sensing the enemy following closely behind, it had no way out.

"The surrounding Low Level Primordial Life Army, the few that survived, couldn't stop Luo Feng either."

"I knew there was only one chance to launch a surprise attack. Once it failed, it was over."

"Not good!"

Its heart trembled.

It sensed the 'Luo Feng' behind it accelerating, quickly closing the distance between them.

It stopped fleeing since the speed gap was too significant, and it couldn't escape.

Swoosh!

From a distance, it saw a figure in black with black hair emerge from the rift in the heavens, approaching quickly.

"Super Limit Level Enchanting Heart Worm." Luo Feng looked at it.

"Luo Feng, is this your strongest avatar?" the Enchanting Heart Worm speculated.

Luo Feng nodded.

"Can you spare my life?" The Enchanting Heart Worm looked at Luo Feng. "I was captured and brought to the Nine Rivers Sacred Realm by terrifying beings among you Cultivators. Everything I did was because of their coercion."

Luo Feng looked at it, expressionless, and extended his finger.

Luo Feng's finger caused the heavens to split apart. It pierced through the space, appearing instantly in front of the Enchanting Heart Worm. Luo Feng's index finger turned into a furry claw, instantly penetrating the worm's body, and struck its Life Core.

"Buzz."

As Luo Feng struck, an invisible attack hit his soul, confusing his senses.

"No hesitation at all?" Even in its moment of death, the Enchanting Heart Worm was unwilling. Its plea was meant to waver Luo Feng's resolve, combined with a Secret Technique to affect Luo Feng's

perception.

If Luo Feng had wavered, under the influence of the Secret Technique, he might have genuinely thought, 'This Enchanting Heart Worm is innocent and pitiful; there's no need to kill it.'

The Innate Secret Technique 'Enchanting Heart' could affect one's thoughts to some extent.

But Luo Feng didn't waver in the slightest, giving it no chance.

"Phew." After killing the Enchanting Heart Worm, Luo Feng waved and stored away its corpse.

"Compassion?"

Luo Feng's eyes were cold.

Luo Feng knew very well when to show compassion. Being compassionate to every 'target' during life-and-death battles was incredibly foolish.

Cultivators and Innate Primordial Life were two opposing factions, both seeking the total annihilation of the other.

Some of the terrifying beings among Innate Primordial Life even wanted to devour the Source World! So the two factions were absolutely opposed to each other.

Absolute opposites, two factions that sought to obliterate each other. If there was compassion here, one wouldn't have reached Luo Feng's current level through cultivation.

"Many Cultivators have died at the hands of the Enchanting Heart Worm." After storing the worm's corpse, Luo Feng discovered the many Spoils of War it carried, likely from Wei Yang Palace Master and some Elders.

"With the Enchanting Heart Worm dealt with, the other three will be easier." Luo Feng turned to look in three other directions.

He had also sent avatars to track the three remaining Super Limit

Levels.

...

The vast Endless Blood Sea enveloped the expansive land, as well as the black, serpentine mountain-like creature within.

"Luo Feng, I pose no threat to you anymore, why not spare me a shred of Vitality?" The black serpentine mountain creature roared, struggling, but its resistance weakened under the suppression of the Blood Sea formation.

"Actions have consequences!" After many attempts, the giant claw within the Blood Sea finally found and shattered its Life Core within the enormous body.

This colossal mountain-like being had the strongest physical body among the four Super Limit Levels.

...

"Die——"

Amidst the Blood Sea, a massive lightning burst forth, its force shaking the heavens and even breaking through the Blood Sea, exploding completely.

The Blood Sea condensed into Luo Feng's figure.

"Dead?" Luo Feng was puzzled. The Biomimetic Destruction Eye on his forehead opened, carefully observing all traces of causality. The causality between himself and this Thunderbolt Tentacle Creature became extremely weak, but it still existed.

"A trace of causality remains."

"It hasn't completely perished."

"Its current position, I faintly feel, is very far away. It fluctuates and is impossible to pinpoint precisely." Luo Feng was astonished.

The distance seemed as far as the edge of the sky!

And there were multiple layers of concealment, making the remaining thread of the causality line blurry and unattainable.

"This Thunderbolt Tentacle Creature likely had a fallback plan before the war," Luo Feng thought. "Now, activating that plan, this kind of life-saving measure, I wonder which race it belongs to."

From Divine Emperor Perfection Level to Super Limit Level.

Some Low Level Primordial Lives' life forms change during breakthrough and gain Talent Abilities that the Leader Level lacks! Making it hard for Cultivators to identify their original race.

"Forget it." Luo Feng gave up.

The Nine Rivers Sacred Realm has several Super Limit Levels. Since it's impossible to track, Luo Feng didn't dwell on it.

"Leave it to future Cultivators to handle." Luo Feng continued his pursuit of the final Bird of Destruction.

...

The Bird of Destruction could transform into an endless aura of destruction. But all its aura was suppressed into the Blood Sea Eye within the Endless Blood Sea!

The Blood Sea Eye, residing within Luo Feng's Secret Treasure 'Undying Heart,' trapped the Bird of Destruction within, rendering it inescapable.

"Something is odd."

Luo Feng looked into the Undying Heart, observing the boundless aura of destruction within the Blood Sea Eye.

"A Super Limit Level being has completely turned into a mass of aura."

"Its body was the hardest to annihilate, enduring dozens of my claws and still remaining strong." Luo Feng could wipe out the Bird of Destruction with hundreds of claws, but he wasn't in a hurry.

"Its talent in the Destruction Path is interesting."

Luo Feng, in human form, temporarily suppressed the Bird of Destruction within the Undying Heart's Blood Sea Eye.

"I'll study its Destruction Path first. After that, I'll destroy it." Luo Feng thought. He had already reached the late stage of Divine Emperor Life and Death Dao. Naturally, he would begin attempting to reach the 'Half Primordial Level' in Life and Destruction Paths.

This Bird of Destruction was valuable for comprehension.

Swoosh!

Luo Feng began his journey back.

The battle at Yulan City involved five Super Limit Levels; one killed inside the city, three outside the city. The Thunderbolt Tentacle Creature might still be alive.

******

A large, ancient ship flew through the vastness of the Nine Rivers Sacred Realm, moving at great speed.

Inside the ship.

Three figures sat together, chatting leisurely.

"Latest news." A winged woman with pristine white wings sat there, smiling. "Yuan Xiang said the new City Lord of Yulan City, Luo Feng, has killed that Super Limit Level Enchanting Heart Worm."

"Looks like our mission is complete," an elder flipping through a book before him said with a smile. "Even though we didn't act, since we took the mission and the Super Limit Level Enchanting Heart Worm died within three days, we still get half the Battle Merit."

Regardless of the reason, if the target died within three days, their team would receive at least some merit.

If the target died after three days and wasn't their doing, they would

get no merit.

"This Luo Feng is quite formidable, making a critical breakthrough, saving the city from its downfall," remarked a young man in a red robe. "I heard he was able to hold his own against four Super Limit Levels. His strength surpasses mine!"

"I couldn't do that. Battling four Super Limit Levels, I could at most maintain a balance," the elder said.

"Very impressive," the winged woman exclaimed in admiration. "He just broke through and is already this strong. He hasn't even been to the Dark Sacred Realm yet."

"Without training in the Dark Sacred Realm and without reaping the benefits of its unique resources, he's already this powerful," the elder said in awe. "If he goes to the Dark Sacred Realm, he might reach the Invincible Level."

"Every Invincible Level being gets taken in by Senior Yuan and the others," the young man in the red robe said enviously.

"It's said that after being guided at the Invincible Level, they often break free from the Braided Cage. That's another realm of existence." The elder also showed envy.

They were beings who had mastered two Half Primordial Level Paths, their cultivation extremely advanced, yet they couldn't claim invincibility and didn't qualify for guidance from Senior Yuan and the others.

"Are you returning?" The winged woman smiled. "I plan to go to Yulan City to meet this Luo Feng. If he becomes invincible, there might not be an opportunity to meet him."

"Not having visited the Dark Sacred Realm yet being this strong, he's worth meeting," both the elder and the young man in a red robe nodded.

They were willing to befriend someone who might break free from the Braided Cage.

Chapter 359 - 32 Dark Sacred Realm

This ancient ship flew for half a day and finally saw Yulan City from afar.

"What a city of cultivation." The elder looked at Yulan City. In his observation, the colorful formations of Yulan City were almost all transparent to him, except for the inconspicuous Chaos One-color Array which made him feel a sense of oppression. "No wonder Brother Luo Feng can turn the tide; just looking at this formation, one can see his uniqueness."

The winged woman and the red-robed youth also noticed the Chaos One-color Array and felt threatened.

"Let's go in and take a look."

The elder said.

The three of them retrieved their ship and entered through the city gate. The guards at the gate did not notice them at all, not even the formations of Yulan City detected them.

"Having just gone through a war, Yulan City has returned to normal so quickly."

"This also shows that Yulan City's losses were not significant." The three of them flew through the city, observing with interest.

Suddenly—

Two figures emerged from the blurred gap between heaven and earth, appearing in front. One was the Yuan Xiang Palace Master, and the other was naturally Luo Feng.

"Brother Bo Xiu, you arrived without a word, so we could have greeted you." Yuan Xiang Palace Master smiled and said.

"Yuan Xiang."

The elder also smiled brightly, happy to see an old friend. His gaze also fell on the black-clothed, black-haired man beside Yuan Xiang Palace Master. Luo Feng's aura now was even more profound and unfathomable, with every thread of aura containing the realm of the Life and Death Dao.

Cultivation is like this; the deeper one's attainment, the more one's presence contains the charm of the path practiced.

Even one's own image contains the mysteries of the Dao.

"Brother Luo Feng." Yuan Xiang Palace Master smiled and said, "Let me introduce, this is Brother Bo Xiu, a cultivator of the True Witch Lineage. In terms of strength, he surpasses even my pinnacle and can be considered half my teacher."

"Yuan Xiang, we learn from each other." The elder said with a smile. When they teamed up for training, they naturally exchanged insights to improve their own cultivation systems.

"This is the Divine Emperor Bai Yin." Yuan Xiang Palace Master introduced again.

The winged woman nodded at Luo Feng with a smile. If in the Dark Sacred Realm, this scene would be enough to astonish many cultivators. Bai Yin Divine Emperor was notoriously cold and proud, with few cultivators in the Dark Sacred Realm capable of making her smile.

Apart from a few close friends, she generally ignored those of the same level.

"This is the Chi Zhen Divine Emperor." Yuan Xiang Palace Master smiled and said, "In terms of close combat, Chi Zhen can kill a super limit level low-level Primordial Life with barehanded strength."

The red-robed youth smiled and said, "I can't single-handedly defeat

four super limit levels."

All three of them respected Luo Feng greatly.

"Pleased to meet the three of you." Luo Feng was also polite, "Since you have come from afar, shall we first go to the Elder Hall?"

"Please." The elder and the other two were more than happy.

Soon, under the guidance of Luo Feng and Yuan Xiang Palace Master, these three cultivators arrived at the Elder Hall.

As the core of the entire Yulan City, welcoming guests here was considered the greatest respect.

"I heard that Brother Luo Feng already killed that Enchanting Heart Worm?" The elder said after sitting down, "After all, since we took on the mission, we hope to first confirm the corpse of that Enchanting Heart Worm."

Luo Feng nodded, with a flip of his hand, the corpse of the Enchanting Heart Worm floated aside.

The elder, the winged woman, and the red-robed youth carefully observed. They quickly saw through the ins and outs of the corpse, saw the cracked Life Core, and confirmed the mission's completion simultaneously.

"Brother Luo Feng, put away the corpse." The elder smiled and said, "We easily earned half of the battle merit this time."

"With the cunning of the Enchanting Heart Worm, by the time we arrived, its progeny would have scattered across many dangerous places in the Nine Rivers Sacred Realm. Tracking them down wouldn't be easy." The red-robed youth also said.

Luo Feng was swift in his kill; dragging it out would have been troublesome.

"Brother Luo Feng obtained numerous low-level Primordial Life corpses this time." The elder said, "In the Nine Rivers Sacred Realm, no one could purchase so many low-level Primordial Life corpses."

"In Yulan City, forces capable of purchasing even one super limit level corpse are rare." Yuan Xiang Palace Master nodded in agreement.

A super limit level corpse has many uses, and even a bit of flesh is very expensive. The whole corpse is valued at approximately ten billion Primordial Crystals. Forces able to purchase it are extremely rare.

"But in the Dark Sacred Realm, even if Brother Luo Feng's spoils of war increased tenfold, there are many forces capable of purchasing them." The red-robed youth laughed, "Moreover, in the Dark Sacred Realm, you can buy resources most suitable for yourself."

Luo Feng acknowledged.

This time, his spoils of war were indeed enormous, considered a vast fortune. In the Nine Rivers Sacred Realm, the resources he could buy were indeed very limited.

Precious secret treasures suitable for himself so far were just the Undying Heart and Palm World. He couldn't purchase anything else.

"I heard there's a large Primordial Hall in the Dark Sacred Realm?" Luo Feng inquired.

"Indeed." The winged woman, Bai Yin, also replied, "The large Primordial Hall in the Dark Sacred Realm is even bigger than Yulan City. Inside the hall, wonders abound! There are vast amounts of high-level Primordial Life corpses, including seven whole World Level Primordial Life corpses. Many living high-level Primordial Lives are also imprisoned in the Primordial Hall."

"We can observe those imprisoned high-level Primordial Lives up close."

"Moreover, if you have enough battle merit, you can exchange for a Primordial prisoner — a high-level Primordial Life whose powers have been completely sealed," the winged woman explained.

"Their powers must be completely sealed; otherwise, they could easily endanger cultivators," the elder said. "I've always wanted to

exchange for a Primordial prisoner for research, but unfortunately, it's too expensive."

The winged woman said, "Various complete bloodlines in the Primordial Hall are countless, and even Superlimit Level bloodlines are insignificant in the Primordial Hall! Anyone with ambition usually exchanges for 'high-level Primordial Life Bloodlines', and there are even those who exchange for 'World-Level Primordial Bloodlines'. In the Dark Sacred Realm, we know of two who have successfully exchanged for World-Level Primordial Bloodlines."

"Countless bloodlines, various secret treasures, diverse inheritances, numerous cultivation opportunities... everything can be exchanged."

"In the Primordial Hall, battle merit can exchange for everything! Primordial Crystals can only purchase a select few items."

Luo Feng listened, filled with longing.

His path of cultivation involves the study of various bloodlines.

Only in the Dark Sacred Realm could he collect sufficient Superlimit Level bloodlines, and perhaps even higher-level bloodlines.

"Brother Luo Feng, with your strength, you can now venture to the Dark Sacred Realm," the elder suggested. "This Nine Rivers Sacred Realm poses no threat to you anymore. But in the Dark Sacred Realm, it's much more perilous, and resources are far more abundant. With your current strength, once you go to the Dark Sacred Realm, you may advance even further, reaching the Invincible Level."

"Invincible?" Luo Feng asked, "I've heard that in the Dark Sacred Realm, beings of the Invincible Level are almost unseen?"

"They have been taken away."

The red-robed youth said enviously, "Once you reach the Invincible Level, Senior Yuan and others will appear and take them away."

"Anyone taken away has likely managed to break free from the Braided Cage," the winged woman added longingly.

"Breaking free from the Braided Cage." Luo Feng listened in breathless anticipation.

Of course, he aspired to that.

Without breaking through the shackles and escaping the Braided Cage, one must live trapped within the Source World, myriad worlds, and other such realms. Only by breaking free from the Braided Cage, undergoing a transformation in the essence of life, could one truly roam the vast Infinite Primordial Space.

"What exactly is this Invincible Level?" Luo Feng asked.

The elder and his three companions, along with Yuan Xiang Palace Master, hesitated before answering the question.

"Mastering two and a half Half Primordial Paths is considered the pinnacle level in the Dark Sacred Realm," the elder began. "If one's strength can surpass the peak level by a large margin, then they can be deemed invincible."

"Achieving invincibility is exceedingly challenging," remarked the winged woman. "Even those of exceptionally high talent mastering three and a half Half Primordial Paths often find it hard to achieve a qualitative change in power, which falls short of invincible. There are also those who've exchanged World-Level Primordial Bloodlines, exploring deeper bloodline powers. Yet, claiming to reach the Invincible Level remains uncertain."

Then, Yuan Xiang Palace Master added, "Luo Feng, in the Dark Sacred Realm, the two Enlightened ones who have exchanged World-Level Primordial Bloodlines are 'Divine Emperor Ji Ke', whose power only slightly surpasses ours, and a senior named 'Mo Jia,' who further explored deeper bloodline powers and was taken away by Senior Yuan and others. It is said that he has now broken free from the Braided Cage."

"There are three recognized paths to achieving the Invincible Level."

The elder elaborated, "The first is having one's spiritual will break free from the Braided Cage! With sheer terrifying willpower, they can

sweep through all challenges. Before them, we would be utterly powerless."

"The second involves progressing further with bloodline power."

"The third is fusing the two kinds of Half Primordial Level Paths that we dual practice! This too can lead to a qualitative change."

"These three paths become increasingly difficult as you go," the red-robed youth explained.

He continued, "Throughout the history of the Dark Sacred Realm, those who achieved invincibility usually did so through the liberation of their spiritual will from the Braided Cage. We know of only one who relied on bloodline power. As for the third? We haven't heard of it happening in the Dark Sacred Realm."

"In other world clusters, there should be instances," the winged woman commented, "It's a method clearly recorded in the Primordial Hall and is considered the hardest yet highest potential path for the Enlightened."

The elder nodded, "The deeper the foundational understanding of the Great Dao, the higher the potential. This third path is a journey of solid grounding."

"Thank you all for your insights." Luo Feng gained considerable knowledge.

These four before him, all pinnacles within the Dark Sacred Realm, were vastly knowledgeable, providing Luo Feng with deeper insights into the path ahead.

His Life and Death Dao had already reached the late stage of the Divine Emperor, showcasing skills superior to those who mastered two and a half Half Primordial Paths, yet still within the same major category of strength.

If the Life and Death Dao reached the Half Primordial Level, that would constitute a qualitative change, considered invincible.

"Brother Luo Feng, we've completed our task and will remain in

Yulan City for a few days before returning," the elder offered, "Would you like to return with us? We can also introduce you to some fellow travelers."

"No need,"

Luo Feng shook his head, "I just recently broke through and need to enter closed-door cultivation for some time before heading to the Dark Sacred Realm."

The Hundred Tribulations Heart Essence had been consumed for less than a day. Once its effects wore off and his strength was fully consolidated, it would be time to explore the Dark Sacred Realm.

Chapter 360 33 Quietly Departing

The Cultivator Team stayed in Yulan City for two days and also discussed the dao with Luo Feng and the Yuan Xiang Palace Master! At their level, making even a slight improvement is very difficult. Therefore, they often engage in discussions with others of the same level to enhance their friendship.

Outside the city.

Luo Feng and the Yuan Xiang Palace Master saw off this Cultivator Team.

"These two days of gathering, we have thoroughly enjoyed ourselves," Bai Yin Divine Emperor, the winged woman, who became talkative after getting acquainted, smiled and said, "We will return to the Dark Sacred Realm first, Brother Luo Feng, we look forward to seeing you again in the Dark Sacred Realm."

"When you reach Chengfeng City, be sure to contact us." Luo Feng said with a smile.

There are a total of five cities in the Dark Sacred Realm, and Bai Yin Divine Emperor's cultivator team resides long-term in 'Chengfeng City'.

"We're leaving."

The elder and the red-robed young man also nodded slightly to Luo Feng and the Yuan Xiang Palace Master.

All three of them boarded the ship, and under the watchful eyes of Luo Feng and the Yuan Xiang Palace Master, this ancient ship quickly disappeared beyond the horizon.

"The three of them have left," Yuan Xiang Palace Master looked into the distance with a slight smile, "Luo Feng, I should also take my leave."

Luo Feng was startled.

"It was agreed that I would leave after the battle of Yulan City. But I stayed two more days with three old friends." Yuan Xiang Palace Master looked at Luo Feng, "I'm very relieved to leave Yulan City in your hands."

"As for me, I will disperse all my avatars in the outside world. I will focus all my efforts in my hometown to fight against the pollution. Either suppress the pollution or completely succumb to it," said the Yuan Xiang Palace Master.

At this moment, Luo Feng's emotions were complex.

Yuan Xiang Palace Master, having reached this point, is already in great danger. Once fallen, his soul will be annihilated.

The billions of worlds were created by Senior Yuan and other beings of the same level! While the strong ones born from these billions of worlds don't have the Clone Technique, if they can persuade the world creators to intervene, they still have hope for resurrection.

This information has long spread among the cultivators in the Nine Rivers Sacred Realm.

Many cultivators in these billions of worlds have regrets and wish to resurrect their dearest loves. Senior Yuan, Senior Jin, and some others had promised long ago that if one escapes the Braided Cage, they could have a chance for resurrection.

But the Source World is different!

The Source World is protected by Supreme Rules and possesses the Clone Technique. Yet, likewise, the Supreme Rules also block outside force. Once a strong person inside the Source World dies, even Senior Yuan cannot resurrect them.

Yuan Xiang Palace Master is a strong person who walked out of the

Source World. If he dies, then he is truly dead. Even Senior Yuan and others are helpless.

"Even if I die, there's no need to be sad," Yuan Xiang Palace Master laughed heartily, "The path of cultivation is filled with countless obstacles and dangers. Having reached this point, I am among the pinnacle level existences in the Dark World. If I die, there's nothing to regret."

"Brother Yuan Xiang," Luo Feng solemnly advised, "On your cultivation path, you have defeated many great enemies. You will surely be able to defeat the 'high-level Primordial Pollution' as well."

Yuan Xiang Palace Master nodded, "I will defeat it, well then, let's part ways here."

With that, the figure of Yuan Xiang Palace Master dissipated.

Luo Feng silently watched this scene.

He knew...

Unless Yuan Xiang Palace Master thoroughly suppresses the pollution, it might be challenging to meet again.

******

As time passed, the avatars of the Elders who died in the battle of Yulan City returned one by one to Yulan City.

Elder Hall.

Seven Elders were summoned to meet Luo Feng.

"City Lord." The seven Elders were quite respectful, feeling a bit nervous and expectant because, among all the elders in the city, only these seven were summoned, leading them to guess the possibility.

"In the battle of Yulan City, all seven of you were attacked by the super-limit level Enchanting Heart Worms." Luo Feng smiled and waved his hand, and seven Secret Treasures appeared in mid-air, "These seven Secret Treasures are yours, right? Take them!"

In the city, there were not many elders carrying powerful Secret Treasures. The elders who lost their treasures in this war were precisely these seven.

"Thank you, City Lord." The seven Elders were overjoyed and excited. They guessed the possibility but didn't expect the City Lord to return them without any conditions.

It is known...

According to the general rules of cultivators, the spoils gained from normal fighting and killing generally belong to oneself.

"You were also fighting for Yulan City." Luo Feng smiled slightly. These seven, carrying important Secret Treasures, were all trying to root their forces well in Yulan City.

These seven Elders felt increasingly that having such a City Lord would make life much easier in the future.

Back when Wei Yang Palace Master's influence covered the entire city, he would take a hefty chunk of many benefits! If such precious Secret Treasures fell into Wei Yang Palace Master's hands, he would never return them.

"City Lord, recently, Wei Yang Palace Master has been secretly transferring some resources away from the city."

"He dared not come himself and asked other elders to help carry the resources away," several elders said.

"I know," Luo Feng said.

With his control over Yulan City, those actions of Wei Yang Palace Master could not escape his notice.

"He is transferring resources, probably to leave voluntarily," Luo Feng said, "No need to pay much mind."

"Yes." The seven Elders respectfully responded.

...

Only five days later.

The avatar of Wei Yang Palace Master unexpectedly arrived in Yulan City, personally visiting Luo Feng.

"Wei Yang Palace Master, the City Lord has agreed to see you. Please." In front of the Elder Hall, a guard led the way.

Wei Yang Palace Master could only follow.

Walking through this familiar Elder Hall, he once thought he would completely dominate the Elder Hall and become the master of the entire Yulan City! Who knew Luo Feng would rise so swiftly and terrifyingly powerful!

With his own strength, suppressing four super-limit levels?

Using the formation, only one-tenth of the massive low-level Primordial Life army entering the city managed to narrowly escape?

"Even if I carry the Secret Treasure, I'm afraid I won't withstand a single move from him," the Wei Yang Palace Master sighed inwardly. "The power he displayed is more terrifying than the Yuan Xiang Palace Master at his pinnacle."

Soon, under the guidance, the Wei Yang Palace Master saw Luo Feng sitting in the garden from a distance.

"Wei Yang, have met the City Lord," the Wei Yang Palace Master slightly bowed in salute.

Luo Feng looked at the Wei Yang Palace Master with interest.

"You actually came to see me?" Luo Feng looked at him, "Are you still planning to stay in Yulan City?"

"With the City Lord here, Yulan City is incredibly stable, naturally, it doesn't need me," the Wei Yang Palace Master respectfully replied, "I have decided to completely withdraw from Yulan City. I came this time with a request."

"Oh? What is it?" Luo Feng looked at him.

"When I was garrisoning Yulan City before, my avatar died at the hands of that Super Limit Level Enchanting Heart Worm, and I lost two important Secret Treasures," the Wei Yang Palace Master pleaded, "I humbly ask the City Lord to return them. Whatever price I need to pay, the City Lord can just say."

Luo Feng looked at him and couldn't help but laugh.

"You actually have the face to ask me to return your Secret Treasures?" Luo Feng couldn't help shaking his head.

Back then, he forced me to resign from the position of Commander of the Heavenly Patrol Palace! I didn't agree, and the Wei Yang Palace Master even acted impulsively!

With such a conflict present, the Wei Yang Palace Master still dared to show up, dare to ask me, Luo Feng was very surprised.

"I know I have offended the City Lord," the Wei Yang Palace Master said, "but you know how important powerful Secret Treasures suitable for oneself are! Whatever price is required, the City Lord can just say!"

Luo Feng looked at him and said, "I'll give you two choices."

The Wei Yang Palace Master was overjoyed in his heart, Luo Feng's temper was actually this good. Previously hearing that the seven elders all got their lost important Secret Treasures back, he began to have hope.

"What are the two choices?" the Wei Yang Palace Master asked eagerly, as long as he could regain the two lost Secret Treasures, he was willing to pay a little more.

"First, you obliterate your own avatar. Second, I will do it for you," Luo Feng looked at him, "You choose!"

The Wei Yang Palace Master's face changed.

He sensed the coldness in Luo Feng's eyes at this moment.

"I am willing to obliterate myself," the Wei Yang Palace Master still

respectfully saluted, and then without a sound, his avatar was obliterated and dissipated.

Luo Feng coldly watched this scene.

His compassion was also selective. The Wei Yang Palace Master clearly did not deserve it!

The positions of Wei Yang Palace Master and Master Gai Tao in the core formation layer of Yulan City had long been erased by Luo Feng, depriving them of their positions as Palace Masters.

...

Time passed.

The elders of Yulan City gradually became familiar with Luo Feng's temper. Luo Feng, besides the portion entitled as the City Lord, wasn't interested in competing for other resources within the city, which also made more strong individuals willing to take root in Yulan City.

At both the elder level and palace master level, there were relocations coming one after another.

Many ordinary cultivators were also moving here!

No way, a city that can be termed as 'absolutely safe,' with a City Lord who disdains to fight for resources yet protects the middle and lower levels of the weak! This kind of city naturally had great appeal within the thirty-five cities of Yulan City.

"The number of cultivators in Yulan City is increasing," Emperor Qing, Emperor Ming, and Di Fu gazed down at the entire city from the high point of the Elder Hall. As Luo Feng's confidants, they were responsible for some of the City Lord's trivial matters.

"Encountering such a benevolent City Lord is also the fortune of many cultivators," Emperor Ming said, "In this world of cultivators, most still follow the law of the jungle."

Di Fu nodded, "Survival of the fittest is the norm. The City Lord has

changed the order of Yulan City with his individual might."

Originally, without the Insect Nest, Deceit Workshop, and Shadow Tower, other forces would also steal and loot.

But Luo Feng's strength was too strong! With the formation, he could encompass the entire city with a single thought, capable of destroying any force.

So when he 'casts law with words,' saying no thieving or looting forces may exist, no such forces would appear in the city.

"The City Lord is appearing less and less," Emperor Qing turned to look at the cave mansion next to the Elder Hall, which was Luo Feng's current cave mansion.

"Just like the Ancestors of the two countries rarely appear on the Land of Origin," Di Fu mused, "The City Lord doesn't appear much in Yulan City either. Perhaps, his main focus is already in other worlds."

Emperor Qing and Emperor Ming were shocked.

Luo Feng had indeed likely gone to the Dark Sacred Realm.

...

In fact, Luo Feng had been in closed-door cultivation for the better part of an epoch, only coming out when the effects of the 'Hundred Tribulations Heart Essence' had completely dissipated! Cultivating for half an epoch under the effects of the Hundred Tribulations Heart Essence had greatly aided Luo Feng.

After coming out of closed-door cultivation, Luo Feng first erased the original formations on the core formation layer of Yulan City and then engraved a far more powerful formation after careful consideration. After leaving an ordinary avatar in Yulan City, he quietly departed.

An ordinary avatar, commanding a terrifying formation within the city, would exert even more deterrent power than during the battle of Yulan City!

Luo Feng was walking alone on the land of the Nine Rivers Sacred Realm.

He also walked along the 'Nine Rivers' once, took a good look at it, and during the journey encountered low-level Primordial Lives that had no sense attacking him, these low-level Primordial Lives then became corpses stored in Luo Feng's collection of treasures.

After walking through the Nine Rivers, Luo Feng arrived at the center of the Nine Rivers Sacred Realm—Holy Mountain.

"Time to go to the Dark Sacred Realm."

This time, Luo Feng did not go to the teleportation dark lake at the foot of the mountain but instead walked up the mountain path towards the summit.

The invisible pressure of the mountain path grew increasingly terrifying, but for Luo Feng, who had completely perfected the 'Undying Blood Sea Body,' it was as comfortable as a gentle breeze, and he reached the summit. At the summit, there was also a dark pool.

Luo Feng's thread of thought penetrated the dark pool, immediately sensing that this teleportation pool led to another distant world.

"Let's take a look." Luo Feng stepped into the dark pool and vanished, the light swirling as he was already being teleported.

(End of this volume)

Author will take a break tomorrow, the next update will begin the day after.

Chapter 361 - 1 Bottleneck

A drop of water enveloped Luo Feng, traveling at high speed through the Primordial Space.

"Every time I observe the Primordial Space, I feel shocked." Luo Feng watched the outside, being able to see from afar a vast Source World. In the blink of an eye, the droplet had already left that Source World behind.

"We beings within the Braided Cage must have the protection of a world. Either we live in the Source World, or in the world created by Senior Yuan and others." Luo Feng thought, "If we are outside a world, it won't take long before we perish."

The Primordial Space is infinitely vast, containing endless violent Primordial Force. This force is not like the refined and gentle force of a 'Primordial Crystal', it constantly erodes life.

Only by leaping out of the Braided Cage can one survive long-term in the Primordial Space.

"Even what I observed of the Primordial Space is not even a ten-thousandth of the real Primordial Space." Luo Feng, in his hometown, the Land of Origin, had also carefully observed the Primordial Space using the Eye of Life and Death.

Under the observation of the Eye of Life and Death, the Primordial Space is magnificent and colorful. Layers of space are breathtaking, with energy passing through countless layers of space, generating more types of energy and evolving various creatures.

Without the Eye of Life and Death, at this moment, Luo Feng observed only darkness in the Primordial Space and occasionally large entities.

"Hmm?"

Luo Feng saw a whirlpool of mist, roughly the size of one-tenth of the Land of Origin. From the whirlpool extended a misty head, gazing distantly in Luo Feng's direction.

"From the size, it should be a High Level Primordial Life," Luo Feng guessed.

During transmission, one occasionally encounters a High Level Primordial Life.

Encountering a World Level Primordial Life is extremely rare.

Of course, for those like Luo Feng who haven't leaped out of the Braided Cage, judging strength is simple—look at size!

In legend, those slightly smaller than an entire Source World are at the Primordial Ancestor level, the most terrifying existence.

Those larger than the Land of Origin are estimated to be World Level Primordial Life.

Comparable to a small part of the Land of Origin is generally High Level Primordial Life.

Of course, this judgment might have errors! After all, some powerful beings might deliberately shrink their size. But for those like Luo Feng who haven't escaped the Braided Cage, the ability to discern is limited.

"The Dark Sacred Realm is here!"

The droplet surrounding Luo Feng shot straight towards a special world.

This world, entirely black, shimmered with a hint of dark red. It was much smaller than a Source World.

"Swish."

The droplet instantly entered the interior of the Dark Sacred Realm.

...

The Dark Sacred Realm, at the top of the towering Holy Mountain.

At the peak was a dark lake, from which Luo Feng flew out and landed beside it.

"Dark Sacred Realm?"

Luo Feng felt the suppressive force of the entire world. The suppressive power was comparable to the Nine Rivers Sacred Realm, and his Late Stage Divine Emperor 'Life and Death Dao' could remain stable in the Dark Sacred Realm without modification.

"My Life and Death Dao already gradually traverses all worlds," Luo Feng thought.

"Friend, a Flying Boat will arrive shortly to take us to the five cities of the Dark Sacred Realm." A cultivator nearby said with a smile. The Dark Sacred Realm is more dangerous, and few cultivators dare to act alone, generally opting to ride the official Flying Boat.

Luo Feng looked over and saw more than fifty cultivators gathered, with varied auras, but at least of Late Stage Divine Emperor The Enlightened level.

"Thank you." Luo Feng responded with a smile.

Then he directly broke through the void and flew away.

Swish!

The figure of Luo Feng flying away blurred, then flew to the horizon, eventually disappearing completely.

This scene left the fifty-plus cultivators shocked.

"In the Dark Sacred Realm, to shuttle through the void over short distances?"

"This, isn't it something only a Pinnacle level existence can achieve?"

"At the Pinnacle level, only some can do it!"

Some cultivators were visiting the Dark Sacred Realm for the first time, while others had been there multiple times, but all were aware of the difficulty of 'short-distance space travel in the Dark Sacred Realm'.

To achieve this step, without a doubt is among the most terrifying existences in the Dark Sacred Realm.

"Black clothes, black hair, his appearance… Among the Pinnacle level in the Dark Sacred Realm, I've collected intelligence on all the ones with a bit of fame, but this one isn't in my intelligence." An old man said in confusion.

"I don't recognize him either. Of the five cities in the Dark Sacred Realm, I've never heard of this Pinnacle existence." Other cultivators were also puzzled.

In the Dark Sacred Realm, there are only five gathering cities of cultivators altogether.

In each of these gathering cities, the Pinnacle level generally has great fame. Collecting basic intelligence on them is relatively easy.

...

Luo Feng had already obtained detailed intelligence on the Dark Sacred Realm from Yuan Xiang Palace Master and the cultivator team. After leaving the Transmission Holy Mountain, he directly headed to the gathering city 'Chengfeng City' where the cultivator team was located.

Chengfeng City is the city closest to the Transmission Holy Mountain among the five cities of the Dark Sacred Realm! This was also the reason Yuan Xiang Palace Master sought their aid initially.

"Phew."

Luo Feng landed.

Although he chose 'Chengfeng City' as the first city to anchor himself,

Luo Feng was not in a hurry to proceed; he was filled with curiosity about the entire Dark Sacred Realm.

"The number and quality of Low Level Primordial Life in the Dark Sacred Realm far exceed those in the Nine Rivers Sacred Realm." Luo Feng was somewhat expectant, "Even heard that occasionally Primordial Prisoners appear."

Primordial Prisoners are High Level Primordial Life with sealed power.

Apart from being imprisoned in large-scale Primordial Halls, a few Primordial Prisoners can also be found in the wild! Their powers are completely suppressed, each discovery of a Primordial Prisoner attracts cultivators to form teams to hunt them down.

"In the Dark Sacred Realm, acting alone at the Peak Level is quite dangerous."

"But for me, the threat is rather nominal."

Luo Feng walked on the ground.

The Biomimetic Destruction Eye on his forehead also observed in all directions.

Having taken the 'Hundred Tribulations Heart Essence', with a thinking speed boosted by three thousand times, and in a constantly inspired state, it lasted for most of an era. Such cultivation efficiency is stronger than Luo Feng's normal couple of millennia of practice.

Thus, during the previous retreat, Luo Feng's Life Path and Destruction Path encountered some obstacles, yet still reached the 'Half Primordial Level'.

However, improving the 'Life and Death Dao' became difficult.

Luo Feng slowly progressed from the 'Late Divine Emperor Life and Death Path,' absorbing the nourishment of life and destruction, starting smoothly but gradually becoming harder until he was stuck in a bottleneck there.

Stuck in a bottleneck, unable to move forward! Only then did Luo Feng shift to perfecting the 'Undying Blood Sea Body', 'Biomimetic Destruction Eye', and other Secret Techniques.

"I am still some distance from reaching the Half Primordial Level in Life and Death Dao, just stuck in a bottleneck." Luo Feng also feels the challenges other cultivators encounter, when hitting a wall in understanding, unable to progress.

Nonetheless, compared to the battle in Yulan City, Luo Feng's accumulation in 'Life and Death Dao' is deeper. Moreover, the Half Primordial Level Life and Destruction Paths contribute to it, naturally elevating his realm much. The powers of various Secret Techniques have significantly increased.

"Hmm? I've discovered a Primordial Life team." Luo Feng's Biomimetic Destruction Eye can now see farther, and he spotted a team in the distance.

It was a team of the Primordial Wild Hoof Clan.

"In the Nine Rivers Sacred Realm, Primordial Wild Hoof usually act alone, rarely together in groups of three to five. But here, there's a team of 82 Primordial Wild Hoof acting together?" Luo Feng gazed, "Among them, seven are at Divine Emperor Perfection Level, seventy-five at Late Stage Divine Emperor Level?"

A team like this, if it encountered Wei Yang Palace Master strength, likely wouldn't last a single exchange.

Luo Feng interestedly walked over.

With a step, he traveled through a space fissure and arrived nearby.

"Hmm?"

82 Primordial Wild Hoof noticed Luo Feng almost simultaneously.

"A lone cultivator?"

"Kill."

"Kill him!"

These Primordial Wild Hoofs didn't hesitate, in the Dark Sacred Realm's environment, Low Level Primordial Life and cultivators have fought endlessly; killing has long become instinct.

"Boom~~~~" As the Primordial Wild Hoof Clan moved, countless blue thunders condensed in the Void, like water, pouring from heaven, and struck down toward Luo Feng like watery thunder.

Luo Feng stood still, letting the thunder strike; yet, these watery thunders couldn't touch a strand of his hair, blocked by an invisible force.

The speed of the Primordial Wild Hoof Clan was initially very fast, attacking Luo Feng in unison. But upon noticing their released thunder couldn't hurt a single strand of Luo Feng's hair, this scene made them all tremble, and every Primordial Wild Hoof began slowing down, preparing to escape without hesitation.

"Since we've met, don't leave." Luo Feng reached out his hand.

His palm turned into a large furry claw, which instantly pierced the Void, covering a vast area ahead.

The space of heaven and earth was divided, trapping the Primordial Wild Hoof team in that isolated space.

"Phew."

Luo Feng withdrew his hand, in his furry palm were the 82 imprisoned Primordial Wild Hoofs.

In Luo Feng's palm, the Primordial Wild Hoof Clan team seemed like mere toys, devoid of any resistance.

"Buzz."

Each body remained intact, but their Life Cores silently split open, dying one after another.

"Meeting is fate!" Luo Feng promptly stored all these bodies into his

Storage Treasure.

This Low Level Primordial Life team posed no threat to Luo Feng indeed.

According to Luo Feng's own estimation, in the battle of Yulan City, he could suppress four Super Limit Level entities alone! Today, he can suppress ten by himself! He alone can rival a Peak Level team.

"But my current strength is far from invincible." Luo Feng is well aware of this.

Invincible is a whole level above Peak Level.

At least equating to twenty or thirty Peak Level existences, that's the minimum threshold for invincibility!

In truth, if the Spiritual Will emerges from the Braided Cage, Peak Level before such existence would be powerless under the will's crushing.

Luo Feng walked to a lakeshore, suddenly sat cross-legged, contemplating the puzzles of cultivation.

Chapter 362 - 2 Vast Wealth

"My Path of Life and Death is completely stuck!"

"Could it be that the path I explored on my own is a dead end?"

Luo Feng couldn't help but have some doubts.

During the time of being a Godly King, there was a complete Great Dao to refer to! So there wouldn't be any dead ends; if you couldn't understand it, it was just because your comprehension wasn't enough, your ability wasn't enough.

But during the Divine Emperor Stage, you have to grope in the dark, and it's easy to go the wrong way, completely falling into a desperate situation, never able to progress.

Why is the fusion path difficult? Because its complexity far exceeds a single path! It's very easy to get stuck and unable to move forward! Even with the comprehension of the Master of Deceit Workshop, the fusion path only reached the early stage of Divine Emperor.

"I have the Eye of Life and Death, having observed so many Primordial bloodlines, my path should not be wrong!"

"The path is not wrong, so how do I break through the bottleneck next?"

Luo Feng murmured softly.

"For Life and Destruction Fusion, in the direction of life, what I pursue is the ultimate physical body! The bigger, the better! Big represents strong energy. Big represents the hope of bursting with immense power. Big also represents endless vitality."

"But... when the physical body becomes large enough, how to control

it?"

"According to my estimation, the Half Primordial Life and Death Path could theoretically reach '1.2 billion times' the Perfect Divine Body Energy Reserve."

After the battle in Yulan City, Luo Feng went into seclusion again, advancing comprehensively, not far from the 'Half Primordial Life and Death Path,' and could vaguely judge the theoretical power the Half Primordial Life and Death Path should have!

As the hardest of the Three Invincible Paths. Once this path succeeds, it is absolutely invincible.

"Back in the middle stage of the Divine Emperor's life and death path, the Undying Blood Sea Body had a 500 times Perfect Divine Body Energy Reserve, which was peak combat power. At the limit, it could also control over ten thousand times the energy reserve, though strength did not increase."

"And now, my Undying Blood Sea Body has a 3000 times Perfect Divine Body Energy Reserve as peak combat power. At the limit, it can control 100,000 times the energy reserve. Any more and, because the body is too large, it cannot be perfectly controlled, causing strength to decline."

"But..."

"The Half Primordial Life and Death Path theoretically could have a 1.2 billion times Perfect Divine Body Energy Reserve. How do I perfectly control them?"

"Such a vast body, once I drive it, even walking will be difficult."

"This indicates that, in terms of 'controlling the body,' I have a significant flaw." Luo Feng faced this bottleneck.

His Path of Life and Death was already very perfect in many aspects.

A vast physical body, indestructible vitality, how to unleash immense power... all aspects have reached the predetermined target!

Only one aspect!

When the body was small, it was fine, as Luo Feng's current body's total reserve did not exceed a 5000 times Perfect Divine Body Energy Reserve, naturally driving it was easy.

But the theoretical '1.2 billion times' energy reserve is far from enough when driving and operating it.

But if the vast body is sacrificed, this path cannot be called perfection! It wouldn't be the 'Divine Emperor Perfection' Path of Life and Death.

"According to the experience of many Primordial bloodlines, to drive such a vast physical body, it is estimated that two conditions need to be met: first, in terms of controlling the physical body, there needs to be an essential metamorphosis. Second, the spiritual will must also break out of the Braided Cage. Only when both conditions are met can one perhaps perfectly control such a vast physical body."

When chatting with Yuan Xiang Palace Master and the Cultivator Team, Luo Feng also knew that when the spiritual will just breaks out of the Braided Cage, its power only increases tenfold.

Because historically, the first path of the invincible three, 'will breaking out of the Braided Cage,' is the most, and they have also seen a few.

The spiritual will is invincible, and with just one thought, it can completely suppress Yuan Xiang Palace Master and others. But it can only suppress! It cannot achieve 'will annihilation.'

"The spiritual will only increases tenfold or so, which helps but is far from the level of 'perfect control.'" Luo Feng understood this.

Such a vast body, even walking is arduous.

Let alone tenfold, even if the will increases a hundredfold, the vast body could probably fly agilely and perform some simple moves. But achieving the most profound moves is still impossible, much less multitasking.

While using the vast body to deploy formations to trap enemies, and at the same time using close combat techniques, then using the Biomimetic Destruction Eye to observe, and then using Secret Treasure against enemies...

Multitasking would be the true perfect control of the physical body!

The spiritual will has only increased tenfold, still far short.

"Far too short."

"The spiritual will breaking out of the Braided Cage, according to my estimation, is still far from enough. This means my path may be wrong."

"Perhaps my Path of Life and Death should not pursue the extreme vastness of the physical body."

Luo Feng also reflected on himself.

Searching in the dark requires constant reflection and correction.

"Let's first try to explore methods for 'controlling the physical body.'" Luo Feng was not one to easily give up; this path was the direction he set from the start, and once the fundamental direction changes, the entire Path of Life and Death would need to be overturned.

He would need to start from the Ultimate Realm of God King, and redevelop and explore!

A blank slate is best for painting!

Even if he overturns the past path, he would still be influenced by the old path, and it's hard for the new path to be realized.

This is cultivation!

One wrong step, every step thereafter is wrong!

"As long as the path is cleared, there is no mistake!"

"How long have I been cultivating? The Ancestors of the two

countries have experienced several Reincarnation Eras on the Land of Origin, what is this bottleneck?" Luo Feng closed his eyes and began to quietly ponder.

From one Primordial bloodline after another, from the Undying Heart, the Palm World, from the Star Tower, the Eye of Life and Death, he sought some inspiration.

"Including the Star Tower, life and destruction are merely combinations, not fusion."

"The fusion path has no reference."

The ordinary path can refer to the mysteries within the corpse materials of Primordial life.

The Fusion Dao! There isn't even a reference for it!

It's okay in the early stages, but the further you go, the harder it gets!

Luo Feng truly encountered a major bottleneck on the path from the 'Late Stage Divine Emperor' to 'Divine Emperor Perfection.'

In fact, this isn't even the hardest part of the fusion path.

From the 'Path of Divine Emperor Perfection' to the 'Path of Primordial Level,' that's the truly difficult one, like an insurmountable chasm! It's countless times harder than the bottleneck Luo Feng faces now!

Many incredibly talented individuals switch to cultivate bloodlines to escape the Braided Cage.

It's just because the 'path' becomes more difficult the further you go, to the point of despair for cultivators.

"Mastering the physical body..."

"How should such a massive physical body be mastered?"

Luo Feng pondered.

Various spirit lights collided while studying each facet of the Primordial Bloodline.

"Wrong."

"This method is inadequate."

Prototypes of methods for mastering the physical body emerged in his mind, only to be dismissed by Luo Feng as soon as they formed.

With his wisdom, he already knew the future limits once a prototype appeared.

...

Luo Feng walked on the land of the Dark Sacred Realm, his mind continuously on cultivation, stopping occasionally to comprehend cultivation. If he encountered low-level Primordial lifeforms along the way, Luo Feng naturally exterminated them in passing.

Sometimes, killing the weak would attract stronger ones! After defeating the strong, a terrifying team might come to encircle him.

Luo Feng discovered such threats with the Biomimetic Destruction Eye from afar and immediately traversed between the cracks of heaven and earth to rapidly escape.

"Hmm?"

Luo Feng gazed at the ancient city ahead, "Chengfeng City, have I arrived?"

Continuing to walk and comprehend, half an era had passed before Luo Feng finally reached Chengfeng City!

"Phew."

Luo Feng fully restrained his aura, stepping across space directly into the city, then walked inside Chengfeng City. The majority of cultivators in the city couldn't detect his presence.

"The Dark Sacred Realm gathers the strongest from many

surrounding Source Worlds and countless worlds. A late-stage Divine Emperor level of enlightenment is the minimum threshold to enter here."

Many 'Half Primordial Bloodline Cultivators' cultivating the bloodline path are at the bottom in the Dark Sacred Realm.

"Bai Yin Divine Emperor and his companions are inside Chengfeng City." Luo Feng sensed the three friends from the cultivator team through causality but didn't rush to visit them. Instead, he flew towards the Primordial Hall in the city.

"The central city of the Dark Sacred Realm, 'Primordial City,' is the only one with a large Primordial Hall." Luo Feng also knew this information.

When the Dark Sacred Realm was first established, there was only one city, Primordial City, left by Senior Yuan and others.

Over the long years that followed, cultivators exchanged battle merits to build four additional cities, making it easier for cultivators to hunt the surrounding low-level Primordial lifeforms. The cities of the Dark Sacred Realm have a much higher exchange price compared to those in the Nine Rivers Sacred Realm.

"Phew."

Luo Feng flew directly to the second floor of the Primordial Hall.

On the second floor of the Primordial Hall, two tall figures stood motionless. Only when Luo Feng arrived did they open their eyes simultaneously, their intangible auras enveloping the entire second floor of the Primordial Hall.

"Cultivator Luo Feng, are you here to confirm battle merits or exchange treasures?" one of the tall figures spoke. They were puppets left behind by Senior Yuan and others, absolutely impartial.

"Confirm battle merits."

Luo Feng nodded, "These are the low-level Primordial lifeform corpses I hunted, please handle them."

As he spoke, Luo Feng took out the storage bracelet and released its seals.

"Buzz—" The two puppet beings began inspecting the contents of the storage bracelet. Though it contained an alarming number of low-level Primordial lifeform corpses, the puppets remained unfazed.

"Low-level Primordial lifeform corpses, including 9 Super Limit Level, 2902 Divine Emperor Perfection Level, 39522 Late Stage Divine Emperor Level, 68990 Middle Stage Divine Emperor Level, and 83560 Early Stage Divine Emperor Level."

"Cultivator Luo Feng, your current battle merits are 7,717,660."

One of the puppets announced the final merits.

Luo Feng heard the number, over seven million battle merits?

The peak-level powerhouses of the Dark Sacred Realm, although weaker than Luo Feng in strength, have accumulated a long lifespan, so they tend to purchase battle merits using Primordial Crystals. After all, the uses of battle merits far exceed those of Primordial Crystals.

Therefore, having millions of battle merits among peak-level entities is quite common. With Primordial Crystals, 100,000 can purchase a single battle merit. Spending tens of billions of Primordial Crystals can buy millions of battle merits.

Many cities have been purchasing battle merits for a long time, and Yulan City also participates in such exchanges.

Although Luo Feng's battle merits amount to just over seven million, he's considered extremely wealthy. That's because his battle merits were entirely earned by himself through hunting! The value of those Primordial lifeform corpses is worth tens of trillions of Primordial Crystals.

"Seven million battle merits should be enough." Luo Feng thought, turning to head directly to the first floor of the Primordial Hall, intending to sell all these corpses!

Chapter 363 - 3: The Strongest in the Dark Sacred Realm

The first level of the Primordial Hall in Chengfeng City is also specifically for purchasing low-level Primordial Life corpses, and here only three forces are involved in the procurement.

Cultivators are in seclusion for extended periods and hunt very rarely! At this moment, only Luo Feng is a customer on the first level of the Primordial Hall.

"I have a batch of low-level Primordial Life corpses to sell. Let the three of you take a look and see what price you can offer." Luo Feng stood there, holding the storage bracelet in one hand. He directly released the bracelet's seal, allowing the external parties to view it.

"A batch?"

The Divine Emperors responsible for these three forces all came forward, each sending their thoughts to infiltrate the storage bracelet and examine it.

What they saw startled them!

A dense collection of low-level Primordial Life corpses, they had never seen so many low-level Primordial Life corpses in their lives. Usually, purchasing over a thousand at once is considered a lot.

In the Dark Sacred Realm, hunting is extremely dangerous. If you fight the weak, it attracts the strong! If you fight the strong, it draws an entire terrifying squad! So it's very difficult to hunt a large number of low-level Primordial Life.

In the Nine Rivers Sacred Realm, cities with power are not attacked by low-level Primordial Life at all!

Even if attacked! If they cannot breach the city, the army will withdraw.

Only when breaching the city, where the defending forces are extraordinarily strong, can they not only overpower the army but also ensure that 90% of the army cannot escape! To achieve such a great result, the probability is exceedingly low.

"This is far too many." The Divine Emperors responsible for these three forces were all very surprised and somewhat tongue-tied.

"Might I ask this Divine Emperor?" A Divine Emperor carefully spoke.

"I am Luo Feng."

Luo Feng directly said, "Whoever among you three offers the highest price will have the chance to acquire all these low-level Primordial Life corpses. If I'm not satisfied, I'll sell them in other cities."

"Divine Emperor Luo Feng, please don't be hasty; this business deal is too large, and we need to report it upwards."

"We will definitely give Divine Emperor a satisfactory price."

The three forces became a bit anxious.

Such a huge transaction, even if profits are compressed, is still quite lucrative.

Luo Feng suddenly sensed something, turned his head, and saw three figures flying over from a distance: an old man, a winged woman, and a young man in a red robe. As they flew over, their invisible aura naturally intimidated all sides, making the nearby area devoid of any cultivators daring to come close.

"Brother Luo Feng." The red-robed young man, Chi Zhen, called out from afar.

"Haha... Brother Luo Feng, long time no see." The old man Bo Xiu also warmly greeted.

"Meeting again." The winged woman, Divine Emperor Bai Yin, smiled

slightly.

As the three of them landed on the first level of the Primordial Hall, the Divine Emperors responsible for the three forces of the Primordial Hall all quickly and respectfully saluted. Clearly, these three held high status in Chengfeng City!

Luo Feng was not surprised by the sight. According to the information he had, there were estimated to be just over a hundred peak-level existences within Chengfeng City.

The small team of Divine Emperor Bo Xiu has been acting together for a long time! Even the City Lord doesn't dare to treat them carelessly in Chengfeng City.

"I was originally planning to visit the three of you after the transaction," Luo Feng said with a smile.

"Your victory in defending the city yielded great spoils. Such a large transaction, these ordinary Divine Emperors cannot decide on it, and they must report it upwards." The old man laughed, "Let's go, go, go, first to my cave mansion to rest, and slowly wait for their reply!"

"You three can negotiate well and can also purchase this batch of low-level Primordial Life corpses together." The old man looked at the ordinary Divine Emperors on the first level of the Primordial Hall, "But if the price is low, I, Brother Luo Feng, will not sell."

"Brother Luo Feng, let's go." Divine Emperor Bai Yin smiled.

Luo Feng nodded.

Immediately, the four of them flew off together, heading straight for Bo Xiu Divine Emperor's cave mansion.

The ordinary Divine Emperors on the first level of the Primordial Hall secretly clicked their tongues.

"What is the origin of this Divine Emperor Luo Feng? To produce so many low-level Primordial Life corpses at once?"

"He seems to have quite a relationship with Bo Xiu and the other

two."

These ordinary Divine Emperors dared not neglect their duties and immediately reported the news upwards! Also, they reported all the images of the hundreds of thousands of low-level Primordial Life corpses they observed.

This intelligence immediately caused shock among some of the peak existences in Chengfeng City. Such enormous wealth, even among those at the peak level, few can compare with Luo Feng.

...

In a pale white large cave mansion.

The four of them, Luo Feng and his companions, sat scattered, drinking and chatting gleefully.

"Hahaha, to meet again in the Dark Sacred Realm is a blessing, come, come, let's drink heartily."

"Sister Bai Yin was originally planning to go into seclusion, but guessing Brother Luo Feng was coming, she didn't rush into it." The red-robed youth laughed.

The winged woman smiled slightly, "I've cultivated to this realm; even if I closed myself in again, it would be difficult to advance a single inch. Instead, Brother Luo Feng's exceptional talent, even a few pointers from him would be more beneficial than me closing myself for billions of Eras."

Reaching the peak level itself is a huge bottleneck.

The three of them also crave further advancement!

So they are willing to lower their postures in front of Luo Feng, feeling that Luo Feng, having just broken through, has surpassed the three of them! Once his strength is stabilized, he will likely be even more powerful. Such a dazzling existence, his comprehension ability must far exceed the three of them; just a few pointers might enlighten them.

Each bit of enlightenment, every opportunity, they treasure greatly. Perhaps they might seize the chance to leap out of the Braided Cage!

"I'm also stuck at a bottleneck now." Luo Feng shook his head, "Trapped at the bottleneck, struggling to make any progress."

"Oh? Would you care to share? Perhaps we could brainstorm some solutions together," Bo Xiu suggested.

Bai Yin and Chi Zhen also turned their gaze toward Luo Feng.

Cultivators at the pinnacle level often engage in philosophical discussions together, and such discussions are beneficial for cultivation.

"I'm pondering, if a physical body is unimaginably immense, how should one's spiritual will control it?" Luo Feng looked at his three friends.

"How immense a physical body are we talking about?" Chi Zhen asked.

"The ultra-limit-level bodies of the Primordial Wild Hoof Clan are considered quite formidable," Luo Feng said, "but what if the body is a hundred thousand times larger than that? How could a Divine Emperor perfectly control such a form?"

Twelve billion times the Perfect Divine Body energy reserve, Luo Feng estimated, would be about a hundred thousand times that of the ultra-limit-level Primordial Wild Hoof.

"This—" Bo Xiu, Chi Zhen, and Bai Yin were all astonished by the thought.

"The Primordial Wild Hoof Clan is already renowned for having the strongest physical bodies among the low-level Primordial Life. A body a hundred thousand times larger? Even if the will breaks free from its braided cage, it would be impossible to control it perfectly!" Bo Xiu calculated briefly and concluded.

"During the Divine Emperor stage, I haven't heard of anyone being able to control such an immense body, not even a whisper." Chi Zhen

shook his head.

"Maybe one needs to break free from the braided cage and become a high-level Primordial Life to control such a body," Bai Yin Divine Emperor suggested.

Luo Feng gently shook his head.

He pursued the 'Divine Emperor Perfection Life and Death Dao', with his life level still being at the Divine Emperor stage! Theoretically, his physical body could attain such immensity. If he were to break free from the braided cage and further become a 'higher-level Primordial Life', it should undergo a qualitative change.

"Hmm?" Bo Xiu suddenly sensed something and smiled, "Brother Luo Feng, the City Lord has contacted me, and he is offering seventy-three trillion Primordial Crystals for that batch of Primordial Life corpses!"

"That price is quite decent." Luo Feng's eyes brightened, well-aware of the value of his spoils of war.

"The current two strongest in the Dark Sacred Realm are Divine Emperor Ji Ke, who refined a world-level Primordial Bloodline, and Dragon Nine Daoist Monarch, who practices three and a half primordial level paths. Our Chengfeng City's 'Feng Qiao City Lord' is Dragon Nine Daoist Monarch's junior, and he is the most willing to offer a high price in the city," Bo Xiu explained.

"Divine Emperor Ji Ke and Dragon Nine Daoist Monarch?" Luo Feng's eyes lit up, "How far are they from the invincible level?"

"They are only somewhat stronger than us," Chi Zhen said, "The three of us teaming up are comparable to any one of them!"

Luo Feng nodded slightly.

As far as he knew, in the entire Dark Sacred Realm, there were about a thousand who could reach the pinnacle level. Divine Emperor Ji Ke and Dragon Nine Daoist Monarch were among the strongest, roughly matching his strength.

Strictly speaking... the strongest in the Dark Sacred Realm should be three individuals: Divine Emperor Ji Ke, Dragon Nine Daoist Monarch, and himself!

As for invincible beings, they rarely appear in the Dark Sacred Realm anymore.

Most of the invincibles born throughout history are confirmed to have broken free from the braided cage.

"The other two also gave offers." Bo Xiu smiled at Luo Feng, "One is seventy-one trillion, the other seventy-two trillion and two billion. We need to respond to them, and only then will they begin gathering Primordial Crystals."

"Let's sell it to the City Lord," Luo Feng decided.

He was satisfied with the City Lord's offer.

"Once it's agreed, the City Lord will start gathering the Primordial Crystals," Bo Xiu said, "By the way, Brother Luo Feng, do you need to purchase any treasures? The City Lord can offer a lower price for you."

Gathering such a large sum of Primordial Crystals is quite troublesome.

That's why the three made offers proactively; if Luo Feng didn't accept, there would be no need to collect the Primordial Crystals.

"I do need some supplies." Luo Feng's eyes brightened, "I need to purchase a sufficient amount of Primordial Bloodlines! Also, some auxiliary cultivation treasures."

In merely a few moments.

"All low-level Primordial Life Bloodlines from the surrounding world clusters are available in the Dark Sacred Realm," Bo Xiu smiled and said, "Here's the list of all low-level Primordial Life Bloodlines, take a look, the prices are all quite cheap."

Bo Xiu sent the information to Luo Feng.

Luo Feng glanced over the list.

The Dark Sacred Realm is the core of the surrounding world clusters, gathering a peak group of Cultivators from those clusters. It also has the largest amount of low-level Primordial Life Bloodlines.

"Buy one of each low-level Primordial Bloodline of both life and destruction types. Each needs to be accompanied by twelve sets of ordinary remnant materials."

"For those of life or destruction types, buy one of each. Also equip them with materials."

Luo Feng was wealthy enough that anything related to life and death, from early-stage Divine Emperor to super-limit level, he bought it all. Of course, he excluded those he had purchased previously.

"Buying all of it just costs 1,252 billion Primordial Crystals?" Luo Feng calculated briefly and felt satisfied, as he hadn't even spent a tiny fraction of his wealth! The primary expense of this Primordial Crystals was for super-limit-level bloodlines.

Each super-limit-level bloodline costs about 5 billion Primordial Crystals. Luo Feng bought life-type, destruction-type, and those combining both, purchasing a total of 189 types of super-limit-level bloodlines.

"Buy some more auxiliary treasures." Luo Feng found the effect of the Hundred Tribulations Heart Essence indeed quite good; in the past, he was too poor to buy the best ones.

This time, having hit a bottleneck, Luo Feng bought a great deal of auxiliary treasures, spending up to 300 billion Primordial Crystals.

"Just get these," Luo Feng sent a message to Bo Xiu Divine Emperor.

"Do you need anything else?" Bo Xiu Divine Emperor asked, "The auxiliary treasures you've purchased are somewhat lacking; even if used sparingly, it won't last you a billion eras of cultivation."

"It's more than enough."

He had ventured through reincarnation to reach the Land of Origin, taking just a few thousand eras so far.

Chapter 364 - 4: Arriving Alive at Primordial City?

Bo Xiu, Chi Zhen, and Bai Yin exchanged glances.

"What's the matter?" Luo Feng noticed something unusual about his three friends.

"Brother Luo Feng," the red-robed youth Chi Zhen said, "this time you sold goods estimated at seventy-three trillion Primordial Crystals. But you've only spent a tiny part of that on treasures, with over seventy trillion Primordial Crystals left. You must be planning to take it to the large Primordial Hall in Primordial City, right?"

Luo Feng nodded: "In the entire Dark Sacred Realm, the real treasures are mainly found in the large Primordial Hall."

The oldest Primordial Hall is full of wonders, with so many treasures that it surpasses even the Infinite Space.

You can exchange them for cities, various bloodlines, and even for secret treasures like the 'Eye of Life and Death' and beyond! You can even exchange them for living Primordial prisoners!

"Of course, I intend to use these Primordial Crystals at the Primordial Hall," Luo Feng said.

"Carrying over seventy trillion Primordial Crystals with you..." Bo Xiu shook his head gently, "You think you can reach Primordial City alive?"

Luo Feng was startled: "What do you mean?"

Beside him, Bai Yin Divine Emperor poured Luo Feng some wine and said, "Brother Luo Feng, the Dark Sacred Realm is named 'Dark' for a

reason. The chaos here, are you not aware of it?"

"I've heard of it," Luo Feng nodded.

Bai Yin Divine Emperor continued, "As of now, the two strongest in the Dark Sacred Realm are 'Dragon Nine Daoist Monarch' and 'Divine Emperor Ji Ke'. Individually, their strength can only match the combined might of the three of us. So in the Dark Sacred Realm, unless you're invincible, individual strength is far from enough."

Luo Feng was thoughtful.

"In this Chengfeng City, there are three major forces capable of purchasing your goods. These three forces... are also the most influential in Chengfeng City," Bo Xiu Divine Emperor said. "The first is the group led by the City Lord, consisting of twenty-nine peak level existences. They tend to stick together, and their actual leader is Dragon Nine Daoist Monarch. But since Dragon Nine Daoist Monarch lives long-term in the 'large Primordial Hall' within Primordial City, leadership falls to the City Lord."

"The second force is led by the 'Secret Ruins Divine Emperor', which includes fifteen peak level existences. Secret Ruins Divine Emperor's mastery of formations is among the top three in the entire Dark Sacred Realm. With his formation skills, their combined power of fifteen peak-level beings is extremely formidable."

"The third force is the Eight Friends of the Heavenly Wolf, formed by eight peak level existences. They seem the weakest but were once followers of the invincible 'Heavenly Wolf Guest'. The Heavenly Wolf Guest was an invincible existence in the history of the Dark Sacred Realm, achieving invincibility with rapid speed. We haven't seen him but have heard of him! It's said that Heavenly Wolf Guest has long escaped the Braided Cage."

Bo Xiu, Chi Zhen, and Bai Yin all looked at Luo Feng.

The three of them also had a desire to follow Luo Feng, believing he had the potential to become an 'invincible existence'.

Once truly invincible, one is ushered into ascension and no longer

requires followers!

So they must decide early and follow with unwavering loyalty.

The Eight Friends of the Heavenly Wolf did just that! They followed Heavenly Wolf Guest in the early days. As Heavenly Wolf Guest became invincible, then escaped the Braided Cage, he gave them some slight rewards, and their status in the Dark Sacred Realm became quite unusual.

"Indeed, the cultivators of the Dark Sacred Realm who have connections with those who escaped the Braided Cage should be quite a few," Luo Feng realized.

For example, Elder Xingyi from Yulan City, who is the disciple of an invincible existence.

The Dark Sacred Realm, after all, is the core of the surrounding world cluster! Historically, each invincible existence that escaped the Braided Cage naturally left many traces here, as well as disciples and friends.

"Over seventy trillion Primordial Crystals," Bo Xiu whispered, "If you take them out of Chengfeng City just like that, even if the three of us team up to help you, we couldn't protect you."

"The City Lord's side is somewhat lenient, with a fifty percent chance of action. But the other two forces are eighty to ninety percent likely to make a move!" the red-robed youth Chi Zhen said, "Secret Ruins Divine Emperor and his group desperately need all resources and are very likely to make a move. The Eight Friends of the Heavenly Wolf do not lack resources, but after receiving a gift from the 'Heavenly Wolf Guest', they might have suffered some soul pollution, drastically changing their nature, becoming very greedy and fierce."

"In the Dark Sacred Realm, the most dangerous thing isn't the individual, but the group. After all, the gap at peak level isn't large," Bo Xiu observed Luo Feng, "Any one of these three forces, if they join hands, could not be withstood without 'invincible strength'.

Luo Feng nodded slightly.

"So I advise you, first, buy everything you can, and have the seller directly send the treasures to the Transmission Holy Mountain," Bo Xiu suggested, "You can arrange your avatar to receive them at the Transmission Holy Mountain. Then bring them directly back to the Source World."

"Second, try to convert most of your Primordial Crystals into battle merit. Because in the large Primordial Hall of Primordial City, only relatively ordinary treasures can be purchased with Primordial Crystals. Everything else requires battle merit."

"Convert them into battle merit and ensure it's under your name! Then no one can take it away."

Bo Xiu laid out his opinions.

"For us peak level existences, after accumulating for eons, we typically have around several trillion Primordial Crystals, most of which are converted to battle merit! What you have compares to the cumulative resources of ten peak level existences. And it's all in Primordial Crystals, ripe for plunder, who wouldn't be tempted?" the red-robed youth Chi Zhen said.

The three of them were determined to follow Luo Feng, fostering good relations to override their greed.

But over seventy trillion Primordial Crystals, how many resources could that exchange for?

"Thank you, all three," Luo Feng expressed his gratitude.

Chapter 365 - 4 Arriving Alive at Primordial City?_2

Luo Feng pondered for a moment and said, "I've heard that the high-level Primordial Bloodline in the 'Large Primordial Hall' can be bought with Primordial Crystals. I also need to purchase high-level Primordial Bloodline based on the 'Life and Death Path'."

"You can have the City Lord's side purchase it on your behalf," Bo Xiu nodded. "The pricing for high-level Primordial Bloodline by Senior Yuan and them isn't too expensive, generally not exceeding ten billion Primordial Crystals."

"I've collected information on all high-level Primordial Bloodline for sale from the large Primordial Hall," Bai Yin Divine Emperor said. "There should be 73 types centered on life and death, requiring 530 billion Primordial Crystals in exchange."

"That should be it," Luo Feng said. "Have the City Lord's side deliver all the bloodlines and auxiliary cultivation treasures I've purchased to the Transmission Holy Mountain."

At this moment, Luo Feng's avatar far away in the Land of Origin had already split into another avatar, beginning to transmit through the gorge lake to the Dark Sacred Realm.

"Please use the remaining Primordial Crystals to help me purchase 30 million Battle Merits," Luo Feng said.

"Is it an urgent purchase or not?" Bo Xiu asked.

"What's the difference between the two?" Luo Feng asked.

"If you're not in a hurry, the City Lord's side can slowly gather the Battle Merits. Thirty million Battle Merits... might take over a billion

epochs," Bo Xiu said. "For many cultivators, waiting millions or billions of epochs is tolerable! Gradually gathering, each Battle Merit costs 110,000 Primordial Crystals to purchase."

Luo Feng nodded.

In those cities of the Nine Rivers Sacred Realm, the general purchase price is 100,000 Primordial Crystals per Battle Merit. But factoring in the efforts of various forces, when it comes to Luo Feng, naturally, it requires a little increase.

"A billion epochs?" Luo Feng asked. "What about an urgent purchase?"

"An urgent purchase, thirty million Battle Merits might also need tens of millions of epochs. Each Battle Merit costs 120,000 Primordial Crystals," Bo Xiu said. "This is already a relatively cheap price after the competition between forces in the Dark Sacred Realm."

"Still too slow," Luo Feng said. "Can it be quicker?"

"If you offer a higher price! With the Dark Sacred Realm as the center, in multiple worlds... many Battle Merits will be prioritized for you," Bo Xiu said.

"If I offer 130,000 Primordial Crystals per Battle Merit, how long will it take to gather?" Luo Feng asked.

"The profit can reach 30%! That's quite high already; it might be gathered in a thousand epochs," Bo Xiu said. "After all, the Battle Merits you want are too numerous. Gathering 30 million Battle Merits in a short time indeed requires collecting from multiple worlds."

Luo Feng nodded: "Deliver every ten million Battle Merits once."

With his strength, in the environment of the Dark Sacred Realm, once leaving Chengfeng City, without the city regulations and constraints, Luo Feng would not be sure of surviving under the siege of a group of peak levels.

Indeed needed to convert some Battle Merits under his name as much

as possible.

"I also need some powerful Secret Treasures," Luo Feng said. "We can talk about strong Secret Treasures of the Life and Death category."

"Life and Death category? Quite rare. Even the entire Chengfeng City is willing to sell, probably not many Secret Treasures of the Life and Death category," Bo Xiu said.

"I'm willing to buy at a high price," Luo Feng smiled.

Strong Secret Treasures like the Undying Heart and Palm World are even possessed by the Ancestors of the two countries.

Half Primordial powerhouses generally have a few. For example, the Wei Yang Palace Master has two in his Yulan City avatar!

The more numerous quantities are generally owned by peak level existences! They might even get Secret Treasures of the 'Eye of Life and Death' level, but such treasures can't be sold, nor can they be brought out of the Source World.

"Since you're buying at a high price, that makes it easier," Bo Xiu laughed.

Such powerful Secret Treasures are relatively common in the Dark Sacred Realm, and Source World powerhouses generally have two or three.

...

Chengfeng City, city owners mansion.

The City Lord Feng Qiao, tall and massive like a stone giant, his golden eyes looking around.

He is a peak level existence! The master of 'Chengfeng City,' one of the five cities in the Dark Sacred Realm! Also, the most trusted brother of Dragon Nine Daoist Monarch! He commands another 28 peak-level existences, this force is extremely prominent in the entire Dark Sacred Realm.

"73,000 billion Primordial Crystals! This Luo Feng Divine Emperor is quite ruthless."

"Intelligence shows his strength is extraordinary, able to single-handedly overpower four Super Limit Levels. But he just didn't defend his city! Allowing four low-level Primordial Life armies to breach the city. When these low-level Primordial Life armies reached the core area, he conveniently managed to successfully deploy his formation. Under the formation's cover, these armies were too deep... during their retreat, he defeated them one by one, ultimately slaughtering ninety percent!"

"In my opinion, that was all part of his plan."

"He intentionally let the city fall, lured the enemy deep inside, and finally harvested! He gathered almost half of the core descendants of the low-level Primordial Life from the Nine Rivers Sacred Realm, which resulted in such a huge gain."

"What a brilliant strategy!"

"He has been in Yulan City for over two thousand epochs, I guess his previously displayed weak strength was all a disguise. He probably discovered the birth of the 'Super Limit Level Enchanting Heart Worm.' So he laid an ambush in the most vulnerable Yulan City, quietly waiting for the low-level Primordial Lifes to attack."

All the peak level existences sat scattered around.

It was because of this transaction that they started investigating Luo Feng's intelligence.

This investigation left them amazed!

They have reasons to suspect that it was all this Luo Feng Divine Emperor's deliberate plan.

As for Luo Feng coming from the Land of Origin, they haven't discovered this part in a short time.

The Yuan Xiang Palace Master could find out... because he was the master of Yulan City at that time! He also knew the relationship

between Luo Feng and Emperor Qing, as well as the relationship between Emperor Qing and Primogenitor Yan Feng. This is how he managed to investigate everything thoroughly.

"He purchased every low-level Primordial Bloodline related to life and death, including 73 types of high-level Primordial Bloodline, and some auxiliary cultivation treasures, totaling 688 billion,"

"Prepare all of it and send it to the Transmission Holy Mountain, to his avatar," City Lord Feng Qiao calmly instructed.

A transaction of over six hundred billion Primordial Crystals doesn't mean much to the forces he commands.

"He also wants to purchase 30 million Battle Merits, and he is willing to pay 130,000 Primordial Crystals per Battle Merit," City Lord Feng Qiao smiled slightly. "Deploy all the low-level Primordial Life Corpses we can access and use them to confirm Battle Merits for Luo Feng Divine Emperor first."

"Our stock, along with what can be quickly mobilized from other forces, is about 8 million Battle Merits," an elderly man in black robe said beside him.

"Let's earn what we can first," City Lord Feng Qiao was very satisfied with this transaction.

The numerous low-level Primordial Life Corpses, amounting to 73,000 billion Primordial Crystals, could be split, refined, and utilized in many ways. The low and mid-level members under his command could earn some labor fees, and the upper levels could make one or two thousand billion Primordial Crystals profit.

The critical point is the urgent purchase of Battle Merits by Luo Feng, although the time is pressing, the transaction scale is large, and the profit still exceeds 5,000 billion Primordial Crystals.

No need for slaughter, no need for adventure, such a vast amount of resources were acquired, so they were naturally pleased.

"City Lord, are we really not going to take action?" A seductive woman spoke, her scale-armored tail swaying slightly, revealing her

excitement.

"If the battle of Yulan City was indeed his meticulous strategy, such a cultivator would not give you the opportunity," City Lord Feng Qiao said. "If Yulan City wasn't part of his strategy, his talent is terrifying enough that it doesn't suit plundering."

City Lord Feng Qiao has a high status and abundant resources. He needs to maintain his position, not take risks.

Several peak-level existences present felt a bit uneasy upon hearing this.

But City Lord Feng Qiao's influence was too great. Without his consent, it would be difficult to push the issue.

...

In Chengfeng City, a vast cave mansion.

In the dark expanse of the cave mansion, the space twisted, and fifteen blurry figures sat scattered around.

"Even our 72,200 billion offer didn't succeed. Seems like this selling price is even higher," a sharp voice sounded.

"If there's a chance to rob this Luo Feng Divine Emperor, each of us could get a few thousand billion Primordial Crystals. That would be a huge deal!" a voice from a black sphere said.

Running a force to earn is too slow.

This fortune is too massive.

The fifteen of them have long been suppressed by the City Lord's side! Gaining resources has clearly been a constant struggle for them.

"We can't act within the city." A thin man sitting cross-legged had a semblance of the 'origin' flavor of the Source World, sitting there, forming his own regulation origin, affecting the formation operation within the vast cave mansion, "We need to be patient and wait for opportunities to arise."

"With such wealth, seeking to exchange it for Battle Merits, how much can he exchange it for? So he will surely need to carry a lot of Primordial Crystals! And he will also surely go to the large Primordial Hall!"

"With so much Battle Merits and wealth, to convert it into strength! He definitely needs to go to the large Primordial Hall, and that's our opportunity."

They were not concerned about danger.

Throughout the entire Dark Sacred Realm, the combined force of the fifteen of them feared no one!

——

Thank you to the new Alliance Hierarch 'North Peking Searches Nova Tsinghua' for the reward!

Chapter 366 - 5 Unveiling That Veil

On the third day Luo Feng arrived in Chengfeng City, inside the Cave mansion of Bo Xiu Divine Emperor.

"You're here."

Bo Xiu, Bai Yin, Chi Zhen, and Luo Feng together greeted City Lord Feng Qiao and his group of pinnacle existences.

"City Lord," Bo Xiu Divine Emperor said with a smile.

"Is this the Luo Feng Divine Emperor?" City Lord Feng Qiao, who had the appearance of a stone giant, observed Luo Feng and said with a smile, "We haven't had much rest these past few days to gather the resources required for the transaction."

A transaction totaling 7,300 billion Primordial Crystals, along with a large amount of bloodline and battle merit, even for the power group of City Lord Feng Qiao, required two to three days to prepare.

"City Lord, thank you for your hard work," Luo Feng said with a smile.

City Lord Feng Qiao carefully observed the black-clad, black-haired man. From the surface, he didn't seem to be someone skilled in scheming! However, he knew better than to judge a Cultivator by appearances.

"We just learned some news about Luo Feng Divine Emperor. In just over two thousand epochs, he grew from an ordinary Divine Emperor to a pinnacle level in Yulan City of the Nine Rivers Sacred Realm. Truly remarkable," City Lord Feng Qiao praised.

"Such growth speed is rare even in the Dark Sacred Realm." Other pinnacle level existences also expressed their admiration as they observed Luo Feng, watching his reaction.

They were also somewhat curious. Did Luo Feng Divine Emperor truly grow over two thousand epochs? Or was it deliberate disguise?

"Shall we first attend to the business?" Bo Xiu spoke.

"Alright, let's do the transaction first," City Lord Feng Qiao nodded.

Luo Feng also nodded, turned his hand to take out the storage bracelet, released the seals, and allowed the guests present to investigate.

City Lord Feng Qiao and the others penetrated their consciousness, inspecting the densely packed and numerous low level Primordial Life corpses inside the storage bracelet, and couldn't help but marvel! Seeing these with their own eyes was somewhat exhilarating.

"To harvest tens of thousands of low level Primordial Life corpses at once, impressive, truly impressive," City Lord Feng Qiao exclaimed. "On our side, we will first provide Brother Luo Feng with ten million battle merits, and the auxiliary treasures and various Primordial Bloodline materials you purchased. Additionally, we'll add 53,120 billion Primordial Crystals. As for the remaining twenty million battle merits brother Luo Feng ordered, we estimate to gather them all within a thousand epochs, and then proceed with the delivery."

Luo Feng nodded.

Each ten million battle merits requires 1.3 trillion Primordial Crystals. At that time, I still need to prepare 2.6 trillion Primordial Crystals for the delivery. But that's a matter for the future.

"The Primordial Bloodlines and auxiliary cultivation treasures I need should be sent to Transmission Holy Mountain," Luo Feng said, as his avatar had long been waiting there.

"We'll send them over right away," City Lord Feng Qiao smiled slightly.

...

Transmission Holy Mountain.

One of Luo Feng's avatars sat cross-legged by the dark lake, patiently waiting all this time.

When over in Chengfeng City, City Lord Feng Qiao said "we'll send them over now," Luo Feng saw from afar a ship flying over, landing next to the mountaintop lake within mere heartbeats.

"Luo Feng Divine Emperor," three pinnacle level existences walked out from the ship. Their team was specifically in charge of escorting. Having just exchanged for high level Primordial Bloodlines and the corresponding materials from the large Primordial Hall, the three of them together were enough to handle most dangers in the Dark Sacred Realm.

After all, they were holding goods worth over 6,000 billion Primordial Crystals, and could not be treated lightly.

"Thank you all," Luo Feng stood up to greet.

Confirmation over at Chengfeng City.

Hand over at Transmission Holy Mountain.

After receiving, Luo Feng slightly probed with his thoughts and, after confirming that there were no errors.

"Whew."

Luo Feng jumped directly into the teleportation lake beside, locked onto the spatial coordinates of the Source World 'Land of Origin', and immediately returned.

******

Land of Origin, Quiet Room inside Huyang City Lord's Mansion, within a Star Tower.

"The entire world group centered on the Dark Sacred Realm, all low

level Primordial Bloodlines related to Life and Destruction, have been collected completely. Also, a total of 73 types of high level Primordial Bloodlines of 'Integration of Life and Death' have been gathered."

In this layer of the Star Tower space, all the Primordial Bloodlines were neatly placed, each accompanied by twelve corresponding materials.

Early Stage of Divine Emperor, Middle Stage of Divine Emperor, Late Stage Divine Emperor, Divine Emperor Perfection, Super Limit Level. The low level Primordial Bloodlines were indeed categorized more specifically.

High level Primordial Bloodlines, however, were categorized more roughly.

"All life and death type bloodlines, at most, achieve integration, and there has never been a 'fusion of life and death'," Luo Feng gently shook his head.

Innate Primordial Life, their birth contains the mysteries of various Daos. Be it time, space, life, darkness, destruction... these are all the most original 'Daos'.

They are all pure Daos, without any innate appearance of a fusion Dao.

This is also the reason why the fusion Dao is exceedingly difficult!

"I hope to find a way to break through the bottleneck from these Primordial Bloodlines," Luo Feng's brow opened with the Eye of Life and Death, beginning to meticulously observe the Primordial Bloodlines.

Learning from the corpses of Innate Primordial Life, this is the path of Cultivators.

"Crunch."

Luo Feng turned his hand to take out a red fruit, which he quickly devoured, the invisible energy nourishing his soul consciousness, accelerating his thought process a hundredfold, while also being

incredibly tranquil and comfortable.

Ordinary auxiliary treasures like these, with Luo Feng's wealth, he could now use them regularly.

"Cannot find a breakthrough method."

"There's no way."

With Luo Feng's current level, combined with the secret treasure 'Eye of Life and Death', he can completely see through even the super limit level primordial bloodline.

Although he hasn't researched carefully, a rough glance is enough for Luo Feng to know that none of these primordial bloodlines contain the method to 'control the immense physical form.'

"None of the low-level primordial bloodlines have the method to 'control the immense physical form'." Luo Feng felt a bit disappointed. The 'half primordial life and death path' physical form he envisioned was too immense, much larger than any low-level primordial life forms.

It's seemingly normal to find no answers in these low-level primordial life forms.

"Just have to look to the high-level primordial bloodlines." Luo Feng turned his gaze to the largest of the 73 high-level primordial bloodlines.

This high-level primordial bloodline, carefully preserved, was a crystalline scarlet liquid with faint surreal images, showing a large fiery red bird spreading its wings as if to fly.

"This is my first time observing a high-level primordial bloodline."

The transition from low-level to high-level primordial life is an unprecedented qualitative change. Even hundreds of billions of low-level primordial lives are like offerings before a high-level primordial life.

In the face of such a huge disparity, quantity loses its meaning.

"Buzz."

The 'Eye of Life and Death' at Luo Feng's brow watched the high-level primordial bloodline.

This primordial bloodline, the vitality is exceedingly strong! The mysteries of 'life' account for about fifty percent, 'destruction' about thirty percent, and the rest are 'matter', 'infinite', and other mysteries.

"The difficulty level of observation is much higher." Luo Feng frowned slightly, "Even with the 'Eye of Life and Death', there are still areas I cannot see clearly."

Using the Eye of Life and Death, Luo Feng's observational ability is on par with that of a normal high-level primordial life.

High-level primordial life forms, too, cannot clearly see all the mysteries of another 'high-level primordial bloodline'. It's good enough to see shallow, mid-level mysteries; the deepest layers are shrouded invisibly.

"High-level primordial bloodlines are more suitable for me to comprehend."

The blood-colored scale on the Star Tower, its level is too high, only the most superficial outer layer can be observed.

The Eye of Life and Death itself is a world-level primordial life, still a level considered high.

High-level primordial life—we are now able to attempt to comprehend it at Luo Feng's current realm, it no longer seems beyond reach.

"Historically, there have been cultivators who've comprehended high-level primordial bloodlines, undergoing a bloodline ultimate awakening, breaking free of the braided cage." Luo Feng thought, "If they can achieve ultimate awakening, it's normal for me to comprehend parts of the bloodline."

Patiently, Luo Feng continued his comprehension as day by day passed.

Suddenly, at a certain moment—

"This—"

Luo Feng was stunned. The Eye of Life and Death at his brow was observing parts of the mysteries when he saw the 'spiritual consciousness control of the immense physical form' system he had always longed for.

"I found it, finally I found it." Luo Feng was incomparably excited.

Evidently, on high-level primordial lifeforms lies the direction he had been painstakingly searching for.

"This high-level primordial bloodline, named 'Heavenly Fire Shadow', has an extremely large physical form." Luo Feng thought to himself, "High-level primordial life generally have immense physical forms. Yet, their size still varies greatly."

Luo Feng hurriedly reviewed the other high-level primordial bloodlines.

Spending over a hundred days for a rough look, he searched for similar mysteries of 'spiritual consciousness control of the physical form.'

"In the 73 types of high-level primordial bloodlines, only three types contain the 'spiritual consciousness control of the immense physical form' mysteries, and they are all among the largest in size even among high-level primordial life." Luo Feng smiled.

With these three types of high-level primordial bloodlines as references and guidance, breaking through the bottleneck seems hopeful.

Thankfully!

The high-level primordial bloodlines he bought contain three types that have the 'spiritual consciousness control of the immense physical form' mysteries. If he couldn't buy them, feeling his way in the dark would take who knows how long.

That's how cultivation is! Some innate primordial life unveil the veil, seeing the road ahead makes it much easier to walk.

However, it's not every time one encounters a bottleneck can a 'path' be found on innate primordial life.

"These three high-level primordial life forms, namely 'Heavenly Fire Shadow', 'Ghost Prison Disaster Beast', 'Nine-headed Chaos Beast', are all incredibly huge in size among their tiers."

"Study them one by one."

Luo Feng continued his research on the high-level primordial bloodline of 'Heavenly Fire Shadow.'

Heavenly Fire Shadow is an immense avian creature! Confronting it feels like facing endless heavenly fire, its full appearance is hard to see. Once it spreads its wings, a shadow casts, bringing endless calamity.

"Spiritual consciousness control of the immense physical form..."

Luo Feng's Eye of Life and Death started careful observation.

With the study, Luo Feng too encountered obstacles.

Because the mysteries contained in the primordial bloodline don't exist independently. They are entangled with countless mysteries. To comprehend 'spiritual consciousness control of the immense physical form', Luo Feng needs to unravel these mysteries.

Fortunately, what he bought are primarily high-level primordial bloodlines with life and destruction combined, which Luo Feng can largely unravel.

As time goes by, the mysteries of spiritual consciousness control of the immense physical form gradually unfold before him.

"So that's how Heavenly Fire Shadow controls its immense physical form." Luo Feng, having seen only a small part, understood the most basic principle.

Chapter 367 - 6 Mind Consciousness System (Part 1)

Luo Feng sat cross-legged within the space of the Star Tower, watching the 'Heavenly Fire Shadow"s Primordial Bloodline with the Eye of Life and Death on his forehead, and exclaimed while watching, "Why didn't I think of this before?"

"With my understanding of the Life Path, every life unit contains endless spirituality and can generate self-consciousness," Luo Feng thought. "Given the vastness of the Half Primordial Life and Death Dao's body, the life units it possesses are uncountable."

Theoretically, the Half Primordial Life and Death Dao's body is much larger than the Primordial Cosmos, comparable to some High Level Primordial Life forms in size to some extent. Of course, although the size is comparable, there is still a difference in the nature of life.

With such a large body size, the number of basic life units is countless billions of times more than the particles in a Primordial Cosmos.

Each life unit can generate self-consciousness.

Thus, one can imagine...

How many 'sub-consciousnesses' were generated in total.

Countless sub-consciousnesses, due to sharing the same memory, naturally become unified, merging into Luo Feng's immensely vast complete mind consciousness!

"The life form in my theory of the 'Half Primordial Life and Death Dao' is countless times more complex than the Primordial Cosmos."

"Numerous sub-consciousnesses seem to have unified memories."

"But in reality, these sub-consciousnesses arise from different parts of the life form, and their instincts will have different tendencies."

"Some sub-consciousnesses like to think."

"Some sub-consciousnesses like to fight."

"Some sub-consciousnesses like to sleep."

"Some sub-consciousnesses like 'pleasant' emotions."

"Some sub-consciousnesses like 'angry' emotions."

"Some sub-consciousnesses extremely dislike 'angry' emotions."

"When all sub-consciousnesses are unified, there will be a large amount of attrition, with as much as ninety-nine percent or more being consumed."

Luo Feng understands this point.

Just like everyone has wisdom.

But an army of ten thousand, an army of a hundred thousand, an army of a billion.

The larger the number, the harder it is for the army to be commanded.

The number of Luo Feng's sub-consciousnesses is so vast that even Luo Feng's own realm cannot quantify it. These sub-consciousnesses do not all like to fight, nor do they all like cultivation.

Some simply like extreme leisure! Some like absorbing energy, continually spawning more life units. Others like to eradicate weaker life units.

The vast body based on the 'Life and Death Dao' constantly eliminates weaker life units while nurturing new ones.

"At my realm, if the body were smaller, controlling it would be

easier."

"But I pursue an extremely large body size! Naturally, I encounter this bottleneck."

Any supermassive life form within the Cultivator Camp will encounter this problem.

If this issue is not resolved, controlling such a large body size is impossible.

"Spiritual control of the physical body is essentially establishing a 'Mind Consciousness System', making sub-consciousnesses more efficiently unified and reducing attrition," Luo Feng thought. "Reducing some attrition forms a complete mind consciousness, which can become ten times stronger or even more."

Luo Feng watched with the Eye of Life and Death.

He is well aware that the 'Life and Death Dao' in the late stage of Divine Emperor has reached a bottleneck, with a considerable distance remaining to Perfection! This distance is essentially the absence of the 'Mind Consciousness System.'

Once this massive Mind Consciousness System is integrated, the Life and Death Dao can truly reach the Half Primordial Level!

"The principle is simple, but the Mind Consciousness System itself is very large and complex. The mysteries observed in the Mind Consciousness System from watching the 'Heavenly Fire Shadow' Primordial Bloodline are quite numerous."

At Luo Feng's level, the 'Consciousness Net' with billions of layers densely covers his entire body, commanding all sub-consciousnesses from different levels. This is the Consciousness Net that naturally developed at this stage in his cultivation.

The Consciousness Net itself is already quite perfect! Without pursuing an extremely large body, it is already sufficient.

Enhancing it significantly beyond this foundation is unimaginably difficult.

"There's one troublesome thing. With the High Level Primordial Bloodline, my Eye of Life and Death cannot see the deeper mysteries clearly."

Luo Feng frowned.

The mysteries of the Mind Consciousness System he observed are incomplete, missing the core deepest parts.

"Just relying on the incomplete parts, it will take a very long time for me to perfect the Mind Consciousness System," Luo Feng realized, "It could take millions to even a billion eras."

"I need to find a way to see the complete High Level Primordial Bloodline!"

Luo Feng's eyes lit up, "That's it, in the Infinite Space, there is a treasure that can help me."

******

In the Infinite Space, on Lake Heart Island.

Luo Feng sat cross-legged.

"I have to use the Reward Points I have accumulated at this critical moment." Luo Feng was very familiar with the Infinite Space Treasure Vault, and without hesitation, he exchanged for the desired treasure.

"Exchange for the Wisdom Book!" Luo Feng immediately made the exchange.

The Secret Treasure 'Wisdom Book' requires 200,000 Reward Points for exchange. It is a treasured book made from parts of the Primordial Ancestor's body materials, valued far beyond the Eye of Life and Death. It can analyze everything, study the Great Dao, and assist in one's cultivation.

Like the Eye of Life and Death, it focuses mainly on observing the 'vitality' and 'destruction weaknesses' in everything, whereas observing Primordial Bloodlines is relatively inferior.

The Wisdom Book is most adept at researching Primordial Life Corpses and parsing Primordial Bloodline abilities, naturally superior in this aspect compared to the Eye of Life and Death.

The Wisdom Book is also forbidden to be taken out of the Source World.

"Reminding the Trialists, the Trialists can use the Wisdom Book permanently after the exchange. However, once the Trialist dies, the Wisdom Book will automatically return to the Infinite Space. Please confirm whether to still exchange?"

"Exchange!" Luo Feng was already experienced.

"Exchange Successful! Trialist Luo Feng, this is the ninth exchange of the 'Wisdom Book.' Of the eight previous exchangers, three have jumped out of the Braided Cage to become High Level Primordial Life forms."

Luo Feng revealed a smile.

The Wisdom Book's exchangers have a higher rate of escaping the Braided Cage compared to Eye of Life and Death exchangers.

Moreover, the exchangers of the Wisdom Book, those three High Level Primordial Lives, didn't mention death, which should mean they are still alive? Yet they returned the Wisdom Book to Infinite Space while still alive?

"My Reward Points are only 11,093.03 left," Luo Feng sighed.

The Infinite Space Reward Points that he had been saving up have finally been expended.

"It's worth it to exchange it for this Wisdom Book."

When Luo Feng discovered that researching Primordial Bloodline and Primordial Life Materials provided the greatest help in his Cultivation of the Great Dao, he felt an impulse to exchange for the Wisdom Book! But he held back.

Even when he hit a bottleneck, he still held back.

When he discovered that merely the Eye of Life and Death wasn't enough to see clearly the 'High Level Primordial Bloodline,' only then did Luo Feng use up 200,000 Reward Points.

Good steel is used on the blade's edge! Now is the edge moment!

...

Land of Origin, Quiet Room in Huyang City Lord's Mansion.

Inside the Star Tower.

Luo Feng looked at the black book in his hand. The book looked ordinary, but the price of 200,000 Reward Points had already proven its value. An invisible force seeped through, allowing Luo Feng to understand how to use it.

"Let's try it out."

Luo Feng activated the book with a thought.

An intangible fluctuation enveloped the 'Heavenly Fire Shadow' – a High Level Primordial Bloodline, and in just an instant, it stopped.

"Is the analysis already complete?" Luo Feng was surprised. He opened the cover of the black book in front of him and saw the pages inside.

The pages were crystal-clear, containing countless layers of space.

Luo Feng looked at them.

Layer upon layer of intricate Secret Patterns, like a great tree, permeated the multiple spatial layers within the pages.

This great tree seemed alive, slowly transforming.

Everything was incredibly clear, right in front of Luo Feng.

"This is the complete aspect of the High Level Primordial Bloodline! It simultaneously exists in many spatial layers and continuously changes on the timeline."

"Only by separating it for study in different spatial layers and different time periods can we research its entirety."

Of course, even with the full appearance right in front of you, it is still exceedingly profound.

Like a profound book, even if every word is translated into known words, understanding the whole book is still difficult.

"Buzz."

The Eye of Life and Death on Luo Feng's forehead opened.

The originally exceedingly complex Secret Pattern diagram, under the observation of the Eye of Life and Death, Luo Feng had already discovered the nodes of vitality, destruction weaknesses! Numerous critical 'nodes' were spied upon, making Luo Feng's understanding of this Secret Pattern diagram much clearer.

"Wisdom Book, completely analyzing the Primordial Bloodline."

"Eye of Life and Death can observe many critical nodes of the bloodline Secret Pattern diagram."

"The combination of the two greatly enhances my comprehension efficiency."

Of course, the value of the Wisdom Book is much higher. Without the Wisdom Book, the 'deeper parts' of the High Level Primordial Bloodline could not be delved into; now it's completely exposed in front of Luo Feng without any cover.

"Let's begin."

Luo Feng calmed his mind and studied the three strands of High Level Primordial Bloodline containing the Mind Consciousness System: 'Heavenly Fire Shadow,' 'Ghost Prison Disaster Beast,' and 'Nine-headed Chaos Beast.'

******

Dark Sacred Realm, Chengfeng City.

Luo Feng was temporarily residing in the Cave mansion of his friend 'Bo Xiu Divine Emperor.' In fact, Bai Yin Divine Emperor and Chi Zhen Divine Emperor also lived here permanently!

"My energy reserves are too low," Luo Feng frowned slightly. His body's energy reserves were just over four thousand times that of a Perfect Divine Body, "I need more energy reserves to test my Mind Consciousness System."

During the understanding of the Mind Consciousness System, practical testing is essential. Practice is necessary to prove the effectiveness of the Mind Consciousness System.

Luo Feng has had a short Cultivation time and not many energy reserves.

"Brother Bo Xiu." Luo Feng immediately transmitted to him.

"What's the matter?" Bo Xiu Divine Emperor responded warmly; the three of them were quite willing to serve Luo Feng.

"I need to quickly boost my energy reserves," Luo Feng communicated, "Do you have any good methods?"

"The best way is of course to go to the large Primordial Hall in Primordial City! The Cultivation Cave mansions in the large Primordial Hall can provide infinite vital energy for absorption, as much as can be endured," Bo Xiu Divine Emperor said, "But Brother Luo Feng, you are not suitable to leave Chengfeng City right now. You will need to rely on some special treasures."

"The quickest way is to buy a World Origin Bead! The World Origin Bead can be used to open up a 'Miniature Source World' within the body and serve as the source of the Inner World. Brother Luo Feng, you can refine the World Origin Bead, and it becomes part of you, which will quickly replenish your strength," Bo Xiu said, "World Origin Beads are quite common within Chengfeng City; with a little overpricing, it's easy to obtain one."

"Help me buy one," Luo Feng said. He paid no heed to the increased cost.

"I'll ask my friend immediately…" Bo Xiu Divine Emperor responded shortly after, "It's all set. My friend Feather He Divine Emperor is willing to sell it for 5.5 billion Primordial Crystals without any markup. He will personally deliver it later, as he holds Brother Luo Feng in great reverence!"

The World Origin Beads have been a staple in the large Primordial Hall for long-term sale, each costing 50,000 Battle Merits!

Feather He Divine Emperor resold it for 5.5 billion Primordial Crystals, earning nothing extra.

Although some factions wanted to extort Luo Feng for a big profit, there were also Divine Emperors who hoped to follow Luo Feng. However, those Divine Emperors never found the opportunity.

——

Thanks to the new Alliance Hierarch 'qaqa' for the reward!

Chapter 368 - 7 Mind Consciousness System (Part 2)

"Help me thank Divine Emperor Yu He." Luo Feng sent a message. He now also knew the intelligence on all the peak-level powerhouses in the Dark Sacred Realm. After all, there were barely over a thousand known, and Divine Emperor Yu He was one of them.

"By the way, Brother Luo Feng," Divine Emperor Bo Xiu reminded, "Weren't you planning to purchase powerful Life and Death type secret treasures at a high price? I've released the news, and now it's confirmed that there are five Divine Emperors in Chengfeng City willing to sell Life and Death type secret treasures. They can come to visit anytime. Why not summon them when you see Divine Emperor Yu He?"

"Alright, thank you, Brother Bo Xiu." Luo Feng was quite tempted.

Relying solely on the Undying Heart and Palm World, his combat methods were still too simple. If he had a few more powerful secret treasures, merely coordinating them could enhance his strength.

Moreover, these secret treasures contained higher-level mysteries, beneficial for cultivation.

"It's a small matter."

Bo Xiu didn't mind at all. His team of three had gone to Yulan City and chatted with Master Yuan Xiang! So they knew Luo Feng very well, aware that he had grown to this stage in an extremely short time! The three of them had secretly agreed to follow Divine Emperor Luo Feng for some time.

As long as Divine Emperor Luo Feng hadn't escaped the Braided Cage, they were patient to follow!

They hadn't shared any of Luo Feng's information, and Master Yuan Xiang, who had completely returned to the Source World, hadn't spread the news either.

******

In the edge area of Chengfeng City, within a small cave mansion, a man in a light white robe, 'Divine Emperor Ji Xiu,' received the news.

"Luo Feng Divine Emperor summons? Wants to buy my Life and Death type secret treasure?" Ji Xiu showed a look of joy.

Hoo.

He dared not hesitate and immediately left the small cave mansion.

Ji Xiu looked up at the sky, where black snowflakes drifted and scattered, chilling to the bone. But at this moment, Ji Xiu was filled with excitement and joy: "Finally met a peak existence, willing to purchase my Life and Death type secret treasure. Perhaps, I can make a hefty profit from this!"

The price of such powerful secret treasures varied depending on the buyer. Late-stage Divine Emperor Realm, Half Primordial Daoist Level, and peak-level existences all offered significantly different prices.

Late-stage Divine Emperor Realm dabblers typically started negotiating at twenty to thirty billion Primordial Crystals, with small increments. There's no choice; they were too poor! A few tens of billions of Primordial Crystals would already exhaust all their accumulations. Even the leading figures who mastered two paths of late-stage Divine Emperor, like the Insect Nest Master... they would have to carefully calculate for tens of billions of Primordial Crystals!

For Half Primordial Enlightened like Master Wei Yang and Master Gai Tao, after accumulating over long years, they might have several hundred billion Primordial Crystals. They obviously calculated carefully the price of a powerful secret treasure.

Only peak-level existences could be more 'generous.' When facing a needed secret treasure, they were willing to offer enough premium.

"Hope this so-called high-priced purchase from Luo Feng Divine Emperor could offer more," Ji Xiu thought.

Even a slip through Luo Feng Divine Emperor's fingers.

Might just be all the accumulations Ji Xiu had worked hard for countless eras.

"Hoo."

Ji Xiu flew through a world where black ice-snow scattered, finally reaching the core area of Chengfeng City, where each cave mansion was much larger, with terrifying formations arranged.

"Hurry inside; you're the last to arrive."

"Luo Feng Divine Emperor is meeting with Divine Emperor Yu He; you five wait here for a while."

Arriving at Divine Emperor Bo Xiu's cave mansion, Ji Xiu was led by a Puppet Servant to a side hall, where the other Divine Emperors were gathered.

Ji Xiu glanced around.

Among the waiting five Divine Emperors, three were of 'late-stage Divine Emperor Realm,' and two were of 'Half Primordial Daoist Level.' At the moment, all were waiting patiently, showing no signs of impatience.

...

Luo Feng was currently entertaining Divine Emperor Yu He.

Divine Emperor Yu He had black feathers all over and a bird's head!

The Cultivator Camp could have diverse races, but they generally liked to transform into forms similar to 'Senior Yuan,' while maintaining their racial form like Divine Emperor Yu He was rare.

"This World Origin Bead is also my spoils of war, unused in my hands for billions of eras. Now Brother Luo Feng needs it... seems it's

destined for Brother Luo Feng," Divine Emperor Yu He smiled with his pointed beak, also observing Luo Feng closely.

Although the peak existences of Chengfeng City knew less about Luo Feng compared to Master Yuan Xiang and Divine Emperor Bo Xiu and their group.

They could confirm one thing—

Luo Feng was already a peak-level existence even before coming to the Dark Sacred Realm! Just this alone was enough to make other peak-level existences wary. They naturally lowered their stance when facing Luo Feng.

Only the City Lord's faction, the Secret Ruins Divine Emperor's faction, and the Eight Companions of the Heavenly Wolf, the three strongest forces in the city, had enough confidence when facing Luo Feng!

"Thank you, Brother Yu He," Luo Feng smiled, "I now need this World Origin Bead for my cultivation."

Luo Feng and Divine Emperor Yu He casually chatted, accompanied by Bo Xiu, Bai Yin, and Chi Zhen.

"Brother Luo Feng has other guests, so I won't disturb any longer." This time, Divine Emperor Yu He intended to show goodwill to Luo Feng, building some relations, and after a brief chat, he took the opportunity to bid farewell.

Luo Feng also got up to see him off.

"Divine Emperor Yu He cultivates the paths of death and destruction! Infamously fierce, I've never seen him so amiable," the red-robed young Chi Zhen said with a smile after the other had left.

"There aren't many in Chengfeng City who can suppress his ferocity! Brother Luo Feng is naturally one of them." Bo Xiu also smiled.

"Let the other five guests come over as well," said Luo Feng.

Soon, all five guests arrived.

"Greetings to Luo Feng Divine Emperor, greetings to all Divine Emperors." As they arrived, they all felt the pressure.

The three of Bo Xiu were peak existences in Chengfeng City, with inherently high status. They were seated on the side, yet Luo Feng sat at the main seat, clearly indicating the difference in status.

"You plan to sell the Life and Death type secret treasures?" Luo Feng smiled, "Show them to me; I'll give a suitable high price. If you want to sell, you can sell; if not, you can leave."

"Yes."

The five took out the secret treasures they had prepared.

To cultivate to such strength, they each had fortuitous encounters, obtaining some powerful secret treasures. But not every powerful secret treasure suited them.

Even if a Secret Treasure suits oneself, sometimes it is necessary to exchange 'world-level life materials' and 'powerful Secret Treasures' for resources! Primogenitor Yan Feng and Thunder Ancestor have done such things, with no other choice, as they are quite impoverished in the Dark Sacred Realm. Earning resources by risking one's life is too difficult.

Luo Feng looked at the five treasures in front of him.

A pill furnace, a formation diagram, a big axe, a long spear, and a painting.

"Buzz."

Luo Feng's thoughts penetrated, beginning to inspect these five Secret Treasures one by one.

These Secret Treasures primarily combine 'life' and 'destruction' but also mix in other mystical elements.

"For this pill furnace, I'll offer 20 billion Primordial Crystals. For the other four, I'll each offer 10 billion Primordial Crystals," Luo Feng spoke, "You can decide whether to sell."

All five Divine Emperors revealed expressions of joy upon hearing this.

"We are willing."

"We naturally are willing."

All five were very satisfied with these prices. For powerful Secret Treasures that ordinarily sold for only 3 to 5 billion, Luo Feng offered 10 billion. For the pill furnace that's typically worth close to 10 billion Primordial Crystals, Luo Feng's bid was 20 billion.

Actually, even those at the peak level wouldn't usually be so generous! Luo Feng, after all, made over 70 trillion Primordial Crystals in one go, and his strength allows him to easily hunt some low-level Primordial lifeforms in the wild, giving him the capability to offer such high premiums.

"This Luo Feng Divine Emperor is not ordinarily generous." At this moment, Divine Emperor Ji Xiu was also very excited. The long spear of his had been offered to other cultivators several times at prices generally around 3 to 4 billion, and he always refrained from selling.

This time Luo Feng Divine Emperor purchased it for 10 billion Primordial Crystals, a premium that was so high, Ji Xiu Divine Emperor couldn't earn this much even after endless ages of risking life and limb in the Dark Sacred Realm.

Soon, the transaction was completed.

...

In the Quiet Room.

Luo Feng looked at the powerful Secret Treasures laid out in front of him with great satisfaction. He was well aware that without enough premium, these powerful Secret Treasures, which are unique, often required significant effort to negotiate for and might still be unattainable.

Doubling the offer! That was enough. If the seller remained greedy? Luo Feng would just kick them out.

Although he liked these powerful Secret Treasures, as their numbers grew, one more or less made little difference.

"With these five Secret Treasures, combined with the 'Undying Heart' and 'Palm World,' my strength will increase considerably." Luo Feng nodded with satisfaction, although among these Secret Treasures, he valued the Undying Heart the most.

This was exchanged from the Infinite Space and possessed the strongest life-preserving abilities.

Sigh.

With a flick of his hand, he stored away these powerful Secret Treasures, and Luo Feng took out the World Origin Bead. This black World Origin Bead faintly glowed with a bit of purple light. Luo Feng's force penetrated this World Origin Bead, allowing it to be easily refined.

"What a magnificent World Origin Bead, no wonder it can assist in opening a miniature source world within and even act as the origin of the miniature source world within; the energy is indeed ample." Luo Feng was very satisfied.

After refining the World Origin Bead, its power easily transformed into his own energy.

Rumble~~~~

The transformation lasted for three days.

Luo Feng's physical body's energy reserve soared to a million-fold.

"A million-fold Perfect Divine Body reserve! I now find it exhausting to control such a physical body, though a smile lingered on his face, "Just right to attempt some mysteries of the mind consciousness system."

Time passed.

Luo Feng continued to consume various auxiliary treasures, maintaining his thought speed at generally over a hundredfold! His

mind consciousness system was also slowly forming over time.

...

In the blink of an eye, over a thousand eras had passed.

Within Chengfeng City, some factions were initially ready to cause trouble, hoping to ambush Luo Feng when he left Chengfeng City! Alas... Luo Feng had decided to reside within Bo Xiu Divine Emperor's Cave Mansion, cultivating in seclusion, which thwarted their plans completely.

They understood too, that the wisdom of one who exists at the pinnacle level would not easily give them a chance for plunder.

During these over a thousand eras, Luo Feng also delivered battle merits to the City Lord side twice, all thirty million battle merits had been fully traded.

"Buzz～～～"

In the place where Luo Feng secluded himself, layers of the formation sealed everything, yet this day, the sealing array suddenly opened of its own accord.

The commotion from the formation opening was naturally felt by Bo Xiu, Bai Yin, and Chi Zhen.

"Brother Luo Feng has emerged?" The three of them promptly went to greet him.

They saw the familiar black-clad, black-haired man walk out. They were quite familiar with Luo Feng, yet this time when they saw Luo Feng emerging, it was as though an infinite world was pressing towards them.

They even felt a sense of suffocation.

"Hmm?"

Luo Feng noticed, immediately realizing the issue, "This time, I exited in full physical form, and the pressure is too strong." Previously,

when exiting to hand over battle merits, it was merely through dispatching an avatar; but this time, he was exiting with his enormous physical body.

With a thought.

His formidable physical body temporarily took refuge within the super Secret Treasure 'Scroll World' that he carried, and outside remained only an Avatar with 'ten thousand times energy reserves'! The oppressive feeling naturally diminished quickly.

Bo Xiu and the other two felt Luo Feng's pressure swiftly return to normal.

"Brother Luo Feng seems to have gained quite a lot from this time in seclusion," Bo Xiu laughed as he spoke.

Bai Yin and Chi Zhen also looked at Luo Feng, both secretly startled.

They still clearly remembered the 'oppressive feeling' just now. That was a feeling even the two most publicly powerful in the Dark Sacred Realm, 'Divine Emperor Ji Ke' and 'Dragon Nine Daoist Monarch,' could not bring.

"Indeed, there have been some gains." Luo Feng smiled slightly, then gently shook his head, "But cultivation truly has many obstacles; I am quite troubled and plan to head to the large Primordial Hall in Primordial City."

Chapter 369 - 8 Watching the Enemies

"Primordial City is the first city in the entire Dark Sacred Realm, and the large Primordial Hall has countless resources," Bo Xiu laughed, "Brother Luo Feng, with your sufficient battle merit, you can exchange for more resources there."

The red-robed young man Chi Zhen said, "Brother Luo Feng, you carry tens of trillions of Primordial Crystals with you. Once you leave Chengfeng City, you are likely to be robbed! Even if the three of us joined forces with you, we might not be able to handle the danger."

"It's best to gather another dozen or so pinnacle beings," Bo Xiu suggested, "Brother Luo Feng, you had peak strength before coming to the Dark Sacred Realm. Within Chengfeng City, it's easy to gather some willing to help."

"No need."

Luo Feng gently shook his head, "No need to trouble ourselves so much."

Inviting some peak beings to escort also means owing a favor, and favors are debts to be repaid!

"The three of you can set out with me," Luo Feng said.

"Us?" Bo Xiu and Chi Zhen were somewhat taken aback.

Even Bai Yin Divine Emperor couldn't help but say, "Brother Luo Feng, we've mentioned before that the force led by Secret Ruins Divine Emperor and the Eight Wolves of Heaven are likely to rob. Facing their robbery, we are no match!"

Bo Xiu nodded, "The Eight Wolves of Heaven received gifts from the celestial visitor, and although their temperaments have changed greatly, their strength has increased. Once the eight unite... we three can't withstand even a few moves."

"When the fifteen divine emperors of the Secret Ruins Divine Emperor cooperate, they surpass the Eight Wolves of Heaven, and we can't withstand them either."

"We do need some help."

Bo Xiu was very aware of the terror of the three major forces in Chengfeng City.

Luo Feng smiled and lightly shook his head, "If confronted with robbery, I'll just take action."

Bo Xiu, Chi Zhen, and Bai Yin were somewhat bewildered.

I'll just take action?

They clearly understood the implications of this statement!

"The combination of the fifteen divine emperors of Secret Ruins creates a qualitative change," Bai Yin Divine Emperor looked at Luo Feng, "Unless you have invincible level strength, you can't defeat them."

"Now that you've said that, I'm actually looking forward to their actions," Luo Feng laughed, "Prepare, and once ready, let's set off! If you three are not assured and unwilling to go, I'll just go alone!"

"No, no, no."

"We certainly want to accompany Brother Luo Feng."

"We'll make quick preparations and can set off shortly."

Bo Xiu, Chi Zhen, and Bai Yin all said.

Luo Feng nodded and turned to leave.

Watching Luo Feng's departing back, Bo Xiu, Chi Zhen, and Bai Yin felt their emotions stirring.

"Brother Luo Feng means he has the confidence to deal with the fifteen combined forces of the Secret Ruins Divine Emperor?" The red-robed youth Chi Zhen found it hard to believe.

"You heard correctly, that's his meaning!" Bo Xiu nodded slightly.

"Could Brother Luo Feng already be at the invincible level?" Bai Yin wondered, "If he reached invincible level, shouldn't Senior Yuan and the others be coming to escort him?"

Bo Xiu frowned, "When Brother Luo Feng emerged from seclusion before, that terrifying pressure instantly subsided. But that pressure... I felt it clearly, Brother Luo Feng must have made a significant breakthrough during his seclusion! I guess even if he can't defeat the fifteen divine emperors of the Secret Ruins, he should have the assurance to escape safely."

"Hmm." Chi Zhen and Bai Yin both nodded slightly.

To defeat the fifteen of Secret Ruins Divine Emperor requires invincible level strength.

But to merely escape safely, that's much easier.

...

That same day, Bo Xiu and the other two followed Luo Feng, riding a warship as they left Chengfeng City.

"Luo Feng Divine Emperor has finally left the city, with only Bo Xiu and the other two by his side." On the side of Secret Ruins Divine Emperor, they kept an eye on the happenings within Chengfeng City at all times, leveraging causality sensing to lock on and determine Luo Feng and the others' departure.

"Luo Feng Divine Emperor has been in Chengfeng City for over a thousand eras, purchased many treasures, and exchanged thirty million battle merit. Now, he carries nearly three trillion Primordial Crystals! Should we act?"

"Only less than half remains!"

The original total transaction amount was seventy-three trillion Primordial Crystals, now more than half is gone.

"Even if much has been lost, it's still worth taking action."

"Missing this chance, who else will carry nearly three trillion Primordial Crystals?"

The pinnacle level beings exchanged these ideas.

They had no fear.

Below the invincible level, they had no concerns.

"Since there is no objection, then let's act." Secret Ruins Divine Emperor transmitted the message, "Gather immediately, and catch up with them."

Swish!

A Flying Boat silently departed from Chengfeng City.

...

"Secret Ruins Divine Emperor and his group have set off. Their secret treasure Flying Boat can traverse the void, faster than us."

Inside a black warship, the Eight Wolves of Heaven gathered, the dense dark aura permeating the entire ship, making its interior gloomy and oppressive, with only eight presences influencing each other.

"If Secret Ruins Divine Emperor acts, we won't get any benefit."

"Luo Feng and his group are also four pinnacle levels. If they can just delay a bit longer, we'll catch up. By then, we can join forces with Luo Feng's team. Haha, compared to Luo Feng! Secret Ruins Divine Emperor are better whetstones for us."

"Using Secret Ruins Divine Emperor as whetstones, perhaps we can

make further progress, our spiritual will breaking out of the braided cage, completely escaping pollution."

The gift from the celestial visitor carried a degree of pollution as well.

But this wasn't malicious pollution; it was a little pollution naturally accompanying a great opportunity, thus the Eight Wolves of Heaven were much better off than Yuan Xiang Palace Master, their strength even slightly enhanced.

The Eight Wolves of Heaven already existed at the pinnacle level. With such an opportunity to hone themselves... there's a slim hope for their will to break out of the braided cage.

"This might just be our opportunity."

Chapter 370 - 8 Watching the Enemies_2

"The spiritual will has completely broken through."

The Sky Wolf Eight knew very well that transcending the braided cage of life levels was extremely challenging. It's much easier to first have the 'spiritual will' break free from the braided cage.

...

"The Secret Ruins Divine Emperor's side and the Sky Wolf Eight's side have both pursued them, let's go take a look too."

"Send an avatar to observe this great battle."

There were just over a hundred peak level existences within the city, and information circulated swiftly. Many peak level existences dispatched avatars to witness this terrifying battle.

******

Inside the ancient ship.

Bo Xiu, Bai Yin, and Chi Zhen were feeling a bit tense.

"I can sense the causality of the Secret Ruins Divine Emperor and others; they are swiftly closing in," Chi Zhen transmitted telepathically, "It won't be long before they catch up."

"Not only the Secret Ruins Divine Emperor, but the Sky Wolf Eight are also closing in," Bai Yin Divine Emperor also felt the pressure at this moment.

Bo Xiu looked toward the fore cabin of the ship.

In the fore cabin, Luo Feng stood alone, gazing at the external scenery with a smile.

The vast world spread endlessly; in one spot on the left, all matter turned into a stream of particles. This grand stream of particles flowed like boiling water, constantly surging and emitting dispersed energy. In a distant place ahead, a vortex of raging winds shredded everything.

In the Dark Sacred Realm, numerous harsh environments existed, making it impossible for weaker low-level primordial life forms to survive.

"What a magnificent sight," Luo Feng commented with a relaxed smile.

He truly did not deem the fifteen peak existences of the Secret Ruins Divine Emperor's side and the Sky Wolf Eight worthy of concern.

For over a thousand eras of cultivation, Luo Feng had been using the 'Wisdom Book' and the 'Eye of Life and Death' as aids, supplemented with various cultivation treasures, maintaining a thought process speed at least a hundred times faster.

"These three high-level primordial bloodlines, containing 'mind consciousness systems,' I've seen them clearly and studied them countless times."

"But their mind consciousness systems are the most suitable for themselves, not for me."

The Heavenly Fire Shadow, Ghost Prison Disaster Beast, and Nine-headed Chaos Beast each had completely different mind consciousness systems.

The Heavenly Fire Shadow, its mind consciousness system penetrated into every part of life force.

The Ghost Prison Disaster Beast, self-contained like a prison, self-imprisoning layers of life force. Its mind consciousness system also actively imprisoned and constrained layers of life force. In this form, it could have an immensely large body, but most of it was self-

imprisoned. Its strength for direct eruption was not very impressive, but it could 'continuously' erupt.

The Nine-headed Chaos Beast, however, had nine separate consciousnesses! Each consciousness controlled part of the body, allowing each to develop freely, intertwining, and influencing each other.

"I obtained three complete mind consciousness systems, extracting parts suitable for me, to construct my own mind consciousness system," Luo Feng pondered.

"After perfecting through over a thousand generations, my mind consciousness system now has a prototype and can perfectly control a 'millionfold Perfect Divine Body energy reserve.'

Luo Feng was quite satisfied with this progress.

Compared to before his seclusion, he had improved vastly.

"But in theory, the half primordial Life and Death Path should master a twelve billion-fold energy reserve. So I need to go to the large Primordial Hall, where my physical body can quickly reach twelve billion-fold," Luo Feng thought.

Enhancing the physical body to a sufficient size, continuously experimenting with the mind consciousness system.

"They are here," Bo Xiu, Bai Yin, and Chi Zhen instantly gathered beside Luo Feng, all sensing the surroundings solemnly.

Through causality, it was confirmed that the Secret Ruins Divine Emperor and the fifteen peak existences had already arrived nearby.

"Fifteen peak existences?"

Luo Feng's brow opened the 'Biomimetic Destruction Eye,' watching the surroundings with interest.

Suddenly——

The vast surrounding turned into endless darkness.

In this endless darkness, there was no sense of direction or light. Luo Feng, Bo Xiu, Bai Yin, and Chi Zhen could only observe their surroundings through secret techniques.

"Quite a formation," Luo Feng lightly praised.

His Biomimetic Destruction Eye could see in the endless darkness it was actually the united forces of fifteen peak existences! Be it blazing hot flames, invisible annihilating winds, black liquid devouring everything, or billions of insects gnawing away everything…

The fifteen peak existences operated their forces in unison, under the coordination of the formation, leading everything to annihilation, to be ground to return to the origin.

The realm covered by the formation seemed to be heading towards an end.

Even peak level existences would be destroyed and annihilated before such a formation.

"It's the Primordial Annihilation Array!" Bo Xiu, Bai Yin, and Chi Zhen were getting nervous and looked toward Luo Feng at their side.

What happened to 'I'll take action in a moment'?

"The primordial rules operate, reducing everything to extinction? It has a hint of apocalypse," Luo Feng commended, "The Secret Ruins Divine Emperor must have witnessed the apocalypse of the Source World before."

"But this level of apocalypse is too fragile."

Luo Feng took a step.

Whoosh.

Instantly out of the ship, rising into the air.

Luo Feng stood in mid-air, perfectly controlling over a millionfold Perfect Divine Body energy reserve, and instantly, with Luo Feng at the center, the vast surrounding space began to collapse and distort.

In the battle of Yulan City, even with such a weak eruption of power, Luo Feng could tear open the seams of the world.

Now, the might of his life form was vastly stronger than during the battle of Yulan City, causing the nearby millions of kilometers of space to completely warp and collapse under extensive eruption. The closer to Luo Feng, the more severe the spatial distortion, and the faster the time flow.

"What's happening?"

The fifteen peak existences of the Secret Ruins Divine Emperor, initially hidden within the formation, each felt how the space-time of their location was collapsing.

It was as though a very 'heavy' presence was causing the space-time to collapse!

"How stable is the space-time of the Dark Sacred Realm? Even short-distance travel is incredibly difficult. How could such a large-scale collapse of the world occur?"

"Did Luo Feng Divine Emperor achieve this?"

"How is that possible?"

The fifteen peak existences could see the figure dressed in black standing at the center in the distance.

At this moment, they could even see with the naked eye how the entire space-time of the world collapsed with 'Luo Feng' at the center, where he was located was the core of collapse and distortion. The vast surrounding area twisted and was absorbed, the formation naturally shattered, and they were pulled by the collapsing space-time, forced toward Luo Feng.

"Space-time is too heavy; I can't break free!"

"Can't escape."

"Within this area of collapsed space, there is no way to perform space travel."

The fifteen peak existences despairingly found they had no ability to escape.

In the face of vast world collapse, they couldn't form a formation, couldn't cooperate; each had to individually deal with the collapsing time and space! Each was being pulled toward Luo Feng.

Luo Feng stood there, calmly watching this scene.

He only needed to stand there, and the enemies would voluntarily come to him, one by one.

Chapter 371 - 9 Invincible Level

"Is he an invincible being?"

"The fifteen of us at the peak level joined forces and are completely powerless, this must be invincible!"

"Shouldn't invincible beings be ushered away?"

While being swept away by the collapsed space-time, being forced towards Luo Feng, Secret Ruins Divine Emperor and the fifteen Divine Emperors were somewhat unable to accept what they were experiencing at the moment; they had actually offended an invincible!

In the Dark Sacred Realm, the peak level is already considered the highest, after all, an invincible being is born and will be ushered away.

Invincible means unchallengeable.

Invincible means a high probability of breaking free from the Braided Cage!

Once it's determined that a cultivator has the potential to be 'invincible,' peak level powerhouses would willingly become followers, hoping the invincible one can give them some opportunity in the future.

"We've met an invincible, yet didn't become friends with him, didn't follow him... instead, joined forces to attack him?"

"How did this happen? The battle of Yulan City just took place not long ago, at that time he was merely at the peak level! It's only been a thousand epochs, how is he invincible now?"

"Did we actually try to rob an invincible?"

Secret Ruins Divine Emperor and the fifteen Divine Emperors were desperate.

Rumble~~~~

When the fifteen were brought close to Luo Feng by the collapsed space-time, an invisible force enveloped them, finally stabilizing them, all standing before Luo Feng.

"Greetings, Luo Feng Divine Emperor!" Though these fifteen Divine Emperors felt flustered and desperate at heart, on the surface they were respectful, not daring any disrespect.

"You came to rob me?" Luo Feng looked at them with interest, while the space-time within billions of kilometers kept collapsing and twisting, leaving these fifteen Divine Emperors no hope of escape.

"We were foolish."

"We were misled."

"We coveted resources and succumbed to greed."

"Please, Luo Feng Divine Emperor, spare us."

The Divine Emperors pleaded, each one with a low posture.

"Bo Xiu, Bai Yin, Chi Zhen, what do you think?" Luo Feng glanced to the side, where Bo Xiu, Bai Yin, and Chi Zhen remained stable amidst the collapsed space-time under his protection.

They looked at the scene surrounding billions of kilometers, somewhat shocked.

'I can handle it,' is this how it's done?

Brother Luo Feng is already invincible?

They haven't been following him for long, not enough time to accumulate deep ties!

"Brother Luo Feng," Bo Xiu was the first to steady his emotions, then said, "Among cultivators, robbery is a major enmity. They came to rob, however Luo Feng decides to punish, it wouldn't be excessive! Even if he massacred their avatars, making it impossible for them to survive in the Dark Sacred Realm, it would be justified."

"Right," Chi Zhen instantly followed up, "Brother Luo Feng already has invincible strength, he only needs to spread the word to five cities, and the entire Dark Sacred Realm will no longer have space for them to survive."

Their words made Secret Ruins Divine Emperor and the fifteen Divine Emperors somewhat anxious.

Most of them emerged from the Source World, losing a few avatars is insignificant! But if Luo Feng were to eradicate them, making it impossible to thrive in the Dark Sacred Realm, the impact would be great.

They accumulated wealth and battle merit to exchange for resources at the large-scale Primordial Hall.

Without access to the Dark Sacred Realm, cultivation resources would be reduced by ninety-nine percent.

"We know we've made a grave mistake." Secret Ruins Divine Emperor proactively knelt down, "Please, Luo Feng Divine Emperor, grant us a glimmer of hope, do not sever our path of cultivation."

The grand presence of a peak level being, proactively kneeling?

The fourteen companions hesitated slightly, but soon one by one they knelt down too! As the kneeling number grew, even those initially hesitant ultimately knelt down.

"We admit our wrongdoing, please, Luo Feng Divine Emperor, grant us a glimmer of hope."

Each one pleaded kneeling.

Clearly, they could hide in the Source World indulging in pleasure, yet for the chance of cultivating, they chose to plead kneeling.

Luo Feng watched them.

Bo Xiu, Bai Yin, Chi Zhen also watched from the side, without interrupting, at this moment, only Luo Feng could decide the fate of the fifteen Divine Emperors.

"Since you came to plunder me, you must pay the price!" Luo Feng felt no pity for these robbers, but most of these fifteen Divine Emperors were Source World cultivators, whom he couldn't completely kill.

"Each of you will compensate me with five trillion Primordial Crystals, totaling seventy-five trillion Primordial Crystals. This amount is nearly equivalent to what I sold with that batch of Low Level Primordial Life corpses."

Luo Feng looked at them, "Compensate me seventy-five trillion Primordial Crystals, and I will let you go."

"Otherwise, I promise that the fifteen of you will never be able to establish yourselves in the Dark Sacred Realm."

After this robbery and Luo Feng's demand for massive compensation, the causality between both parties instantly deepened! Luo Feng could use the 'Biomimetic Destruction Eye' to lock onto the location of each of their avatars anytime.

"Seventy-five trillion Primordial Crystals?" The fifteen Divine Emperors present were somewhat stunned.

"Are we each to pay five trillion, or must we collectively pay seventy-five trillion Primordial Crystals?" Secret Ruins Divine Emperor asked first.

"Collectively pay."

Luo Feng replied, "One missing, and it won't do! One missing... all the rest will be implicated!"

Secret Ruins Divine Emperor and the fifteen felt a shiver in their hearts.

Among them, there are differences in strength, the leader like Secret Ruins Divine Emperor, whose formation expertise is among the top three among cultivators in the Dark Sacred Realm, can effortlessly offer up five trillion Primordial Crystals. But some weaker ones among them, who consumed a lot of resources and exchanged for battle merit, simply can't afford five trillion Primordial Crystals.

"I know it's not easy for you to gather seventy-five trillion Primordial Crystals." Luo Feng watched them, "I give you a thousand epochs to gather! If after a thousand epochs, you still haven't paid in full, I'll dispatch my avatar... across the Dark Sacred Realm and obliterate every one of your avatars."

Secret Ruins Divine Emperor and the fifteen felt apprehensive.

A target for the invincible?

When Luo Feng breaks free from the Braided Cage, could he become a target for a High Level Primordial Life? Or even a World Level Primordial Life?

"We will gather the compensation within a thousand eras," the Secret Ruins Divine Emperor spoke respectfully, and the other Divine Emperors had no choice.

"We will definitely gather the compensation," they all promised in front of Luo Feng.

At this moment, they regretted immensely.

They couldn't plunder even a bit, but instead owed seventy-five trillion Primordial Crystals!

...

At this moment, a black ship finally arrived.

The eight friends of Sirius on the ship looked towards the front from a distance.

"We've caught up!"

"I can confirm, Bo Xiu and the others are still there, their avatars are still alive, they should still be holding on!"

The eight friends of Sirius rushed towards the location at full speed with the black ship, but when they got close and saw the scene encompassing billions of kilometers, they were somewhat dazed and unconsciously slowed down.

"What's going on?"

"Why has this space-time collapsed?"

They were taken aback by the sight of space-time collapsing into a vortex. Everyone knew how stable the Dark Sacred Realm was; only a peak-level existence could make even short-distance transitions.

What kind of power could cause such a vast collapse of space-time?

"The eight friends of Sirius?" a voice suddenly echoed in their ears.

The originally collapsed range of space-time expanded suddenly, instantly enveloping the black ship of the eight friends of Sirius, capturing it without resistance and dragging it towards the center of the collapsed space-time.

"Not good, we can't stabilize the ship!"

"The collapse here is too terrifying; we can't escape!"

The eight friends of Sirius were a bit panicked, and suddenly they could clearly see the scene at the center of the space-time. There, a man in black clothes with black hair stood.

This black-clothed, black-haired man was the absolute core of the vast surrounding space-time! He exuded an oppressive aura that made them tremble. The space-time collapsed centered on him, becoming more dreadful the closer they were to him.

At this moment, Bo Xiu, Bai Yin, and Chi Zhen respectfully stood aside.

At this moment, all fifteen Divine Emperors, including the Secret

Ruins Divine Emperor, knelt before this black-clothed, black-haired man.

"This..."

The eight friends of Sirius were shocked to the core.

This scene was too intense.

For peak-level existences, even if a few avatars were destroyed, kneeling was unlikely!

But now, all fifteen peak-level existences were kneeling!

"Such a wide-ranging collapse of space-time is actually due to Luo Feng Divine Emperor? This kind of power far surpasses the peak level. He is an invincible existence," the eight friends of Sirius instantly judged Luo Feng's terrifying strength.

"The Secret Ruins Divine Emperor and the other fifteen came first," Luo Feng looked at them, "and now the eight friends of Sirius have arrived. Are you also here to assassinate me?"

The eight friends of Sirius were dumbfounded.

"The eight friends of Sirius are savage by nature, most likely also here to assassinate Luo Feng Divine Emperor," one of the kneeling Divine Emperors said.

"They set out from Chengfeng City almost simultaneously with us, we just arrived a bit earlier," another kneeling Divine Emperor said.

Luo Feng nodded: "Also came to assassinate me..."

"No, no, no, we are not!" the eight friends of Sirius quickly responded, hurriedly saying.

"We just came to watch the excitement and see this great battle."

"The Secret Ruins Divine Emperor's Flying Boat is much faster than ours. We never had the intention of assassinating them!"

"We were even thinking of helping Luo Feng Divine Emperor and fighting against the Secret Ruins Divine Emperor. Battling with the Secret Ruins Divine Emperor would also temper ourselves and aid our cultivation."

"We used to follow Senior Sky Wolf. In terms of resources, we're not lacking. We have no need for plundering."

The eight friends of Sirius, though slightly tainted and a bit savage in disposition, remained absolutely calm in the face of this scene, not daring to show the slightest arrogance.

Luo Feng nodded slightly upon hearing this: "Makes some sense."

"Those eight are greedy and savage, acting at will," Bo Xiu remarked, "but their Flying Boat is too slow for an assassination. Given their disposition, it's very likely they would act against the Secret Ruins Divine Emperor."

"Brother Bo Xiu, you're absolutely right! We intended to help Luo Feng Divine Emperor and deal with the Secret Ruins Divine Emperor," the eight friends of Sirius said anxiously.

...

At this time, in the oldest large Primordial Hall in 'Primordial City', the first city established in the Dark Sacred Realm.

The large Primordial Hall covered a vast area, larger than Yulan City, and contained numerous cave mansions within.

"Hmm?"

A silver-haired, silver-eyebrowed man gazed distantly towards where Luo Feng was.

"Using the Secret Treasure carried with him to enhance, the power of his massive physical body manifests in such a way that causes such a widespread collapse of space-time," the silver-haired, silver-eyebrowed man marvelled, "This power already far exceeds the peak level, certainly considered invincible."

"His physical body surpasses even the super limit level Primordial Wild Hoof significantly," said a fire-red robed woman also watching from afar, "Without breaking free from the Braided Cage, his physical body has already reached such a level? Truly rare."

"Confirming that he is indeed invincible, then let's report to the Lord," the silver-haired, silver-eyebrowed man said.

"I agree, let's report to the Lord," the fire-red robed woman nodded in agreement.

Chapter 372 - 10 Two High Level Primordial Life Beings

In a palace deep within the large Primordial Hall, a silver-haired, silver-browed man and a woman in a fiery red robe reported together, patiently waiting.

"Buzz."

An invisible wave descended, transforming into an elder, who was the Senior Yuan that had seen Luo Feng before.

"Lord!" The silver-haired, silver-browed man and the fiery red-robed woman were incredibly respectful. Although they too were high-level Primordial Lifeforms that had escaped the Braided Cage, it was precisely because they had escaped that cage that they understood the gap between themselves and the lord.

"Qiu Ge, Yifeiya," Yuan smiled and said, "Has an invincible level finally emerged from the Dark Sacred Realm?"

"His name is Luo Feng, from the Source World 'Land of Origin', and he has only been in the Dark Sacred Realm for a thousand epochs," the silver-haired, silver-browed man said.

The fiery red-robed woman also said, "His spiritual will hasn't yet escaped the Braided Cage, nor has he converted to the Primordial Bloodline system, but his strength is already at the invincible level."

A wisp of Yuan's consciousness descended upon the Dark Sacred Realm, and nothing that happened within it could be hidden from him. He already knew everything that had happened to Luo Feng.

"Luo Feng?"

Yuan looked from afar.

At this moment, Luo Feng was causing the collapse of the vast realm void, with Secret Ruins Divine Emperor and fifteen others kneeling, the Eight Friends of Sirius uneasy, and Bo Xiu and three others attending on the side.

"A little guy from the Land of Origin." Yuan certainly knew Luo Feng.

In his domain, he would always take a look at every Ultimate Realm born from the Source World.

"Once again, someone emerges from the Source World," Yuan shook his head slightly, "The billion worlds we built, though far exceeding the Source World in number, have 'World Origin' with too many flaws compared to the Source World Origin. The creatures they nurture have obviously less potential in cultivation."

The billion worlds have a larger quantity, even stronger bloodlines, and many become Divine Emperors.

But the further one goes, the higher the proportion of Source World powerhouses becomes.

Those who reach the end to become 'Primordial Lords' are all from the Source World!

"Lord, should we guide Luo Feng?" the silver-haired, silver-browed man asked.

"No hurry."

Yuan looked at Luo Feng, "He is just one step away from the 'Half Primordial Life and Death Path', and he is perfecting it now. At this time, do not disturb him. Once he has perfected the Half Primordial Life and Death Path, I will then guide him."

"He is already at the invincible level. Every cultivator in the Dark Sacred Realm who reaches the invincible level will be guided," the silver-haired, silver-browed man couldn't help but say, "If Luo Feng is not guided, it might cause confusion among many Dark Sacred Realm cultivators."

"Let them be confused," Yuan smiled slightly, "The ones I truly aim to guide are the cultivators who are about to escape the Braided Cage."

"If one's spiritual will escapes the Braided Cage, refines the World Level Primordial Bloodline successfully, or reaches the Half Primordial Level Fusion Dao, I will guide them if any one of these three conditions is met. Luo Feng currently does not meet any."

"We understand," said the fiery red-robed woman on the side, "If one's spiritual will can escape the Braided Cage, they can resist higher spiritual pollution and have hope of completely refining the 'High Level Primordial Bloodline', becoming a high-level Primordial Life."

"Achieving something by refining the World Level Primordial Bloodline, becoming a high-level Primordial Life, is also quite easy."

"But this Luo Feng, how can he have such strength if his Life and Death Dao hasn't reached the Half Primordial Level?" the fiery red-robed woman Yifeiya was somewhat puzzled, and the silver-haired man was also confused.

Yuan smiled.

"Even though both are Fusion Dao, the display of strength varies," Yuan looked at Luo Feng from afar, "This Luo Feng's Life and Death Dao pursues the extreme! Walking the extreme path, though it makes the journey difficult, the strength is indeed formidable."

"An extreme path?" Qiu Ge and Yifeiya nodded slightly.

"In the Fusion Dao, one should focus more on balance! Once the path becomes extreme, the difficulty rapidly increases." Yuan watched Luo Feng with interest, "I'm looking forward to seeing how far Luo Feng can go."

Yuan only paid slight attention to the Ultimate Realm of the Source World.

He only valued the ordinary invincible level slightly more.

But for Half Primordial Fusion Dao cultivators, Yuan was immensely looking forward to it.

"You two must keep an eye on Luo Feng. As soon as he reaches Half Primordial, inform me immediately," Yuan instructed.

"Yes," Qiu Ge and Yifeiya respectfully complied.

Yuan then disappeared.

******

At that moment, the collapsed temporal and spatial realm had already returned to calm.

"We will definitely gather full compensation within a thousand epochs," the attitude of Secret Ruins Divine Emperor and the fifteen others was sincere. Facing an invincible entity, they had no other thoughts and only wished to dispel this invincible entity's hostility.

Luo Feng nodded.

"Let's go," Luo Feng immediately took Bo Xiu, Bai Yin, and Chi Zhen onto the spaceship.

"Respectfully sending off Luo Feng Divine Emperor," the Eight Friends of Sirius were also very respectful, still filled with lingering fear.

Fortunately, Luo Feng Divine Emperor was wise enough not to vent his anger on them.

Rip—

A crack appeared in the sky, and the distant spaceship instantly passed through the crack, disappearing at the horizon.

"Long-distance space travel?" Bo Xiu, Bai Yin, and Chi Zhen were astonished.

They could clearly feel the spaceship traversing between the cracks in space, with every journey covering an immensely vast distance. It could already be described as 'long-distance space travel.'

Luo Feng glanced at them.

Previously, there was no rush to hurry because he was quite interested in Secret Ruins Divine Emperor and the others! After all, being able to defeat the fifteen of them together was proof that he had reached the invincible level!

"From this battle, their cooperation of fifteen was only mediocre," Luo Feng mused, "Without a doubt, I should be considered at the invincible level recognized by the Dark Sacred Realm."

"At the invincible level, it is said one will be guided."

"Why hasn't anyone guided me yet?"

Luo Feng thought.

He is not in a hurry to travel; on one hand, he wants to test his own strength, and on the other hand, he wants to showcase it, so that they might come to escort him.

"Brother Luo Feng." Though Bo Xiu's feelings were turbulent, his mind was sharp, allowing him to guess a hint of Luo Feng's current thoughts, and he immediately continued, "By publicly showcasing your invincible strength this time, I believe it won't be long before Senior Yuan comes to escort you."

Bo Xiu added, "Senior Yuan and they are busy with matters, so it might take some time, even a delay of a few thousand eras isn't uncommon."

Luo Feng nodded.

"Let's head to the large Primordial Hall first."

Luo Feng no longer held back, controlling the ship, using the seams of heaven and earth, to speed toward Primordial City in a super-fast manner.

...

In Chengfeng City, some pinnacle beings dispatched avatars outside the city to witness this great battle.

"The Secret Ruins Divine Emperor and the Wolf Eight Companions have returned."

Through causal sensing, they all confirmed that the fastest traveling Secret Ruins Divine Emperor and the Wolf Eight Companions had all returned.

"It seems the pillage has ended."

"I can sense that Bo Xiu and the others are still alive, heading straight for Primordial City."

"It seems Luo Feng Divine Emperor could not stand against them, so they surrendered, willingly offering tens of trillions of Primordial Crystals, allowing the Secret Ruins Divine Emperor to let them go."

These pinnacle beings speculated.

Looking at the results.

Luo Feng's side, the Secret Ruins Divine Emperor's side, and the Wolf Eight Companions' side, two sides pursued the other... yet, all three sides remained living well.

They could only speculate that Luo Feng's side obediently lowered their heads, offering treasures to avoid slaughter.

"What happened?"

The City Lord of Fengqiao also felt puzzled, "Bo Xiu excels in scheming, and Luo Feng is unfathomable. How could it be so easy to pillage tens of trillions of Primordial Crystals from them? Yet none of the three sides met their demise."

"Secret Ruins Brother." The City Lord of Fengqiao was straightforward, directly sending a message to the Secret Ruins Divine Emperor, "Heard you pillaged tens of trillions of Primordial Crystals from Luo Feng Divine Emperor?"

In terms of individual status in Chengfeng City, the City Lord of Fengqiao ranks first, the Secret Ruins Divine Emperor second.

"No!"

On the way back, the Secret Ruins Divine Emperor received the message and quickly clarified, "Luo Feng Divine Emperor's strength is invincible throughout the Dark Sacred Realm, how could we pillage tens of trillions of Primordial Crystals from him?"

"What did you say?" The City Lord of Fengqiao was stunned, immediately pressing further, "You say he's invincible in the Dark Sacred Realm?"

"Yes, invincible." The Secret Ruins Divine Emperor confirmed, "Luo Feng Divine Emperor is an existence at the Invincible Level!"

The City Lord of Fengqiao felt a bit dazed.

Once, there was an invincible existence living in his Chengfeng City for a thousand eras.

He had traded several times with this invincible existence, and even made considerable profits from these transactions.

"I profited from an invincible existence's resources?" The City Lord of Fengqiao only felt regret at this moment.

An enormous opportunity had once been right before him.

He missed it!

"He arrived in the Dark Sacred Realm for a thousand eras, and hadn't even visited the large Primordial Hall, yet he was already at the Invincible Level. What terrifying potential is this?" The City Lord of Fengqiao gritted his teeth, "I must go over there! Even to heed just a bit of his guidance is worth it!"

He immediately decided to send a main avatar to quickly head to the large Primordial Hall.

"I must quickly tell my senior brother." The City Lord of Fengqiao thought.

His senior brother is the Dragon Nine Daoist Monarch, who resides in

the large Primordial Hall of Primordial City.

******

Primordial City, the first city of the Dark Sacred Realm.

Swoosh.

A ship suddenly appeared outside Primordial City through a blurry seam in the heavens.

"We've arrived." Bo Xiu, Bai Yin, and Chi Zhen looked at Primordial City right in front of them, surprised by the speed! In just moments, they had already reached Primordial City.

Luo Feng's gaze had already set upon the large Primordial Hall within the city.

At this moment—

Inside the large Primordial Hall, two High Level Primordial Lives were also watching Luo Feng.

"He's here." Qiu Ge and Yifeiya noted.

"According to the Lord's words, Luo Feng is now just one step away from the 'Half Primordial Life and Death Path', and not being hindered by a bottleneck, he's continuously perfecting." Qiu Ge marveled, "With his cultivation speed and potential, the final obstacles couldn't stop him."

"Indeed, soon he'll surpass us." Yifeiya also had a hint of envy.

The three paths at the Invincible Level.

The first two paths involve refining Primordial Bloodlines to eventually become High Level Primordial Lives.

The last path is different.

"The Half-Primordial Fusion Path, under the nurturing of the Lord and others, typically grants the potential to become 'World-level

Primordial Life', and upon mastering the home Source World, becomes the Master of the Source World." Qiu Ge also envied.

World-level Primordial Lives, even within the entire Cultivator Camp, are exceedingly scarce.

In terms of status and strength, they're far superior to us.

Chapter 373 - 11 The Weight of 1.2 Billion Times

Primordial City stands tall and vast, while a spacecraft is flying mid-air.

"This Primordial City is indeed extraordinary."

Luo Feng observed the outside from within the spacecraft. He controlled Yulan City and had lived in Chengfeng City for over a thousand eras, instantly noticing the difference between Primordial City and other cities; this city is much more formidable and terrifying.

Beside him, Bai Yin Divine Emperor said, "This place was built by Senior Yuan and the others. The treasures stored here are countless, including seven 'World-level Primordial Life Corpses'. Naturally, Primordial City is indestructible; no matter how numerous the low-level Primordial Lives are, they cannot make a step into Primordial City."

Luo Feng nodded.

"Although it's very safe, residing in Primordial City is not easy," Bo Xiu smiled. "There is no residence fee here, but you must have your own cave mansion. The cave mansion prices are the highest in the entire Dark Sacred Realm. Of course, for those at the Pinnacle, purchasing a cave mansion is very easy."

Luo Feng nodded.

He sensed that the ancestors of the two nations from the Land of Origin reside in Primordial City! It can be seen from this that the ancestors from the Source World are relatively wealthy.

"The cave mansion in the large Primordial Hall is the most expensive. Moreover, it cannot be rented, only purchased," said the red-robed young man Chi Zhen.

Luo Feng looked into the distance, even from afar, clearly seeing the majestic and vast large Primordial Hall, resembling an octagonal city, covering a vast area.

"Large Primordial Hall."

Luo Feng whispered to himself, as he had come to the Dark Sacred Realm mainly for this large Primordial Hall.

...

As the four entered the large Primordial Hall, invisible fluctuations engulfed them.

"Cultivator Luo Feng, what service do you need?" A gentle voice sounded, simultaneously conveying the information of all services provided by the large Primordial Hall.

"I need to purchase a cultivation cave mansion within the large Primordial Hall," Luo Feng replied.

"A cultivation cave mansion; exchange price is 1 million Battle Merits, confirm exchange?" responded the gentle voice.

"Confirmed exchange."

Coming here, Luo Feng's primary goal was for this cultivation cave mansion.

It's known that in a city like Yulan City, the exchange price is merely 2 million Merit Points! Just a cultivation cave mansion costs so much, even for those at the Pinnacle level, only a few are willing to buy.

"Cultivator Luo Feng, you have exchanged for Yi Jiu Cave Mansion! From this moment, the realm of time-space where Yi Jiu Cave Mansion is located is entirely centered around you," said the gentle voice.

Luo Feng immediately sensed that deep within the large Primordial Hall, an independent realm of time-space had established a connection with him.

"Brother Luo Feng."

Bo Xiu, Bai Yin, and Chi Zhen looked at Luo Feng.

"We didn't purchase a cave mansion in the large Primordial Hall," Bo Xiu said. "We all reside long-term in Chengfeng City; in Primordial City, we only bought a simple cave mansion."

"We won't disturb you here," Bai Yin Divine Emperor also said.

"Brother Luo Feng, need us to continue acquiring Life and Death Secret Treasures?" asked the red-robed youth Chi Zhen.

"Alright."

Luo Feng said, "Select a few quality ones; five secret treasures are enough."

Currently, his priority is for the Life and Death Dao to reach a Half-step Primordial Level, after which he will be summoned. The importance of these Life and Death Secret Treasures has significantly diminished.

But Luo Feng is quite wealthy, as Secret Ruins Divine Emperor and others will soon deliver 7,500 billion Primordial Crystals, so Luo Feng won't be stingy.

"We understand."

"Brother Luo Feng, give us any instructions whenever necessary."

Bo Xiu, Chi Zhen, and Bai Yin then bid farewell.

Luo Feng watched them leave and then followed the sensation flying towards Yi Jiu Cave Mansion.

******

Within the large Primordial Hall, resembling a labyrinth of time and space.

Luo Feng flew sensing the direction, without encountering any obstacles, reaching the realm of time-space he sensed.

"A cave mansion is a separate realm of time-space? It even contains the origin power of the world, naturally operating with rules?" Luo Feng was surprised, no wonder it sells for such a high price, as the owner of the cave mansion is naturally the master of this world.

Buzz!

As the world owner, the origin power of this realm can be easily converted into one's own power.

Origin power can nurture all matters and all life, during conversion, there's no obstruction.

"The origin power nourishes the physical body and soul, allowing thinking speed to increase tenfold, while providing utmost comfort," Luo Feng felt the miraculous source power of the world, "It's truly a treasure land for cultivation."

"First absorb energy to reach 12 billion times."

Luo Feng began his full absorption efforts.

No matter how much origin power Luo Feng absorbed, the origin power of this world showed no signs of reduction.

Luo Feng's conversion speed nearly reached the limit that his mind consciousness could bear.

"Two million times, three million times... ten million times... fifty million times... three hundred million times..."

Luo Feng sat cross-legged in the realm between worlds, his body growing larger, until finally reaching twelve billion times where it completely stopped.

"Just in a moment, it reached twelve billion times?"

Luo Feng was astonished by the absorption speed.

The power of the World Origin Bead, he took three days to convert it completely, and it only resulted in a million times the energy reserve.

But inside the Cultivation Cave Mansion of the large Primordial Hall, in just a moment, a twelve hundred million times energy reserve was achieved without causing any major commotion.

"A twelve hundred million times Perfect Divine Body energy reserve does bring quite a burden!" Luo Feng felt his physical body at this moment.

It was too heavy.

Luo Feng stood up.

He walked step by step within this independent time and space, each step incredibly heavy. This heaviness, if placed outside the large Primordial Hall, would be enough to cause a massive collapse of time and space.

"My current mind consciousness system can perfectly control up to an eight million times energy reserve. Exceeding eight million times, my strength cannot increase. The extreme limit I can control is three hundred million times energy reserve. Beyond this limit... my strength begins to decline."

The difference between perfect control and extreme control is still significant.

Exceeding extreme control, not only does not benefit, but also has detrimental effects.

"Like now, every step I take is strenuous."

"My mind consciousness system still has many flaws. What I need is perfect control of twelve hundred million times!"

Luo Feng's mind moved, directly contacting the large Primordial Hall, after all, the cave mansion was within the large Primordial Hall.

"Cultivator Luo Feng, what service do you need?" A gentle voice arose.

"I found out there are 65 types of life-type High Level Primordial Bloodlines and 83 types of destruction-type High Level Primordial Bloodlines within the large Primordial Hall." Luo Feng inquired, "Among them, for those whose body size is considered extremely large within the same level, how many are there?"

"Life-type High Level Primordial Life usually has a larger body size. Destruction-type High Level Primordial Life generally has a smaller body size."

"Those considered extremely large at the same level, there are nine types of life-type, and one type of destruction-type. You can check the detailed information carefully." The gentle voice also conveyed a wealth of detailed information.

Luo Feng understood: "I will buy them all, paying with Primordial Crystals. For each High Level Primordial Bloodline, I need the corresponding twelve sets of body materials."

"A total of 148 kinds of High Level Primordial Bloodlines and corresponding materials cost 1005.9 billion Primordial Crystals," the gentle voice said.

Soon, these High Level Primordial Bloodlines and materials were delivered to Luo Feng's cave mansion.

"Must send them back."

Luo Feng knew well.

These Primordial Bloodlines and materials must be combined with the Wisdom Book and the Eye of Life and Death to truly be effective.

"Whoosh."

Luo Feng sat cross-legged, immediately splitting an avatar; this avatar carried an 'eight million times energy reserve' and quietly left the large Primordial Hall, departing from the Primordial City, heading straight for the Transmission Holy Mountain.

"With enough resources in the large Primordial Hall, this time must be a proper seclusion."

Last time, seclusion was only a thousand eras because the body's energy reserve was too low, not enough to practice.

This time there is ample energy reserve, with various auxiliary cultivation treasures in the large Primordial Hall, Luo Feng can purchase at any time! Naturally, he can settle his mind and go into long-term seclusion.

...

"Such a huge physical body?"

Within the large Primordial Hall, two High Level Primordial Lives were paying attention to Luo Feng.

The large Primordial Hall effortlessly provided all the energy Luo Feng absorbed, and they did not care.

After all, the large Primordial Hall held so many 'Primordial Prisoners'! Even seven 'World-level Primordial Life Corpses' were stored! The immense power that needed to be mobilized was imaginable.

Moreover, these two High Level Primordial Lives had also been practicing here for a long time, and their energy absorption speed was much faster than Luo Feng's.

"Yet to escape the Braided Cage, purely by speaking of the body, he already has a tenth of mine." The woman in the fiery red robe couldn't help but say, "Once out of the Braided Cage, that would be a qualitative change! Afraid it would surpass me by over a billion times! If he becomes a High Level Primordial Life, just this body size would immediately reach the extreme limit of High Level Primordial Life."

"How is that possible?"

The silver-haired and silver-browed man shook his head, "He practices the Fusion Dao, how could he refine High Level Primordial

Bloodlines? If he does choose, the lords would likely not agree."

"Yes, he despises High Level Primordial Life." The woman in the fiery red robe had a complex mood, as she had spent endless efforts and under fortuitous encounters ultimately awakened her bloodline to the ultimate awakening, becoming a High Level Primordial Life.

But this cultivator Luo Feng? He despised High Level Primordial Life.

"He will surely first choose 'World-level Primordial Bloodline'. With his comprehension, under the lord's nurturing, as long as he comprehends over seventy percent of the World-level Primordial Bloodline, he can successfully refine it and become a World-level Primordial Life." The silver-haired and silver-browed man said, "After becoming a World-level Primordial Life, life essence metamorphosis, and speed of thought are countless billion times faster than before escaping the Braided Cage. Then, to comprehend the Great Dao, there is hope to become a Primordial Lord."

"Among the seven lords of our Cultivator Camp, six were world-level before becoming lords."

"Only one person directly became lord after escaping the Braided Cage."

The silver-haired and silver-browed man said, "Becoming a world-level before becoming a lord is also the most mature path. The cultivator who pioneers the Fusion Dao has the highest limit and generally takes this path."

"How many in total have become lords?" the woman in the fiery red robe gently shook her head.

Lord represents the ultimate of Infinite Primordial Space!

"He is likely to be world-level, refine the Source World of hometown, and then be the Master of the Source World." The silver-haired and silver-browed man sighed, envious and jealous.

High Level Primordial Life, World Level Primordial Life, Primordial Lord!

These are three major levels.

The gap between levels is immense! It also leads to each level's leap needing to eliminate many cultivators.

So, becoming a 'Primordial Lord' directly from 'Half-step Primordial Realm' is even more unimaginably difficult! To date, in the entire Infinite Primordial Space, only one has achieved it.

Chapter 374: Episode 9, - 12: Dragon 9 Daoist Monarch

Chapter 374: Episode 9, Chapter 12: Dragon 9 Daoist Monarch

Another cave mansion within the large Primordial Hall.

Here, the birds are singing and flowers are blooming. On the endless grassland, a middle-aged man in blue is carefully painting; his brush paints in the Void, naturally altering this part of the world with his scenery.

"Alas, the fifth path of the Great Dao—it's so difficult to comprehend even a branch of it." The man in blue puts down his brush.

"Just this one path left."

The man in blue gently shakes his head.

He is Dragon Nine Daoist Monarch, an existence mastering three Half Primordial Level paths! Without refining any Primordial Bloodline, he was the strongest Cultivator in the Dark World before Luo Feng.

"The Lord favors me, has done so much for me, yet I have disappointed him." Dragon Nine Daoist Monarch thought.

"As long as all five paths reach the Second Realm of Godly King, mastering over half of the Source World Origin, I can completely control the Source World, becoming the Master of the Source World."

Dragon Nine Daoist Monarch's eyes are filled with expectation.

He has walked this path for too long.

Over thirty Source World cycles have passed! Too long!

He has reached the Half Primordial Level in the paths of wind, fire, and thunder! But in his homeland Source World, there was no Thunder Dao. Only after leaving his homeland and encountering other fortunes did he cultivate the Thunder Dao.

"The Lord valued me, helped me explore countless Source Worlds, choosing the most suitable one for me, allowing me to reincarnate into the new Source World, 'Dragon Blood Origin World', which contains nine paths, including wind, fire, and thunder."

"The fourth path, the 'Water' path, I reached the Second Realm of Godly King in one Reincarnation Era."

"But the fifth path, I can't even comprehend a branch of the Great Dao."

Dragon Nine Daoist Monarch is in anguish.

Every Cultivator has their specialties.

Where one is not adept, comprehending a 'Great Dao Branch' is not easy.

Luo Feng focuses on Life and Death!

"The path to the Great Dao is right in front, just a little bit more." Dragon Nine Daoist Monarch has tried everything, even the Lord who favors him has thought of many methods for him.

But there is just this last path left!

"The Lord said refining Primordial Bloodline should be the last resort! Endless consequences."

"Controlling the Source World Origin to become a World-level Primordial Life is the path to the Great Dao without consequences."

Dragon Nine Daoist Monarch has other ways to escape the Braided Cage.

But he's set on this path! Persistent and indomitable!

"The Lord is right; cultivation requires great perseverance. I've only gone through over thirty Source World cycles, what's that to count?" Dragon Nine Daoist Monarch has faced the temptation of other paths but remained steadfast.

Suddenly—

"My junior brother is here?" Dragon Nine Daoist Monarch receives a transmission.

A moment later, after Dragon Nine Daoist Monarch proactively opens the cave mansion door, Feng Qiao City Lord enters.

"Senior brother." Feng Qiao City Lord appears rather excited.

"What has you so excited? This isn't like you, Feng Qiao." Dragon Nine Daoist Monarch smiled.

"In our Dark Sacred Realm, there is an invincible existence named Luo Feng!" Feng Qiao City Lord exclaims.

"Oh?"

Dragon Nine Daoist Monarch is slightly surprised, smiling, "It's not surprising. The Dark Sacred Realm has birthed invincible existences before. Once born, they are usually taken."

"He's not been taken yet. He lives in the large Primordial Hall and even bought a cultivation cave mansion." Feng Qiao City Lord explains.

"Not been taken?" Dragon Nine Daoist Monarch queries, "Bought a cultivation cave mansion in the large Primordial Hall?"

From what he knows.

The two High Level Primordial Lives responsible for garrisoning the

Dark Sacred Realm, 'Qiu Ge' and 'Yifeiya', once they find an invincible existence, even if the Lord hasn't arrived yet, these two garrison commanders should take the invincible existence, passing on some basic information.

"Unless the Lord instructed, only then the two garrison commanders did not take Luo Feng." Dragon Nine Daoist Monarch is well aware of these rules.

Because, before he reincarnated into 'Dragon Blood Origin World', he was already an invincible existence!

Previously, he was under the jurisdiction of Starlight Lord, who cherished him.

After reincarnation, he entered the jurisdiction of 'Yuan' Lord. Even so, Yuan would not interfere with his growth; Starlight continued to handle his matters.

Dragon Nine Daoist Monarch, a 'Master of the Source World seed', receives nurturing and resources surpassing those of High Level Primordial Lives like Qiu Ge and Yifeiya who rely on Primordial Bloodline.

Even at the World-level Primordial Life tier, Masters of the Source World who don't cultivate Primordial Bloodline hold higher status than World-level Primordial Lives who do.

"Is he confirmed to have invincible strength?" Dragon Nine Daoist Monarch asks.

"Confirmed."

Feng Qiao City Lord nods, "Secret Ruins Divine Emperor and their fifteen collaborators couldn't withstand even a single move before Luo Feng Divine Emperor."

"Then it is indeed invincible strength." Dragon Nine Daoist Monarch's eyes gleam.

"Invincible strength but hasn't been taken! There must be specific reasons." Dragon Nine Daoist Monarch is curious.

His invincible strength wasn't taken because he was specially tutored by Starlight Lord—he is a Master of the Source World seed!

This Luo Feng, with invincible strength hasn't been taken, what could it be for?

"I want to visit this Luo Feng Divine Emperor." Dragon Nine Daoist Monarch chuckled, "Can you help me contact him?"

Feng Qiao City Lord helplessly said: "I contacted Bo Xiu Divine Emperor and his associates after leaving Chengfeng City. Bo Xiu Divine Emperor and his three companions follow 'Luo Feng Divine Emperor'. As they said, Luo Feng Divine Emperor bought a cultivation cave mansion in the large Primordial Hall and went into closed-door training, not seeing anyone! He'll summon when he emerges."

"Then please notify Luo Feng Divine Emperor's followers, tell them I, Dragon Nine, wish to visit Luo Feng Divine Emperor. Once Luo Feng Divine Emperor emerges, inform me first." Dragon Nine smiled.

"Okay." Feng Qiao City Lord nods, "I'll send a transmission to them now. I'm also waiting for Luo Feng Divine Emperor's summon! Hoping Luo Feng Divine Emperor can give me some guidance."

Dragon Nine Daoist Monarch nods: "His guidance might be useful to you."

Dragon Nine is indeed proud.

The normal invincible being was summoned, he didn't care much.

But being invincible and not being summoned made him pay attention.

...

Dark Sacred Realm, Wilderness.

Above a vast expanse of black water, a human figure is locked in battle with multiple 'Super Limit Level' Low Level Primordial Life forms.

"Hahaha!!!" Accompanied by a hearty laugh.

The figure engages in close combat, ruthlessly killing these twelve Super Limit Level Low Level Primordial Life forms.

With a wave to gather the corpses, this figure's smile is exuberant.

He's filthy, his hair a mess, his eyes tinged with blood, and his smile conveys a strange, eerie quality. Occasionally, the aura he emits causes the heavens and earth to tremble and twist.

He is Divine Emperor Ji Ke!

One of the two strongest cultivators on the surface of the Dark Sacred Realm!

"World-level Primordial Bloodline, the bloodline will it contains is too strong, can't be suppressed, just have to come out and kill once in a while." Divine Emperor Ji Ke felt quite tormented, because in addition to needing enormous battle merit to exchange for 'World-level Primordial Bloodline', one must endure a large Primordial Hall trial, ensuring they don't go mad from integrating the bloodline.

He passed the trial and indeed didn't go mad, he's been clear-minded all this time.

But still tormented by the bloodline will!

The bloodline will influences his spiritual will, ordinarily driving him crazy! When suppressed for too long, he needs to come out for rampant killing. However, he is very clear-minded, never slaughtering cultivators wantonly, always running to the wilderness, hunting down these low-level Primordial Life forms.

Currently in Dark Sacred Realm, the one who has slaughtered the most low-level Primordial Life forms is undoubtedly Divine Emperor Ji Ke.

"Hmm?" Divine Emperor Ji Ke suddenly received a communication.

"A true invincible being has emerged in Dark Sacred Realm, now residing in a large Primordial Hall, buying a cave mansion for

cultivation?" Divine Emperor Ji Ke was somewhat excited, "Previously, invincible beings were always summoned and taken away. This Luo Feng Divine Emperor is quite peculiar; he's not summoned, instead continuing to cultivate in Dark Sacred Realm?"

"Good, good, good, just perfect to find him and have a battle. His strength is above mine, I can fully unleash my power and happily engage in combat." Divine Emperor Ji Ke immediately hurried towards Primordial City in high spirits.

...

The news of an invincible being, 'Luo Feng Divine Emperor', emerging in Dark Sacred Realm gradually spread.

Upon learning that Luo Feng Divine Emperor hadn't been summoned but chose to reside in a large Primordial Hall, many cultivators excitedly rushed to Primordial City, eager to hear guidance from this invincible being.

After all, beforehand, even if an invincible being emerged, they were immediately taken away, making it extremely difficult to meet them.

"Invincible being, Luo Feng Divine Emperor?"

In a very ordinary cave mansion in a remote corner of Primordial City, both Primogenitor Yan Feng and Thunder Ancestor resided here!

"I've inquired thoroughly, it's Luo Feng." Thunder Ancestor was somewhat excited, "Currently, the entire Primordial City is buzzing with the news that this Luo Feng Divine Emperor has arrived in Dark Sacred Realm for just a millennium! His strength is already invincible."

"Not long ago, Emperor Qing said that Luo Feng single-handedly suppressed four Super Limit Level beings in Yulan City." Primogenitor Yan Feng couldn't help but remark, "And now, suddenly, he's invincible?"

The speed of his rise is truly terrifying.

Both of them watched Luo Feng ascend from the Land of Origin, soaring into the sky!

"I've also inquired about the Land of Origin." Thunder Ancestor stated, "Luo Feng has been in closed cultivation all along, without special reason, no one can see him."

"Regardless of whether it's the Land of Origin or Dark Sacred Realm, he's always in secluded cultivation." Primogenitor Yan Feng added, "Since that's the case, let's not disturb him. Let's ask Morosa to relay a message, saying that he can summon us once he emerges."

"Alright." Thunder Ancestor nodded, "I never imagined that an invincible being could emerge from our homeland in the Land of Origin world."

"Having become invincible, escaping the Braided Cage isn't far off." Primogenitor Yan Feng commented.

Both of them were quite envious.

One of them is a Half Primordial Bloodline Cultivator, wishing for ultimate awakening, which is extremely difficult. The other is at the late stage of Divine Emperor Enlightenment, yet hasn't reached the level of a 'Half Primordial Enlightened.'

"If we had known, we should've offered more benefits." At this moment, Thunder Ancestor was somewhat regretful.

"We guessed he'd come to Dark Sacred Realm, but never anticipated he'd become so powerful." Flame Wind shook his head, believing that with the vast worlds they've seen, they only perceived Luo Feng as one of the many future powerhouses within Dark Sacred Realm.

In hindsight, the relationship between Emperor Qing and Luo Feng far surpassed theirs.

...

There are many who wish to see Luo Feng now, numerous powerful cultivators have come from other cities to Primordial City, yet Luo Feng remains in closed cultivation, meeting no one.

"In this cave mansion within the large Primordial Hall, consuming treasures poses minimal burden on the soul." Luo Feng noticed that taking treasures like 'Hundred Tribulations Heart Essence', which originally heavily burdens the soul, now becomes much lighter thanks to the constant nurturing of the Origin Power within the cave mansion's world, making the soul more comfortable.

Consuming these treasures, Luo Feng's avatar in the Land of Origin, utilizing the Eye of Life and Death and the Wisdom Book, researched all collected 'Low-level Primordial Bloodline,' a task consuming fifteen hundred millennia!

Every time, Luo Feng began by studying corpse materials, analyzing them to infer the various mysteries contained within these Low Level Primordial Life forms. Then he would validate these findings by observing the Primordial Bloodline.

Thus, over fifteen hundred millennia, and the speed of Luo Feng's thought process remained generally above five hundred times faster! Luo Feng's understanding of both Life and Death attained a deeply profound level.

Afterwards...

Luo Feng only then began studying the 'High Level Primordial Bloodline' within the mind consciousness system!

His newly purchased Life and Destruction categories of High Level Primordial Bloodline, through research, confirmed fifteen kinds possessing a mind consciousness system. This greatly enriched Luo Feng's knowledge of the mind system! The speed with which his 'Mind Consciousness System' was perfected increased dramatically.

Unknowingly, Luo Feng had been in secluded cultivation within the large Primordial Hall for forty-three hundred millennia!

There were already many cultivators waiting for Luo Feng's summon in Primordial City, but not one dared to disturb him.

"Almost there."

Within the cave mansion world, Luo Feng suddenly opened his eyes

while sitting cross-legged on the ground.

The deep accumulation from Life and Destruction categories, mind consciousness system, and all other aspects led to the entire 'Life and Death Dao' finally reaching the last step in its deduction.

"Only one final push is needed. This last push, further seclusion is futile." Luo Feng realized, "A spiritual stimulation is required, then the Mind Consciousness System can achieve Perfection! Consequently, Life and Death Dao can naturally reach Divine Emperor Perfection."

The Half Primordial Life and Death Path was already clearly discernible in Luo Feng's mind, yet it lacked one spiritual stimulation.

Chapter 375: Episode 9 - 13 Summoned

Chapter 375: Episode 9 Chapter 13 Summoned

Luo Feng leisurely walked out of the grand Primordial Hall, strolling through the Primordial City.

Observing the cave mansions with various cultural styles, and the cultivators with diverse appearances, most of these cultivators resembled 'human' forms, yet largely retained some racial traits, with some even presenting in their original racial forms.

"Cultivators emerging from numerous source worlds and countless universes have actions and words imbued with the breath of different civilizations."

"But they all share a common trait, which is... they are all lives within the Braided Cage!"

Currently, in Luo Feng's heart, the Half Primordial Life and Death Path has emerged, lacking just a hint of 'inner touch.'"

Along with his study of many 'low-level primordial bloodlines' and some 'high-level primordial bloodlines,' Luo Feng's understanding of these innate primordial lives has also deepened significantly.

"The difference between inside the Braided Cage and outside, is like my homeland, Earth once described, the difference between low

dimensions and high dimensions." Luo Feng felt this explanation was rather accurate.

"Within the Braided Cage, the Half Primordial Life and Death Path is already perfected! Advancing further is impossible."

"Yet jumping out of the Braided Cage feels like entering a higher dimension. The Life and Death Path can be greatly expanded, its richness can be increased countless times."

The Half Primordial Life and Death Path is like a drawn person, very exquisite, but the pixels are limited.

The Life and Death Dao at the Primordial Level is the physical body in reality!

They are truly worlds apart.

"The more I know, the more I understand the vast gap between the 'Half Primordial Path' and the 'Primordial Level Path.'" Luo Feng frowned, "but legend says that a cultivator might hope to ascend in one leap, directly comprehending the Primordial Level Path from the Half Primordial Level, breaking laws with force."

This is a legend among the cultivators, and the most sought-after desire of countless enlightened ones.

Yet for bloodline cultivators, achieving the ultimate awakening into high-level primordial life is extremely rare! As for 'ascending in one leap, comprehending the Primordial Level Path, breaking laws with force,' it only exists in legends!

"If the intricacy of the Half Primordial Path is one unit."

"The Primordial Level Path, at least a million times, even a billion times more!"

"I've endured so much hardship cultivating the 'Half Primordial Life and Death Path' and still lack that hint of inner touch. How can I ascend in one leap and directly comprehend the Primordial Level Path?"

Luo Feng looked up at the sky.

The biomimetic eye of destruction on his brow has become increasingly intricate, able to peer through the membrane wall of the Dark Sacred Realm and glimpse some of the reality of the Infinite Primordial Space.

The Half Primordial Life and Death Path, is within reach. Luo Feng can foresee that it won't hinder him much longer.

But what about the next step?

"Take one step at a time, walk steadily." Luo Feng thought as he reached the cave mansions of Bo Xiu, Bai Yin, and Chi Zhen.

Bo Xiu and the others sensed Luo Feng approaching through causality and immediately came outside to greet him.

"Congratulations, Brother Luo Feng," Bo Xiu said with a smile, "After forty-three hundred eras, you've finally emerged."

Luo Feng smiled.

During these forty-three hundred eras, the only time Luo Feng ventured out was when accepting hefty compensation from the Secret Ruins Divine Emperor. The rest was all focused on cultivation.

They led Luo Feng into the cave mansion.

...

The four of them sat separately.

Chi Zhen said, "Brother Luo Feng, during these forty-three hundred eras, cultivators from various places have rushed to the Primordial City, hoping to meet Brother Luo Feng, all seeking some guidance."

"After reaching the Half Primordial Realm, there's a sense of no further path," Bo Xiu sighed, "Many cultivators wish for a bit of guidance from an invincible existence."

Luo Feng nodded.

He could see the path ahead, but knowing the path ahead is countless times more challenging than the Half Primordial Life and Death Path.

"Dragon Nine Daoist Monarch and Divine Emperor Ji Ke also wish to meet Brother Luo Feng," Bai Yin Divine Emperor said.

"Oh? Them?" Luo Feng was indeed interested; the depth of their realm might offer him some insight.

"By the way, I asked you to gather life and death secret treasures earlier?" Luo Feng inquired.

Bo Xiu, Bai Yin, and Chi Zhen exchanged glances.

"We spread the word that Brother Luo Feng intends to acquire some life and death secret treasures," Bo Xiu explained, "with Brother Luo Feng's current fame, many cultivators willing to sell secret treasures are numerous, making it hard to choose the top five. So we decided to wait for Brother Luo Feng to select personally after emerging."

"Alright."

Luo Feng nodded, "Then, you select the best 20 items first, and invite those cultivators over! I'll personally choose a few needed ones."

Bo Xiu, Bai Yin, and Chi Zhen understood.

"I'll pass the word to those 20 cultivators," Bo Xiu said. He, as a cultivator of the True Witch Lineage, possessed keen insight! With him selecting, Luo Feng was reassured.

******

"Luo Feng Divine Emperor emerged from the cave mansion."

"He went to Bo Xiu Divine Emperor's cave mansion."

"I can pinpoint his location."

In Primordial City, figures like Feng Qiao City Lord and other Divine Emperors had seen Luo Feng, able to sense Luo Feng's location at this moment through causality when Luo Feng didn't deliberately conceal

it.

In an instant, numerous cultivators rushed towards Bo Xiu Divine Emperor's cave mansion.

"Emerged?"

"Finally emerged!"

Dragon Nine Daoist Monarch and Divine Emperor Ji Ke got the news and also rushed over; they wanted to meet this Luo Feng Divine Emperor.

"Everyone, please take a rest in the garden for now. Luo Feng Divine Emperor needs to see other guests first," Bo Xiu, Bai Yin, and Chi Zhen all dispatched avatars to personally receive these visitors.

No choice, there were too many visitors! They were too powerful!

Apart from Dragon Nine Daoist Monarch and Divine Emperor Ji Ke, over three hundred peak level existences had arrived! Moreover, many 'half primordial enlightened ones,' 'half primordial bloodline cultivators,' have gathered tens of thousands of cultivators, still increasing with time.

Bo Xiu and the others needed to make proper arrangements first.

"Luo Feng Divine Emperor promised, he will definitely see everyone today," Bo Xiu said.

"No hurry."

"We waited for forty-three hundred eras, we have enough patience." Each cultivator was very polite, the temperament of an invincible existence unknown, angering Luo Feng might cause him to leave directly. Meeting him again would be challenging.

...

Deep within the cave mansion.

Luo Feng first summoned twenty cultivators; their powers varied,

with the highest reaching peak level, and the lowest at late-stage Divine Emperor enlightened realm.

"Please take out the secret treasures. If I wish to purchase them, I'll offer a suitable price. You can choose whether to sell or not," Luo Feng said with a smile.

"I am willing to gift the secret treasure to Luo Feng Divine Emperor," one cultivator said.

"I am also willing to gift."

"I am willing too."

One by one, the cultivators spoke up.

The so-called 'gift' actually meant that Luo Feng was incurring a debt of causality! If Luo Feng cared particularly about causality, he would undoubtedly pay it back in the future! As Luo Feng's strength grew, the value of this 'causality' would rise even higher.

Cultivators who could reach the Dark Sacred Realm were not foolish; they all knew that 'gifting' was the most profitable.

"No need." Luo Feng gently shook his head, "I will offer a suitable price."

At his current level, these life and death secret treasures were merely to broaden his horizons and aid his cultivation; their importance was not that great anymore.

Want to gift it?

Luo Feng would no longer accept gifts lightly.

"Ladies and gentlemen, please bring out your secret treasures for display," said Bo Xiu Divine Emperor, who stood beside him.

The twenty cultivators, knowing that gifting was not possible, had no choice but to display their treasures one by one.

Luo Feng glanced over them.

His accumulation in life and death was so profound that he instantly determined the value of these twenty life and death secret treasures.

"They're all either secret treasures refined by beings that broke out of the braided cage or innate secret treasures," Luo Feng thought, "varying greatly in value."

"I'll take these nine."

Luo Feng selected nine of them and offered prices for each.

As per the usual rules.

The prices were twice the normal level in the Dark Sacred Realm! For Luo Feng, these primordial crystals were already insignificant.

"Luo Feng Divine Emperor is indeed generous." The cultivators who couldn't gift their treasures looked pleased upon hearing Luo Feng's offer. Selling at double the price was already very valuable.

"We agree to sell."

Eight of the nine secret treasure owners agreed to sell, but one cultivator hesitated.

"Chanfu God Emperor, Luo Feng Divine Emperor has offered you five hundred billion primordial crystals for your treasure, which is more than enough," Bo Xiu spoke up, "What are you hesitating for?"

"Trading is a free choice," Luo Feng smiled and said, not minding much.

"My treasure is an innate secret treasure nurtured within a world-level primordial life corpse, exquisitely mysterious, and I believe it's worth one trillion primordial crystals," Chanfu God Emperor looked at Luo Feng.

Chanfu God Emperor was a half-primordial Enlightened! Excluding this innate secret treasure from his home world's source world, his entire accumulation over endless years was just a few hundred billion primordial crystals.

This time, he had thought it through.

Either gift it!

Or seize the opportunity to earn a substantial amount of resources!

"One trillion primordial crystals?" Bo Xiu, Bai Yin, Chi Zhen, and other cultivators were a bit taken aback. Was he bold enough to quote such a high price?

Chanfu God Emperor, however, was somewhat confident, coming from the source world, with an avatar, not too afraid.

"I heard that the Secret Ruins Divine Emperor compensated with seventy-five hundred billion primordial crystals. For this Luo Feng Divine Emperor, one trillion primordial crystals is just a fraction. My innate secret treasure must be highly alluring to the right cultivator," Chanfu God Emperor thought.

Luo Feng glanced at the golden bone stick in Chanfu God Emperor's hand.

The golden bone stick, combining the mysteries of life and death, was far superior to the 'palm world'. With one swing, it could determine life and death.

"Then it's these eight," Luo Feng gestured, and eight storage bracelets flew to the cultivators, containing primordial crystals at the agreed price, which the eight cultivators joyously accepted.

"Thank you, Luo Feng Divine Emperor." They were all very satisfied.

Chanfu God Emperor frowned slightly upon seeing this! Did Luo Feng Divine Emperor decide not to buy it just for an extra five hundred billion primordial crystals?

"Bo Xiu, see the guests out."

Luo Feng instructed.

"Please." Bo Xiu Divine Emperor immediately saw the cultivators off, leaving Chanfu God Emperor with dissatisfaction; Luo Feng wouldn't

accept a gift nor acknowledge a trillion offer. He had to leave with his treasure.

"Luo Feng Divine Emperor, could you give us some guidance?" one cultivator eagerly asked.

"There are already tens of thousands of cultivators gathered outside. I will meet with all cultivators today and discuss publicly at that time," Luo Feng said.

The cultivators then smiled in delight and obediently left.

...

The outer garden swelled as tens of thousands of cultivators gathered, still increasing in number. The twenty cultivators selling treasures also arrived here.

"Chanfu God Emperor, you're too greedy."

"Luo Feng Divine Emperor is an invincible entity; do you think he really cares about your treasure?"

Some cultivators mocked.

The news of this transaction quickly spread among the cultivators, and Chanfu God Emperor felt something was amiss as he listened to the discussions around him.

"Bang." Suddenly, a slap landed on Chanfu God Emperor's shoulder, engulfing his entire body in terrifying power.

Chanfu God Emperor turned his head and saw an elder, dirty and disheveled, with bloodshot eyes brimming with a sinister madness. The elder snickered at Chanfu God Emperor.

"Ji, Ji Ke God Emperor?" Chanfu God Emperor's heart trembled. Who didn't know that Ji Ke God Emperor was unpredictably insane?

"Which treasure were you selling to Luo Feng Divine Emperor?" Ji Ke God Emperor asked.

"It’s this one." Chanfu God Emperor sensed the dangerous and sinister presence of Ji Ke God Emperor and obediently took out the golden bone stick.

"Now it’s mine."

Ji Ke God Emperor grabbed it.

Chanfu God Emperor didn’t dare to resist, watching as Ji Ke God Emperor took the golden bone stick without even giving a single primordial crystal in return.

"Visiting Luo Feng Divine Emperor, and I just needed a gift," Ji Ke God Emperor grinned.

Chanfu God Emperor didn’t dare to say a word at this moment.

"Dragon Nine Daoist Monarch, Ji Ke God Emperor," Bo Xiu called from afar, "Luo Feng Divine Emperor summons both of you."

Dragon Nine Daoist Monarch and Ji Ke God Emperor immediately followed Bo Xiu inside to visit Luo Feng first.

"Dragon Nine Daoist Monarch and Ji Ke God Emperor are indeed different, being summoned first."

"After all, they both have deeper accumulations than us."

Some pinnacle beings remarked.

Among the cultivators, two very inconspicuous and weak ones, Primogenitor Yan Feng and Thunder Ancestor, were in the scene’s lower echelon.

"Luo Feng should know we’ve arrived, but hasn’t summoned us," Primogenitor Yan Feng and Thunder Ancestor exchanged a glance, knowing that in previous ages, their relationship with Luo Feng was still too shallow.

Chapter 376: Episode 9, - 14, Bloodline Path

Chapter 376: Episode 9, Chapter 14, Bloodline Path

"Unexpectedly encountered that madman, Divine Emperor Ji Ke."

Chanfu God Emperor felt rather aggrieved, facing Luo Feng, Luo Feng spoke of trade and freedom. The saying goes, "Riches are sought amidst danger," since it's impossible to acquire a share of causality for free, he tried selling it for a high price. Unfortunately, he gambled and lost!

After losing the gamble, he also ran into the eccentric Divine Emperor Ji Ke.

Divine Emperor Ji Ke acts without any restrictions, mad and eccentric. Apart from the actions like "Great Massacre" that provoke public anger, he does whatever he pleases otherwise. Chanfu God Emperor knew clearly that if he had the slightest resistance, Divine Emperor Ji Ke might crush him!

Within the city, killing is prohibited! But this rule isn't set by Senior Yuan and the others; it's autonomously established by the cultivators themselves!

Regardless of the thirty-five cities in the Nine Rivers Sacred Realm or the five cities in the Dark Sacred Realm, how to manage the

cultivators is up to them! So some of the highest beings occasionally violate this rule, and no one dares to speak up.

Just one statement from Luo Feng frightened the fifteen from Secret Ruins Divine Emperor's group to obediently compensate seventy-five trillion Primordial Crystals! When Divine Emperor Ji Ke took action, Chanfu God Emperor dared not resist in the slightest.

"This Chanfu God Emperor truly is a joke."

"Tried selling at a high price but got robbed by Divine Emperor Ji Ke instead, haha..."

"Who told him to be so greedy?"

The surrounding cultivators chatted, all treating Chanfu God Emperor as a laughing stock.

Chanfu God Emperor stood there expressionlessly, feeling embarrassed despite it, but he still didn't want to miss Luo Feng's public teaching this time! He too had reached the Half Primordial Level as The Enlightened.

"This public teaching is a rare opportunity not to be missed! Perhaps I can use this opportunity to escape the Braided Cage." Chanfu God Emperor ignored the surrounding mockery, patiently waiting.

Every existence that has reached the Half Primordial Level yearns to escape the Braided Cage.

******

"Greetings to Luo Feng Divine Emperor."

Dragon Nine Daoist Monarch and Divine Emperor Ji Ke saluted, at this moment Divine Emperor Ji Ke seemed not at all mad, with clean hair and robe, even his aura became calm and restrained.

He was refining the "World-level Primordial Bloodline," and actually remained clear-minded all along. It's just that he usually indulged in chaos, proactively venting emotions, even seeking large groups of Low Level Primordial Life to slaughter. Suppressing them, even

slightly venting, can stabilize control over oneself.

"Please have a seat, both of you," Luo Feng said politely. These two were stronger than other Pinnacle existences by a long margin, each having their own extraordinary traits.

"Luo Feng Divine Emperor, this is a Life and Death Secret Treasure I acquired casually; it's a gift for our first meeting." As Divine Emperor Ji Ke spoke, he flipped his hand, and the golden bone stick flew out from his hand.

Luo Feng recognized it at once as the Secret Treasure from before.

"Luo Feng Divine Emperor, don't mind! In the Dark Divine Realm, it's natural for cultivators to battle and plunder each other." Divine Emperor Ji Ke smiled without any evil aura, "I took this from Chanfu God Emperor; it's our causality! With my status, merely taking one treasure from him is his honor."

Luo Feng took the golden bone stick before him, laughing, "Divine Emperor Ji Ke acts, truly straightforward."

"Those Innate Primordial Life acts even more wildly and frenziedly," Divine Emperor Ji Ke sighed, "Choosing to refine the bloodline, one's temperament must also align with the bloodline."

"The path of the bloodline is not easy," Dragon Nine Daoist Monarch said beside them.

"Choosing this path, naturally, no regrets."

Divine Emperor Ji Ke looked at Luo Feng, "Luo Feng Divine Emperor, could we spar? Let me see just how formidable the Invincible Level is. Perhaps I'll be able to uncover more potential in the Primordial Bloodline through this."

"Battles can uncover the potential of the Primordial Bloodline?" Luo Feng understood, smiled, "Alright, I'll accompany you in trying."

Dragon Nine Daoist Monarch, Bo Xiu, Bai Yin, and Chi Zhen watched with great interest.

The two about to engage both are quite special.

One is cultivating the Primordial Bloodline, specifically the "World-level Primordial Bloodline."

The other, already an Invincible existence.

In the distance.

Luo Feng and Divine Emperor Ji Ke stood facing each other.

"Brother Luo Feng, please control the powers, don't destroy my cave mansion." Bo Xiu laughed, this is the cave mansion where the three typically reside, unable to withstand Luo Feng and their unrestrained moves.

"Rest assured."

Luo Feng smiled slightly, and suddenly an Endless Blood Sea appeared out of thin air around them, instantly covering half the garden, including Divine Emperor Ji Ke.

The sea water rolled and wrapped, like the shape of an egg, layer after layer, without any power leaking out.

"Hmm?" The watching Dragon Nine Daoist Monarch was somewhat alarmed.

"What a terrifying Luo Feng."

Dragon Nine Daoist Monarch was somewhat proud inside.

Firstly, he had long since jumped out from the Braided Cage with his Spiritual Will! Also considered an Invincible existence.

Secondly, he is even a "Master of the Source World" candidate! When dealing with Luo Feng and Divine Emperor Ji Ke, there's a certain sense of superiority inside.

"This blood-colored sea water, though seeming suppressed in power, I can sense it's strength, at least a hundred times mine!" Dragon Nine Daoist Monarch was alarmed, "Even if I exert mental pressure on Luo

Feng, making him only exert two or three parts of his strength, he could still easily destroy me."

"How can he be so strong?"

"Under the Braided Cage, being this strong?" Dragon Nine Daoist Monarch watched.

"Luo Feng Divine Emperor is truly impressive! Hahaha, please take me on!" Divine Emperor Ji Ke felt the terrifying power of the Endless Blood Sea firsthand, this power being so strong it even stirred a sense of despair within him.

The gap is too big, fundamentally unattainable to fight.

But the greater the disparity, the stronger Divine Emperor Ji Ke's inner frenzy becomes. He does not restrain his Bloodline Will at all; rather, he merges with it completely, letting himself explode without restraint.

"Boom——"

Divine Emperor Ji Ke, barehanded, caused continuous explosions within the Endless Blood Sea.

Chapter 377: Episode 9, - 14, Bloodline Path_2

Chapter 377: Episode 9, Chapter 14, Bloodline Path_2

In the midst of the battle, Divine Emperor Ji Ke swung his right arm, transforming it into a striped giant serpent! The serpent moved, stirring the sea, with a power that could destroy the heavens and earth. As he stomped his foot, it turned into a massive Heavenly Pillar, suppressing all directions.

Every move he made was of immense power.

"Divine Emperor Ji Ke can only exert part of the power of the 'World-level Primordial Bloodline', showing just a few traits." Luo Feng knew very well that Divine Emperor Ji Ke's exploitation of his bloodline potential was still too weak.

If he were strong enough, even by exploiting just a small portion of the 'World-level Primordial Bloodline', Divine Emperor Ji Ke could leap out of the Braided Cage and become a High-Level Primordial Life.

"Too weak, too weak."

"Or rather, I am too strong."

So thought Luo Feng.

His immense body, with an energy reserve of twelve billion times, even if he could only perfectly control one billion two hundred million times at the moment, his strength was a notch higher compared to when he battled Secret Ruins Divine Emperor and the others. Handling the body with an energy reserve of twelve billion times had no effect on his strength eruption.

"When I battled Secret Ruins Divine Emperor and others, I was one major level above the Pinnacle Level. Now I feel I'm another major level higher. Yet I am still considered within the Braided Cage." Luo Feng sighed to himself.

The life within the Braided Cage, no matter how numerous, are ants compared to High-Level Primordial Life.

"Boom ——"

Luo Feng, with countless thoughts in mind, easily subdued Divine Emperor Ji Ke.

Divine Emperor Ji Ke raged madly, but no matter how he exploded, he could not shake the Endless Blood Sea; the gap was truly too vast!

In the end, his entire body returned to normal form, and his aura completely withdrew.

"That was satisfying." Divine Emperor Ji Ke gathered his aura, smiled, and said, "But the gap with Luo Feng Divine Emperor is too large, far from being his match."

With a single thought, Luo Feng put away the Endless Blood Sea, leaving the garden with not a single flower or blade of grass harmed.

"Truly the Invincible Level." Daoist Monarch Long Jiu marveled.

At this moment, he also understood.

There are three levels of invincibility: One is the Spiritual Will breaking out of the Braided Cage, two is exploiting the World-Level Primordial Bloodline to a certain level, and three is the Half Primordial's 'Fusion Dao'.

Merely having the Spiritual Will break out of the Braided Cage is indeed the most common and weakest of the three Invincible Levels!

"This Luo Feng, it seems he does not cultivate bloodline; does he cultivate the Fusion Dao?" Daoist Monarch Long Jiu speculated, "But why has he never been guided?"

...

Luo Feng, Daoist Monarch Long Jiu, Divine Emperor Ji Ke, Bo Xiu, Bai Yin, and Chi Zhen all sat apart.

"Luo Feng Divine Emperor, you can tell." Divine Emperor Ji Ke straightforwardly inquired, "Although I have refined the World-Level Primordial Bloodline into my body! But I can only exploit a very small potential, unable to leap out of the Braided Cage. Does Luo Feng Divine Emperor have any solutions?"

"Primordial Bloodline, must it be refined into the body first before exploiting its potential?" Luo Feng asked back, "Can't one carefully study the Primordial Bloodline, research its mysteries, understand its essence, and then refine it?"

Bo Xiu and the others listened intently. Breaking out of the Braided Cage was difficult for them; if the Bloodline Path could break out of the Braided Cage, they would willingly pursue it.

Divine Emperor Ji Ke nodded, "The Bloodline Path can be divided into two major types."

"The first type is to refine the bloodline into the body, and then exploit the bloodline's potential. This is what Innate Primordial Lifeforms do."

"The second type is what Luo Feng Divine Emperor mentioned, to first comprehend the mysteries contained within the Primordial Bloodline, research its essence, and then refine it. Naturally, one can unleash the bloodline's mighty power."

Divine Emperor Ji Ke said, "This second type is too difficult! Even studying High-Level Primordial Bloodline, although one can use treasures exchanged from large Primordial Halls to thoroughly

perceive all mysteries of the High-Level Primordial Bloodline, truly comprehending it? Too difficult."

"It's very difficult." Daoist Monarch Long Jiu also said, "A single High-Level Primordial Bloodline may contain the mysteries of over a dozen 'Dao'. How many do we understand? How much can we comprehend?"

Luo Feng nodded.

Indeed.

Innate Primordial Lifeforms are naturally born within the Infinite Primordial Space, so their bloodlines contain various 'Dao'. Like the Blood Scale of the Star Tower, Luo Feng has observed that Life-type Secret Patterns occupy 34.3%, Destruction-type Secret Patterns occupy 9.2%, and there are many other categories.

So even with Luo Feng's deep accumulation in life and destruction, what he mainly studies about the Star Tower Blood-colored Scale is about 43%. There are many paths Luo Feng is not good at.

"The 'Infinite' and 'Life' paths I excel in only reach the Half Primordial Level." Divine Emperor Ji Ke shook his head, "I found the most compatible 'High-Level Primordial Bloodline' with life occupying 50% and infinite occupying 30%! Yet many of these mysteries are parts that escape the Braided Cage, and I can only understand some parts."

"To truly refine a Primordial Bloodline, one must comprehend 70% of it!"

Divine Emperor Ji Ke looked at Luo Feng, "To comprehend 70%? How difficult that is! I couldn't even comprehend 70% of a High-Level Primordial Bloodline."

"The path to comprehending bloodlines is too advanced, and my Comprehension is far from enough. Therefore, exploiting bloodline potential is more suitable for me," said Divine Emperor Ji Ke.

Beside him, Daoist Monarch Long Jiu also said, "From what I know, those who break out of the Braided Cage by the bloodline route

mostly exploit the bloodline potential. To comprehend the essence of the bloodline? One in ten thousand!"

Luo Feng thought for a moment.

Low-level Primordial Bloodline, the mysteries of life and death, I can fully comprehend!

For High-Level Primordial Bloodline, the difficulty of my comprehension increases significantly.

However, I have already comprehended more than 70% of three types.

They are 'Heavenly Fire Shadow', 'Ghost Prison Disaster Beast', and 'Catastrophe Beast'.

The Heavenly Fire Shadow, life-type occupies about 50%, destruction-type about 30%. In fact, any Innate Primordial Life form's bloodline mysteries will inherently contain life-category secret patterns, just with varying proportions. Heavenly Fire Shadow, because of Luo Feng's near-comprehension in life and destruction, has already surpassed a 70% comprehension of the entire bloodline, allowing for a firm grasp to become a High-Level Primordial Life.

Ghost Prison Disaster Beast, with life occupying 40% and destruction occupying 40%, is also a major focus of Luo Feng's comprehension, with a comprehension degree that also surpasses 70% for the entire bloodline.

Catastrophe Beast is the Shadow of the Catastrophe Beast Luo Feng once witnessed on the Land of Origin! The Catastrophe Beast mainly involves life and death types, with destruction over 50%, and life occupying about 30%; Luo Feng's comprehension of this Primordial Bloodline also exceeds 70%.

"If I am willing, I can become a High-Level Primordial Life at any time."

"I can even choose to integrate all three bloodlines into my body and exploit all their potential."

Luo Feng even had a feeling that these three High-Level Primordial Bloodlines are among the strongest of their level. Once all three are fused and their potential entirely exploited, they may directly reach the limits of High-Level Primordial Life. Perhaps there is even hope to break through the limits and ascend to the World-Level Primordial Life plane.

"The Bloodline Path is said to have many future troubles."

Luo Feng did not have a deep understanding, but it was already a consensus in the Cultivation World. Though the bloodline route has high potential, it comes with innumerable future troubles, making the path of The Enlightened the best road.

Chapter 378: Episode 9, - 15: Summoning the Ancestors of Two Nations

Chapter 378: Episode 9, Chapter 15: Summoning the Ancestors of Two Nations

"Divine Emperor Ji Ke." The red-robed youth Chi Zhen couldn't help but ask, "We are also planning to transition to bloodline cultivation. What is the difference between refining a 'World-level Primordial Bloodline' and a 'High Level Primordial Bloodline' into the body?"

In the Dark Sacred Realm, many have refined high level primordial bloodlines, and possess rich experience.

But when it comes to refining 'World-level Primordial Bloodline', currently only Divine Emperor Ji Ke has succeeded in the Dark Sacred Realm.

"You should all know," said Divine Emperor Ji Ke, who usually wouldn't bother, but now spoke openly, "The bloodline path is generally recognized to have two major risks: one is the influence of bloodline will, and the other is that bloodline comprehension can distort one's self-awareness, effectively a form of memory contamination."

All present listened attentively.

Luo Feng was quite interested as he knew very little about the bloodline path.

"Most cultivators in the Dark Sacred Realm redeem high level primordial bloodlines." Divine Emperor Ji Ke explained, "Some even merge multiple bloodlines into their bodies. However, in truth, each additional bloodline brings an additional bloodline will!"

"The bloodline path is best specialized in one," Divine Emperor Ji Ke stated, "Which is why I chose to redeem the 'World-level Primordial Bloodline'. Even if I become a high level primordial life form, I still wish to specialize in this single bloodline to strive for the world level primordial. But the bloodline will of 'World-level Primordial Bloodline' is stronger, the memory contamination is more severe, and the potential excavation is more difficult."

"Perhaps I made a wrong choice," Divine Emperor Ji Ke self-deprecatingly remarked, "Perhaps the high level primordial bloodline suits me better. I might have overestimated my abilities."

"Is merging multiple bloodlines necessarily bad?" Luo Feng asked.

"There are also those who merge multiple bloodlines."

Dragon Nine Daoist Monarch also chimed in, "Those deeply researching the mysteries of bloodlines, comprehending profoundly, can even merge multiple bloodlines into one to form stronger bloodlines, thereby achieving world-level primordial."

"Such instances are few and rare; only by thoroughly understanding bloodlines can multiple be merged." Divine Emperor Ji Ke looked at Bo Xiu, Bai Yin, and Chi Zhen, "If transitioning to bloodline cultivation, still focus on specialization."

Bo Xiu and the other two nodded.

"Luo Feng Divine Emperor." Ji Ke looked at Luo Feng, "Now, I've encountered too many obstacles in excavating my bloodline potential; could you give some guidance?"

"In terms of bloodlines, my understanding isn't as comprehensive as you two." Luo Feng smiled.

Dragon Nine and Ji Ke both began to speculate.

This Luo Feng Divine Emperor is likely on the third invincible path, the 'Fusion Dao'. The first two paths would require a strong concern for bloodline cultivation information! Ensuring enough information is gathered.

"Luo Feng Divine Emperor, I believe you've surely researched primordial bloodlines and studied many materials," Ji Ke Divine Emperor inquired, "If it were you, how would you excavate bloodline potential while cultivating primordial bloodlines?"

Dragon Nine, Bo Xiu, Bai Yin, and Chi Zhen all listened intently.

An invincible level cultivator's mindset would undoubtedly have an impact on them.

"If it were me, first, find a compatible primordial bloodline, observe its detailed secret pattern map, and delve deeply for an extended period. Second, merge with the physical body. After merging, observe the impact of the bloodline mysteries on the body. Based on the changes in the body... infer the functions of these bloodline secret patterns. Combine the two to enhance the understanding of the bloodline."

"Finally, follow the most common practice in the cultivation world, submit to the bloodline instinct, and excavate bloodline potential," Luo Feng explained.

"I've tried comprehending, but can't see through it." Ji Ke Divine Emperor shook his head.

Luo Feng understood too.

High level primordial bloodlines are beyond Ji Ke Divine Emperor's comprehension and the world-level primordial might be entirely unintelligible.

"I've heard that if spiritual will can break out of the braided cage, it can suppress 'bloodline will' to a certain extent, allowing deeper excavation of bloodline potential," Luo Feng mentioned.

"But my spiritual will can't break out of the braided cage." Ji Ke Divine Emperor admitted helplessly, "Is there a good method to break

out of the braided cage?"

"Cultivating at our level, the spirit has already undergone much tempering." Dragon Nine Daoist Monarch stated, "The only way to enhance spiritual will left is through the improvement of one's path, which will yield an elevation of spiritual will."

"But my path can't improve anymore." Ji Ke Divine Emperor looked at Luo Feng.

"Do you know that high level primordial life forms also vary in size?" Luo Feng directly stated, "Why can those of massive size maintain such a form? Do you know the root cause?"

Dragon Nine, Ji Ke, Bo Xiu, Bai Yin, and Chi Zhen all were intrigued.

They had all understood the differences in body sizes from the intelligence on high level primordial bloodlines within large primordial halls.

"Some that are extremely large have spiritual consciousness that can command such vast physical bodies. This is because of having a special 'mind consciousness system'." Luo Feng described, "It is far more profound and efficient than the normal consciousness net we form."

"You can research high level primordial bloodlines, stripping away other mysterious interferences and focusing on the mind consciousness system." Luo Feng explained, "Study multiple types to accumulate experience."

"When the mind consciousness grows larger, the spiritual will more easily breaks through."

Luo Feng could feel the perfection of his mind consciousness system making his mind consciousness rapidly grow and hinting at a will transformation, even feeling this breakthrough was increasingly imminent.

So Luo Feng emerged to seek this spiritual awakening.

"Mind consciousness system?"

"Research high level primordial bloodlines? But also strip other mysterious interferences?"

All five present felt somewhat perplexed upon hearing Luo Feng.

Ji Ke couldn't help but say, "I can't distinguish which are mind consciousness systems and which are other mysteries. I just feel these secret patterns are a jumbled mess; I can't even fully discern my own path, which I specialize in."

"High level primordial bloodlines are too difficult." Dragon Nine Daoist Monarch agreed, "With low-level primordial bloodlines, we can still categorize mysteries and study them carefully."

Luo Feng gently shook his head, "Low-level primordial bloodlines don't possess a powerful mind consciousness system."

This statement left Ji Ke Divine Emperor, Bo Xiu, and the others rather disappointed.

There are no shortcuts to cultivation.

Researching the so-called 'mind consciousness system' alone requires thoroughly dissecting high level primordial bloodlines.

If one can dismantle and categorize high level primordial bloodlines for study, upon spending sufficient time, they can thoroughly understand and match themselves with a high level primordial bloodline, thereby attaining high level primordial life!

"Our spiritual wills are inadequate, our comprehension is insufficient, and even our ability to excavate bloodline potential is lacking. How can we break out of the braided cage?" Ji Ke Divine Emperor shook his head.

Bo Xiu, Bai Yin, and Chi Zhen also understood the situation clearly.

Relying on bloodlines to break out of the braided cage at least requires satisfying one of three conditions:!

Willpower, comprehension, and the ability to excavate bloodline potential! But perhaps the last item of 'excavating bloodline

potential’ remains elusive.

"Luo Feng Divine Emperor." Dragon Nine Daoist Monarch asked, "I wish to inquire, is there any method to comprehend paths I’m not proficient in?"

"Comprehend a Dao one is not good at?"

Luo Feng asked in surprise, "Since you’re not good at it, why spend so much effort?"

He was focused on what he excelled at!

Like the Path of Matter, Luo Feng felt he had some talent there; otherwise, he couldn’t have explored the Perfect Divine Body by himself. But clearly, he excelled most in the paths of life and destruction, with the highest efficiency.

"Is there a way?" Dragon Nine Daoist Monarch pressed on.

This was a question he had asked many cultivators. He would not miss any opportunity to seek advice.

Luo Feng thought for a moment before responding, "In enlightenment, there are no shortcuts! There is only one path—thick accumulation leads to thin release! If you cannot comprehend, it means your accumulation is insufficient."

Dragon Nine Daoist Monarch was stunned and nodded.

"Bo Xiu, go and let the two friends in," Luo Feng said with a smile. "One is called Flame Wind God Emperor, and the other is Thunder God Emperor."

Bo Xiu immediately understood.

He knew from Yuan Xiang Palace Master that Luo Feng came from the Land of Origin, and he also knew about the few Divine Emperors who emerged from the Land of Origin.

...

At this moment, in front of the cave mansion's garden, over a hundred thousand cultivators had gathered. They were bustling about, waiting for the invincible presence, 'Luo Feng Divine Emperor', to discuss the Dao.

The Primogenitor Yan Feng and Thunder Ancestor were in a corner, and in the Dark Sacred Realm, they counted as the lowest level in strength, hence their position was also the most remote.

"Flame Wind God Emperor, Thunder God Emperor." Suddenly came a voice.

The gazes of more than a hundred thousand cultivators fell upon Bo Xiu Divine Emperor.

Everyone knew that among the three followers under the command of the invincible presence 'Luo Feng Divine Emperor', one was Bo Xiu.

"Hmm?"

Both Primogenitor Yan Feng and Thunder Ancestor were a bit bewildered.

Was the call for them?

The title of Thunder God Emperor, in the Dark Sacred Realm, there were certainly not just a few hundred, but perhaps even a thousand. Maybe it was just a common name? But addressing both Flame Wind God Emperor and Thunder God Emperor simultaneously—

"It's calling us," Primogenitor Yan Feng and Thunder Ancestor had spotted it, seeing Bo Xiu Divine Emperor flying towards them.

"Luo Feng Divine Emperor invites you two inside," Bo Xiu Divine Emperor said with a smile. After all, as fellow natives of Luo Feng Divine Emperor's homeland, naturally, he had to be polite.

"Alright."

"Alright."

Though Primogenitor Yan Feng and Thunder Ancestor had gone through a lot, at this moment, under the gaze of over a hundred thousand cultivators, and with even the weakest among these cultivators being on par with them, the pressure on them was naturally quite significant.

With all eyes on them, the two were escorted into the inner garden.

"Why would Luo Feng Divine Emperor summon those two?"

"Those two, I could tell at a glance, one is a half-Primordial Bloodline Cultivator, and the other is a late-stage Divine Emperor Enlightened one. Why were they summoned?"

"With so many pinnacle beings here, is it their turn?"

"Didn’t you hear? Luo Feng Divine Emperor invited them himself, which means Luo Feng Divine Emperor already knows them."

The cultivators were buzzing with discussion.

...

Inside the garden.

Primogenitor Yan Feng and Thunder Ancestor entered the vast garden, and this garden was much larger than the cave mansion they had bought. Although they owned some ’special life remnants’ and other treasures which they could sell, and could be considered ’a bit wealthy’, having weak strength meant every expense in the Dark Sacred Realm had to be carefully calculated. Thus, they saved where they could on living arrangements.

"Brother Luo Feng, they have been brought," Bo Xiu said.

The Primogenitor Yan Feng and Thunder Ancestor saw it.

A man in black clothes and black hair sat centrally in the main seat!

Dragon Nine Daoist Monarch and Divine Emperor Ji Ke sat below him.

Bo Xiu, Bai Yin, and Chi Zhen sat more towards the edges.

The black-haired man turned his gaze towards them.

"Primogenitor Yan Feng, Thunder Ancestor, long time no see," Luo Feng said with a smile.

The pressure on Primogenitor Yan Feng and Thunder Ancestor was immense, and their hearts trembled.

"Luo Feng Divine Emperor, just call me Flame Wind."

"Luo Feng Divine Emperor, my original name was 'Xiu Ma', please call me Xiu Ma."

Both Primogenitor Yan Feng and Thunder Ancestor immediately replied.

"Hahaha..."

Luo Feng laughed and introduced, "Only a few Divine Emperors have emerged from my homeland, the Source World. In the Dark Sacred Realm, it's just me, Flame Wind, and Thunder! Speaking of which, these two are my seniors."

"So they're from the same homeland," Divine Emperor Ji Ke and Dragon Nine Daoist Monarch noted the names Flame Wind and Thunder.

On this day, Primogenitor Yan Feng and Thunder Ancestor, who were originally insignificant in the Dark Sacred Realm, had their names quickly discovered by various intelligence forces and were soon known to many cultivators.

Their martial prowess was average, but they had an extraordinary point: they were fellow natives of the invincible presence 'Luo Feng Divine Emperor'!

Our "Swallowed Star 2 Land Of Origin" welcomes a new member of the Silver Alliance: 'Venerable Xu Xin'. Thank you, Venerable Xu Xin,

for your generous reward! Thank you!

Chapter 379: Episode 9 - 16 Break Laws with Force?

Chapter 379: Episode 9 Chapter 16 Break Laws with Force?

Luo Feng, as an invincible level existence, finds it difficult to meet a rival beneath the Primordial. If he utilizes the Primordial Bloodline, he can easily break free from the Braided Cage at any time! Naturally, Luo Feng's mindset has also changed.

In the future, he pursues a better method to 'break free from the Braided Cage'!

As for the Cultivators of the Dark Sacred Realm, Luo Feng is willing to help them. He also harbors goodwill towards the two Divine Emperors, Flame Wind and Thunder, from his homeland Source World.

"Sit." Luo Feng pointed to the side.

Flame Wind and Thunder were flattered and also sat aside. In the current setting, their strength was indeed somewhat weak.

"Flame Wind, Thunder, have you encountered any confusion in your cultivation? Feel free to speak up. Even if I can't answer, I believe the others present can offer some insights." Luo Feng said with a smile.

Flame Wind and Thunder indeed had many confusions; previously, they were weak and unqualified to consult with Pinnacle level existences.

"I also exchanged for a High Level Primordial Bloodline 'Sky Eye Thunder Beast,' to excavate bloodline potential, but the harvest was minimal." Thunder immediately said.

"What method did you use to excavate potential?" Divine Emperor Ji Ke asked, as the Cultivator who has delved the furthest into bloodline excavation in the contemporary Dark Sacred Realm, naturally has the qualification to guide Thunder.

Thunder immediately began to narrate: "I attempted to induce with various thunder powers..."

...

The tens of thousands of Cultivators in front of the Cave mansion garden finally awaited the appearance of Luo Feng Divine Emperor.

"There he is."

"Luo Feng Divine Emperor has appeared."

These Cultivators were somewhat excited as they saw a man with black hair and black clothing emerge first, followed by Dragon Nine Daoist Monarch, Divine Emperor Ji Ke, and then Bo Xiu, Bai Yin, Chi Zhen, Flame Wind, and Thunder.

These Cultivators suddenly felt an incredibly terrifying aura emanating from the black-haired, black-clothed man.

Boom~~~~

Heaven and earth shuddered! Rules twisted! The surrounding space began to grow dim and dark!

All Cultivators felt that in front of this black-haired, black-clothed man, they would be easily torn apart.

Luo Feng's aura was released and quickly retracted! The Cultivators present also instantly fell silent, not daring to make a single noise.

"I am Luo Feng."

The black-haired, black-clothed man looked at them, smiled, and said, "My cultivation time isn't considered long, the confusions in cultivation among all of you, I also don't dare say I can resolve them all! Today, I will simply share some of my cultivation experiences, hoping to inspire you all."

"Thank you, Luo Feng Divine Emperor." All the Cultivators respectfully saluted.

They all understood.

An invincible existence doesn't need to guide them! Being able to guide them is a great grace!

"Please proceed with your questions." Luo Feng said.

"May I ask Luo Feng Divine Emperor, besides the known 'Bloodline Ultimate Awakening,' are there other methods to break free from the Braided Cage?" a Cultivator asked.

Luo Feng looked at Dragon Nine Daoist Monarch beside him.

They had spoken earlier, the bloodline issues would be answered by Divine Emperor Ji Ke! Many hidden pieces of information would be answered by Dragon Nine Daoist Monarch! Enlightenment issues would be answered by Luo Feng!

"The ways to break free from the Braided Cage are broadly divided into three methods." Dragon Nine Daoist Monarch said, "One is Bloodline Ultimate Awakening, two is mastering the Source World Origin, directly becoming the Master of the Source World. Three is Break Laws with Force, ascending from Half Primordial level directly to become a Primordial Lord."

"How many ways are there to master the Source World Origin?" a Cultivator pursued the question.

"The Source World Origin contains various Great Daos. You only need to leave a soul imprint in more than half of the Great Daos to hope to master the Source World." Dragon Nine Daoist Monarch said with a smile, "The Source World Origin consists of at least nine Great Daos! So, you need to cultivate at least five Great Daos to the Second Realm

of Godly King."

"At least excel in five Great Daos? And it also has to align with the Source World's Great Daos?" Everyone present knew that it was extremely difficult.

Excelling in one Dao is the most common.

Excelling in two Daos becomes quite rare! In the Dark Sacred Realm, there are altogether about one thousand Pinnacle level existences.

Excelling in three Daos? It's even rarer. Dragon Nine Daoist Monarch has caught the attention of Lord 'Starlight' precisely because he mastered three Daos to the Half Primordial level! Starlight specifically helped him choose a compatible Source World for reincarnation.

Even if one excels in three Daos, achieving the Second Realm of Godly King in an unfamiliar Dao is still extremely hard.

"I excel in Life, Destruction, and Life and Death three Daos. However, the Source World does not simultaneously contain these three Daos." Luo Feng knew this.

To comprehend at least five Great Daos that the Source World happens to possess, and all to the Second Realm of Godly King, is a huge challenge.

A vast world group seldom finds one.

"Besides mastering over half of the Great Daos, there is another way, through spreading faith." Dragon Nine said, "By spreading faith in the Source World, when every Creature within believes you are the Source World's master, then the Source World's origin consciousness will also recognize you as master! However, 'spreading faith method' is even more challenging than mastering over half of the Great Daos!"

"Are there other ways to become the Master of the Source World?" a Cultivator pursued further.

"If you are born in a particular Source World, even if you break free from the Braided Cage, you won't be rejected by this Source World!"

Dragon Nine Daoist Monarch smiled, "If you can become a World-level Primordial through the Primordial Bloodline, then you can spend a long time gradually refining the 'Source World Origin'. Or if you use Break Laws with Force, directly becoming a Primordial Lord, refining the Source World Origin of your homeland can be instantaneous."

The Cultivators present understood.

Either rely on certain methods, like mastering over half the Great Daos or the faith method, to control the homeland Source World.

Or rely on strength! After becoming a World-level Primordial or Primordial Lord, they can refine the homeland Source World.

"How to Break Laws with Force?" another Cultivator asked.

Ji Ke, Dragon Nine Daoist Monarch both looked at Luo Feng.

Luo Feng said: "Senior Yuan and others have said that comprehending the Primordial Level Path is about mastering the highest level of power, allowing one to break laws with force and directly become the most powerful Primordial Life."

"We have long comprehended the 'Half Primordial Level Dao' and felt it was perfect. Adding even a trace more is considered a burden. So how can we comprehend the 'Primordial Level Dao'?" one cultivator wondered.

"The three primary methods to become a Primordial Life are Bloodline Awakening, Master of the Source World, and Break Laws with Force. Break Laws with Force is the most difficult," Luo Feng said.

"In the Godly King Stage cultivation, although one is also groping in the dark, every progress feels like an enhancement in strength," Luo Feng said, "yet, ultimately, this groping is within the braided cage, making it somewhat smoother."

"Breaking through from the Half Primordial Dao to the Primordial Level Dao! That is breaking out from within the braided cage to beyond it!"

"On the basis of the 'Half Primordial Path,' continuing to add mysteries doesn't feel like it enhances strength; one doesn't know if the path they're groping for is right or wrong," Luo Feng said. "Without an increase in strength, groping blindly like this is truly 'cultivation in the dark.' One must gropé out a complete 'Primordial Level Dao' in the dark."

Luo Feng looked at the cultivators present, "In my opinion, if you can't comprehend more than seventy percent of the 'High Level Primordial Bloodline,' then don't even think about breaking laws with force."

All the cultivators were stunned.

They had previously been envisioning breaking laws with force.

The highest difficulty? Groping blindly in the dark? But who knows, maybe with good luck, one might just discover the Primordial Level Dao?

"If one can comprehend seventy percent of the High-Level Primordial Bloodline, they can harness the power of the Primordial Bloodline and directly become a High-Level Primordial Life," one cultivator said.

"Breaking laws with force has no luck."

Luo Feng looked at them, "Comprehending at least seventy percent of the 'High-Level Primordial Bloodline' is merely, in my view, the first requirement for breaking laws with force! True 'Breaking Laws with Force' is beyond my reach and must have requirements many times higher than what I said."

Because Luo Feng had studied too many Low-Level Primordial Bloodlines and many types of High-Level Primordial Bloodlines. He had already attained some understanding of Primordial Lives that have broken out of the braided cage.

He even researched the Eye of Life and Death, Star Tower Blood-colored Scale with the Wisdom Book, and Eye of Life and Death!

Luo Feng had a vague... understanding.

Once one comprehends the Primordial Level Dao, they can master the highest level of power! Therefore, the Primordial Level Dao should not be weaker than the Primordial Ancestor's bloodline mysteries. Not inferior to the Star Tower's one piece of blood-colored scale's mysteries.

Luo Feng knew the level at which the Star Tower Blood-colored Scale resided!

If the Primordial Level Dao is on the same level as it,

Then his 'Half Primordial Life and Death Dao' is still far from it.

"I vaguely suspect what level the Primordial Level Dao is at. But now I can only look up to it from afar," Luo Feng knew he was still far from it.

In his view,

The threshold of comprehending seventy percent of the High-Level Primordial Bloodline, what he said was already very low, meant to keep most cultivators from having extravagant hopes.

If you can't understand the High-Level Primordial Bloodline, still thinking about breaking laws with force? Purely a waste of time!

...

This discussion on the Dao lasted three days.

An answer was made by Luo Feng, Divine Emperor Ji Ke, and Dragon Nine Daoist Monarch concerning methods to break out of the braided cage and some perplexities about the Dao. Luo Feng mainly addressed questions pertaining to the paths of Life and Destruction, and declared his incompetence in other paths as they were unfamiliar to him.

Bo Xiu, Bai Yin, Chi Zhen, and many other peak-level beings also deliberated on the Dao one by one.

Luo Feng, Long Jiu, and Ji Ke listened attentively, as each had their expertise.

After three days, the discussion concluded.

The cultivators left satisfied, having gleaned much from this discourse on the Dao.

"From these three days of Dao discussion, I, too, have gained insights."

Luo Feng returned to the large Primordial Hall, "Surprisingly, there were cultivators who had witnessed the war between the Innate Primordial Life camp and the Cultivator camp firsthand."

Due to his relatively short cultivation era, compared to other cultivators who lived long and experienced much.

It turned out some cultivators were originally from the Shell Valley World Group!

Later, the Shell Valley World Group fell.

Numerous cultivators from the Source World were relocated to the Dark Sacred Realm.

There were also cultivators who encountered their home Source World being devoured by the Innate Primordial Life. Those cultivators could only extinguish their home avatar immediately, thus becoming cultivators without a home Source World.

"It seems that the cultivator camp is completely at a disadvantage."

"Senior Yuan and other seniors have also released more treasures for cultivators to exchange and purchase," Luo Feng thought.

In the early period, the treasures available for exchange and purchase in the large Primordial Hall of the Dark Sacred Realm were relatively few. However, as the war situation worsened, more treasures were released!

"I still have more than thirty million merit points unredeemed; I can take a good look at what treasures Senior Yuan and the others have actually prepared."

...

Inside the large Primordial Hall.

"To tour all the collections once requires one billion Primordial Crystals, quite expensive." Luo Feng casually paid, and immediately a female puppet lifeform arrived by his side. She had short silver hair, eyes shimmering with gold, and her smile naturally carried a touch of allure.

"Cultivator Luo Feng, I will lead you to view the entire collection of the large Primordial Hall," the silver-haired woman said, "I don't know what you'd like to see first?"

"Let's see the Primordial Prisoners," Luo Feng was very interested in these living High-Level Primordial Lives.

"The large Primordial Hall has a total of over thirty thousand High-Level Primordial Lives imprisoned, these are all spoils of war captured by our cultivator camp," the silver-haired woman said, "I will guide you to observe them one by one."

———

Thanks to Old K for the support with the Alliance Hierarch reward again!

Chapter 380: Episode 9, - 17, Knife

Chapter 380: Episode 9, Chapter 17, Knife

The silver-haired woman and Luo Feng walked deep into the large Primordial Hall, where space-time transformed with each step they took.

"Hmm?" Luo Feng noticed in the distance, a fiery and fierce figure within a space cage. Flames surged from its entire body, and even its breath carried Primordial Force. It was climbing with irritation, looking distantly at Luo Feng.

Just being stared at by it, Luo Feng felt an inexplicable tremor in his heart.

"The gap is huge."

"The breath it exhales could turn me to ashes. One claw from it, and even thousands upon thousands of me would be annihilated."

At this moment, Luo Feng was very certain.

His own energy reserve of twelve billion times should, in terms of size, reach one or two-tenths of this Destructive Demon God's power! But in terms of 'quality', the gap was too vast. As a result, no matter how many of himself faced a real high-level Primordial Life, there was no chance of resistance!

"Jumping out of the Braided Cage, that's a qualitative change," Luo Feng thought to himself.

He now had the confidence to use three types of high-level Primordial Bloodline to jump out of the Braided Cage!

But Luo Feng was not in a hurry to choose.

He needed to first achieve Perfection in the Life and Death Dao, allowing himself to be led by Senior Yuan and others. By then, he should know the most suitable way to jump out of the Braided Cage!

"This is a high-level Primordial Life," the silver-haired woman said beside him. "In the Infinite Primordial Space, low-level Primordial Life is countless and weak. Only high-level Primordial Life can garner some attention and have some effect in the camp wars."

Luo Feng understood.

Low-level Primordial Life had no role in camp wars.

"World-level Primordial Life is already a strong force on each side. Regular conflicts generally only involve world-level Primordial powers," said the silver-haired woman.

Luo Feng also knew.

High-level Primordial Life, world-level Primordial powers, and Primordial Lords. These are the three major levels for cultivators after jumping out of the Braided Cage, with vast differences.

"Once the Lords join the battle," the silver-haired woman's voice turned cold, "it signifies the start of war! And right now, it is during wartime."

Luo Feng listened.

"In camp wars, our losses are significant, with even vast world groups completely losing grip, and many Source Worlds becoming food for the Innate Primordial Life," the silver-haired woman said indifferently. "But the Innate Primordial Life camp also suffers severe losses. The lowest-level 'high-level Primordial life,' the deaths

number in the billions. We have also slain many world-level Primordial Life. The seven world-level Primordial corpses placed in the large Primordial Hall of the Dark Sacred Realm were freshly killed in a war tens of thousands of epochs ago."

Luo Feng was somewhat surprised.

Seven world-level Primordial Life corpses, killed just tens of thousands of epochs ago?

"Even the Primordial Ancestor has been slain," the silver-haired woman looked at Luo Feng, "This war is different from before; the Innate Primordial Life camp disregards casualties and attacks at all costs, and all the cultivator camp can do is face the battle!"

"Is the situation very bad?" Luo Feng asked.

"Very bad."

The silver-haired woman looked at Luo Feng, "Cultivator Luo Feng, a Fusion Dao cultivator, when you are guided, you'll know more!"

"You know I cultivate the Fusion Dao?" Luo Feng looked at her.

"Of course I know."

The silver-haired woman gazed at Luo Feng, "Every puppet life in the large Primordial Hall is a part of me. As the Guardian of the Dark Sacred Realm, nothing can be hidden from me."

"You have great potential, and in the future, you will also be an important force in our cultivator camp," the silver-haired woman said, "But right now, you are still too weak."

She led Luo Feng forward.

Luo Feng looked at the surrounding space cages, each one holding a high-level Primordial Life, each one bringing an intense oppressive feeling to Luo Feng.

Yet these terrifying existences are but the lowest-ranked soldiers on the camp battlefield.

"Jumping out of the Braided Cage and merely becoming a high-level Primordial wouldn't be valuable to the entire cultivation camp at all," Luo Feng thought, recognizing he needed to become stronger.

The further he went, the more high-level Primordial prisoners he saw. Facing the gaze of hundreds of high-level Primordial Life was also a test of Spiritual Will. Yet Luo Feng walked the entire path calmly.

In any case, they were just a bunch of prisoners and couldn't hurt him one bit.

"Aside from the Primordial prisoners, what else do you want to see?" the silver-haired woman asked.

"Take a look at the corpses of the Primordial life," Luo Feng said.

The silver-haired woman nodded.

Through the change in space-time, Luo Feng soon found himself before the corpses of high-level Primordial Life.

"In the war, the corpses of high-level Primordial Life were too many, and they've all been left for the cultivators to exchange," the silver-haired woman said, "Just one trillion Primordial Crystals can exchange for one high-level Primordial Life corpse. Many cultivators join forces to exchange for one corpse."

Luo Feng knew of this.

One trillion Primordial Crystals for a high-level Primordial Life corpse might seem high. But in reality, dozens or even over a hundred cultivators could jointly purchase a corpse, and after research, the materials from the corpse could earn back most of the cost, making the price not too steep.

"Too many corpses."

Luo Feng looked at the massive corpses resembling connected mountain ranges, each one emitting a blend of resentment, despair, and anger. The congregation of so many corpses' grievances felt oppressive to Luo Feng.

After a long while, he finished viewing all the high-level Primordial Life corpses displayed in the large Primordial Hall.

"This is—"

Luo Feng saw it.

Seven colossal corpses, each larger than the Land of Origin's mainland.

Compared to them, those high-level Primordial Life were negligible.

They ranged from five-thousandths of the entire Source World's size of the Land of Origin, to a maximum of two percent!

"Too massive," Luo Feng looked up in awe, "The hidden space within the large Primordial Hall can be so vast as to effortlessly contain seven massive corpses."

Facing these seven world-level Primordial Life corpses, Luo Feng truly felt as if he were confronting the Source World.

The sense of oppression is too strong.

At this level, I'm afraid a mere glance could turn me to ashes.

Yet in the war between camps, they still perished!

"Even thousands of High-level Primordial Lives can't withstand a single move in front of a World-level Primordial," the silver-haired woman said. "The gap between major levels is immense."

Luo Feng nodded, he could see that.

"On the camp battlefield, even Primordial Ancestors have fallen. Only the lords from our Cultivator Camp have never died in battle," the silver-haired woman said confidently. "The war between the two camps has lasted for endless ages, even though we are currently at an absolute disadvantage. But I believe ultimately, we the Cultivators will win, because our lords are undying."

Luo Feng knew that some Primordial Ancestors indeed perished in

battle; the Blood Scale of his Star Tower came from one such Primordial Ancestor.

"The lords are undying, yet we're still at an absolute disadvantage?" Luo Feng couldn't help but speak, even our people admit to being at an absolute disadvantage—how disadvantaged must we be?

The silver-haired woman hesitated slightly, then sighed softly.

"Once you're guided, you'll understand," the silver-haired woman didn't explain further.

The only boast-worthy aspect of the Cultivator Camp is that our lords are undying! It allows Cultivators to still believe in eventual victory and to fight without reservation.

At this moment, Luo Feng knew the Cultivator Camp was at a disadvantage but wasn't very clear on the real situation within the Infinite Primordial Space.

...

Later, Luo Feng observed various treasures and Secret Treasures. As long as they were stored in the large Primordial Hall, he'd seen them all.

"You've seen all the treasures and Secret Treasures," the silver-haired woman looked at Luo Feng, "Is there anything you want to redeem?"

"Treasures valued over ten million battle merits aren't stored here?" Luo Feng asked.

The redemption prices for Secret Treasures ranged from ten thousand to fifty million battle merits.

"Yes, the large Primordial Hall continuously stores only Secret Treasures below ten million battle merits," the silver-haired woman said. "As for those above ten million battle merits, each one is immensely valuable, possibly equivalent to a World-level Primordial Life Corpse. So they're specially stored, not in the Dark Sacred Realm."

Luo Feng understood.

He had noticed.

Treasures valued above ten million battle merits correspond to Secret Treasures worth more than a hundred thousand Infinite Space Reward Points, not lesser than the Eye of Life and Death. Some may even be more precious!

"Each Cultivator can only purchase one Secret Treasure above ten million battle merits, and trading is prohibited," Luo Feng sighed inwardly.

The Infinite Space Reward Point redemption doesn't limit the number of purchases but restricts point acquisition.

"You can study it carefully."

The silver-haired woman smiled slightly, then left.

...

Luo Feng returned to the Cave mansion within the large Primordial Hall, ready to redeem treasures and Secret Treasures anytime, and studied the detailed information of each Secret Treasure above ten million battle merits.

"My 'Life and Death Dao' has gone slightly astray," as Luo Feng accumulated more insights, he realized this too.

"My cultivation path is most deeply influenced by the Star Tower! Back on the Land of Origin, I meticulously observed that Blood Scale. It was like a beacon in the dark, guiding my way," Luo Feng frowned. "But in that Blood-colored Scale, the Secret Patterns I observed showed 34.2% Life-related, while Destruction-related merely occupied 9.2%."

"Using it as guidance led my Life and Death Dao to lean more towards Life."

Luo Feng pursued the ultimate immense Life Form, then transformed its power into Destruction, naturally possessing immense destructive

prowess.

Yet this path inherently leans more towards Life.

In the Divine King Stage of cultivation, it already favors Life.

"Strictly speaking, my Life and Death Dao is seventy percent Life and thirty percent Destruction combined."

"From the very beginning, influenced by the Star Tower, my direction skewed. I can't retrace my steps; I can only forge ahead," Luo Feng understood clearly—there's no such thing as a wrong path.

Even pure Life can aim for the highest level.

Seventy percent Life, thirty percent Destruction can still reach 'Half Primordial,' still able to proceed further.

"I still need a Secret Treasure that aligns with the Blood Scale of the Star Tower to corroborate each other," Luo Feng thought, corroborating each other can also broaden his horizons.

"This Secret Treasure needs to possess the mystique of the Primordial Ancestor Level, containing Life and Death, yet inclined towards Destruction," Luo Feng considered.

The Blood-colored Scale centers on Life.

The other treasure should focus on Destruction.

With both for reference.

His Life and Death Dao could be pursued more smoothly.

"From this angle, it should be this one."

Luo Feng took a fancy to one of the Secret Treasures.

Sky Splitting Saber: A weapon naturally nurtured in a Mysterious Land within the Infinite Primordial Space, containing the highest-level Destruction mystique, yet amid endless terrifying destruction, it harbors vitality. This saber, suitable for Cultivators of the

’Destruction Path’ and ’Life Path’ to redeem, requires 30 million battle merits for exchange.

"Containing the highest-level Destruction mystique, yet harboring vitality? With Destruction dominant and Life supplementary? This is it," Luo Feng chose it; he indeed favored sabers but had never encountered a suitable saber-type Secret Treasure.

This time he finally found it!

"Cultivator Luo Feng, are you sure you want to redeem the Sky Splitting Saber?" a gentle voice arose.

"I’m sure," Luo Feng replied.

"The Sky Splitting Saber, should it be transmitted to the Dark Sacred Realm or your homeland, the Source World?" the gentle voice asked. "Although the Sky Splitting Saber isn’t crafted from Innate Primordial Life Materials, its value is extremely high, posing potential risks outside the Source World."

"Transmit it to my homeland Source World," Luo Feng said.

Chapter 381: Episode 9, - 18: Another Direction

Chapter 381: Episode 9, Chapter 18: Another Direction

Origin Continent Origin World, Huyang City, city owners mansion.

Inside the Star Tower.

Luo Feng has been here for a long time using the 'Wisdom Book' and 'Eye of Life and Death' to study those high level Primordial Bloodlines, as he had long understood the low level Primordial Bloodlines completely. However, he had only researched about seventy percent of the high level Primordial Bloodlines, with only three portions now.

"Hmm?" Luo Feng felt an invisible fluctuation descending, and a weapon appeared out of thin air before him.

The treasures exchanged with Infinite Space Reward Points were also summoned in this way.

"This saber..."

Luo Feng held his breath the moment he saw the saber.

This saber was pitch black throughout, with its powers concentrated within the blade. Just seeing it, Luo Feng felt an awe similar to watching the Star Tower Blood Scale, supreme and unmatched! Its

level of power even reminded Luo Feng of the Source World Origin.

"Is this saber also one I can wield?" Luo Feng cautiously reached out to grasp the handle.

The saber did not resist at all.

Luo Feng grasped the saber!

"What a terrifying saber." As Luo Feng held the saber, he vaguely understood that even though he was just a Life within a braided cage, if he were to swing the saber, those high level Primordial Lives would probably be instantly obliterated.

This saber contained the highest level of destructive power, making it a highly coveted weapon for World-level Primordial experts.

Due to the Cultivator Camp's limited number of 'World-level Primordial Lives', while the spoils from camp wars were plentiful, at this critical moment of life and death, Senior Yuan and others finally opened up these treasures to the cultivators.

As long as your talent is sufficiently high, these treasures are exchangeable. If a cultivator dies, these treasures will still be reclaimed.

"Different from the blood scale inside the Star Tower, which is ultimately just a scale, incapable of exerting strong power. This saber, however, was naturally bred by the Infinite Primordial Space, inherently possessing terrifying destructive power." Holding the saber, Luo Feng felt like a small mouse touching the buttons of a nuclear weapon.

With a casual swing, it could destroy heaven and earth, with the Source World likely to fall into great destruction.

"I'm too weak."

"Before breaking free from the braided cage, it can only serve to enlighten me." Luo Feng understood this point, which was also why he exchanged for this saber, he intended to use it for cultivation.

To cross-reference with the Star Tower Blood Scale.

"Let’s take a look."

The Eye of Life and Death on Luo Feng’s forehead opened, he didn’t rush to use the Wisdom Book, instead seeking to view the interior of this Sky Splitting Saber first.

Buzz—

Inside the Sky Splitting Saber was an endless web of Secret Patterns!

"What is this?" Luo Feng gazed at the magnificent, infinite web of Secret Patterns, and with his understanding of life and destruction, almost instantly determined that the Secret Patterns he saw were divided into only two categories.

One category was Destruction, constituting around 89%.

The other category was Life, constituting around 11%.

"Just two categories of Secret Patterns?" Luo Feng felt a bit dazed. After having researched many Primordial Bloodlines and studied the Eye of Life and Destruction, as well as the Star Tower Blood Scale, which contain many categories of Secret Patterns.

"This is what makes a weapon, the Secret Patterns are very pure." Luo Feng marveled, "Exactly what I wanted, Destruction as the main part, Life as the secondary part."

As he carefully observed, Luo Feng harnessed his own powers to refine this saber. The saber, already prepared by Senior Yuan and others, was easy to refine, taking merely half a day for him to succeed.

The moment refining succeeded—

As Luo Feng held the saber, destructive aura rose from the saber’s surface, while destructive aura rose from Luo Feng’s body.

The person and saber seemed to become one.

"It feels as though I naturally became part of the saber?" Luo Feng murmured, "It should be that my realm is too low to perfectly control the saber. Instead, I'm being influenced by it."

"Hmm?"

Holding the saber, Luo Feng's mind sensed a presence in an extremely distant place.

That place was very far from the Origin Continent Origin World. Even further away than the Dark Sacred Realm by who knows how many times.

In the telepathic sensing of Luo Feng's many avatars, there was only one feeling! The mysterious place sensed at this moment was extremely far away!

"Hoo~~~~"

At that mysterious place.

Luo Feng faintly sensed endless destruction aura and, in vagueness, perceived one weapon after another, each weapon in various forms, each giving Luo Feng a feeling not inferior to the Sky Splitting Saber...

Numerous weapons were hidden there!

Compared to that mysterious place, the destructive aura contained within the Sky Splitting Saber couldn't even compare to a mere fraction.

"Sky Splitting Saber should have been conceived here." Holding the saber, Luo Feng instinctively had this perception, sensing that the Sky Splitting Saber in his hand had a sense of belonging to that place, as that was the Sky Splitting Saber's homeland.

"In the future, if I break free from this braided cage and if my strength is enough, I must find a chance to see it." Luo Feng felt great curiosity about that place.

Then stopped pondering further.

Resuming the use of the Wisdom Book to study the Sky Splitting Saber. As the owner of the Sky Splitting Saber, the saber did not defend against him, allowing the Wisdom Book to uncover numerous secrets.

"So, using 'Destruction' as a core, the Integration of Life and Destruction can go so far?"

Looking at the countless layers of space contained within the pages of the Wisdom Book, which continuously displayed the Secret Pattern diagrams of the Sky Splitting Saber, the Secret Pattern diagrams emerged repeatedly, even changing over time.

"I've seen another path for Life and Destruction Fusion." Luo Feng murmured.

The most brilliant Secret Pattern diagram he had seen before was that of the Star Tower Blood Scale.

There, Luo Feng saw the path using Life as the main focus and Destruction as the assistant. When Life was powerful enough, a simple gesture could yield infinite might. It was very easy to have extremely strong power in Destruction.

His 'Life and Death Dao' was traveling this path.

"In truth, using Destruction as the core with Life as assistance also leads to the highest level." Luo Feng now saw this path, the path displayed by the Sky Splitting Saber.

Using Life as a guide, it instead brings ultimate Destruction.

Every strand of vitality can trigger destruction exponentially billions of times.

Billionfold destructive energy can still cause chain reactions, continuing to evoke countless folds of destructive energy...

That's true destruction of everything!

"It's too crazy."

"Such destruction to the end might even be self-destructive." Luo Feng murmured, "This is the 'Dao' carried by weapons; primordial life itself is probably very difficult to carry such a Dao."

Any primordial life must first be alive themselves! So those primordial bloodlines will contain 'life' type secret patterns.

No matter how skilled in destruction, primordial life will also contain secret patterns of other Daos. It can't be as extreme as weapons.

"My original path is correct; the Life and Death Dao should primarily focus on life." Luo Feng thought, "However, I can still absorb some mysteries of destruction and integrate them to perfect my path."

A new world unfolded in front of him, and Luo Feng couldn't help but immerse himself in it.

...

Dark Sacred Realm, inside a large Primordial Hall.

"Limited to buying one Secret Treasure, he redeemed the Sky Splitting Saber." Two high-level primordial lives were also constantly observing Luo Feng.

"We high-level primordial lives will receive strong cultivation support during the walker phase. But once becoming high-level primordial life, the resources given to us rapidly decrease." The woman in the fiery red robe gently shook her head, "For instance, I don't even qualify to exchange for this Sky Splitting Saber."

"All the opportunities meant for you are already given." The silver-haired and silver-eyebrowed man said, "In the end, you became a high-level primordial life by ultimate bloodline awakening. How could the Lords possibly continue to cultivate you intensely?"

The woman in the fiery red robe nodded.

She understood too.

High-level primordial life, in the camp wars, is merely insignificant soldiers.

High-level primordial lives are categorized. If they comprehend bloodline mysteries and directly break through, they still receive enough cultivation support. For those like them, hoping to become world-level primordials can be nearly ignored.

"Luo Feng's potential is far greater than ours." The silver-haired and silver-eyebrowed man Qiu Ge said, "As a Fusion Dao Cultivator, the strength he has demonstrated is stronger than some Fusion Dao Cultivators I know."

"The Lord mentioned that Luo Feng has gone to extremes. He is not pursuing the balance of life and destruction but instead pursuing the massive extent of life, which greatly increases the difficulty of integrating life and destruction." Yifeiya said, "But at the same time, once successful, the strength becomes evidently more powerful."

"He's walking out of the Dark Sacred Realm." The silver-haired and silver-eyebrowed man slightly smiled, "We are the garrison commanders of the Dark Sacred Realm. If we don't help him now, when he jumps out of the braided cage... we won't have the qualification to help him anymore."

Yifeiya's mind was moved.

"Fusion Dao Cultivators, extremely talented, mostly likely to become world-level primordials." The silver-haired and silver-eyebrowed man said, "By then, he might support us and deploy us under his command, so our days will be more favorable."

"Hmm." Yifeiya nodded, "How do we help?"

"He should be nearing a breakthrough but missing a crucial part. Let's pick a suitable opponent for him." The silver-haired and silver-eyebrowed man smiled, "Among over thirty thousand imprisoned high-level primordial lives, choose the most suitable opponent."

"Helping him break through; the causality is enough." The silver-haired and silver-eyebrowed man said, "If he still doesn't break through, we will think of other ways."

"Let's go." Yifeiya nodded.

They both clearly understood that currently, they are high-level primordial lives, but in the future, they would be looking up to Luo Feng.

Whoosh—

They arrived at the time-space cage deep within the large Primordial Hall. One by one, the imprisoned high-level primordial lives also saw them.

"We are preparing to select a primordial prisoner to send to the wilds of the Dark Sacred Realm. This primordial prisoner will also be granted temporary freedom." Qiu Ge swept his gaze coldly, "Who wants to go for such a good thing?"

These imprisoned high-level primordial lives, upon hearing this, felt a bit frightened.

"Exiled out?"

"Once exiled and strength sealed, ultimately, they'll be surrounded and killed by those weaker walkers."

These primordial prisoners all understood this point.

Exile means impending death!

In the wilds of the Dark Sacred Realm, occasionally, a primordial prisoner will appear! With the walkers' exploration ability in the wilds, why does occasionally one primordial prisoner emerge? Also with sealed strength? It is clearly intentionally released.

"Two garrison commanders, I am willing to join the Cultivator Camp and surrender my Life Core for refinement." One mass of large black mist spoke.

"Join?"

Qiu Ge and Yifeiya both looked at this group of prisoners with a smirk.

"Don't even think about it! Last time, during the Lords' large-scale

recruitment, tens of millions captured innate high-level primordial lives chose to submit, their Life Cores were refined, and they forever became part of our Cultivator Camp. If you didn't submit back then... it is too late now being sent to various Sacred Realms!" Qiu Ge sneered.

"Too late?" Many of these innate primordial lives were recently sent, not too aware.

"Only the Lords can perform Life Core refinement. Hence, only during the Lords' recruitment is the only chance for submission." Qiu Ge sneered.

"Your strength is quite good, and amongst over thirty thousand prisoners, your size is the largest." Yifeiya suddenly walked to a spatial cage, looking at the imposing and massive fiery red rock life inside, "Good fortune to be exiled to the Dark Sacred Realm; you're the one."

"I'm exiled?"

The massive fiery red rock life was taken aback.

"Your strength should be sealed a bit more." Qiu Ge immediately used the command token beside and quickly increased the restraints on this primordial prisoner.

Hum.

This primordial prisoner's strength was rapidly suppressed and sealed; even its size quickly shrank, and its aura also weakened increasingly. Falling out of the 'high-level primordial level', and its strength continued to be suppressed.

Moments later, its visible aura barely even surpassed Divine Emperor Ji Ke.

The other primordial prisoners looked at it, feeling complex. They understood clearly that exile... meant death.

"I will die." The fiery red rock prisoner gazed at the two garrison commanders, "But in this war, your whole Cultivator Camp will be

completely destroyed, all territories trampled by us. Ultimately, perhaps only those few Lords will survive lonely, but every territory will become our hunting grounds!"

"Just watch." The silver-haired and silver-eyebrowed man sneered, reached out his hand, and with the fiery red rock life fully sealed, it shrank and sat in his palm.

The two garrison commanders took this primordial prisoner and promptly left.

The remaining over thirty thousand primordial prisoners watched this scene with complex thoughts but understood that being imprisoned, they could only be at others' mercy.

Chapter 382: Episode 9, - 19: Primordial Prisoner and Luo Feng

Chapter 382: Episode 9, Chapter 19: Primordial Prisoner and Luo Feng

A wilderness in the Dark Sacred Realm.

Swoosh.

Space fluctuated, and a giant of fiery red rock appeared on the ground, looking around with a fierce gaze.

"Exiled?"

"Am I to be besieged by those weak cultivators?" It felt an endless rage and unwillingness in its heart; as a high-level primordial life, was it really to be dismembered by the ants within the braided cage?

It even wanted to commit suicide at this moment, but ever since becoming a prisoner, even suicide was impossible.

It had become the spoils of war for the cultivator camp, a resource for them! Cultivators would study its body materials and bloodline mysteries, even use it for artifact refining, crafting auxiliary treasures. Every part of its body would be utilized by the cultivators to the highest efficiency.

"Cultivators!!!" It let out an angry low growl, the fiery red on its body surface became even more dazzling, the rock on its surface began to melt, and its aura surged. However, the suppression power erupted, and illusory chains penetrating its body appeared, one end of which penetrated its body and the other linked to the void, suppressing it with infinite earthly force.

"Cultivators, all your territories will be flattened, except for a few lords, all other cultivators will become our food!!!" It was filled with hatred, yet had nowhere to vent.

It walked step by step in the wilderness, enduring endless suppressive force with every step.

"Despicable race! Damn race!" It glared around, filled with intense hatred and murderous intent.

Until one day, a long time later.

A team of cultivators was hunting outside.

"Look, what's that?"

Inside the Flying Boat, there were seven cultivators, each at the half primordial enlightened level. Using their investigation secret technique, they had already glimpsed that endless fiery power.

The primordial prisoner, filled with endless rage and hatred, had molten lava flowing on its body surface, flames surging, and a terrifyingly fierce aura.

"It's a primordial prisoner!" The seven cultivators immediately recognized it.

Even from a distance, they could feel the terrible aura of the primordial prisoner. Although its aura was forcibly suppressed, the essence of the aura... far surpassed that of cultivators; it was the aura of high-level primordial life!

"We've actually discovered a primordial prisoner. It's said their power is completely sealed, so their movement speed is relatively slow, making them suitable for siege."

"Let’s give it a try."

"Be careful, keep a distance."

This cultivator team began to perform formations, launching attacks from a distance against the molten prisoner.

Various formation attacks were unleashed, whether void-like entanglement or annihilation by earthly power... But the molten prisoner sat there motionless, allowing these attacks like scratching an itch.

"Despicable ants." The molten prisoner glanced over, even though its power was completely suppressed, it was released to be an opponent for Luo Feng! To it, ordinary cultivator teams indeed amounted to nothing.

It suddenly stood up.

Rumble~~~

Illusory chains appeared on its body surface, the suppression and sealing made it unable to fly, forcing it to run in large strides.

As it ran, the earth trembled, it furiously charged toward the cultivator team. As long as the distance was closed, with one strike, it could incinerate a void.

"Quick, run."

"It’s a very strong primordial prisoner, even together we can’t harm it in the slightest." This cultivator team was also experienced, knowing that primordial prisoners occasionally appearing in the Dark Sacred Realm varied in strength.

The weak ones, their team could injure as well! Dozens of pinnacle existences could join hands to slaughter them. But this molten prisoner was clearly very powerful!

"We must call for stronger cultivators."

"This information can also be reported to Luo Feng Divine Emperor."

These cultivators piloted the Flying Boat and quickly fled into the distance, while the molten prisoner, unable to fly, could only stop, resentfully watching them from afar.

...

Only a day later.

Tens of thousands of half primordial enlightened level, over a hundred pinnacle existences, Divine Emperor Ji Ke, Dragon Nine Daoist Monarch had all arrived, and they had formed a super grand array.

'Dragon Nine Daoist Monarch', the top formation expert in the Dark Sacred Realm, was the array host, his spiritual will potent enough to masterfully control the entire formation, harmonizing the power of each cultivator.

"Rumble~~~"

The power of the formation astonished and awed the cultivators, who also felt proud to be a part of it.

This overwhelming formation turned into a terrifying blade, slashing at the molten prisoner's neck, leaving only slight marks that quickly healed as lava flowed over them.

Furthermore, lightning bolts condensed from within the formation, striking down with a power that terrified every cultivator, repeatedly hitting the molten prisoner. The prisoner's body was too robust, after all, it was selected by Qiu Ge and Yifeiya as one of the largest primordial prisoners.

"How is this possible?"

Dragon Nine Daoist Monarch, Divine Emperor Ji Ke couldn't believe it, the molten prisoner withstood their united attack from the formation of over ten thousand cultivators, with at most minor injuries that healed instantly.

"So many of us together can't do anything to it?"

"The Dark Sacred Realm has never seen such a strong primordial prisoner!"

Dragon Nine Daoist Monarch and Divine Emperor Ji Ke exchanged glances.

They had long understood that the primordial prisoner was intentionally released by a cultivator who escaped the braided cage, but this time the one released was especially powerful! It was indeed a bit absurd that even with the cooperation of tens of thousands of cultivators, they couldn’t handle it!

"It was probably released because of Luo Feng Divine Emperor." Dragon Nine Daoist Monarch communicated telepathically.

"Brother Long Jiu, your formation is unparalleled in the Dark Sacred Realm, such a formation should be able to match Luo Feng Divine Emperor," Divine Emperor Ji Ke said.

Chapter 383: Episode 9, - 19: Primordial Prisoner and Luo Feng_2

Chapter 383: Episode 9, Chapter 19: Primordial Prisoner and Luo Feng_2

Dragon Nine Daoist Monarch was also somewhat puzzled.

He believed that his spiritual will had leaped out of the braided cage, and guiding a grand formation of over ten thousand cultivators should not be much different from that of Luo Feng.

"Why hasn't Luo Feng Divine Emperor come?" Dragon Nine Daoist Monarch asked.

"I inquired Bo Xiu, and Bo Xiu said Luo Feng Divine Emperor is in seclusion! All communications have been cut off, with no disturbances allowed," explained Divine Emperor Ji Ke.

"In seclusion?" Dragon Nine Daoist Monarch nodded, "It seems this primordial prisoner will continue to wreak havoc for some time."

Over ten thousand cultivators formed a grand array, looking from afar at the lava prisoner.

The lava prisoner glanced in all directions, disdainfully chuckling as the cultivators flew far away, none daring to approach: "Despicable and weak cultivators, with my power sealed to this degree, you still can't handle me, hahaha... you truly are weak!"

The cultivators felt quite aggrieved upon hearing this, but indeed, they couldn't do anything; even when joining forces, they couldn't harm it in the slightest.

At this moment, in the large-scale Primordial Hall.

Qiu Ge and Yifeiya, these two high-level primordial life forms, watched this confrontation from afar.

"Luo Feng went into seclusion," Qiu Ge slightly frowned, "We specifically chose an opponent for him, yet he went into seclusion."

"He just exchanged for the Sky Splitting Saber, so naturally, he needs to study it thoroughly. Given his temperament, his seclusion shouldn't last too long," Yifeiya said, "Let's wait a bit more."

As high-level primordial life forms, they had ample patience. Moreover, they were well aware of Luo Feng's growth journey, having spent very little time reaching this stage. How long could a single seclusion last?

...

Luo Feng was focused on the highest level of destructive mysteries contained in the 'Sky Splitting Saber', these mysteries made Luo Feng deeply fascinated.

This fascination lasted for more than a hundred epochs.

"My Life and Death Dao is only lacking a sliver of spiritual touch to reach perfection at the half primordial level."

"The more grandiose destructive mysteries of the Sky Splitting Saber can serve as resources for the 'Primordial Life and Death Dao'," Luo Feng thought to himself.

The half primordial Life and Death Dao, compared to the primordial Life and Death Dao, was vastly inferior.

To comprehend the 'Primordial Level Life and Death Dao', Luo Feng knew he needed to integrate a great many mysteries into it, including the Star Tower Blood Scale, the mysteries of the Sky Splitting Saber,

which were only part of the resources.

Even a complete Primordial Life and Death Dao might not be achievable with just the Star Tower Blood Scale and the Sky Splitting Saber mysteries.

"Breaking laws with force is too distant for me."

"Since there is such a legend, there must have been cultivators who succeeded, becoming lords because of it," Luo Feng thought.

"There's no need to think that far ahead, first find that touch of the spirit."

Luo Feng immediately exited seclusion.

It was only then that he saw the transmissions he had previously cut off.

"Hmm? A previously unknown primordial prisoner appeared in the Dark Sacred Realm? Even the massive formation formed by over ten thousand cultivators couldn't handle it?" Luo Feng was somewhat surprised and also intrigued.

Under the braided cage, he could rarely find an opponent.

This primordial prisoner seemed to be a suitable opponent for him.

"Let's have a look."

Luo Feng immediately left the large-scale Primordial Hall, heading straight to the location documented in the intelligence where the primordial prisoner was.

...

Luo Feng traversed through heaven and earth, each step covering vast distances, in just a few hundred steps, he was already able to see the towering figure of the lava prisoner from afar.

"It is indeed a high-level primordial life form," Luo Feng immediately discerned. The aura of the other was incredibly terrifying, only by

being sealed and suppressed could he confront it.

"It has appeared for over a hundred epochs, and there are still only about a thousand cultivators observing from around," Luo Feng glanced over.

In the past hundred epochs, during the most gathered times, more than a hundred thousand cultivators had converged here!

However, Dragon Nine Daoist Monarch's formation could at most lead over ten thousand cultivators! Beyond that, it exceeded his range of control! Therefore, even with over a hundred thousand cultivators gathered, without a unified formation, their power was scattered, still rendering them only capable of wounding the lava prisoner.

The lava prisoner, its body too vast and resilient, with exceptionally strong recovery capability.

"Such a robust body!" Luo Feng was thrilled to see his prey.

"Luo Feng has arrived."

"Finally here."

High above, a silver-haired man and a woman in a fiery red robe had already appeared, they had released this primordial prisoner, waiting for this very day.

"Luo Feng's strength is too formidable, even among Fusion Dao cultivators, few are so powerful! Under the braided cage, he could find no match. Only by suppressing the power of high-level primordial life could it provide him with adequate pressure," Qiu Ge watched from afar, "Perhaps in this battle, his Life and Death Dao could reach complete perfection."

"In the future, in our Cultivator Camp, we might gain another World Level Primordial Life," Yifeiya also said.

Unlike the Innate Primordial Life Camp, in the Cultivator Camp, the number of World Level Primordial Life forms was much fewer!

The two of them carefully observed the upcoming battle.

...

"Let’s give it a try first."

Luo Feng immediately extended his hand.

His arm suddenly expanded, and his palm directly tore open a rift in the world, carrying an infinite terrifying power. It directly crossed through the rift and descended in front of the lava prisoner.

The towering lava prisoner was initially sitting there and suddenly saw a giant hand extending through the rift, moving at incredible speed.

"Hmm?" The lava prisoner immediately sensed something amiss, and promptly swung its arm to block.

"Boom—"

This strike of Luo Feng, with a massive body leveraging an energy reserve of 1.2 billion times, under the command of the Secret Treasure ’Undying Heart’, unleashed a tremendous power, this strike forcefully hit the lava prisoner’s blocking arm, and also impacted into its chest, causing even a depression in the chest of the lava prisoner.

A low, deep sound resonated across the world!

The towering lava prisoner sitting there was directly sent flying, and while it flew, its lava body carved a deep giant trench into the ground! This formed a colossal canyon stretching billions of kilometers!

The lava prisoner lay at the end of this billion-kilometer-long canyon, its chest marked with cracked, molten blood flowing, and it was somewhat dazed at the moment.

It had been stunned!

"Satisfying, truly satisfying." After that strike, Luo Feng only felt an exhilarating thrill. After all, in the Dark Sacred Realm, he had never unleashed himself so freely! Back when he confronted Secret Ruins Divine Emperor and fourteen others, merely by standing there and

causing time-space to collapse, without even moving, the enemies were all brought before him, all kneeling.

And with his even greater strength now, it was increasingly hard to find a worthy opponent, Luo Feng had to hold back his power when interacting with other cultivators, worried about accidentally bumping or smashing a few to death.

Encountering this lava prisoner, Luo Feng could finally unrestrainedly go all out! It was a truly satisfying strike!

"This primordial prisoner's strength is still a bit lacking," Qiu Ge and Yifeiya in the high sky also observed the situation.

"Quickly lift part of the sealing, increase its power by another fold!" urged Yifeiya.

——

Thanks to the new Alliance Hierarch's rewards from "Absolutely Carefree," "Loves Novels Little Jin," and "VERY!"

Chapter 384: Episode 9 - 20 Perfection (Part 1)

Chapter 384: Episode 9 Chapter 20 Perfection (Part 1)

The Lava Prisoner lay at the end of the massive chasm, somewhat incredulous as he looked at the black-clothed, black-haired man appearing in the distance.

"A lowly cultivator within the Braided Cage can wield such power?" The Lava Prisoner couldn't believe it. Immediately, it sensed that the force sealing its physical body, soul, and life core, penetrating every part, suddenly loosened slightly.

Even with just a slight release, a portion of the Lava Prisoner's originally vast and mighty power broke free from the seal, instantly enhancing its strength. The energy coursed through its entire body, and its chest fully recovered.

"The two guardians of the Dark Sacred Realm have lifted the seal slightly." The Lava Prisoner, being a formidable presence even among high-level primordial lives, was naturally shrewd and quickly surmised the intentions of the two guardians. "They're planning to use me to temper this cultivator?"

"Heh heh."

"And still within the Braided Cage, already this strong! This

cultivator’s talent and potential are terrifying. Indeed worth the two guardians’ trouble."

The Lava Prisoner’s heart was boiling with hatred.

"If there’s a chance, kill this cultivator for good! Those two guardians will definitely be furious and might even be punished by the top ranks of the cultivator camp!" The Lava Prisoner saw no vitality and only wished to retaliate against the cultivator camp fiercely.

"If this cultivator knows the Clone Technique, there’s nothing I can do. But, from what I understand, most cultivators in the Braided Cage don’t have avatars."

"I need to find an opportunity to deliver a lethal blow and eradicate this genius cultivator," the Lava Prisoner thought.

The two guardians treated it as a tool.

Yet, a tool can also backlash!

...

"These prisoners are originally from the Innate Primordial Life Camp and are our mortal enemies. Now imprisoned, they are filled with resentment." Qiu Ge, standing high above, watched the scene, "The stronger its hatred, the greater threat it poses to Luo Feng."

"On Luo Feng’s path, his life form is extraordinarily vast. Even if the Primordial Prisoner severely damages Luo Feng, the chances of killing this avatar are slim." Yifeiya smiled slightly, "Even if this avatar is truly destroyed, it’s still beneficial, as it’ll surely provoke Luo Feng even more."

They hoped this battle would help Luo Feng break through.

...

Boom!

Amidst the crevices of heaven and earth, Luo Feng’s figure instantly appeared in front of the Lava Prisoner, with his raised arm slashing

down like a blade! The power of life and death cut through all obstacles, even slicing open the membrane of heaven and earth!

"So fast!" The Lava Prisoner, under the seal, couldn't fly and moved slowly. Facing this attack from Luo Feng, it could only slightly turn its body, taking the blow with its shoulder.

This slash from Luo Feng!

The Lava Prisoner's body sunk directly into the earth like a stake, half buried, with only its upper body still above ground.

"Heh heh heh." The Lava Prisoner grinned, revealing several rows of teeth as sharp as saw blades, interlocking like a jungle.

"Got stronger?" Luo Feng immediately noticed that in the first palm strike earlier, the Primordial Prisoner was utterly powerless, knocked away without resistance! But now, the more ferocious slash, the Lava Prisoner withstood it, remaining unscathed.

"Cultivator, your strength seems a bit weak," the Lava Prisoner grinned at Luo Feng, "If I wasn't sealed, a single finger could crush you."

As it spoke, suddenly, eight arms extended from the Lava Prisoner's body, attacking simultaneously with eight rocky arms!

Luo Feng vanished like an illusory bubble.

"I'm too slow." The Lava Prisoner frowned slightly, as virtual chains permeated its body, making every move sluggish. Even the surprise attack with eight arms at close range failed to touch this cultivator.

"Life and Death Reincarnation!"

In an instant, over ten Luo Feng appeared, surrounding the Lava Prisoner from all sides, including the top, launching consecutive attacks.

Whether hand techniques, fist techniques, or claw techniques... each move utilized the Half-Primordial Life and Death Path, using Luo Feng's arms as weapons, chaining one move after another, even

leveraging the previous move's power to enhance the subsequent attacks.

The moves were like life and death reincarnation, the vitality growing denser, and the destructive aura becoming increasingly terrifying. Almost in a blink, Luo Feng unleashed tens of thousands of strikes.

These tens of thousands of strikes brought immense satisfaction to Luo Feng!

Every move mobilized as much of his twelve billion-fold size as possible! Under such extreme pressure, Luo Feng's control over his body began to improve further.

The Lava Prisoner's moves were slower, unable to touch Luo Feng, and in an instant, it took tens of thousands of impacts.

Each of these tens of thousands of strikes echoed like the roar of the heavens and earth.

"Pfft," The Lava Prisoner spat, its mouth flowing with lava-like blood, while its body bore countless scars, disappearing with the flowing lava.

"Your moves are too weak," The Lava Prisoner ignored the trickling blood, looking at Luo Feng, "Thirty-five thousand strikes, and this is all? Oh, the wounds are gone now."

"Hoo!"

Luo Feng's figure flickered, and a cyan-gray spear appeared in his hand.

This cyan-gray spear was one of the many life and death secret treasures Luo Feng purchased after arriving in the Dark Sacred Realm. With his current realm, especially after studying the Sky Splitting Saber, he could draw even more fascination from the spear!

"Boom——" The spear in Luo Feng's hand suddenly thrust forward, trembling slightly as it thrust, secret patterns emerged brightly along the spear shaft, a terrifying force trying to pierce through everything.

"This——" The Lava Prisoner was startled.

The spear had already pierced its chest! However, with its towering and massive physique, its body extremely thick, the spear forcefully pierced halfway through the Lava Prisoner's body, instantly pulling out, and thrusting a second time into the Lava Prisoner's frame.

Yet, during the second thrust, an invisible force within the Lava Prisoner entangled and hindered Luo Feng from withdrawing the spear.

"You cannot escape," The Lava Prisoner's two of its arms at that moment also grasped the spear shaft.

"Close combat makes it a bit troublesome to kill you," Luo Feng's figure flickered to a distance. Instead of retrieving the long spear, he simply smiled slightly, and the Endless Blood Sea spread out, sweeping across the vast surrounding heavens and earth.

In the depths of this Endless Blood Sea, there were two formation diagrams and a black tower.

At this moment, Luo Feng activated these three Life and Death Dao secret treasures, among the ten or so Life and Death Secret Treasures he purchased, these three were the most suitable to use alongside the 'Undying Blood Sea' for setting formations.

Combining three grand arrays! Powers aligned! This was now the strongest 'Blood Sea Array' Luo Feng could employ.

"Boom～～～"

The blood sea roiled! Although the Lava Prisoner was massive, it was engulfed by the blood sea, and layers of formations covered and constrained it.

Under the Blood Sea Array, the Lava Prisoner felt bound in layers. Its eight arms struggled to move, barely able to unleash about twenty or thirty percent of its strength.

"How can the body of this cultivator in the braided cage be so colossal? Such terrifying energy reserves, nearly reaching those of

some high-level primordial lives." The Lava Prisoner was somewhat panicked.

Although it was a mighty existence among high-level primordial lives, its power was sealed.

In such a sealed state, facing Luo Feng who wielded numerous secret treasures, it was utterly powerless to resist.

"My 'Life and Death Dao' centers on life, with destruction as a supplement. The explosive power in close combat is somewhat lacking," Luo Feng thought, "Utilizing secret treasures, leveraging formations to amplify the advantages of life forms, is my current strongest state."

...

The Lava Prisoner appeared in the Dark Sacred Realm over a hundred eras ago.

Initially, it attracted a large number of cultivators, but it never won a battle, gradually reducing the number of surrounding cultivators.

Currently, there were only about a thousand cultivators still around.

"It's Luo Feng Divine Emperor."

"Luo Feng Divine Emperor took action and heavily injured that Primordial Prisoner with one palm."

They watched the battle scene excitedly.

Finally, a cultivator capable of overpowering this Primordial Prisoner appeared, suppressing it one-on-one!

"What a formidable array."

They watched closely as the Endless Blood Sea Array enveloped the Lava Prisoner, who struggled and resisted within it, but its efforts were visibly weakened.

"Back then, Dragon Nine Daoist Monarch, together with over ten

thousand cultivators, couldn’t threaten this Primordial Prisoner with their combined array."

"At one point, even over a hundred thousand cultivators, with scattered offensives, couldn’t threaten the Primordial Prisoner."

"Luo Feng Divine Emperor can suppress this Primordial Prisoner all by himself! Is he stronger than hundreds of thousands of cultivators? In the history records of the Dark Sacred Realm, there has never been an invincible existence to such a degree."

These observing cultivators discussed, mentioning the three routes to invincibility. In the Dark Sacred Realm’s history, no ’Half-Primordial Fusion Dao’ cultivators were born, just the two more common routes.

Manifesting one’s spiritual will to escape the braided cage, excavating the potential of a world-level primordial bloodline. These two kinds of invincible existences were indeed far less imposing than Luo Feng.

In reality, these cultivators were unaware.

Among Fusion Dao cultivators, Luo Feng was very special. He didn’t pursue ’life and death balance’, but rather focused on ’Star Tower Blood Scale’, taking the extreme path, pursuing the immense limits of life forms! While the difficulty of the path increased, the power was indeed much greater.

...

The Lava Prisoner continued to sink in the Endless Blood Sea, its resistance weakening continuously. Suddenly, it saw a giant pill furnace appear within the blood sea, the furnace lid already open.

"Not good." The Lava Prisoner knew it was in trouble, yet it could no longer resist.

"Capture."

Enveloped by the formation, the Lava Prisoner fell directly into the pill furnace, with the lid closing instantly. Among the ten or so Life and Death Secret Treasures Luo Feng acquired, this pill furnace was the strongest in terms of refining enemies.

The Endless Blood Sea returned to calm, and Luo Feng sat cross-legged above it, looking at the pill furnace that floated to the sea's surface. The furnace's exterior was a deep green color, and when Luo Feng activated it, its surface was covered in a secret pattern of green and black intertwining.

"Sizzle~~~~"

Within the pill furnace, the Lava Prisoner was being refined.

"This cultivator is too troublesome." The Lava Prisoner originally planned to conceal some of its strength, to finish off that cultivator at a critical moment. But with the Blood Sea Array, it couldn't utilize its power and unknowingly ended up inside this pill furnace.

"Qiu Ge, let the Lava Prisoner increase its strength again." Yifeiya observed everything from the high altitude, frowning, "It poses no threat to Luo Feng."

"If it strengthens further, pollution might emerge." Qiu Ge said.

"Just fully lock its soul! Even if there's some minor power pollution, the impact is minimal," Yifeiya remarked.

Qiu Ge nodded.

Soul pollution was indeed most severe, while slight power pollution was no big deal.

"Luo Feng is too powerful. I already chose a Primordial Prisoner with the strongest body, yet I am still forced to release a tiny amount of its true strength." Qiu Ge, holding a command token, cautiously loosened a bit more restraint.

This release of restraint already broke a certain limit, the Lava Prisoner would now truly unleash a tiny portion of its high-level primordial life essence. Even if it was just a sliver, it was still high-level primordial strength. Such power was already polluting to divine emperors.

"Hmm?"

Sitting cross-legged atop the Blood Sea, Luo Feng, while controlling the Life and Death Pill Furnace to refine the Lava Prisoner inside, suddenly sensed the struggles and resistance within the furnace rapidly increasing.

Chapter 385: Episode 9 - 21 Perfection (Part 2)

Chapter 385: Episode 9 Chapter 21 Perfection (Part 2)

"How can this be possible?" Luo Feng was astonished. In his view, even if the Lava Prisoner's strength increased several times, it was unlikely to escape from the pill furnace.

But at this moment, the resisting force within the pill furnace shocked Luo Feng. He exerted all his power to suppress it, yet the resisting force escalated dramatically in just a few breaths.

Bang!

The lid of the furnace was directly pushed open, and a terrifying, dazzling figure burst out from it. The Lava Prisoner's body had shrunk slightly, covered by a layer of golden flame that even made Luo Feng feel a threat of death.

"Something's not right." Luo Feng looked up at the figure.

"You contemptible cultivator, let me show you the true power of high-level primordial life." The Lava Prisoner smiled evilly and instantly transformed into a golden shadow, striking towards Luo Feng.

Luo Feng faced him sternly. With a stretch of his right hand, a greyish-green long spear appeared, and the spear instantly pierced

forward, containing the mysteries of life and death.

"Extinguish."

The Lava Prisoner punched directly, his fist bearing the force to destroy heaven and earth, smashing onto the spear. The power transmitted through the spear to Luo Feng's entire body, causing Luo Feng's body to tremble. His right hand holding the spear silently disintegrated into powder, and his arm broke in multiple places with a crackling sound.

"Even through the Secret Treasure, my arm can be broken? Is this the true power of high-level primordial life?" Luo Feng instantly speculated, as he had studied various high-level primordial bloodlines deeply.

The power high-level primordial life should possess; Luo Feng had contemplated it in his heart.

"The previous Lava Prisoner had his strength completely sealed! His movements were slow, only able to use some clumsy force at best. But now, he's using a trace of the true power of high-level primordial life."

Luo Feng could also confirm that the opponent was merely using a trace! If too much, he would be done in an instant.

"There is a qualitative difference in how the forces of both sides manifest."

"In its presence, there is no distance, no strength or weakness, everything 'below high-level primordial' will be obliterated." With a thought, Luo Feng's body merged into the endless blood sea, and the blood sea formation fully activated.

Boom——

The golden fire burned on the surface of the Lava Prisoner, akin to a sun, directly plunging into the endless blood sea.

The sea water of the blood sea was quickly eroded and obliterated! Even with the 'Undying Heart' enhancement, even forming a vast

formation, it could still be visibly obliterated.

Encountering the Lava Prisoner, Luo Feng seemed like an icy continent encountering a sun!

Luo Feng's icy continent was immensely vast. But the Lava Prisoner's 'sun' was very small, like a micro sun. Yet the micro sun's power is inexhaustible, endlessly burning this icy continent.

"It's simply not possible to fight!"

"In direct confrontation, even with the Secret Treasure, I might lose an arm; ten moves, eight moves, the body would be torn apart."

"Using the endless blood sea formation for defense, it will continuously be burned."

At this moment, Luo Feng couldn't think of a way to defeat the opponent.

Is escape the only option?

With a thought, he could differentiate the blood sea into countless avatars, breaking through the rifts of heaven and earth to flee.

"Why flee?"

"I've cultivated to this level, needing a strong enough opponent! Even if this body is completely obliterated, the avatar in the large primordial hall can recover quickly 1.2 billion times. It's a battle of victory or death!" Luo Feng's fighting spirit surged.

If the avatar dies, losing over ten Life and Death Secret Treasures? Luo Feng doesn't care!

He seeks to truly grasp the half primordial life and death path!

If the Dao is achieved, such Secret Treasures are insignificant.

"Bring it on!"

The endless blood sea surged with monstrous waves, willing to

sacrifice the sea water's obliteration, still launching terrifying attacks towards the Lava Prisoner.

"Hahaha!!!" The Lava Prisoner was now able to hover in mid-air, letting the sea water transform into a dragon to strike, or chains to imprison, yet it didn't care at all!

All sea water would be burned and obliterated by the golden fire.

Sizzle, sizzle~~~~

On the endless sea surface, a thin layer of golden flame covered some areas, the golden flame burning on the sea surface, continuously obliterating a large amount of blood sea water.

In the process of obliteration, not only did the golden flame not deplete, but the obliterated 'blood sea power' was naturally absorbed by the golden flame! It's only due to the sealing suppression that the Lava Prisoner could only use a trace of fundamental power.

"Hmph, high-level primordial, to you cultivators in the braided cage, it is an essential disparity. Although it's just a trace of power, your body is quite large. But it will just take more time." The Lava Prisoner hovered in mid-air.

The golden flame eroded and penetrated, also contaminating the endless blood sea.

"My Undying Blood Sea Body has been obliterated by 0.3%, contaminated by 2.1%." Luo Feng was well aware of his current state; facing the contamination of high-level primordial power, he couldn't resist.

After contamination, not only could he not mobilize the blood sea's power, but it also impacts the body's performance.

...

"Did we overdo it?" In the high sky, the silver-haired man 'Qiu Ge' frowned slightly, "The primordial prisoner can mobilize a trace of fundamental high-level primordial power. Even Luo Feng cannot resist it."

The woman in the fiery red robe 'Yifeiya' also frowned watching the battle.

The confrontation was one-sided!

Although Luo Feng's body was large, he couldn't threaten the opponent in the slightest.

"Without this trace of high-level primordial power, the primordial prisoner wouldn't be Luo Feng's opponent at all," Yifeiya said. "Luo Feng has reached a terrifying level within the braided cage. Only utilizing 'high-level primordial power' can pose a threat to him. Our choice was correct."

"Ultimately, it's only power contamination," Qiu Ge also nodded, "Even if Luo Feng fails, we can easily help him expel the power contamination."

They had no way to deal with soul contamination.

That's why they sealed the Lava Prisoner's soul, life core, and all powerful means; at this moment, cautiously releasing only a trace of fundamental high-level primordial power. Just this trace, Luo Feng was unable to withstand.

...

"The Primordial Prisoner can fly now?"

"It has become stronger."

The over a thousand watching Cultivators were somewhat astonished. For countless ages, they dared to besiege because the Primordial Prisoner was relatively slow and couldn't fly.

But now it can fly, and its flying speed is extremely fast! It can threaten many Cultivators.

"Luo Feng Divine Emperor is doing his utmost to deal with it. Hopefully, Luo Feng Divine Emperor can successfully slay that prisoner." These Cultivators hoped as they also sent the news back.

At this moment, some Cultivators were already on their way. After all, the battle between Luo Feng and the Primordial Prisoner still attracted many Cultivators, even the Dragon Nine Daoist Monarch and Divine Emperor Ji Ke were hurrying over. But it would take time for them to travel.

******

The Endless Blood Sea returned to tranquility, stopping its offense.

"Hahaha, stopped? Given up?" The Lava Prisoner stood in mid-air, overlooking the Endless Blood Sea, with strands of golden flames burning on the sea's surface.

In the depths of the Blood Sea.

Luo Feng sat cross-legged, ignoring the Primordial Prisoner.

"My body has disintegrated by 3.1%, not a high ratio. But the polluted part of the body has reached 59%." Luo Feng felt that the Endless Blood Sea was starting to become uncontrollable, beginning to resist.

With 59% of the body polluted, the resistance was wanton, greatly decreasing the efficiency of controlling the remaining body strength.

The power drastically reduced, Luo Feng ceased his attack on the Lava Prisoner. It's useless to attack.

"The pollution is rapidly escalating."

"If this continues, this Avatar is done for."

This was a colossal Avatar carrying numerous Life and Death Secret Treasures, with a massive twelve billion energy reserve. The disintegrated part wasn't much at the moment, but the pollution ratio was too high, and increasing swiftly.

Even a trace of High-level Primordial Power!

The power in this Braided Cage, even with a full twelve billion Perfect Divine Body Energy Reserve, was short-term polluted to such

an extent!

"Legend says, newly breaking through High Level Primordial Life, with no restriction on strength, causes far more severe pollution, even able to pollute the soul consciousness." Luo Feng thought, "But as long as the Spiritual Will jumps out of the Braided Cage, it can suppress pollution, even expel all pollution."

Yuan Xiang Palace Master had encountered a newly breakthrough High Level Primordial Life, and even their soul consciousness was polluted!

"This is merely some High-level Primordial Power pollution!"

"It should be easier to expel. Suppress it! Expel it!"

Luo Feng paid no attention to the Lava Prisoner, focusing all his Spiritual Power on targeting the pollution.

The pollution was ongoing, and the golden flames were burning away sections of Life Power...

"Suppress! Expel!"

Under the dual threat of pollution and disintegration, at the moment Luo Feng concentrated all his Spiritual Power to resist, he vaguely sensed a tiny change within the entire Mind Consciousness System!

Life has inherent instincts!

Every Life unit in Luo Feng's massive body possessed extraordinary Life Spirituality, and Life instinct was even stronger.

At this moment, countless Life units, under the threat of pollution and disintegration, allowed Life instinct to override other instincts! Making them unite more perfectly, and a slight change occurred in the operation of the Mind Consciousness System.

This slight change was instantly perceived by Luo Feng.

"I found it!"

Under enormous threat, the slight change in the Mind Consciousness System allowed Luo Feng to glimpse a more profound operational method.

What Luo Feng had been seeking was just a trace of Spiritual touch! A touch that could make the operation of the Mind System more perfect.

This kind of touch, once experienced! With Luo Feng's level, he could firmly remember the mysterious and complex operational way of the entire Mind Consciousness System under 'this state'.

"Boom——"

At this moment, Luo Feng actively propelled the Mind Consciousness System according to this operational method.

Once propelled!

Luo Feng could feel that every unit of Life's Spiritual Power in the Endless Blood Sea was more efficiently unified, and the huge Consciousness Net rapidly expanded, intertwined step by step, with each consciousness thread immensely strong, eventually forming a complete Mind Consciousness, expanded to unprecedented heights.

"Boom!"

Luo Feng's Spiritual Will suddenly broke through that layer of Braided Cage!

Jumping out of the Braided Cage, achieving grand freedom!

The Spiritual Will only felt relieved and exhilarating!

The Spiritual Will that leaped out of the Braided Cage naturally covered the entire body, perfectly controlling the whole body! The pollution brought by that trace of golden fire power was relatively low, and in the face of the Will that jumped out of the Braided Cage, all pollution was expelled, not a trace could remain.

"Hahaha..."

Luo Feng’s heart was filled with endless joy.

At this moment, the Mind Consciousness System perfectly governed the vast Blood Sea Body.

The Spiritual Will leaping out of the Braided Cage controlled the whole body with ease, feeling that only one or two points of Spiritual Power were needed. In handling such a Physical Body to display exquisite techniques, it was estimated that ten or eight Secret Treasures could still be fully deployed.

"My Life and Death Dao, under the Braided Cage, finally reached Perfection." Luo Feng smiled, feeling indescribably elated.

——

Thanks to the two Old Alliance Leaders ’终解u’ ’VERY’ for rewarding once again!

Chapter 386: Episode 9, - 22: Half Primordial Life and Death Path

Chapter 386: Episode 9, Chapter 22: Half Primordial Life and Death Path

Luo Feng's Half Primordial Life and Death Path pursues an extremely large body, making the Mind Consciousness System an essential part of the 'Half Primordial Life and Death Path'!

From the many primordial bloodlines, it can be seen that even naturally born 'low level primordial lives' do not have a complete Mind Consciousness System. Among high-level primordial lives, only those of extremely large forms will have this system.

This system is vast and complex, more difficult to comprehend than a single high-level primordial bloodline! With Luo Feng's comprehension ability, it took him over five thousand eras to create a Mind Consciousness System that suited himself, even with the aid of supportive treasures.

It should be noted that Luo Feng has been cultivating in the Nine Rivers Sacred Realm for only over two thousand eras!

"My Mind Consciousness System, having reached this stage, has allowed my spiritual will to break free from the braided cage."

"However, the Mind Consciousness System still has a broader space."

"If I wish to control a more massive 'world-level primordial flesh body', or a 'lord-level body', the demands on the Mind Consciousness System will only become higher." Luo Feng understood this point.

Under the braided cage, this Mind Consciousness System could be called perfect.

But outside the braided cage, this Mind Consciousness System is still quite immature.

"Boom——"

In a single thought, he perfectly controlled every bit of power in the massive flesh body, the vitality became even more terrifying, 3.2% of extinguished power was rapidly recovering, and this bit of 'minor injury' was completely restored in the blink of an eye, recovering to a twelve-billion-fold energy reserve.

This state is his flesh body's state of perfection.

"My control over my body has reached an incredible level." Luo Feng felt, "As long as the body's consumption doesn't exceed thirty percent, it can recover within a few breaths."

Luo Feng himself was somewhat amazed.

The life-focused life and death dao body, combined with the Mind Consciousness System, possesses such terrifying vitality.

"My path is the right one."

"To kill the enemy, one must ensure one's own survival first!"

"The enemy can't harm me! I can unleash the power of my enormous body, wanton destruction of the enemy."

Even after having witnessed the supreme destruction mystery contained in the 'Sky Splitting Saber', Luo Feng remained unmoved! No matter how powerful destruction is, it is still to ensure the safety of life. Life certainly comes before 'destruction'!

...

The Primordial Prisoner hovered in the air, faint golden flames burning on the surface of the blood sea, but the Primordial Prisoner's face slightly changed, looking somewhat puzzled downward.

"How is this possible?" The Primordial Prisoner could sense its power being cleansed instantly, that was the same power stepping out of the braided cage— the power of spiritual will.

Rumble~~~

The originally vast endless blood sea, instantly united, transformed into a man in black clothes and black hair.

Previously, Luo Feng used the 'Blood Sea Formation' to confront the enemy because, with twelve-billion-fold energy reserves, he could not fully exert most of it. Only with the aid of the formation could its power be better exerted.

But now, he could perfectly control every life unit, all power driven by his will! There was no need for the formation anymore.

His Mind Consciousness System is the most perfect formation! Perfectly controlling every bit of power!

"Primordial Prisoner, I should thank you for allowing me to take this step forward." Luo Feng looked at him.

"Taken this step?" The Primordial Prisoner looked at Luo Feng, sneering, "No matter how you break through, you still haven't jumped out of the braided cage! In front of me, you still have no resistance."

"Is that so?"

Luo Feng stretched out his hand, and in his hand appeared that pill furnace, Luo Feng held one of the pill furnace's feet.

This pill furnace could refine the enemy, and could also be used to 'smash' the enemy. This was inherent in the mysteries contained within the pill furnace. Luo Feng felt the pill furnace was indeed the

most suitable weapon for his physical body at the moment.

"Ridiculous." The Primordial Prisoner disdained, even grasping a little high-level primordial power was a qualitative difference.

The Primordial Prisoner instantly transformed into golden flames, rushing straight at Luo Feng.

"Destroy!"

Luo Feng held the pill furnace, suddenly smashing towards the Primordial Prisoner.

The twelve-billion-fold energy reserve body, at this moment, all power was perfectly united, the pill furnace's secret pattern mysteries operated, as Luo Feng swung the pill furnace, the heavens and earth and time and space were all torn and distorted.

As though creating heaven and earth!

The pill furnace was enormously huge, smashed towards the Primordial Prisoner!

"Boom——" The Primordial Prisoner disdainfully did not dodge, hewing with anger using eight arms.

Under this terrifying impact, the Primordial Prisoner's expression changed, feeling the power of this furnace smash actually suppressed him! The pill furnace crushed the eight arms, smashing onto its head.

It must be known, last time when it collided hard with Luo Feng, Luo Feng's palm was annihilated, arm severed! Its advantage was significant.

But now, the situation was completely reversed! Luo Feng instead held a huge advantage!

With this smash, the Primordial Prisoner fell heavily to the ground, the earth suddenly shook, rippling like water across an endless vast range, scaring the over a thousand Cultivators watching from afar to quickly retreat further.

"His strength has greatly increased, the power feels several tens of times stronger!" The Primordial Prisoner fell into the deep pit in the ground, still somewhat unbelievable, "Life within the braided cage, how can it be this strong?"

Compared to before, Luo Feng's controlled energy reserve increased about tenfold! At the same time, after the life and death dao was completely perfected, with the spiritual will stepping out of the braided cage, the power unleashed by the pill furnace secret pattern also soared again.

Overall strength, purely in terms of power, indeed increased several tens of times!

The Primordial Prisoner, capable of wielding high-level primordial power, but only a sliver of mastery.

Under Luo Feng's current state, however, he completely suppressed the Primordial Prisoner!

"Bang!"

Luo Feng stepped through the rift in the heavens and earth to the Primordial Prisoner's front, once again raised the pill furnace and smashed it down!

Boom! Boom! Boom! Boom! Boom! Boom! Boom! Boom! Boom!

Chapter 387: Episode 9, - 22: Half Primordial Life and Death Path_2

Chapter 387: Episode 9, Chapter 22: Half Primordial Life and Death Path_2

Continuous furious pounding!

Each blow was like the creation of heaven and earth!

The cultivators watching from afar could only see the vast earth ripple again and again, and in the center of the battle, only the figure of Luo Feng furiously pounding could be seen, without any sign of the lava prisoner striking back.

"This is——"

Dragon Nine Daoist Monarch and Divine Emperor Ji Ke piloted a flying boat, a flying boat capable of short-distance traversals through the void, rushing here at the fastest speed, they finally arrived at the battlefield.

Upon arrival, they saw the scene of Luo Feng wielding a pill furnace, furiously pounding the lava prisoner.

"This power..."

Dragon Nine Daoist Monarch and Divine Emperor Ji Ke watched Luo

Feng's every strike, causing the surrounding space-time to twist and shatter completely, the endless earth trembled and rolled over and over, making them slightly pale.

After all, this was the Dark Sacred Realm! The space-time within the incredibly stable Dark Sacred Realm!

In front of Luo Feng's power at this moment, even heaven and earth seemed fragile.

"Has Luo Feng Divine Emperor become a High Level Primordial Life?" Divine Emperor Ji Ke couldn't help but wonder, "Why do I feel like, if I touched him, I would disappear?"

"I don't know." Dragon Nine Daoist Monarch was also somewhat at a loss.

...

"This——"

The silver-haired, silver-browed man and the woman in a fiery red robe, watching the battle from the sky, were also stunned by the scene before them.

"The primordial prisoner simply can't resist, about to be beaten to death alive." The woman in the fiery red robe said softly.

"A life within the braided cage is about to kill a primordial prisoner capable of exerting a trace of high-level primordial power." The silver-haired man was somewhat trembling in his heart, exclaiming, "If I hadn't seen it with my own eyes, I absolutely wouldn't believe it."

The woman in the fiery red robe nodded: "Although it is said that a normal high-level primordial life cannot only possess a trace of high-level primordial power! But what Luo Feng is doing now, I have never heard of."

They had never heard that a cultivator within the braided cage could become this strong.

"Oh, that prisoner is dead." Qiu Ge said.

"Luo Feng didn't hold back." Yifeiya laughed, "Come on, let's go meet Daoist Luo Feng."

******

Luo Feng wielded the pill furnace and smashed hundreds of times! Brutally shattering the 'big rock' that was the lava prisoner until its life core was exposed, and it wasn't until the life core was smashed to pieces that Luo Feng finally stopped.

"Exhilarating." Luo Feng only felt thoroughly refreshed.

With regard to the primordial prisoner, Luo Feng had no intention of capturing it alive, as he could easily obtain and comprehend the high-level primordial bloodline that matched his own.

Such prisoners, better to send them on their way.

Regarding the antagonistic 'Innate Primordial Life Camp', Luo Feng had no mercy nor any desire to torment; it was better to just kill them outright.

He was unaware that this scene had utterly intimidated the over a thousand cultivators in the distance, as well as Dragon Nine Daoist Monarch and Divine Emperor Ji Ke, who had just arrived.

Luo Feng glanced around, saw Dragon Nine Daoist Monarch and Divine Emperor Ji Ke, and smiled as he nodded.

"Congratulations, Brother Luo Feng." Dragon Nine Daoist Monarch and Divine Emperor Ji Ke both said, though they weren't clear about Luo Feng's state at the moment, there was no doubt that Luo Feng had made a breakthrough!

Otherwise, he wouldn't be this ridiculously strong.

...

Before Luo Feng could speak with Dragon Nine Daoist Monarch and the others, he felt the surrounding scene change.

Two figures flew down simultaneously, a silver-haired, silver-browed man, and a woman in a fiery red robe. Their auras were vast and expansive! If the lava prisoner only had a trace of high-level primordial power, then the high-level primordial power these two contained was utterly boundless.

"Two High Level Primordial Lives?" Luo Feng was secretly shocked.

"I am Qiu Ge."

"I am Yifeiya."

The silver-haired, silver-browed man and the woman in the fiery red robe landed and smiled as they introduced themselves.

"We are the guardians of the Dark Sacred Realm." The silver-haired man explained with a smile.

"Luo Feng, greetings to the Guardians." Luo Feng saluted as well.

The woman in the fiery red robe smiled and said, "We have been observing Daoist Luo Feng for some time, and today, Daoist Luo Feng has finally made a breakthrough, achieving the Half Primordial Life and Death Dao."

"Congratulations, Daoist Luo Feng." The silver-haired man also said.

Luo Feng was a little surprised: "The two guardians knew I was cultivating the Life and Death Dao?"

The silver-haired man nodded and said, "The last time you sparred with the Secret Ruins Divine Emperor and the others, Yifeiya and I reported to the Lord, and the Lord had even descended to the Dark Sacred Realm to observe Daoist Luo Feng closely. It was just that at that time, your Life and Death Dao was somewhat lacking, so no connection was made."

Luo Feng understood. He had previously wondered why he hadn’t been connected despite supposedly having invincible strength. It turned out that the Lord had descended once before, but he did not yet meet the connection conditions at that time.

"The Lords you mentioned?" Luo Feng asked.

"Our Dark World Group, the earliest territory of Lord Senior Jin, the Dark Sacred Realm was all created by Senior Jin." The silver-haired man Qiu Ge didn't conceal anything, actively explaining, "Later, when new Lords were born, our cultivator territories were redrawn, and this became Senior Yuan's territory."

"Whenever a Lord is born, the territory gets redrawn." Yifeiya also said, "We've already reported your breakthrough to Senior Yuan, and I believe it won't be long before Senior Yuan will come to connect with you."

"Come, let's go to the Primordial Hall and wait. Senior Yuan generally descends at the Primordial Hall." Qiu Ge said.

Luo Feng nodded and immediately waved his hand to put away the lava prisoner's body.

The silver-haired man and the woman in the fiery red robe watched this scene, feeling somewhat complex. They both had a premonition that within the braided cage, this Daoist Luo Feng was already terrifying, and once he jumped out of the cage, it would be extraordinary.

Whoosh.

They immediately took Luo Feng, and in an instant, they crossed vast distances, returning to the large Primordial Hall.

...

After presenting food and wine, the two guardians, Qiu Ge and Yifeiya, took a very humble stance, treating Luo Feng as an equal.

"Ever since Daoist Luo Feng arrived in the Dark Sacred Realm, we've been watching you." Qiu Ge smiled and said, "We discovered that your accumulation was extremely deep, so we specifically selected a primordial prisoner to release, to help Daoist Luo Feng a bit."

"So it was the two guardians who helped me." Luo Feng was a bit surprised and grateful, "Without the two of you, I don't know how

long it would have taken for me to make a breakthrough."

Yifeiya also smiled and said, "With Daoist Luo Feng's comprehension potential, even without us, it wouldn't have taken long."

Qiu Ge also nodded, "Daoist Luo Feng's comprehension potential far surpasses ours! Your future is also far beyond ours."

Luo Feng said, "I've now reached the Half Primordial Life and Death Dao, but I'm not sure where to go next."

"Our abilities cannot guide you." Qiu Ge said, "Just be patient and wait, and when the Lord comes to connect with you, a path will naturally be provided."

Although they had heard that Fusion Dao cultivators usually refine 'World-level Primordial Bloodline' to become World-level Primordial Life.

But they dared not advise Luo Feng.

Because they also knew... refining primordial bloodlines inevitably results in future troubles.

Those who didn't refine bloodlines and still became World-level Primordial Lifeforms! Their potential is even greater!

"Okay?"

Qiu Ge and Yifeiya immediately had a sense of an approaching presence.

Luo Feng also sensed a formless fluctuation, a fluctuation somewhat resembling the Source World Origin's operation, and with its descent, it became an old man.

"Senior Yuan." Luo Feng immediately sensed it and quickly greeted him.

"My Lord." Qiu Ge and Yifeiya were even more respectful.

The old man stood there, gazing at Luo Feng with a smile of

approval: "Not bad."

———

Thanks to new Alliance Hierarch ’Sword-wielding Wanderer in White’ for the reward!

Chapter 388: Episode 9 - 23 Land of Origin

Chapter 388: Episode 9 Chapter 23 Land of Origin

In recent years, Yuan's mood hasn't been good. After all, the Innate Primordial Life Camp is sparing no cost to completely annihilate the Cultivator Camp, and the war situation is dire. Many world clusters have fallen, numerous Source Worlds devoured, countless creatures wiped out!

As the leader with the highest prestige in the entire Cultivator Camp, how could Yuan be in a good mood?

Even though his main battle avatar is going all out, the overall strength gap between the two sides is immense!

"Luo Feng." Yuan looked at the young junior before him, and his mood was somewhat comforted, praising, "You are the 93rd cultivator in the history of the entire Cultivator Camp to achieve the 'Half-step Fusion Path'."

Upon hearing this, Luo Feng realized just how rare 'Half Primordial Fusion Path Cultivators' were.

He knew the Cultivator Camp's territories were vast, possessing numerous world clusters! The long history was beyond the estimation of weaker cultivators like them who haven't escaped the Braided

Cage.

In the entire Cultivator Camp's territory, the endless long history, less than a hundred have reached his level.

"Your spiritual will has also escaped the Braided Cage." Yuan said, "Possessing both makes you even rarer. Achieving 'World Level Primordial Life' won't be difficult for you."

Seeing the emergence of an excellent junior, Yuan felt some relief.

Yet it still couldn't change the overall situation! Even if there were ten 'World Level Primordial Lives', it wouldn't affect the situation a bit.

"When our Cultivator Camp was weak, considering how troublesome we Lords were, they could tolerate us."

"But now, they clearly can't bear it."

Yuan understood this.

A long time ago.

All Source Worlds were food for Innate Primordial Lives! It was the darkest period for cultivators; every Source World devoured, countless creatures extinct, like an irresistible 'catastrophe'.

When Source Worlds were consumed, the Infinite Primordial Space would nurture new Source Worlds.

The 'food' for Innate Primordial Lives was very plentiful. They were accustomed to such days.

Later, the first Primordial Lord 'Yuan' appeared, mastering the highest level of power in the Infinite Primordial Space, with countless avatars, virtually immortal and indestructible. This made life a bit better for the Cultivator Camp. He tried to shield enough territories! With his strength shaking the Infinite Primordial Space, his immortal and indestructible ability, the ancestors of the Innate Primordial Life Camp recognized his qualification to have a territory, and the two sides were peaceful.

But as endless years passed, the number of Lords in the Cultivator Camp gradually increased. The territories they held also grew larger. The conflicts became greater.

Wars between the two sides occurred multiple times! The Lords were strong enough, having successively killed over ten Primordial Ancestors!

But this time...

It's the largest war scale in history! The Innate Primordial Life Camp is sparing no cost to wage war! The Lords struggle to hold it off.

"Luo Feng, the cultivators who were previously invited, were all heading to the Land of Origin." Yuan explained with a smile, "The Land of Origin is also one of the most important cores for us cultivators. I'm taking you there now."

"Thank you, Senior Yuan." Luo Feng respectfully said.

"Let's go."

With a wave of Yuan's hand, he already took Luo Feng away.

Qiu Ge and Yifeiya respectfully sent them off.

"The next time we see Daoist Luo Feng, he might be World Level Primordial." Qiu Ge said.

"I wonder if, when he becomes World Level Primordial, this war will be over." Yifeiya added; they, too, as the lowest members in this war, were concerned about the war's outcome.

...

Infinite Primordial Space.

Yuan took Luo Feng, advancing at ultra-high speed.

"Whoosh."

The speed was far faster than Luo Feng's usual teleportation; the

scene before them was already distorted, and he couldn't clearly see any Source World.

Yuan looked ahead, remaining silent.

Luo Feng could sense that Yuan was in a bad mood.

According to Earth time, they traveled for a full two hours flying without a single word from Yuan.

Luo Feng didn't disturb him either; he understood... Although Yuan seemed to be carrying him on the journey, likely his other avatars were busy with important matters!

"We've arrived ahead." Yuan finally spoke up, "The Land of Origin was originally a Mysterious Land born in the Infinite Primordial Space, refined and fortified several times by us Lords! Later, it was the Starlight Lord who transferred the Land of Origin to a hidden location."

Whoosh!

Luo Feng sensed the intense distortion of external time and space.

"Starlight is the one who holds the highest mastery over time and space in the entire Infinite Primordial Space." Yuan mentioned Starlight, revealing a slight smile, "The hidden location he found is difficult for the Innate Primordial Life Camp even if they try everything."

Through the chaotic time and space, Yuan carried Luo Feng through layers of obstacles to finally arrive at a stable space.

"Mm?"

Luo Feng saw it.

This was a vast and peaceful land where the energy was unprecedentedly dense, with many high-density energies condensing into solid forms, turning into soil, rocks, flowers, and plants, or even into liquid streams.

The energy abundance here far surpassed the cultivation cave mansion of a large Primordial Hall.

"The Land of Origin can supply the Lords with sufficient energy." Yuan said, "Providing energy to other cultivators is even easier."

Luo Feng also saw the figures flying between heaven and earth, each possessing intimidating auras, each an existence that has escaped the Braided Cage.

"In the Land of Origin, apart from you who are about to break free from the Braided Cage, there are also over 80 million high-level Primordial Lifeforms, 237 world-level Primordial Lifeforms, and 7 lords." Senior Yuan gazed at Luo Feng, "All cultivators who have broken free from the Braided Cage, as long as they are alive, leave an avatar here."

"These are also all the strong ones from our Cultivator Camp." Senior Yuan said.

Luo Feng carefully memorized these numbers.

Over 80 million high-level Primordials, 237 world-level Primordials, 7 lords! This is the entire strength of the Infinite Primordial Space's Cultivator Camp that deters all sides.

"In our territory, there also exist a large number of innate Primordial Lifeforms." Senior Yuan said, "And from various wars, we have captured many innate Primordial Lifeforms."

Luo Feng nodded.

The territory of cultivators was vast and boundless, so the number of innate Primordial Lifeforms proliferating must be quite large.

"Those innate Primordial Lifeforms that resist become our cultivation resources." Senior Yuan said, "The rest are all submissive. The submissive innate Primordial Lifeforms include over 50 billion high-level Primordials and 137 world-level Primordials."

Luo Feng couldn't help but exclaim, "Over 50 billion?"

This figure seemed a bit exaggerated, as the Cultivator Camp only had less than a hundred million high-level Primordial Lifeforms!

Senior Yuan sighed softly, "This is the terrifying aspect of the innate Primordial Lifeforms! They are the largest group in the entire Infinite Primordial Space, spread across all areas. Those who submit to us are merely a small fraction."

This small fraction already amounts to over 50 billion high-level Primordials and 137 world-level Primordials.

"The numbers are too large; high-level primordial life, world-level primordial life, primordial ancestors... there are many." Senior Yuan shook his head gently.

"Those who submit have all their life cores refined and controlled." Senior Yuan added, "If they serve obediently, they can live, but if they are found to betray, they are executed immediately."

Luo Feng nodded.

Senior Yuan's attitude was clear—

They are refined to become servants! Any act of betrayal means death!

"Our cultivators have too few strong members." Senior Yuan looked at Luo Feng, "We cannot afford any mercy towards the enemy camp."

"I understand." Luo Feng said.

"If one day, our Cultivator Camp is completely defeated, all territories are overrun. This 'Land of Origin' is our final hope." Senior Yuan spoke softly.

Luo Feng understood.

The situation had become so severe that Senior Yuan and the others were prepared for all territories to fall.

By then, all the cultivators who broke free from the Braided Cage and the most elite of them would reside in the Land of Origin, patiently

accumulating strength. Over long ages, perhaps a few more lords would emerge, with hope of reclaiming the territories!

"Senior Yuan, has the situation reached this point?" Luo Feng asked softly.

If it completely fell, what would happen to his homeland, the Land of Origin? What would happen to his dear family?

"Becoming a world-level primordial is not difficult for you." Senior Yuan looked at Luo Feng, "You will be a core member of our Cultivator Camp, and I won't hide this from you! The situation now is already very bad, the best outcome is losing more than half of the territory!"

"The worst outcome is losing all territory."

Senior Yuan looked at Luo Feng, "Don't think too much, even if you become a world-level primordial, you cannot influence the situation. This war is mainly handled by us, the seven lords."

One side is the largest group in the entire Infinite Primordial Space!

The other side has seven lords. Each lord possesses the highest level of power!

Currently, the entire Infinite Primordial Space, nearly all forces are focused on this war.

"As for your homeland, the Source World." Senior Yuan looked at Luo Feng, "Once the World Clusters fall, the innate Primordial Life Camp will prioritize attacking the Source World where the 'Master of the Source World' resides. Your homeland, the Source World, will also be in the sequence of their priority attack."

Luo Feng's heart trembled.

"Once lost, we will try to migrate some of the lineage." Senior Yuan said, "But with countless Source Worlds, we can't manage them."

Senior Yuan was treating Luo Feng as a 'world-level primordial'.

After all, possessing both 'Half Primordial Fusion Path' and 'Will to Escape the Braided Cage' attributes provided confidence in refining a world-level primordial bloodline.

Swoosh! Swoosh!

Senior Yuan and Luo Feng spoke while flying, allowing Luo Feng to watch over the Land of Origin.

"The lords are very busy; the Land of Origin is managed by world-level primordial lifeforms." Senior Yuan said, "Of course, you haven't broken out of the Braided Cage yet! You don't need to undertake any tasks; your only responsibility is cultivation!"

"Ahead is the 'Primordial Island', where all cultivators who haven't broken free from the Braided Cage reside." Senior Yuan pointed to the island ahead, "On the island, there are more than 80,000 half primordial cultivators."

"Among them, you're the only one practicing the Fusion Dao."

Primordial Island is quite vast; it has a high mountain, the mountain pierces through the clouds, and there's a large cave mansion at the summit.

From the summit, one can overlook the island! Even view most areas of the Land of Origin.

"Here is your cave mansion in the Land of Origin." Senior Yuan led Luo Feng to land in front of the cave mansion.

"That's —"

"Senior Yuan?"

On Primordial Island, gathered are 'invincible existences' brought from various World Clusters. Over long ages, there are more than 80,000 invincible existences here. At this moment, they saw the legendary 'Senior Yuan' bringing a black-clothed black-haired man flying towards the cave mansion on the summit.

"Only those with confidence in becoming a world-level primordial

can reside in a cave mansion on the summit." These invincible existences clearly understood this point.

Chapter 389: Episode 9, Chapter 24, 7 Lords (Final - of This Episode)

Chapter 389: Episode 9, Chapter 24, 7 Lords (Final Chapter of This Episode)

The Land of Origin, at the peak of the high mountain on Primordial Island.

"What confuses you the most right now should be how to escape the braided cage?" Senior Yuan sat down, and with a wave of his hand, fine wine appeared on the table, a pot in front of each of them, Luo Feng and him.

Gurgle gurgle gurgle~~~

Yuan drank casually, glancing at Luo Feng: "Let's drink and chat together."

"Yes." Only then did Luo Feng pick up his pot of wine, took a sip, and said, "Please, Senior Yuan, guide me on how to escape the braided cage."

"You are a Fusion Dao Cultivator, with an extraordinary talent. For you, a compatible high-level Primordial Bloodline can easily be comprehended over seventy percent." Yuan said.

Luo Feng nodded.

"The road ahead of you can be divided into two paths."

"One is to first become a World-level Primordial Life and then strive to cultivate into a Primordial Lord."

"The second is to comprehend the Primordial Level Dao directly, break laws with force, and directly become a Primordial Lord." Yuan, as the first lord of the entire Cultivator Camp, has been exploring the cultivation path, so he is naturally familiar with these ideas.

Luo Feng listened carefully, as this concerned his future.

"To become a World-level Primordial Life, there are two ways. One is to rely on a World-level Primordial Bloodline to become a World-level Primordial Life. After breakthrough, your thinking speed will increase a billionfold compared to now, and your comprehension will also transform. With such comprehension and speed of thinking, there is a glimmer of hope to comprehend the 'Primordial Level Dao'.

Yuan gently shook his head, "The only drawback is that the Primordial Bloodline will add a 'Bloodline Will' within you, and the bloodline insights will also pollute your memory."

"Will pollution and bloodline pollution are the drawbacks of this path."

"Among the seven current lords, only one lord, 'Nai Gu', walked this path." Yuan looked at Luo Feng, "He comprehended the 'Primordial Bloodline Dao', mastering the essence of bloodlines, and even integrated the bloodlines of multiple Primordial Ancestors into himself."

Luo Feng was secretly shocked at what he heard.

Integrating the bloodlines of multiple Primordial Ancestors into oneself? Mastering the essence of the Bloodline Dao? How powerful must such an existence be?

No wonder it's said that every lord is an existence wielding the highest level of power in the Infinite Primordial Space!

Seven lords can contend with the entire Innate Primordial Life Camp

to such an extent!

"The second way to become World-level Primordial is to first refine the hometown Source World and become the Master of the Source World. This path has no will pollution, no memory pollution. It can be said to be the smoothest path. Among the seven lords, five have taken this path. I also took this path."

Luo Feng's eyes lit up upon hearing this.

Seven lords, and five chose this path?

"How to refine the hometown Source World?" Luo Feng asked.

"The method has long been spread across various world groups." Yuan said, "First, you must master more than half of the Origin Great Dao of the Source World, reaching at least the Second Realm of Godly King. Second, spread faith to thoroughly influence all creatures. The path of faith... is extremely difficult."

Yuan looked at Luo Feng, "Your talent and potential in Illusion Technique are very average, not suitable for the path of faith."

"You are skilled in too few Dao, so this path of refining the hometown Source World is not suitable for you."

Yuan spoke decisively.

Luo Feng nodded in acknowledgment.

Comprehending at least five Daos compatible with the Source World Origin? Luo Feng couldn't see the hope.

Illusion Technique? Luo Feng probably couldn't even rank in the top thousand in the Dark Sacred Realm, so how could he possibly explore the path of faith?

"Finally, it is to break laws with force!" Yuan looked at Luo Feng, "As a Half Primordial Life, directly comprehend the Primordial Level Dao! Master the highest level of power in the Infinite Primordial Space, and achieve lordship."

"Before the lord 'Starlight', we did not believe that a Half Primordial Life could comprehend the Primordial Level Dao."

"But Lord Starlight did it."

Yuan looked at Luo Feng, "Starlight, he comprehended the 'Primordial Space-Time Path'! As a Half Primordial Level, he achieved lordship by breaking laws with force. After becoming a lord, his speed of thought and comprehension was even higher! This advanced his strength even further."

"In terms of strength, and threat to the Innate Primordial Life Camp, Starlight ranks first among the seven lords." Yuan said, "His contributions to the Cultivator Camp, I believe, have even surpassed mine."

Luo Feng had heard about this before.

Yuan, as the first lord, has been gracious to countless cultivators, and his contributions to the whole Cultivator Camp should be the greatest.

But Yuan at this moment believed that Starlight's contributions were greater.

Luo Feng thought... Yuan must be humble! But it also proves the strength of 'Starlight'!

"You'll understand in the future." Yuan did not say more.

"Refining the Source World is not suitable for you." Yuan looked at Luo Feng, "So in front of you, there are only two roads. One is to rely on a World-level Primordial Bloodline. The second is to break laws with force. This road of breaking laws with force... is extremely difficult!"

"You must know, even as a Master of the Source World, those who comprehend the Primordial Level Dao are few and far between." Yuan looked at Luo Feng, "Most are still trapped at the level of Master of the Source World."

Luo Feng nodded.

He could understand.

Most Masters of the Source World couldn't comprehend it.

For a Half Primordial Life to comprehend the Primordial Level Dao? That's truly unbelievable!

"If you plan to rely on a World-level Primordial Bloodline, I advise you to first carefully comprehend it, to penetrate over seventy percent before refining." Yuan said, "In this way, the mastery over the bloodline will be more exquisite, and the will and memory pollution will be less."

Luo Feng nodded, "I understand."

"I've said all that needs to be said, which path to take, you must choose for yourself." Yuan pointed to a small building in the distance, "I have also prepared a gift for you there! Study it well."

"Yes," Luo Feng responded.

Yuan nodded and then disappeared into thin air.

He truly was very busy!

If it were an ordinary invincible-level cultivator, Yuan wouldn't say so much.

"Prepared some resources?"

Luo Feng immediately walked towards the distant small building, where only a silver bracelet was placed.

Luo Feng touched the silver bracelet, and with a single thought, he had refined it.

"Buzz."

After refining the silver bracelet, Luo Feng immediately became aware of its function.

The silver bracelet contained storage space and stored some

resources.

At the same time, it also recorded his 'reward points.'

"Ordinary resources in the Land of Origin are free; precious resources must be exchanged with reward points." Luo Feng slightly sensed, somewhat surprised, "Can Infinite Space reward points also be used here?"

The Land of Origin possesses almost all treasures of the cultivator camp! The treasure trove's vastness is countless times larger than that of the Infinite Space Treasure Vault.

Even high-level primordials and world-level primordials exchange there.

"My reward points are slightly over 10,210,000?" Luo Feng looked at his account.

200,000 reward points were the rewards for the spiritual will breaking free of the Braided Cage.

Over 10,000 points were what remained from Infinite Space.

10,000,000 reward points were the rewards obtained by the Half Primordial Fusion Path Cultivator. The cultivator camp assumes this level to be capable of achieving 'world-level primordial,' and naturally, the reward points granted are high.

"This bracelet also has a messaging function!"

"87,342,513 high-level primordials, 237 world-level primordials, seven lords, all have contact information?"

Luo Feng familiarized himself with some messaging functions before understanding.

The Infinite Primordial Space is immensely vast; even a lord traveling from one place to another may take a long time! Hence, messaging so far away and vast is very difficult.

The messaging through this bracelet is because those who break free

of the Braided Cage in the cultivator camp all have avatars in the 'Land of Origin,' making it naturally easy for everyone to contact each other.

"Seven lords."

Luo Feng only learned the names of the seven lords through contact information.

Of course, the cultivators in the Land of Origin dare not contact the seven lords directly without special reasons! The seven lords are currently dealing with a war that will decide the fate of cultivators, and no one would easily disturb them.

"My cave mansion has so many functions." After refining the bracelet, Luo Feng quickly understood the cave mansion's role.

This cave mansion is specifically prepared for the successive 'Half Primordial Fusion Path Cultivators.'

"Half Primordials think too slowly. Even to comprehend 'world-level primordial bloodline' usually takes a very long time. So the cave mansion's secret chamber can accelerate time?" Luo Feng slightly sensed.

For a half primordial, long-term time acceleration costs are low. This cultivation secret chamber's 'time acceleration formation' was personally arranged by Starlight Lord and can maintain a 'million-fold' time acceleration at its highest.

An epoch would pass outside, while a million epochs would have passed inside!

"The entire cave mansion has infinite energy supply, constantly nourishing the physical body and soul. My current thinking speed is about a thousand times that of the Dark Sacred Realm, and my soul is without any discomfort," Luo Feng noticed the advantages here.

"I have permission in this cave mansion to view any primordial bloodline type in its entirety owned by the cultivator camp? Also, view any material?"

"This exceeds the combined power of the Eye of Life and Death and the Wisdom Book."

Luo Feng immediately understood why some exchangers would return the Wisdom Book! Returning it can refund reward points! Moreover, the ability to observe all things in the Land of Origin far surpasses the Eye of Life and Death and the Wisdom Book.

"This cave mansion is invaluable." Luo Feng was somewhat excited.

Assisting cultivation, time acceleration, observing all things, life and death trials... these are just the free features.

Luo Feng can exchange some precious resources using reward points.

The cultivator camp provides immense resource support to every 'Half Primordial Fusion Path Cultivator'; at the very least, this path has produced a lord from a world-level primordial before.

"Seven lords: one follows the bloodline path, one uses the Power Breaking Technique, and five become lords by mastering the Source World Origins."

"In front of me, only the first two paths are available."

"Lord Nai Gu succeeded because he followed the 'Primordial Bloodline Dao,' and the bloodline was the support for his cultivation path. No one else on the bloodline path succeeded in becoming a lord."

Luo Feng pondered, sensing vaguely that the bloodline path had big issues. You must know that in history, fusion path cultivators mostly followed this path, yet only Nai Gu succeeded.

"No matter what."

"I'll first try to Break Laws with Force!"

With desire in his eyes, Luo Feng thought. Anyone confident in themselves will first attempt to comprehend the 'Primordial Level Dao.' Only when utterly despairing will they choose the bloodline path.

(End of the Volume)

Taking a day off tomorrow to prepare, updates will resume the day after, starting Volume Ten: ’Breaking Laws with Force.’

To prevent book shortages, let me recommend two recent books I’ve read: one is "Sword from the Tang Dynasty," and the other is "Duke."

Chapter 390: Episode 10: Break Laws with Force - 1: Collected Bloodline

Chapter 390: Episode 10: Break Laws with Force Chapter 1: Collected Bloodline

Land of Origin, Primordial Island.

Luo Feng walked into the quiet room of the cave mansion, and before him was a vast space, a complete space-time.

"Maintain a million times time acceleration."

Luo Feng spoke softly, and instantly the flow of time in this complete space-time changed. In the outside world, one second passed, while in this space-time, a million seconds passed. Luo Feng smiled, familiarizing himself with the many other functions. Many functions of the cave mansion were arranged by the lords.

The lords expended a lot of effort on the Land of Origin.

"My path of cultivation does not borrow from any inheritance, but it requires the study of numerous Primordial bloodlines and corpse materials." Luo Feng began to investigate.

All the 'Primordial Bloodlines' possessed by the Cultivator Camp are here in the Land of Origin, and every Primordial bloodline can be observed in its entirety.

"So many?" Luo Feng was somewhat shocked.

Over 800 million types of Low-level Primordial bloodlines, more than 5 million types of High-level Primordial bloodlines, over 30,000 types of World-level Primordial bloodlines, and the corresponding corpse materials are all available for observation.

"The Innate Primordial Life Camp has recorded over 99% of Low-level Primordial bloodlines, 100% of High-level Primordial bloodlines, and 100% of World-level Primordial bloodlines, mainly recorded by the lord 'Starlight'." Luo Feng was truly stunned.

"The races of the World-level Primordials, over 30,000 kinds, and all recorded? How many World-level Primordials did this Starlight senior kill?" Luo Feng thought.

Many World-level Primordials are of the same race.

Like the Innate Primordial Life Camp, the most powerful race is the 'Infinite Great Serpent' race, with reportedly more than ten Ancestor-levels, and even more World-level Primordials.

This suggests just how terrifying the number of World-level Primordials killed by the Cultivator Camp is!

No wonder places like the 'Dark Sacred Realm', which are only guarded by two High-level Primordials, even threw seven World-level Primordial corpses! The number is simply overwhelming.

"No wonder the 'Eye of Life and Death', only needed 120,000 reward points to be redeemed." Luo Feng thought, realizing that World-level Primordial corpses are too common for the entire Cultivator Camp.

The more intense the war between the two camps, the more corpses there are.

"Mainly recorded by Starlight senior." Luo Feng understood the weight of this statement.

The Innate Primordial Life Camp, below the Ancestor level... All High-level Primordial bloodlines, World-level Primordial bloodlines, were completely recorded by Starlight senior. Even the countless and

innumerable Low-level Primordial Lives, over 99% were collected.

What a terrifying god of slaughter! How afraid must the Innate Primordial Life Camp be of this 'Starlight' senior.

Of course, Starlight senior was also very patient, tirelessly collecting Low-level Primordial bloodlines.

"First apply to observe the World-level Primordial bloodline 'Black Water Monarch'." Luo Feng submitted an observation request through the bracelet, and instantly, the vast space of this quiet room revealed the full view of a World-level Primordial bloodline.

The grand illusion of the bloodline itself appeared in the quiet room.

The internal secret patterns of the bloodline, all layers were fully displayed.

"Black Water Monarch is one of the pinnacle existences among World-level Primordials. The mystery of life occupies 33%, destruction mystery occupies 47%, while matter mystery, causality mystery, and other mysteries become increasingly rare, with a total of nineteen mysteries."

The database contains detailed introductions of the Black Water Monarch bloodline, which can assist Luo Feng in comprehending and understanding.

"All the bloodlines and materials of all things recorded in the Land of Origin can be observed." Luo Feng sighed inwardly, "The importance of the Eye of Life and Death and the Wisdom Book is greatly diminished."

"The Cultivator Camp has not recorded any 'Ancestor-level bloodline'." Luo Feng noticed this point.

According to the database introduction.

The Ancestor Bloodline contains the highest level of unlimited Primordial power! To this day, no life has been able to extract a complete 'Ancestor-level bloodline'. Even the lord 'Nai Gu' cannot do it.

"The Land of Origin also has the 'material teleportation' capability." Luo Feng discovered this point.

As long as the target is locked, and is a dead thing! It can be teleported over infinite distances.

Back when exchanging for the treasures of the Infinite Space, those treasures were directly teleported to the interior of the Source Continent from an endlessly distant distance. It was this technique.

But it is limited to lifeless matter!

Any life wanting to teleport over great distances will face a significant impact.

"Teleport the Star Tower, Eye of Life and Death, Wisdom Book, and Sky Splitting Saber all over here." Luo Feng thought, knowing that only in the Land of Origin could he better research the Star Tower and Sky Splitting Saber.

...

In Huyang City, in the city owner's mansion quiet room on the Source Continent.

One avatar of Luo Feng watched the Star Tower, Eye of Life and Death, Wisdom Book, and Sky Splitting Saber in front of him.

"Buzz."

Once these four treasures were locked, they instantly disappeared without a trace.

Luo Feng watched this scene; the Infinite Primordial Space is boundlessly vast, but Starlight senior's expertise in space-time is too high, and this method of teleporting material over infinite distances was created by Starlight senior.

Phew.

Luo Feng walked out of the quiet room, standing on the pavilion of the city owner's mansion, gazing outside the Source Continent.

If the sky falls, the tall would shoulder the weight.

But in the current Source Continent, Luo Feng is the tallest! Even the ancestors of the two countries obey Luo Feng's commands one by one.

"The war situation is dire, even the best outcome might require losing most of the territory? The worst case is losing all the territory?" Luo Feng felt an overwhelmingly heavy pressure.

This is his homeland.

His family and friends, his human compatriots, countless creatures all thrive and live here.

If the 'Dark World Group' falls! His homeland 'Land of Origin' will be heavily targeted, and what would happen to countless creatures when the Source World is destroyed?

Even with the so-called 'Migration Plan'. But the Land of Origin is only so large, and the number of creatures he can take with him will certainly be very limited.

"In the face of the entire Innate Primordial Life Camp, to turn the tide, to protect the homeland. Even if I become a world-level Primordial, it's useless." Luo Feng understood this clearly; one only had to see how many enemy world-level Primordials the Cultivator Camp had killed to comprehend. World-level Primordials, probably in the thousands or tens of thousands, would only be sent to their deaths before the Lord and Ancestors.

"Only by becoming a Lord can one truly affect the battle."

Luo Feng thought to himself.

******

Land of Origin, Primordial Island, inside a Quiet Room.

Luo Feng looked at the four treasures that appeared before him.

"Let's refund the Wisdom Book." With a thought, Luo Feng

communicated with the Land of Origin. The Wisdom Book could analyze everything, but the analytical abilities of the Land of Origin itself were stronger than those of the Wisdom Book.

Luo Feng had the authority to view all Primordial Bloodlines and materials without restrictions.

He refunded the Wisdom Book and was credited 200,000 reward points.

"The Eye of Life and Death allows me, a life within the Braided Cage, to have an external perspective." Luo Feng put away the Eye of Life and Death, which appeared at his brow, "With my current observational abilities, they probably surpass most high-level Primordial Life."

Luo Feng sensed his own progress.

On one hand, he comprehended the 'Half Primordial Life and Death Path', which enabled the Eye of Life and Death to exert stronger power. On the other hand, his spiritual will also leaped out of the Braided Cage, allowing him to delve deeper into the Eye of Life and Death's capabilities.

The Eye of Life and Death's abilities, perhaps, are only being utilized one or two percent of the time currently. Yet, this was crafted from the corpse of a world-class Primordial Life highly skilled in observation. One or two percent is already above most high-level Primordial Life.

Luo Feng observed the full form of the world-level Primordial Bloodline 'Black Water Monarch' suspended in the distance. With the Eye of Life and Death, he observed more easily and thoroughly, able to detect critical nodes within.

"I've always had trouble probing the deeper secret patterns of the Star Tower Blood Scale; let's test the abilities of the Land of Origin." Luo Feng thought.

"Land of Origin, observe the full form of the Star Tower 'Blood Scale'." Luo Feng submitted an observation request.

The abilities of the Land of Origin began to infiltrate the Star Tower, penetrating into that internal blood-colored scale.

Buzz——

"This is one of the three blood scales of the Primordial Ancestor 'Wan Xing Ancestor'. In the second war between the Innate Primordial Life Camp and the Cultivator Camp, the Wan Xing Ancestor died in battle."

"The three blood scales are also known as the 'Immortal Scale'. To this day, no way has been found to destroy it. Across the entire Infinite Primordial Space, there has been no method discovered to fully probe its entirety. The Land of Origin can only glimpse about 80% of its secret pattern mysteries." After submitting the application, Luo Feng received a response.

Subsequently, an immensely large virtual shadow of the blood scale appeared in this vast time and space, occupying nearly half of the broad expanse.

Within the enormous virtual shadow of the blood scale, countless secret patterns manifested.

"This——"

Luo Feng flew into the gigantic virtual shadow of the blood scale, with the 'Eye of Life and Death' at his brow watching the transformations of numerous secret patterns.

"This is much more enriched than what I previously glimpsed." Luo Feng was somewhat shocked, but unfortunately, the entire Infinite Primordial Space has no way to fully view the 'Blood Scale'.

"Even the 80% portion is much more complex than world-level Primordial Bloodline."

Luo Feng, on the contrary, felt very encouraged.

The more he observed, the more he realized that the 'Half Primordial Life and Death Path within the Braided Cage' required a tremendous amount of supplementation to be comparable to the mysteries of the

Ancestor-level Bloodline. Reaching that point might provide a hope to achieve the 'Primordial Life and Death Dao'.

...

Luo Feng did not rush to cultivate but first gathered a massive amount of information to formulate a detailed cultivation plan.

He knew very well that without a clear plan and direction, it would be impossible to Break Laws with Force!

"Daoist Luo Feng, I am Cheng, I too am from the Dark World Group."

"Our Dark World Group has produced a total of 13,922 high-level Primordial Life! There hasn't been a world-level Primordial Life born."

"More than ten thousand high-level Primordial Life from our shared homeland want to visit you. Do you have time?" This high-level Primordial Life, named 'Cheng', proactively messaged Luo Feng.

Luo Feng was a bit surprised to receive the message.

To high-level Primordial Life, being from the same world group indeed counted as being compatriots. After all, most Source Worlds couldn't even produce a single high-level Primordial Life.

"More than ten thousand high-level Primordial Life want to visit me?" Luo Feng also noticed that only 'Cheng' messaged him, while the other high-level Primordial Life didn't disturb him. They must have agreed on this, otherwise, thousands upon thousands of messages would indeed be bothersome.

"You all want to meet me?" Luo Feng replied.

He was also happy to meet them.

Chatting with these fellow countrymen; after all, these over ten thousand high-level Primordial Life have existed a long time. Some may even have lifetimes longer than 'Yuan'! Their knowledge in many respects probably exceeds his own.

"We can’t enter Primordial Island." Cheng responded, "We can choose a place outside the island, and we more than ten thousand high-level Primordial Life will collectively welcome Daoist Luo Feng."

"Okay, you choose the place." Luo Feng said, "As for the meeting time, make it soon. After a period, I’ll be entering seclusion."

Cheng sighed with relief. It was fortunate they were smart and contacted him as soon as they learned about Luo Feng.

They understood one thing upon learning about Luo Feng’s intelligence...

This Daoist Luo Feng, as the first world-class Primordial to emerge from the Dark World Group, would naturally be the leader of these over ten thousand high-level Primordial Life!

Chapter 391 - 2: Sirius Visitor

In the Land of Origin, by the Purple Jade Lake, numerous high-level Primordial Creatures arrived here one after another, thousands of high-level Primordial Creatures gathered together and began to chat familiarly.

"I've heard that this Daoist Luo Feng is a Half-Primordial Fusion Dao Cultivator?"

"Is there any doubt about it! He's currently residing at the peak of the mountain on Primordial Island, witnessed by countless cultivators on the island."

"You all need not worry, my avatar has already descended to the Dark Sacred Realm and captured the scenes where Daoist Luo Feng battled a Primordial Prisoner. Even without breaking out of the Braided Cage, Luo Feng already possesses strength beyond imagination!"

"Oh? Could you provide me a copy of the scenes where he battled the Primordial Prisoner?"

These high-level Primordial Creatures were quite concerned with Luo Feng's potential.

"This, this, this..."

"Powerful without breaking out of the Braided Cage?"

"It's truly incredible!"

One tells ten, ten tells a hundred.

With the spread of the battle footage of Luo Feng and the Lava Prisoner, any lingering unease had now settled!

"From now on, we will just calmly follow Daoist Brother Luo Feng!"

"Daoist Brother Luo Feng's talent guarantees his achievement of becoming a World-level Primordial."

"The high-level Primordial Creatures of our Dark World Group will have good days ahead."

These high-level Primordial Creatures were somewhat elated, and the more they learned about Luo Feng, the more they realized the 'support' they were about to embrace was indeed substantial!

...

In a picturesque, expansive cave mansion in the Land of Origin.

A colossal figure coiled within was sleeping, its entire surface covered with deep purple scales; on closer inspection, each scale was crystalline and semi-transparent, hosting vast spaces naturally within, with endless fiery power contained in each scale's space.

"Brother Zhu Huo." A figure of a woman clad in a green robe flew unimpeded into the cave mansion.

"What is it?" The colossal figure slowly opened its eyes, its pupils containing countless fiery stars experiencing life and death. He normally maintained a bloodline form to better delve into the potential of his bloodline.

"Brother Zhu Huo, are you unaware that you have tens of thousands of high-level Primordial Creatures under your command planning to pledge allegiance to a new cultivator?" The woman in green quickly said, "They're all high-level Primordial Creatures from the Dark World Group, more than ten thousand high-level Primordial Creatures, except for Tianlang Ke! All of them have gone over."

The woman in green was quite indignant, continuing, "Brother Zhu Huo, they are your subordinates! They haven't reported this to you; they've collectively gone to pay respects to Daoist Luo Feng, which is somewhat excessive! I think they should be properly reprimanded."

The colossal figure smiled slightly, "Cheng has already reported to

me, and I have permitted them."

"You've allowed this?" The woman couldn't help but say, "Brother Zhu Huo, Daoist Luo Feng indeed has extraordinary potential. But as a Fusion Dao Cultivator... becoming a World-level Primordial lifeform necessitates sufficient time! Once Luo Feng breaks through, their visit would be considered proper. But now, before Luo Feng has broken out of the Braided Cage, they are immediately pledging allegiance, which warrants a reprimand! Without rules, how would Brother Zhu Huo manage tens of thousands of high-level Primordial Creatures and billions of innate Primordial lifeforms?"

She has pledged allegiance before breaking out of the Braided Cage charmed by her brother's deep bond, so naturally, she stands by her brother's side.

The brother, at the World-level Primordial life stage, had cultivated to a late phase, with considerable accumulation, overseeing over a hundred world groups, with the favor of Lord Yuan! More than sixty thousand high-level Primordial Creatures and over three billion subordinate innate high-level Primordial lifeforms all followed his command!

The seven lords are high above; the genuine affairs of the Cultivator Camp are mostly handled by 237 World-level Primordials, each wielding immense power.

"Take a look at this footage." Zhu Huo smiled and passed the footage to the woman in green.

"This—"

The woman was taken aback upon viewing the footage.

"The Dark World Group is one of the hundred world groups I oversee. When Daoist Luo Feng broke through, I was the first to get the news. Upon investigation, Qiu Ge, Yifeiya, they also submitted some intelligence regarding Daoist Luo Feng to me, including this battle footage." Zhu Huo looked at the woman in green, "Daoist Luo Feng will certainly become a World-level Primordial! Furthermore, it's estimated it won't take very long."

"By then, the Dark World Group, as his hometown, will undoubtedly fall under his rule." Zhu Huo smiled, "Let him save some face now."

The woman, having viewed the footage, was also stirred.

"Can one be this strong without breaking out of the Braided Cage?" The woman couldn't help but say.

"I haven't seen anything like it." Zhu Huo gently shook his head, "Nearly a hundred Fusion Dao Cultivators have appeared in the history of the Cultivator Camp, but such strength without breaking out of the Braided Cage, I've never heard of."

The woman in green also felt pressured.

What terror waiting within the future, without breaking out of the cage so terrifying now? No wonder Zhu Huo, with his pride, saved face like this.

"You said all the over ten thousand high-level Primordials of the Dark World Group went except Tianlang Ke?" Zhu Huo inquired.

"Yes, I'm sure." The woman nodded.

As the first major general under Zhu Huo, by slightly investigating, those high-level Primordial Creatures wouldn't dare to deceive.

"He dares not to go?" Zhu Huo showed a tinge of curiosity, his enormous eyes shimmering with a peculiar light, "Interesting, interesting."

...

In the Quiet Room of Tianlang Ke's cave mansion in the Land of Origin.

The silver-haired three-eyed man 'Tianlang Ke' watched the vast World-level Primordial Bloodline phantom before him, observing the myriad mysterious Secret Patterns within.

"Without breaking out of the cage, they've all gone to collectively pay respects?" Tianlang Ke gazed at the Primordial Bloodline phantom

before him, "Do they all believe that the Dark World Group will belong to this Luo Feng in the future?"

"Wrong!"

"The Dark World Group will belong to me!"

Heavenly Wolf Guest's eyes burned with intensity.

Back then, before jumping out of the Braided Cage, he could comprehend four to five tenths of the High-level Primordial Bloodline. Later, his Spiritual Will first jumped out of the Braided Cage and was personally guided by Senior Yuan.

After arriving at the Primordial Island in the Land of Origin, with more resources, he quickly comprehended over seven tenths of the High-level Primordial Bloodline! At that time, he felt the 'World-level Primordial Bloodline' was too difficult, so he didn't hesitate to rely on the High-level Primordial Bloodline to jump out of the Braided Cage.

Because he comprehended over seven tenths, he soon reached the level of 'Perfection of High-level Primordial Life'.

He spent the long years following in comprehending the 'World-level Primordial Bloodline'! With the thought speed, comprehension, and observational power of High-level Primordial Life, the difficulty of comprehending the 'World-level Primordial Bloodline' was greatly reduced.

"I've already comprehended six tenths and eight tenths of the 'World-level Primordial Bloodline'! The seventh tenth is not far off."

"If I wish, I can now refine the 'World-level Primordial Bloodline' into my body, spending some time, and can also break through to World-level Primordial." Heavenly Wolf Guest was very confident.

According to the experiences of the seniors, if a Primordial Bloodline is comprehended to seven tenths, then refining it into the body can directly break through, even reducing memory pollution and will pollution.

If comprehended to five tenths, refining it into the body, spending

time to dig potential, it can also be achieved.

He now reached 'six tenths and eight tenths', perhaps once refined, can become world-class. Because the so-called 'seven tenths comprehension' is the requirement for certain breakthrough! A little lower actually doesn't pose much of a problem.

"Exchange for a piece of auxiliary treasure, give it a go, reach seven tenths, and then breakthrough." Heavenly Wolf Guest thought.

"If I become World-level Primordial first! The Dark World Group will also belong to me, then the tens of thousands of High-level Primordial Lives will become my subordinates right?" Heavenly Wolf Guest laughed and then thought no more.

A Fusion Dao Cultivator? Haven't even jumped out of the Braided Cage, how qualified to make him submit!

He himself is about to become a member of World-level Primordial!

This Luo Feng will be at the same level with him in the future!

******

Luo Feng sent an avatar away from Primordial Island and came to the Purple Jade Lake in the Land of Origin, the agreed meeting place.

"So many High-level Primordial Lives?"

Although Luo Feng knew that over ten thousand High-level Primordial Lives would visit him, seeing such a bustling group collectively appearing, he still felt a bit stirred.

"Here he comes."

"Daoist Luo Feng has arrived."

The originally chatting tens of thousands of High-level Primordial Lives instantly quieted down, turning their heads in unison to face Luo Feng's direction, each with a slight smile and slightly humble demeanor.

Luo Feng flew down amidst the gazes of all.

A slender old man with a sharp chin and narrow cheeks was the first to welcome him.

"Greetings, Daoist Luo Feng." The slender old man took the initiative to salute first, followed by tens of thousands of High-level Primordial Lives saluting in unison, all saying: "Greetings, Daoist Luo Feng."

"I haven't jumped out of the Braided Cage yet, so I'm not worthy to be called Daoist Brother." Luo Feng smiled, "Let's simply refer to each other as Daoist friend."

"Cannot be."

The slender old man said promptly, "World-level Primordial is within reach for Daoist Brother Luo Feng, naturally should be considered our senior! Daoist Brother hasn't jumped out of the Braided Cage yet and is still willing to see us, is our privilege."

"For our Dark World Group to produce Daoist Brother Luo Feng is the honor of the entire Dark World Group, and it is our honor."

This group of High-level Primordial Lives, facing Luo Feng, were all very humble.

They can, with one avatar, manage a group of submissive Innate Primordial Lives! Their avatar can also become the 'Ancestral God' of a giant world, with their bloodline able to proliferate many creatures within the world. Their avatar can assume the responsibility of garrisoning the core Holy Realm of a group of worlds!

Yet facing Luo Feng, each was respectful and humble!

Because the more one cultivates, the more they understand the vast gap between High-level Primordial Life and 'World-level Primordial'.

"Daoist Chuan." Luo Feng looked at the slender old man, who was the first to contact him, "Our Dark World Group has birthed 13,922 High-level Primordial Lives?"

"A little fewer when counting the living, there are 12,883." The

slender old man realized the issue and immediately said, "12,882 attend today, only one named 'Heavenly Wolf Guest' hasn't come."

Luo Feng swept his gaze briefly and confirmed the amount. Indeed only one was missing!

Missing one?

If thousands of High-level Primordial Lives hadn't come, Luo Feng wouldn't have been surprised. He hasn't jumped out of the Braided Cage and doesn't need all of them to pay him a visit.

But only one missing, now that was intriguing.

"Among our tens of thousands of High-level Primordial Lives in the Dark World Group, the most gifted is this Heavenly Wolf Guest." The slender old man smiled, "The rest of us High-level Primordial Lives have all dug into our bloodline potential to jump out of the Braided Cage. Only he comprehended more than seven tenths of the High-level Primordial Bloodline to jump out of the Braided Cage."

Luo Feng understood.

He also knew that among High-level Primordial Lives, those who rely on bloodline comprehension to jump out of the Braided Cage are one in ten thousand!

Historically within the Dark World Group, only Heavenly Wolf Guest emerged this way. Heavenly Wolf Guest indeed has a lot of talent.

Chapter 392: Episode 10: Break Laws with Force, - 3: Lords

Chapter 392: Episode 10: Break Laws with Force, Chapter 3: Lords

"Being able to comprehend the High Level Primordial Bloodline to breakthrough, indeed shows exceptional talent." Luo Feng praised.

"Perhaps because of that exceptional talent, he also has a bit of arrogance." The slender elder laughed.

A woman in golden clothes beside him said, "That lone wolf character often looks down on us, rarely mingles with us! It’s fine if he disregards us, but this time when we high-level Primordial Life forms from the Dark World Group collectively came to pay respect to Brother Luo Feng, he was the only one absent! That’s outrageous!"

"More than one of us sent him messages, trying to persuade him." Other high-level Primordial Life forms also expressed dissatisfaction.

"No need to force it."

Luo Feng glanced around, smiled, and said, "Everyone, stop standing, please be seated."

Of course, Luo Feng didn’t care about such trivial matters with the lone wolf character. To him, his own cultivation was the essence. The attitude of a talented high-level Primordial Life was just a minor embellishment in his cultivation life.

However, Luo Feng could also see that the lone wolf character was arrogant, and had poor relations with thousands of high-level Primordial Life forms, indicating he was unsuitable for managing such affairs.

"Please, Brother Luo Feng."

Cheng and several others gathered around Luo Feng, and after Luo Feng took the lead to sit, the other more than ten thousand high-level Primordial Life forms then took their seats one by one. Everyone relaxed and started drinking and chatting.

Those who genuinely conversed with Luo Feng were also the strongest such as Cheng and the others.

"What do you high-level Primordial Life forms usually do?" Luo Feng asked.

"We do everything." Cheng explained with a smile, "The Cultivator Camp, in the Infinite Primordial Space, various trivial matters ultimately require us high-level Primordial Life forms to be responsible for."

A golden-clothed woman with three purple scales on her forehead smiled and said, "Guarding various Holy Realms, cultivating billions of Worlds' creatures, along with patrol missions in the Infinite Primordial Space, long-term alert missions, treasure exploration missions, extraction and mining missions... almost all tasks are handled by us high-level Primordial Life forms."

"We can't keep up with all the work; many burdensome tasks are overseen by sending avatars to supervise those who have submitted." A gray-robed man said.

Luo Feng understood.

In the Cultivator Camp, only over eighty million high-level Primordial Life forms have been cultivated. Yet, those who have submitted exceed 50 billion! Even if their Life Cores are refined, they still require 'supervision'!

The high-level Primordial Life forms in the Cultivator Camp are each

supervisors.

"The territory commanded by our Cultivator Camp is too vast." Cheng said, "Without relying on those Innate Primordial Life forms, we cannot manage it."

"Indeed, it's not easy." Luo Feng nodded.

The seven Lords are exalted and cannot handle trivial matters.

The Lords oversee the safety of the entire Cultivator Camp! Resisting foreign invasions!

The 237 World-level Primordials cannot be involved in everything.

And those who have not escaped from the Braided Cage cannot enter the 'Infinite Primordial Space'. The main workers are over eighty million high-level Primordial Life forms and the more than 50 billion submitted ones.

"Our group of high-level Primordial Life forms from the Dark World Group are not valued." Cheng said helplessly, "The lone wolf character, the one with the most potential among us, is solitary and completely ignores us. Our days are not easy, and we can only do dirty and tough work."

Luo Feng listened and nodded, then asked, "What is the strength of our high-level Primordial Life forms from the Dark World Group?"

"We are struggling to dig into our bloodline potential." Cheng said, "Our strength is generally in the early and middle stages of 'High Level Primordial Life'. Those who reach the 'later stage' are very few."

"Reaching 'Perfection' in high-level Primordial Life, apart from the lone wolf character, only the three of us." Cheng looked at his two companions beside him.

"Friend Cheng is stronger than us." The golden-clothed woman said, "Friend Cheng was initially refined with World-level Primordial Bloodline and achieved 'Perfection' in high-level Primordial Life, making him hopeful to achieve 'World-level Primordial'. I and Wu

Yan dug into high-level Primordial Bloodline, finally reaching Perfection stage. We incorporated new World-level Primordial Bloodline. With two bloodline wills within our bodies, along with memory pollution... I and Wu Yan are unlikely to reach World-level Primordial."

"The hope of me becoming World-level Primordial is also very slim." Cheng shook his head, "Only the lone wolf character! He comprehended the bloodline, thus in a short time achieving Perfection as high-level Primordial. Among those who comprehend bloodlines, one out of several dozen can become World-level Primordial."

Luo Feng nodded.

Of the 237 World-level Primordials, as he understood, nearly a hundred cultivated from high-level Primordial Life forms.

"By the way, how much do you know about the Lords?" Luo Feng asked.

Cheng, the golden-clothed woman, and the gray-robed man were slightly startled.

Lords?

The exalted Lords, they dare not say too much.

"We are all under Lord Yuan." Cheng smiled and said, "Lord Yuan is very tolerant of us, and Starlight Lord and Lord Wulan similarly have very tolerant subordinates. As for other Lords, they have their own requirements for their subordinates."

Luo Feng understood.

Yuan, Starlight, Wulan, these three Lords are all very relaxed in management.

The remaining four should be much stricter.

"The other four Lords have different personalities; among them, Lord Minghuang is the most benevolent." The golden-clothed woman

added a sentence, then didn't say more.

After staying long in the Land of Origin, high-level Primordial Life forms naturally understand the style of the seven Lords! But no one dares to speak ill of the Lords, since saying a single word... results in causality, and the Lords will know.

However, Lords usually don't mind.

For these High Level Primordial Lifeforms, the seven Lords are all-knowing and endlessly powerful, protecting the entire Cultivator Camp.

The Lords each have different personalities, and occasionally there are contradictions among them, but it's not up to these High Level Primordial Lifeforms and World-level Primordial Lifeforms to question them.

Luo Feng listened.

Yuan, Starlight, Wulan, are tolerant of their subordinates.

Lord Minghuang is benevolent.

What about the remaining Golden Lord and the other two?

"Starlight Lord is the only one who breaks laws with force," Luo Feng inquired, "Do you know how long it took for Starlight Lord to break laws with force?"

"Before Starlight Lord jumped out of the braided cage, I was already a High Level Primordial Life," Cheng laughed, "So I know the exact time well. Back then, Starlight Lord was at an 'Invincible Level' and also a Fusion Dao Cultivator, and was guided to the Primordial Island. He also lived in that cave mansion on the mountain top."

Luo Feng nodded.

"He lived there for a very long, long time, twelve trillion epochs before breaking through. He should be the longest residing Fusion Dao Cultivator in 'Primordial Island' in history," Cheng said.

"Twelve trillion epochs?" Luo Feng was also taken aback.

This is the time recognized by the outside world. If Lord Starlight also used the time acceleration of the quiet room in the cave mansion back then, it would likely have taken even longer.

Nowadays, the time acceleration of the cave mansion can permanently maintain a million-fold acceleration, it was even set up by Starlight Lord! Before Starlight Lord jumped out of the braided cage, the time acceleration should be far less than it is now.

"Yes, during his stay, there was another Fusion Dao Cultivator that appeared. At that time, another mountain rose on the Primordial Island, and a second cave mansion was built," Cheng said.

From the time spent, Luo Feng could see the difficulty of 'breaking laws with force'.

For a lifeform before jumping out of the braided cage to comprehend the 'Primordial Space-Time Path', it is too difficult and time-consuming.

"Do you know anything more about Starlight Lord's method of breaking laws with force?" Luo Feng asked. Having lived in the Land of Origin for a long time, they should know many rumored secrets.

"I've heard, before Starlight Lord jumped out of the braided cage, he already had a way to reincarnate into other Source Worlds," the golden-dressed woman also said, "He seemed to reside in the Primordial Island cave mansion for twelve trillion epochs, but for most of that time, he was likely reincarnated in various Source Worlds."

"I've also heard that Starlight Lord once applied for a 'World-level Primordial servant', which means a subjugated world-level primordial lifeform," the gray-robed man said, "At that time, the news of him applying for a World-level Primordial servant only emerged after he broke through. That servant... was a submissive innate world-level primordial lifeform, and now that world-level primordial servant is heavily employed by Starlight Lord."

"It’s the World-level Primordial ’Kaya Tu’," Cheng also nodded, "I know about this as well, Kaya Tu is highly valued by Starlight Lord!"

"What did Starlight Lord apply for a World-level Primordial servant for?" Luo Feng asked.

Applying for a ’World-level Primordial servant’ are of course those who are captured and subjugated. But the cost of applying is still extremely high, requiring as much as 5 million reward points.

Fusion Dao Cultivators would think twice before exchanging for it.

"It’s said that it was for exploration in the Infinite Primordial Space."

"Starlight Lord, before jumping out of the braided cage, was full of curiosity about the Infinite Primordial Space, reportedly visiting many very special and mysterious places. Weaker servants didn’t have the ability to go, so he specifically selected a ’World-level Primordial servant’.

"Kaya Tu is also skilled in space-time related abilities."

Cheng and the others talked.

Early on these were secrets, but after Starlight Lord broke laws with force, these gradually got revealed.

From these traces, Luo Feng could also infer some of the ways Starlight Lord ’broke laws with force’.

"On his own, he could reincarnate multiple times into the Source Worlds? Sending avatars and the World-level Primordial servant ’Kaya Tu’ to explore and cultivate long-term in the Infinite Primordial Space?" Luo Feng thought.

"Moreover, he spent a total of about twelve trillion epochs before he finally broke laws with force."

Luo Feng was certain in his heart.

Some information is not recorded in the official data of the Land of Origin. But these High Level Primordial Lifeforms, having lived here

for a long time, have heard many rumors.

...

Luo Feng drank and talked with them for a long time, finally truly understanding the entire Cultivator Camp.

Now, he had a clear grasp of the operation of the camp's order. He also learned about some past conflicts and wars between the Cultivator Camp and the Innate Primordial Lifecamp. Even the tempers of the seven Lords became clearer to Luo Feng.

Luo Feng returned to the cave mansion at the mountain top of Primordial Island.

"Starlight Lord spent twelve trillion epochs to break laws with force, so if I want to break laws with force, I must first have enough patience and not be in a hurry," Luo Feng was now more psychologically prepared.

He was ready for long-term cultivation.

"The foundation must be sufficiently solid."

Luo Feng sat cross-legged in the quiet room, "Among the more than 800 million types of Low-level Primordial bloodlines, those with life type, destruction type, and 'both life and death', there are a total of over 56.03 million types of Low-level Primordial bloodlines."

"I will start anew, and for each of these 56.03 million types of Low-level Primordial bloodlines and corpse materials, I will conduct 'Secret Pattern Completion', thoroughly researching each one."

Luo Feng was not in a hurry to create the 'Primordial Level Life and Death Dao', instead choosing to first study the weakest 'Low-level Primordial bloodlines', thus beginning his first secluded cultivation at the Land of Origin.

Chapter 393: Episode 10 Break Laws with Force - 4 Cultivation and War

Chapter 393: Episode 10 Break Laws with Force Chapter 4 Cultivation and War

Luo Feng continued using the poverty-style comprehension method first.

He comprehended fragments like a scale, a tendon, a piece of flesh, a droplet of blood, and other scattered materials, integrating the secret patterns observed from these fragments into the most perfect form in his mind. Then he compared it with the 'Primordial Bloodline'.

This cave mansion constructed by the lords nourished the soul and physical body, allowing Luo Feng's mental processing speed to reach a thousandfold level compared to the Dark Sacred Realm. Additionally, by taking some treasures, he could easily achieve a ten thousandfold mental speed.

Under the ten thousandfold mental speed, coupled with a realm much higher than before, even meticulous comprehension allowed him to fully understand a hundred types of low-level primordial bloodlines within one era.

Tens of thousands, hundreds of thousands of primordial bloodlines, Luo Feng comprehended more and more primordial bloodlines.

Finally, one day——

"Huh, the bloodline mysteries I integrated are more perfect than these primordial bloodlines?" Luo Feng found himself attempting to improve upon what he realized had begun to surpass the original structure of those low-level primordial bloodlines.

"Naturally nurtured ones aren't necessarily the best."

"These are, after all, low-level primordial lives, and there are still some flaws with them."

...

"The mysteries of this low-level primordial bloodline have too many flaws, I've discovered dozens of them." Over time, Luo Feng went from only finding one or two flaws at the beginning to discovering dozens of flaws later on.

Sometimes, with just a glance, Luo Feng could spot numerous flaws in the low-level primordial bloodlines.

Flaws made them weak. Made them only at 'Early Stage of Divine Emperor' or 'Middle Stage of Divine Emperor' strength among low-level primordial lives.

Too many flaws.

...

"Still, high-level primordial bloodline is interesting! It's much more exquisite."

After finally researching all the low-level primordial bloodlines, when he began to study 'high-level primordial bloodlines', Luo Feng felt a jolt of spirit! The mysteries of high-level primordial bloodlines revealed many new insights that he had never thought of, broadening his horizons.

Luo Feng seemed like a devout student, time and again learning many new mysteries of life and destruction during the 'secret pattern comparison'.

During this cultivation process, Luo Feng was mostly enthusiastic.

Even if he occasionally felt tired, he would return to his hometown Source World to relax with family and friends before continuing his comprehension and cultivation.

******

Infinite Primordial Space, Jade River World Group.

This world group, with the most core 'Jade River Sacred Realm', was completely shattered, like an egg being eaten more than halfway through, leaving only some remains, some scraps still floating in the infinite primordial space.

This vast world group contained billions of worlds and numerous Source Worlds. Many of the billions of worlds have already been breached, and the life within naturally became extinct.

As for the Source Worlds, many Source Worlds have already been completely destroyed! Life became completely extinct, with the Source World entering a new cycle. This was still considered good; many Source Worlds had completely disappeared, devoured to the point of nothing left.

Seven terrifying figures stood within the vast infinite primordial space.

Standing there, they naturally attracted the attention of many forces within the infinite primordial space.

Each of them possessed the highest level of power and understood the essence of this power! Each of them had a seat in the Land of Eternity, and when the seven of them joined forces, they became a terrifying force that caused all sides to change color.

"The Primordial Ancestors temporarily retreated."

Their seven faces did not look good.

"They joined forces with 75 Primordial Ancestors to deal with the seven of us." A creature with deep cyan skin stood there, sighed softly, "Even when we joined forces, we were at a disadvantage! We could only watch helplessly as the innate primordial life army

attacked the Source Worlds and countless worlds."

The deep cyan-skinned creature shook its head and sighed, "The Primordial Ancestors constrained us, relying on their massive army to attack recklessly. Their massive army, with numbers incalculable, left us helpless. In this battle, we saw no hope at all; it was a sure loss!"

"Nai Gu, shut up!" The silver-scaled lord 'Jin', with twelve pointed horns on his head and a long scaled tail, roared in anger, "To swallow up the world groups of our cultivator territory, their Primordial Ancestors must be ready to fight with their lives! In this war so far, we've also taken down three Primordial Ancestors. I want to see how many more they are willing to lose!"

"I agree with Jin."

A tall, thin man wearing a black cloak smiled slightly, "After all, wars cause losses! Losing some Source Worlds, losing billions of worlds. In the future, Infinite Primordial Space will still nurture new Source Worlds, and we can also create billions of new worlds! We need not care about losses; we must let the entire Infinite Primordial Space know that daring to provoke our cultivator camp will incur a terrible price!"

"We must come up with an idea." Yuan frowned, "Just watching them conquer world groups one after another isn't a solution. Every world group has cost us endless efforts."

For each world group that has been managed for many long years, the lords have invested much effort.

There are arrangements in every Source World.

Every ordinary world must be created, and creatures must be propagated.

Time-space transmission network, alert network, excavated resources everywhere...

"Starlight, do you have any idea?" The largest-built Wulan looked at a middle-aged man.

Starlight Lord, having forms from young child to elderly, because he had reincarnated in too many Source Worlds, had a variety of appearances and races.

In terms of methods, Starlight undoubtedly had the most among the seven lords.

"The Innate Primordial Life Camp, the Primordial Ancestors have very diverse personalities and many contradictions among themselves." Starlight Lord said, "This time, they got 80% of the Primordial Ancestors to participate, a total of 93 ancestors in the battle. We've killed 3 so far. Among the remaining 90 ancestors... they often take turns during battles. The severely injured ones withdraw to recuperate while other lords step up."

"Is there a way to kill another Primordial Ancestor?" Wulan asked.

Immediately, the other five lords also turned their gaze towards Starlight.

Starlight, an avatar is constantly walking in different timelines of the future, always observing the entire Infinite Primordial Space.

He is the observer and recorder of the 'Past, Present, and Future' of the Infinite Primordial Space.

"Fighting with us until now, the Primordial Ancestors have suffered many losses and gained much experience," Starlight gently shook his head, "Relying on the seven of us, it's already very difficult to kill another Primordial Ancestor."

More than seventy Primordial Ancestors targeting seven Lords seem to have the upper hand.

But the power of the Lords cannot be stopped by sheer numbers.

Unknowingly, they can make those Primordial Ancestors 'injured,' and the injuries are quite troublesome. With enough accumulation, a Primordial Ancestor may even fall!

"I must also tell you, in this war, too many of our territories have fallen. The World Level Primordial Life in the Innate Primordial Life

Camp, because they have consumed too much Source World Origin, should give birth to several new Primordial Ancestors," said the Starlight Lord.

"New Primordial Ancestors to be born again?"

The Lords present were all quite troubled.

Source World Origin is the delicacy most craved by the Innate Primordial Life Camp! When the World Level Primordials consume too much, there is a slight possibility of breaking through to become a Primordial Ancestor.

"Let's return to rest first," Yuan said, "The Primordial Ancestors have temporarily retreated. Surely they will rest well and only attack again when fully recovered. We should also take this time to rest."

The Lords present all nodded.

An individual Primordial Ancestor does not concern them. But the siege of over seventy Primordial Ancestors, all mastering the highest level power, makes each of the seven Lords suffer injuries.

The Primordial Ancestors have replacements to conduct rounds of battle.

But the seven of them have no replacements. This also makes them somewhat mentally fatigued.

"Huff."

The seven of them returned together.

They are not worried about sneak attacks from the Innate Primordial Life Camp. One or two Primordial Ancestors skilled in concealment might manage a sneak attack, but the power of over seventy Primordial Ancestors is diverse, making it impossible to conceal any movement. The Lords can detect it in the first instance.

With Starlight's mastery in space-time, he would also intercept in advance.

"We have invested so many resources, yet no new Lords have appeared," the tall, slender man in a black cloak gently shook his head, "I have always felt that a Lord cannot be created by throwing resources. There must be enough tempering! Giving too many resources is actually harmful!"

"I agree with what Mo Man said, only harsh tempering can produce strong ones. Giving too many resources? That results in a bunch of useless ones," the Golden Lord also said.

"There's no need to argue about how to cultivate cultivators," Yuan said, "We'll establish a new cultivation method in the next era."

Lord Mo Man and the Golden Lord said no more.

"By the way, recently, there's a Fusion Dao Cultivator named Luo Feng," Yuan said with a smile, "His talent is quite good."

"Oh? Can he become a Master of the Source World without relying on bloodline?" Wu Lan inquired.

Yuan shook his head, "He estimates that he still needs to refine the bloodline."

"Once he refines the bloodline, there's no hope," the woman in the golden robe said indifferently.

"There's no hope,"

Lord Nai Gu nodded, "I comprehend the Primordial Bloodline Dao, the bloodline will and pollution, so I can remain uninfluenced! Is this Luo Feng not cultivating the bloodline path?"

"He follows the Life and Death Dao," Yuan nodded in acknowledgment.

"There's no hope," Nai Gu shook his head.

The other Lords were also somewhat disappointed, except for the Starlight Lord, who had a hint of curiosity in his eyes.

...

The past is set, the present is unfolding, and the future holds infinite possibilities.

The Starlight Lord has numerous avatars in different future timelines. As reality changes, some future timelines will completely collapse and be extinguished, indicating that this future possibility has vanished entirely.

"They underestimated Luo Feng."

The child-like Starlight Lord left some of the collapsed and extinguished timelines, walking through other future timelines.

"I have observed over 30 million possibilities for Luo Feng, and I have seen nine possibilities of him becoming a Lord."

"On the path of refining the World-level Primordial Bloodline, he becomes a World Level Primordial. Subsequently, under the influence of will pollution and memory pollution, he abandons the original Dao and starts over! Forcibly comprehending the 'Primordial Life and Death Dao,' that Dao is filled with endless destruction and pollution."

"Even after refining the bloodline, he still becomes a Lord. I have seen him succeed only this once!"

"Using the Power Breaking Technique, I saw him succeed eight times!"

Starlight Lord's eyes were full of expectation.

Among the 237 World Level Primordials in the Cultivator Camp, in future timelines, there is occasionally a possibility of them becoming Lords.

The future 'may' happen, just as it may not happen.

"Over 30 million times, being able to succeed nine times. The potential is very high! He is currently the highest among the younger generation," the Starlight Lord had hopeful anticipation.

Chapter 394: Episode 10, - 5: A Little Progress

Chapter 394: Episode 10, Chapter 5: A Little Progress

The Land of Origin, the peak of the mountain on Primordial Island.

Luo Feng sat at the edge of the cliff, a wine jug beside him, the Eye of Life and Death opened at his brow. He could clearly see the lives of those 'invincible' creatures on Primordial Island and gaze over most of the Land of Origin.

"Peaceful, harmonious," Luo Feng remarked gazing at the Land of Origin, "could even be considered absolutely safe."

The Land of Origin was the treasured place nurtured by the Infinite Primordial Space, further refined and fortified by multiple Lords! Later, the Starlight Lord relocated it to this special space-time, making it impossible for even many Primordial Ancestors to find it.

"But in stark contrast, the entire Cultivator Territory is under full assault. I've heard another world group has fallen — the Jade River World Group."

The news of world group collapses is difficult to ascertain for the Cultivators inside the Braided Cage.

But in the Land of Origin, the fall of every world group quickly spreads among the world-level Primordial, high-level Primordial beings! After all, every world group requires a substantial guard of high-level Primordial Life Forms. The death of their avatars in battle

makes the news impossible to conceal.

"Cultivator Territory once reached up to 3,600 world groups," Luo Feng was aware this was only nominal control! Some fringe areas have always been attacked by the Innate Primordial Life Camp.

Areas like the Dark World Group are core regions and considered rather safe.

But the world groups on the fringe areas have been continuously falling.

"Now, 2,922 world groups remain."

"Even though, during this process, the Cultivator Camp has counter-killed three Primordial Ancestors, numerous world-level Primordials, and countless high-level Primordials," Luo Feng pondered, "the situation is clear! The Innate Primordial Life Camp fights with reckless abandon, no fear of losses, and the depth of their foundation is robust... world group collapses are going to increase."

"Lord Yuan also said the worst outcome is all territories falling."

Luo Feng understood.

The seven Lords had no way to reverse the situation! After all, their opponent's overall strength was immense.

As Luo Feng had heard, even though the Innate Primordial Life Camp was vast, this war saw only a majority of their forces unified. Some forces, some Primordial Ancestors, were unwilling to join the battle.

"Would my homeland Source World fall too?"

For the first time during closed-door cultivation in the Land of Origin, just after emerging, Luo Feng learned of the Jade River World Group's fall! Of course, his mood was not good.

He worried about his homeland, his close relatives and friends. There were too many innocent and weak within the human clan of his homeland; if a world group fell and the Source World was destroyed, all creatures would perish.

Even if there were migration plans, moving from the homeland Source World to the distant Land of Origin was a long journey. The Land of Origin, being only so large, offered only so many spots for migration.

"The birth of new world-level Primordials is meaningless for the war between the two camps. Only the birth of Lords can influence the situation," Luo Feng thought.

"To become a Lord..."

His first closed-door cultivation had provided Luo Feng significant gains.

But compared to a Lord, he remained incredibly distant.

"This time in closed-door cultivation was the longest yet, consuming over 3.7 million epochs of time."

Among them, comprehending over 56.03 million low-level Primordial Bloodlines cost Luo Feng about 900,000 epochs. Comprehending over 320,000 high-level Primordial Bloodlines consumed over 2.8 million epochs.

Accumulated, over 3.7 million epochs.

Due to the cave mansion for Fusion Dao Cultivators, time inside the quiet room accelerated up to a millionfold, so the outside world had only experienced a little over three epochs.

Although time outside had barely passed, Luo Feng's spirit was a bit weary, so he emerged to take in the scenery of the Land of Origin.

"The Starlight Lord spent staggeringly long years breaking laws with force; what does my little cultivation time count as?" Luo Feng, knowing the Jade River World Group's fall, felt only a burning fighting spirit.

Luo Feng rose, returning to the quiet room of the cave mansion once more.

...

Inside the quiet room of the cave mansion.

Luo Feng sat cross-legged, the Sky Splitting Saber embedded in the ground beside him. The observation capability of the Land of Origin allowed the mysteries within the Sky Splitting Saber to be reflected over eighty percent! These reflected mysteries were fully displayed within the quiet room.

"I can understand parts of the Sky Splitting Saber's mysteries."

"My current accumulation is ten to a hundred times stronger than before I was drawn in," Luo Feng realized his progress, as he had been comprehending the Primordial Bloodlines involving life, destruction, and life and death combined.

The accumulation in life and destruction naturally improved significantly.

Even the Mind Consciousness System, having comprehended over 32,000 high-level Primordial Bloodlines — thousands of which contained the Mind Consciousness System — Luo Feng's system dramatically enriched, undergoing a qualitative transformation.

Spiritual Will! Compared to before being drawn in, it was at least ten times stronger.

Though his physical body and soul had not broken out of the Braided Cage, merely regarding 'Spiritual Will', he was already top tier among high-level Primordials.

"Most crucially, I've newly comprehended the Primordial Power System!"

This was, in Luo Feng's own view, the greatest gain from his first closed-door cultivation! Within Infinite Primordial Space, everything and all creatures ultimately originated from Primordial Force!

The Primordial Force is the soil of everything!

Through comprehending a vast amount of low-level and high-level Primordial Bloodlines, Luo Feng gradually grasped their commonality — the origin of these lives was the Primordial Force!

"Without Primordial Force, all life would perish."

"If I am to pursue the largest and strongest life form, the Primordial Power System is an indispensable part."

The Primordial Power System was already under construction by Luo Feng! Even the weakest low-level Primordial Life could absorb Primordial Force. The 'Primordial Power System' Luo Feng constructed was continuously becoming enriched.

"Now, let's begin comprehending 'world-level Primordial Bloodlines'!" Luo Feng started filtering.

Among more than 30,000 world-level Primordial Bloodlines, 2,729 featured life, destruction, and life and death combined.

"The usual method, poverty-style insight."

Luo Feng chose a type of world-level primordial bloodline, first to comprehend the corresponding twelve materials, which are items like azure scales, fangs, and blood.

"The materials of world-level primordial life are indeed much harder to comprehend." Luo Feng encountered numerous confusions as soon as he began to contemplate, but he was patient, carefully pondering, and resolved some confusions.

In the blink of an eye, a long 500,000 epochs had passed.

Luo Feng stared blankly at these materials before him.

"I simply can't comprehend it, let alone complete the secret patterns." Luo Feng was already in despair. During these 500,000 epochs, he had tried everything, but the secret patterns of these materials had so many confusions that completely blocked him.

Don't understand!

Too much was not understood! Even with a hundred times more time, Luo Feng had no confidence in solving half of the confusions.

"Can't waste time." Luo Feng frowned; according to his cultivation

plan, a world-level primordial bloodline was merely a small step in the grand scheme. He couldn't just be stuck on this step.

"I need to slightly adapt my method of comprehending the world-level primordial bloodline."

"Start with the easy ones first."

"I'll first select from the 2729 kinds of world-level primordial bloodlines which are more compatible with me."

Luo Feng was too confident before.

After all, for low-level primordial bloodlines, high-level primordial bloodlines, any that encompassed life, destruction, and life and death, he comprehended them all thoroughly.

So when he was comprehending world-level primordial bloodlines, he also attempted to conquer them all.

But the first one thoroughly blocked him.

He woke up to reality.

"The corpse materials of these primordial bloodlines, at a glance, there are 73 kinds more compatible with me." Luo Feng took a rough look; these were the ones he could understand thirty to forty percent just by looking.

Clearly, they fit well with him and should be more aligned with his path.

"Let's begin."

Luo Feng chose the most compatible one, named 'Star Sea Demon Lord', the corpse material of a world-level primordial life.

This time it was relatively smooth; in less than 100,000 epochs, Luo Feng had a thorough understanding of these corpse materials and completed the secret pattern. He also compared it with the primordial bloodline.

Very smoothly, Luo Feng comprehended more than seventy percent of this world-level primordial bloodline 'Star Sea Demon Lord'!

"The primordial bloodline of the Star Sea Demon Lord, the profundity of life and destruction occupies 75%, and I have almost comprehended it all." Luo Feng smiled; he finally comprehended one type of world-level primordial bloodline.

At least, with the primordial bloodline of the Star Sea Demon Lord, he is confident in immediately becoming a 'world-level primordial'.

And because it is relying on comprehending the bloodline to breakthrough, spending some time to reach the world-level primordial 'perfection' state isn't a difficult matter.

"But what I pursue is to break laws with force."

Luo Feng began to comprehend the second type of world-level primordial bloodline.

Since Luo Feng is starting with the easy ones first, comprehending the most compatible, the difficulty gets higher, and the time spent longer as he goes further.

"From these 73 world-level primordial bloodlines that are more compatible with me, I've comprehended 15 types." The second time Luo Feng went into seclusion had already approached ten million epochs, having tried all those compatible ones.

But only 15 of them were comprehended over seventy percent.

However, even if cultivators refine bloodlines, to reduce the 'will pollution and memory pollution' within, the fewer bloodlines refined, the better, and the higher the proportion of bloodline comprehension, the better.

Therefore, even if Luo Feng walks the path of bloodlines, it's best to choose only one bloodline.

Although Luo Feng theoretically could refine 15 types of world-level primordial bloodlines into his body, making his strength at the world-level primordial level extremely strong, the vast will pollution and

memory pollution would completely distort his path.

Want to comprehend the ’primordial level Dao’? The hope is nearly extinguished.

...

The Land of Origin.

Yuan sat alone by the lake, fishing.

"Luo Feng has comprehended the 15th world-level primordial bloodline." Information automatically reported.

The Land of Origin pays great attention to Primordial Island, noting every un-liberated junior’s cultivation state. When Luo Feng is pondering the mysteries of primordial bloodlines in the quiet room, every bit of his progress is recorded.

Comprehending over seventy percent of high-level primordial bloodlines is not worth reporting.

But comprehending over seventy percent of world-level primordial bloodlines would warrant a report.

"Fifteen types now?"

Yuan continued fishing without much concern.

Most Fusion Dao cultivators, when refining bloodlines to become world-level primordial, can comprehend several types of primordial bloodlines. Approximately one-third of Fusion Dao cultivators can achieve comprehension of over a dozen world-level primordial bloodlines.

"Luo Feng’s actual seclusion time is 12 million epochs, relatively short time spent."

"But merely comprehending 15 types is not a lot."

Yuan remained calm.

He didn’t even express any surprise.

Luo Feng’s progress still falls far too short of becoming a lord.

Chapter 395: Episode 10 - 6 I Saw It

Chapter 395: Episode 10 Chapter 6 I Saw It

Luo Feng was filled with joy, as he had resonated with 73 types of world-level primordial bloodlines, although only 15 of them had over seventy percent comprehension. Yet for the rest, he had also comprehended at least forty to fifty percent.

In the process of comprehending, completing secret patterns, and comparing bloodlines, each world-level primordial bloodline brought many gains to Luo Feng.

Feeling the slow yet steady progress, Luo Feng naturally felt joyful!

As long as he doesn't stop, he will inevitably go farther and farther.

"I understand why the physical body of a world-level primordial can be so immense," Luo Feng murmured softly.

The physical body of a world-level primordial life far exceeds high-level primordial! It has already reached about one percent of a normal source world.

One must know that the physical body of a primordial ancestor, at an average level, is only about one-tenth of a normal source world.

The main difference between the two lies in the grasp of power levels, the difference in physical bodies has become quite small.

"At the world-level primordial stage, the physical body system is already quite perfect." In Luo Feng's mind, the physical body system

gradually took shape, formed by absorbing the life and destruction mysteries of countless world-level primordial bloodlines.

Luo Feng's original accumulation was mainly in the mind consciousness system, life system, destruction system, and primordial power system.

These four parts are the foundation for the future construction of the complete 'Primordial Life and Death Dao'.

And now Luo Feng was gradually exploring the 'physical body system,' which was also the fifth part.

"The 'Primordial Life and Death Dao' I pursue seeks the ultimate enormous life form. Therefore, the physical body system is very important to me." Luo Feng began to organize the remaining more than two thousand world-level primordial bloodlines.

From easy to difficult, he gradually comprehended them one by one.

With the previous accumulation of 73 world-level primordial bloodlines, the difficulty of comprehension was somewhat reduced for Luo Feng.

Among the 2729 world-level primordial bloodlines, Luo Feng patiently comprehended each one. After comprehending all once, he would comprehend them a second time, a third time.

Again and again.

Each time, Luo Feng would have new gains.

With the ever-deepening accumulation, new gains are always assured.

No one knows how much time has passed.

"It's about time."

"No matter how much I comprehend these world-level primordial bloodlines, the gains have become negligible."

Luo Feng finally stopped after comprehending over thirty times.

He treasures these 'world-level primordial bloodlines' and corpse materials dearly, as it was under the collection of the Starlight Lord that he had the chance to comprehend freely, so he was extremely patient in comprehending them repeatedly.

"The three categories of life, destruction, and the combination of life and death. Among them, I have comprehended all low-level primordial bloodlines and high-level primordial bloodlines."

"I have comprehended 43 kinds of world-level primordial bloodlines! The others have also been comprehended several times, making it hard to have any significant new gains."

Luo Feng's eyes burned with intense fervor.

"Now, it's time to comprehend ancestor-level corpse materials!"

Luo Feng was introduced to the land of origin and did not attempt to create the 'Primordial Life and Death Dao' but continued to accumulate.

From Luo Feng's perspective, if he couldn't even understand the 'primordial ancestor-level materials,' on what basis could he construct the Primordial Life and Death Dao?

To comprehend primordial ancestor-level materials, one must try to understand 'low-level, high-level, and world-level' primordial bloodlines as much as possible.

"I have been in seclusion for a full three billion five hundred million epochs since coming to the land of origin, finally beginning to comprehend 'ancestor-level materials'."

In the quiet room.

Luo Feng took a sip of fruit wine, which he exchanged for reward points, 100,000 reward points for one unit, enough for Luo Feng's cultivation needs for ten billion epochs, with excellent effects.

"In the land of origin, I need to observe ancestor-level materials," Luo

Feng said.

"Up to this point, the cultivator camp has slain a total of 17 primordial ancestors! Coupled with the ancestor-level corpse materials purchased by the cultivator camp and other strong beings, there are a total of 31 ancestor-level corpse materials."

Luo Feng listened, shocked.

The lords on our side are indeed formidable, having killed a total of 17 primordial ancestors.

It can also be seen that the primordial ancestors have some other causes of death.

In the infinite primordial space... there are indeed many dangers.

"Are there any life secret patterns or destruction secret patterns exceeding seventy percent?" Luo Feng inquired.

"No," the land of origin responded.

Luo Feng was taken aback; he had initially selected more than two thousand kinds of world-level primordial bloodlines, all exceeding seventy percent in combined life and destruction!

Yet, in the ancestor-level corpse materials, none could be selected.

"How about a cumulative total exceeding sixty percent?"

"No," the land of origin responded again.

Luo Feng frowned, sensing something was amiss.

"Send me all the available intelligence on the 31 ancestor materials that I have access to," Luo Feng instructed.

"Understood."

Soon, detailed intelligence on the 31 deceased ancestors and much material information was transmitted to Luo Feng.

Upon reading, Luo Feng discovered.

The life secret pattern ratio of these deceased primordial ancestors was at best about 39%! The corpse material of the Wanxing Ancestor had a life secret pattern of about 34%, already ranking second.

"Their life secret patterns are generally low."

"Perhaps this is one of the reasons for their demise." After all, Luo Feng was pursuing the dao of life and death, primarily based on 'life.' He understood that if life secret patterns were sufficiently high, they would have strong life-preserving capabilities.

"Let's start comprehending, beginning with the 'Wanxing Ancestor' corpse material."

The Wanxing Ancestor, whose life secret pattern ranks second among the 31 ancestors, was ultimately the source of the Star Tower Blood Scale. Luo Feng's cultivation path was guided by it! Naturally, it was the most compatible choice, being the first he selected.

******

The land of origin.

"Those primordial ancestors have taken action." The voice of the Starlight Lord rang in the ears of the other six lords.

Chapter 396: Episode 10 - 6 I Saw It_2

Chapter 396: Episode 10 Chapter 6 I Saw It_2

"They’ve only recuperated for five hundred epochs, and now they’re attacking again?"

"Some of them likely haven’t fully recovered yet."

A group of over seventy Primordial Ancestors on one side and only seven Lords on the other.

Yet, those Lords grasp the Dao at the Primordial level, the essence of the highest level power, and some of their moves are simply unstoppable; once initiated, they are bound to hit! Even after layers of weakening, they still penetrate the bodies of those Ancestors.

To completely expel the penetration of a Lord’s power is exceedingly difficult; five hundred epochs have passed, yet several Ancestors still haven’t fully recovered.

"These Primordial Ancestors are truly desperate."

"Originally the foremost power in the Infinite Primordial Space, they lost several Ancestors in battles against us, and now they’re anxious, wanting to sever the cultivator camp’s soil completely."

The Lords are all aware of this.

In a vast territory, countless Source Worlds, a continuous emergence of cultivator geniuses is possible! Currently, there are seven Lords; in the future, there might be eight or even nine Lords!

If they conquer all territories, all Source Worlds will become their food, and they could even periodically wipe out the creatures within Source Worlds!

No more successors!

Only seven Lords? They are just a relatively strong force within the Infinite Primordial Space! They cannot shake the status of the Innate Primordial Life Camp! The countless number of Innate Primordial Life will also continuously produce Ancestors.

"Let’s go."

"Set out."

Though they had only rested for five hundred epochs and carried some fatigue, the seven Lords still set out together, under the leadership of Starlight Lord, swiftly traversing the distant space-time to intercept the batch of moving Ancestors.

"It’s a pity, the younger cultivators are too weak; none of them show any hope of becoming a Lord." Yuan, as the first Ancestor of the cultivator camp, had poured infinite effort into the Cultivator Territory.

Each fall of a World Group felt like cutting flesh from his heart.

He hoped, hoped for a turning point!

Hope for the emergence of new Lords! In recent epochs, they have invested massive resources, allowing even some Half Primordial cultivators who have mastered two Daos to receive abundant resources.

Yet the result still shows no hope for new Lords emerging.

"This Luo Feng has truly been secluded for over five billion epochs, able to comprehend 43 types of World-level Primordial Bloodline,

indeed considered outstanding. But to become a Lord is still far from enough." Yuan sighed internally.

Comprehending 43 types of World-level Primordial Bloodline, historically, only five Fusion Dao cultivators have managed such.

Before the emergence of Starlight Lord, the World-level Primordial Bloodline in the Land of Origin was only a small fraction of what it is now.

Luo Feng's performance indeed shows little hope of 'becoming a Lord'.

...

Time flows silently like a river.

"Another three billion epochs spent, I've examined all the materials from the 31 Ancestors' corpses." Luo Feng looked at the vast Void within the Quiet Room, where 31 sprawling Secret Pattern figures surfaced, all rather disordered.

After all, lacking complete bloodlines and Life Cores, these Secret Pattern images were already integrated with the Land of Origin's help.

Three billion epochs.

Luo Feng could feel that in the Mind Consciousness System, Physical Body System, and other five major systems, his accumulation was indeed deeper, but none had undergone qualitative change.

"The intriguing Secret Patterns within these deceased Ancestors have no clearly defined core; they're all too scattered." Luo Feng lightly shook his head.

If Life Secret Patterns could dominate 50%, and Destruction Secret Patterns 30%, the two could naturally serve as the absolute core, with other Secret Patterns merely assisting. The entire Secret Pattern Map would be very aesthetic.

Yet, in front of him, these 31 Ancestors' Secret Patterns are generally

scattered.

Among them, the one deemed strongest, the 'Red Flame Snake Ancestor', has Flame Secret Patterns occupying about 31%, Life Secret Patterns 19%, Space Secret Patterns 12%, Time Secret Patterns 11%, Material Secret Patterns 9%...

From the Secret Patterns within its body, it's evident that the proportion of each Secret Pattern is not high.

The scattered Secret Pattern proportions are typical among the deceased 31 Ancestors!

"Based on my experience with Low-level Primordial, High-level Primordial, and World-level Primordial, the higher the proportion of the same Secret Pattern, the stronger the power at the same level." Luo Feng had discovered this earlier.

Whether it's at the High-level Primordial level, like 'Heavenly Fire Shadow', 'Ghost Prison Disaster Beast', 'Nine-headed Chaos Beast', etc.

Or at the World-level Primordial level like 'Star Sea Demon Lord', 'Life and Death Pupil Beast', etc., it's all the same.

"The Lords are also the same."

"For example, Starlight Lord comprehended 'Primordial Space-Time Path'. As for the Golden Lord, he comprehended 'Primordial Destruction Path'. Fusion Dao is essentially a Dao too."

Luo Feng understood this point.

Like himself, the Life and Death Dao is a Dao.

All the Lords comprehended a Dao at the Primordial level.

"The Lords are very focused."

"Whereas these Ancestors explore bloodline potentials, digging a bit here and a bit there, resulting in sparse mastery. They possess dozens of Secret Patterns within, skillfully combined to grasp the highest

level power."

Luo Feng gazed upon these Secret Patterns.

"It’s coincidental."

Luo Feng considered these 31 Secret Patterns, processed and integrated by the Land of Origin, though differing from the real form of the 31 Ancestors’ Primordial Bloodline, they still estimated a similarity of seventy-eight percent.

"Though very scattered, they can perfectly integrate, resembling a whole." Luo Feng observed.

From this perspective, the threshold to become an Ancestor Level was indeed high.

...

Land of Origin.

Luo Feng sat alone atop a tall building, gazing at the vast world.

"Master, it’s rare for you to come out." Morosa attended to his master beside him; now in the Land of Origin, he held significant authority, with the two Ancient Countries needing to look at Morosa’s face.

Morosa was truly the uncrowned king of the Land of Origin.

However, Morosa preferred to serve his master! It’s just that the master rarely appeared.

"Morosa." Luo Feng looked at him, "You’ve managed the Land of Origin very well."

"Serving the master is my honor." Morosa replied, excited and proud.

Luo Feng nodded, gazing upon the endless land.

Yet the crisis comes from beyond! Once the Innate Primordial Life Camp invades the hinterland, the Dark World Group falls, creatures within the Land of Origin will have no ability to resist.

"This realm."

Luo Feng's brow opened the Biomimetic Destruction Eye.

The Biomimetic Destruction Eye now is far more profound than before, coupled with Luo Feng's immensely powerful Spiritual Will, he could glance at the entire Source World with one eye, even seeing beyond the Source World.

"My home Source World."

Under Luo Feng's Biomimetic Destruction Eye, observed by his Spiritual Will, he could clearly see the traces of the rules.

Nine Daos are perfectly integrated, orderly, and smoothly operating, forming the operational rules of the entire Source World.

"The Origin of the Source World."

Here lies the source of the Nine Daos, the core of the Source World's operational rules, also the source of the Source World's power.

If the Origin remains intact, even if the Source World is destroyed, it can be reborn anew.

Once the Origin is lost, the Source World is completely gone!

What most attracts the Innate Primordial Life is the Origin of the Source World. It possesses infinite wonders; World-level Primordial consuming it might find a glimmering hope of breaking through to Ancestor Level.

"Origin..."

Luo Feng slightly furrowed his brows.

The perfect integration of Nine Daos forms the Origin.

Having researched the materials of 31 Ancestors for billions of epochs, considering them for so long had deeply ingrained his understanding, now the Secret Pattern Map of these 31 Ancestor materials surfaced in his mind.

Seemingly scattered combinations of various Dao Secret Patterns forming an entire.

Compounded with the integration of Nine Daos forming the Origin.

"Boom——"

Luo Feng’s eyes lit up.

He saw it.

He saw the true reason for the Source World’s strength!

He also saw why each of those Ancestors could become an Ancestor!

"I understand." Luo Feng gently murmured.

He finally saw it!

Amidst layers of fog, he finally saw it! He saw the road of Break Laws with Force!

The road is already under his feet!

Chapter 397 - 7 Both are needed!

"What has the master understood?" Morosa, who was attending nearby, couldn't help but feel confused upon hearing the master's soft murmur.

Morosa could also see that the master was immersed in a state of enlightenment, so he dared not disturb him. He carefully guarded the area, strictly prohibiting any other creatures from approaching, in order to prevent affecting the master's current state.

Luo Feng's Biomimetic Destruction Eye at the center of his brow observed the Source World Origin. In his mind, the Secret Pattern Map of the 31 ancestral corpses' materials emerged for comparison.

"No wonder once a World Level Primordial Life controls the 'Source World', they, relying on the Source World, aren't least bit afraid of a Primordial Ancestor in a one-on-one situation."

"Because the Source World and the Primordial Ancestor are fundamentally entities of the same level."

Luo Feng understood.

The usual Source World is like a massive physical body without a 'soul'!

Once it has a master, it gains a soul. In a one-on-one, even a Primordial Ancestor can't handle it.

"I finally understand why all Innate Primordial Lives possess a Life Core. Even those at the Ancestor Level also have a Life Core," Luo Feng thought.

For Innate Primordial Lives, everything else can be discarded, but the 'Life Core' is most crucial! Once the Life Core shatters, it signifies complete annihilation.

"I previously believed the Life Core to be a huge weakness of Innate Primordial Life, an imperfection in their natural creation." Luo Feng had thought this for a long time.

Cultivators, they seek enlightenment on their own! No Life Core, no such huge weakness.

Innate Primordial Life, its Life Core is its weak point!

Some ancestors have fallen, all due to the vulnerability of the Life Core.

"The Life Core is the reason for their limitless potential!" Luo Feng realized at this moment.

"The Life Core is also another form of Origin!"

"These Innate Primordial Lives are born possessing the Origin."

Luo Feng also understood why bloodline path cultivators need certain special resources.

Cultivators need to refine High Level Primordial Bloodline to become 'High Level Primordial Life'! To become 'World Level Primordial Life', they need to refine World Level Primordial Bloodline.

But as for those Innate Primordial Lives?

It is hard for them to acquire higher-level bloodlines! It is quite an achievement to be granted a drop of blood by a higher existence.

Even if they don't acquire high-end bloodline, just by eating and living, some Innate Primordial Lives grow naturally! Some even grow into ancestors just by consuming Source World Origin.

"Cultivators on the bloodline path value the Primordial Bloodline the most and have researched many methods to extract the Primordial Bloodline. However, they cannot extract a complete bloodline at the

Ancestor Level."

"But for Innate Primordial Life, their core isn't their bloodline, it's their Life Core."

"The growth of the Life Core leads to the growth of life."

"Every step in the growth of the Life Core triggers the evolution of the bloodline. So, the strength of Early Stage Divine Emperor, Middle Stage Divine Emperor... the manifestation of the Primordial Bloodline differs accordingly."

Luo Feng fully understood.

"The Life Core is fundamental! The bloodline is merely the external manifestation of the life level."

"Cultivators cannot truly utilize the Life Core. They can only extract and utilize the externally manifested 'Primordial Bloodline'.

Luo Feng sighed slightly.

Innate Primordial Lives are truly the darlings of infinite Primordial Space! Born with a 'Life Core', and under various opportunities, the Life Core grows continuously. It can grow to a level comparable to the Source World Origin. Reaching this level means achieving Ancestor Level existence.

"This is the mystery of the highest level of life."

"Ancestor Level life forms and the Source World both have an Origin, and a Lord should have an Origin too."

"For the first two, their Origin is materialized. As for the Lords, their Origin is the 'Primordial Level Dao'. If the Dao does not perish, they do not perish, so every Lord is immortal."

Luo Feng understood the difference between the two.

The Ancestors' Origin is the Life Core, which has clear weaknesses.

The Lords' Origin is the Dao! Invisible, untouchable, undying, and

immortal.

"Lords also have weaknesses!"

Luo Feng had learned some information, understanding the difference between Primordial Ancestors and Cultivator Lords, "Primordial Ancestors generally have large physiques! While the Lords, their physiques are generally smaller."

Of course, this is an average standard.

Ancestor Level physical bodies are generally much larger than Lord-level physical bodies.

"The Life Core is a material existence. It can endlessly accumulate power, supporting a sufficiently massive physical body."

"Lords, without a materialized Origin, have limited power storage within themselves, and generally have smaller physiques."

If given a choice, Luo Feng believes those Ancestors would prefer smaller sizes, without the vulnerability of the Life Core, truly becoming undying and immortal.

"My Life and Death Dao primarily focuses on Life, with Destruction as a supplement. Now, I have glimpsed the mystery of the highest level of life. If I fully comprehend its essence, I can completely construct billions of Origins within me!"

For those Ancestors, their Life Cores are innate.

If Luo Feng comprehends the 'Dao' within, understands the essence! He can create Origins postnatally.

Just like opening countless heavenly spaces within his body, the same principle can be used to open billions of Origins.

"On one hand, I need to eliminate the vulnerability of 'Origin'. Even if I lose thousands of Origins, the impact on me remains low."

"On the other hand, I need to leverage the advantages of 'Origin', for billions of Origins can accumulate incomparably vast energy,

enabling me to have an immensely powerful physical body."

Both want, both demand!

Only the Dao that understands the essence of life can achieve this step.

If there is a lord who can realize the 'Primordial Life Dao', his body will also be the most immense, most vital, and hardest to destroy existence in the entire Infinite Primordial Space.

Luo Feng's 'Primordial Life and Death Dao', after all, focuses on life, and his path more reflects the characteristics of the life direction, with the destruction direction being relatively weaker.

...

Land of Origin, atop the mountains of Primordial Island, inside the Quiet Room of the cave mansion.

An endless gigantic secret pattern map of 31 Ancestor-level materials floated in suspension, Luo Feng's Eye of Life and Death opened on his forehead, observing carefully.

"I see the path."

"But the path requires me to walk it myself."

"Only by walking to the end can I grasp the Dao within."

Luo Feng is well aware of how difficult it is to 'remove the critical weak points of the Origin while taking advantage of the endless energy storage of the Origin', but this direction is what he has always pursued.

"What seems like scattered secret patterns is actually unified."

Even if the other seven lords were to look, it would be difficult to see how dozens of different Daos' mysteries form the Origin.

Specialize in one's field!

The current seven lords, whether it's the Destruction Path, the Thunder Path, or the Fluctuation Path… none are proficient in life, and 'Origin' is the highest level of life's mystery.

Without sufficient accumulation in this aspect, without terrifying comprehension in this area, it's fundamentally impossible to see this path.

Luo Feng realized the foundation of the 'Half Primordial Life and Death Dao', also comprehending over 50 million low-level primordial bloodlines, more than 320,000 high-level primordial bloodlines, and researched over 2,000 world-level primordial bloodlines along with materials from 31 Ancestor corpses, accumulating deep enough. Relying on his strong comprehension, he finally glimpsed this path.

Discovering this path, Luo Feng then had the possibility of becoming a Lord!

"No wonder any Ancestor, the mystique of life within them is at least 10%, because the mystery formed by the life core mainly relies on life's mystery," Luo Feng also rejoiced.

With life path as the main direction, there's hope to explore the mystery of the 'Origin.'

If destruction were the main focus, the difficulty of breaking laws with force might significantly increase!

"Breaking laws with force also requires luck." Luo Feng thought.

For him, realizing 'Half Primordial Life and Death Dao' didn't feel too difficult! Though he encountered some bottlenecks, he only took less than ten thousand eras to succeed.

However, to break laws with force, merely glimpsing the 'path', Luo Feng felt a sense of needing luck.

"My future 'Primordial Life and Death Dao', besides the existing Mind Consciousness System, Life System, Destruction System, Primordial Force System, and Physical Body System, has a sixth system — the Origin System!"

"The Origin System is even more central."

Luo Feng devotedly comprehended the secret patterns of materials from these 31 Ancestor corpses, researching how the Origin integrates and forms.

After all, his future self will combine the wonders of life and destruction.

And these Ancestors combined numerous mysteries of the Dao. He cannot imitate but must understand its essence.

...

The same thing, observed from different angles, yields different insights.

Luo Feng now, observing from the perspective of the Origin System, gained new understanding of the secret patterns of these 31 Ancestor-level materials. His 'Origin System' seems like a seed, drawing nutrients from these 31 Ancestors, starting to grow robustly.

This time Luo Feng spent even longer.

Meticulous comprehension!

Again and again!

Luo Feng carefully considered materials from different Ancestors, pondering deeply. He forgot time, only feeling his accumulations in all aspects rising, and the Origin System gradually taking shape.

"Almost there."

Suddenly, one day, Luo Feng stopped.

He had studied the various materials from these 31 Ancestors so many times and was too familiar already.

"My six systems of Primordial Life and Death Dao have deep accumulations." Although Luo Feng had not yet created the Primordial Life and Death Dao, these six systems naturally integrated

in his mind.

He even had a vague outline of the 'Primordial Life and Death Dao' in his heart.

"These primordial bloodlines, I have comprehended low-level and high-level primordial bloodlines. However, among the 2,729 world-level primordial bloodlines, I've only comprehended 43 types."

"I've studied Ancestor-level materials for over ten billion eras, now let's see how much I can comprehend from the 2,729 world-level primordial bloodlines."

Luo Feng retrieved one of the uncomprehended world-level primordial bloodlines and auxiliary materials.

After less than a day of viewing.

"Interesting."

With Luo Feng's current insight, upon examining world-level primordial bloodlines, he discovered a secret, and a smile appeared on his face. "It turns out, at the world-level primordial stage, the secret pattern mystique within them has already begun forming the Origin."

"However, the Origin formed by their internal secret patterns is incomplete."

For the Ancestor-level, the Origin constituted by secret patterns is complete, comparable to the Source World Origin.

The world-level secret patterns are actually forming the Origin, but the incomplete Origin is hard to detect. Only after Luo Feng accumulated sufficiently in the Origin System could he discern this point.

Chapter 398 - 8: The Future Collapses into Unity

Land of Origin, within the quiet room of Yuan's cave mansion.

A towering figure sat cross-legged, his body like a pillar of the infinite Primordial Space, unshakable. Around him appeared various 'Great Dao', all becoming tangible.

Some took the form of winding divine dragons around his arm, while firebirds circled between his hair, radiant mists flowed through his mouth and nose, and billions of universes were born on the surface of his skin...

"Lord, the Feng Seven Line in the Chunwei World Group has fallen..."

"Lord, the Changqu Origin World has been breached, its origin devoured..."

"Lord, the Ice Peak Camp has entered our Chunwei World Group. I wanted to repel them, but a terrifying existence from the Ice Peak Camp acted, destroying my main battle avatar. The Ice Peak Camp has already conquered 12 of our world groups! They clearly are not satisfied!"

Information flowed in continuously.

Yuan, as the first lord of the Cultivator Camp, had immense accumulation, and his path of cultivation made him very suitable to oversee the entire territory. Although there are seven lords in the Cultivator Camp managing different lands, key affairs generally fall under Yuan's decision-making.

Only extremely important matters are discussed by all seven lords together.

A vast amount of information was transmitted continually.

Yuan calmly issued command after command.

He slowly opened his eyes, which contained life and death across time and space, as well as rising thunder and flames.

"While our Cultivator Camp is completely suppressed by the Innate Primordial Life Camp! Other forces also come to take advantage and bite." Yuan was quite annoyed, yet there was nothing he could do.

After all, in the infinite Primordial Space, though the seven lords of the Cultivator Camp are formidable, the other forces are equally troublesome.

No force with a seat in the Land of Eternity is easy to deal with.

Especially those unrestrained, undying existences! They currently take advantage to annex the resources of the Cultivator Camp, which greatly troubled Yuan.

Under normal circumstances, the seven lords could make some undying existences flee in defeat. But under the threat from the Innate Primordial Life Camp, the lords couldn't spare any strength.

"There are still too few lords."

"Why is the Innate Primordial Life Camp the largest force? Because they possess over a hundred ancestors!"

Yuan pondered.

"Cultivator Luo Feng has comprehended the 97th World-level Primordial Bloodline." An inconspicuous piece of information among many did surprise Yuan.

"He has already comprehended 97?" Yuan began to focus his attention.

To have comprehended 97 World-level Primordial Bloodlines was already very special.

Because of the current seven lords, five first refined the Source World, becoming 'Master of the Source World', and relied on abilities of speed of thought, comprehension at the Master level to eventually comprehend the Primordial Level Dao! The remaining two, 'Starlight Lord' and 'Lord Nai Gu', are Fusion Dao cultivators and once spent a long time comprehending the World-level Primordial Bloodline.

Lord Nai Gu, before jumping out of the Braided Cage, comprehended 397 types of World-level Primordial Bloodline.

Starlight Lord, before jumping out of the Braided Cage, comprehended 512 types of World-level Primordial Bloodline.

Of course, they both shared a common point: back then, the Cultivator Camp collected far fewer World-level Primordial Bloodlines than now, less than half the number today.

"In history, among Fusion Dao cultivators, the number who comprehended over a hundred World-level Primordial Bloodlines before jumping out of the Braided Cage is only Starlight and Nai Gu." Yuan held some expectation.

Luo Feng's current place of seclusion was maintaining a million-fold time acceleration. He comprehended World-level Primordial Bloodlines swiftly.

"Cultivator Luo Feng, comprehended the 100th World-level Primordial Bloodline."

...

"Cultivator Luo Feng, comprehended the 159th World-level Primordial Bloodline."

...

"Cultivator Luo Feng, comprehended the 231st World-level Primordial Bloodline."

Yuan originally paid just a bit of attention while handling various affairs to Luo Feng's information.

Later, he primarily focused on Luo Feng's information! The importance of all other information in the Cultivator Camp was pushed back.

"How so fast? In just one era, from the original 43 types rose to 231 types?" Yuan was somewhat stunned, even considering the time acceleration in the cave mansion, comprehending 200 types in a million eras was still fast.

Yuan did not immediately notify the other six lords. At that moment, their seven main battle avatars were engaged against 71 ancestor-level existences!

On one side, experienced and numerous, their coordinated efforts held an absolute advantage, aiming to annihilate a lord's main battle avatar, forcing the remaining six into complete retreat.

On the other side, mastering the essence of Dao, seven leading in defense yet looking to kill a weak ancestor.

Their battles at this level could last over a thousand eras and still be the norm.

"300 types of World-level Primordial Bloodline."

"400 types."

"Already 513 types, he is now the Cultivator Camp figure who comprehended the most World-level Primordial Bloodlines before jumping out of the Braided Cage." Yuan was excited, the most intense he's been in a long time.

Luo Feng's number of World-level Primordial Bloodline comprehension exceeded that of Lord Nai Gu and Starlight Lord was not Yuan's main excitement, though once the Primordial Bloodlines were much fewer.

His fundamental excitement stemmed from... speed!

Luo Feng's rate of comprehension was simply overwhelming, sweeping through without obstruction! None of the World-level Primordial Bloodlines took Luo Feng too long to comprehend.

"It's 600 types now."

"It's 800 types now."

"It's 1000 types now!" Yuan's eyes shone brightly, "In less than ten eras of time, which isn't even ten million eras in real time, he's comprehended so many World-level Primordial Bloodlines? He must have grasped the essence of them!"

"What kind of essence can penetrate through over a thousand types of World-level Primordial Bloodlines?"

"Luo Feng must have already touched upon some kind of highest level of power!"

Yuan immediately sent messages to the other six lords.

"Everyone, focus all efforts on dealing with these Ancestors and try to delay them as much as possible." Yuan transmitted, "I have good news for you all; our Cultivator camp is likely to give birth to a new lord!"

...

Land of Origin.

All seven lords had avatars present, gathered together.

"A new lord?"

Jin, Wulan, Ming Huang, Nai Gu, Starlight, Mo Man, and Yuan were all somewhat excited at this moment, for they had been severely suppressed by the Innate Primordial Life Camp in the recent eras! Some other forces even took advantage of this, naturally making them quite aggrieved.

They even predicted that, given the enemy's determination to go all out this time, the entire realm of the Cultivator camp might fall!

Losing all territories means losing the soil for cultivating endless new cultivators, making it incredibly difficult to nurture a lord again.

Moreover, the extinction of countless Cultivator creatures was something the seven lords were unwilling to witness.

"Luo Feng has already comprehended over a thousand types of World-level Primordial Bloodlines?"

The six lords who just received the news were somewhat shocked.

"How long has he been cultivating?" Lord Mo Man couldn't help but say, "Only about 1,500 eras? Considering the actual seclusion time, it's only been 1.5 billion eras! That's such a short time."

"It is very short." Starlight Lord said softly, "Back when I used the Power Breaking Technique, the real time was about 12 billion eras."

Through the unimaginably long ages of suffering, the Starlight Lord finally mastered the Space-Time Dao of the Primordial Level.

"Starlight, don't you have many avatars in the future?" Jin asked excitedly, urging, "Quickly take a look, see Luo Feng's future."

"I just observed some time ago, then, I saw over thirty million futures for him with only nine that could become a lord. I'll take another look now." Starlight Lord began observing information about Luo Feng through his avatars in the future.

In every timeline of the future, space is vast with a plethora of information to probe.

Discover the weaknesses of those Ancestors, finding the possibility to kill an 'Ancestor' in combat. Observing how other nearby forces will act.

Luo Feng as a junior, Starlight Lord would only occasionally check on him.

"Hmm?"

Starlight Lord's expression slightly changed.

The six surrounding lords looked towards Starlight Lord, such a strong ability to observe the future solely in the Infinite Primordial

Space! Even within the Primordial Ancestors, some excelled in space-time. Yet even if they can 'revive' from the future, it costs a long time to do so, indicating that their space-time mastery is far behind Starlight Lord.

Only Starlight Lord was qualified to be called the observer and recorder of 'past, present, future' in Infinite Primordial Space!

"What happened?" Jin asked.

"Many of Luo Feng's future timelines have already collapsed and extinguished, unified and constrained into one future!" Starlight Lord said in disbelief, "The path ahead of him has only one possibility—to Break Laws with Force."

"I observed over thirty million timelines, and he has tried using the Power Breaking Technique, succeeding in over twenty million times! Those failed attempts are still ongoing."

Starlight looked at the six lords.

The six lords could hardly believe it.

"The future contains too many possibilities." Jin Lord couldn't help but say, "Yet his future has now started to collapse and unify?"

The future swiftly collapsing, consolidating into one possibility—this is the reality that is about to be born!

Reality is rapidly locking in!

Unable to alter!

"He should have already mastered the highest level of secrets." Lord Ming Huang said, "So it only takes time to unify all wonders, transforming into Primordial Level Dao."

"Such strong comprehension?" Wulan couldn't help but mutter, "I became the Master of the Source World after spending fifty trillion eras to become a lord. How long has he been cultivating?"

Starlight Lord's gaze swept over the six lords: "Everyone, Luo Feng's

future is collapsing and unifying, his future is also affecting the entire Cultivator camp's future!"

Yuan and the others listened to Starlight Lord's narration.

A being that can observe countless future possibilities, his advice is invaluable.

"I will immediately arrange a formation for Luo Feng's cave mansion, mobilizing the power of the entire Land of Origin to maintain, increasing the time acceleration of his cave mansion." Starlight Lord said.

"From now on, the war strategy changes to 'delay strategy', stalling the progress of this war." Starlight Lord said, "Delay until Luo Feng completely uses the Power Breaking Technique! The situation will change then."

"Okay." The six lords all agreed, the imminent arrival of new companions and the potential reversal of the war situation excited them individually.

```
```

Chapter 399: Episode 10 - 9 Space-Time Net

Chapter 399: Episode 10 Chapter 9 Space-Time Net

At this moment, the seventy-one Ancestors from the Innate Primordial Life Camp and the seven Lords from the Cultivator side are engaged in a terrifying war within the Bo Xun World Cluster!

Yet, at this moment, the battle avatar of the 'Starlight Lord' among the seven Lords has quietly reduced to seventy percent energy reserve.

For each Lord, due to the differences in their 'Dao', there is a limitation to the energy reserves they can manage. When one avatar takes up more, the other avatars can only take up less. In life-and-death struggles, the battle avatar can take up ninety-nine percent of the energy, while all other avatars combined barely reach one percent.

At this moment, the battle avatar of the Starlight Lord only occupies seventy percent, naturally causing his strength to decline. However, with his space-time expertise... in coordination with his companions, it's enough to delay rather than kill.

"Hahaha, the origin of this Source World is mine."

A massive World Level Primordial Life approaches a Source World, its

power quietly infiltrating the Source World.

An ownerless Source World operates according to its rules, even a Godly King can’t infiltrate it, naturally unable to stop the infiltration by a World Level Primordial power.

"What is this?"

"No—"

The creatures within this Source World, though they can’t see the colossal entity outside the Source World, feel the World Level Primordial power spreading like dark clouds, instantly shrouding the entire Source World.

Enshrouded by dark clouds, destruction descends.

Boom—

In an instant, all creatures, all lands and rivers, all space-time were annihilated.

Complete destruction!

This terrifying power also permeates into the origin of the Source World, starting to absorb the origin.

"The origin of this Source World is too vast." This World Level Primordial Life only feels the origin vast like the sea, though it is a big fish, it still requires a long time to devour an entire sea.

"To absorb the entire origin of this Source World, it’s estimated to take a hundred and twenty eras." Based on its absorption speed, with the experience of other World Level Primordials in the camp, it made a rough estimate.

Destroying all beings in the Source World is just a thought.

But to absorb the ’origin’ takes a hundred and twenty eras!

Not to mention even an Ancestor personally absorbing a Source World would also take quite some time to fully absorb.

"Buzz."

A phantom descends, rapidly coalescing into a black-robed young man, one of the avatars of the Starlight Lord.

"Not good!" The World Level Primordial Life, in the midst of absorbing the Source World origin, was instantly stunned upon seeing this black-robed young man!

Fear!

Despair!

This black-robed young man is the most feared Lord among the entire Innate Primordial Life Camp, 'Starlight'. Stalked by him, there is no escape.

This is the most feared Lord among the Innate Primordial Lives!

The black-robed young man glanced and knew that the creatures of that Source World were annihilated. He wasted no words, with a thought, caused the space-time to shatter like a mirror, the World Level Primordial body shattered with it, along with its life core, instantly killing it.

With a wave of his hand, he collected this body.

...

At this moment, numerous thoughts from Starlight Lord remote descended into each space-time. Each thought could rapidly absorb power from multiple space-times to form a strong avatar, swiftly annihilating one World Level Primordial Life after another.

Filled with fury, he couldn't be bothered to waste time capturing; it was all about killing swiftly!

Lords can descend a thought across endless distance. But it's just a thought, with very weak power. Even if they absorb some Primordial Force, they can only slaughter some High Level Primordial Lives.

To easily kill a 'World Level Primordial Perfection Life', a Lord's

avatar also needs approximately one ten-thousandth of the energy reserve.

A remotely descended thought, merely absorbing Primordial Force, to reach one ten-thousandth of the energy reserve, even for Golden Lord, Lord Nai Gu, and others, it will take about one Earth day!

Too slow!

Starlight Lord is an exception! He had set up a Space-Time Net in the 3600 World Cluster of the Cultivator Territory. With the Space-Time Net, Cultivators could easily teleport to various places.

Starlight Lord can also utilize the 'Space-Time Net' to swiftly absorb surrounding space-time power.

Although the Bo Xun World Cluster was attacked, and the Space-Time Net was destroyed in the first instance. Starlight Lord can still absorb energy not only from the present space-time but also from past multiple space-times.

In many past timelines, there existed a complete Space-Time Net spread throughout the 3600 World Cluster.

Absorbing power from multiple space-times, nearby regions could be instantly absorbed, enabling an avatar to quickly reach beyond one ten-thousandth energy reserve. Of course, to go further, it requires absorbing from 'farther' distances, increasing the absorption difficulty rapidly.

By leveraging the Space-Time Net, absorbing nearby multiple space-time powers can instantly exceed one ten-thousandth energy reserve, elevating Starlight Lord's ability to garrison territories to the top among the seven Lords.

Although garrisoning the territory is limited to the 3600 World Cluster range! And only affects below Ancestor Level, even Yuan acknowledges... Starlight's contribution is the highest among the Lords.

Before the birth of Starlight Lord, there were only five Lords! The Cultivator Territory had only expanded to eight hundred World

Clusters, yet even so, warfare often engulfed the eight hundred World Clusters.

"Buzz." "Buzz." "Buzz." "Buzz." "Buzz." "Buzz."

In the Bo Xun World Cluster, numerous regions saw black-robed young men descending.

When encountering High Level Primordial Lives, he just waved his hand and captured them all. Because for an avatar with 'one ten-thousandth energy reserve', slaughtering and capturing take the same time.

When encountering World Level Primordials, killing is prioritized! Capturing them takes more time.

...

The seventy-one Ancestors at this moment also received the news, naturally infuriated.

"How dare he, while engaging with us, to even split forces to deal with the little ones."

"This Starlight Lord has divided part of his power, his effective strength will significantly drop. Everyone, give your all, crush them!"

Facing the seven Lords of the Cultivators, they were very vigilant, fearing being counter-killed by one or two. After all, in this war, even combined, they had already lost three Ancestors in counter-kills.

Now, the Cultivator's Starlight Lord dared to divide power? From the most threatening Lord, lowered to a normal Lord level. Naturally, they felt much relieved, gaining the confidence to attack full force.

"Kill."

"Completely destroy them."

The seventy-one Ancestors' attacks became even more terrifying.

However, the seven Lords of the Cultivators were solely focused on

defense! The vast formation arranged by Yuan perfectly coordinated the power of the seven Lords, enabling them together to withstand these Ancestors' siege.

"Just in a moment, I have already slain over three thousand five hundred World Level Primordials, countless High Level Primordials." Starlight Lord informed his companions, "The mid and low tier of the Innate Primordial Life Camp have started panicking, their attack speed is beginning to slow down."

Who wouldn't be anxious in the face of Starlight Lord's slaughter?

Fear, retreat, merely dispatching weak avatars...

Originally, the conquest of a world cluster could be completed in one or two thousand eras, but under the threat of Starlight Lord, the time cost would be upwards of a hundredfold!

"The key is that we have to hold out!"

Even with the coordination of formations from the seven Lords, the pressure was still immense.

After all, in terms of individual strength, Starlight Lord was the strongest. His diminished power significantly impacted the seven working as one.

"What we need to do is hold him back."

At this moment, Wu Lan's body was incredibly large, almost as big as a Source World, shielding the other Lords from the storm! As a master of the 'Primordial Material Dao', his defensive abilities were the strongest among the seven Lords.

The pressure brought by seventy-one Ancestors was mostly borne by Wu Lan!

Of course, each Lord had their specialties, and only by joining forces could they pose such a threat to the Ancestors.

...

The change in warfare strategy slowed the offensive of the lower levels in the Innate Primordial Life Camp, but the offensives of the Ancestors became even more ferocious.

The Land of Origin.

During Luo Feng's cultivation, he suddenly sensed the formation of the cave mansion being triggered; some creature had adeptly entered his cave mansion.

"Who could break into the cave mansion without my permission?" Luo Feng immediately sent an avatar out of the Quiet Room and at a glance saw a middle-aged man in the distance. The man looked quite ordinary, but had a mark on his brow.

"I am Starlight," the middle-aged man smiled as he said.

"Luo Feng greets the Starlight Lord." Luo Feng was quite astonished and immediately bowed.

Starlight Lord stood there without any aura; if it weren't for the cave mansion formation alerting him to a cultivator's presence, Luo Feng wouldn't have sensed him at all. He seemed transcendent, beyond the entire space and time.

"To comprehend over a thousand types of world-level primordial bloodline is indeed rare," Starlight Lord smiled slightly, "With such comprehension, I suspect you are also preparing to attempt to Break Laws with Force."

"Yes, I am indeed planning on Breaking Laws with Force!" Luo Feng nodded in acknowledgment, "Senior Starlight also used this technique; can you give me some guidance?"

Looking at Luo Feng, Starlight Lord said with a smile, "Breaking Laws with Force cannot be taught. I can only say that walking this path requires enough patience."

He had endured a very long time in the past.

Luo Feng nodded.

"You intend to Break Laws with Force, it will likely take a long time," Starlight Lord smiled slightly, "I shall give you a hand by greatly accelerating the flow of time in your cave mansion's Quiet Room."

"Thank you, Senior Starlight." Luo Feng was overjoyed.

Starlight Lord nodded, and the space-time of the entire cave mansion began to twist, the space-time rules of this area were altered, drawing energy from the entire Land of Origin to perpetually maintain the time-space state here.

In just a moment, the changes in rules succeeded, ensuring long-term maintenance.

"The time flow in your cave mansion's Quiet Room has been adjusted to one billion times," Starlight Lord said, "and it cannot be increased or decreased. It is in a fixed state."

Adjusting the time flow rate is relatively more complex.

After all, adjusting from one to a million times is relatively easy.

But one billion times?

A constant state actually makes space-time more stable.

"I understand," Luo Feng said with considerable gratitude.

His greatest worry was that during the warfare, the Source World of the Land of Origin would be breached!

Now, with the time flow increased to a billion times, he had more time on his hands.

"Work hard," Starlight Lord smiled and then departed.

...

Inside the cave mansion's Quiet Room, Luo Feng noticed the difference in the flow of time and couldn't help but smile.

The time that passes here compares to the outside world as one

breath against an eternity.

"Continue comprehending the world-level primordial bloodline," Luo Feng disregarded the turbulent outside world; he knew he couldn't help at present and continued according to his original cultivation plan, meticulously studying each piece of material.

Study the materials first, understand the bloodline later, and compare them to each other.

Continuous, one piece after another.

Unintentionally, he had studied the world-level primordial bloodline thoroughly.

"2729 compatible types of world-level primordial bloodline, yet I have not comprehended them all, only 2010 types," Luo Feng thought.

These 2729 are divided into Life Category, Destruction Category, and Life and Death Combined Category.

Among them, Life Category accounted for about 87% of his comprehension.

Life and Death Combined accounted for about 95%.

Destruction Category was where he had only comprehended a little over half.

"My Life and Death Dao is primarily based on life; this direction has a deeper accumulation. My accumulation in the Destruction Category is somewhat lacking," Luo Feng thought.

Of course, it was only somewhat lacking.

Among 995 Destruction Categories, Luo Feng could comprehend 503 types of world-level primordial bloodline. It should be noted that before breaking out of the Braided Cage, only he, Starlight, and Nai Gu had comprehended over a hundred types of world-level primordial bloodline.

This clearly showed Luo Feng's profound accumulation in Destruction as well.

After all, throughout his cultivation path, he had explored all three types of bloodline equally.

...

No matter how much Luo Feng comprehended world-level primordial bloodline or Ancestor-level materials, his gains were minimal, and he faintly understood that it would be difficult to make significant gains in these bloodlines and materials.

"I can begin the next step."

"Attempt to create the 'Primordial Life and Death Dao'," Luo Feng's eyes burned with determination.

He had amassed strength over long ages, waiting for this very moment.

Chapter 400 - 10 Creating the Primordial Level Dao!

Inside the quiet room of the Cave mansion

Luo Feng sat cross-legged, first taking a Dan Pill, then eating a fruit, and finally picking up the jug beside him and gulping down a few drinks. His soul was faintly glowing, and he felt better than ever!

"For the first attempt at creating a Primordial Level Dao, my state must be good." Luo Feng was rarely this extravagant, as a single Dan Pill and fruit were worth eighty thousand Reward Points, not including the cost of the wine!

"Let's begin creating!"

Luo Feng already had a prototype of the Primordial Life and Death Dao in his mind, and now he needed to construct what he envisioned piece by piece.

The 'Eye of Life and Death' on Luo Feng's forehead opened, and under his will, numerous Secret Patterns were sketched in the void before him. These Secret Patterns naturally fused life and destruction, everything seeming as though naturally formed.

One day, two days, a hundred days, a thousand days, ten thousand days...

Luo Feng meticulously constructed the Secret Pattern Map.

"At my current speed of construction, I estimate it will take around ten eras to succeed." Luo Feng concluded.

The Primordial Level Dao is vast, on the same level as the Ancestor Level Secret Pattern Map! The number of Secret Patterns is

astronomical, sketched piece by piece, ceaselessly! Successfully sketching them would take approximately ten eras.

"It sounded great, but when actually constructing it piece by piece, many issues arose." Luo Feng occasionally paused to ponder issues and resolve them.

It's like building a highly intricate machine spanning billions of kilometers; problems at the start aren't noticeable until the construction is halfway through, when unresolvable issues surface.

Creating a 'Dao' is much the same.

Many hidden issues cannot be solved in the later stages, leaving them to be patched up and loosely integrated.

When the enormous Secret Pattern Map was finally constructed, eighteen eras had elapsed.

"It's finally done."

Luo Feng looked excitedly at the vast and floating Secret Pattern Map before him. Although very fatigued, he had ultimately constructed a complete Secret Pattern Map. This map was grand and profound, entirely on par with the Ancestor Level Secret Pattern Map.

"The first version of the Primordial Life and Death Dao, constructed over eighteen eras, is finally formed." Luo Feng gazed at the Secret Pattern Map before him, "Regrettably, there are too many flaws; I can see numerous issues at a glance."

"Nevertheless, at least the large framework was constructed. This is a framework on the same level as the Ancestor Secret Pattern Map. I've also learned many lessons from it." Luo Feng was still quite satisfied.

He believed the second creation would certainly be much stronger.

"Let's test what forming an avatar based on this Secret Pattern Map would be like." Luo Feng thought. Simply observing the Secret Pattern Map, some flaws remain undetected. But forming an avatar from it reveals numerous issues within the avatar.

The energy in the Cave mansion's quiet room was endless for the cultivators within the Braided Cage.

With a mere thought, Luo Feng rapidly began to condense a body from tremendous energy that surged to an 'energy reserve 150 billion times' beyond Luo Feng's original body.

So colossal, most of the body couldn't be well-controlled and had to transform into a Blood Sea, managed through a formation. While some parts maintained a humanoid form with a layer of cyan scales on the body, standing there exuding an indestructible aura.

Feeling this avatar, Luo Feng was of mixed feelings.

"The first version of the 'Primordial Life and Death Dao' has too many flaws, making it impossible to perfectly control the body. Most of the energy reserve could only transform into a Blood Sea. However, the condensed human form was rather robust, and the cyan scales partially resembled those of the 'Star Tower Blood Scale'."

Luo Feng felt the avatar.

Within the Braided Cage, half-Primordial Life and Death Dao can strengthen no matter how much, still within the Braided Cage. The many mysteries added to it could provide more abilities but may also be flaws.

Many Half-Primordial Enlightened tried adding mysteries, only to be superfluous. Power not only didn't increase, but also decreased.

Although Luo Feng only created the first version, this avatar was still far stronger than the original physical body.

The overall control of this body slightly decreased! But the perfectly controlled part also exceeded an energy reserve of 50 billion times, greatly enhancing the overall energy reserve! The human form's combat power massively increased!

Much stronger than the 'Half-Primordial Life and Death Dao'.

"There are too many flaws; even the mind consciousness system has issues."

Luo Feng discerned more problems with the first version of the 'Primordial Life and Death Dao' Secret Pattern Map based on the avatar's form.

"Completely tear down and start anew!"

"Begin the second attempt to create the Primordial Life and Death Dao!"

Having the experience from the first creation, Luo Feng was more meticulous the second time. He had to be extremely careful at the start of constructing the Secret Patterns because all subsequent patterns were built on these foundations.

This time required slightly less time, consuming fifteen eras to create the second version of the Primordial Life and Death Dao.

"Far stronger than last time!"

Luo Feng looked at this vast Secret Pattern Map before him. The fusion of life and destruction within the patterns had a glistening flow, even allowing Luo Feng to vaguely sense a kind of supreme power.

"Boom——"

This power subtly tempted Luo Feng's mind, drawing him in.

"I feel the highest level of power, but I'm still somewhat short." Luo Feng muttered, "My Secret Pattern Map is very close to the 'highest level power'."

Luo Feng was delighted; this time's Secret Pattern Map was still vast, so much that Luo Feng couldn't spot any obvious flaws! The vast Secret Pattern Map seemed unified.

The Ancestor Level Secret Pattern Map seemed like the origin.

Luo Feng's current Secret Pattern Map also seemed like the origin.

"I can't find any flaws from the surface." Luo Feng thought, "Even though I vaguely feel the allure of a very high-level power, clearly,

this second version of the Primordial Life and Death Dao hasn't achieved a qualitative transformation, hasn't become a 'Primordial Level Dao'."

Luo Feng was very aware of this.

Because the cultivator camp's intelligence had already been made public, according to the experiences of the previous seven Lords, once comprehending a Primordial Level Dao, the life level could directly leap to the Lord level.

But now, he still hadn't leapt out of the Braided Cage. It proved the second version was still a failure.

Even though very close to success, it was still a failure.

"Looking at the Secret Pattern Map, flaws remain unseen, so let's construct an avatar first to see."

Luo Feng attempted to construct an avatar once again.

Absorbing the energy of the cave mansion's quiet room, a humanoid clone rapidly begins to form. During the formation process, blood-red scales appear on the surface of this clone, resembling the 'Star Tower Blood Scale' to about eighty or ninety percent. As the construction progresses, the aura of this clone becomes terrifying.

"Boom～～～"

This clone naturally begins to form an invisible rule domain.

The terrifying rule domain can suppress the previous physical body of Luo Feng.

"This clone can have 19.1 billion times the energy reserve, more than before, yet perfectly controls every portion of strength."

"The mind consciousness system also completely controls every part of the clone, and the strength of spiritual will has greatly increased. With this clone, the spiritual will should have already reached the world-level primordial level," Luo Feng was astonished.

This second version is excellent.

Energy reserve is terrifying, spiritual will is robust.

"My current mind thought operating speed is several times faster than when my original body consumed numerous treasures." Luo Feng looked at the blood-colored scale armor on his body surface, which can be described as indestructible.

A thought.

The scale armor naturally extends, merging into a knife.

Luo Feng holds the knife.

"My body can transform into weapons." Luo Feng gently swings the knife in his hand, and the knife easily tears through space.

"I haven't escaped the Braided Cage yet, but this clone should be able to match high-level primordial life." Luo Feng made the judgment.

The second version of the Primordial Life and Death Dao is very close to success! Though I haven't escaped the Braided Cage, the physical body's size and power are enough to rival true high-level primordial life.

"Where are the billions of origins I planned to form within my body?" Luo Feng noticed this point, finding no origin forming within his body.

"I discovered the problem!"

"In pursuit of no defects, I weakened the power of life and destruction."

"I need to enhance these two aspects."

...

Luo Feng retained the second version of the clone this time because this clone only needs to consume some treasures, greatly enhancing the speed of thought operation, comprehension, and other aspects.

The third version is evidently more intricate, incorporating more mysteries of life and destruction.

"More perfect."

When the secret pattern map was successfully constructed, Luo Feng felt a resonance with a certain supreme-level power, and this power seemed already within reach.

The secret pattern map is vast and intricate, on par with the ancestor-level secret pattern map.

"Closer to the supreme power," Luo Feng thought, "but there's still something missing, what's missing?"

"Attempting to construct a clone."

The energy of the cave mansion's quiet room was mobilized to start constructing the third version of the clone.

In just a moment.

An enormous and towering Luo Feng figure appeared inside the quiet room of the cave mansion.

"Over 30 billion times the energy reserve was required to construct this clone." Luo Feng felt the formidable nature of this clone, with three origins within the body, "And each of the three hidden origins can accumulate 100 billion times energy."

"My mind thought operating speed is ten times stronger than the second version clone?"

"My spiritual will should count as normal world-level primordial level."

"My physical body is indestructible."

Luo Feng felt like he was a terrifying weapon, with even muscles and bones exhibiting some 'blood-colored scale' characteristics.

"Still a slight difference, just a little more to perfection. If my entire

physical structure resembles the 'blood-colored scale', my physical body would be considered immortal! The physical body would be the most terrifying weapon!"

Luo Feng sensed that a little further, and that would be the complete 'Primordial Life and Death Dao'.

By that time, I would be the eighth lord, and every part of the body would rival the 'Star Tower Blood Scale', indestructible! The whole body would be like the most terrifying weapon, annihilating everything.

"Still need to enhance the destruction feature, then the body would seem like a weapon, the presence would be more terrifying... No!"

Luo Feng suddenly had a revelation.

"Wrong!"

"I've taken the wrong path!"

Luo Feng realized the problem.

As an Enlightened One, he had no bloodline will pollution, nor memory pollution. Therefore, he could clearly recognize his issues.

"In the second version, I pursued 'no defect', making the life and death fusion more perfect. Starting then, I was going off track!"

"Continuously pursuing no defect, striving for life and destruction balance."

"Life and destruction balance, so my body currently only has three origins, instead of the billions of origins planned. At the same time, my destruction direction feature is intensifying, even the physical muscles and bones are transforming towards blood-colored scales."

"But in reality, it seems like I'm within reach of becoming a lord. Yet following the wrong path, I will never reach it," Luo Feng realized, "because my foundation 'Half Primordial Life and Death Dao' fundamentally prioritizes life."

The foundation is 'life as the priority', it's impossible to yield the fruit of 'life and destruction balance'.

The so-called within reach, it's just an illusion!

"My Dao is not the path of life and destruction balance."

"It is the extreme path, first pursuing the extreme of life."

Chapter 401: Episode 10 - 11 World-level Primordial 'Sky Wolf Guest

Chapter 401: Episode 10 Chapter 11 World-level Primordial 'Sky Wolf Guest

Beside a dark lake in the Land of Origin, the figures of seven lords sat on the ground, exchanging some information.

"Thirteen Ancestors led by the 'Inference Fire Ancestor' suddenly erupted, restraining Wulan and injuring Jin, Minghuang, and Moman." Lord Nai Gu said, "Fortunately, Yuan's formation stabilized the situation, otherwise the seven of us would have had to flee for our lives just now. Starlight, without your threat, these ancestors have become even more reckless."

"It was indeed very dangerous just now." Wulan nodded.

Though his own body was strong, the various highest level powers controlled by the ancestors were also very troublesome.

Just now, the Inference Fire Ancestor erupted.

Inference Fire Ancestor, one of the top-ranking ancestors in the Innate Primordial Life Camp, renowned and powerful, with a seat in the 'Land of Eternity', an undying and indestructible existence.

It is the absolute main battle faction of the Innate Primordial Life

Camp! Just now, it actually swallowed the immense main battle avatar of Lord Wulan in an instant, though it only restrained for a moment, Lord Wulan tore through the Inference Fire Ancestor's body and burst out, but it showed a flaw in the previous cooperation.

The Inference Fire Ancestor was torn apart, but endless flames gathered and instantly restored.

At that time, the other twelve erupting ancestors, plus dozens of other ancestors, Jin, Minghuang, and Moman, the three lords were instantly severely injured. If not for the help of the other lords, their main battle avatars might have been annihilated.

Lord on lord, no one fears.

But facing a siege, even the main battle avatar might be blown up.

"The delay strategy carries some costs." Starlight said, "I must allocate some power to assault the Innate Primordial Life Camp's army to terrify the world-level primordials, greatly slowing their conquest of the Source World. As for dealing with those ancestor levels... according to my observations of the future, as long as we listen to Yuan, we can still hold on."

"Hold on once or twice, can we last ten times or a hundred times? I know the future is uncertain." Lord Nai Gu shook his head lightly, "We can't blindly trust in observing the future."

"You're right." Starlight nodded.

"Nai Gu." Golden Lord frowned and scolded, "Your life force is stronger than many ancestors. We're not afraid, what are you afraid of?"

"I'm not afraid, I'm worried the delay strategy will fail! After all, once the seven of us lords collapse, those ancestors can attack the Pavilion Xun World Group recklessly, and the Pavilion Xun World Group might fall faster." Lord Nai Gu said, "Starlight, increase your main battle avatar power to ninety percent, the remaining ten percent to assault those world-level primordials. They are now frightened by your killings, daring to attack the Source World recklessly should be

much less. Your ten percent power should be enough to deter them."

"I agree with Nai Gu." Lord Mo Man nodded.

Starlight smiled, "My main battle avatar has already recovered to ninety percent."

Nai Gu was stunned. Jin, Minghuang, Mo Man, Yuan, and Wulan were all a bit surprised.

"It seemed so dangerous just now, and you hid your strength?" Wulan asked.

"It only appeared dangerous." Starlight smiled, "I was waiting for an opportunity, a chance to hurt them."

"Calculated back and forth, don't let the seven of us fall in the end!" Lord Nai Gu said.

Seventy-plus ancestors working together, the pressure on the lords was also great.

"Trust Starlight." Yuan said.

"Starlight, when do you predict Luo Feng will break through?" Lord Minghuang asked, and the other five lords also looked at Starlight.

"Luo Feng, by comprehending those Primordial Bloodlines, has already touched upon the mysteries of the highest level powers." Starlight smiled, "He is now trying to create the 'Primordial Level Dao', and in just several tens of eras, his second creation of Dao has already reached the 'Near Dao' level."

"Near Dao?"

"Reached 'Near Dao' so quickly?"

"When I became Master of the Source World, it took me 300 billion eras to near Dao!" Jin said, "Feeling the attraction of the highest level destructive power. It then took another 5,000 eras to truly grasp the 'Primordial Destruction Path'."

"Once near Dao, enlightenment is very certain."

"This Luo Feng being introduced here, his actual cultivation time is only 1.5 billion eras, and he's already near Dao. It's estimated it'll take a few more dozen billion eras, or at most hundreds of billion eras, to attain Dao."

These seven lords were quite expectant.

According to the Cultivator Camp's experience, once one can sense the attraction of the highest level powers, it means they are very close. Next, it is about grinding skillfully, gradually accumulating and perfecting, until finally mastering it one day.

Since it is within reach, with their talent, spending some time is sure to reach it.

"His current cave mansion is under a speed time acceleration of over a billion times. Thus, it is estimated that in just about a hundred eras... a new lord will be born." Starlight smiled gently, "By then, the situation will change."

Everyone present nodded.

Cooperation between eight lords, compared to seven, would increase overall strength by at least twenty or thirty percent.

"He cultivates the Primordial Life and Death Dao, which will greatly benefit our entire Cultivator Camp." Yuan smiled, and the other six lords were also quite expectant.

In the Infinite Primordial Space, there are quite a few who hold the highest level of power. Besides the Innate Primordial Life Camp and the Cultivator Camp, there are also other camps.

The lords had seen certain existences proficient in life direction, always longing to have such a companion!

Luo Feng was such a companion.

...

Inside a quiet room of an ordinary cave mansion in the Land of Origin.

"I have finally succeeded."

Tianlangke refined the world-level Primordial Bloodline, as his degree of comprehension had reached seventy percent, the moment it was refined into his body, it triggered the entire life's evolution, countless frost-white hairs emerged on his body's surface, turning him into a colossal creature.

The original cave mansion of Tian Lang Ke was a high-level Primordial Life cave mansion. The Quiet Room had a relatively small space-time, and the gigantic beast instantly filled the entire Quiet Room's space-time range.

Tian Lang Ke was slightly displeased but still reverted to human form.

"So what if you're a Fusion Dao Cultivator? I will become a World-level Primordial first!" Tian Lang Ke smiled.

The appearance of Luo Feng brought considerable pressure on Tian Lang Ke.

After all, for a Fusion Dao Cultivator, becoming a World-level Primordial is very easy! Once Luo Feng becomes a World-level Primordial first, then the 'Dark World Group' might directly fall under Luo Feng's command.

The Dark World Group is considered a hometown group of worlds!

If a group of worlds has two World-level Primordials, naturally, the one who breaks through first becomes the leader, which is an unspoken rule.

Tian Lang Ke still hopes to command his hometown World Group! So when Luo Feng first arrived at the Land of Origin, Tian Lang Ke exchanged for a supporting treasure, pushing forward energetically, and finally succeeded today.

"The Dark World Group will ultimately be under my command." Tian

Lang Ke was in a great mood.

If Luo Feng was faster.

Tian Lang Ke would still be stuck at the high-level Primordial Life stage and would have to be under Luo Feng's command, obliged to pay respects obediently.

Now, it's no longer necessary.

"Being a World-level Primordial is indeed different." Tian Lang Ke walked out of the Quiet Room of the cave mansion, waiting for the lord's summons.

He waited for quite a while.

"What's going on?" Tian Lang Ke was a bit puzzled. "I've become a World-level Primordial, so why hasn't the lord summoned me?"

In the rules of the Cultivator Camp, the birth of a World-level Primordial is considered a big event. The lord of the respective territory would personally summon them, arrange a position, and assign a World Group to lead.

But Tian Lang Ke broke through, yet he wasn't summoned.

"Now it's wartime, the lords might be engaged in life-and-death battles with the Ancestors, temporarily having no time for me." Tian Lang Ke speculated, smiling slightly, "I'll first visit some World-level Primordials."

Having become a World-level Primordial, naturally, one associates with others of the same level.

He wasn't worried about lacking the necessary resources, as long as he indeed became a World-level Primordial before Luo Feng, the Dark World Group would surely be under his command!

...

"This little fellow Tian Lang Ke also became a World-level Primordial?" Yuan had already known.

The Cultivator Territory is now divided into Seven Dominions, and Yuan commands one of these dominions, with the Dark World Group within its range. Naturally, Yuan will arrange for Tian Lang Ke as a World-level Primordial.

"No rush yet."

"Once Luo Feng becomes a lord, the dominions need to be redivided! And the 'Dark World Group' will become his absolute territory." Yuan thought.

This is also a rule set by the lords.

The lords' homeland world group is the lord's 'absolute territory', and how to manage it, other lords have no right to interfere. Whereas many other world groups are managed according to the entire Cultivator Camp's rules, which are jointly decided by the seven lords.

With the birth of a lord, territories need to be redivided.

Only the 'hometown world group' is not divided.

In the eyes of the seven lords, the Dark World Group is already regarded as Luo Feng's 'absolute territory'.

...

On Primordial Island, at the peak of the mountain, in Luo Feng's cave mansion Quiet Room.

"To date, attempts to create the Primordial Life and Death Dao have been made 38,291,022 times."

"Among them, over 93% have felt the allure of the highest level of power."

"It feels within reach, yet unattainable."

Since attempting to create the Primordial Life and Death Dao, a billion era times have passed. During this long age, Luo Feng has been tormented with pain. After all, each time he feels very close, each time he fails, it is naturally excruciating.

Luo Feng has tried various directions!

Starting from the 'Half Primordial Life and Death Path' as a basis, or from the 'Origin System' as the core, or the 'Spiritual Consciousness System' as the core... Luo Feng tried all sorts of creation methods over these long years.

Up till today, Luo Feng no longer knows how to try anymore.

"I've exhausted all possibilities!"

Luo Feng sat there dazedly.

Behind him stood fifteen Luo Feng avatars, these fifteen avatars had slightly different appearances, but each aura was extremely terrifying, each had touched the threshold of the 'World-level Primordial Life Form'.

These fifteen avatars were the most perfect of Luo Feng's 30 million attempts!

For these fifteen avatars, Luo Feng found no flaws.

Chapter 402 - 12 Survival Skills

"I admit, I can't find any flaws in these 'fifteen avatars'." Luo Feng nodded gently, "Let's move on to the next step."

Luo Feng had heard about how long Elder Starlight spent breaking laws with force, so he was already prepared for endless, long years. His cultivation plan also divided into many steps.

The first step is to comprehend all primordial bloodlines and materials, the second step is to create the Dao, and the third step is practice.

"Single-mindedly seeking enlightenment, I can no longer find flaws. The next step is practice!"

"The first phase of practice is to test survival ability!"

Luo Feng thought, "My Primordial Life and Death Dao focuses on life, pursuing an extremely large body, and pursuing extremely strong survival capability. So let's see how the survival capabilities of these fifteen avatars are."

In this quiet room of Luo Feng's cave mansion, the space-time scope is vast, and a grand array appears inside the quiet room.

All fifteen avatars flew into this formation.

"These fifteen avatars, each in a 'one-tenth' extreme state, in comparison with each other, it's quite fair." If these avatars were all to maintain the most extreme state, it would put a heavy burden on the soul, and Luo Feng could not maintain fifteen extreme avatars simultaneously.

Reducing each to only a 'one-tenth' extreme state made the soul much more relaxed.

"Begin imitating the attacks of innate primordial life." Luo Feng spoke, "Gradually increase the strength from high-level primordial life, attacking these fifteen avatars with the same intensity."

"Cultivator Luo Feng, the attack strength will start from the 'early stage of high-level primordial life' level." A gentle voice sounded.

Then, deep blue flames appeared out of thin air within this vast formation, burning each avatar.

With the capabilities of the Land of Origin, it can easily maintain power at the world-level primordial perfection level. As the power continues to climb, the Land of Origin can still manage it. But that would require a huge amount of reward points.

The fifteen Luo Feng avatars, each sitting cross-legged, felt relaxed as the deep blue flames burned them.

Later, the deep blue flames suddenly turned into deep blue frost, extremely cold permeating each avatar, while the space vibrated slightly, countless spatial blades enveloped the avatars...

Various attacks descended, and these fifteen avatars remained unscathed.

The power increased to the 'mid-stage' level of high-level primordial life." The gentle voice sounded.

"The power increased to the 'late-stage' level of high-level primordial life."

...

The power level gradually increased.

Some damage began to appear on parts of the avatar surfaces, but slight damage was instantly repaired under their immense life force.

The power level increased to the 'early stage' of the world-level primordial.

A wave of fluctuations covered the fifteen avatars within the entire

formation, resulting in a qualitative transformation of power from high-level primordial perfection to the 'early stage of world-level primordial'! The previously more relaxed fifteen avatars were severely injured.

"Hua～～"

The most severely affected avatar, with silver white scales on its surface, had all these silver white scales shattered under an invisible fluctuation. The covered layers of skin, flesh, and fascia quickly disintegrated and vanished, leaving only the black-gold colored bones resisting.

This avatar had only a framework left, and the skeletal force still protected hundreds of origins within.

As the might gradually increased, the skeleton started to crack, and the origins began to disintegrate.

Only a few moments passed.

The skeleton completely turned to powder, all the origins vanished, and only fourteen avatars remained inside the formation.

"Avatar number two is the first to disintegrate." Luo Feng was very pleased to see this scene, "Its mind consciousness system route was wrong!"

Although it wasn't apparent before, under this attack and by comparing the state of the fifteen avatars, Luo Feng immediately realized the significant route error of the second avatar!

"In pursuit of an extremely large physical body, I reduced the strength of the mind consciousness commander. But the result was that while the body grew larger, the protective ability of the flesh and bones weakened."

The mind consciousness system pursues perfect control over each portion of power consciousness. As the body grows larger, the demand on the mind consciousness system increases.

Luo Feng's second avatar's thought process was to slightly reduce the

demands.

Lowering the degree of mind consciousness control allows for a more 'rough' control over a significantly larger body. But the result is... against attacks of the same level, the larger, but rougher controlled, body was the first to collapse.

"Boom—"

Aside from the terrifying fluctuations within the formation, frost aura began to appear, intending to freeze each of Luo Feng's avatars, while the terrifying fluctuations tried to vibrate and tear apart every bit of body strength.

The remaining avatars' injuries quickly became severe.

"Avatar number nine is not going to hold on." Luo Feng carefully assessed.

Avatar number nine was entirely covered with deep green scale armor, incredibly tough, and in the face of the terrifying ice and frost, the armor only showed slight cracks. However, the muscles and bones inside this avatar had already begun to disintegrate and vanish.

Though the surface scale armor was strong, the inside was weak, and the origins began to vanish as well.

"For this ninth avatar, I used the 'dual parallel' creation concept. I really liked the 'immortal' effect of the Star Tower blood scale. So for this avatar, I simultaneously used the origin system and blood scale system as two core elements, yet the result was weakened survival ability. It was the second to disintegrate among the fifteen avatars."

As time passed, under the increasing power of the world-level primordial early stage, with the power strengthening, one avatar after another disintegrated.

"Of the fifteen avatars, three were created with the dual parallel concept, and all of them have now disintegrated."

"This shows that the dual parallel route is wrong. Wanting both results in neither being strong enough."

...

The power slowly increased, and one avatar after another fell apart.

"The power has risen to the 'mid-phase' of world-level Primordial," the gentle voice echoed again.

At this moment, the power within the formation was terrifyingly extreme; ordinary high-level Primordial lifeforms would turn to dust upon entering. Even newly ascended world-level Primordial beings, whose dharma weren't yet perfected, wouldn't last long inside the formation.

At this moment, Luo Feng still had three avatars resisting.

The earlier twelve avatars had all collapsed during the primordial early stage of the world level, allowing Luo Feng to identify each of their flaws and gain great insights.

"Boom—"

The space within the formation was already distorted, with strands of black flames burning everywhere, and toxic mist covering the skin, muscles, and bones of Luo Feng's three avatars, making the situation extremely dire for each.

Among these three avatars, one was the seventh avatar, the smallest of the fifteen avatars. Despite its small size, its entire body was like a weapon, still persisting.

Another was the twelfth avatar, the largest of the fifteen, whose whole body resisted the attacks under the control of the mind consciousness system.

The last one was the eleventh avatar, slightly smaller than the twelfth.

This meant that out of the fifteen avatars, the two largest and the smallest held out the longest.

"This eleventh avatar..." Luo Feng was shocked, "I pursued a larger physical body and adopted the same approach as the second avatar,

reducing the control of the mind consciousness system. The second avatar was the first to be eliminated, but the eleventh one has persisted until now!"

Boom—

The physical bodies of the three avatars completely collapsed almost simultaneously.

During the collapse, the first two avatars disintegrated entirely, leaving nothing behind.

Only the eleventh avatar, had ten thousand origins still suspended despite its physical body being obliterated.

Under this terrifying assault, these 'ten thousand origins' intertwined like a star array, collectively resisting external attacks. These origins had a stronger resistance to external assaults than the previous flesh and bones.

"This eleventh avatar, its origin has a stronger survival capability than the physical body?" Luo Feng stared at the ten thousand origins in shock and delight.

This was an extraordinary scenario.

Lifeforms like the innate primordial beings always had physical bodies far stronger than their life cores! Once the physical body couldn't withstand, the life core too would easily be breached.

Yet his eleventh avatar's physical body disintegrated, while the ten thousand origins still endured!

The power continued to ascend, with various thunders striking down.

The thunderstruck down wrathfully, causing the ten thousand origins to begin disintegrating, but the others still resisted.

Each origin's 'survival ability' was formidable, stubbornly supporting for over a hundred breaths of time, but as their numbers dwindled, the disintegration accelerated, eventually leading to complete obliteration.

"Hahaha..."

Outside the formation, Luo Feng was ecstatic, "I understand, I understand!"

"The eleventh avatar adopted 'reduced mind consciousness system control', an enormous mistake! It weakened the physical body's defense. Yet it had a tremendous advantage."

"It was created using the 'Origin Core Creation Method', producing the most perfect version."

"In creating the Primordial Life and Death Dao, I always thought starting with the 'Half Primordial Life and Death Path' as the seed, constructing step by step, like building a house starting with the foundation, was the correct approach. Yet with the eleventh avatar, I constructed the 'Origin System' first, then built other systems around it, entirely ignoring the 'Half Primordial Life and Death Path'."

"Haha, this is correct."

"This suits me best."

Luo Feng fully understood.

"For the ultimate 'Primordial Life and Death Dao', there's only one core: the Origin Core! Everything revolves around it, constructing the Dao."

"As for the Half Primordial Life and Death Path, all my insights and mysteries stem from it. It's inherently a seed that, within my mind, has already blossomed into letting me comprehend the six major systems."

The six major systems all originate from the Half Primordial Life and Death Path.

When building the Dao, there's no need to rigidly start with it; starting with it might even be restrictive.

"The Dao has a core."

"Origin is the core, everything else revolves around it."

"Begin."

Having absorbed the experiences of the fifteen avatars, with successful achievements and lessons from failures, Luo Feng was confident he could create a more perfect version of the Primordial Life and Death Dao.

Luo Feng first constructed the three longest-lasting avatars, using their advantages to significantly enhance spiritual thought processing speed and comprehension. Then, starting to create the Dao.

"Hoo."

A secret pattern was etched in the Void, this time, Luo Feng started by constructing the Origin System.

——

Coming up tomorrow, Lord Luo is about to be born!

Chapter 403 - 13: Primordial Life and Death Dao

Luo Feng's origin system is still different from the Ancestors' 'life core'.

The Ancestors' life core is born inherently. With evolution, the life core advances step by step. The life core encompasses the mysteries of many Daos, endless energy, and even the soul! Therefore, once the life core shatters, the Ancestors must perish.

The Lords, clearly without fatal weaknesses, naturally Luo Feng would not create a fatal flaw for himself. After comprehending the mysteries of the origin, he created the origin system most suited for himself.

Luo Feng's origin does not encompass the soul! It merely accumulates endless energy! It does not have the capability to evolve, nor does it contain a soul. It's a simplified version of the 'life core'.

In terms of a single origin, it is far inferior to the Ancestors' life core. But if there were billions of origins... the thickness of life power would far exceed those Ancestors.

"Strip away weakness, extract strengths, grasp the essence."

"With the Primordial as the foundation, the mind as the guide, life and death interweaved, transforming into the origin."

The billions of origins themselves cannot evolve.

Luo Feng doesn't need them!

As a Cultivator, their strength lies in penetrating the essence of power!

Dao is immortal, then the Lord is undying and undying.

"This time, it is far more perfect than the previous fifteen avatars. It should definitely advance further toward the 'primordial life and death Dao'." Luo Feng, despite failing tens of millions of times, does not believe that he will succeed this time.

But as long as he can make progress, success is getting closer and closer.

…

Land of Origin.

"Brother Tianlang can break through from high-level primordial life to world-level primordial, and even comprehend the bloodline to break through, truly remarkable!" Three figures gathered together, drinking and chatting, a man with curved horns sighed and said.

"It's also luck, just happening to encounter a primordial bloodline exceptionally suited to me." Tianlang humbly said, remaining modest in front of world-level primordial beings, for he knew this was probably his limit.

"Comprehending world-level primordial bloodline over seventy percent, Brother Tianlang has a profound foundation, with prospects to achieve world-level primordial perfection." Another elder with a red nose praised.

Tianlang smiled faintly.

He always pursued comprehension of the bloodline over seventy percent, just for the hope of reaching world-level primordial perfection. Of course, this was also his limit.

It was heard that those Fusion Dao Cultivators, before jumping out of the braided cage, even with such low mental operation speed and comprehension, comprehended multiple world-level primordial bloodlines! The potential for comprehension is far stronger than Tianlang.

Those Fusion Dao Cultivators, when walking the bloodline path,

except for the 'Lord Nai Gu', could not become Lords.

Tianlang, who cultivated from high-level primordial, saw no hope of becoming a Lord.

"Brother Tianlang is the 186th world-level primordial along the bloodline path." The man with curved horns said, "The bloodline path has also birthed 'Lord Nai Gu'. We might create miracles, and a Lord will emerge."

"Brother Guang Yu, you have high talent, you might have a chance. I have no thoughts at all." The elder with a red nose chuckled and said, "I dug deep into the bloodline potential to become a world-level primordial. As for Lord, I dare not even think."

"I dare not think either." Tianlang said, "Brother Guang Yu, you are a Fusion Dao Cultivator, your talent is far superior to ours."

The man with curved horns chuckled.

Before jumping out of the braided cage, he comprehended five types of world-level primordial bloodlines. After becoming a world-level primordial, the immense life level elevation allowed him to easily comprehend hundreds of world-level primordial bloodlines. This is quite a common standard among Fusion Dao Cultivators.

Like Lord Nai Gu, Starlight Lord, in the weak state before jumping out of the braided cage, could comprehend hundreds of world-level primordial bloodlines, proving terrifying comprehension potential.

"Brother Tianlang, after becoming world-level primordial for several epochs, has Lord Yuan never summoned you?" The man with curved horns asked.

"No." Tianlang also felt somewhat uneasy.

"The Lords have countless avatars, long-term stationed avatars at the Land of Origin." The man with curved horns pondered, "Even if they are out fighting, it still does not affect them inviting some juniors, nor affect them handling some ordinary affairs. The emergence of new world-level primordial life is quite an important event, why has it been delayed and not addressed?"

"The Lords naturally have their arrangements, we need not worry." The elder with a red nose smiled and said, "We just need to follow the Lord's arrangements."

The man with curved horns was slightly taken aback, then smiled: "Yes, follow the Lord's arrangements."

Tianlang nodded.

As a newly promoted world-level primordial, yet always unarranged, his heart was always suspended.

…

Land of Origin, beside the dark lake.

Seven Lords gathered here, waiting patiently, waiting for the 'turning point' of this war to appear, waiting for their future companion to appear.

"Hmm?"

Yuan, Jin, Wu Lan, Ming Huang, Nai Gu, Starlight, Mo Man, seven Lords simultaneously looked toward the Primordial Island.

"A breakthrough?" Yuan's eyes filled with unconcealable joy, having walked all the way from the weakest period of the Cultivator camp, at that time, the entire Cultivator camp was food for the Innate Primordial Life camp, he could only shelter a small area by himself, step by step to today, every birth of a Lord made Yuan happy.

Luo Feng's arrival represents another powerful existence in their Cultivator camp.

"Wonderful!" Jin laughed, the face with silver scales originally cold now displayed a radiant smile, "Since being received to date, the actual time of seclusion is just over twenty-five epochs, yet he has already broken through. Starlight, he is much faster than you."

"Fast is good, fast is good."

Starlight smiled and praised, "He just became a Lord and is still quite

immature, but as a Lord of 'primordial life and death Dao', the path he follows is destined to adept at frontal combat than me."

Starlight exists across past, present, and future countless timelines, aiding the Cultivator camp significantly in space-time, his assassination also poses a headache for the Innate Primordial Life camp.

But frontal combat! Requires a sufficiently powerful life form, sufficiently terrifying attack!

"He actually broke laws with force," Wulan sighed, "just like the Starlight."

"Yes, break laws with force."

Ming Huang, Nai Gu, and Mo Man were all emotionally stirred.

As Lords, they understand the significance of breaking laws with force!

Aside from the Starlight Lord, the other six... all first became world-level primordial life forms, and only then, leveraging their cognitive, observational, and comprehension advantages at this life level, comprehended the Dao of the primordial level.

However, those who break laws with force, are the weak beings under the braided cage, forcibly comprehending the supreme Dao of the primordial level.

What kind of comprehension is this?

Once they become a Lord! After a massive leap in life level, their cognitive, observational, and comprehension abilities reach new levels, and their strength has the potential to further improve.

Lords indeed grasp the essence of the highest level of power.

But there still lies a difference in strength; the Starlight Lord has taken that step! The oldest cultivator, 'Yuan,' has taken half a step forward as well.

In their view, they believe that Luo Feng, who breaks laws with force, will also take that step!

"The Land of Origin itself is special, and after being refined and arranged by us seven Lords into a formation, and hidden in this time and space, everything here is completely concealed," said Lord Nai Gu. "But once Luo Feng's avatar from his home tries to breakthrough, it will be discovered by the outside world."

"Rest assured, I have locked the time-space of the quiet room in the cave mansion where Luo Feng is in retreat. At the moment Luo Feng fully breaks through, I will immediately alert him," said Starlight.

Other Lords nodded in agreement.

"Luo Feng's breakthrough must remain confidential," Yuan said, "Only then can we achieve a successful surprise attack."

"We've got to deal a hard blow to those Ancestors! Make them pay a sufficient price," Jin's eyes bore a killing intent.

"This is the war with the greatest losses we've ever faced. Numerous world clusters have fallen, countless creatures have perished," Ming Huang's eyes flickered with golden thunder, "Those Ancestors must suffer a heavy price!"

The birth of a new Lord must remain confidential.

If Luo Feng is exposed, those Ancestors might temporarily retreat. Even if they don't, as long as they're mentally prepared and ready to withhold power to counter the ambush, the effectiveness of the ambush would be greatly diminished.

"First, wait for Luo Feng's full breakthrough," Yuan said.

At the moment, the seven Lords are all watching the quiet room in the cave mansion atop the peak of a mountain on Primordial Island.

...

Luo Feng absorbed the experience and lessons of his previous fifteen avatars. In this attempt to create the 'Primordial Life and Death Dao,'

Luo Feng was prepared for failure and also prepared to endure through long ages.

But what astonished Luo Feng was—

This time, in creating the Primordial Life and Death Dao, when it was more than halfway complete, visions began to appear.

Wisps of deep cyan power emerged around the secret pattern map. These wisps of deep cyan power circled the secret pattern map, flowing as the secret patterns did. Luo Feng could sense that these deep cyan powers were some kind of highest level power.

"Dao is power."

Luo Feng could perceive this process.

Primordial Force is the most basic power existing in the infinite primordial space. But this power, drawn by the mostly formed 'Dao,' was naturally transformed, becoming the highest level power.

"A Dao more than half-formed already becomes the highest level of power," Luo Feng understood he was on the right path this time, and he had completed the most crucial core part by himself.

"Walking ninety miles, still ten miles off."

"At this point, putting forth all efforts is more critical."

Luo Feng continued to perfect the Primordial Life and Death Dao, integrating secret patterns one by one into it. The vast secret pattern map bore cyan, black, and deep cyan secret patterns. In the outer regions of the secret pattern map, cyan and black secret patterns wove together.

The deeper he went, the more the two-colored secret patterns gradually merged, finally into one, turning into deep cyan secret patterns that formed the origin.

As the spiritual consciousness system finally completed, the entire secret pattern map shimmered with a faint golden light.

With the last step, the physical body system was completed, and the secret pattern map lit up with a faint blood light, somewhat resembling the Star Tower Blood Scale.

"Boom——"

A massive, perfect secret pattern map emerged.

Luo Feng gazed at it; it was the culmination of his endless efforts, his comprehension of the most perfect Dao! At the moment of its achievement, Luo Feng felt… his life continued through the 'Dao.'

In the past, Luo Feng needed to rely on avatars to survive.

Now, though, Dao is also a part of his life.

He could exist through the 'Dao'; wherever the Dao was, he was. He could cast down avatars in vast and boundless areas, small as they were. Those avatars could absorb energy and grow.

"Finally, I have created the Primordial Life and Death Dao," Luo Feng was emotionally stirred, looking at the secret pattern map glimmering with various hues before him, with a thought, the secret pattern map vanished without a trace.

Dao can be tangibly manifest or completely invisible.

"I finally did it."

Real secluded retreat time just over 2.5 billion eras, and he succeeded! The external elapsed time was less than two thousand eras, and in such a brief time, the war situation hadn't changed much. The Source World of the Land of Origin was still intact.

"Luo Feng, congratulations on taking this step," Starlight Lord's voice sounded in Luo Feng's ear.

Chapter 404: Episode 10 - 14 Lord Luo Feng

Chapter 404: Episode 10 Chapter 14 Lord Luo Feng

Luo Feng created the Primordial Life and Death Dao. Although his life form hasn't mutated yet, the 'Dao' is also part of his life, and he is completely different from before! Relying on his own 'Dao', Luo Feng could sense a spacetime fluctuation coming through.

That spacetime fluctuation made him feel threatened.

In the past, when facing the Starlight Lord, Luo Feng couldn't even detect the other's aura. But now, he could clearly sense the threat, and they were already beings on the same level.

"Luo Feng, you should know, in the past years, more than one-sixth of our practitioner camp's territory has fallen! A vast amount of source worlds and ordinary worlds have been breached, countless cultivator lives extinguished!" The voice of the Starlight Lord continued, "Every one of us lords wants the Innate Primordial Life Camp to pay a sufficient price."

More than one-sixth of the territory, how many creatures died? Even the lords couldn't count!

"The main battle avatars of our seven lords are fighting against seventy-three ancestors!" The Starlight Lord transmitted, "Currently, the outside world does not know of the birth of the eighth lord."

"You must keep it a secret! All avatars outside the Land of Origin

must not break through. Once they break through, they are easily detected by some ancestors of the Innate Primordial Life Camp. The Land of Origin is special; breaking through here, they won't discover it," stated the Starlight Lord.

As the last stronghold of the practitioner camp, the lords have expended countless efforts to isolate all spying.

"I understand, I will keep it a secret," Luo Feng said.

A concealed blade can make the ancestors pay a painful price. If he exposes himself, every ancestor will be wary.

Luo Feng very much wanted to deliver a fierce blow to these ancestors!

"You break through first, we'll discuss more after you're done," the Starlight Lord did not disturb further.

...

In the quiet room of the cave mansion, all of Luo Feng's avatars dispersed, and various energies began to gather under his spiritual consciousness, further devouring the vast energy continuously provided by the quiet room of the cave mansion.

The energy supplied by the Land of Origin was vast! In a mere breath, it was enough to supply the energy of a 'World Level Primordial Perfection Life Form'.

At this moment, Luo Feng was wantonly devouring, and more than ninety percent of the energy from the Land of Origin was prioritized for Luo Feng, letting him absorb it.

In a moment, dark green sources floated within the cave mansion, with a count totaling one billion eighty million.

One billion eighty million sources, like a Star Array, interlinked as one!

This was also the core of Luo Feng's physical body.

"Boom——"

The power from the Land of Origin surged into those one billion eighty million sources like a substantial flood.

Continuously pouring in! These one billion eighty million sources seemed bottomless, absorbing ceaselessly.

At the same time, using these hundreds of millions of sources as the core, countless strands began to extend, either dark green strands spreading and growing to form flesh, or golden strands integrating into every part of the body, or blood-red strands extending...

A massive black-robed, black-haired man's body was forming.

The man's skin, fascia, bones, and flesh were permeated with countless 'blood-red strands'. This blood-red strand was Luo Feng's achievement in the Star Tower Blood Scale, its influence on Luo Feng was profound!

Luo Feng also understood that merely having strong protective scale armor on the surface meant little! At the lord level, attacks make no distinction between inside and outside; internal weaknesses become fatal.

Thus, Luo Feng deciphered many mysteries from the 'Star Tower Blood Scale' and perfectly combined them with his physical body system, creating this blood-red strand. In reality, these blood-red strands were another form of 'blood scale', but covering every part of the body, this blood-red strand system also made Luo Feng's blood red.

With the Primordial Life and Death Dao, Luo Feng's blood should be dark green.

It was precisely due to the additional blood-red strand system that the color of his blood, muscles, and bones changed.

"My skin and fascia, I estimate, only have one-tenth of the defensive strength of the Star Tower Blood Scale, not considered immortal."

"But every part of my body is of such toughness."

"The entire body has no weak points!"

This body's size continued to grow.

"Still within the scope of my spiritual consciousness system's control, grow, grow, grow, keep growing." Luo Feng absorbed the energy fully, converting it into a gigantic physical body.

The quiet room of the cave mansion was too small, Luo Feng couldn't even stand, he could only sit cross-legged.

Sitting cross-legged, he almost occupied the entire quiet room spacetime.

He could only compress his size, but in reality, the physical body continued to grow.

...

In the Land of Origin, seven lords constantly monitored Luo Feng's breakthrough situation.

"He is still absorbing energy to the maximum extent." Jin couldn't help but say, "The energy his current physical body is absorbing has already surpassed me."

"His Primordial Life and Death Dao is primarily based on life." Yuan laughed, "It is foreseeable that his body will far exceed ours, only 'Lord Wulan' could compare to him."

"Comparable to Lord Wulan?" Ming Huang gently shook his head, "The size is just too big."

Lord Wulan's body was equivalent to a normal source world!

In a normal source world, most of the internal area is void! Yet Lord Wulan's was a super large material body! The material of his body, still at the lord level, was tough and hard to annihilate. Far beyond comparison with soil, rocks, and such materials in a source world.

Lord Wulan's kind of body might get injured in the Infinite Primordial Space, but even if attacked by more than seventy

ancestors, they'd only manage to hold him down, unwilling to expend too much effort on him.

In the Infinite Primordial Space, there were also several with abnormal defensive capabilities.

There are those with stronger defenses than Lord Wulan! For instance, the Ancestor-level being 'Origin', an Ancestor-level entity in the form of a perfect sphere, representing the pinnacle of the 'Defense Dao' of the entire Infinite Primordial Space.

Of course, both Lord Wulan and the Ancestor 'Origin' share a common weakness: they're somewhat lacking in offense. Their methods, at the same level, appear clumsy, with many moves failing to hit the enemy.

"The energy he absorbed has surpassed mine," said Lord Nai Gu.

"It's about one-tenth of mine," Wulan remarked from afar, observing, with a massive physical body almost the size of the Source World, naturally holding a vast amount of energy. Of the seven lords, Lord Nai Gu, with the second-largest body, had only one-tenth of his energy.

As the seven lords watched, Luo Feng continued to absorb energy, seemingly like a bottomless abyss, continuously devouring it.

"He's reached fifty percent of mine," Wulan exclaimed in shock.

"He's reached eighty percent of Wulan's!" Jin shouted in surprise, "How can he absorb so much energy?"

Yuan watched from afar and couldn't help but say, "He's already caught up with Wulan. And he's still absorbing energy?"

"More than Wulan, and a lot more," Starlight also observed.

Ming Huang laughed, "Looks like there's another indestructible fellow."

Previously, among the seven of them, only Wulan dared to let the enemy attack freely. Now, from the vast amount of energy Luo Feng

absorbed, it was apparent that he was also extremely resilient.

"The stronger his survival capabilities, the weaker his offense will be," remarked Lord Mo Man, frowning.

The other lords nodded in agreement.

They all wielded the 'Dao' of the highest level of power, and among beings of the same level, the differences were minimal.

Each lord had their own strengths!

Like Wulan, who was terrifyingly strong in defense.

Like Jin and Mo Man, who were unbelievably strong in offense.

Yuan was most skilled in formations! He could multiply the combined strength of the seven lords by several times. Yuan was also the most important lord in group warfare!

"His path leans towards life," Yuan said, "While the Life Path has its offensive means, it ultimately falls short."

"Luo Feng breaks laws with force," Starlight laughed, "He's a bit immature now, but in the future, he will overcome this weakness."

The lords present all agreed.

Breaking laws with force indeed had greater potential.

"Once he breaks through, we will understand his techniques in detail and decide how to cooperate," Yuan said.

"He's absorbed so much energy," Jin couldn't help but shake his head. Among the lords, his physical energy was almost at the lowest, with only Lord Mo Man being weaker.

"He finally stopped, having absorbed more than triple mine?" Even Wulan was somewhat amazed.

"With so much energy, letting the enemy deplete it would be very difficult," Mo Man sighed, "If only I had one-tenth of his energy."

Lord Mo Man, as the lord with the least energy, had only one-thirtieth of Lord Wulan's energy, which was approximately one percent of Luo Feng's.

From another perspective, his offensive methods were extremely terrifying, leaving the Ancestors unable to escape his techniques.

...

Inside the quiet room of the cave mansion.

A man in black clothes and black hair returned to his normal size, with a terrifying domain naturally spreading out from him as the center.

Just like the 'Source World Origin' having a supreme rule operation system.

Luo Feng's body was even more terrifying than the Source World Origin. His 'Life and Death Operation System' naturally influenced all directions, in the vast area where his main avatar was present, even world-level primordial lives would perish under the 'Life and Death Operation System'.

"Finally absorbed to the brim." Luo Feng felt the billion and eight million origins within him reaching full capacity, a sense of satisfaction welling up within him.

His physical body, though enormous, had already grown to its limit.

Only with a billion and eight million origins could it carry such a vast amount of energy, allowing him to absorb until now.

"My physical body, though immense, contains energy ten times greater than the energy contained within the billion and eight million origins!" Luo Feng easily determined the energy within the myriad origins.

"If my full physical form were revealed, it would be about one-third of my hometown's Source World," Luo Feng assessed.

With a physical form one-third the size of his hometown's Source

World, every part of his body had the toughness of one-tenth of the Star Tower Blood Scale, all comprised of such high-level flesh, the strength of his body was conceivable, every movement carrying overwhelming force.

"Thorough breakthrough achieved."

The complete evolution of his life form, he truly grasped the great power of a lord level.

Luo Feng felt his current strength, a single breath could reduce a world-level Primordial to ashes.

"Luo Feng, these are the 'Dao' of us seven lords, along with all the intelligence we've gathered on Ancestor-level entities of the Infinite Primordial Space. Understand it first, and then hurry to create combat techniques that suit you," Starlight Lord's voice echoed.

Simultaneously, a flow of information arrived.

Luo Feng received it with a single thought.

Having just become a lord, he'd soon be on the battlefield, facing over seventy Ancestors! Luo Feng felt the pressure.

Chapter 405 15: The Path of 7 Lords

This information stream contains numerous commonalities that the Lords ought to know.

"A Lord-level cave mansion has already been prepared for me?" Luo Feng learned about the structure of the Land of Origin, secret areas, formation composition, and routes in and out from the information stream.

Every Lord occupies a vast cave mansion, holding their ground at a location.

Luo Feng's cave mansion was situated at one of the formation nodes, and his arrival could make the formation of the Land of Origin more stable.

"Whew."

Luo Feng's thoughts swept across the entire Land of Origin, connecting with the other seven Lords, 200-plus World-level Primordials, over 80 million High-level Primordials, and some Cultivators within the Braided Cage.

Only the other seven Lords could perceive Luo Feng's thoughts.

"Luo Feng, congratulations on becoming the eighth Lord of our Cultivator Camp." Yuan was full of joy, "This war will see a turnaround because of you, and the fate of the entire Cultivator Territory will change because of you!"

"First, quickly grasp the vast information and comprehend your combat technique! Afterwards, we will study how to coordinate together." Jin urged, having been stifled for too long, now just

waiting for Luo Feng to join in for the counterattack.

"Brother Luo Feng, the life energy you possess surpasses mine by far." Lord Wulan was also gratified; when the Lords made group efforts, it was mainly him enduring the brunt. However, the Ancestors too wielded the highest level power, with unpredictable methods! Even with Yuan's formation assistance, he could only barely hold off most of them. Now, with Luo Feng, it became much easier, and they could support each other.

"Luo Feng, congratulations." Ming Huang was the most indirect.

"Brother Luo Feng, having you and Wulan here makes future confrontations with the Innate Primordial Life Camp much more relaxed for our Cultivator Camp. You both are sufficient to stabilize the situation." Lord Nai Gu was in high spirits; he had been pessimistic before but was now quite optimistic.

A defensively formidable Lord Wulan, combined with Luo Feng, whose energy exceeded that of Lord Wulan by more than triple, would make group confrontations much simpler for the other Lords, who were physically weaker.

Like last time, merely with Lord Wulan being held back, under the furious assault by the multitude of Ancestors, Jin, Ming Huang, and Mo Man's main battle avatars were almost blown apart. Similar perilous situations frequently occurred.

Lord Nai Gu had had enough of this sense of danger and wanted more safety!

"Brother Luo Feng, I've long anticipated your appearance." Lord Mo Man was quite pleased; they all knew Luo Feng was a Lord who specialized in the 'Life' Path, employing the Power Breaking Technique.

Life, what does it signify? Everyone understands.

Everyone hopes to have a companion proficient in the Life Path!

"Everyone, I'll first study the combat technique." Luo Feng responded to these seven companions.

He knew that in future years, these seven Lords would be his most trustworthy companions in the Infinite Primordial Space! All forming the most robust protection force for the entire Cultivator Camp.

...

Luo Feng took a step and arrived at a vast cave mansion, which occupied an immense landmass of ocean in the Land of Origin, covering about one percent of the entire area.

Based on the foundation of the Land of Origin, this expansive cave mansion had layers upon layers of time and space opened within it, cumulatively surpassing the size of a Source World.

Sigh.

Luo Feng now sat cross-legged at the center of this vast time and space.

"First, understand the seven Lords."

Having no experience with the level of confrontation between Lords and Ancestors, Luo Feng naturally needed to first thoroughly understand it.

His current rate of thought was unknowably faster than before, and just from probing, he comprehended the 'Daos' created by the seven Lords, their combat techniques, and some of their cultivation experiences.

"Jin, what he created is the 'Primordial Destruction Dao.' According to his own description, his Primordial Destruction Dao is nine parts Destruction, one part Life. Because pure Destruction makes it difficult to construct life forms, it requires a touch of life mystery to be infused."

"The 'Sky Splitting Saber' that I exchanged for also, is roughly nine parts Destruction, one part Life." Luo Feng flipped his hand to take out the Sky Splitting Saber, which now posed no pressure to him.

"Jin's path and the Sky Splitting Saber's path are very similar; I wonder if there is any connection." Luo Feng contemplated.

Holding the Sky Splitting Saber, he could remotely sense a place filled with endless destruction energy, a place so vast and unfathomable even to his current power. There, thousands upon thousands of weapons were gestating, each indestructible, suitable as Lord-level weapons.

"The Sky Splitting Saber contains the highest level of Destruction mysteries and can serve as a lord's weapon." Luo Feng now confirmed this point, "And this type of weapon, there seem to be thousands and thousands in that Mysterious Land I can sense?"

"This place must harbor numerous secrets. I'll explore and study it well after the war." Luo Feng was very interested in this, believing the other Lords should have intelligence on this Mysterious Land.

However, the current most urgent matter is the war, and Luo Feng's primary understanding pertained to intelligence on the Lords and Ancestors and some common knowledge.

More vast information can be slowly studied when there's free time.

"Having become a Lord allows for a stronger sensing of the Infinite Primordial Space, including encountering many unknowns." Luo Feng could sense that the Infinite Primordial Space had some terrifying mysterious places, unshielded and some giving him a strong sense of threat.

Before becoming a Lord, Luo Feng knew of the 'Infinite World' nurtured by the 'Infinite Great Serpent Clan,' through which one could instantly appear in any part of the Infinite Primordial Space.

Chapter 406: Episode 10 - 15 The Path of 7 Lords_2

Chapter 406: Episode 10 Chapter 15 The Path of 7 Lords_2

The Land of Origin is occupied by the Cultivator Camp.

The mysterious land that nurtured the Sky Splitting Saber...

"There are many similar mysterious lands. We'll explore them slowly in the future."

"Lord Wulan cultivates the Primordial Material Dao, but actually it's nine parts matter and one part infinity combined! Because pure matter has relatively weaker defense, it needs to be combined with certain infinite mysteries to convert material energy. According to Wulan's judgment, if he can fuse more infinite mysteries, his techniques will be much more flexible and not so clumsy."

The information Luo Feng received includes the complete 'Dao' of Wulan, a full description of the inheritance.

It's not something that can be learned!

Each Lord's Dao contains their own spiritual will. At most, one can borrow a few insights.

"Ming Huang, Primordial Thunder Dao, eight parts thunder, two parts water Dao."

"Only 'Lord Mo Man' is the purest extreme, his Dao is purely the 'Primordial Fluctuation Dao.'" Luo Feng was surprised after

understanding this.

Among all eight Lords, only Lord Mo Man is the purest.

His body, in essence, is a single 'fluctuation,' and he is the smallest in physique among the eight Lords, and his energy reserve is also the lowest.

"Is it really this crazy?"

After learning about Lord Mo Man, Luo Feng realized that Lord Mo Man was the first to achieve the Master of the Source World by the 'Faith Path'! His voice can make countless creatures submit, and he has also pioneered the pure Primordial Fluctuation Dao.

This path is strongly damaging to the Ancestors, unknowingly penetrating deep within their bodies; the longer they battle him, the more their injuries accumulate.

"Lord Nai Gu and Yuan's paths are somewhat similar."

Luo Feng noticed this point.

"Lord Nai Gu follows the Primordial Bloodline Dao! It requires absorbing Ancestor-level bloodlines, each one is very special, completely mastering them is extremely difficult. With every Ancestor-level bloodline mastered, Nai Gu becomes stronger, theoretically he can continue to strengthen endlessly."

"Senior Yuan, Primordial Rule Operation Dao."

Yuan has comprehended the most 'Dao' in the Cultivator Camp; he has understood many paths. He initially penetrated the perfect operation of nine paths, realizing the 'Rule Operation System,' and thereby becoming a Lord.

"Other Lords each have their specialties, but Senior Yuan can cultivate multiple Daos. Although each Dao is merely the complete Great Dao at the 'God King Ultimate Realm Stage,' Senior Yuan has already comprehended 25 Great Dao."

The perfect operation of nine Great Dao is the 'Primordial Rule

Operation Dao,' making Yuan a Lord.

As he comprehends more Dao, they further integrate into the 'Primordial Rule Operation System,' enhancing his power. Without considering Starlight Lord, Yuan's current strength is clearly a step above the other Lords.

"Nai Gu, Yuan, their paths are unusual, continuously accumulating and enhancing."

"Nai Gu, Jin, Wulan, Ming Huang, Mo Man, these five still remain at the same level. Yuan is already half a step stronger than them."

"And Starlight Lord is a step stronger than Nai Gu and the others."

Before him, Starlight Lord was the only one using the Power Breaking Technique.

"Starlight Lord is a step stronger than other Lords?" Luo Feng understood the inherited information, "The so-called further step is to comprehend the second Primordial Level Dao."

Indeed, the Primordial Level Dao represents the essence of a certain highest power.

But, if one's ability is sufficient, there is hope to comprehend the second 'Primordial Level Dao.' Then, the strength will naturally be much stronger than other Lords.

"Each Lord walks a path that deeply resonates with their inner desires. Only then can they become a Lord."

"To change a path? It would no longer be the ultimate desire of the heart. Even though the Lords have fast mental operations, strong comprehension, and observation abilities, the chance of comprehending the second Primordial Level Dao is nearly zero."

This is the perception of other Lords.

Starlight Lord, before jumping out of the Braided Cage, as a Half Primordial Life, stubbornly comprehended the 'Primordial Space-Time Path.' At that time, his life level was too low, yet he had

enough recognition of the Void, but his comprehension of 'time' in Primordial Space was very weak.

Thus, Starlight Lord, using the Power Breaking Technique, realized the 'Primordial Space-Time Path' based on space! Space occupies nine parts, time takes one part. His power in direct combat was already very strong.

Later, he became a Lord.

With his Lord-level life form, he comprehended another 'Primordial Space-Time Path,' primarily based on time! Time takes seven parts, space occupies three parts. The combination of both paths made him the most terrifying entity in the 'time and space' aspect across Infinite Primordial Space.

His combat ability greatly surpasses other Lords.

His most frightening abilities are 'always present everywhere,' 'present in every time,' 'unassailable' power! Although other Lords are strong, their primary combat avatars can be blown up. Lord Wulan's body can be restrained and trapped.

But Starlight Lord? He can't be killed! Facing terrifying assaults, his body can descend at any time from the past or future, so in a fight, there is no hope of killing him, he can appear at any location around.

His presence has kept the Cultivator Territory stable!

The Innate Primordial Life Camp spares no effort in attacking and has only managed to breach over six hundred world groups. Why is it so difficult? Why do numerous World-level Primordial and High-level Primordial perish? It's because of the omnipresent Starlight Lord.

"No wonder Senior Yuan believes Starlight contributes the most."

"However, Senior Yuan is humble, as he played a role in every Lord's development." Luo Feng thought, due to the birth of the first Lord, resources have been nurtured for subsequent Lords.

Without Senior Yuan, how could Starlight Lord exchange for a World-level Primordial Servant before jumping out of the Braided Cage?

Without Senior Yuan, without Starlight Senior, Luo Feng wouldn't have the Star Tower, wouldn't have numerous Primordial Bloodlines for insights; wanting to become a Lord would be so much harder.

"The path Starlight Lord walks coincides with my thoughts!" Luo Feng had similar thoughts early on.

Before breaking free from the Braided Cage, he realized his Life and Death Dao was led astray by the 'Star Tower Blood Scale,' seven parts life, three parts destruction. At that time, he had no choice but to follow that path, which he certainly liked.

"As a life form, it should be centered on life."

"But if you want to annihilate enemies, you must focus on destruction."

"I can attempt to create a new 'Primordial Life and Death Dao,' primarily centered on destruction." Luo Feng had this idea early on, but at that time, his life level was too low, and he dared not try a second path.

Now, becoming a Lord, he could try.

"The Dao created in the future can be given a different name." Luo Feng looked at the Sky Splitting Saber in his hand, "For instance, 'Primordial Blade Path.'

The name is just a title.

"Creating a new Dao could take an indefinable amount of time; I'll slowly ponder it once the war is over." Luo Feng also understood the difficulty of pioneering a second Primordial Dao; all other Lords have failed, and it took Starlight Lord a long time for his second Dao.

...

"These Ancestors possess powerful strength as well." Luo Feng carefully learned about the upcoming opponents; even though these Ancestors grew through Life Core, reaching their current status. It doesn't mean they are weak.

Among them are those stronger and weaker; some are stronger than Lords in certain aspects.

Even Starlight Lord, before comprehending the second Space-Time Dao, several individuals surpassed his achievement in the 'space-time' aspect across Infinite Primordial Space! Only recently did he rise to the first position.

"Over seventy Ancestors combining forces to destroy everything, their power is too terrifying." Luo Feng felt a bit worried, could he withstand it?

Understanding his companions and learning the opponents' techniques.

Luo Feng began attempting to create a system of combat techniques with his Dao.

Chapter 407: Episode 10 - 16 Luo Feng’s Combat System

Chapter 407: Episode 10 Chapter 16 Luo Feng’s Combat System

The black-clad, black-haired Luo Feng sat cross-legged in the vast center of time and space.

The Lords are the most powerful life forms in the Infinite Primordial Space, with every ounce of strength in their bodies self-created, so their degree of control and utilization over their own bodies is well imaginable.

The speed of thought processes reached a fantastically unimaginable velocity. Comprehension also became very terrifying; within one’s own ’Primordial Life and Death Dao,’ the desire to create Secret Techniques would quickly form one after another in the mind.

The difficulty of creating a Secret Technique, compared to establishing a Primordial Level Dao, was unknown by how many times easier.

"My previous life operation system impacted a vast range. But towards the Ancestor level, the threat was reduced," Luo Feng thought, "I need to specifically create a set of ’Domain Secret Techniques’."

Considering the over a hundred Ancestors from the Innate Primordial Life Camp as opponents, Luo Feng pondered the Domain Secret Techniques.

It must be known that the power each Ancestor masters is unique and is of the highest level! When more than a hundred Ancestors unite, they form the greatest force of the Infinite Primordial Life Camp!

Treating them as hypothetical opponents, many Secret Techniques had to be abandoned.

Ordinary Secret Techniques, Luo Feng could comprehend ten million types in a day. They could appear in the heart at every moment. But facing over a hundred Ancestors, Luo Feng painstakingly spent tens of thousands of days to perfect a 'Life and Death Domain Secret Technique.'

"Then create the most suitable Combat Secret Technique for myself," Luo Feng continued to ponder.

His body was strong enough, containing immense energy.

The same move.

If the energy is ten times stronger, the power of the move is also completely different.

"My Combat Secret Technique must utilize the advantage of 'abundant energy,'" Luo Feng thought. He not only had a massive energy reserve, but his recovery ability was also very fast, with the ability to recover at one billion eight hundred million origin powers, ranking in the top three of the entire Infinite Primordial Space.

Time passed.

The numerous Combat Techniques Luo Feng created for the hypothetical 'over a hundred Ancestors' were gradually taking shape.

...

In the Land of Origin, a dark lake space.

Seven Lord Avatars waited patiently here; now that Luo Feng had become a Lord, a counterattack was imminent, and they were still patient.

"I don’t know how long it will take Luo Feng to create the Secret Techniques." Jin said.

"He took only twenty-five billion epoch time to Break Laws with Force, with such comprehension, after becoming a Lord, just creating some Combat Secret Techniques is still very quick." Yuan said, "It’s just that this time, facing seventy-three Ancestors, Luo Feng might feel some pressure."

Ming Huang also smiled slightly, "Brother Luo Feng indeed has it tough, just breaking through and having to face such terrifying opponents."

"If it were me, facing such opponents just after becoming a Lord, I would also panic," Lord Nai Gu laughed. When he had just become a Lord, he only mastered two Ancestor-level bloodlines, and his strength was at the bottom among Lords, only now growing to a standard Lord level.

"Luo Feng is different."

Starlight laughed, "Each Lord has their own Dao they excel in. Luo Feng’s Primordial Life and Death Dao is best at frontal combat."

In terms of movement technique?

Luo Feng is far less capable than Starlight, Ming Huang, Jin, and Mo Man, like ’Mo Man’ himself is a Primordial Fluctuation, his transformation elusive, perhaps only Starlight could slightly surpass him.

"Haha, Luo Feng’s body is so huge, perhaps his movement technique is even worse than mine." Wu Lan laughed heartily.

"Though his energy is greater than yours, his body is only a third of yours." Starlight Lord had already clearly observed some of Luo Feng’s future combat scenarios, "He is still quite a bit more flexible than you."

Wu Lan was taken aback, was he still at the bottom?

"Of course, only slightly more flexible than you." Starlight Lord

laughed.

Lord Nai Gu pondered, "In terms of movement technique, he's merely stronger than Wu Lan, and among us, he's the second from the bottom. In terms of defense, he should not be as good as Wu Lan, who pursues the 'ultimate defense.' How can he be considered best at frontal combat?"

"Because he now... has endless energy, using force to strongly suppress his enemies," Starlight Lord said.

"Endless energy?" Mo Man couldn't help but say, "Can it be called infinite?"

Starlight Lord nodded.

In his observation of the future, Luo Feng's moves never counted energy as a concern, no matter how he used them, Luo Feng could always maintain the pinnacle state. This shows that his recovery speed surpassed his application speed.

"On this point alone, his frontal combat strength is already considered extremely strong among us Lords." Starlight Lord said, "He still uses the Power Breaking Technique, and in the future, he should be able to comprehend a second Primordial Life and Death Dao, by then he will exploit the advantage of 'endless energy' to the extreme, with every bit of energy used most efficiently."

"Endless energy, with each bit of energy still used in the most ingenious way?" Jin couldn't help but say, "One-on-one, who in the Infinite Primordial Space could rival him?"

"That's why I said, he will be the most powerful presence for frontal combat on our Cultivator Camp."

Starlight Lord said, "For the Cultivator Camp, he will be more important than me."

"Your space-time abilities help the Cultivator Camp in all aspects." Ming Huang spoke up.

In frontal combat, Starlight is now the strongest, of course, only

slightly stronger.

But observing many futures can naturally allow the Cultivator side to avoid danger. Even when facing the siege of over seventy Ancestors, Starlight Lord could calculate the opponents' flaws and evade the weaknesses of his side.

This ability to 'foresee the future' is profoundly helpful.

In addition, with the scope of the Space-Time Net covering, Starlight Lord can appear anywhere within the range, which is of great help to the territorial garrison.

In the view of the other Lords, even if Luo Feng's future frontal strength is the strongest, his contribution to the Cultivator Territory is still difficult to match up to Starlight's.

"In the future, you'll see." Starlight said no more, he himself was very happy with Luo Feng's growth, after all, in past years, his pressure was too immense, observing countless future lines, searching for the Cultivator Camp's vitality.

But in the end, when the Innate Primordial Life Camp spared no expense, he could only watch as the Cultivator Territory gradually fell.

He understands a principle.

Despite observing countless futures, strength is the foundation!

So, in his eyes, Luo Feng is more important than him! Among the two who Break Laws with Force, Luo Feng is more adept at combat!

...

"Everyone." A voice sounded.

The seven Lords noticed, seeing a black-haired and black-clothed man arriving at the space of this dark lake.

"Luo Feng." All seven Lords looked at Luo Feng.

"Sit." Yuan said.

Luo Feng casually sat on a large rock by the lake.

"Have all the Secret Techniques been created?" Yuan asked.

"I carefully studied those Ancestors' methods and also created some Combat Secret Techniques." Luo Feng said, "However, I don't really understand how to coordinate."

Yuan smiled and said, "You only need to exhibit the techniques you excel at, and I will devise a coordination plan for you."

The Formation set by Yuan would perfectly integrate all the Lords' techniques, enhancing overall strength several times.

"Alright."

Luo Feng nodded.

Hum—

With a thought, Luo Feng enveloped the dark lake space with a Domain, within which a faint cyan light fluctuated along with countless stars.

"This is the Realm of Life and Death I created." Luo Feng said, "Within the Realm of Life and Death, it can enhance the vitality of comrades and deprive the enemy's vitality energy. It can also obliterate some enemy power. However, facing a large group of Ancestors, the effect might be relatively weak."

"This Realm of Life and Death has another use; besides Brother Wu Lan, if any other Lords suffer severe injuries... I can instantly restore them."

As Luo Feng said this, the six Lords originally observing and sensing the 'Realm of Life and Death' were stunned, while Starlight Lord smiled knowingly, having been aware.

"Can you restore such severe injuries?" Lord Mo Man couldn't help but ask, being the weakest in physique among the Lords. One-on-one,

of course, he wouldn't mind those Ancestors, but facing over seventy Ancestors joining forces, he had to be extra cautious, fearful of having his main combat Avatar destroyed.

"You mean, as long as not dead, it can be immediately restored?" Ming Huang couldn't help but ask, "Even the strongest vitality restoration ability shouldn't have such capability."

"Infinite Primordial Space also contains beings with strong life abilities, indeed able to enhance our vitality, but not to this extent." Jin said, who also had a certain understanding of Life.

"This is not vitality restoration."

Luo Feng spoke, "It's me transforming my origin power to replenish to you."

The energy contained in Wu Lan's body has one-third of his own! If seriously injured, Luo Feng wouldn't dare say he could completely restore.

But for other Lords? Even the body almost second to Wu Lan's 'Lord Nai Gu', Lord Nai Gu only has one-tenth of Wu Lan, and only one-thirtieth of himself, like a life fountain, replenishing to the other is still easy.

The recovery capability of one billion eight million Origin, although after becoming a Lord, energy is too vast, recovery capability drops slightly, yet within one breath, Luo Feng can restore one-tenth.

That is to say, within one breath, three complete Lord Nai Gu can be restored!

"You transform origin power to us?"

"Does it impact you?"

These Lords clearly understood, origin power is undeniably crucial to oneself.

"No impact." Luo Feng smiled slightly, "My recovery capability is very strong."

"As long as the main combat Avatar isn't dead, it can instantly be restored? Then the power I exerted can be doubled!" Mo Man got excited, since previously exerting techniques, energy had to be used sparingly.

After all, if the energy of the main combat Avatar decreases significantly, strength will also drop noticeably, and survival capability would be much weaker.

The previous seven Lords did not have someone like Luo Feng, who was like a life fountain, enabling the comrades to always maintain the perfect state.

"I also can be more reckless." Jin also felt delighted, and immediately flickered beside Luo Feng, his hand covered with silver scales around Luo Feng, smiling warmly, "Brother Luo Feng, from now on, you are my best brother! In Infinite Primordial Space, I still have other important tasks to attend to. After the war, will you accompany me?"

Having such a partner, one can always maintain the pinnacle state, is truly wonderful.

"Alright, no problem!" Luo Feng nodded.

"Jin, you previously mentioned I was your best brother." Mo Man gently shook his head; he and Jin belonged to similar temperaments, sharing many viewpoints in the Cultivator Camp.

"Things change." Jin cheerfully said, "Don't worry, among my friends, you now rank second."

"Then you rank second too. My best friend has also become Luo Feng." Mo Man looked at Luo Feng, "Brother Luo Feng, you and I are perfectly matched! I just need to leave a weak Avatar by your side. My main combat Avatar can exert the strongest techniques at all costs. You then restore my weak Avatar to the strongest... meaning I can continuously exert the strongest killing techniques. The two of us together, who in Infinite Primordial Space can stop us?"

With an additional companion capable of instant restoration to the pinnacle, numerous coordination plans are available.

Jin, Mo Man, Ming Huang, all looked at Luo Feng with a different gaze.

"Alright." Yuan laughed and said, "Only relying on Luo Feng's Realm of Life and Death, our overall strength can at least increase by twenty percent." This ability of Luo Feng affects Starlight, Yuan, and Wu Lan little, as these three generally maintain peak status, greatly affecting Nai Gu, and having a significant impact on the other three.

Also, thanks to two old Alliance Leaders 'VERY' 'Venerable Xu Xin' for your rewards!

Chapter 408: Episode 10 - 17 Joining the Battle

Chapter 408: Episode 10 Chapter 17 Joining the Battle

"Luo Feng, besides domains, what else are you skilled in?" Yuan asked.

"Mainly two categories: one is the physical body combat system, and the other is the blade technique system." Luo Feng began to showcase one by one. Among the lords of the cultivator camp, everything was transparent. Their dao, inheritances, and combat techniques were not guarded against each other.

The reason for this openness is twofold: firstly, they are the most trustworthy companions, and the more they understand each other, the better they can cooperate. Secondly, each lord's 'dao' is unique.

Even if one day, two lords create the same primordial path, the internal mysteries still differ significantly, and the spiritual will integrated is entirely different.

Every lord must carve out the path most suitable for themselves. Luo Feng and the others are well aware that when creating a primordial level path, any slight disharmony of spirit will lead to failure.

"The techniques of the life path are generally vicious and challenging." Jin watched with amazement, "Your techniques, however, are quite fierce."

"I don't like purely life-based techniques," Luo Feng said.

Pure life techniques lack means to kill enemies.

Some methods like depriving vitality, infiltration, and erosion can immediately extinguish the vitality of those world-level primordials at just a glance from Luo Feng, causing instant death.

However, against the ancestors, these methods are much less effective.

It requires some killing moves post 'life and destruction fusion.'

"Luo Feng, the seventy-three ancestors and we lords have been engaging with long-range techniques," Yuan said, "Neither side dares to fall into the midst of the other's group."

Luo Feng nodded.

Once trapped by the opponent, even Lord Wulan would be heavily restrained and possibly imprisoned for a short period.

"So you should only employ long-range methods then," Yuan said, "As for the method of cooperation, I have already conveyed it to everyone."

Information was sent to the seven lords around him.

Luo Feng also received the information stream.

Within the information stream, Yuan had already simulated detailed battle scenarios, with eight lords cooperating against the seventy-three ancestors, simulating numerous combat scenarios.

"I understand." Luo Feng nodded, with his current life level, he could infer many other combat situations from watching once.

"Luo Feng's contribution to collective battles is substantial, and our overall strength will increase by thirty to forty percent." Yuan looked at his companions, "And the ancestors have no idea about Luo Feng's breakthrough. We must seize the opportunity to eliminate several ancestors."

The lords present all nodded.

They had long been filled with a killing intent.

After all, they hold the highest positions in the cultivator camp, with the inherent responsibility to protect the entire camp. Now that more than one-sixth of the territory has fallen, with countless creatures obliterated, how can they not feel aggrieved and angry?

"Starlight, take Luo Feng and set out cautiously," Yuan said.

"Alright." Starlight Lord nodded.

"Once Luo Feng enters the battle! Once the ancestors detect this, they will immediately dispatch forces urgently. The reinforcement forces are estimated to take three days to arrive," Yuan looked at everyone, "These three days are our window to expand the battle results."

The infinite primordial space is too vast, and even though the innate primordial life camp has ancestors adept at space-time, the reinforcements still take three days.

Three days' travel is already considered fast.

"Shall we set out now, Luo Feng?" Starlight looked at Luo Feng.

"Alright." Luo Feng nodded, already in the most prepared state within this short time.

Woosh.

Starlight quietly took Luo Feng away from the Land of Origin.

...

Luo Feng is considered the most adept at concealing life aura in the entire infinite primordial space, with every strand of life aura fully controlled. Even causal methods find it hard to detect Luo Feng.

"With my current life level, every step covers an endlessly vast distance. Much faster than lake transmission. But compared to Starlight Lord, it pales in comparison." Luo Feng could sense the traveling speed of his companion.

With each step Starlight took, they crossed countless space-times.

Countless layers of space-time appeared stacked like a map underfoot. It felt like walking on a map.

"Do the beings with the highest attainments in space-time across the entire infinite primordial space travel like this?" Luo Feng exclaimed.

"Each lord has their strengths," Starlight laughed, "I'm just good at traveling."

"This isn't merely traveling; it's transcending the entire space-time," Luo Feng observed his feet, "The vast space-time seems like a map, allowing such traversal. This skill is truly incredible."

No wonder all the high level primordial bloodlines and world-level primordial bloodlines have been collected! Starlight's ability indeed is terrifying.

"Each lord is undying and undestroyable," Starlight said, "They are entirely transcendent beings. It is because they protect the cultivator camp that they endure such hardships."

Lords are individual entities of the most powerful tier in infinite primordial space. If they were selfish and ignored the life and death of countless cultivators, they would be much more at ease.

However, the source world nurtured them, and on their path of cultivation, they have received so much grace and causality, how can they forget?

No matter how powerful the cultivation, one must not forget their roots or their origin!

"We are already struggling to protect the three thousand six hundred world clusters, having lost over six hundred," Starlight looked at Luo Feng, "Your talent and potential are not inferior to mine, but you're different; your path specializes in combat."

"To protect a sufficiently vast cultivator territory, what we rely on is strength, is combat," Starlight said, "Bear in mind... the source world exists everywhere, far beyond just these three thousand six hundred

world clusters."

Luo Feng gently nodded: "I will do my utmost."

The three thousand six hundred world clusters represent, relatively speaking, the region with the highest density of source worlds in the infinite primordial space. Suitable for constructing a space-time net. Previously, the seven lords strived to garrison this territory.

There are many world clusters, very remote, very distant.

For example, a region more vast than the thirty-six hundred world clusters. This region has only one world cluster.

Remote and sparse, symbolic of the challenges of guardianship.

"Thinking too much," Starlight said while looking at Luo Feng, "For now, our most urgent task is to completely reclaim the thirty-six hundred world clusters."

...

Starlight, traveling with Luo Feng, spent nearly a day approaching the battlefield.

This battlefield is an endless, vast void, with an exceedingly wide-ranging impact from the battle, one Source World on the edge was blown apart! The Lords had no solution for this.

After all, they were at a disadvantage.

"Wow~~~~~"

Time and space shook like boiling water, within the endless boiling water there were seventy-three terrifying figures, the highest level powers erupting in various ways, these highest level powers were coordinating and weaving together, fully enveloping the seven Lords.

The main battle avatars of the seven Lords were struggling to cope.

Fortunately, the Formation of Yuan allowed the Lords' cooperation to qualitatively change, enhancing their overall strength several times,

otherwise the Lords couldn't handle the Ancestors' collective joint efforts.

Luo Feng increased the overall strength by thirty to forty percent, seemingly significant, yet far from the importance of 'Yuan' in collective combat. Of course, Luo Feng currently strengthens by thirty to forty percent on the existing basis, clearly aiding the Lords' team.

"That Starlight Lord, while engaging with us, still managed to allocate power to attack various teams."

"We must seize the opportunity to break them."

These Ancestors also felt enraged.

Starlight could divide its power, attacking various teams, meaning these Ancestors couldn't force the 'Lords' to exert fully.

Just at this moment——

Swoosh!

Time and space twisted.

Starlight Lord, accompanied by a black-robed, black-haired man, descended directly into the Lords' team, Starlight Lord's this avatar naturally fused with the main battle avatar.

"Hmm?" The seventy-three Ancestors instantly noticed this black-robed, black-haired man.

"Who is he?"

The Ancestors were shocked, sensing something ominous.

The black-robed, black-haired man just arrived, and the Realm of Life and Destruction unfolded wide, although his Domain when penetrating towards the Ancestors' region was swiftly shredded and collapsed. Yet in his own region, Luo Feng's origin power rapidly transformed to supplement ally power.

Mo Man, Jin, Ming Huang, Nai Gu, who were originally injured,

instantly recovered to Pinnacle.

Luo Feng joined the Lords' team, guided by Yuan's Formation, also reverted to his enormous size, alongside 'Lord Wulan' to resist numerous attacks from the Ancestors.

"Boom——"

The seventy-three Ancestors' joint efforts, all consisted of interwoven highest level powers, now were laid over them!

Even after being initially resisted and diminished by Yuan's Formation, it continued recklessly landing upon Wulan's body, as well as Luo Feng's massive body.

On the surface above Luo Feng's body, there was an invisible shield of energy, the protective energy shield was resisting layers of attacks, these protective energy shields supplied by 'one billion and eighty million origin' power. Despite depletion, it continuously replenished.

Yet there was still power capable of ignoring the energy shield, disregarding the robe's obstruction, penetrating internally.

But Luo Feng's physique everywhere matched one-tenth of the Star Tower Blood Scale's toughness, though damaged in places, was swiftly recovering.

Clear wounds were visible on Luo Feng's body surface, blood streaming, yet continuously recovering.

"Luo Feng held out."

His comrades were previously somewhat worried.

After all, facing the siege of seventy-three Ancestors, Wulan blocked more than half, Luo Feng had to withstand the pressure of about thirty Ancestors' assault! Such pressure, no other Lords alone could endure.

Luo Feng's injuries looked more severe than Lord Wulan on the surface. But the injuries were not worsening.

"Every moment, affecting every part of the body."

"Every breath, consuming about one percent of my energy, still within manageable limits." Luo Feng was somewhat surprised, his energy reserves were so massive, the Life and Destruction Fusion's insight into 'Star Tower Blood Scale' resulting in a body sufficiently resilient, consuming one percent of energy reserves per breath?

This was with Yuan's Formation, and ally's Domain methods attempt to weaken it, still with such terrifying might.

Luo Feng also took note of Wulan, Wulan's physique was larger than his own, also striving to block more attacks, his body akin to Source World was lightly injured. Pursuing 'ultimate defense' of his fierce body.

Luo Feng and Wulan joined forces, shielding other Lords from the storm, instantly reducing the pressure on other Lords.

Luo Feng's revelation also completely exposed him to all forces within the Infinite Primordial Space.

At the same moment——

Far at his homeland Source World, Luo Feng's avatar started breaking through, began refining the Source World.

——

Thanks to new Alliance Hierarch '6 Werewolves 6' for the reward!

Chapter 409: Episode 10 - 18 Burning Main Battle Avatar

Chapter 409: Episode 10 Chapter 18 Burning Main Battle Avatar

"The Cultivator Camp has gained another lord!"

"Nearly half of our power, and this new lord can withstand it?"

"Jin, Mo Man, and Ming Huang's strength has recovered."

The ancestors, with their outstanding observational and sensory abilities, immediately recognized Luo Feng's capabilities as soon as he appeared. This made them increasingly uneasy.

Such a strong physical body? And can restore his companions to their pinnacle?

"The Cultivator Camp has gained a formidable lord."

"Who is he, and why do we have no information on him at all?"

The ancestors were temporarily unaware of any intelligence on Luo Feng.

Given their status, they were more focused on the 'World-level Primordials' of the Cultivator side. The so-called invincible beings below the Braided Cage? Every group of worlds has many. The Innate Primordial Life Camp is, after all, the opposing camp, and although it's possible to gather intelligence, it wouldn't be so timely.

From being received to breaking laws with force, only less than two

millennia have passed! This period remained a time of war, with every group of worlds on high alert, and the ancestors had no intelligence related to Luo Feng.

"Be careful, Mo Man's avatar has entered!"

Suddenly, a voice echoed in the minds of all the ancestors.

Among the seventy-three ancestors, there was a giant exotic beast with dozens of hooves and claws, covered head-to-toe with countless eyes—over a thousand—observing the lord's side. Under its watchful gaze, no move from the Cultivator side could be hidden, and Lord Mo Man's sudden infiltration was naturally discovered.

"Mo Man has entered?" The other ancestors tensed up.

Mo Man himself was a primordial fluctuation; if he incarnated into a fluctuation, even the ancestors couldn't differentiate between these fluctuations.

"Hahaha, Thousand Eyes, you still found me!" A reckless laugh echoed, his laughter carrying potent allure; the ancestors with weaker minds saw illusory realms manifesting before them. "Let the entire Infinite Primordial Space turn into fluctuations for me!!!"

With his frenzied voice, the vast temporal space where the seventy-three ancestors resided twisted entirely, every inch of space transforming into surging waves, or seemingly notes of music, composing a battle hymn.

The battle hymn resounded within their minds!

The entire space-time transformed into countless notes, and within this space-time, the seventy-three ancestors were chaotically stirred, torn, destroyed. Facing Mo Man lord fueling his main combat avatar with a terrifying strike, they gave their all in response.

Among the ancestors, a sphere was there, a perfect sphere, no matter how much magnified, it remained a perfect sphere.

That was 'Origin.'

Among the hundred plus ancestors in the Innate Primordial Life Camp, only four qualified to hold a seat in the Land of Eternity; Origin was one of them. It was the strongest in defense among all life forms in the Infinite Primordial Space.

Its existence demonstrated various defense Daos.

"Settle!"

It remained undisturbed in place, unaffected by the horrifying fluctuation! However, it could only settle a small surrounding area. After all, Mo Man Lord's move turned the vast temporal space completely into his fluctuation weapon. The extensive range and great power made even Origin's garrison range small.

"Suppress!" Among the seventy-three ancestors, a winding great serpent roared, forcefully sealing space and attempting to suppress all fluctuations.

It was the Infinite Snake Ancestor.

The highest leader of the entire Infinite Great Snake Clan, and the most respected existence in the Innate Primordial Life Camp! Ranking among the top three in strength, it was undying and unmatched, also the absolute war party leading force against the Cultivator Camp.

Its power to suppress space was utterly terrifying, but at this moment, an extraordinary power suppressed it.

The Infinite Snake Ancestor looked in anger and astonishment towards a distance, at that Starlight Lord.

It knew...

The only one on the lord's side who could suppress its spatial expertise was that 'Starlight Lord'!

The Starlight Lord had silently stepped in, aiding its companion.

"Hahaha, Brother Mo Man, I'm here too!" The reckless voice of the Golden Lord rang out.

"Damn ancestors, I've endured you for too long, time to make you understand the price of offending us lords!" His voice was somewhat frenzied, dividing into thirteen black auras suddenly.

The thirteen black auras appeared out of nowhere at critical nodes in the ancestors' area.

As Mo Man used the vast temporal space as notes, when the space-time shook the fiercest, the Golden Lord's thirteen black auras merged at the critical nodes.

"Boom!" "Boom!" "Boom!" "Boom!" "Boom!" "Boom!"

Thirteen explosions.

This terrifying explosive power leveraged a single force to trigger a thousand forces, a thousand to trigger a million, continuing consecutively. The process happened instantaneously, causing power to surge to unfathomable heights.

The thirteen explosions not only had terrifying power but also precise locations, perfectly coordinating with Mo Man's move.

The explosion and fluctuation completely overlapped.

These were two lords unleashing recklessly, and this terrifying fluctuation instantly swept over every ancestor, seemingly intending to erase them from their quintessential existence.

The ancestors fully resisted as well.

"These lords have gone mad."

"Burning the main combat avatar in desperation, everyone brace yourselves."

The ancestors were shocked but still put forth their best effort to resist. Yet, the all-out attack from Mo Man and Jin burning their main combat avatars was so horrifying, forcibly causing over a dozen ancestors with weaker protective abilities to suffer severe injuries.

Any ancestor had incredibly tenacious life force, with companions

assisting them; killing an ancestor was extremely difficult.

"Die!"

The most terrifying explosive power had just diminished, and the severely injured dozen ancestors hadn't yet taken a breath when they saw the endless radiant golden thunder.

Golden lightning, dazzling and brilliant, struck those twelve severely injured ancestors in an instant.

Lord Minghuang!

Her lightning is unavoidable, and once unleashed, it never misses!

At this critical moment of eruption, she too spared no effort, burning her main battle avatar to launch the strongest twelve strikes, all targeting these twelve ancestors, making them feel the golden lightning obliterate every part of their bodies. The power of their surrounding companions helped to block it, enabling them to persevere.

"Slash!"

Luo Feng also swung the Sky Splitting Saber in his hand, with each slash containing a ten-thousandth of his energy reserve, which was also his utmost in a single strike. Hundreds of blade lights were slashed out in the blink of an eye.

After these blade lights were slashed, guided by the Elemental Array and with the help of Starlight Lord's space-time, hundreds of blade lights descended into the depths of those ancestors, approaching the flanks of the twelve ancestors.

"Rip." These ancestors had different abilities, most could withstand or avoid the attacks, but one unfortunate ancestor took a slash from Luo Feng head-on.

The ancestor, already hanging by a thread, was forcibly cleaved in two by the slash.

With its body split into two, its strength declined further.

"Yun Mo, quickly enter my body," the Initial promptly transmitted upon seeing this.

As long as it hid inside, no one in the entire infinite primordial space could harm it, but during war, the Initial would only allow other ancestors to hide inside when in a state of 'severe injury.'

After all, during war, hiding inside meant one less ancestor fighting. Facing the lords, one less ancestor was tolerable, but losing ten ancestors would likely lead to collapse.

"Die."

Suddenly, from another timeline, an enormous hand descended into reality, holding both space-time and the divided Yun Mo Ancestor.

"Starlight?" Yun Mo Ancestor was startled and angered.

"Yun Mo, fuse with me," a voice arose in its heart.

Yun Mo Ancestor calmed down as its body turned into endless light, which the space-time hand could not completely confine, transcending time and space.

The endless light flew into the body of another distant colossal being.

"Thank you, 'Infinite Ancestor,' for saving my life." Grateful, Yun Mo Ancestor hid inside this massive being.

This massive being was a gigantic sphere of light, containing endless light within.

It was the Infinite Ancestor.

One of the top three powerhouses in the Innate Primordial Life Camp, it theoretically had the possibility of complete death, which is why it couldn't secure a spot in the Land of Eternity. However, within the Innate Primordial Life Camp, the ancestors greatly respected it.

Because it was too powerful, on par with the Infinite Snake Ancestor.

The 'Initial,' indeed, was undying, but its strength among the

ancestors was just below average.

"Infinite Ancestor, one of the nine emperors of the Innate Primordial Life Camp." Starlight watched this scene, slightly frowning.

The nine emperors of the Innate Primordial Life Camp are the nine highest-ranking among over a hundred ancestors, consisting of four 'undying' beings and five extremely formidable ones.

The Infinite Ancestor was one of the nine emperors.

It, the Infinite Snake Ancestor, and the Silent Extinction Ancestor were the top three among the ancestors, with only the 'Infinite Snake Ancestor' having a seat in the Land of Eternity.

The Infinite Ancestor indeed faced the potential of 'total annihilation,' but the eight lords of the Cultivator Camp could not accomplish this; only two existences in the infinite primordial space could restrain it.

And even then, it was merely restraint; to kill it? It required a multi-faceted cooperation to have hope.

Because of the possibility of death, the Infinite Ancestor was the absolute main battle faction of the Innate Primordial Life Camp, seeking to devour more Source World Origin to advance further.

"Hold steady, these lords want to take advantage of our unfamiliarity with the new lords' methods to launch a counterattack." The enormous ball of light conveyed to everyone, "Once we understand their methods, we will have ways to counter them."

"Be careful, Mo Man is in again!" the Thousand Eyes Ancestor anxiously said.

"What?"

All the ancestors couldn't believe it.

A breath ago, wasn't Mo Man desperately burning his main battle avatar?

They did not know that when Mo Man, Jin, and Minghuang burned their main battle avatars, they left behind a weak avatar hidden and protected by the 'Starlight Lord.' After burning their main battle avatars, their weak avatars were immediately restored to the pinnacle by Luo Feng.

Yuan needed to master the formation, Starlight needed to control space-time; their cooperation stabilized the situation.

Wu Lan and Luo Feng needed to withstand the opponent's attacks and maintain the battle array.

The four of them needed to remain in a constant pinnacle state.

Lord Nai Gu, containing various 'Ancestor Bloodline' methods, was quite comprehensive, but his desperate means were not as formidable as the other three.

Mo Man, Jin, Minghuang, their paths, once burning the main battle avatar without sparing energy, became very terrifying.

"Hahaha, I'm back again." Accompanied by Mo Man Lord's mind-shaking voice, the ancestors felt the situation worsen. They were powerful, had strong life force, and could coordinate with each other! Even when facing the lords who mastered the essence of power, they were unafraid.

But when Mo Man and the others could repeatedly burn their main battle avatars and fight, how long could they withstand?

This time, Mo Man Lord transformed into waves of gray fluctuations. These gray fluctuations had no impact on space-time but completely penetrated every ancestor's body, demonstrating another lethal move of the Primordial Fluctuation Dao, the 'Soul Fluctuation Kill.'

The ancestors, whose life cores were their origins and extremely strong, resisted this strange fluctuation.

"I'm here too," Jin Lord's arrogant voice sounded.

This time, destruction rifts appeared in vast territories, sweeping past already heavily injured ancestors, and finally, two severely injured

ancestors were devoured by the ’destruction rifts’...

This caused the other ancestors to be shocked and enraged, as two fellow companions had fallen in battle!

Chapter 410: Episode 10 - 19 Avoiding Battle

Chapter 410: Episode 10 Chapter 19 Avoiding Battle

Before this war, only three Primordial Ancestors had died! Through the tempering of war, the remaining Ancestors have gained more experience, and the Lord's side has not had any results for a long time.

But now, two more Ancestors have died!

"Golden Lord's techniques, the Realm of Destruction, are indeed above mine." Among a group of Ancestors, there was a restrained black light, within which stood a figure, seemingly humanoid, seemingly a bird.

This was the Silent Extinction Ancestor, one of the Nine Emperors of the Innate Primordial Life Camp, ranking in the top three.

Among these Nine Emperors, six participated in the battle! They were four 'Undying and Undying' beings, along with the Infinite Ancestor and the Silent Extinction Ancestor.

"This newcomer Lord possesses the power to quickly restore companions to the Pinnacle." Silent Extinction Ancestor looked distantly at Luo Feng, "He is the key node."

"Serpent, Infinite, Initial, I will try to deal with the new Lord." Silent Extinction Ancestor's voice rang in the minds of the three companions, "If we cannot break this node, we should first avoid

battle."

"Alright."

The Infinite Snake Ancestor, Infinite Ancestor, and Initial all responded. These Ancestors had many cooperative strategies, and the 'avoidance strategy' was one they were reluctant to choose, but the current situation was too dire, and if the Silent Extinction Ancestor also failed, they could only avoid battle.

These exchanges were slow in words, but in reality, the Ancestors' mental communication took only an instant.

"Let's attack together and deal with that new Lord." The voice of the Silent Extinction Ancestor echoed in the minds of six other Ancestors, who were either thousand-eyed, or enchanting creatures, or an Exotic Beast shining with starlight...

The Silent Extinction Ancestor took the lead, with six Ancestors supporting, cooperating in their attack.

"New Lord, please succumb to extinction!"

A cold voice echoed in Luo Feng's soul.

As Luo Feng was attacked, Lord Minghuang also burned his main battle Avatar, and his body melted into terrifying golden thunder, passing through the obstructions of time and space, locking onto each severely injured Ancestor, making escape impossible!

An endless light spread!

A phantom emerged!

The Ancestors also did everything possible to help their companions.

"As long as this new Lord is severely injured, the situation can change." Silent Extinction Ancestor had this premonition.

"Boom!!!"

Luo Feng felt his soul was akin to a vast and resilient great mountain,

with the enemy's power concentrated into a giant hammer covering the sky and earth, smashing onto his soul! This was a joint attack on the mind and body by seven Ancestors, including the Silent Extinction Ancestor, Thousand Eyes Ancestor, and Star Luo Ancestor.

In an instant, Luo Feng's soul roared, and an invisible force permeated every part of Luo Feng's body, leading his body towards collapse and destruction.

"Is it Silent Extinction Ancestor and the others?" Although Luo Feng's soul roared, he remained entirely clear-headed.

He pursued the ultimate strength in life.

His 'Primordial Life and Death Dao' contained six systems, with the Mind Consciousness System being a key part of it, making his soul extremely strong among Lords of the same level, and compared to those Ancestors... frighteningly strong.

Even withstanding the full power attack of Silent Extinction Ancestor and their ilk, everything remained intact, with ten billion and eighty million Origin restoring one-tenth of the energy every moment, quickly expelling all alien energies from his body.

"We failed." Silent Extinction Ancestor looked on from afar, sighing softly, as expected. Thousand Eyes Ancestor, Star Luo Ancestor, and others were quite helpless.

The joint attack by the Ancestors was generally influenced by the Elemental Array, passing multiple Lord's Domain blocks and weakening. The Elemental Array would lead, making Wulan withstand most of the attack, with Luo Feng bearing a smaller portion.

But the 'mind-based' killing blow of the seven, including Silent Extinction Ancestor, could bypass the Elemental Array and Domain's hindrance, directly targeting Luo Feng's body.

With this technique, the Innate Primordial Life Camp had killed other camp's beings of the same level.

But this killing blow was much less effective against the eight Lords

of the Cultivator Camp. On one hand, each of the Lords was immortal, and even if they endured this blow, only Lord Nai Gu and Golden Lord would be affected, with strength impaired. Others were all unafraid.

Their techniques could not lock onto the Starlight Lord, nor could they touch the Yuan's soul.

Wulan could easily withstand any attack.

Luo Feng remained stalwart.

Minghuang and Mo Man, these two Lords, were both extremely strong in mind and could easily resist mind-related harm, leaving only minor physical injuries.

In the past, this technique could target Lord Nai Gu and Golden Lord, once plunging the Lords' side into crisis, but with Luo Feng's arrival, the defense ability of the Lords' side increased comprehensively.

"Avoid battle!"

Infinite Ancestor's voice resonated in the spirit of every Ancestor.

Under the thunderous fury of Minghuang, Infinite Ancestor instantly transformed into vast and endless light, dazzlingly bright, shading the vast realm where Ancestors resided, assimilating many Ancestor's bodies.

Swoosh.

The endless light abruptly contracted, reduced to a point, and withdrew into a giant sphere.

In the vast space, all other Ancestors vanished, leaving only one enormous sphere in place.

"They have avoided battle."

Eight figures observed the giant sphere, lacking even the desire to strike.

"Hahaha, how satisfying! All those long years of scheming, and I only managed to kill three Ancestors with the weakest survival abilities. This time, I killed three in such a short time," Jin laughed heartily, feeling utterly pleased.

Indulgently using the forbidden technique, treating the forbidden technique of burning the main battle avatar as if it were a move used every moment, this feeling was amazingly wonderful.

"Starlight, did you get all three Ancestor corpses?" Ming Huang looked at Starlight. In the last moments, under her assault with the burning main battle avatar, even though the Ancestors defended with all their might and retreated, she still managed to kill one.

"Don’t worry. In terms of temporal and spatial insights, no one surpasses me. The instant you killed it, I grabbed its corpse into another timeline," Starlight chuckled. An Ancestor dead and defenseless, he could immediately take it away.

"Thankfully, we concealed the information about Luo Feng’s breakthrough in advance, catching these Ancestors off guard, resulting in such success," Yuan also felt relieved and relaxed.

The tides of this war have completely turned.

Didn’t you see that group of Ancestors hiding inside ’Initial’ to avoid battle? Previously, in the war, the Ancestor side held the advantage. No matter how Starlight calculated, they couldn’t overcome the absolute disparity in strength and could only watch as their territories fell step by step.

Now, everything has changed!

Forcing the Ancestors to choose to avoid battle.

"If exposed in advance, with the insights of the Innate Primordial Life Camp and a definite target, they could deduce much information. They might have dispatched reinforcements or temporarily retreated," Starlight said.

Luo Feng, however, looked at the massive sphere in the distance and said, "We have no way to deal with this Initial Ancestor? The eight of

us together, can we move it to some dangerous place in the Infinite Primordial Space?"

"Indeed, we have no way to deal with it," Yuan nodded.

"No one in the entire Infinite Primordial Space can deal with it," Starlight also said.

Luo Feng understood from the intelligence about the Initial Ancestor. The intelligence recorded. The Initial Ancestor represented the ultimate defense of the Infinite Primordial Space! It cannot be destroyed, cannot be shaken. But it moves slowly, attacks clumsily, and can be ignored as if it doesn't exist.

"Its body is quite special," Wu Lan said. "In terms of robustness, it is comparable to me. But its body has the incredible ability to 'perfectly disperse power.'

"Even if it were me, attacking with full force, ninety-nine percent of the power would be transferred and neutralized," Jin said. "The remaining one percent power faces a robustness akin to Wu Lan's body."

Luo Feng was shocked.

Jin is among the Lords with incredibly strong killing abilities, and even his techniques can be neutralized by ninety-nine percent? In the Infinite Primordial Space, if other entities attacked, leaving even one-thousandth or one-ten-thousandth would be remarkable.

"Where it is, seems like a fixed point in time and space, unshakable, immovable," Starlight said.

"Can't move it at all?" Luo Feng murmured.

Wu Lan said, "If the power were strong enough, it might be possible to move it. But our power, once transferred and neutralized, leaves possibly only one-thousandth. Naturally, it cannot be moved."

Luo Feng understood.

"Brother Luo Feng, you could try," Ming Huang laughed, "You could

slash it freely; it won't fight back."

"Even if it fought back, it wouldn't be worth mentioning," Mo Man also laughed.

Luo Feng also knew among the Ancestors, 'Initial' ranked lower mid-level in terms of deterrence, even worse compared to the Lords. Each Lord could rival the Ancestors at the highest level.

"Let's try." Luo Feng was also curious about the strongest defensive existence in the Infinite Primordial Space.

He watched the massive sphere ahead.

It was denser than the Source World, even becoming a fixed point in space-time.

Just looking at it, Luo Feng could feel the profound mysteries of many Daos it embodies, the mysteries of life, the mysteries of matter, all the mysteries wonderfully united and complete, itself a miraculous existence.

Luo Feng stretched out his hand, and the Sky Splitting Saber appeared in his hand.

"Swoosh!"

The Sky Splitting Saber instantly pierced through the space-time distance, carrying infinite power and slashing towards the massive sphere. At the moment of impact, Luo Feng felt as if the blade struck the void, with no sensation of contact.

Even when part of the force followed the life lock, forcefully transmitted, only faint traces of blade light touched the giant sphere's surface. But even this one-thousandth of the blade light's power didn't leave a mark on the sphere.

Starlight laughed, "The fact that you can hit it, Luo Feng, is already not bad."

The massive sphere suddenly emitted a deep voice, "This Lord who struck, are you the eighth Lord of your Cultivator Camp? Your

Cultivator Camp is truly fortunate to produce a new Lord during the genocidal war!"

"Initial, do you choose to continue fighting, or will you end the war?" Yuan looked at him, "If you continue, we will accompany you."

Beside the massive sphere, four avatars suddenly appeared.

They were the Infinite Snake Ancestor, the Infinite Ancestor, the Silent Extinction Ancestor, and the Inference Fire Ancestor, the core war faction among the nine emperors of the Innate Primordial Life Camp.

"Do you really think that with one more Lord, you can win?" The Infinite Snake Ancestor coiled in the void, staring at Luo Feng and his seven, "The Cultivator Camp should be our food, with no right to resist!"

"Who is whose food?" Jin sneered, "Our Lords are Undying and Undying. You Ancestors are our food. We hunt you, making each of you our cultivation resources. Let me count, up until now, haven't we killed twenty Ancestors? While not a single Lord of ours is missing."

"Yes, twenty Ancestors have died, but due to your death threat, we also birthed 32 new Ancestors!" Silent Extinction Ancestor said calmly, "The weak ones died. The ones who survived are even stronger."

———

Thanks again to the Old Alliance Leader 'Old K' for his generous reward!

Chapter 411: Episode 10, - 20, The Most Wonderful

Chapter 411: Episode 10, Chapter 20, The Most Wonderful

Yuan Ping usually smiles, with the best temper, but at this moment he looked at the few Ancestors in front of him with an icy expression: "Over the long years, your Innate Primordial Life Camp has lost twenty Ancestors in our hands. You have also clashed with other camps, losing fifteen Ancestors. Altogether, you have only produced thirty-two Ancestors... so the overall number has still decreased."

The Infinite Great Serpent and several others, their expressions slightly changed.

Indeed, as the largest group in the Infinite Primordial Space, their Ancestors' numbers have somewhat decreased since fighting the Cultivator Camp repeatedly. This is also why some Ancestors within them didn't want to engage in combat with the Cultivator Camp.

After all, the Lords are undying and undying, fighting over and over again, what's the good outcome in that?

"You eight, isn't it proof that individual strength is more important?" That ball of endless light had a very strong oppressive force, "Innate Primordial Life born with infinite longevity should pursue the ultimate in strength with infinite life's span!"

Silent Extinction Ancestor also said: "To pursue ultimate strength, one must have the determination to do whatever it takes. Even if we fail and completely return to silence, we would gladly accept it."

Infinite Snake Ancestor and Inference Fire Ancestor looked at the eight Lords, the two of them had reached the realm of undying and undying, even more calmly.

"The Source World Origin is the best resource for the Innate Primordial Life Camp; even if I no longer need it, the entire camp does." Infinite Snake Ancestor said, "My other followers in the Infinite Race need it too."

"The three thousand six hundred World Groups you occupy are the prosperous three thousand six hundred World Groups, with abundant Source World numbers." Inference Fire Ancestor said, "If you're willing to back off, retreat to one thousand two hundred World Groups. Our Innate Primordial Life Camp can take a step back and stop fighting."

The eight Lords looked at them coldly, not bothering to refute.

"Then just wait."

Infinite Snake Ancestor and others also returned to the 'Initial Ancestor' body.

Initial Ancestor, upon its own path reached the utmost! It could calmly watch over the winds and storms in the entire Infinite Primordial Space; no matter how strong the force is, it could not threaten it in the slightest.

But as a member of the Innate Primordial Life Camp, it also willingly assists its kin.

"They are seeking support." Starlight said, as many Avatars walking the future lines have already glimpsed many possibilities, "Though there are also those within the Innate Primordial Life Camp opposed to going to war with us. But to save many Ancestors and ensure their camp's advantage, there should be substantial forces arriving to support."

Luo Feng and the seven of them firmly believed in what Starlight said.

These Ancestors hiding within 'Initial Ancestor' do so because they

cannot retreat!

Before 'Starlight Lord,' who has the utmost accomplishments in time and space, they cannot escape; their retreating process would instead show many flaws, under the combined all-out attack of the eight Lords, would likely result in the death of several Ancestors.

Hiding inside the Initial Ancestor, waiting for support was the best choice.

"How many Ancestors will support them?" Yuan asked.

Starlight said: "At least thirty Ancestors will come to support!"

Luo Feng, Jin, Ming Huang, Mo Man, Nai Gu, Wu Lan the six of them listened and their expressions slightly changed.

With so many Ancestors coming, it would mean more than a hundred Ancestors working together! The deterrence power would be too terrifying.

"When it involves the tribe's destiny, the Nine Emperors will also gather." Starlight emphasized, "We have to prepare well."

"Prioritize defense, rather give up some opportunities, also must ensure the stability of the battle array. Afterward, seek chances to counterattack." Yuan said, "With Luo Feng present, we do not fear prolonged combat."

Immediately, Yuan, Jin, Wu Lan, Ming Huang, Nai Gu, Starlight, Mo Man, Luo Feng the eight Lords naturally formed a battle array, covering the region where the Initial Lord was, guarding it.

Those weaker Ancestors, daring to show their True Body, would face the encirclement and attack by the eight of them.

...

Land of Eternity.

This is a place where all existences that have reached the level of 'undying and undying' throughout the Infinite Primordial Space have

the qualifications to come and have a place here! It is a piece of land naturally nurtured by the Infinite Primordial Space.

A grain of dust from this land can suppress a high-level Primordial Life. The intangible pressure of the Land of Eternity can turn a World-level Primordial Life into powder.

Like the Ancestors of the Innate Primordial Life Camp, over ninety percent have no qualification to come here.

This vast flat continent only has an ancient round table, the round table has endless Secret Patterns mysteries, and at the moment has twenty-eight seats around it, with three figures currently sitting there.

Infinite Primordial Space, the distances between each other are too far, they are accustomed to meeting here.

"The eighth Cultivator Lord." A group of gray mist sitting on one of the seats, an eye appeared on the surface of the mist, watching the distant battle with interest, "The Cultivator Camp is too special, they are weak Creatures within the Source World gradually cultivating, ultimately mastering the essence of supreme power! Reaching a state parallel to ours."

"Indeed very special, each of their strength is quite strong. I quite like Starlight and am friends with Ming Huang!" A figure wearing white battle armor coldly watched from afar, "But that one called Jin, is too despicable and shameless! Last time at the 'Abyss of Destruction', unable to confront me directly, actually attacked me while I was in the midst of slaughter! I despise these contemptible souls the most."

This figure in white battle armor, filled intensely with the aura of destruction.

"Golden Lord, Lord Mo Man, Lord Nai Gu, just these three! Are the most contemptible in the Cultivator Camp." A feathered creature sitting there had a peaceful expression, with warm white feathers all over, his presence was discreetly ordinary, but he is also one of the presences at the pinnacle of the Infinite Primordial Space, "Lord Nai Gu doesn't threaten me one on one, but he teamed up with Golden

Lord and Lord Mo Man...the three Lords ambushed me as one."

"Haha, heard your feathers were all plucked clean." The white battle armor laughed.

"Kaf Xiu!" The feathered creature burst into anger.

"My fault, my fault." The white battle armor said, waving a hand in front of him, revealing the image of the feathered creature gravely injured, feathers falling off, leaving just some short feathers, blood covering the body, "Oh, I did remember incorrectly, you still had lots of feathers left."

The feathered creature glared at him.

The figure in white battle armor smiled again as he put away the images. At his level, collecting 'jokes' of those on the same level was quite a hobby. He had no tribe, no companions, existing in isolation, yet having reached such power. He had to find some 'fun' for himself.

The feathered creature also endured it. He had descendants, unlike Ka Fuxiu, who existed alone, feared no one, and dared to insert himself wherever there was a commotion.

"Ka Fuxiu, Feather Emperor." That mass of gray mist gazed at the distant battlefield, "Eight Lords joining forces can suppress seventy-three Ancestors, kill three, and drive the remaining seventy Ancestors to retreat. These Cultivator Lords are indeed formidable."

"With them working together, even in the Infinite Primordial Space, they are an extremely strong force." Feather Emperor nodded, somewhat envious. Because the group he commanded had only him who could rank in the Land of Eternity.

...

"Is the Cultivator Camp gaining the upper hand?"

"We also conquered three world groups of the Cultivator Camp. When the war ends, will the eight Lords target us?"

Some ancient beings watched the battlefield from afar, feeling a bit

uneasy.

During the confrontation between the two camps, some other camps also took the opportunity to occupy several world groups. Some occupied two or three world groups, others even seized over a hundred world groups!

"Originally thought the Cultivator Camp would surely fail. The Innate Primordial Life Camp occupied the most world groups, we could have shared a bit. Who would have thought the situation to reverse."

"Once the Cultivator Camp wins, those eight Lords likely wouldn't rest."

"Taking advantage of the situation, there are twelve forces invading world groups. Does the Cultivator Camp dare go full-on war with them?"

Among these twelve forces, some are strong, some weak.

The strongest force is the Ice Peak Camp.

The Ice Peak Camp is an alliance formed by 'twelve beings of the Land of Eternity.' Although their number is far less than the Innate Primordial Life Camp, in terms of deterrence, the Ice Peak Camp is more terrifying because most of them have no tribe concerns, they act naturally more domineering and lawless.

They actually don't care much about the 'Source World Origin.' What they need are the extremely special and precious resources nurtured within the vast territory.

In the eyes of the Ice Peak Camp, occupying over a hundred world groups is already very giving face to the Cultivator Camp. After all, if they exerted themselves, they could seize several times the territory.

"We've only occupied over a hundred world groups, what can the Cultivator Camp do?"

"Do they dare go to war with us?"

The Ice Peak Camp didn't care at all.

...

Cultivator Territory, Dark World Group, Land of Origin Source World.

Luo Feng stood on a terrace of the Huyang City Lord's Mansion. At this moment, his body had completely transformed, although his energy reserve was only one percent of the total, this reserve was already comparable to the main battle avatar of the smallest Lord among them, Lord Mo Man.

"The Cultivator Camp faces too many crises." Only after breaking through did Luo Feng understand many secrets.

On Earth, wherever people are, there is conflict.

In Infinite Primordial Space, there are also various conflicts.

The Innate Primordial Life Camp is considered the most hostile force. Yet with other camp forces, there are also many big and small conflicts.

"Brother Yuan can come all the way from the most humble beginnings, it's not easy." Luo Feng knew the situation of the Cultivator Camp was much better than it was early on, thanks to the appearance of several Lords including Starlight Lord.

"The crises of the Cultivator Camp will be resolved one by one in the future." Luo Feng had the patience.

As a lord, with an infinitely long lifespan, he has the time to keep fighting! Each Lord was filled with confidence in the future.

"Lord Cheng, the most wonderful thing..."

Luo Feng, as a creature of his homeland Source World, even after becoming a lord, the Source World Origin didn't resist him, allowing Luo Feng's power to easily penetrate and effortlessly refine and control the entire origin.

After complete control, the homeland Source World seemed to become his other physical body.

At this moment, the entire Land of Origin Source World had no secrets in front of him anymore! Everything was completely under his control, including the recorded 'Time River' of the Land of Origin. In the Time River, countless creatures rise and fall, whether alive or dead, these creatures continued to luminously exist on their former timelines.

Only those who had died, their timelines were just a segment, already stopped.

Luo Feng could lift these creatures from the Time River, allowing their timelines to continue, even to persist eternally.

Within the scope of the Source World, within the Braided Cage, Luo Feng could indeed allow them eternal life!

"Giant Axe senior..." Luo Feng saw those familiar, whether strong or weak figures. He even saw the blissful life of his teacher, Mountain sitting guest, when he was still 'God King Jin.'

Every regret could be remedied.

"This is what is most wonderful about becoming a lord." Luo Feng smiled.

——

Recently, I got positive again, writing is a bit slow.

Chapter 412: Episode 10 - 21 Support Forces

Chapter 412: Episode 10 Chapter 21 Support Forces

The first Holy Land of the Innate Primordial Life Camp is the 'Infinite World', home to the Infinite Great Serpent Clan, with more than ten ancestors at the Ancestor Level.

The second Holy Land is the 'Giant God Realm', which is also a special world no less than the 'Infinite World'. The life born here is a World Level Primordial Life from birth! Their size is among the largest in the 'Innate Primordial Life Camp'.

The group proliferated in the Giant God Realm is also known as the 'Giant God Race', which is the second-largest group, second only to the 'Infinite Great Serpent Clan', with ten reaching the Ancestor Level!

"Buzz!"

The Infinite Snake Ancestor, Silent Extinction Ancestor, Inference Fire Ancestor, Infinite Ancestor, with a single thought, their incarnations descended upon the Giant God Realm.

The Giant God Realm is inhabited by thousands of gigantic creatures, at least twenty to thirty percent the size of the Source World. Some enormous beings comparable to 'Lord Wulan' looked distantly at the four incarnations.

"The Infinite Snake Ancestor and the others have arrived."

"I heard they clashed with the Cultivator Camp and fell behind."

"Now they come to seek our help."

Each gigantic creature communicated telepathically, gloating.

The Giant God Race and the Infinite Race have significant conflicts. However, currently, the Infinite Snake Ancestor holds the highest prestige in the Innate Primordial Life Camp! After all, besides its formidable strength, the Infinite Snake Ancestor is also undying and undying!

"Giant God Brother."

The four incarnations arrived at a spot, looking at a massive creature before them.

It is a bipedal giant beast, covered in black and golden scales with a pair of massive wings besides its arms. Just sitting there, it dwarfs a Source World.

In terms of size, across the entire Infinite Primordial World, it ranks among the top three. It is several times larger than Wulan.

It is one of the nine emperors of the Innate Primordial Life Camp, the 'Giant God Emperor'! Also the leader of the Giant God Race! This time, the three emperors who did not participate in the battle are led by the 'Giant God Emperor'.

In terms of sheer frontal power, it is considered the most formidable among the nine emperors! However, its ability to protect itself is weaker, and several beings can threaten its existence. The Cultivator Lord 'Yuan' is particularly restraining it. Naturally, its status in the Innate Primordial Life Camp is far weaker than the Infinite Snake Ancestor.

"I heard you were defeated?" The Giant God Emperor looked with great interest at the four.

"A new lord has appeared, joining forces with eight lords, making it very tricky." The Infinite Snake Ancestor said, "We indeed cannot win, so we need your help from you three."

The Giant God Emperor nodded slightly, and then two terrifying forces appeared beside them.

A massive black mist avian descended nearby, its countless black mist like countless calamities coalesced, naturally bringing down endless calamity power when engaging with enemies.

Another was a fat giant beast with sleek fur, its colorful fur constantly changing, with each strand containing endless void, smiling as it looked at the four in front of them.

"Black Tide Ancestor, Primordial Beast Ancestor." All four incarnations greeted.

Black Tide Ancestor and Primordial Beast Ancestor are also among the nine emperors! The most crucial point is, they do not belong to any group, being unique existences. In the Infinite Primordial Void, such unique existences mostly do not consider themselves part of the 'Innate Primordial Life Camp'.

These two have excellent relations with the Giant God Emperor and tacitly acknowledge themselves as part of the Innate Primordial Life Camp. They rarely take action at least.

"You all should understand, this battle cannot be lost." The Infinite Snake Ancestor said, "Considering the full strength of our group, if we lose to the Cultivator Camp, our Innate Primordial Life Camp's intimidating power will be greatly reduced in the future."

"I don't like war."

The Giant God Emperor sighed softly.

It prefers calmly watching the myriad things in the Infinite Primordial Space, observing various grudges and conflicts, enjoying being a 'bystander'.

"I have never withheld the resources that should be supplied to the 'Giant God Race'." The Infinite Snake Ancestor said, "At this juncture, you still refuse to fight? Allowing the Cultivator Camp to trample over us?"

Silent Extinction Ancestor, Infinite Ancestor, Inference Fire Ancestor all looked at the Giant God Emperor.

The Innate Primordial Life Camp is divided into two factions, one with the Infinite Snake Ancestor at its core, and the other with the Giant God Emperor at its core.

"I understand, this battle cannot be lost." The Giant God Emperor nodded, "But we are only willing to participate in this battle. After this battle, we will withdraw."

Beside them, the Black Tide Ancestor and Primordial Beast Ancestor also nodded, clearly agreeing with the Giant God Emperor's statement.

"Rest assured."

The Infinite Snake Ancestor nodded, "The Cultivator Camp has gained a new lord, and this new lord can instantly restore their companions to the pinnacle! They have become even trickier. After winning this battle, I will also take the opportunity to end the war."

Losing the battle ends the war.

Winning the battle ends the war. The difference between the two is significant.

The Infinite Snake Ancestor needs to carry the momentum of defeating the eight lords to prove to the entire Infinite Primordial Space that they are still the strongest.

"How much do you know about the new lord?" The Primordial Beast Ancestor inquired from the side, "Since we are going to war, we need to understand everything about the opponent."

"Buzz."

A multi-clawed exotic beast crawled out of space-time, its claws easily grasping individual time lines. After crawling out, it spoke, "I have investigated many past time lines and have clarified the background of the new lord 'Luo Feng'."

"Luo Feng, born in the Dark World Group, Origin Continent Origin World."

"There are obstacles within the Source World, and little is known. It's only known that his cultivation time is very short," the multi-clawed exotic beast said, "He cultivated for less than ten thousand epochs, reaching what the Cultivator Camp calls the 'extreme under the braided cage', and then cultivated for less than two thousand epochs, directly becoming a lord from under the braided cage."

"From under the braided cage, directly becoming a lord?"

The four incarnations, as well as the Giant God Emperor, Black Tide Ancestor, and Primordial Beast Ancestor, were all shocked.

"Yes, I haven't found any information about him becoming a World-level Primordial! Even his homeland Source World was only refined after he participated in the battle," the multi-clawed exotic beast said.

"Regardless of whether he became World-level Primordial! He became a lord from under the braided cage in less than two thousand epochs?" The Giant God Emperor couldn't help but say, "Based on my understanding of the Cultivator system, his talent and potential exceed those of the previous seven lords."

"Truly tricky." The Infinite Snake Ancestor also felt troubled.

Watching the rise of the Cultivator Camp helplessly, they have no means.

Infinite Snake Ancestor indeed does not need to consume the 'Source World Origin' anymore. However, for its clan, the entire Infinite Great Serpent Clan... the best food is the Source World Origin.

For the sake of the clan, it is not willing to give up.

"They are getting stronger, and our Innate Primordial Life Camp is also growing stronger," the Silent Extinction Ancestor said calmly, "Which of the two great camps will win or lose is still uncertain."

The two great camps.

One side has countless Source Worlds, a continuous source of younger powers, and perhaps a new lord might be born.

The other side has a vast Infinite Primordial Space, countless Innate Primordial Lives, and the speed of a new 'Ancestor' being born is much faster than a lord.

Both of these great camps understand that the other is their greatest opponent! They fight the hardest against each other.

Like the current Ice Peak Camp, it is an alliance of twelve entities from the Land of Eternity, seeming very powerful. However, firstly, they have no subsequent power. Secondly, being an alliance, they are not united enough.

The two great camps currently fighting the hardest are much more united.

"This Lord Luo Feng is a newly broken-through lord," the Giant God Emperor pondered before saying, "Taking advantage of his current inexperience, we must destroy the Cultivator Camp in one fell swoop. In the future, when he becomes more comprehensively powerful, he will be much more troublesome."

"When do you plan to set out?" Infinite Snake Ancestor asked.

"The sooner, the better," the Giant God Emperor said calmly.

Once the Ancestors decide to gather, the speed is very fast.

The Giant God Emperor, Primordial Beast Ancestor, and Black Tide Ancestor take the lead, along with more than twenty other Ancestors willing to follow them, plus some resting ancestors at the rear, totaling thirty-five Ancestors gathering together.

"I will lead everyone on the journey."

A multi-clawed Exotic Beast led these thirty-five Ancestors, swiftly crossing multiple timelines, heading towards the Cultivator Territory.

"I have long said, there is no need to corner the Cultivator side too much! If you push them too hard, they might become a significant

threat, perhaps forcing a strong figure to emerge. They should be allowed to be more at ease."

"Yes, even if we completely break through all the Cultivator territories, so what? Once those seven lords have no territorial concerns, they will go completely mad. With the huge hatred between them, the seven lords will continuously seek revenge."

"Infinite Snake Ancestor is too confident."

"It is for the whole Infinite Race, the fastest way for the Infinite Race to grow is by consuming the Source World Origin."

"Our Giant God Race can slowly absorb the Primordial Force, we don't need to consume the Source World Origin at all."

The Ancestors were discussing among themselves.

The Giant God Emperor and the others were quite candid too.

Acting alone, the Giant God Emperor indeed has significant weaknesses.

However, once teamed up with companions 'Primordial Beast Ancestor and Black Tide Ancestor,' their methods complement each other, there are no weaknesses! Comparable to three entities from the Land of Eternity joining forces! That's why the three of them have the qualification to become the second-largest faction of the Innate Primordial Life Camp.

...

"Thirty-five Ancestors have set off."

"Led by the Giant God Emperor."

"Truly worthy of the Innate Primordial Life Camp, mobilizing such a terrifying force."

Reaching the Ancestor Level, each life form's fluctuation is very strong. Unless someone like Luo Feng, who is adept at life, can restrain all fluctuations. Otherwise, once an Ancestor Level existence

acts, the same level of existence can clearly sense it.

A collective action of thirty-five, the terrifying fluctuations can be remotely sensed by forces from all sides in the Infinite Primordial Space.

"Only the Cultivator Camp and Ice Peak Camp could possibly withstand this collective action of thirty-five," various parties sighed. Although there are many forces in the Infinite Primordial Space, none have the confidence to withstand thirty-five Ancestors joining forces.

"The eight lords of the Cultivator Camp are indeed terrifying! Capable of suppressing 73 Ancestors! Forcing the Innate Primordial Life Camp's Ancestors to almost all come out."

"With over a hundred Ancestors joining forces, although each of the eight lords of the Cultivator Camp is very strong, they probably still can't withstand it."

Various forces are watching this terrifying confrontation.

...

Cultivator Territory.

The enormous sphere 'Initial Ancestor' hovered there, with numerous Ancestors temporarily hiding inside it, restoring strength and patiently waiting for their companions' support.

The eight lords formed a battle array, completely covering this area.

"Thirty-five Ancestors have set off," Yuan looked distantly.

Luo Feng and others all looked into the distance.

Their gaze could sense and see those thirty-five Ancestors from afar.

"The Giant God Emperor and the others have also made a move," Yuan said with a serious expression.

"The three of them joining forces is no less than three strong entities from the Land of Eternity," Starlight Lord frowned, "With over a

hundred Ancestors joining forces, especially with the nine emperors acting together, their overall strength will surpass ours. I will inform everyone of the possible combat scenarios in many future timelines."

Luo Feng, Lord Wulan, Jin, Mo Man, Nai Gu, Ming Huang all felt the pressure.

The cooperation on the Cultivator side is much stronger, with Starlight observing numerous future timelines, and his Space-Time Domain integrates into the entire battle array, plus Yuan's formation, which perfectly coordinates the power of each lord...

In comparison, the cooperation on the Ancestor side is much cruder, but the sheer number is overwhelming, with over a hundred Ancestors, especially the nine emperors as the core, their overall strength is still extraordinarily strong.

"Winning this battle will make things much easier in the future," Starlight said softly.

"We must win," Jin gazed into the distance.

Luo Feng knew well that, according to the various cooperation plans studied by the lords, he is the key factor in winning this battle. After all, he is the newly broken-through one and the external world knows the least about him.

Chapter 413: Episode 10, - 22: The Madness of the Ancestors

Chapter 413: Episode 10, Chapter 22: The Madness of the Ancestors

The eight lords waited quietly.

Among the Innate Primordial Life Camp's Nine Emperors, 'Initial' and 'Mother of Space-Time' are included because of their Undying and Undying status, as their attack abilities rank middle to lower among the Ancestors. However, the other seven have extremely terrifying strength.

"It's time."

At this moment, the eight lords were poised to strike.

The entire Infinite Primordial Space, with some beings of the same level, were watching from afar.

"Boom——"

Suddenly, the always calm Initial Ancestor erupted with an extremely dazzling light on the surface, encompassing a vast area with infinite brilliance! At the same moment, thirty-five ancestors also appeared within the area illuminated by this light.

The previously hidden ancestors all revealed themselves as well.

A total of one hundred and five Ancestors completely gathered!

Except for a few newly advanced ancestors, those who refuse to

follow orders, and severely injured ancestors... the rest have completely assembled. Led by the Nine Emperors, a total of one hundred and five Ancestors gathered here.

"Destroy the Cultivator Lords!"

"Annihilate them!"

This time, the Innate Primordial Life Camp had long prepared a plan, and the moment they gathered, they unleashed their fury without reservation! The highest level of power mastered by the one hundred and five ancestors, after a simple coordination, overwhelmed the eight lords of the Cultivators like a tidal wave!

Rumble~~~

The power and Domain of the eight lords, under the array formation deployment, fully resisted. But it only slightly hindered the attack before the endless terrifying onslaught fell upon Wu Lan and Luo Feng.

"This might—" The expressions of Golden Lord, Lord Mo Man, Lord Minghuang, and Lord Nai Gu all changed.

In the face of the absolute power of over a hundred ancestors combined, unless one's ability to preserve their life is incredibly strong, they would be utterly destroyed! The main battle avatars of these four couldn't resist such power.

Yuan and Starlight also could only dodge in the face of such might.

But in this collective confrontation... while they both could dodge, the other lords couldn't!

"Boom——"

Luo Feng and Wu Lan both felt the endlessly heavy might crushing down on them.

"Hahaha, exhilarating!" Wu Lan laughed loudly, even wanting to actively intercept many powers, his massive body formed by Primordial Material Dao continuously sustaining injuries, but he

didn’t care about these injuries.

"Target Luo Feng!" The Ancestor’s side tried to avoid Wu Lan as much as possible, so even if Wu Lan actively wanted to intercept, he could only block about half of the power.

The remaining half of the power fell on Luo Feng.

The various highest-level powers wantonly fell on Luo Feng, corroding, destroying, and wreaking havoc.

"The pressure is a bit much!" The protective energy layer on Luo Feng’s surface was penetrated again and again, and ten billion eight million Origins frantically replenishing, along with various forces tearing at and destroying Luo Feng’s body.

Luo Feng’s body cracked with many wounds, staining part of his body with blood, with much more severe injuries.

But Luo Feng’s physical body only accounted for one portion of energy, while ten billion eight million Origins accounted for ten portions of energy! Even if the physical body was severely injured, Luo Feng, with his terrifying Life Force, could partially restore from the void. Plus, with the recovery of ten billion eight million Origins, the physical condition was still within the bearable range.

Instead, the ’protective energy layer’ consumption was somewhat significant.

"In the span of a breath, approximately five percent of the energy reserve is consumed." Luo Feng sensed.

Previously, facing seventy-three ancestors, Luo Feng would consume one percent of the energy reserve in the battle array within the span of a breath. Now, it had increased fivefold! Clearly, as the power continued to rise, the damage to Luo Feng would increase exponentially.

If the power reached a certain limit, Luo Feng’s main battle avatar could also be blasted apart.

"This Luo Feng withstood it?" The numerous ancestors led by the

Nine Emperors were secretly surprised. They could sense that Luo Feng's body was significantly less resilient than 'Wu Lan's body,' with much more severe injuries.

Yet Luo Feng withstood it, continuously maintaining in the Pinnacle state.

"You should also try our lords' tricks!"

A voice rang among the many ancestors.

Lord Mo Man burned his main battle avatar, and the vast space-time where the ancestors resided suddenly turned into countless musical notes, vibrating. The entire space-time turned into a song, echoing in every ancestor's soul.

For the invisible attack, targeting both body and soul.

Group tactics, no ancestor could avoid it, they could only endure it.

The ten-plus ancestors who were severely injured last time, although somewhat recovered after ten days of truce with the help of their companions, still had three with rather severe injuries, which suddenly worsened in the face of Lord Mo Man's move.

"Haha, this time we shall kill a few more ancestors!" Jin's voice also rang, he burned all his power into thirteen black spheres, which appeared in the area where the ancestors were, erupting instantly and obliterating the surrounding vast area.

Subsequently, brilliant golden lightning also descended! Striking one by one, locking onto enemies with no escape!

...

"Ignore it."

"Annihilate them quickly!"

While Mo Man, Jin, and Minghuang were launching moves one after another, the Nine Emperors remained unfazed, having already understood the lords' means, naturally having countermeasures.

They couldn’t stop these lords’ lethal strikes, so they didn’t bother defending them! Arranged for the Infinite Ancestor, in cooperation with Mother of Space-Time, Initial coordinated to save some severely injured ancestors, whereas the other six of the extremely powerful Nine Emperors led the ancestors in a full-force attack.

"Wu Lan!"

Along with an earth-shattering roar.

Infinite Snake Ancestor roared, its gigantic figure instantly became blurred, its blurred figure enlarging by a thousandfold, tens of thousands of times, making it much larger than all the ancestors combined.

It bore the name of ’Infinite’! It could indeed become infinitely large, with the largest size even bigger than an entire world cluster, and it could also fuse with the Infinite Void, becoming completely undying and imperishable.

Only in that state, it had no attack power.

"Hoo!"

First, it became huge and covered Wu Lan! Then, it instantly condensed and shrank.

An immense serpent’s body confined Wu Lan completely at the abdomen! Furthermore, two terrifying forces merged into the serpent’s body, one being the Silent Extinction Ancestor, transforming into a mass of black light wrapping around half of Wu Lan’s body. The other was the Inference Fire Ancestor, resembling a flaming star, enveloping the other half of Wu Lan’s body.

The Infinite Snake Ancestor, Inference Fire Ancestor, and Silent Extinction Ancestor, all well-versed in confinement, joined forces, making it difficult for even Wu Lan’s formidable body to escape.

Previously, the Inference Fire Ancestor had devoured Wu Lan, confining her for about a breath of time. Now, with three of them working together, Wu Lan could not break free at all.

"Break!!!" Wu Lan struggled with all her might. Despite their lord-level combat power, and with their cooperation, Wu Lan couldn't break free regardless of her strength.

"Extinguish Luo Feng!"

At this moment, two Ancestors were severely injured and hid within the Initial Ancestor's body. As the three Infinite Snake Ancestors held Wu Lan in check, exactly one hundred Ancestors remained! These hundred Ancestors acted together, weaving a tapestry of highest-level powers directed at Luo Feng!

Although missing three of the strongest among the Nine Emperors - the Infinite Snake Ancestor, Inference Fire Ancestor, and Silent Extinction Ancestor as commanders, the overall strength of these hundred Ancestors decreased by at least twenty percent, yet this show of power still frightened Luo Feng.

"Space-Time Maze!"

The Starlight Lord took action.

Among the Ancestors, the highest Void attainment belonged to the 'Infinite Snake Ancestor,' who repeatedly clashed secretly with the Starlight Lord. Though disadvantaged, it indeed impacted the Starlight Lord's space-time techniques.

Currently, the Infinite Snake Ancestor needed to fully suppress Wu Lan within. Wu Lan's resistance was too strong. In this situation, the Infinite Snake Ancestor couldn't fully manipulate the Void.

As for the 'Mother of Space-Time'? Her Void attainment was not up to par with the 'Infinite Snake Ancestor,' and her time attainment was far less than the 'Starlight.'

"Booming——"

The terrifying power unleashed by the hundred Ancestors caused the Space-Time Maze to be fragmented in the face of absolute might! Yet it still forcibly redirected three to four-tenths of the power, with the remaining power then impacting the battle array.

After being blocked and weakened by the Formation, it finally fell upon Luo Feng, who felt it was only about ten percent stronger than before, still within the bearable range.

"This Starlight Lord!" The Ancestor side was also troubled.

With the Infinite Snake Ancestor fully suppressing Wu Lan, the Starlight Lord could unleash his space-time methods freely!

"Boom——"

Amid the terrifying power from the Ancestor side, an immense, colossal figure took a step to appear near Luo Feng.

Its size was immense, several times larger than Wu Lan! Its entire body was covered with black-golden scales, its enormous wings were exceedingly sharp, and a massive circle of colorful light surrounded it, with endless black mist permeating its surroundings.

"Giant God Emperor! Primordial Beast Ancestor! Black Tide Ancestor!"

Luo Feng recognized them at a glance.

That immense colorful light domain was transformed by one of the Nine Emperors, the 'Primordial Beast Ancestor,' whose body constituted the most terrifying domain in the Infinite Primordial Space! Within their domain, even the Starlight Lord couldn't manipulate any Void power.

If closely observed, one could see that the enormous colorful light domain was actually a fat giant beast with colorful hair.

For every part in the domain was its hair, its body. Other strong figures naturally couldn't manipulate any Void power. The Starlight Lord could only escape this domain using the timeline.

Outside the colorful light domain, the endless black mist was the transformed body of the 'Black Tide Ancestor.'

The Black Tide Ancestor turned into an endless Black Tide Disaster! It was also a disaster domain power; its domain suppression was

weaker than the 'Primordial Beast Ancestor,' yet various disasters befell upon enemies within.

The 'Black Tide Disaster Domain' and 'Primordial Beast Ancestor Domain', dual domains enveloped the body! Combined with its most terrifying body! In this state, the 'Giant God Emperor' had no weaknesses.

"Bang——"

It carried the massive domains, tearing through the Void to appear in front of Luo Feng.

"Scram!" Luo Feng slashed out a fierce blade, the blade light roared past the Black Tide Disaster Domain, then through the stronger 'Primordial Beast Ancestor Colorful Light Domain', the blade light was thoroughly submerged, unable to even touch the terrifying body of the Giant God Emperor.

The Giant God Emperor approached, with massive arms ready to embrace, and huge wings covered forth. Even the colorful light domain and the black tide domain engulfed Luo Feng.

"This domain——"

The various disaster powers of the Black Tide Domain did not bother Luo Feng, as his endless life force could resist.

But the bindings of the Black Tide Domain and the endless colorful light's shrouding and binding made every movement extremely laborious for Luo Feng. As the Giant God Emperor's arms and wings enveloped him, Luo Feng couldn't evade, being embraced in an instant.

Under the onslaught of a hundred Ancestors, the battle array of the Lord's side was already under great stress.

With the Giant God Emperor and the others working together, Luo Feng's movement technique was not as proficient as that of the Starlight Lord and others, crucially, he was resisting the Ancestors' encirclement, unable to hide or escape.

A mere face-off and he was entangled by the Giant God Emperor and the others.

"Good!"

"Target the two with the strongest physical bodies!"

The Ancestors were invigorated.

Among the eight Lords, Wu Lan and Luo Feng were the most capable of withstanding power, playing a significant role in the battle array, especially Luo Feng, who could quickly restore his companions to the pinnacle!

To deal with Luo Feng and Wu Lan, previously the strength of the Infinite Snake Ancestors and others was insufficient, and the Infinite Snake Ancestor, Silent Extinction Ancestor, Inference Fire Ancestor together could only ensure confining one.

With the Giant God Emperor and the others together, they could ensure the confinement of another Lord.

"Hoo."

After confining Luo Feng, the Giant God Emperor and the others immediately retreated as their enormous sizes and broad domain ranges significantly affected the other Ancestors' encirclement.

Upon this retreat, the Giant God Emperor and the others withdrew into the group of Ancestors.

"Confine me?"

With the Giant God Emperor and others jointly suppressing him, as Luo Feng entered the Ancestor group, his eyes turned icy.

"Explode for me!!!"

In an instant, Luo Feng's physical body vanished.

His physical body transformed into energy, all of it pouring into the ten billion eight million Origins! The 'ten billion eight million

Origins' was already saturated with energy; as it was forcibly poured, the ten billion eight million Origins suddenly contracted.

Subsequently, it erupted into an endless dazzling energy storm! Instantly shredding all obstructions and bindings!

Bang bang bang bang bang bang!!!!!!

Chapter 414: Episode 10, - 23, Ceasefire (Good luck on the college entrance exam)

Chapter 414: Episode 10, Chapter 23, Ceasefire (Good luck on the college entrance exam)

With the help of his two companions, the Giant God Emperor had originally restrained Luo Feng, but Luo Feng suddenly disappeared, transforming into 1.08 billion origins, and these origins, like a brilliant galaxy, naturally formed a formation.

This was one of the three forbidden techniques Luo Feng developed based on his own advantages, the 'Origin Great Destruction'.

These three forbidden techniques all require a suitable environment to achieve the best effect. They are called forbidden techniques because the cost of using them is incredibly high.

"Buzz——"

The 1.08 billion origins formed a formation, triggering a chain reaction! Instantly turning into an energy storm capable of destroying everything! This energy storm tore apart space-time, and even the massive abdomen of the Giant God Emperor nearest to the 1.08 billion origins was instantly torn through, its enormous body directly severed.

"Oh no!" The Giant God Emperor was both shocked and furious.

"Avoid it!" The dual domains of the Primordial Beast Ancestor and the Black Tide Ancestor were also the first to be impacted by this endless energy!

The dual domains they formed were indeed formidable, but even the closest 'domain' was destroyed and annihilated, turned into energy in the face of absolute power, which further fueled the energy storm, making it even more terrifying!

A massive energy storm, like a radiant jade disc, erupted from the abdomen of the Giant God Emperor!

It tore through the body of the Giant God Emperor, pierced through the dual domains, carrying more terrifying energy, and spreading in all directions!

"Boom!"

When the power exceeded a certain limit, it triggered a special reaction.

The surrounding space-time was instantly annihilated, and the vast area instantly became a dazzling ball of light. The dozens of surrounding ancestors didn't even have time to react, completely submerged in the energy storm!

"How can this be?" The Giant God Emperor was filled with rage and panic.

Part of the dual domains of the Primordial Beast Ancestor and Black Tide Ancestor protected the legs of the Giant God Emperor, while another part protected its chest and above!

Even in the terrifying center of this explosion, with the protection of the ultra-powerful dual domains, the Giant God Emperor only lost a third of its body. The dual domains protected the rest of its body, allowing it to merge together.

"Luckily, I had you two. Otherwise, I would have died this time." The Giant God Emperor was still somewhat frightened.

Unlike Luo Feng and Wulan, Luo Feng and Wulan, as lords, had

bodies that they created themselves, naturally pursuing extremities. The bodies of Luo Feng and Wulan reached the theoretical limit in energy density.

But the Giant God Emperor was not! It was born of the Infinite Primordial Space, accompanying the transformation of its life core, growing naturally.

Though its body was enormous, its explosive power was among the strongest even among the Nine Emperors. But its life preservation capability was much weaker in comparison, and its body's energy density wasn't as high as Wulan's or Luo Feng's! Faced with such a powerful force at close proximity, if not for its two companions, it would indeed have been entirely annihilated.

"That Luo Feng still had such a move, costing me a tenth of my body." The Primordial Beast Ancestor was surprised, its body was the strongest domain in the entire Infinite Primordial Space!

Along with Black Tide Ancestor, they excelled in domain skills. Cooperating with the Giant God Emperor, they complemented each other and had incredible deterrence power.

"I also lost nearly a tenth." Black Tide Ancestor's domain was at the outermost layer, yet the loss was similar to that of the Primordial Beast Ancestor.

The three suffered a significant setback, now becoming more cautious, observing everything around.

This terrifying power swept through dozens of surrounding ancestors, whose life-saving abilities were far inferior to the combined trio of the Giant God Emperor! Even being somewhat further away and facing slightly less impact, it was still quite tragic.

A total of twenty-six ancestors were heavily injured under the terrifying force.

"Annihilate!"

At this moment, twenty-six incredibly dazzling golden lightnings descended!

Lord Minghuang did not hesitate to burn his main combat avatar, the twenty-six terrifying golden lightnings were unavoidable, already striking the twenty-six heavily injured ancestors.

"Ah."

"No——"

"Help!"

The twenty-six ancestors were already gravely injured, and Lord Minghuang's all-out attack terrified them further, the golden lightning unavoidable. Even though their companions attempted to save them, the golden lightning still struck.

Five of the gravely wounded ancestors, unable to protect their life cores, saw their cores crack open under the golden lightning.

These five ancestors perished on the spot!

The other twenty-one ancestors were all gravely wounded, seized by panic.

"Collect."

Endless light enveloped, rescuing them.

However, the dead bodies of the five ancestors were quietly moved away by space-time.

"Five ancestors have died?"

The other ancestors present were somewhat in shock, unable to comprehend what they were witnessing! In previous times, some among them had also fallen, but that was usually after long battles, with the weaker ones among them dying.

But this time was too sudden! Instantly, twenty-six ancestors suffered heavy injuries, followed by the death of five!

The five ancestors who died were among the stronger ones, not the weakest among the ancestors. They purely had bad luck, being too

close to ’the three of the Giant God Emperor’! The terrifying explosion dealt too heavy a blow.

"Unlucky?"

"Too close?"

Such a reason was unconvincing to the ancestors.

They could accept being eliminated in war due to being the weakest, but could not accept ’falling due to bad luck’. This time, it was five ancestors with bad luck, would it be their turn next time?

"Die!"

"Cultivator Lords, go to your deaths!"

Chapter 415: Episode 10, - 23, Ceasefire (Good luck on the college entrance exam)_2

Chapter 415: Episode 10, Chapter 23, Ceasefire (Good luck on the college entrance exam)_2

"Die, all of you!!!"

Five ancestors perished, twenty-one severely injured ancestors were taken away by the Infinite Ancestor! The remaining seventy-odd ancestors were filled with rage, and even a hint of fear, as they unleashed their attacks recklessly.

At this moment, the Cultivator Lord Battle Formation, without Wu Lan and Luo Feng, how could it withstand?

The seventy-odd ancestors struck with full force, and the three of the Giant God Emperor struck with anger as well.

"Space-Time Maze!" Starlight Lord attempted to use space-time shift to redirect these powers, but this time, the Infinite Snake Ancestor temporarily relinquished the suppression on Wu Lan, allowing 'Inference Fire Ancestor' and 'Silent Extinction Ancestor' to restrain for a short time.

Infinite Snake Ancestor fully controlled the Void, preventing the formation of the Space-Time Maze.

"Boom——"

Various highest-level powers interwove, enveloping the area.

"Go!" In an instant, Starlight Lord also burned part of the main battle avatar and forcibly shifted away three-tenths of the power under the influence of the Void controlled by Infinite Snake Ancestor.

"Nai Gu!" Yuan's formation also strived to resist, further reducing part of the power.

Lord Nai Gu transformed into a colossal entity with nine massive heads, his enormous body actively devoured all power, and though his body surface began to fragment under these powers, it was rapidly restoring.

Mastering several Ancestor bloodlines as one, Lord Nai Gu was skilled in all techniques! Before Luo Feng became a lord, he assisted 'Wu Lan' in resisting external powers.

But with the strikes of over seventy ancestors, even after multiple reductions, nearly half of the power still fell! Lord Nai Gu's body fragmented within a single breath.

"Phew——"

Luo Feng's one billion eight hundred million origins, the Great Destruction Storm, was transmitted over a long distance, now very weak.

Suddenly involving endless range with faint power, it quickly contracted.

Almost in the blink of an eye.

Within the Cultivator Lord Battle Formation, endless power instantly condensed into a silhouette, a figure clad in black with black hair.

His figure was massive, standing in front of Lord Nai Gu, resisting the assault of those highest-level powers.

"Nai Gu, leave it to me." Luo Feng's voice rang out.

Seeing the newly appeared Luo Feng, the fragmented-bodied Nai Gu

couldn’t help smiling: "Just one breath, and I almost got blown apart!"

The eight lords knew each other’s techniques; they all understood Luo Feng’s forbidden technique ’Origin Great Destruction’, although it fully unleashed all power! Yet Luo Feng’s strength could even recover part from the void.

Every unit of Luo Feng’s energy contained immense spirituality, after the destructive momentum ended, it all gathered again.

"Still have twenty percent of the energy reserve." Luo Feng could sense his state.

After the complete destructive burst, two-tenths could still be restored.

The physical body appeared intact, yet the newly formed ’one billion eight hundred million origins’ were very weak, and in a weakened state, the energy absorption speed greatly diminished.

Stronger energy reserve equals faster absorption speed.

The weaker oneself is, the slower the absorption.

If it were just a weak avatar formed by a mere thought, absorbing for a day would barely restore to one percent energy reserve.

"I’m too weak now, energy recovery speed is only one-tenth of the pinnacle." Luo Feng could ascertain his own recovery speed.

However, those ancestors were unaware of Luo Feng’s recovery speed.

They only saw, Luo Feng standing in front of Wu Lan, fully resisting the impact of residual power.

"Has he recovered again?"

"Wasn’t he completely transformed into an endless energy storm? How did he recover?"

Indeed, the ancestors were in turmoil.

"Is there any point in continuing this battle?" An ancestor's angry voice echoed within their companion's mind, "This Lord Luo Feng's strength is completely mysterious, he previously transformed into a destructive storm and five ancestors died. Who knows what other techniques he might have!"

"I can sense Luo Feng's energy reserve, only about two-tenths remain. We can crush these lords."

"But so what if we crush them? Eight lords, undying and undying! Once they recover the main battle avatars, they will rise again!"

"I don't think there's any need to continue this battle."

"In this entire Infinite Primordial Space, the fundamental reason for the ceasefire was because a new lord emerged! Even if the ceasefire is won, its significance is limited."

"Just for a little dignity, is it worth losing several more ancestors?"

Among these ancestors, there were already quite a few opposing the war.

This time, they felt the Nine Emperors gathered, over a hundred ancestors joined forces to hold an absolute advantage, which is why many ancestors were willing to participate. But upon realizing 'bad luck might mean death', the number of anti-war ancestors greatly increased.

"Not good." Infinite Snake Ancestor and others sensed the opposition within the ancestors.

Even some ancestors originally always following them were now against the war.

Honestly, dying five ancestors earlier was too unjust! Cultivating to the ancestor level, was so hard? Under normal circumstances, they were very difficult to perish.

"This time, because of the new lord 'Luo Feng's' strength, we were

unclear and suffered losses." Infinite Snake Ancestor's voice sounded in its companions' minds, "Once we understand him completely and have absolute certainty, then we act. For now, let's cease the war!"

Infinite Snake Ancestor realized the problem; with over thirty ancestors opposing, it couldn't continue.

Phew——

Along with Infinite Snake Ancestor, Silent Extinction Ancestor, Inference Fire Ancestor relinquishing the suppression, Wu Lan also regained freedom and immediately returned to the battle formation.

"Hmm?"

"Have these ancestors ceased attacking?"

Yuan, Starlight, Luo Feng, Jin, Wu Lan, Ming Huang, Nai Gu, Mo Man all focused on the opponents. Although Luo Feng's recovery ability weakened significantly, he still prioritized restoring his companions to the pinnacle.

Chapter 416: Episode 10, - 23, Ceasefire (Good luck on the college entrance exam)_3

Chapter 416: Episode 10, Chapter 23, Ceasefire (Good luck on the college entrance exam)_3

His own energy reserve has slowly recovered from twenty percent.

The Infinite Snake Ancestor looked at this troublesome group of Lords, knowing in its heart that after the emergence of the new Lord, 'Luo Feng', their original plan to completely destroy all territories of the Cultivators had failed.

The Cultivator Camp now has a deeper foundation, destined to be the biggest opponent to the Innate Primordial Life Camp!

In the endless future years, they will continue to fight until a clear winner is determined.

"Unexpectedly, faced with the war of extermination, you have birthed a new Lord." The Infinite Snake Ancestor spoke, as the group of Ancestors behind it also looked afar at Luo Feng and the others.

"This time was indeed very dangerous." Yuan nodded in acknowledgment, "If Luo Feng hadn't made a breakthrough, we would indeed have lost all territories."

In previous clashes, they failed time and again.

They could only try to delay the opponent's steps but couldn't prevent the territories from falling.

"This battle ends here." The Infinite Snake Ancestor spoke, "Next time, we'll determine the true victor."

Yuan nodded: "Next time, we'll determine the true victor."

Yuan also had confidence that if another Lord joined in the future, the situation would be even better.

"Let's go."

Carried by the 'Mother of Space-Time' with countless claws, the Ancestors all left through space and time, while the eight Lords watched everything.

"The ceasefire is temporary." Yuan spoke.

"The Ancestors' overall strength surpasses ours." Lord Mo Man said, looking into the distance, "Earlier, when I joined Jin and Ming Huang to burn the main battle avatar for an assault, we had some results. But this time, they were prepared, reducing the effect of our assault notably. It was still Luo Feng's forbidden technique that created a chance."

"Dividing me and the battle array actually gave me an opportunity." Luo Feng smiled faintly.

Starlight said: "Absorbing Source World Origin, and the threat of death both might lead the Ancestors to evolve. After this war, it is estimated that some Ancestors will make breakthroughs."

The Lords will progress, and the Ancestors will as well.

Mastering the 'Highest Level Power' is not the limit for the Ancestors; they will continue to evolve until reaching the level like 'Infinite Snake Ancestor' and 'Initial', which is the ultimate in one direction, Undying and Undying.

"Though the Ancestors may advance further, they are no match for us Cultivators." Ming Huang confidently smiled, and indeed, from the

early days when the gap was huge, step by step to the present, the gap continues to narrow.

"Let's return to the Land of Origin and study the Ancestors' corpses carefully." Yuan smiled, "Regardless of the outcome, this war has ended!"

"We resisted the joint attack of over a hundred Ancestors. Facing other camps afterward will be much easier." Wu Lan also remarked.

"At least we can relax for a while." Jin laughed heartily, "Brother Luo Feng, as promised, after the war ends, you must join me in exploring the Mysterious Land."

"Our Cultivator Territory still has many worlds occupied by other camps. We should first reclaim all the Cultivator Territory before you two go exploring." Yuan said.

"Alright, I'm not in a hurry." Jin said with a smile.

Luo Feng curiously asked: "Jin, where are you planning to explore?"

"Abyss of Destruction!" Jin said, "I've been there many times, always lacking a powerful companion. I'll send you detailed information about the 'Abyss of Destruction' now."

The eight Lords chatted leisurely as they returned to the Land of Origin.

(End of this episode)

Tomorrow Tomato will take a day off, and the day after tomorrow the next episode will start updating.

The college entrance exam has also begun.

Tomato wishes all the students taking the entrance exam to jot down beautifully and achieve top rankings! Twelve years of hard study will ultimately pay off! Good luck, young people!

Chapter 417: Episode 11: Primordial Blade Path - 1: Allocation of Territory

Chapter 417: Episode 11: Primordial Blade Path Chapter 1: Allocation of Territory

The Land of Origin, the Council Hall.

Inside the Council Hall, there is a black round table, the entire table is crystalline, made from the largest piece of 'Dark Realm Crystal' ever discovered in the Infinite Primordial Space, invaluable, worth several Ancestor-level corpses. Only the Cultivator Camp could produce such rare treasures; in the weaker forces within the Infinite Primordial Space, possession of such a treasure would likely lead to the doom of the entire race!

The Cultivator Camp, as one of the three major camps in the Infinite Primordial Space! Despite being suppressed by the largest force, the Innate Primordial Life Camp, for endless eras, the strength of the Cultivator Camp is also universally acknowledged.

Beside the round table are eight chairs, also crafted from 'Dark Realm Crystal.'

"Huh."

Eight figures descended into the Council Hall.

Yuan, Jin, Wu Lan, Ming Huang, Nai Gu, Starlight, Mo Man, and Luo Feng each took their seats. These eight are the highest-ranking

existence within the Cultivator Camp, deciding the fate of countless Cultivators.

"Hmm?" Sitting on the Dark Realm Crystal chair, Luo Feng instantly sensed a space-time formation.

The space-time formation, with the black round table as its core, connects the entire Space-Time Net.

In an instant, the 3,600 world groups within the Space-Time Net fell within the sensing range. Even though some world groups had been overrun and the Space-Time Net thereby damaged, the 'Space-Time Net' from past timelines was still intact and could still survey the realm.

Seated here, Luo Feng observed the 3,600 world groups, innumerable Source Worlds, countless ordinary worlds, whether intact or ruined, each reflecting in his mind.

"The Council Hall finally has an additional seat," Yuan looked at Luo Feng, smiling brightly. "It's been so difficult; after endless ages, we've finally welcomed a new Lord."

"It's really too slow for our Cultivator Camp to birth a Lord," Jin remarked with emotion.

"After all, mastering the highest power, 'Dao,' is of course much harder than for those Ancestors," said Starlight. For Ancestors, their emergence is relatively easier. During this war, several Ancestors emerged.

After the war, digesting some of the gains, Ancestors will have some improvements.

"First, allocate the spoils of this war," Yuan chaired the meeting, stating, "In this war, we killed a total of eleven Ancestors! This is unprecedented!"

"Haha, before this war, we had only killed fourteen Ancestors over endless eras," Wu Lan marveled, "and in this war alone, we killed as many as eleven!"

"The tide has turned," Starlight smiled.

"Thanks to Luo Feng," Nai Gu sighed, "Initially, we were retreating one step at a time; it was Luo Feng's breakthrough that greatly increased our overall strength. His joining allowed us to kill eight Ancestors in a short time."

After Luo Feng became a Lord and suddenly joined the battle, it immediately led to the demise of three Ancestors.

Later, when Luo Feng was forcibly captured by the Ancestors' side, and separated from his own faction, Luo Feng's then-10.8 billion Origin explosion indirectly resulted in the demise of five Ancestors.

"All thanks to Ming Huang," Luo Feng said.

Within the situation where Starlight Lord and the 'Infinite Snake Ancestor' and 'Mother of Space-Time' were mutually restraining each other, although Starlight Lord remained superior, it was difficult to deliver a fatal blow to those Ancestors.

Ming Huang's thunder, powerful and terribly condensed! Strikes swiftly! Strikes if it moves! These three aspects caused many Ancestor deaths, all reaped by Ming Huang.

"Those Ancestors struggled against you all with all their might. I simply delivered the final blow," Ming Huang laughed.

"First allocate the spoils of war," Yuan laughed as he said, "Eleven Ancestors' corpses, each Lord gets a tenth. The rest are reserved at the Land of Origin for the entire Cultivator Camp."

Even though each Lord's contribution varied, and even Luo Feng had not participated in the battle of the demise of three Ancestors, the distribution of the Cultivator Camp has always been thus.

As long as one participates in part of the battle, the spoils of war are evenly distributed!

Among the eight Lords present, besides Lord Nai Gu who particularly needed materials from Ancestor corpses, the other Lords were all meditating on the 'Dao,' not in urgent need of Ancestor materials.

"These eleven Ancestors also carried many treasures with them. The old rules, still divide evenly. The remainder is for the camp as a whole," Yuan also produced those treasures.

The Lords all casually selected a portion.

Unless urgently needed, there would be no scramble.

The Ancestors had to fight with their true bodies! Without a life core, avatars are too weak, not even thirty percent of their strength, in this level of war between the two major camps, it's essentially meaningless.

Like Starlight, merely reducing three percent of energy reserve diminished his role significantly in the war. This shows that in the war between the two major camps, one must be sufficiently strong, strong enough to be dazzling, to play a discernable role.

When Luo Feng had pinnacle energy reserve, his recovery was terrifying, powerful in close combat, and could seize opportunities to execute fearsome forbidden techniques.

Once the energy reserve diminishes greatly, a decline in all aspects. The Ancestors being internally divided at the time, with strong anti-war sentiment, if they had attacked with full strength, it would've been possible to defeat Luo Feng's main battle avatar remaining with only twenty percent energy reserve.

Of course, even a temporary victory. The eight Lords could still recover and return in full force!

This is also why many Ancestors were anti-war!

"War spoils allocation complete," Yuan said, "Let's move on to the next agenda."

"With the birth of a new Lord, our Cultivator Camp must reallocate territory according to the rules, and redistribute subordinates," Yuan looked at the other Lords, and the present Lords all listened attentively.

"First, the Dark World Group, as Luo Feng's homeland, will become

his Absolute Territory," Yuan said, "Secondly, each Lord has the responsibility to guard the border and thus needs to bear part of the world groups on the border."

In the air above the round table, began to appear a miniature of the 3,600 world groups, Yuan began the allocation.

Eight Lords, each uses their 'Absolute Territory' as a guide, ultimately extending to the borders. Each Lord's 'territory' somewhat resembles the shape of a twisted fish.

"I need the Qingjiang World Group." Lord Minghuang spoke, she drew her hand across, claiming three world groups and simultaneously yielding the others.

The previous seven Lords, having invested a lot of effort across vast territories, held some world groups as uniquely significant to them, and opened their mouths one by one, making slight adjustments to their territories.

Only Luo Feng, who hadn't invested effort in other world groups, was open to slight adjustments in his territory.

"Does everyone have no objections?" Yuan looked at the seven Lords and nodded slightly, "Good, since no one has objections! Then this territory division is settled."

"With territory allocation completed, adjustments to the subordinate World Level Primordial and High Level Primordial Life forms are necessary as well." Yuan said, "The High Level Primordial Life within the territory naturally belongs to the Lord's command. As for the World Level Primordial, if a Lord's disciple, they belong to the respective Lord. Without 'Master-disciple' or such special relationships, they are divided according to territory."

The seven Lords had no objections.

Many World Level Primordials received the cultivation from Lords before breaking free from the Braided Cage! About one-third truly apprenticed.

Luo Feng, as a new breakthrough, naturally hadn't accepted any

World Level Primordial disciple yet.

"Under my command, there are 23 World Level Primordials, over 10 million and 25 thousand High Level Primordials?" Luo Feng looked at the final allocation plan, which included 20 captured World Level Primordials, and over 8 billion captured High Level Primordials.

This war saw significant increases in the number of captives for the Cultivator Camp as well.

"Luo Feng, your Cultivator 'World Level Primordials' are slightly fewer." Yuan smiled, "Those little ones within the Braided Cage, you can cultivate them more, train several as World Level Primordial disciples, naturally they become yours."

Luo Feng understood, the other seven Lords had invested countless efforts in cultivation, being slightly less himself was reasonable too.

"I'll slowly cultivate them in future." Luo Feng said.

"No objections regarding this allocation plan?" Yuan looked at his partners, "With no objection, I'll distribute the plan now."

Once confirmed, they had to notify the Cultivator Camp's World Level Primordials and High Level Primordials!

After all, territories were divided, subordinates allocated. Future authority responsibilities needed to be reassessed.

"Distribute it."

"No objections."

The seven Lords confirmed this matter.

"Then we begin the third agenda." Yuan continued, "With the emergence of a new Lord, we must determine how our Cultivator Camp will cultivate younger generations in this new era."

Cultivation strategies were jointly discussed and decided by the eight Lords.

"Firstly, reclaim a large number of resources from all world groups." Lord Mo Man said, "Previously, since all world groups might fall completely, vast resources were released freely for exchange. Now the war has ended! Naturally, changes must be made."

Many world groups might perish, countless Creatures might go extinct, giving them broader exchange rights, a greater hope to break free from the Braided Cage.

But now, territory is secured! Those Divine Emperor level cultivators have endless lifespans, seeking resources? The difficulty naturally increases greatly.

"With such free exchange, indeed, our Cultivator Camp cannot afford it." Lord Nai Gu said, "Need to consider the long term!"

...

While Lords were discussing in the hall, the territory division plan, cultivation division plan, were disseminated to every World Level Primordial, High Level Primordial Life form in the Land of Origin.

The entire Land of Origin, a massive number of Cultivators received the news.

At this moment, Tianlang Ke and two friends gathered together, they also received the news.

"Our Cultivator Camp has birthed the eighth Lord 'Luo Feng', eight Lords joined forces, completely won this war!"

"...Guang Yu, Chi Feng Daoist...Tianlang Ke...A total of 23 World Level Primordial Life forms, please proceed to 'Sky Moon Sea Cave Mansion', waiting for Lord Luo Feng's audience."

Tianlang Ke stared blankly at the message.

Lord Luo Feng?

The horned man 'Guang Yu' was immensely excited: "Unexpectedly, while we worried about war, our Cultivator Camp birthed a new Lord! The news of the new Lord's birth was kept entirely confidential,

Lord Luo Feng already partook in battle, and the war is even over."

"Victory in war, only then was it made public." Chi Feng Daoist also excited, "We must hurry now, head to Sky Moon Sea Cave Mansion, waiting for Lord Luo Feng's audience."

"Let's go."

Guang Yu looked at the side companion, urging, "Brother Tianlang, what's on your mind? Hurry up, it's our first audience with Lord Luo Feng, such an opportunity can't afford any negligence."

"Oh." Tianlang Ke replied, somewhat dazed, immediately set out with companions heading to the Sky Moon Sea Cave Mansion.

At this moment, Tianlang Ke somewhat understood why his breakthrough hadn't prompted a summon from the Lord.

——

Today June 8th is also Lord Luo Feng's birthday! O(∩_∩)O

Chapter 418: Episode 11: Primordial Blade Path - 2: Divergence

Chapter 418: Episode 11: Primordial Blade Path Chapter 2: Divergence

In the council hall, there was a heated debate among the lords on how to train the successors of cultivators.

"We have already reclaimed many important resources and raised the exchange threshold," Lord Wulan couldn't help but say, "Jin, do you think we need to continue cutting resources? This way, the resources are too scarce!"

"Where is it scarce?"

Jin sat there, shaking his head, "When Yuan was weak, the entire cultivator camp didn't have a single lord. Back then, there were no good resources! Yuan could only comprehend the rule operation of the Source World Origin, and didn't he become a lord? When I was weak, the cultivator camp had only Elder Yuan as a lord, and the resources were very scarce, yet didn't I also make my way through?"

"Look at Luo Feng!" Jin said, "Luo Feng rose from the very bottom of a weak 'Primordial Cosmos' in his homeland Source World! The resources can be ignored. Later, he went through hardships to reach the core area of the Source World, the 'Land of Origin,' and was still very poor! At that time, the Land of Origin was dominated by two Ancient Countries, and resources were nearly monopolized by them!"

"When Luo Feng left the Source World and reached the Nine Rivers Sacred Realm, he was still poor and couldn't afford Primordial Bloodlines, only able to buy fragmentary materials of low-level Primordial Life," Jin said, "What does this illustrate?"

"It illustrates that fewer resources can squeeze out stronger potential," Jin said, "If given too much, these successors wouldn't cherish it."

Luo Feng nodded with a smile: "Brother Jin knows quite a lot about me, and I agree with what Brother Jin said! The successors of cultivators must adapt to the 'poverty-style cultivation method,' with resources sufficiently scarce, yet still able to reach the Ultimate Realm of Godly King, it means they are worth training."

"With scarce conditions, achieving the Ultimate Realm of Godly King, becoming Half Primordial, is far more challenging than now. Those who are screened under such conditions, when exposed to top resources, might jump out of the Braided Cage," Luo Feng said.

He himself tried to extract the potential of every resource.

"Luo Feng's cultivation path also proves another point," Yuan said, "When he stepped into the Divine Emperor Stage, he was completely exploring the path in the dark, without any inheritance to refer to."

"The inheritance we left before proved to be harmful!" Wulan also agreed.

The more powerful the existence, the greater the impact of their inheritance! It makes it difficult for successors to walk their own path.

"Any inheritance that leaps out of the Braided Cage, I think should not be spread," Yuan said, "Let the successors explore for themselves."

"Agree."

"Agree."

One lord after another nodded.

They had walked many erroneous paths, and all previous experiences

proved one point: becoming a lord requires personal exploration!

"Regarding resources? In this era, according to Luo Feng's experience," Yuan smiled, "Let the successors grow under scarce resources! Once they are excellent enough, then provide the resources accordingly."

"Agree."

"Agree."

One after another voted, and according to historical rules, the cultivation experience of the new era will mostly refer to the breakthrough experience of the new lord.

"Brother Luo Feng also rose from the Source World," Mo Man marveled, "To date, eight lords have emerged from the Source World. It shows that although we have created billions of worlds with more creatures, the innate talents and qualifications have flaws."

"The worlds we create are fundamentally different from the Source World," Yuan said.

As the existence mastering the Primordial Rules of operation, he has always pursued creating a Source World but never succeeded.

"Future resources should be more inclined towards the Source World," Wulan said, "After all, only the Source World can possibly give birth to new lords."

"I think the entire Cultivator Territory should prohibit the existence of 'calamity-type cultivators'," Luo Feng said, "A cultivator who takes all creatures of the Source World as resources may achieve something but cuts off the hope for all other creatures in the Source World."

Resentments, weak prey on the strong, Luo Feng can understand.

But such calamity types that slaughter a realm's creatures, even spanning multiple Reincarnation Eras and continuously harvesting the creatures of the Source World should not exist.

"Brother Luo Feng, I am a calamity-type cultivator!" Jin looked at Luo

Feng.

"So am I," Nai Gu looked at Luo Feng.

Jin looked at Luo Feng, "I was born into the Destruction Demon Clan, under the influence of the Source World, it's my fate to destroy all life! I descended into destruction, mastered destruction, and thus finally became a lord."

"For my cultivation path, all life should serve as my resources," Nai Gu said indifferently, "Even in the future, I need the corpses of one ancestor after another as my resources."

"Every path has its own meaning!" Jin looked at Luo Feng, "Calamity-type cultivators have their meaning of existence."

"Pure destruction cannot birth life!" Luo Feng said, "Even you have comprehended part of the mystery of life."

The Primordial Destruction Path Jin mastered actually contains a portion of life; otherwise, it couldn't form a life form.

"I first descended into destruction to ultimately transcend and master destruction," Jin said, "Every cultivator has a different path! No path's growth should be restricted; any path could give birth to a lord."

Ming Huang said coldly, "The path of overwhelming sins, destroying countless lives, should not exist!"

"What is sin?" Nai Gu looked at Ming Huang, "In this infinite Primordial Space, only strength and weakness exist. Sin is just what your heart believes; Ming Huang, you are too narrow-minded!"

"We are all life," Luo Feng said, "Hence we should have compassion for the weak. We were all born from weakness."

"The weak prey on the powerful, dying because of weakness, that is destiny," Nai Gu calmly said.

Yuan felt a headache witnessing this scene.

In the previous long years, lords also had conflicts.

Jin, Nai Gu, and Mo Man are considered one faction. Of course, Lord Mo Man is not as extreme as 'Jin and Nai Gu'; he quite appreciates the cultivation method of 'the weak prey on the strong.'

Ming Huang's heart is benevolent, and Wulan admires Ming Huang quite a bit; they are considered one faction.

Yuan is inclusive of everything, and Starlight is more of an observer, not participating in the struggle.

"It seems that Ming Huang and Luo Feng's attitudes are close, and the fight will be fiercer in the future," Yuan felt quite helpless.

Previously, the strongest opposition 'Ming Huang' was somewhat isolated, but the addition of 'Luo Feng,' who breaks laws with force, gradually balances the strength of the two major factions.

"Compassion for the weak? The Innate Primordial Life Camp will not pity the weak," Jin retorted, "Luo Feng, you are also cultivating the Primordial Life and Death Dao, don't you understand that the weak will ultimately be destroyed."

"Jin! Destruction is to protect life!" Luo Feng looked at him.

Both sides have profound research on life and destruction, but their directions are evidently different.

"A harsh environment can help them grow better," Mo Man said, "Brother Luo Feng, when you were growing, you also faced catastrophic existences! In your weakness, you faced the Golden Horned Giant Beast. Later, you faced the Sector Beast! Such catastrophic cultivators can provide enough powerful motivation for other cultivators."

"The catastrophic cultivators we need to target can destroy all creatures in the Source World," Luo Feng said, "Faced with such an existence, weak cultivators don't even have a chance to resist!"

"Alright."

Yuan finally spoke, "Stop arguing, let's stick to the old rules!"

"First, if you lords have ideas, you can implement them within your own 'Absolute Territory'. In other vast areas of the Cultivator Territory, we'll continue following the free-range strategy."

"Second, if persuasion doesn't work, rely on strength. If anyone can defeat the combined efforts of other lords! Then, we'll follow their decision. If you lack strength, endure it."

Upon Yuan's words, the lords fell silent.

Defeating other lords all by oneself? In the entire Infinite Primordial Space, no one can do that.

"There's no way." Luo Feng secretly sighed.

The lords disagreed with each other's ideas and had to seek common ground while reserving differences.

Once, in his weaker days, Luo Feng thought that becoming a lord would allow him to completely create rules based on his own ideas. Yet, now as a lord, he realized... his capacity to enact change was still limited.

Not to mention the enemy camp, even their own camp required decision-making alongside the other eight lords.

"Next matter," Yuan immediately started on the next agenda, "A grand celebration must be held for the birth of a new lord as per tradition."

The birth of a lord is quite special.

For the Innate Primordial Life Camp, even the birth of several ancestors won't lead to any celebration. Only the birth of an 'Undying and Undying' existence, capable of having a seat in the Land of Eternity, warrants a grand celebration.

Every lord receives attention from the entire Infinite Primordial Space and naturally has a seat in the Land of Eternity, hence the celebration.

"Let's reclaim the territory first," Luo Feng said, "Our Cultivator

Territory's 3,600 world groups, many are yet to be reclaimed. Once the territory is reclaimed, we'll hold the celebration."

"Very well, as per your idea," Yuan nodded, "Our main priority next is how to reclaim the territory."

The eight lords began to discuss.

Internally, they had differences.

Externally, they still stood together. Even personalities like Jin and Nai Gu understood how much aid the Cultivator Camp had provided them.

Quickly, a complete reclamation plan was formulated, with tasks assigned to each of the eight lords.

...

Land of Origin, Sky Moon Sea Cave Mansion.

At this moment, a bustling crowd of high-level primordial beings gathered outside the cave mansion.

They were extremely excited, discussing amongst themselves, and waiting for an audience with Lord 'Luo Feng'.

"The last time I saw the lord, he was merely a half primordial being. In less than two thousand epochs, the lord has already reached the pinnacle, even concluding the war." The small old man 'Cheng' was quite excited, surrounded by a large group of companions; they belonged to the group of high-level primordial beings from the Dark World Group.

In the past, the Dark World Group was quite inconspicuous.

Now, the Dark World Group is the homeland of Lord Luo Feng! It is Lord Luo Feng's 'Absolute Territory'!

"Our Dark World Group has become the lord's Absolute Territory. It will flourish tenfold, a hundredfold in the future."

"We, his fellow countrymen, will also be heavily utilized."

Outside the Absolute Territory, the free-range strategy is implemented! With the birth of a new lord, territories are also redrawn. Therefore, only the 'Absolute Territory' receives the full focus of the lord, naturally leading to immense prosperity.

Besides over ten million high-level primordial beings, there were also 23 world-level primordial beings waiting outside the cave mansion.

Tian Lang Ke was among these 23 world-level primordial beings.

"Brother Tian Lang, you are a fellow countryman of the lord! As the only world-level primordial existence born in the Dark World Group, you will surely be heavily utilized by the lord." A companion beside him said with a delighted smile, "I believe among the three main inspector positions, you'll secure one."

Other world-level primordial beings mostly looked at Tian Lang Ke with envy.

After all, being a fellow countryman with the lord means being heavily utilized, which is perfectly ordinary.

"The lord's first visit to the Land of Origin, over ten thousand high-level primordial beings from the same world group went to pay respects, yet this Tian Lang Ke didn't go!" The world-level primordial 'Zhu Huo' observed from the side.

Suddenly——

An invisible wave descended!

All 23 world-level primordial beings, over ten million high-level primordial beings fell silent, sensing their own insignificance under the terrifying aura.

A man in black attire and black hair descended from the void.

Tian Lang Ke looked at this presence, seeing his lord 'Luo Feng' for the first time! As a world-level primordial born in the Absolute Territory, he would forever be under Lord Luo Feng's command in

the endless years to come.

"Greetings, Lord!"

All 23 world-level primordial beings respectfully saluted.

"Greetings, Lord."

Over ten million high-level primordial beings, each exceedingly respectful.

Only when one faces the true body of the lord can they comprehend the immense gap, akin to a chasm between themselves and the lord!

Chapter 419: Episode 11 Primordial Blade Path - 3 Appointment

Chapter 419: Episode 11 Primordial Blade Path Chapter 3 Appointment

Luo Feng gazed at the 23 world-level Primordial Beings before him, along with the countless over ten million high-level Primordial Lives. In the future, managing the vast territory under his command would depend on these subordinates.

The Cultivator Territory was vast, and it could be anticipated that as the overall strength increased, the territory would continue to expand!

A large number of Source Worlds, billions of ordinary worlds, and naturally nurtured treasure mines. The high-level Primordial Lives on the Cultivator side were not enough, so they had to rely on those 'Innate Primordial Lives' who had submitted to manage it barely. The lords wouldn't worry about these trivial matters.

"This is our first meeting." Luo Feng smiled at these subordinates, "In the future, if there's anything important, feel free to report directly!"

All the subordinates listened excitedly, etching the image and aura of the 'man in black clothes and black hair' before them deep in their hearts. This was the great lord they would follow from now on.

Among the many high-level Primordial Lives, there were also Qiu Ge and Yifeiya; they had previously guarded the Dark Sacred Realm and

naturally belonged to Luo Feng's command.

"Not even two thousand epochs have passed, and he's already a lord!" Qiu Ge and Yifeiya gazed at Luo Feng in the distance, feeling that everything was too surreal. The last time they guided Luo Feng, he was merely a half-Primordial Fusion Dao Cultivator, yet now, though his appearance hadn't changed, his aura was boundless, and every word carried endless pressure.

This was the existence that grasped the highest power of 'Dao,' and the Primordial Life and Death Dao was a part of Luo Feng's life.

Such a great existence brought unimaginable oppression!

Even the hundreds of Ancestors in the Innate Primordial Life Camp couldn't win against the eight lords individually! It's known how terrifying the deterrence of any single lord is.

"Your tasks will soon be adjusted; detailed arrangements will be issued shortly," Luo Feng said, "23 world-level Primordials and 'Cheng' stay behind, other high-level Primordial Lives may leave now."

"Yes."

The over ten million high-level Primordial Lives respectfully bowed and left. Having a chance to meet the lord's main avatar was already satisfying for them.

"Cheng is truly fortunate." As these high-level Primordial Lives left, they looked towards Cheng with envy.

Of course, they knew Cheng! Among the more than ten thousand high-level Primordial Lives in the Dark World Group, Cheng had the greatest influence, and this time, he was specifically asked to stay by the lord.

"Follow me inside."

Luo Feng turned and walked towards the depths of the cave mansion, with the 23 world-level Primordials and the only high-level Primordial 'Cheng' following in.

"The lord actually kept me behind, intending to make great use of me? But I'm just a mere high-level Primordial." The small and thin elder 'Cheng' was a bit nervous and excited.

"He was also summoned by the lord?"

The world-level Primordials glanced at Cheng, briefly investigating and immediately understanding the detailed information about 'Cheng.'

...

Sky Moon Sea Cave Mansion.

Luo Feng sat leisurely by a lakeside, looking at his subordinates.

"Our Cultivator Camp and the Innate Primordial Life Camp have just concluded the war; some territories are still fallen and need to be recovered one by one," Luo Feng said, "Each of you must bear the responsibility of guarding."

"Yes." The 23 world-level Primordials and Cheng replied respectfully, with manpower being tight, and their main battle avatars needing to participate in the garrison.

"I have already appointed the Four Directions Commanders and nineteen Guardian Generals," Luo Feng said. At his level, based on the previous arrangements of the whole Cultivator Territory, he had already made the plan in just a few breaths.

Every task for the high-level Primordial Lives had been determined, and those like Qiu Ge and Yifeiya, who had some acquaintance, received some significant roles this time as well.

"Am I the Guardian General?" Tianlangke received the detailed arrangements sent by the lord.

Tianlangke, as a newly advanced world-level Primordial, was of relatively low strength among the same level, ranked among the nineteen Guardian Generals! In terms of power, much lower than the Four Directions Commanders.

"Besides the borders, my subordinate territories also need three inspections," Luo Feng said.

Instantly, each of the 23 world-level Primordial Lives tightened their hearts! The position of 'territory inspection' essentially meant deputy management of expansive territories since it could command over a hundred world groups and offered numerous benefits.

"Will I be chosen?" Tianlangke was somewhat expectant, "I am from the same world group as the lord, but last time I didn't visit him, and my strength is relatively weak..."

Tianlangke was feeling a sense of gain and loss at that moment.

"My territories are temporarily divided into three domains. First domain inspector 'Cheng Shi,' second domain inspector 'Zhu Huo,' third domain inspector 'Guang Yu,'" Luo Feng said.

A bald man, seemingly ordinary with restrained aura, was actually the strongest in combat under Luo Feng, 'Cheng Shi' was originally a Fusion Dao Cultivator, later choosing to refine bloodlines into a world-level Primordial! He chose two completely opposite bloodlines and pushed the power of the bloodline to an incredible level. At the world-level Primordial tier, he is one of the top ranks in the Cultivator Camp. He is quite humble, has many friends, and has conducted affairs to the satisfaction of the lords over a long time! Luo Feng chose him without hesitation as the first.

Zhu Huo, somewhat burly, clad in deep purple scales, is the weakest among the three inspectors, at the late stage of the world-level Primordial. However, he had previously served as an inspector and did very well.

Guang Yu, a man with bent horns, at world-level Primordial Perfection tier. His strength under Luo Feng was second only to 'Cheng Shi.'

Luo Feng chose these three because they had previously proven to be 'extremely capable of doing things.'

"I was selected." Zhu Huo felt relieved.

Being chosen by Yuan before did not guarantee that Luo Feng would also select him.

But he was still chosen!

"The lord likely values capability over strength." Zhu Huo understood, "For the lord, the difference between early-stage and Perfection world-level Primordials may make no difference."

He had previously conducted affairs in such a manner as to satisfy the lord adequately.

"Not me..." Tianlangke felt a bit disappointed, but he also understood that when the lord hadn't stepped out of the Braided Cage, the entire hometown of over ten thousand high-level Primordial Lives had visited, but he alone didn't! That was a total lack of respect.

The lord not choosing him was reasonable.

"This Tianlangke, inherently arrogant, is unsuitable for an inspection role." Luo Feng indeed regarded Tianlangke highly, considering they came from the same hometown.

But from some prior matters, Luo Feng could discern Tianlangke's character.

Tianlangke was too arrogant! He esteemed those stronger than himself and couldn't be bothered with those weaker.

Even when he was a high-level Primordial Life, he was on poor terms with over ten thousand high-level Primordial Lives from the same hometown. The townsfolk didn't regard him highly! The more minor and weaker ones? Why would Tianlangke care?

Such a disposition, to manage over a hundred world groups? Directly overseeing tens of thousands of high-level Primordial Lives and monitoring hundreds of thousands of them?

Each patrol impacts hundreds of world groups! Luo Feng, responsible for countless weak ones, must also be careful.

In Luo Feng's view, sympathizing with the weak is the first

requirement of being a patrol!

"Cheng." Luo Feng looked at the only High-level Primordial present.

"Lord." Cheng was very excited. Being valued so highly by the Lord, he was willing to die in battle for him at this moment.

"The Dark World Group is my Absolute Territory," Luo Feng said. "The construction needed next will be managed by you, leading numerous High-level Primordial Lifeforms, responsible for the detailed construction affairs."

Though some of the Absolute Territories were built personally by Luo Feng, the majority still required many High-level Primordial Lifeforms and numerous captives to labor painstakingly.

"The subordinate will exert every effort," Cheng said excitedly.

"Good." Luo Feng nodded with a smile, believing in Cheng's organizational skills because of his influence locally.

"Among my territories, 93 world groups still remain in ruin." Luo Feng looked at his subordinates. "The 65 world groups occupied by the Innate Primordial Life Camp will be swiftly reclaimed by our Lords. The remaining 28 world groups...have been invaded by both the 'Blood Crane Territory' and 'Omimo' forces."

"Cheng Shi, make a trip to the Blood Crane Territory, compel them to quickly return the occupied world groups. If they refuse, simply return," Luo Feng instructed.

"Yes," Cheng Shi responded.

"Guang Yu, visit Omimo, similarly instructing them to return the occupied world groups. If they refuse, there's no need to argue, just return directly. The following matters can be left to me," Luo Feng said.

How to reclaim the fallen territories had already been deliberated and determined by the eight Lords.

The world groups occupied by the Innate Primordial Life Camp,

because the Ancestors were unwilling to continue fighting, naturally wouldn't hold on to those territories, making it easy for the eight Lords to reclaim them.

The Ice Peak Camp occupied over a hundred world groups, to be dealt with last, when all eight Lords would address it together.

There are eleven other forces, granting them the chance to withdraw voluntarily! If face isn't given, then initiate war!

The Cultivator Camp faces too many opponents, and that's why they are given the chance to voluntarily withdraw! These eleven forces, although only two have seats in the Land of Eternity, the others do not have seats.

But lacking a seat doesn't mean weak!

Just like nine emperors among whom five do not have seats in the Land of Eternity, yet their strength is exceedingly strong.

The forces Luo Feng plans to target, 'Blood Crane Territory' and 'Omimo', each has considerable foundations; otherwise, they wouldn't dare exploit the situation.

Like the force 'Omimo', which ranked among the top three camps in Infinite Primordial Space in the distant past. Later, Omimo's camp was defeated by the Innate Primordial Life Camp, either killed or fled, now only possessing a tenth to two-tenths of its original strength.

"I hope these two forces will know what's at stake," Luo Feng thought.

...

Cultivator Territory, Dark World Group, Land of Origin Source World.

"This is the Land of Origin?" Xu Xin stood in the sky above Huyang City, gazing at the flourishing city.

Since Luo Feng mastered the Source World of his homeland, Xu Xin

became like a 'Child of the World', unaffected by any threat or harm, even capable of wielding a strand of origin power from the Source World.

"Luo Feng, what realm have you reached?" Xu Xin looked at Luo Feng, her eyes filled with disbelief.

Just recently, Luo Feng had her understand numerous insights, the supreme rules no longer limit her, allowing her to comprehend all secrets.

"Considered the highest level among cultivators, Lord," Luo Feng said.

"Lord?"

Having just learned the information, Xu Xin couldn't help but say, "According to what you told me, even being in the Divine Emperor Realm still resides inside the Braided Cage! Stepping outside the Braided Cage...is what's known as High-level Primordial Life, World-level Primordial Life, and ultimately Lord. You've become a Lord?"

Xu Xin only felt everything was too dreamlike.

"Morosa." Luo Feng summoned him with a thought.

Morosa appeared out of thin air and was even more shocked when he saw Xu Xin. He knew very well the mistress's power was weak, unable to survive under the environment of the Land of Origin. But now, facing her...the force he felt from her seemed capable of crushing him.

"Morosa, greetings to the two masters." Morosa respectfully saluted.

Luo Feng glanced at him.

Morosa, as the Sector Beast, would have been destined to die with the self-destruction of the Source World if he hadn't broken free from fate's restraints. But now, with Luo Feng mastering the Source World, Morosa naturally escapes those restraints.

Even if dead, Luo Feng could resurrect him.

"Within the Source World of my homeland, life inside the Braided Cage can now be resurrected by me," Luo Feng said, "So it’s necessary to decide the resurrection list."

Both Xu Xin and Morosa were shocked.

Resurrection?

Luo Feng had long planned, intending to personally draft a list.

His wife, Luo Ping, Luo Hai, led by his closest kin, could also determine a resurrection list, representing Luo Feng’s family.

The Primordial Ancestor, Primal Chaos City Lord, Hong, Thunder Lord, True Inference King, led by humanity on the Primordial Cosmos side, would also draft a list.

Morosa, Master Emperor Chu, Master Mountain Sitting Guest, leading another force, would also draft a list. Emperor Qing, Emperor Ming, Di Fu, Moyu Qingyan, Emperor Chu Yu, etc., also have advisory rights.

Future Land of Origin Source World must maintain a balance among the three sides.

Chapter 420: Episode 11 - 4 Mountain sitting guest ‘came alive’

Chapter 420: Episode 11 Chapter 4 Mountain sitting guest ‘came alive’

"After resurrection, can everyone obtain eternal life?" Xu Xin asked.

"Yes." Luo Feng nodded.

"What about the quantity?" Xu Xin pressed further.

"For me, there’s no limit." Luo Feng replied with a smile.

Xu Xin stirred up a tremendous wave; as Luo Feng’s wife, she managed many affairs in the Galaxy Sacred Land Universe. She was well aware that ’eternal life after resurrection, no limit on quantity’ would bring many issues.

"There must be a threshold for resurrection." Xu Xin said, "Otherwise, these numerous resurrected lives will severely impact order. Over time, as their numbers grow and their descendants multiply endlessly, the impact will become increasingly severe."

Eternal life after resurrection is an enormous joy, but if not handled well, it could lead to endless troubles.

"Don’t worry about impacting order." Luo Feng said with a smile, "The resurrection list for the Primordial Cosmos, I will create a separate new Primordial Cosmos for them! They will live within this

new Primordial Cosmos, favored by the rules, all possessing 'eternal life', but their cultivation would still need to progress step by step from star traveller level to star level. If they are capable, and cultivate to become a 'true god of void space' and pass through reincarnation to enter the Land of Origin, that would be their own ability."

Those resurrected, cultivating step by step from weakness, how many can become eternal true gods in the Primordial Cosmos Region environment?

"Create a separate new Primordial Cosmos?" Xu Xin brightened up; this way would avoid much trouble, as many resurrected hold very special statuses, and some even have favor owed to Luo Feng!

"That way, the list could be significantly expanded, even allowing for the resurrection of a large number of innocent creatures who died in the Golden Horned Giant Beast calamity." Xu Xin nodded, recognizing that even if resurrected, it's just the population of one planet.

To think, there would be a new Primordial Cosmos at that time.

"However, the list must be carefully screened, those guilty of heinous crimes or betraying humanity will not qualify." Xu Xin contemplated.

"No rush, first establish a mature resurrection plan." Luo Feng said.

"Those resurrected, if killed, will they die?" Xu Xin asked again.

"Yes." Luo Feng nodded, "I can grant them another chance for resurrection, but the threshold must be raised significantly!"

Xu Xin nodded, knowing this was a matter with profound implications, just within the Luo Family, historically numerous talented ones who died, those who had earned merit points, who sacrificed themselves for family and humanity, were already numerous.

"Morosa, I'll have my mentors Emperor Chu and Mountain sitting guest, with the two of you responsible for the revival list of cultivators from the Land of Origin." Luo Feng said, "The list for

revival on the Land of Origin requires even greater caution."

The creatures in the Primordial Cosmos side are generally weak, consuming less resources.

The Land of Origin side is different; resurrecting a life form would consume resources that surpass those needed for creatures of the Primordial Cosmos.

"Understood." Morosa was very obedient.

"I'll first go find Luo Ping." Xu Xin said, taking a step to cross distant space-time and headed for the Primordial Cosmos Region. Being able to harness a trace of the Primordial Cosmos' origin power, she could be considered an envoy of the Source World! Within the scope of the Origin Continent Origin World, even the Divine Emperor is far from her match.

Luo Feng watched this scene, knowing his son Luo Ping was the true manager of the Luo Family.

Swoosh.

Luo Feng also took a step and left.

"What realm has the master truly reached?" Morosa had many thoughts, learning everything Luo Feng and his wife Xu Xin had discussed, yet neither had told others, including Morosa.

Morosa only knew the master was strong beyond imagination, able to elevate the 'mistress' to a terrifying level of power, capable of resurrecting all lives within the braided cage?

"I've heard that only the master of the Source World can resurrect lives within the Source World. Is the master the master of the Source World?" Morosa wondered, having some understanding of what lies above the braided cage in past years.

...

Luo Feng himself had a resurrection list in mind.

Those who have supported him from weakness on his journey, anyone with a measure of favor towards him, Luo Feng is willing to offer them resurrection opportunities, along with resurrecting those they care most about.

"The Fire hammer squad from before, the teacher who once taught me, the comrades who fought alongside me in the Wilderness Zone, and the companions who perished during the Golden Horned Giant Beast catastrophe..." Each of these figures in Luo Feng's heart, never forgotten.

For those with favor towards Luo Feng, he would not only resurrect them but also equip them with certain resources, smoothing their path in cultivation.

In a secluded small town on the Land of Origin, Mountain sitting guest lived in seclusion there.

He practiced artifact refining alone.

Flames surged, illuminating Mountain sitting guest's face, as he gazed at the flames with fascination. To him, obsession with cultivation and artifact refining allowed him to forget many things.

"Teacher." A voice rose.

Surprised, Mountain sitting guest turned his head, eyes cutting through the quiet room to see the black-clad, black-haired man in the cave mansion.

"Luo Feng!" Mountain sitting guest set aside his refinement work, immediately stepping out.

"Why have you suddenly come to visit teacher?" Mountain sitting guest smiled, in this world, this disciple was the closest person to him.

"I've come today to share good news with teacher." Luo Feng smiled.

"What good news?" Mountain sitting guest asked with a smile, though his heart remained calm.

"Disciple has cultivated to a very high realm." Luo Feng said, "Now, all creatures within the Source World of the Origin Continent! As long as they've not escaped the braided cage, every creature ever birthed in history, disciple can resurrect!"

Mountain sitting guest felt as if his mind exploded.

Resurrect them all?

"Every creature ever birthed in history?" Mountain sitting guest could not help but inquire further.

"Yes." Luo Feng nodded, "Including your friends and family, every one of them can be resurrected!"

An overwhelming emotion filled the heart of the Mountain sitting guest at this moment, was it ecstatic joy? Was it disbelief? Unbelievable? Is it true? Is this a dream? Looking at Luo Feng, from his expression, he was certain... what his disciple said was true!

His disciple Luo Feng could really accomplish it!

"How many can be resurrected?" Mountain sitting guest couldn't help but ask, "Can it be ten, twelve?"

"Teacher, you can make a list of up to ten thousand." Luo Feng said, "Once the list is confirmed, I can resurrect them immediately."

In a single thought, Luo Feng knew the past of the Origin World in his hometown, knowing that for his teacher, Mountain sitting guest, there were truly thousands of important creatures! So, he rounded up to a quota of ten thousand.

"Good, good, good." Mountain sitting guest looked at Luo Feng, tears were already streaming down, smiling as he cried, "After the destruction of Jin State, I had only one obsession for revenge. I never thought that the disciple I met in the Primordial Cosmos would not only help me fulfill my revenge but also resurrect my dearly departed friends and family."

Luo Feng could feel that before killing the Master of the Shi Kingdom, his teacher, Mountain sitting guest, was filled with hatred and

focused solely on revenge.

But after the revenge, it was as if his teacher's heart had died.

Until today!

An incredibly intense vitality, such a strong excitement and joy appeared in his teacher, his teacher 'lived', his heart lived again. This was the happiest sight for him as a disciple.

"This is the list."

Mountain sitting guest, being a Godly King, quickly finalized the list within moments.

Luo Feng glanced at the ten thousand names, each connected with the past of the Origin World, each having a causality with his teacher that Luo Feng clearly understood.

"They have been resurrected." With a single thought, Luo Feng brought these ten thousand figures from the past timeline to the present!

The rules of the Origin World operated such that if uncontrolled, time-space backlash would erase any attempt to resurrect. However, now the rules operated with Luo Feng's will as the core, naturally without any backlash.

"Hmm?" Mountain sitting guest saw, saw the ten thousand figures appearing in the cave mansion, including the master who once taught him, his many fellow disciples, his life and death friends... and his lifelong love.

Mountain sitting guest stared dazedly at that soul-stirring figure, she, was she really back?

These ten thousand figures now looked confused, most of them having died in the catastrophe of the 'Jin State's destruction', while some had died even earlier.

"What's going on?"

"Where is this place?"

"I’m not dead?"

Their memories were still at the moment of being destroyed.

Mountain sitting guest couldn’t help but walk towards his senior sister...

Luo Feng smiled and disappeared. It was time not to disturb the reunion of his teacher and friends.

...

Along the border of the Cultivator Territory.

Cheng Shi and Guang Yu, the two patrollers, were ordered by Lord Luo Feng to meet the forces of Blood Crane Territory and Omimo respectively.

"Has the Omimo force withdrawn?"

The horned man Guang Yu was very surprised.

He carefully checked the twelve world groups formerly occupied by ’Omimo’, and indeed, the Omimo side had fully withdrawn, although they had harvested many resources from the vast territory, they hadn’t significantly damaged many Origin Worlds and millions of worlds.

"The Omimo force is notoriously slippery. They flee when things look bad." Guang Yu lightly shook his head, "The two camps’ war just ended, and they immediately retreated."

The Omimo force was indeed difficult to deal with.

Despite once ranking in the top three in the Infinite Primordial Space, the remaining two ancient beings were not to be trifled with after their decline! These two have survived until now, although not reaching absolute undying, are extremely strong, with powerful life-saving means. Yet, they are very cautious, choosing to flee at the slightest sign of trouble, never easily fighting to the death.

"I must report to the Lord immediately." Guang Yu felt quite pleased.

...

Another patroller, 'Cheng Shi', encountered trouble; the Blood Crane Territory force was much more domineering than Omimo.

"A little guy like you is fit to speak with me? Tell your lord to come meet me personally!" A lofty voice echoed in the vast surrounding space-time.

The bald man Cheng Shi looked angry: "Even if the Innate Primordial Life Camp fights with us, they ultimately lose! You, the small Blood Crane Territory, my master is merciful, giving you the opportunity to retreat voluntarily, and yet you show no appreciation? I will report to my lord truthfully!"

"A world-level primordial dares to be presumptuous in front of me!"

Accompanied by a cold snort.

The bald man 'Cheng Shi's avatar trembled slightly and turned to dust, yet as he turned to dust, Cheng Shi still gazed coldly at a faintly existing shadow in the distance.

"What can the Cultivator Lord do to me?" That shadow was unafraid at all, thinking he could have the land he occupied returned with a word? Where is such a good bargain?

——

Thanks to the old Alliance Leader 'Mao Ben' for the reward once again!

Chapter 421: Episode 11 - 5 Giant Axe! Welcome to the New Era!

Chapter 421: Episode 11 Chapter 5 Giant Axe! Welcome to the New Era!

Land of Origin Source World.

Flame Wind and Thunder flew out of their seclusion, following the causality induction, heading straight to Huyang City to visit Morosa!

"Luo Feng has actually become a Lord?" Flame Wind and Thunder were emotionally stirred, yet their emotions haven't settled even now.

Just now, they witnessed a group of high-level Primordial Life forms descending in the Dark Sacred Realm, with Cheng leading numerous high-level Primordial Life forms, declaring that the entire Dark World Group is now the absolute territory of the newly born Lord 'Luo Feng'.

Flame Wind and Thunder, after hearing the news among the cultivator community for just a moment, could not hold back. Their avatars in their homeland Source World immediately came to visit Morosa.

"Lord! The highest level existence in Infinite Primordial Space!"

"Great, invincible, omnipotent."

The last time Flame Wind and Thunder were summoned by Luo Feng, he was already a Half Primordial Fusion Path Cultivator, and they were flattered and believed that Luo Feng might escape the Braided Cage.

However, they never expected... Luo Feng would become the greatest existence!

Innumerable Source Worlds have opportunities left by Yuan. Senior Yuan would guide the juniors.

In the future, among numerous surrounding World Groups, Luo Feng will guide and lead the juniors.

"The Land of Origin Source World is the Lord's homeland."

"The entire Dark World Group is the Lord's absolute territory. It's only natural that the homeland Source World is also the Lord's. What qualification do we have to establish a country! What qualification do we have to occupy such a vast territory." After confirming Luo Feng's current status, they immediately realized the issue.

In fact, having experienced several eras of the Source World, they were not interested in building an Ancient Country. The purpose of building an Ancient Country was merely for resources.

But now, Lord Luo is the greatest opportunity!

They arrived at Huyang City, following the causality induction, outside Morosa's cave mansion.

"Why would the two Ancient Countries' Ancestors come to see me?" Morosa, giving them face, immediately opened the cave mansion's gate and met them.

"Flame Wind (Xiu Ma), meets Brother Morosa."

Flame Wind and Thunder greeted respectfully, lowering their stance significantly.

Morosa was startled for a moment, then smiled and said, "You two know too?"

"Of course, a large group of high-level Primordial Life forms descended upon the Dark Sacred Realm and proactively announced everything," Thunder said excitedly, "The entire Dark World Group is the absolute territory of the great Lord Luo Feng! As members of the Lord's homeland Source World, we feel extremely honored!"

"We are both willing to offer the Ancient Country, just asking to serve the Lord." Flame Wind also said.

Morosa blinked upon hearing this.

Lord?

The master hadn't told him in detail, he originally guessed Luo Feng might be the Master of the Source World. Now it seems, his master is far more terrifying than anticipated!

According to the information Morosa understood, the Ancestor Level is the highest tier of the Innate Primordial Life, corresponding to the Lord level among cultivators, with Senior Yuan at this level. Now, his master Luo Feng is also at this level.

"Soon, the master will completely transform the entire Land of Origin," Morosa said, "If you don't voluntarily offer, the two Ancient Countries will cease to exist."

"Yes, we understand." Flame Wind and Thunder replied obediently.

"I can't promise you too much," Morosa said, looking at them, "But I can guide you on a path."

Flame Wind and Thunder listened carefully.

"Emperor Chu is the master's teacher!" Morosa said, "With an extraordinary status, if Emperor Chu is willing to help you, your fates would naturally change."

Morosa was well aware that the master's subordinates were divided into three factions.

One is the Luo Family and Earthlings faction, whose status needs no explanation.

The second is the Primordial Cosmos humans' faction, including Primordial Ancestor, Primal Chaos City Lord, Zhenyan, and Giant Axe, among which Luo Feng's teacher is included.

The third is the Land of Origin faction, with Morosa, Emperor Chu, and Mountain Sitting Guest as the core! The only connection for the two Ancient Country ancestors to establish was with Emperor Chu.

"Even Emperor Chu Yu, Emperor Qing, Di Fu, and Emperor Ming have good relations with the master." Morosa said.

Flame Wind was quite regretful upon hearing this.

These juniors hold significantly more importance in Lord Luo's heart than he does! He underestimated Lord Luo's potential at first, did not pay attention, and when he finally realized, Luo Feng no longer required their help.

"All of them belong to the Flame Wind Ancient Country!" Thunder was now extremely remorseful, as none from the Thunder Ancient Country maintained good relations with Lord Luo Feng!

"I've said all there is to say, act wisely on your own!" Morosa finished speaking, stood up, clearly signaling them to leave.

Flame Wind and Thunder obediently left at once.

If not for the connections of Emperor Chu, Emperor Chu Yu, Morosa might not have met Flame Wind and Thunder at all. Because in the three main factions set by the master, Flame Wind and Thunder can't even enter the 'secondary core'.

...

In the Land of Origin Source World, among the endless Universe Ocean, Luo Feng gazed towards the deepest three thousand Primordial Cosmoses.

"Rise!"

With a thought, in the original time and space of the three thousand Primordial Cosmoses, new Primordial Cosmoses began to nurture,

reaching as many as a hundred thousand! The interiors of these newborn Primordial Cosmoses also began to evolve gradually...

Luo Feng allowed these Primordial Cosmoses to evolve, except for one adjacent to the 'Galaxy Sacred Land Universe', which he began to guide.

This Primordial Cosmos was specially designed for the resurrected beings to live.

On the Luo Family side, as well as the Primordial Cosmos human clan, the efficiency was very high, they had already determined their respective resurrection lists! While on the Land of Origin's side, Morosa, Emperor Chu, and Mountain Sitting Guest had just begun to make contact.

"Begin the resurrection."

When Luo Feng was resurrected, he was retrieved along with entire galaxies from the river of time and space.

Still the Milky Way, still the Solar System, still that blue planet! Many creatures are resurrecting, one by one the dead War Gods, War Generals, warriors, their families and friends.

The Earthlings from Luo Feng's era have the lowest resurrection threshold, as long as they are not major criminals, they are all revived!

"Swish swish swish～～～" On this blue planet, hundreds of millions of lives are being resurrected. Members that Luo Feng focused on, like the members of the Fire Hammer Squad and former heroes, even those close relatives who were lost during the period of Grand Nirvana were resurrected one by one by Luo Feng.

This resulted in creatures who died at different times being resurrected in the same era.

Grandfather, father, son, perhaps the son appears the oldest. After all, the grandfather may have died young during the Grand Nirvana period. The father might be a hero from Luo Feng's era, and the son might have lived to old age and died of natural causes.

"Whoa——"

On many other planets, creatures are also being resurrected.

Besides 'Earthlings from Luo Feng's era', other resurrection thresholds are much higher. Even for the Luo family, the mediocre Luo family members are not resurrected if they died.

As for the entire human clan of the Primordial Cosmos, the scope is too vast, making the resurrection threshold even higher!

Extremely brilliant geniuses, heroes with outstanding contributions, some pillars of the human clan... these individuals and their valued friends and relatives will also be resurrected.

"Hmm?"

A burly man appeared in the starry sky, holding a giant axe, looking around somewhat puzzled.

"Wasn't I dead?"

"This place seems to be the Primordial Cosmos?"

The giant axe felt some confusion at that moment.

With the vast galaxy he sensed within range, and the rules operating within the Primordial Cosmos, all seemed like his home, the Primordial Cosmos!

"But here, there is no Virtual Universe, and many planets have no creatures." The giant axe was filled with confusion.

"I can confirm that my soul was obliterated earlier, it was complete death. As for 'the strongest in the Universe', they should not be capable of resurrection." The giant axe moved with intent, and with a swing of his axe, he tore open the membrane of the Primordial Cosmos and whoosh, flew out of this Primordial Cosmos.

After flying out, the giant axe was stunned.

He saw a distant Primordial Cosmos and another Primordial Cosmos

of the same size, the 'Galaxy Sacred Land Universe', along with another large Primordial Cosmos.

Because the Primordial Cosmos is so large, even from a great distance, it can still be seen.

"In my visible range, there are a total of 28 Primordial Cosmii?" The giant axe was a bit dazed; this wasn't the world he knew, "Where have I ended up?"

"Giant Axe."

A group of familiar figures flew in from afar.

Primordial Ancestor, Primal Chaos City Lord, Peng Gong, Dark, Deserted Mirror, Long Xing, Hong...

"You all?" The giant axe looked at these familiar beings, and he even realized that some of them were merely Divine Power Incarnations but already far stronger than himself.

"Giant Axe! Welcome to the new era!" Primal Chaos City Lord beamed brightly.

...

A Source World without an owner can only evolve by instinct, with extremely low energy utilization efficiency.

"The Land of Origin is still too small."

Luo Feng thought.

The land of the Land of Origin began to extend and expand into the Universe Ocean, with endless energy surging in, transforming into vast land. This also made the energy in the Universe Ocean even more scarce.

Eventually, the Land of Origin expanded by a hundredfold!

Ninety-nine percent of the Universe Ocean's regions became energy deserts. Only the energy supply for ten thousand Primordial Cosmii

was maintained.

"Energy needs to be used where it is needed." Luo Feng completely transformed the appearance of the Land of Origin, only then nodding in satisfaction.

The Source World Origin, the energy is extremely abundant! Higher even than the energy reserves of Lan!

Lan maintains a nearly Source World-sized body, with the highest level of body energy density, and the matter is indestructible.

A Source World, maintaining such time, has low energy density, ordinary matter! So more than ninety-nine percent of the energy is stored in the 'Origin'. No matter how many times the Source World is destroyed and reborn, it remains undamaged.

Luo Feng merely maintained 'hundredfold Land of Origin land and ten thousand Primordial Cosmii', and the burden on the Source World Origin was still very light. Because more of its energy reserves are to be kept for nurturing life.

"With an owner, a Source World's nurtured life can be a hundred times more than a Source World without an owner." Luo Feng sighed.

The difference between having and not having an owner is too significant.

"Lord, the Blood Crane Territory is unwilling to return the occupied territory and has a malicious attitude, directly destroying my avatar." Cheng Shi reported the information and transmitted the full process footage to the lord.

"Hmm?"

Luo Feng frowned slightly.

In his territorial range, the long-standing 'Omimo Influence' obediently retreated, yet the younger influence 'Blood Crane Territory' appeared much more domineering and aggressive.

"This Blood Crane Territory has been known to be rather domineering

and aggressive. I didn’t expect that in my Cultivator Territory, they would dare to be so brazen." Luo Feng was somewhat angry.

In Luo Feng’s view, in the Infinite Primordial Space, only the Innate Primordial Life Camp and the Ice Peak Camp were qualified to be opponents of the Cultivator Camp! As for the Blood Crane Territory, what does it count for?

"I want to see how capable this Blood Crane Territory truly is." Luo Feng thought, and instantly his main battle avatar flew out of his hometown Source World, heading straight for the border.

Chapter 422 - 6: The Shadow Lord of Blood Crane Territory

Chapter 422: Chapter 6: The Shadow Lord of Blood Crane Territory

The time-space of the Infinite Primordial Space is incredibly fragile before Luo Feng, with the highest level of life and death forces easily tearing open a time travel passage.

Luo Feng swiftly departed from the 'Origin Continent Origin World' at incredible speed, and in just a moment, Luo Feng flew out of the entire Dark World Group!

"Boom—"

Luo Feng is flying at super high speed.

A World Group is an area where many Source Worlds densely exist, and such places are regarded as prosperous zones, nurturing a large number of Innate Primordial Life. However, between World Groups, it is extremely desolate, with hardly any creatures except in a few peculiar environments.

And the 3600 World Groups is the area with the most Source Worlds and the closest distance chosen by the Cultivator Lords.

"Compared to those Ancestors, my speed is quite fast. But compared to Starlight, it's far inferior." Luo Feng has the experience of traveling with Starlight.

Starlight, as if walking on a map, transcends time and space.

My traveling speed is too slow.

"The Blood Crane Territory is somewhat troublesome!"

While traveling, Luo Feng pondered about this opponent.

The Blood Crane Territory is a relatively small force in the entire Infinite Primordial Space, a force nurtured by a Mysterious Land!

This Mysterious Land has nurtured numerous creatures, among them the three strongest beings are at Ancestor Level, calling themselves 'Blood Lord', 'Crane Lord', and 'Shadow Lord'. The remaining creatures are world-level Primordial and even weaker levels.

"Infinite Primordial Space has nurtured many ancient existences, but many don't consider themselves part of the 'Innate Primordial Camp'." Luo Feng thought.

Especially the Undying and Undying beings, who are detached and are unwilling to get involved in the disputes of the Innate Primordial Camp!

Like the absolute sphere named 'Initial', and another absolute cube named 'Mo Man'! Their forms of existence are similar, both quite peculiar. But 'Initial' considers itself part of the Innate Primordial and has become one of the Nine Emperors. Meanwhile, 'Mo Man' couldn't care less about the Innate Primordial Camp.

There are also many tribes nurtured by Mysterious Lands.

The Blood Crane Territory has nurtured the Blood Crane Territory Clan.

The Feather Realm has nurtured the Feather Realm Clan, among them the Undying and Undying 'Feather Emperor'.

The Giant God Realm has nurtured the Giant God Race.

The Infinite World has nurtured the Infinite Great Serpent Clan.

Their strengths vary, but in essence, there's not much difference. However, the first two haven't joined the Innate Primordial Camp,

whereas the latter two have become the two Holy Lands of the Innate Primordial Camp.

The best food for the Infinite Great Serpent Clan is the 'Source World Origin', and the Source World is the home of Cultivators! To contend with the Cultivator Camp, the Infinite Great Serpent Clan must leverage the entire Innate Primordial Camp.

Although the Giant God Realm doesn't care about the 'Source World Origin', it does care about other resources. Relying solely on 'absorbing Primordial Force' for growth is too slow.

"If one forcibly consolidated various forces into the 'Innate Primordial Camp', they would have fought internally long ago." Luo Feng thought, the Giant God Race doesn't like disputes, and can tolerate the Infinite Great Serpent Clan. Would other Undying and Undying existences be willing to bow down before the Infinite Snake Ancestor?

...

After spending more than ten days, Luo Feng reached the border of the Cultivator Territory, following invisible life sensing, heading directly towards the 'Shadow Lord' of the Blood Crane Territory.

"Among the Blood Crane Territory Clan, the Blood Lord is low-key, rarely showing up. The Crane Lord can be considered peaceful, but only the 'Shadow Lord' is the most domineering." Luo Feng had already known about this figure.

The one occupying the Cultivator Territory was led by this Shadow Lord with some of their tribe.

Luo Feng stopped in a vast void, looking from afar, he had already locked onto the location of the 'Shadow Lord' through the life Qi mechanism, who at this moment was fused into the vast space, occupying an enormous region.

"So it is Lord Luo Feng who has arrived." A voice echoed around, "You eight Cultivator Lords are occupying a total of 3600 World Groups, isn't that too greedy? I only took 16 World Groups, is that

not excessive?"

"Shadow Lord of the Blood Crane Territory, you have quite the nerve!" Luo Feng said.

Previously, as the war on the Cultivator's side was seemingly losing, the Ice Peak Camp and a few other forces took the opportunity to occupy some World Groups.

But after the war ended, some weaker forces voluntarily retreated.

Only a very few were unwilling to withdraw! They all had some reliance!

"I am also helping you." That voice traveled from different time spaces, "Because you occupy too much territory, you provoke the Innate Primordial Camp to act. If you occupied less territory, wouldn't there be much less trouble?"

Luo Feng coldly surveyed all directions, the opponent's force permeated everywhere.

"Hmph."

With a single thought, centered around Luo Feng, the vast Realm of Life and Death enveloped all directions, crushing every space-time, destroying all hidden shadows in the space-time, forcing these shadows to converge into a massive figure in the distance.

It was a towering shadow, with blood-red eyes gazing at Luo Feng.

"I told you to withdraw before, and you didn't." Luo Feng coldly looked at him, "Now you have only one path left. Obediently hand over all the resources you occupied in the Cultivator Territory, and further compensate with three times the resources, and promise never to offend the Cultivator Territory in the future by a fraction."

"All the resources I painstakingly seized are to be given to you, along with triple compensation?" The vast shadow burst into a peculiar laugh, "Hehehe, interesting, interesting, all those I invaded from other forces, I have never suffered a loss."

"Lord Luo Feng, with you acting like this, I am very displeased! These 16 world groups seem too few to me now, I want to take over 32 world groups," the vast shadow stated, "otherwise, I will keep an eye on your Cultivator Territory eternally, attacking again and again, without rest!"

The voice of the shadow echoed in the surrounding space-time.

"I would like to see what your Cultivator Camp's eight Lords can do to me!" The blood-red eyes of the vast shadow were filled with ferocity, though none of the three Lords of Blood Crane Territory had reached the level of 'Undying and Undying', these ancient existences had some life-saving methods.

The Shadow Lord, with confidence in his life-saving abilities, behaved so domineeringly and aggressively! Previously bullying some weaker forces, this time he bullied the Cultivator Camp!

"Very well!"

Luo Feng stood there, his gaze turned cold.

Boom——

Centered on Luo Feng, in an instant, a billion blade lights burst out from the surface of his body, all the blade lights locked onto the body of the Shadow Lord through 'Life Sensing'!

In the battles between the two major camps, it was the highest intensity duel in the Infinite Primordial Space! Normally, the Ancestors played a minimal role, and even the ordinary moves of the Cultivator Lords like Jin and Mo Man were weak, only burning the main battle avatars could influence the battle situation.

Luo Feng was the same back then, many ordinary methods were useless, they were annihilated in the face of the multi-layered domains and power of both sides, unable to penetrate the opponent's camp.

But now it was one on one!

Luo Feng's move combined of life and death, even if it was ordinary

among the Lords, when it descended on the 'Shadow Lord', it still made the Shadow Lord feel that 'innumerable blade lights' were cutting and annihilating his body.

"What move is this, I can't even dodge." The Shadow Lord was somewhat panicked.

Even though he mastered the highest level 'shadow' force, making himself like a shadow, capable of merging into space-time, capable of merging into all things, but the endless blade light of Luo Feng still annihilated all life composition parts of him by chasing down 'Life Qi Mechanism', leaving the Shadow Lord with nowhere to escape.

"Truly weak." Luo Feng had just become a Lord, faced the intensity of battles between the two major camps, and now only found this Shadow Lord too weak.

"Merge!"

Numerous forces were annihilated, the Shadow Lord could only merge his life forces, with sufficient strength, to resist these billion blade lights.

"Merged?"

Luo Feng instantly locked onto the enemy.

A brilliant blade light flared, Luo Feng struck! With a terrifying slash following the Life Qi Mechanism, the Shadow Lord could not evade and was pierced through the chest by one slash! Even the escaping power was pierced by strands of blade light!

The might of Luo Feng's slash was too terrifying, forcibly annihilating this body of the Shadow Lord, leaving behind only some treasures and such.

"No Life Core carried?" Luo Feng looked at this scene, and frowned slightly.

This was within his expectations, this was also why he found the Blood Crane Territory troublesome.

In the Infinite Primordial Space, some Ancestor-level existences! They lack the ability of 'Undying and Undying' and thus have developed other life-saving methods. For example, not carrying their Life Core, hiding it in extremely hard-to-find special places!

Though in this way, the avatar that acts outside might only have thirty percent of its strength! But thirty percent of an Ancestor's strength is enough to sweep through all creatures below 'Ancestor', enough to act as they please.

The Life Cores of the three Lords of Blood Crane Territory are all hidden deep within their native 'Blood Crane Territory', no one so far has found their Life Cores.

Swoosh!

A wisp of thought descended from afar, a shadow avatar appeared and condensed, it was the avatar of the Shadow Lord.

"Luo Feng!" The Shadow Lord looked at Luo Feng, angrily said, "If you return all my treasures, I might spare you, and stop coming to the Cultivator Territory."

"Give you the treasures?"

Luo Feng had already gathered the Spoils of War, most of these Spoils of War were the various resources seized from the Cultivator Territory, "You're dreaming."

"Luo Feng! I won't let it slide!" The Shadow Lord was furious, "I will come to your Cultivator Territory again and again, rob again and again, let you never have peace! Everything I lost, I will take back!"

"I heard that to this day, no one has been able to find your Life Cores deep within the Mysterious Land of 'Blood Crane Territory' and completely wipe you out." Luo Feng looked at the avatar of the Shadow Lord, "I would like to give it a try!"

"Just you?" The Shadow Lord was disdainful, he was very confident in his strength, very confident in the 'Blood Crane Territory' that nurtured him.

The power of the Mysterious Land of Blood Crane Territory is far beyond what a few Ancestors can match.

"If you have the guts, just come." The Shadow Lord sneered, after saying that, this wisp of avatar dispersed.

"Blood Crane Territory?"

Luo Feng knew very well that defeating one avatar of the Shadow Lord was not enough to threaten him. The opponent could breed a new powerful avatar and send it once again! The way to truly deter the opponent is to attack the opponent’s lair.

"I really want to see what is so remarkable about this Blood Crane Territory." Luo Feng thought, then tore the space-time passage apart, immediately starting to leave the range of the Cultivator Territory, heading towards the distant location ’Blood Crane Territory’.

Chapter 423 - 7: Mysterious Land – Blood Crane Territory

Chapter 423: Chapter 7: Mysterious Land – Blood Crane Territory

Blood Crane Territory, located very far from the Cultivator Territory.

It took over a hundred days from the border to reach the Mysterious Land known as the 'Blood Crane Territory'.

"Finally here!"

Following the sensing of the Shadow Lord, and with the reference from the Starlight-recorded 'Space-Time Route Map', Luo Feng arrived here quite easily! In the Infinite Primordial Space, most Mysterious Lands are hard to find, their fame varies, and the powers they contain are different.

The most famous, of course, is the Land of Eternity!

The Land of Eternity has already sent an invitation to Luo Feng, and he has a seat there! However, the Cultivator Territory has not yet been fully conquered, and Luo Feng's celebration for becoming a lord hasn't been held, so he's not in a hurry to go to the Land of Eternity.

"Blood Crane Territory is a Mysterious Land with relatively small fame, and it has only birthed three Ancestor-level beings." Luo Feng observed the Blood Crane Territory before him.

Before him was an infinite Blood Sea, with creatures vaguely lurking within, all spying on Luo Feng.

"Blood Sea!"

Seeing this Endless Blood Sea gave Luo Feng a sense of familiarity. During the Primordial Cosmos period, he had a 'Ghost Sea Avatar' at that time, proficient at transforming into a Blood Sea! Even after coming to the Land of Origin, transforming into a Blood Sea was a common technique for Luo Feng.

Thus, seeing the Blood Sea made Luo Feng feel rather close to it!

"Since becoming a lord, I haven't needed to transform into a Blood Sea." Luo Feng thought to himself. In the weaker stages, he couldn't perfectly control his power, so he transformed into a Blood Sea, even forming a Blood Sea Array.

With perfect mastery, both physical body form and Blood Sea form are perfectly controlled, and they don't enhance his strength.

"The 'Endless Blood Sea' before me is much stronger than my body." Luo Feng sensed and felt this Endless Blood Sea was alive, slowly flowing, with a very strong sense of threat.

"Luo Feng!!!" A voice came from deep within the Endless Blood Sea, "Now that you have come to the Blood Crane Territory, why don't you dare come in? Are you afraid?"

"Afraid?" Luo Feng chuckled.

With his understanding of the Primordial Life and Death Dao, Luo Feng instantly sensed all the creatures lurking within the vast Blood Crane Territory in front of him — three Ancestor-level beings, over 500 World-level Primordials, and more than 30 billion High-level Primordial Life.

At this moment, the three Ancestor-level beings and over 500 World-level Primordials could all see the outside and were all staring at Lord Luo Feng, who had come alone!

"You three weak Ancestors of the Blood Crane Territory can make me afraid?" Luo Feng scoffed.

"If not afraid, then come in!" Another angry voice sounded.

"We three weak Ancestors will see how strong you, the Cultivator Lord, can be!" A third hoarse voice chimed in.

The other two lords of the Blood Crane Territory, though rarely active outside, would naturally not tolerate being attacked in their lair!

"Hmph."

Luo Feng smiled.

Boom!

His body flew directly into the Endless Blood Sea. Upon entering, Luo Feng immediately detected the uniqueness of the 'Blood Crane Territory Blood Sea'.

"This Blood Sea is formed by the perfect fusion of three highest level powers." Luo Feng instantly judged, "Coinciding with the three major clan factions of the Blood Crane Territory."

The numerous creatures born from the Blood Crane Territory excel in 'Life,' 'Immortal,' and 'Shadow'; the strongest of which are the Blood Lord, Crane Lord, and Shadow Lord.

"The 'Blood Sea' formed by the perfect fusion of three highest level powers is indeed much stronger than my Blood Sea."

"It encompasses the Life, Immortal, and Shadow characteristics, more resilient and ubiquitous."

Luo Feng sensed the gap.

The three highest level powers embraced by the Blood Crane Territory are extremely strong in terms of lifesaving. The combination of the three completely surpasses Wulan! In Luo Feng's view, if someone masters these three highest level powers, their lifesaving ability might surpass 'Initial'.

Initial merely achieves the ultimate in defense, but it might still be trapped!

However, the Shadow characteristic in the 'Blood Crane Territory' is ubiquitous!

"Mastering one highest level power is already Ancestor-level, never heard of someone mastering three highest level powers." Luo Feng thought silently, even among the Cultivator Lords, only Starlight mastered two highest level Daos!

Under the combination of Starlight's two Daos, his lifesaving ability is also one of the top levels in the Infinite Primordial Space, after all, he exists in both past and future! Even trapping him is impossible.

"These Mysterious Lands..."

The Infinite Primordial Space nurtures 'Source Worlds' which originate from the combination of multiple Great Daos.

The 'Mysterious Lands' nurtured contain several highest level powers, giving them various miraculous properties. For example, the 'Infinite World' can reflect any place in the Infinite Primordial Space, the 'Abyss of Destruction' can birth powerful Destruction Weapons...

"Source Worlds have origin."

"Mysterious Lands also have a core source." With his high level of life insight, Luo Feng vaguely sensed the source of power within the Endless Blood Sea.

"First deal with the Shadow Lord!"

As Luo Feng flew into the Endless Blood Sea, he analyzed the many characteristics of the 'Blood Crane Territory's Endless Blood Sea', probing into the mysteries behind it. But at the same time, he headed fully towards the Shadow Lord.

"The Blood Crane Territory environment, limited in its impact on his strength." The Shadow Lord, Blood Lord, and Crane Lord all noticed this.

The Endless Blood Sea imposes a very strong oppression on outsiders.

But as Luo Feng passed through, the Blood Sea naturally parted,

providing little obstruction.

"He excels in life-based techniques, able to influence the Blood Sea power to a certain extent," said the Blood Lord.

"I said it before, there's no need to provoke the Cultivator Camp! In the Infinite Primordial Space, we must avoid the three strongest camps. But Shadow, you insisted." Crane Lord was somewhat displeased.

"Didn't you use the resources I plundered?" Shadow Lord retorted.

"I support you in plundering other weaker forces, but I didn't support you in provoking the Cultivator Camp," Crane Lord countered.

"Enough! Lord Luo Feng is coming here to fight, let's join forces to meet the enemy," said the Blood Lord.

"I'll deal with this Luo Feng! I refuse to believe that, in the environment of Blood Crane Territory, he can do anything to me!"

The Shadow Lord immediately took the initiative to attack.

The Blood Lord and Crane Lord did not rush to take action, after all, any Ancestor-level, once deploying their True Body, would have formidable power. With the Life Core inside, there is ample energy supply, allowing them to perform numerous techniques, with power surging several times.

Without the Life Core, they would only have at best thirty percent of their power.

The gap between having a Life Core and not having one is huge!

Therefore, during war between the two camps, those Ancestors either do not participate, or if they do, it's with their True Body containing the Life Core! Without the 'Life Core', they would only hold back in battles of that level.

...

Luo Feng flew through the vast Blood Sea, and the creatures born of

Blood Crane Territory kept far away, not daring to approach; Luo Feng also ignored those weak World-level Primordial and High-level Primordial.

"It’s the Cultivator Lord."

"I’ve heard the Cultivator Lord is the most terrifying presence in the Infinite Primordial Space."

"The Innate Primordial Camp clashed with the eight Lords among Cultivators and did not win."

These World-level Primordial beings were somewhat knowledgeable, having many ’Avatars’ that had plundered in the Cultivator Territory. Naturally, they were aware of the latest intelligence. They dared not provoke this Lord in the slightest.

Facing this Lord, even a mere look could lead to their annihilation.

Boom—

Luo Feng flew at super high speed.

"Hmm? Approaching voluntarily!" Luo Feng sensed a massive aura rapidly coming closer; much stronger than the Shadow Lord’s Avatar previously encountered in the Cultivator Territory.

A massive phantom appeared ahead, its body seemingly condensed from countless ’shadows’, a twisted giant, with scarlet eyes watching Luo Feng.

"Luo Feng!" The true body of the Shadow Lord let out a low roar, its aura vast, stirring up endless Blood Waves! After all, born of Blood Crane Territory and mastering supreme power ’Shadow’, it can significantly mobilize Blood Sea power.

"If outside, even with the true body, I would be weaker than you. But in Blood Crane Territory, my birthplace, you can’t defeat me!" The Shadow Lord’s voice resounded through every space-time.

Luo Feng looked at him: "With just you? Why doesn’t all three Lords of Blood Crane Territory come together?"

"Arrogant!"

The Shadow Lord, enraged, its massive phantom body merged instantly with the surrounding Blood Sea, a mighty Blood Sea directly crashed and pressed over.

"Hmph."

Luo Feng stood still, surrounded by the Realm of Life and Death resisting these Blood Waves, the aggressive Blood Waves rushing through the Realm of Life and Death, yet touched Luo Feng's surrounding protective energy layer! This protective energy layer is supplied with 'one billion and eight million Origins'.

"How is it possible?" The Shadow Lord, utilizing the home advantage, mobilized the vast Blood Sea power directly assaulting! In the Blood Crane Territory's environment, his power at least doubles! But at this moment, he could not break through Luo Feng's protective energy layer.

When the two camps clashed previously, Luo Feng withstood attacks from dozens of Ancestors, seemingly severely injured. However, in reality, the majority of the power was blocked by the protective energy layer.

External observers, watching from the endless space-time afar, only knew Luo Feng could endure! But they couldn't discern how much the 'protective energy layer' contributed.

"Is this all?" Luo Feng murmured, "Destruction!"

Luo Feng's body instantly erupted with endless power, using life sensing to lock onto the enemy, penetrate, and erode to annihilate the enemy!

This eroding power, whether as threads, blade lights, or mist... endless, covering the sky and earth! Luo Feng's attack was to exploit the advantage of 'endless energy'.

The Shadow Lord had a strong survival ability, yet found Luo Feng's power difficult to expel, expelling one part drained three to four parts of him.

"This Luo Feng's power stayed at its peak, not declining at all. Among the Innate Primordial Life Camp's siege, he could even help companions recover to their peaks. In terms of energy recovery, he's likely top-ranked within the entire Infinite Primordial Space. In 'Blood Crane Territory' environment, I can't outlast him." The Shadow Lord realized, even with home Blood Crane Territory energy supply, in the long battle it would lead to death for him.

"Kill."

Shadows, omnipresent.

Existing outside and within.

Frightening power began the slaughter within Luo Feng's body.

Helplessly, every part of Luo Feng's body was flawless, extremely formidable! The Shadow Lord's attacks initiated from within Luo Feng only caused minor injuries, which instantly disappeared.

"Rip—" Under shadow fusion, the surrounding space-time seemed as parts of the Shadow Lord's body, space-time tearing open directly! Also tearing at Luo Feng's body.

Variety of attacks, both internal and external, omnipresent, attacking from every angle.

However, Luo Feng remained flawless, with the core 'one billion and eight million Origins' as the most abundant, powerful, and stable part of his entire energy.

"Shadow's power, rather troublesome." Luo Feng extended a hand, revealing a knife in his grasp.

Chapter 424 - 8: Where Does He Intend to Fly?

Chapter 424: Chapter 8: Where Does He Intend to Fly?

Luo Feng stood in place, the Sky Splitting Saber in his hand transforming into dazzling Blade Lights!

Each Blade Light contained one ten-thousandth of his total energy reserve; in the blink of an eye, he slashed out hundreds of times, continuing to release Blade Lights tirelessly.

His energy recovery rate completely kept up with the consumption.

"This is—"

Shadow Lord's heart trembled; he was everywhere, yet at this moment, every corner around Luo Feng was met with the terrifying 'Blade Light', which contained the Power of Life and Death, so strong it made one tremble! The dense hundreds of Blade Lights crisscrossing heaven and earth instantly annihilated the entire surrounding Blood Sea.

With me as the center, everything around me, all space-time, all things, without exception, destroyed!

At this moment, Luo Feng stood in place, with only energy streams like boiling water around him, even space-time was in the process of being repaired.

"Hmm? This Shadow Lord can really hide well."

Luo Feng scanned with his gaze, locking onto a distant place.

Shadow Lord, wherever there was 'shadow', that was his territory.

Where matter existed, it corresponded to a 'shadow'! Thus the Shadow Lord could instantly appear in extremely distant places. Even though Luo Feng had just destroyed a vast surrounding area, it only lightly injured the Shadow Lord.

"No way to resist! Just tried a bit, and got hurt." Shadow Lord confirmed one thing; faced with the domineeringly powerful Lord Luo Feng, he could only hide!

"Seek the enemy!"

Luo Feng swung his saber again, and this time his Blade Light was a Dark Blade Light, extremely subtle and soft.

The Blade Light was restrained, following the fluctuation of the Life Qi Mechanism, penetrating space-time and Blood Sea obstacles, managing to catch up with every bit of the Shadow Lord's life force. Ensuring each slash hit the enemy.

Under 'certain hit', the power of each slash had to be greatly reduced, at most only one ten-thousandth of Luo Feng's energy reserve.

"When unleashing energy brutally, the power may be great yet when dealing with 'Shadow Lord', who specializes in evasion, we can't even touch him." Luo Feng understood this, "And when locking onto the Life Qi Mechanism to ensure a certain hit, the power of each slash drops significantly."

Like Lord Minghuang, they can ensure 'certain hit' and 'extreme speed' even while burning the main battle Avatar under a powerful attack, which is impressive.

"The 'Primordial Blade Path' I'm currently comprehending, continues the fusion of Life and Destruction, primarily focused on Destruction." Luo Feng pondered, "The direction I seek must first be 'certain hit', then pursue power."

"Certain hit and power are the core pursuits of my Primordial Blade

Path."

Whether facing the Innate Primordial Camp or confronting the Shadow Lord, Luo Feng sensed the importance of 'certain hit'! No matter how strong the power, if it does not hit the enemy, its function greatly diminishes.

His Origin Great Destruction is an indiscriminate attack that targets all directions. After using it once, any enemy who crosses swords with Luo Feng would guard against this move.

With an extremely strong Physical Body, endless energy, allowing companions to quickly restore to Pinnacle, and considerable move power. These means...they are already at the level of a normal Lord.

But Luo Feng was not satisfied.

He wanted to compensate for his weaknesses, aiming to create a second path at the Primordial Level.

"Hoo hoo hoo～～～" Luo Feng swung out a thousand Dark Blade Lights at this moment, each Dark Blade Light tracing the Life Qi Mechanism, penetrating space-time, and slicing the enemy.

"Hmm?" Shadow Lord was frightened and quickly retreated; these Blade Lights relentlessly destroyed his physical power, even the Blood Sea could not recover in time.

Swish swish swish.

In the blink of an eye, he crossed over most of the 'Blood Crane Territory range', arriving beside Blood Lord and Crane Lord.

"Ran pretty fast." Luo Feng also stopped; even with life locking, his current move range was limited.

"Can't fight at all."

Shadow Lord felt a bit aggrieved, looking at Blood Lord and Crane Lord beside him, "Luo Feng's body is too strong; before he teamed up with Wulan, assisted by the Cultivator Formation, he could withstand attacks from a hundred Ancestors. Now, even acting alone, I can't

hurt him at all. Engaging him is purely taking a beating!"

"With your ability, he can hit you?" Crane Lord asked doubtfully.

"As long as within a certain range, even if changing positions constantly, you still can't escape his Dark Blade Light." Shadow Lord shook his head.

"It's life Qi mechanism locking." Blood Lord stated, he also mastered the highest level of life type powers and could do life Qi mechanism locking, silently infiltrating the enemy, "This Luo Feng is proficient in 'life type' powers, but he has mastered the 'Dao' of that power, so he's stronger than me."

Lords who master the essential Dao, with the same power, can exert stronger power.

Lords can even create the most fitting Physical Body for themselves.

"Luo Feng has a strong body and fierce moves." Blood Lord said lightly, "But the weakness is obvious; his movement technique is obviously weak. We just need to avoid him, and he can't touch us."

Blood Lord, as someone who is skilled in life type powers, also has weak movement technique, he understands Luo Feng's predicament well.

However, Blood Crane Territory is his hometown! Within the hometown's range, Blood Lord is far more flexible than Luo Feng.

"Always avoiding him?" Shadow Lord asked.

"It's a bit frustrating." Crane Lord felt somewhat unwilling, as the Crane Lord who mastered 'Undying Power' was fundamentally fearless in battle.

"Can you be stronger than the combined forces of dozens of Ancestors?" Blood Lord glanced at the two companions, "Even if you two join forces, you won't be able to harm him at all. Crane! Don't think your physical body is strong enough... That Great Destruction burst from Lord Luo Feng, even Giant God Emperor, Primordial Beast Ancestor, and Black Tide Ancestor didn't dare to resist directly; it

even severely wounded twenty-six Ancestors nearby! Are you sure you can withstand it?"

Crane Lord's heart trembled.

In terms of protective skills, compared to Wulan, who mastered the 'Primordial Material Dao', Crane Lord was certainly inferior by a vast margin.

"If the three of us join forces, and take advantage of our position, mobilizing massive Blood Sea Power for assistance... I dare to fight him at close range." Crane Lord said, having witnessed Luo Feng's 'Great Destruction burst' might, one-on-one still felt somewhat uncertain.

"Can you kill him? Can you cause him a little trouble?" Blood Lord shook his head, "If we can't pose a threat, then there's no need to engage in battle. We'll avoid him; he won't be able to reach us in Blood Crane Territory, and naturally, he will give up and leave."

"He's already here in Blood Crane Territory, do we still have to endure?" Shadow Lord was unwilling.

"Alright, follow the elder brother's advice." Crane Lord could only nod.

Because with only Blood Lord's assistance, supported by endless vitality, combined with his own undying ability, he dared to fight Luo Feng closely.

Blood Lord didn't want to engage in a pointless fight, so Crane Lord could only endure.

...

Luo Feng could sense that in the blink of an eye, Shadow Lord's True Body had fled over half the Blood Crane Territory's range, and none of the three were approaching: "Are the three of them keeping a distance, unwilling to confront me?"

It must be admitted, with the three of them avoiding him, there wasn't much he could do. Unless 'calling for help'! For instance,

inviting 'Starlight Lord', the Number One in time and space expertise of the Infinite Primordial Space, with him, the enemy can't escape!

Each Dao has its strengths and weaknesses.

Though Cultivator Lords are strong, each can match the combined effort of two or three Ancestors. Purely for survival, a single Lord can withstand attacks from ten to eight Ancestors. But truly one-on-one, to fully kill an Ancestor... so far, no Cultivator Lord has managed it.

In history, it has been the cooperation between Lords that has eliminated all vitality of an Ancestor.

"Since they're avoiding me..." Luo Feng looked distantly, sensing the 'core source' of this vast, endless Blood Sea Power ahead, feeling both familiarity and curiosity towards the Endless Blood Sea.

After all, the Blood Sea Power is formed by three types of Highest Level Power, one of which is the Life Type Power.

Even in the brief time in Blood Crane Territory, Luo Feng deciphered seven to eighty percent of this Life Type Power. However, he wasn't too impressed, feeling the Life Type Power was somewhat narrow.

"Time to check out the core source of this Mysterious Land." Luo Feng swiftly flew, penetrating the Endless Blood Sea, heading straight to his sensed location.

He flew, getting closer and closer to the core source of Blood Crane Territory.

"Boom!" "Boom!" "Boom!"

Luo Feng gradually began to sense a kind of fluctuation, resembling the heartbeat of the entire Endless Blood Sea, where the 'core source' seemed like the heart of the Endless Blood Sea. This heartbeat, Luo Feng just by sensing, felt pressured.

In comparison to the Endless Blood Sea of the Blood Crane Territory, he himself was still much weaker.

"Interesting." Luo Feng became even more excited.

He had heard that there are some dangers within the Infinite Primordial Space, sufficient to annihilate a Lord's main battle Avatar. But as a Lord, the Dao is part of oneself, undying and unperishable, fearless to investigate some mysteries.

"I want to see what's special about the core of a Mysterious Land." Luo Feng became increasingly expectant, having never witnessed the core of a Mysterious Land, as the Mysterious Land from the Cultivator side, 'Land of Origin', was refined and controlled by Yuan! The succeeding Lords were merely reinforcing various Formations.

Luo Feng flew swiftly all the way, crossing layers of blood waves.

"Where does he want to fly to?"

The three Lords of Blood Crane Territory, who had been avoiding battle, noticed something was amiss.

"He's quickly approaching the 'Blood Crane Territory Origin'!"

Blood Lord, Crane Lord, and Shadow Lord's expressions all changed.

For Ancestors aiming for undying and unperishable status, there are typically two common methods: One is Life Core evolution; after reaching a certain level, the possessed ability can achieve undying and unperishable status, as in 'Initial', 'Mother of Space-Time', 'Inference Fire Ancestor' - this is most common. The other is controlling a Mysterious Land, where Life Core can merge with the 'Mysterious Land Origin'; if the Mysterious Land is undestroyed, so is oneself. Infinite Snake Ancestor exemplifies this.

Controlling a Mysterious Land also allows using parts of its power for one's benefit, as Infinite Snake Ancestor can render itself virtual, comparable in size to a cluster of Worlds!

It must be understood, the 'Infinite World' can reflect the entire Infinite Primordial Space. Even if Infinite Snake Ancestor simply utilizes part of its abilities, the effect is boundless; battling head-on fears no enemies.

"Does he intend to refine Blood Crane Territory Origin?"

Blood Lord, Crane Lord, and Shadow Lord had long desired to refine and control the Blood Crane Territory Origin, truly achieving undying and unperishable status. But refining is too difficult, and the three have been unable to accomplish it.

Just like the Infinite Great Snake Clan, achieving Ancestor Level ranks over ten, yet only 'Infinite Snake Ancestor' can refine the Infinite World Origin.

In the Giant God Race, reaching Ancestor Level, including Giant God Emperor, not one has managed to refine the 'Giant God Realm' Origin. The difficulty of refining Mysterious Land Origin is evident.

"Can't let Luo Feng get close, stop him!" The three Lords of Blood Crane Territory at this moment shared a unanimous opinion.

Chapter 425 - 11: Luo Feng vs. the Three Lords of Blood Crane Territory

Chapter 425: Chapter 11: Luo Feng vs. the Three Lords of Blood Crane Territory

The Blood Lord, the Crane Lord, and the Shadow Lord also understood that even if they allowed Luo Feng to refine the Blood Crane Territory Origin, the chances of success were still very low. Yet the Blood Lord, Crane Lord, and Shadow Lord did not dare to gamble; they were unwilling to even give Luo Feng the chance to attempt the refinement.

"In the past, there were some ancestors who came to our Blood Crane Territory, but they couldn't perceive the Blood Crane Territory Origin at all. This Cultivator Lord 'Luo Feng' can sense it; clearly, the Dao he has mastered is quite compatible with the Blood Crane Territory Origin."

"He should only be skilled in the direction of life, and is not proficient in the power of 'Immortal' and 'Shadow'. His chances of refining it are very low."

"No matter how low the chances are, we cannot let him get close!"

At this moment, the three Lords of the Blood Crane Territory cooperated, and under the leadership of the Shadow Lord, rapidly crossed the vast distance.

Traveling alone and traveling with comrades makes a significant

difference in speed.

But it only took a few moments for the three Lords of the Blood Crane Territory to reach close to Luo Feng.

"Hmm?"

Luo Feng, who was traveling at full speed, could sense the arrival of three terrifying presences ahead.

"All coming together?" Luo Feng curiously looked ahead, where three terrifying figures were forming, none other than the true bodies of the Blood Crane Territory's three Lords. They were similar in size, but fundamentally different in essence.

The Blood Lord had a lean, elongated body, with a pair of scale-armor wings, and its entire body was covered in a layer of exquisite blood-colored scales, each resembling a blood-colored crystal jade, beautiful beyond compare.

The Crane Lord was a massive bird with silver-gold feathers, each feather like a weapon, indestructible.

The Shadow Lord was a huge distorted shadow, with blood-red eyes staring at Luo Feng.

"Lord Luo Feng."

The Blood Lord spoke, "The Shadow's invasion of your Cultivator Territory was indeed his mistake. However, at the time, you were being attacked by the Innate Primordial Camp, and the outside world believed you would fall, that your territory would be completely overrun. Therefore, it was natural for various factions to seize some worlds during the war. After the war ended and you drove him out, it was also justified. Our Blood Crane Territory can promise... not to invade the Cultivator Territory anymore, can Lord Luo Feng let this go?"

"Just a promise and you want me to let it go?" Luo Feng looked at the three of them.

"What do you want?" the Crane Lord looked at Luo Feng, somewhat

annoyed.

"The resources you obtained in the Cultivator Territory, triple compensation to me," Luo Feng said, "I can let it go."

The Blood Lord, Crane Lord, and Shadow Lord hesitated.

"You must promise that after receiving the compensation resources, you will never set foot in the Blood Crane Territory," the Blood Lord spoke, "If you agree, we are willing to give you this compensation resource."

The Blood Lord knew very well that he had mastered the highest level of life power, but Luo Feng had mastered the 'Dao' in this area. In terms of refining the Blood Crane Territory Origin, Luo Feng's chances were likely higher than his!

Such an opponent must be expelled, and he cannot be allowed to return to Blood Crane Territory.

"Triple compensation, is for not considering your invasion of Cultivator Territory. As for the Blood Crane Territory? I'll come if I want." Luo Feng also realized that the previously arrogant Blood Crane Territory's three Lords were willing to pay triple compensation to make him leave.

Indicating that if he continued to advance, he might cause substantial losses to the three Lords of the Blood Crane Territory! These losses could far exceed three times the resources.

"Lord Luo Feng, Blood Crane Territory does not welcome you, leave quickly!" Crane Lord could no longer suppress his temper and shouted angrily.

"Give you three times the resources, and you still won't leave, do you really think we can't deal with you?" the Blood Lord spoke coldly.

Luo Feng grinned: "Feel free to try! See if you can stop me."

"Take action!"

The Crane Lord emitted a piercing sound, already carrying endless

Blood Wave to strike.

The Blood Lord and Shadow Lord also struck simultaneously.

"Boom~~~"

This time, the three Lords of the Blood Crane Territory simultaneously mobilized Blood Sea Power; each had their specialties. Working together, the entire Blood Sea seemed to come alive completely! Endless surging Blood Wave rolled mightily, frightening in its power.

"The three Lords of the Blood Crane Territory join forces, the strength of mobilized Blood Sea Power is indeed much stronger." Luo Feng was fearless; he had experienced the war between the two camps, so what was this scene?

Boom—

Luo Feng instantly drew his saber, and upon doing so, felt countless shadows binding him, and binding his Sky Splitting Saber.

"Hmph." Luo Feng's power burst forth, forcibly breaking through the constraints, a saber strike landed on the Crane Lord's body who had arrived near him.

The Crane Lord had no resistance whatsoever, allowing Luo Feng's saber to slash at his neck. The feathers on his neck shimmered silver and gold; Luo Feng's formidable power at close range, under the numerous feathers actively dissipating force, only caused surface cracks in a few feathers, but they quickly healed completely.

"Rip——" Allowing Luo Feng to slash him, the Crane Lord's sharp claws grabbed at Luo Feng's chest, but when approaching, they were blocked by the protective energy layer, causing minor ripples in the protective energy layer.

Both sides exchanged ferocious blows at close range yet sustained little damage.

"Whoosh——" Luo Feng saw the Crane Lord in front of him suddenly emitting an extremely piercing sound, and simultaneously, its beak

transformed into a golden afterimage, pecking fiercely! The protective energy layer on Luo Feng's body was pierced where it was pecked!

Luo Feng's chest was also pecked, creating a bloody hole, but it healed instantly.

"Wow!"

The Crane Lord's body surface erupted with countless silver-white glows, each feather transforming into light, attacking Luo Feng at ultra-close range, but these feathers, though seemingly numerous, each did not have the power of that one peck, unable to penetrate the protective energy layer.

Chapter 426 - 9: Luo Feng vs. the Three Blood Crane Lords (Part 2)

Chapter 426: Chapter 9: Luo Feng vs. the Three Blood Crane Lords (Part 2)

"Crane Lord, your undying body does have some capabilities in combat." Luo Feng praised.

However, Crane Lord was quite unwilling, and only barely managed to wound Luo Feng with a full-force strike, creating a blood hole on Luo Feng's surface! But he knew very well that for a lord like Luo Feng, with terrifying recovery capabilities, what is a blood hole?

The entire body could undergo complete catastrophic explosion, yet still manage to condense into a complete form in the end! This blood hole is truly just like a scratch.

"These lords who have mastered the 'Dao' are terrifyingly strong in their specialties. Luo Feng's protective means are stronger than ours." Blood Lord transmitted mentally, "We should follow the original plan and completely intercept him."

"Alright." Crane Lord had no other options either.

Actually, the three lords of Blood Crane Territory excelled in the highest level powers of life, immortality, and shadows, all of which were directed towards self-preservation. This led to their remarkable resilience in terms of life force but resulted in a lack of prowess in killing enemies.

Their proficiency in self-preservation brought one advantage: historically, many Ancestor level entities that emerged from Infinite Primordial Space had fallen. Yet Blood Crane Territory only birthed them three as Ancestors, and the three were still alive and well.

Due to their extreme survival capabilities, especially Shadow Lord's ability to come and go without a trace, they often went against weaker forces, and those weaker powers had no means against Blood Crane Territory.

This time, however, they provoked the Cultivator Camp!

"Boom~~~~"

The surrounding Blood Sea surged and completely shattered Luo Feng's Realm of Life and Death, entirely enveloping him! Luo Feng resisted the Blood Sea using his protective energy layer.

Crane Lord and Blood Lord both came closely to entangle in the attack; one with an undying body, the other integrated with the Blood Sea. Moreover, the power of 'shadow' constrained Luo Feng at every point.

Not just his limbs were affected; Luo Feng's entire body was influenced by the power of shadows.

"Really uncomfortable."

Despite Luo Feng's strong physical body and the vast ten billion eight million units of Origin Energy, he was still troubled, tangled by the three lords from Blood Crane Territory, and unable to fly and proceed.

"Get out of my way!" Luo Feng's entire body erupted in blade light, but Crane Lord's massive body, giant wings eagerly embraced Luo Feng, entangling him, permitting the blade light to strike upon him.

Even with slight injuries, Crane Lord instantly recovered himself.

Given Crane Lord's undying body, the only thing he fears is another of Luo Feng's catastrophic explosion! Now, with Blood Lord's cooperation, even if severely damaged, he's confident he would

survive.

...

Amidst the endless Blood Sea, several avatars of world-level Primordial quietly observed.

"This Cultivator Lord is truly terrifying."

"Even with Blood Lord, Crane Lord, and Shadow Lord joining forces, and aided by the infinite Blood Sea, they can only restrain him, unable to wound him."

"It’s said that one Cultivator Lord can deal with several Ancestors, and indeed it seems true."

"The Cultivator Camp is indeed powerful."

These world-level Primordials quietly observed, stunned by Lord Luo Feng’s prowess.

Fighting one against three in the heart of Blood Crane Territory without any signs of weakness?

...

Although the Mysterious Land of Blood Crane Territory concealed the battle, shrouding various auras, several beings in the vast Infinite Primordial Space still sensed the outbreak of this battle.

A peculiar world entirely hidden, rendering any other life form in the Infinite Primordial Space incapable of discovering it.

Yet it can watch every part of the Infinite Primordial Space.

A gigantic eye appeared on the membrane wall of this world, curiously watching the battle at Blood Crane Territory.

"This Lord Luo Feng, if he were outside, facing three foes without fear, then these three wouldn’t be able to stop his steps. But within Blood Crane Territory... aided by the power of the endless Blood Sea, Blood Lord, Crane Lord, and Shadow Lord gained at least fifty

percent extra strength, and Lord Luo Feng is restrained, unable to advance further."

"In the Cultivator Camp, Starlight Lord uses the Power Breaking Technique, and so does this Lord Luo Feng... In the future, Lord Luo Feng might be even more frightening than Starlight Lord!"

It pays close attention to Luo Feng.

From its experience, it could perceive that Luo Feng's moves contained the meaning of 'Life and Death'. If this direction is pursued to the extreme, it indeed would be one of the most terrifying kinds in the Infinite Primordial Space.

Lord Luo Feng practicing Power Breaking Technique, clearly possesses the potential to reach the extreme.

...

"Luo Feng went to Blood Crane Territory?"

Numerous avatars of Starlight Lord observed the past, present, and future, witnessing the battle between Luo Feng and the three lords of Blood Crane Territory.

"Luo Feng's Primordial Life and Death Dao has deep research on life, with a sliver of hope to refine 'Blood Crane Territory Origin'. Hence all three Blood Crane Territory lords are fully obstructing?" Starlight Lord smiled.

Even as he watched the battle, he had no intention of lending aid.

Among the eight lords of the Cultivator Camp, they only collectively acted in face of significant threats to the camp; in usual adventures or vendetta skirmishes, they generally acted alone! Only when encountering significant trouble would they invite companions.

If not invited, the lords would not interfere in companions' affairs.

...

Within Blood Crane Territory.

The endless Blood Sea surged furiously, and Blood Lord, Crane Lord, and Shadow Lord fully obstructed Luo Feng.

"Other methods indeed can’t break their obstruction." Luo Feng thought, and suddenly a multitude of brilliant stars-like origins flew out from his body surface, as many as ’three billion six hundred million’ projects flew out.

Three billion six hundred million origins formed a complete formation.

These origins suddenly throbbed like hearts, then fully burst forth, causing a chain reaction of explosive power directed towards Blood Lord and Crane Lord.

Chapter 427 - 9: Luo Feng vs. the Three Blood Crane Lords (Part 3)

Chapter 427: Chapter 9: Luo Feng vs. the Three Blood Crane Lords (Part 3)

When the physical body is destroyed and one billion and eighty million origin points completely explode, even with formation guidance, Luo Feng finds it difficult to perfectly control the direction.

However, with only thirty percent of the energy reserve, most of the energy's impact direction can still be controlled.

"Not good—"

Crane Lord and Blood Lord were shocked.

It seemed slow to say, but in fact, three hundred and sixty million origin points flew out and caused Origin Great Destruction Explosion! Although this was only thirty percent of the energy reserve for the whole body, it still could match all of Wulan's energy reserves; this explosive power was still very terrifying.

A moment later, numerous feathers on Crane Lord's body began to shatter, and his entire body was blown back, but during the retreat, the injured body was quickly restored with the assistance of Blood Lord.

Blood Lord completely merged into the Endless Blood Sea, bearing much of the damage with the blood sea.

"The power isn't that great!" Crane Lord sighed in relief after taking that blow.

Having an Undying Body, what he feared most was Luo Feng's Origin Great Destruction.

But this strike...

Was clearly much weaker than expected.

"The great destruction of three hundred and sixty million origin points is a lot weaker." Luo Feng also realized this point.

At the lord level, it's very difficult to enhance the power of a killer move.

Like Luo Feng's 'thirty percent energy reserve' great destruction, the Giant God Emperor, Primordial Beast Ancestor, and Black Tide Ancestor can directly suppress it! To achieve a 'sixty percent energy reserve great destruction' is needed to break their suppression and begin to injure them.

Sixty percent energy reserve explosion is the limit value of their suppression; breaking through this limit, they have to resist, and the injuries will escalate rapidly.

With a ten percent energy reserve explosion, even the three would not dare block it, exerting all efforts to dissipate the power. Even so, each of the three Giant God Emperors is severely injured, further affecting many surrounding ancestors.

The ten percent explosion has Crane Lord with the Undying Body a bit frightened.

Thirty percent?

Crane Lord feels it's still manageable.

"Boom—" However, after defeating the obstructions of Crane Lord and Blood Lord, Luo Feng swiftly flew forward.

"Not good, stop him." Blood Lord and Crane Lord's expressions

changed slightly, and Shadow Lord quickly carried them, intercepting Luo Feng in front again to entangle and restrain him.

"Whoosh—" Crane Lord and Blood Lord just approached to block and restrain for one or two breaths, suddenly seeing dazzling dense origins flying out again, a total of three hundred and sixty million origins fly out again.

The terrifying explosion appears again! Power overwhelmingly rushes towards them! Under the terrifying explosive power, Blood Lord could only merge into the blood sea from the blast, and Crane Lord was blown back even further.

Luo Feng continued to fly.

"How is that possible?"

"Can this move be used repeatedly?"

Blood Lord, Crane Lord, Shadow Lord couldn't believe it.

But when they attempt to block again, they again witness that dazzling three hundred and sixty million origins flying out to explode, chilling their hearts.

"The thirty percent energy reserve explosion has ten percent energy reserve that can be recovered. Actually, each time I only expend two percent energy reserve."

"In just two or three breaths, it can be restored."

Including battle and travel time, in two or three breaths, a weakened version of Origin Great Destruction can be used. This power is enough to repel Blood Lord and others, allowing him to keep advancing.

"What to do?" Blood Lord, Crane Lord, Shadow Lord were momentarily at a loss, silently communicating with each other but lacking any solution.

With Luo Feng's thirty percent energy reserve Destruction Explosion, Crane Lord who held Undying Power could withstand it, doesn't

mean the explosive power wasn’t strong! This terrifying power is enough to repel all formidable enemies, blasting them far away.

"Can’t stop it!"

"We can’t stop it!"

Blood Lord, Crane Lord, Shadow Lord hopelessly realized that every time they tried to block, they would ultimately face the explosion impact of three hundred and sixty million origins, being blown back far away.

Boom! Boom! Boom! Boom! Boom! Boom!

Wave after wave of terrifying explosive impact, Luo Feng continued advancing, after being blasted thirty-nine times, Blood Lord, Crane Lord, and Shadow Lord stopped, no longer intercepting.

They gave up, resigned.

Because not far ahead was already the origin of Blood Crane Territory.

"Arrived." Luo Feng also sensed it, the core source of Blood Crane Territory was just ahead.

Thanks to new Alliance Hierarchs ’Effort Crabs’ and ’Boundary Light’ for their support.

Thanks to old Alliance Leader ’VERY’ for the patronage!

Thanks everyone for the support!

Chapter 428 - 10: Blood Crane Territory Origin

Chapter 428: Chapter 10: Blood Crane Territory Origin

The surrounding blood sea was vast and magnificent. Luo Feng gazed ahead.

Even though he could clearly sense the 'Blood Crane Territory Origin' right in front of him, no observational method could detect it.

"Is it real, or is it an illusion?"

Luo Feng followed the mysterious fluctuations, delving deep into the enigmatic changes, gradually catching a glimpse of the 'Blood Crane Territory Origin'.

This origin, in terms of size, is tiny, smaller than any matter. Yet, in terms of influence, it radiates throughout the entire Blood Crane Territory.

"Is this the Blood Crane Territory Origin?" As he followed the mysterious changes, delving deeper, the enigmatic transformation of the entire Blood Crane Territory Origin gradually manifested in Luo Feng's mind. This was a more grandiose and complex structure than the Source World Origin.

"He's definitely probing the Blood Crane Territory Origin!"

From afar, Blood Lord, Crane Lord, and Shadow Lord saw this scene. Though it's not apparent to outsiders, they vaguely understood... this

Cultivator Lord 'Luo Feng' must have already delved deep into the Blood Crane Territory Origin.

"His mastery of life direction surpasses mine, and he definitely can probe the Blood Crane Territory Origin." Blood Lord was rather unwilling.

"Are we just going to let him explore? Let him attempt to refine it?" Shadow Lord couldn't help but say.

"Can you stop him?" Crane Lord glanced at him, "It's all because you provoked the Cultivator Camp. I have always said, do not provoke the three major camps! You insisted, bringing about such a big trouble!"

Shadow Lord also felt suppressed.

Though his frontal combat skills are inferior, unable to stand against any lord from the Cultivator side, he can transform into myriad forms, omnipresent, confident that... the lords cannot kill him. Additionally, with the mysterious world of 'Blood Crane Territory' as his hometown, he naturally had the confidence.

Who would have thought that Luo Feng started trying to probe and refine the Blood Crane Territory Origin?

"Let's take action and try." Blood Lord, watching with some agitation, couldn't help but say, "Try every possible method to see if we can stop him."

"Let's give it a go first!" Although Crane Lord and Shadow Lord had little confidence, they really didn't want to see the Blood Crane Territory Origin refined and controlled by Luo Feng.

Boom~~~~

The blood sea surged once again, with Blood Lord, Crane Lord, and Shadow Lord merging into the blood sea, carrying the endless power of the blood sea, the three highest-level forces coordinating to attack Luo Feng.

They tried everything they could.

However, among the three of them, the highest-level powers they mastered were one of life, one of undying power, and one of shadow. They were all very strong in terms of self-preservation but weak in attacking the enemy!

"Really noisy!"

Luo Feng sat cross-legged, protected by a layer of protective energy, repelling all attacks around.

Now that there was no need to rush, it was quite easy to resist!

Even with the joint effort of the three lords of the Blood Crane Territory and relying on the power of the blood sea, they could not break through Luo Feng's protective energy layer. Occasionally, the Crane Lord could barely penetrate the protective energy layer a bit, causing some superficial wounds.

"Go."

Luo Feng let them attack at will, occasionally releasing 3.6 billion origins to let them taste what it's like to be attacked.

Only after a brief moment of siege did the three lords of the Blood Crane Territory stop.

"It's useless. Even if thirty to fifty ancestors of the Innate Primordial Camp joined forces, they couldn't destroy Luo Feng. How could we possibly deal with him?" Crane Lord looked unwillingly at the black-clothed, black-haired man sitting cross-legged.

Luo Feng, in the core area of the Blood Crane Territory, sat cross-legged in the blood sea, carefully probing the Blood Crane Territory Origin.

The three lords of the Blood Crane Territory could only watch helplessly.

"He only excels in the power of life." Blood Lord said, "The Blood Crane Territory Origin contains three highest-level forces; merely comprehending one highest-level force isn't enough to refine it."

"He comprehends the Primordial Level Dao, much more powerful than you, elder brother!" Crane Lord said.

"Even if he is more formidable than me, merely mastering one force is still not enough to refine it." Blood Lord said.

"Right, right. Don't worry. Even after spending endless years, we three couldn't refine it. How could Lord Luo Feng possibly refine it? Besides, the Cultivator Camp has many affairs, and his main battle avatar couldn't possibly stay here indefinitely." Shadow Lord immediately said.

Blood Lord and Crane Lord glanced at Shadow Lord.

The encroachment of the Cultivator Territory was entirely Shadow Lord's unilateral decision!

"This Luo Feng..." At this moment, Shadow Lord was a bit regretful. If he had known about the Cultivator Camp's communication, he would have retreated obediently, avoiding this trouble!

If Luo Feng truly refined the 'Blood Crane Territory', his responsibility would be enormous!

After all, without his provocation! Cultivator Lord 'Luo Feng' had just broken through and already had many affairs, so it was unlikely for him to invade the depths of the Blood Crane family territory without reason.

...

Luo Feng sat cross-legged in the endless blood sea, a wisp of thought probing the Blood Crane Territory Origin.

"So, this is the full picture of the Blood Crane Territory Origin." After spending half a day, Luo Feng finally glimpsed the full picture of the origin.

The Blood Crane Territory Origin, with the mystical perfect combination of life force, undying power, and shadow power, eventually transformed into a complete origin.

How to form an origin? Luo Feng had already researched deeply before stepping out of the braided cage; the core of his Primordial Life and Death Dao is the origin system, with 1.8 billion origins within his body.

Although he didn't understand the 'undying power' and 'shadow power', Luo Feng could distinguish the difference between the two. After half a day, he probed the method of combining the three forces into an origin.

"To refine the Blood Crane Territory Origin, one at least needs to perfectly master one of the highest-level forces! And also understand how the three combine into an 'origin'. Then, one can trace the vines to thoroughly refine the origin."

"Or, comprehend two of the highest-level forces! Then the origin can be easily refined."

Luo Feng determined the refinement plan.

"For me, the first path suits better."

"I already understand how the three combine into the origin."

"Now what I need is to fully master this one life force." Although Luo Feng comprehended the Primordial Life and Death Dao, the blend of seven parts life and three parts destruction did not constitute a pure life path.

For Luo Feng, mastering this form of life power is not difficult.

Before breaking free from the braided cage, Luo Feng's comprehension, mental processing speed, and insight were much weaker than they are now. Yet, he could still forcefully comprehend the Primordial Life and Death Dao! Now, as a lord...

The comprehension was still in the direction of life, which had the deepest accumulation, without needing to comprehend a complete Primordial Life Dao, but just a form of life power.

One must know that when Luo Feng arrived at the Blood Crane Territory, with just a slight perception, he had already glimpsed

seventy to eighty percent of this life power.

"Pure life does not pursue the perfect control of every portion of power but seeks the ultimate bloom of life, the more, the better! It's not even in a physical form but transforms into a Blood Sea form, with an immensely large body." Luo Feng understood this path.

This path, if I create a Primordial Level Dao. With this dao constructing the physical body, the body can transform into a vast Blood Sea.

The size of it is, perhaps, larger than the Giant God Emperor! Naturally far surpassing Wulan! It could be considered the largest being in the Endless Primordial Space.

Majestic and grand!

No matter how the enemies attack, the vast Blood Sea can dissipate a lot of power, and the energy reserve is even higher than Luo Feng's current one, with frightening energy recovery! Even if a hundred ancestors join hands, they can't pose a threat.

This is the power of a pure 'Primordial Life Dao' lord.

But the downside is, the size is too large, moving very slowly, and it's impossible to mobilize all the power to kill the enemy! Against enemies, only part of the Blood Sea can be mobilized.

"My Primordial Life and Death Dao seeks absolute control over every portion of power! To mobilize all the power to confront the enemy with a single thought!" Luo Feng pondered.

On the basis of 'absolute control,' the current energy reserve is already at the limit.

Any larger, and it would begin to lose control.

"No need to comprehend a pure 'Primordial Life Dao,' just comprehending this form of life power feels not difficult." Luo Feng was quite interested and began to analyze and study it.

...

In the Origin Continent Origin World.

In an ancient cave mansion in Huyang City.

"Hmm?"

A tall, burly man opened his eyes in a daze, looking around. This was the appearance of his family's cave mansion when he was young.

"Didn't I die? Died at the hands of Sang Shuiyun." Shang Tianyan murmured to himself.

Back then, he used his life to confirm that Sang Shuiyun's true identity was 'Divine Monarch Xue Yun,' and also left a Karmic Tracing Order for the Marquis of Jiu Jang's side! To ensure the tracking of Divine Monarch Xue Yun.

"How am I still alive?"

"Reincarnated?"

"No, even among the Marquis in the Primal Chaos Realm, only a very few can reincarnate and still retain memory." Shang Tianyan appeared slightly confused.

"Brother Shang." A voice sounded.

Shang Tianyan looked to his side, and a black-clothed, black-haired man appeared there. However, there was a pair of dark golden sharp horns on his forehead, slightly altered in appearance. It was exactly how Luo Feng looked when he initially crossed the Samsara Channel and first arrived at the Land of Origin.

"Brother Luo He?" Shang Tianyan immediately recognized his friend, but the 'Brother Luo He' before him was vastly different from the one in his memory. That invisible aura even surpassed the mysteries of the operation of the Heaven and Earth Rules.

As an Artifact Refining Master, in his perception, the aura of his friend Brother Luo He was higher and more profound than Heaven and Earth!

"Brother Luo He, what's going on? I remember, I died?" Shang Tianyan looked at Luo Feng.

"You indeed died, you have been dead for ten thousand epochs." Luo Feng said with a smile, "I fished you out from the river of time and space, from a past timeline, and brought you to the present, extending your life."

Shang Tianyan was a bit dazed, the river of time and space? Fished out from a past timeline?

"I know there are 125 lives you cared about the most that have passed away. I have also resurrected them one by one." Luo Feng smiled as he pointed toward a garden in the cave mansion. In the open area of the garden, over a hundred figures appeared out of thin air, each slightly dazed, looking around curiously.

Shang Tianyan looked on in disbelief at those 125 figures.

There was his wife, his young children, parents who had long since passed, the elder brother who took care of him, companions who lived and died with him, fellow daoists who researched artifact refining with him, the most fond and regrettable disciple...

Throughout his long life, those regretful existences, each came back to life.

He once felt that the world was vast, yet he walked alone between heaven and earth.

At this moment, intense emotions filled his heart, and he even felt a bit apprehensive.

"Isn't this an illusory realm?" Shang Tianyan worriedly thought that this might be a grand illusion, having once been deceived by Dream Flower Tower Master through an illusory realm.

"Tianyan!" A distant woman saw Shang Tianyan and called out excitedly.

Hearing this familiar voice, Shang Tianyan's eyes suddenly became moist.

"Go ahead."

Luo Feng smiled, "Good to reunite with family and friends." With that, Luo Feng's figure disappeared without a trace.

At that moment, Shang Tianyan realized that his friend 'Luo He', whom he met in Huyang City, must have become an immensely great being, beyond what he could imagine.

...

Luo Feng remained hidden, no longer disturbing them, watching Shang Tianyan and his friends and family reunite with excitement, he couldn't help but smile.

The meaning of resurrection lies right before the eyes.

"Brother Shang, my only friend during the eternal true god stage! Enjoy these days well. In the future, there will be more matters to trouble you with." Luo Feng watched from a distance, having a great admiration for Shang Tianyan's character.

Shang Tianyan had compassion for the weak and sacrificed his life for all beings. With this virtue, Luo Feng decided to give Shang Tianyan a position in the future management of the factions on the Origin Continent.

The core of the Origin Continent factions includes Morosa, Mountain sitting guest, and Master Emperor Chu, along with other various management personnel such as Emperor Qing, Emperor Chu Yu, Moyu Qingyan, Shang Tianyan, and others.

Chapter 429 - 11: Highest Level Power - Blood Power

Chapter 429: Chapter 11: Highest Level Power - Blood Power

Land of Origin, Council Hall.

Around the Dark Realm Crystal round table, eight lords—Yuan, Jin, Wulan, Ming Huang, Nai Gu, Starlight, Mo Man, and Luo Feng—were already seated.

"When reclaiming territories, did everyone encounter trouble?" Yuan asked.

"No," Wulan shook his head.

"Just a word, and they willingly retreated," Jin grinned.

Starlight frowned and said, "I am currently pursuing 'Mogus'. During our conflict with the Innate Primordial Camp, Mogus devoured the souls of more than six million Source Worlds! And that's him conserving food. He begged for mercy from me... I ignored him and continued the pursuit. As of now, I've eliminated 89% of his power."

"Mogus!" Hatred flickered in Yuan's eyes.

"I really want to destroy him completely," Jin was rather unwilling.

Luo Feng's expression was also grave.

In the Infinite Primordial Space, there are more than two hundred Ancestor Level entities! Among them, 'Mogus' is one of the top-tier

beings, an undying and immortal entity adept in soul power. In terms of threat and destructiveness, he surpasses more than half of the Cultivator Lords!

Before Starlight was born, no one could threaten him in the slightest. He truly did as he pleased!

He didn't involve himself in other disputes, nor did he require any other resources, needing only one type of resource—a massive amount of souls!

He excelled in soul power, and he could hide within countless life forms in the Infinite Primordial Space, never to be killed or eradicated completely.

The Innate Primordial Camp couldn't deal with 'Mogus', rather, they recruited him, actively providing a certain amount of 'Innate Primordial Life' for him to devour.

In the Infinite Primordial Space, in terms of the number of creatures,

there were many Innate Primordial Lives, but even more cultivators in Source Worlds! Within the Braided Cage, the cultivators exhibited extraordinary wisdom, and their soul's essence was quite exquisite, also being one of Mogus's favorite delicacies.

However, the Cultivator Camp absolutely prohibited Mogus from devouring countless cultivator souls. Once he acted, the cultivators would pursue him at any cost!

In the expanse outside the Cultivator Territory, those Source Worlds had long been ravaged by some Ancestors, with few creatures being nurtured. In contrast, in the Cultivator Territory's Three Thousand Six Hundred World Groups, the endless Source Worlds housed a vast number of cultivators, something that had long whetted Mogus's appetite.

This time, with the eruption of war between the two camps, Starlight's Avatar had to confront the Innate Primordial Camp directly, and Mogus immediately infiltrated, devouring one Source World after another; he devoured to his heart's content!

The moment the war ended! Starlight Lord began the pursuit.

In all space-time, pursuing in all dimensions! Any place hiding Mogus's power would be attacked.

"His power can merge into countless weaker creatures," Yuan shook his head, "Only Starlight, observing past and future, can locate countless traces of his lurking."

"This time, I plan to eradicate at least 99% of him! Keeping him in a prolonged recovery period, so he never dares to come to our Cultivator Territory again!" Starlight Lord spoke coldly.

He dared only claim to eradicate 99%.

As an undying and immortal entity, the more minuscule remnants become increasingly hard to eradicate as time goes on.

Unless one day, all life forms across all Source Worlds, all high-level, World-level Primordial Life are eradicated, rendering 'Mogus' devoid of any avatars, there's hope to eradicate him completely.

"His body is composed of soul power," Yuan said, "Once 99% is eradicated, recovery will be exceedingly slow."

"Before Starlight became a lord, we could do nothing about Mogus," Wulan sighed, "That period was truly terrible!"

For a time, the Cultivator Camp could only negotiate with Mogus.

Only after Starlight became a lord did they have the confidence to pursue him.

"With Mogus being undying and immortal, there's no other way but to hurt him, making him never dare to venture into our Cultivator Territory again," Yuan said, "Have other lords encountered trouble?"

"I have also encountered some trouble," Lord Mo Man spoke, "The Lotus Prison Mountain Master has completely entrenched himself! I can do nothing against him."

"Lotus Prison Mountain Master?" Everyone present frowned slightly.

Those familiar with history would know.

The Cultivator Camp was initially very weak before gradually expanding its territories!

The present Three Thousand Six Hundred World Groups had a region once known as the 'Lotus Prison Cluster', where the Lotus Prison Mountain Master was deeply rooted over eons, completely dominating that world group, and he and his kin freely consumed the Source World Origins.

Later, the Cultivator Camp expelled them!

A Space-Time Net established over the scope of the 3600 World Groups deterred any Ancestors from trespassing.

"Seizing the chance while the two great camps were at war, the Lotus Prison Mountain Master came back," Lord Mo Man shook his head, "Though I can suppress him, I cannot defeat him."

"I'll go with you," Yuan said.

"With Brother Yuan's help, he will surely flee in panic," Mo Man nodded.

The Lotus Prison Mountain Master, a being comparable to the 'Infinite Ancestor' and 'Silent Extinction Ancestor'! Although not achieving undying and immortal status... Cultivator's seven lords had tried before to kill him, but to no avail.

Barring Yuan, when the other lords besieged, the Lotus Prison Mountain Master can root himself there, enduring all attacks.

Only Yuan's formation considerably restrains the Lotus Prison Mountain Master, preventing him from borrowing substantial power from the 'Primordial Space'. When facing Yuan, the only option for the Lotus Prison Mountain Master is to flee.

"Brother Luo Feng, is your true body constantly in the Blood Crane Territory?" Jin asked, "Would that weak force—the Blood Crane Territory—dare to tangle with our Cultivator Camp?"

Among the more than two hundred Ancestor Level entities in the Infinite Primordial Space, strength varies, and simply having a seat in the Land of Eternity only signifies 'undying and immortal'; it does not necessarily equate to strength.

Truly powerful entities number only a little over thirty.

Especially those who disdain to join the 'Innate Primordial Camp' and dare to face numerous dangers alone, they all have enough confidence.

Mogus can barely rank in the top ten in the Infinite Primordial Space in terms of strength! The Lotus Prison Mountain Master can also rank in the top 30.

The three from the Blood Crane Territory are far inferior in comparison.

"Don't underestimate the Blood Crane Territory. The Blood Lord, Crane Lord, and Shadow Lord of the Blood Crane Territory have extremely strong survival abilities. When the three of them team up, they can be quite troublesome," Yuan said with a smile. "Once they encounter trouble, they will hide within the Mysterious Land of 'Blood Crane Territory,' using the advantage of the terrain, making them more troublesome than the Lotus Prison Mountain Master."

Only when the three lords of the Blood Crane Territory join forces within the range of the Mysterious Land do they dare to say they are more troublesome than the Lotus Prison Mountain Master.

Without the Mysterious Land, the three from the Blood Crane Territory are significantly weaker.

"Brother Luo Feng, do you need help?" Ming Huang asked.

"No need."

Luo Feng smiled, "I am somehow destined with this Blood Crane Territory! I am somewhat confident that I can refine this Mysterious Land."

The seven lords all stared at Luo Feng.

Refining a Mysterious Land?

"Are you confident?" Jin couldn't help but ask, his eyes full of envy.

"Brother Luo Feng, you've just become a lord, right?" Wulan said, "I've been searching for so long in the Infinite Primordial Space, and I haven't found a suitable Mysterious Land for myself."

Ming Huang, Nai Gu, and the others all had complex feelings.

Even as lords, they also desire to control a Mysterious Land. Firstly, to utilize part of the 'Mysterious Land' power to enhance themselves, gaining some strength. Secondly, within the boundaries of the Mysterious Land, their strength will be extremely strong.

"Among us eight lords, only Yuan and Starlight each control a Mysterious Land," Nai Gu sighed. "Luo Feng, you've just broken through to lord, and you've found a Mysterious Land you can refine?"

"I didn't expect myself to be so compatible with the Blood Crane Territory either," Luo Feng laughed.

Starlight laughed beside him, "When I first comprehended the second kind of Primordial Level Dao, I was fortunate to discover the Mysterious Land 'Time Star'. Time Star is the smallest known Mysterious Land, even smaller than the 'Council Hall.'"

"I've been to 'Time Star' once, it's really too small, when I sit there, I occupy one-tenth of the Time Star's area," Jin said, "This Time Star is always drifting through different timelines, drifting to the past, drifting to the future."

"Its ability to go to the past and future is still inferior to mine," Starlight said with a faint smile, "However, it is indestructible! It enhances some of my protective means."

"Mysterious Lands generally integrate several kinds of highest-level powers, and there are always those we are not skilled in," Yuan said, "So once refined, using part of the Mysterious Land's power is always beneficial to oneself."

Luo Feng nodded.

"Luo Feng, how long do you estimate to refine it?" Yuan asked.

"I estimate several epochs," Luo Feng said.

"So fast."

The seven lords were a bit surprised.

They remembered how Luo Feng used the Power Breaking Technique, understanding the Primordial Life and Death Dao in such a short time within the Braided Cage. Now that he has become a lord, refining a Mysterious Land in several epochs was something they could comprehend.

...

In the blink of an eye, three epochs had passed.

Yuan and Lord Mo Man cooperated once again to expel the formidable 'Lotus Prison Mountain Master'!

To the Lotus Prison Mountain Master, the former 'Lotus Prison Cluster' was his home, surrounded by countless Source Worlds, which were the food for his race, but the Cultivator Camp was too dominateing, not allowing him to stay in this area.

Starlight Lord continued to pursue the hidden power of 'Mogus' across all times and spaces.

...

Deep within the Blood Crane Territory.

Luo Feng sat cross-legged in the Endless Blood Sea, with the Blood Lord, Crane Lord, and Shadow Lord frequently coming to observe, yet they were unable to stop Luo Feng's comprehension of the 'Blood Crane Territory Origin.'

"This is the highest-level power, 'Blood Power'?"

Luo Feng initially understood seventy to eighty percent upon first contemplating it, but to completely master this type of highest-level

life force, even with Luo Feng's comprehension and insight, it still took more than three epochs.

"The difference between Blood Power and the Primordial Life and Death Dao is indeed significant." At this moment, Luo Feng fully understood how vast the difference was between highest-level power and the 'Dao' of the highest level.

With 'Blood Power', one can form a physical body, kill enemies, form domains, and restore the power of companions, among other means.

The body formed by Blood Power is of 'Blood Sea appearance', but the Blood Sea is not large, with an energy reserve about sixty percent that of Luo Feng's! Only those who comprehend the 'Primordial Life Dao' and create the most suitable life form according to it can possess the largest life form in the Infinite Primordial Space.

Just one 'Blood Power' falls short in energy reserve compared to Luo Feng.

Its energy reserve is sixty percent of Luo Feng's, its movement speed much slower than Luo Feng's, its life spirituality at eighty percent of Luo Feng's power, its recovery ability at fifty percent, its ability to kill enemies only at thirty percent of Luo Feng's...

You must know, Luo Feng's capability to kill enemies is only at an average level among lords, aside from the 'Great Destruction Technique'. The ability of 'Blood Power' to kill enemies at only thirty percent would be considered quite mediocre among Ancestors.

This type of Blood Power would only weaken Luo Feng.

This is why the Cultivator Lords do not cultivate 'same category' highest-level powers. Because they master the 'Dao' of the same category, a singular type of power is meaningless to them.

And 'other category highest-level powers', the lords cannot comprehend. After all, it's not their strong suit.

"Having comprehended Blood Power, the next step is to refine the Blood Crane Territory Origin," Luo Feng was quite looking forward to it, as this was the only help Blood Power could provide him.

Chapter 430 - 12: Refining the Blood Crane Territory

Chapter 430: Chapter 12: Refining the Blood Crane Territory

The origin of the Mysterious Land 'Blood Crane Territory' is vast beyond compare, its mystery surpassing even the Source World Origin! Luo Feng has only mastered one kind of power, the 'Blood Power', so the refinement process is quite slow.

Using the Blood Power as a guide, follow the clues and delve deeper gradually.

Facing the immeasurably vast origin, it's impossible to rely on luck to go deeper. Only by thoroughly understanding the method of origin combination can one realize how to refine. It's the only way to achieve 'step by step, gradual advancement'.

"Hmm?"

The three Lords of Blood Crane Territory felt a tremor in their hearts.

"He's refining the Blood Crane Territory origin!"

"He has begun refining!"

They all mastered a form of the highest-level power compatible with Blood Crane Territory, and over the endless years, they had tried refining it time and again! Although they hadn't succeeded, they were extremely familiar with the origin, and any trace of change in the Blood Crane Territory origin could not escape them.

"Refining the origin of a Mysterious Land is inherently difficult."

"The combination of three types of highest-level powers into an origin is immensely mysterious and vast. Though we failed to refine it, he certainly will not succeed!" The Blood Lord, Crane Lord, and Shadow Lord sensed the refinement progress, but their hearts were filled with apprehension.

They couldn't accept the result of 'Cultivator Lord Luo Feng refining Blood Crane Territory origin', because after all, this was their homeland! Moreover, 'Blood Crane Territory' was the most compatible Mysterious Land for them.

Looking across the Infinite Primordial Space, trying to find another Mysterious Land that melded completely with their highest level of power? It simply doesn't exist!

The Cultivator Lord, due to possessing the 'Dao', is able to discern the most suitable power through a relatively compatible Mysterious Land! But those Ancestors cannot, so they mostly refine the Mysterious Land of their homeland!

"His refinement progress is still advancing!" The Blood Lord's expression was solemn.

"We encountered obstacles and bottlenecks; how has he not encountered any bottleneck?" The Crane Lord could not believe it.

The Shadow Lord remained silent since it was he who brought Luo Feng here.

Blood Crane Territory...

held an exceedingly special significance for the three of them.

On one hand, it is their birthplace where they can wield part of the Blood Sea Power, making them the strongest. They can face any formidable enemy with confidence. Here, new lineages can continually be born, making the entire clan even larger. Perhaps in the future, a fourth or fifth Ancestor level could emerge.

On the other hand, the Blood Crane Territory is also their greatest

hope for 'undying and undying'.

For the already 'undying and undying' Cultivator Lord, refining a Mysterious Land could enhance their capability a bit, making themselves more comprehensive, which is like 'adding brilliance to perfection'!

But for the Ancestor level, it is a change of fate!

Without reaching 'undying and undying', one remains a pawn! Only with 'undying and undying' can one become an everlasting player in the Infinite Primordial Space!

Now, the greatest hope for their 'undying and undying' is on the brink of vanishing; how can they not be anxious?

"His refinement progress has already far surpassed mine initially." The Blood Lord sensed it.

"Moreover, he has never encountered a bottleneck, and his refining is very smooth," the Crane Lord said, "I've long heard that the comprehension of Cultivator Lords is terrifying, and now I have witnessed it."

Actually, among the eight Lords in the Cultivator Camp, only Luo Feng and Starlight use the Power Breaking Technique! Their comprehension and insight astonish the other six Lords.

Understanding the Primordial Level Dao under the Braided Cage? What kind of comprehension is this?

The compatibility of Blood Crane Territory with Luo Feng, refining over a little over three epochs is very normal.

...

Time flew by, and in the blink of an eye, five days passed. The Blood Lord, Crane Lord, and Shadow Lord constantly monitored the refining progress.

During these five days, Luo Feng continued refining without meeting any bottlenecks.

"His refining progress has already exceeded eighty percent." The Blood Lord gazed expressionlessly at his two companions, "Though unwilling to admit it, the fact is clear... Our homeland 'Blood Crane Territory' is about to be refined by him!"

"It's my fault, my fault!!!" The Shadow Lord's massive shadow twisted and roared with great reluctance.

Previously, only Yuan and Starlight in the Cultivator Camp had refined a Mysterious Land, so it was evident that even for a Cultivator Lord, refining a Mysterious Land is exceptionally challenging. The Shadow Lord couldn't foresee that Luo Feng might refine the Blood Crane Territory!

The Blood Lord and Crane Lord cast a cold glance at the Shadow Lord.

The greatest hope for 'undying and undying' has been cut off! The hope for a flourishing clan has been extinguished! The homeland and stronghold are gone! How could they possibly forgive this companion?

It's important to know that the invasion of the Cultivator Territory was the Shadow Lord's sole decision! They had once advised against provoking the three major camps, but the Shadow Lord simply wouldn't listen.

This incident has already driven a wedge between the three Lords!

"We must leave." The Blood Lord stated, "Once Luo Feng completely refines the Blood Crane Territory, within it, his power will be unmatched! He will be able to harness the entire Blood Crane Territory's power... then we, the three of us, won't be able to leave even if we want."

The power of the entire Blood Crane Territory is stronger than even Luo Feng himself!

"Where should we go?" The Shadow Lord asked.

"No matter where, we must first migrate out of the range of Blood Crane Territory." The Blood Lord spoke, "We'll move the clan

together!"

"Hmm." The Crane Lord responded.

Migrating from their homeland, who would wish it, who could accept it?

But that is the reality, and there is no choice!

The three Lords of Blood Crane Territory immediately took action, using the Shadow Lord's transportation ability to meet with those World-level Primordials.

"Blood Crane Territory is about to be refined by Cultivator Luo Feng; this is a calamity for our Blood Crane Territory clan, leaving us no choice but to migrate."

"Staying in Blood Crane Territory would mean being enslaved by Luo Feng, becoming servants of the Cultivator Camp."

"Do you wish to stay here or leave with us?"

The three Lords of Blood Crane Territory communicated to those World-level Primordials. Though this news bewildered the World-level Primordials, the Blood Crane Territory clan's World-level Primordials swiftly made their choice.

"We are willing to leave!"

"We are willing to follow the three Lords!"

These World-level Primordials knew well that going to the Cultivator Camp meant becoming servants! The most trusted within the Cultivator Camp are always 'Cultivator World-level Primordials', and these Innate Primordials would never rise in status.

The Blood Lord, Crane Lord, and Shadow Lord gathered their World-level Primordials under command, and along the way, took many High-level Primordial Life Forms as well.

"What? The Blood Crane Territory is about to be refined by that Cultivator Lord? The entire clan is to migrate?"

"Why didn’t they take me?"

"Where are the three Lords? Why won’t they take us?"

The vast Endless Blood Sea, with too many High-Level Primordial Life forms scattered across it, meant the three Lords only took the ’World-Level Primordial’ along their way, while picking up most High-Level Primordial Life forms as a side task, unwilling to waste any more time.

High-Level Primordial Life forms are utterly inconspicuous in the entire Infinite Primordial Space.

"Three Lords, take us with you."

"We want to leave too."

The many forgotten High-Level Primordial Life forms were extremely anxious. Their desperation was futile, for in the eyes of the three Lords of Blood Crane Territory, these High-Level Primordial Life forms were but a number.

"Rumble～～～"

As Luo Feng continued his refining, the tumultuous ocean of Blood Crane Territory grew increasingly agitated.

"We must leave quickly."

Three enormous figures swiftly flew out of the Blood Crane Territory range, daring not to linger, as Luo Feng’s refining had already surpassed ninety percent, accelerating as it progressed.

"Luo Feng’s refining speed has increased."

The Blood Lord, Crane Lord, and Shadow Lord looked toward the surging Endless Blood Sea, which was the homeland that had nurtured them! Unfortunately, this Mysterious Land would soon be refined, soon welcoming its new master.

"Brother, where do we go now? Should we seek a territory to occupy or join the Innate Primordial Camp?" Crane Lord inquired.

The Innate Primordial Camp had always been actively recruiting various forces.

In the Innate Primordial Camp's view... as long as one is born a Primordial Life, they should be part of them!

"Joining any force requires careful consideration. Let's first temporarily reside in the 'Black River World Group,' where the resources are barely sufficient," Blood Lord suggested.

Crane Lord agreed, and Shadow Lord dared not speak further.

After causing a great disaster, Shadow Lord's character had changed significantly!

The three Lords immediately set off, heading toward the distant, secluded 'Black River World Group,' a region even further from the Cultivator Territory.

******

As the three Lords of Blood Crane Territory migrated with their entire clan, the Blood Sea of the Mysterious Land 'Blood Crane Territory' surged violently. The remaining High-Level Primordial Life forms trembled in fear, afraid of being obliterated by the waves.

"Blood Crane Territory is going to be refined."

"It's the Cultivator Lord 'Luo Feng'!"

In the Infinite Primordial Space, many ancient beings with powerful observation methods remotely observed the Endless Blood Sea and the black-clad, black-haired man sitting cross-legged deep within it.

"Among the eight Lords of the Cultivator Camp, this newly breakthrough Lord 'Luo Feng' can refine a Mysterious Land so quickly?"

"The power of Blood Crane Territory includes 'Blood Power, Undying Power, Shadow Power,' all protective methods. This Lord Luo Feng already had a strong protective ability, and by refining this Mysterious Land, receiving part of its power, his protective capability

should enhance further!"

"Fortunately, his specialty is just protective power."

Some ancient beings were quite relieved.

No matter how strong the protection, it's just a survival ability! The Cultivator Lords were already 'Undying and Undying,' a bit more survival power is acceptable to other ancient beings. At least for now, Lord Luo Feng's deterrence doesn't seem too strong.

"Buzz——"

The once turbulent Endless Blood Sea suddenly returned to calm.

At the center of the calm, vast blood sea, Luo Feng sat cross-legged on the surface, with a blood-colored robe naturally forming on his body.

"Calm now?"

"Blood Crane Territory has calmed down?" In the Endless Blood Sea, those forgotten High-Level Primordial Life forms wanted to try flying outward, but their strength was too weak and their flight too slow.

Previously, during raids in the Cultivator Territory, it was also the Lords who led them.

A calm, unwavering blood sea! Yet it seemed solidified, those High-Level Primordial Life forms couldn't even fly, nor budge the Blood Wave an inch.

Luo Feng slowly opened his eyes.

"Is this the Blood Crane Territory Origin?" Luo Feng had fully refined it, and the Primordial Life and Death Dao was a part of his life, just as Blood Crane Territory Origin was too.

World Origin power can only be used within the Source World.

But the origin power of the Mysterious Land can be borrowed from even the most distant places.

"Within Blood Crane Territory's range, I can at least match the joint force of three or four Lords." Luo Feng sensed slightly, and the energy reserve of the Mysterious Land 'Endless Blood Sea' alone surpassed any life form.

No life can compare with the energy reserves of the Mysterious Land.

Like the 'Land of Origin,' it effortlessly supplies the Cultivator Camp, including the eight Lords, with energy! The 'Blood Crane Territory' can easily supply the Blood Crane Territory clan!

"Swoosh."

With a single thought, Luo Feng moved over 7.5 billion remaining High-Level Primordial Life forms within Blood Crane Territory to his side.

Dense with High-Level Primordial Life forms, they were all from the Blood Crane Territory clan. At this moment, looking at the towering, majestic Cultivator Lord in the distance clad in a blood-colored robe, they instinctively bowed down.

"Hail to the great Lord Luo Feng." These High-Level Primordial Life forms were extremely respectful.

For those weak High-Level Primordial beings, whether it be Ancestor or Cultivator Lord, they were great beings that couldn't be resisted.

"Are you willing to submit to me?" Luo Feng's booming voice resonated in the heart of every High-Level Primordial Life form.

"We are willing!"

The forgotten 7.5 billion plus High-Level Primordial Life forms of the Blood Crane Territory clan were all respectful, with not a single one resisting.

The Innate Primordial Life forms once captured by the Cultivator Camp still carried some pride! They thought the Innate Primordial Camp could win and save them. But the Blood Crane Territory clan had no pride before Luo Feng, as even 'Blood Crane Territory' had been refined and controlled, and their three Ancestors had already

fled in disgrace.

"Good." Luo Feng looked down, nodding gently.

At this moment, he had gained over 7.5 billion High-Level Primordial Life form servants under his command.

Chapter 431 - 13: Galaxy Capital City

Chapter 431: Chapter 13: Galaxy Capital City

The high-level primordial beings of the Blood Crane Territory, all prostrated, suddenly felt a power infiltrate their bodies, merging into the surface of their life cores, forming mysterious secret patterns. They could sense... these 'secret patterns' were countless times more mysterious than their own bloodlines; once activated, their life cores would be obliterated.

"The life core has been refined." The high-level primordial beings of the Blood Crane Territory understood.

Among them, many avatars had followed the Shadow Lord to the Cultivator Territory.

During their years in the Cultivator Territory, they had long heard that in the Cultivator Camp, all captured high-level primordials and world-level primordials would have their life cores refined, never able to rebel or betray.

They also knew that only by having their life cores refined could the Cultivator Camp dare to heavily utilize them.

"We survived!" The Blood Crane Territory beings breathed a sigh of relief, fearing most that this Cultivator Lord would look down on them and directly annihilate them.

"From now on, I will steer the entire Blood Crane Territory to the

Cultivator Territory." Luo Feng's voice was mighty and resonant, echoing throughout the Blood Crane Territory.

"We're going to the Cultivator Territory?"

The Blood Crane Territory beings understood that their entire homeland was about to be migrated.

Rumble——

The vast and mighty Blood Crane Territory began to fly slowly.

Then, Shadow Power spread in all directions, allowing the entire 'Blood Crane Territory' to make short-distance space-time traversals!

"Too slow."

Steering the Blood Crane Territory, Luo Feng gently shook his head, "The Blood Crane Territory is overly massive, and even though it contains 'Shadow Power,' skilled at traveling, its ultimate migration speed is still much slower than world-level primordials."

The Blood Crane Territory's short-distance space-time traversal covered only small distances each time; even after a hundred traversals, it couldn't match Luo Feng's single step.

"At this speed, reaching the Cultivator Territory and the 'Dark World Group' is estimated to take about ten eras." Luo Feng calculated and felt a bit speechless.

As a Cultivator Lord, even not being skilled at traveling, it only took him over a hundred days to arrive from the Cultivator Territory. Who would have thought that migrating the entire 'Blood Crane Territory' would take ten eras.

"It's already considered good luck; some mysterious lands cannot be migrated at all." Luo Feng knew this point.

Mysterious lands each have their peculiarities.

Some are very adept at moving, like Starlight's 'Time Star,' which can go wherever it pleases, often drifting across different timelines.

Some cannot move at all, like the ’Land of Eternity’ and ’Abyss of Destruction’ and other special places.

Places like the ’Land of Origin’ and ’Blood Crane Territory’ are relatively normal mysterious lands that can move, though their speed is very slow.

"Whew."

Luo Feng left an avatar to steer the Blood Crane Territory, while his main battle avatar instantly departed.

The Cultivator Territory still had many affairs, plus the Blood Crane Territory possessed almost limitless energy, with a single thought it could gather into his main battle avatar. Moreover, Luo Feng believed few would be foolish enough to come to the ’Blood Crane Territory’ to deal with him.

In the outside world, in terms of protective ability, he was weaker than some existences like Lord Wulan.

But in the Blood Crane Territory?

Even with a hundred ancestral beings gathered, Luo Feng was not afraid!

Just the energy contained in the ’Blood Crane Territory’ allowed Luo Feng to repeatedly unleash ’Origin Great Destruction.’

...

Luo Feng’s main battle avatar wore a blood-colored robe.

"Huff——" Luo Feng was rapidly traveling, and although he was getting further from the Blood Crane Territory, since it had been refined, the Blood Crane Territory Origin was part of his life, constantly allowing the ’Blood Crane Territorial Origin’ to empower him.

This empowering force was the fusion of ’Blood Power, Undying Power, Shadow Power’ into the Blood Sea Power.

The fusion of these three highest-level powers, even when calling upon only a portion, Luo Feng already found it immensely beneficial.

"Impressive!"

Luo Feng, donned in a blood-colored robe, harnessed the Blood Sea Power, able to remotely sense shadow across vast areas with a single thought.

Wherever there were tangible matters, there was a corresponding 'shadow'!

Shadow Power, omnipresent!

Although Luo Feng was merely borrowing it, the distance of shadow traversal was relatively limited, but it was already much faster than before, making him seem like a phantom, repeatedly traversing distant space-time.

"Is my travel speed now approaching the median among the Cultivator Lords?" Luo Feng pondered, "It is thrice the speed it used to be."

Previously, Luo Feng's travel speed was just a bit faster than Wulan.

Now he could surpass both 'Wulan and Nai Gu,' and was getting close to 'Jin,' likely achieving fifty to sixty percent of 'Yuan.'

As for Starlight, Mo Man, and Ming Huang, their speed was much faster than Luo Feng's at this moment! In the vast infinite primordial space, their speeds are ranked at the forefront.

"In terms of speed, I am close to the median level among the Cultivator Lords. Compared to those ancestors, I am considered upper-level." Luo Feng was quite satisfied with his current speed.

The larger the body, the greater the obstacles when traversing space-time. Given his physique, this speed was already remarkable, thanks to the unique power of the Blood Crane Territory.

"My protective ability has also improved significantly."

Luo Feng could sense that the Blood Sea Power significantly enhanced his protective abilities. After all, its encompassed three types of power, all focused on protection.

As for the aspect of life, Luo Feng was indifferent. Ultimately, it could not rival his 'Primordial Life and Death Dao.'

However, the Undying Power allowed his physical body to possess some immortal characteristics, greatly increasing its resilience! The Shadow Power gave Luo Feng's body a partial 'shadow' trait, causing many of the enemy's powers to pass through as if through 'shadows,' with only a fraction of three to five out of ten actually affecting Luo Feng.

Previously, Luo Feng could withstand the joint attack of thirty-four ancestors, and now he felt he could withstand the assault from sixty to seventy of them without much issue.

Of course, compared to Wulan, who could easily withstand any attack from the ancestors, there was still a gap.

"The direction I'm good at, I'm becoming better," Luo Feng smiled, "but the means to defeat opponents hasn't advanced much."

...

In just thirty-nine days, Luo Feng's main battle avatar returned to the Dark World Group.

Land of Origin Origin World.

"Finally, it's peaceful." Everything Luo Feng needed to do in his territory was completed. As for the reconstruction of the fallen territory, that was the task of the World-level Primordial, High-level Primordial, and numerous servants under his command.

"Of the Three Thousand Six Hundred World Groups, only a hundred or so occupied by the 'Ice Peak Alliance' have yet to be recovered."

"The strength of the Ice Peak Alliance is comparable to the Innate Primordial Camp, and with the presence of twelve 'Undying and Undying,' they are somewhat more troublesome than the Innate

Primordial Camp," Luo Feng slightly frowned.

Ice Peak Alliance is a relatively loose alliance, but the 'Land of Eternity' has only twenty-eight seats, and Ice Peak Alliance holds twelve of them.

The ancestors of the Innate Primordial Camp fear death, but the Ice Peak Alliance does not!

"It's best to resolve this through negotiations," Luo Feng thought.

Having just ended a war, the Cultivator Camp was unwilling to easily go to war with Ice Peak Alliance! The cost of war would be significant.

Negotiations were handled by Yuan.

"Land of Origin is built quite well," Luo Feng glanced at his homeland, which had undergone tremendous changes in just over three epochs.

The entire continent was a hundred times more vast than before and had only one absolutely unified nation—the Galaxy Divine Country.

The fame of Galaxy Divine Country spread throughout the Land of Origin, even influencing ten thousand Primordial Universes!

In the past...

The Primordial Cosmos Region could not discuss much information about the 'Land of Origin.' But after Luo Feng refined the Source World, he reset the rules! All ten thousand Primordial Universes could reach 'true god of void space' and thereby pass through the Samsara Channel to arrive at the Land of Origin, which was the only passageway.

The core of the Galaxy Divine Country was 'Galaxy Capital City,' a massive urban center formed from merging 'Huyang City' and 'Galaxy Capital' and then enormously expanded.

Galaxy Capital City was comparable in scale to a Primal Chaos Prefecture.

Various factions wanted to establish roots here, wishing to be closer to the great Lord Luo Feng!

The entire Galaxy Divine Country was governed by three factions jointly! At the top were the 'Nine Great Governors,' namely Xu Xin, Luo Ping, Ximo, Primordial Ancestor, Primal Chaos City Lord, Giant Axe, Morosa, Mountain sitting guest, Emperor Chu.

Actually, the position of 'Ximo' originally belonged to Luo Hai. But Luo Hai himself was unwilling to take it on, thinking the affairs were too numerous! Ximo was one of the lives created by Luo Feng amongst many tribes and had significant influence in Luo Feng's faction. Luo Hai declined the role, so Ximo took over.

There was also controversy regarding the 'Giant Axe' position! Hong, as Luo Feng's elder brother, held a high status in the Primordial Universe Human Clan over long ages. Zhenyan was Luo Feng's teacher. Hong and Zhenyan both had strong competitive power, but... Hong was a disciple of the Giant Axe, supporting him in taking the 'Highest Governor' role. Zhenyan also admired and respected Giant Axe and strongly supported him.

Giant Axe had great influence in the higher echelons of the Primordial Universe Human Clan, and he eventually became one of the nine highest governors.

Even if the nine governors had weaker strength, they possessed the 'Governor Order' personally refined by Luo Feng, which contained power to protect their physical bodies and souls, granting them Divine Emperor Ultimate Realm's strength. In the environment with power restrictions in the Land of Origin, they could handle any danger.

Beneath the nine governors were seventy-two vice governors, a total of eighty-one individuals personally reviewed and confirmed by Lord Luo Feng!

Below that... Luo Feng didn't intervene.

Galaxy Capital City held the cave mansions of the many Godly Kings and Divine Emperors, as well as the larger cave mansions of the vice

governors and governors. At the city's center was the lord 'Luo Feng's' cave mansion.

"At last, there's time to perfect this inheritance."

After returning from Blood Crane Territory half an era ago, Luo Feng created a complete inheritance, "Primordial Life and Death Dao," which included numerous Chapters like "Spiritual Fire," "Immortal Body," "Primordial Force," "Life Origin," among others. It was a legacy extending from the most basic Divine King Stage to the lord level.

The other seven lords left their legacies in the 'Land of Origin.' Other lords could freely access them.

Inheritances can be read to acquire knowledge, but cannot be truly learned!

Just as Luo Feng pursued the 'Primordial Blade Path' focusing on destruction, Jin's 'Primordial Destruction Path' also emphasized destruction, but their spiritual wills were entirely different, and the paths they followed were completely distinct.

In many aspects, they even were incompatible.

When they first became lords, Jin was fervently enthusiastic towards Luo Feng, but later felt Luo Feng's hostility towards 'Tribulation Cultivators,' causing Jin to be less enthusiastic towards Luo Feng and never mention the matter of jointly venturing to the Abyss of Destruction.

"Luo Feng, I saw the inheritance you placed in the Land of Origin," Yuan transmitted with a smile, "Once the territory is completely subdued, I'll definitely study your inheritance thoroughly."

"I've been busy refining Blood Crane Territory, and only recently have I perfected the inheritance," Luo Feng transmitted back, "By the way, brother Yuan, did you visit the Ice Peak Alliance?"

"I'm currently on the way to the Ice Peak Alliance," Yuan transmitted.

Luo Feng understood.

Hopefully, the negotiations will go smoothly, and the Cultivator Territory may be peacefully reclaimed.

Chapter 432 - 14: Negotiation

Chapter 432: Chapter 14: Negotiation

Yuan arrived at the fallen territories, observing the surroundings, his expression turned cold.

Throughout his long life, he had always dedicated himself to the Cultivator Camp! Among the lords, Yuan contributed the most in nurturing young cultivators. Now, seeing over a hundred world groups plundered and many Source World Origins devoured, how could he be in a good mood?

"The Ice Peak Camp and the Innate Primordial Camp are essentially the same; they both are innate primordial needing to plunder numerous resources, and many like to devour 'Source World Origins'." Yuan thought.

At the highest level of the Ice Peak Camp, there are twelve undying and undying beings, who occasionally also like to taste the Source World Origin.

Besides these twelve, the Ice Peak Camp has some Ancestors joining too! These Ancestors have not reached the 'undying and undying', so they enjoy devouring the Source World Origin even more.

"The Innate Primordial Camp is the greatest enemy, the conflict with the Ice Peak Camp is also very significant." Yuan understood this.

As Creatures emerging from the Source World, there is an irreconcilable conflict with any life group that likes to devour 'Source World Origins'.

"Only by becoming strong enough."

"Can all forces be deterred from devouring the Source World." Yuan thought, "Now, the eighth lord 'Luo Feng' has emerged, a lord mastering the Power Breaking Technique! In the future, a ninth lord will emerge! Our Cultivator Camp will grow even stronger!"

Suppressing his fury, Yuan followed his senses straight to an Ancestor Level being within this fallen territory.

Whoosh!

Wherever Yuan passed, rules operated, allowing him to cross infinite distances with each step, reaching a location in just a moment.

"Yuan, you are here."

A warm voice sounded, welcoming a towering black figure enthusiastically.

Yuan looked at the figure, a towering black figure clad in black scale armor, with a single eye burning with blood-red flame, looking quite fierce. But his smile was very bright.

"Wugu Ancestor." Yuan looked at him.

The Wugu Ancestor, one of the twelve undying and undying beings of the Ice Peak Camp, ranked in the top five in strength.

If placed in the entire Infinite Primordial Space, the Wugu Ancestor is also among the top thirty, comparable to the Lotus Prison Mountain Master.

"I am here to discuss your occupation of over a hundred world groups." Yuan said coldly, "Our Cultivator Camp and your Ice Peak Camp are considered allies! Yet you occupy our territories? Is this what allies do?"

"Don't be anxious, don't be anxious, knowing you were coming, the Ice Peak Ancestor has already convened the highest level, and later the Ice Peak Ancestor and others will incarnate to arrive." Wugu Ancestor said.

The Ice Peak Ancestor is also the highest leader of the Ice Peak Camp,

he led the establishment of this alliance.

...

Within a huge towering palace.

Accompanied by the Wugu Ancestor, Yuan also sat there waiting.

In just a moment——

Eleven figures all descended, indeed the incarnations of the other eleven undying and undying beings of the Ice Peak Camp! All twelve gathering clearly shows their regard towards the Cultivator Camp.

"Brother Yuan!" a warm voice sounded, from a presence towering like an ice mountain, his whole body composed of deep blue ice, even just an incarnation could glimpse the terrifying power he possessed.

The Ice Peak Ancestor is a presence with strength comparable to Yuan.

He possesses a nearly 'Wulan' indestructible body, with mastery over endless icy power! His methods to threaten enemies are stronger than Wulan's.

"Ice Peak." Yuan nodded, the Ice Peak Ancestor has lived far longer than Yuan, they once experienced a period of life-and-death friendships, when the Cultivator Camp had only Yuan as the sole lord.

At that time, the Ice Peak Ancestor established the Ice Peak Camp and warmly recruited 'Yuan', who did not join, yet it did not harm their friendship.

However, with the continuous strength increase of the Cultivator Camp, the relationship between the two has changed.

"Brother Yuan."

"Yuan."

The twelve beings of the Ice Peak Camp were very familiar with

Yuan.

Yuan greeted them one by one, then looked at a gray-robed woman.

"Elder Sister Sha Zhou." Yuan's eyes had a complex expression, "It's been a long time."

The gray-robed woman glanced at Yuan, nodding slightly.

In a long past era, the universally recognized strongest being in the entire Infinite Primordial Space was this 'Sha Zhou', who was solitary and withdrawn! Her friends were few, countable on fingers.

Her best friend was the Ice Peak Ancestor! Her second best friend could be considered 'Yuan'.

When the Ice Peak Camp was founded, the Ice Peak Ancestor warmly invited, and Sha Zhou joined! This made the entire Ice Peak Camp terrifyingly influential.

Later...

The Starlight Lord emerged!

The Starlight Lord, who mastered two Primordial Level Paths, was considered by many forces to be the strongest existing now! Some still believed 'Sha Zhou' to be the strongest. However, one thing was certain, if the top two were selected in the Infinite Primordial Space, it would definitely be Starlight and Sha Zhou.

During the confrontation between the two major camps, the Starlight Lord and the Infinite Snake Ancestor's void techniques countered each other, with both only able to exert a portion of their strength.

The Infinite Snake Ancestor, skilled in void power, also had the backing of the Infinite World! His void capability far surpassed the Mother of Space-Time. In one-on-one combat, he was not inferior to the Ice Peak Ancestor, Mogus, and others, but was completely suppressed by the Starlight Lord.

"Elder Sister Sha Zhou, our Cultivator Camp and the Ice Peak Camp have always been allies, yet the Ice Peak Camp took advantage of our

war with the Innate Primordial Camp to invade over a hundred world groups. Elder Sister Sha Zhou, how do you think this should be handled?" Yuan looked at Sha Zhou.

"This minor matter, discuss it with Ice Peak." Sha Zhou said, clearly indifferent to the disputes over these hundreds of world groups.

"Elder!"

Ice Peak Ancestor firmly grasped Yuan's hand, sitting together, "You know Sister Sha Zhou's temperament. She wouldn't bother with these matters. Our Ice Peak Camp and your Cultivator Camp are indeed allies, but you know, our Ice Peak Camp is scattered internally, and it's difficult for me to completely manage them. When I learned they occupied hundreds of world groups, I immediately ordered a stop."

"But wanting them to give up the occupied world groups... It's difficult for me." Ice Peak Ancestor looked at Yuan.

Yuan also knew that the Ice Peak Camp was quite loose, with the twelve Undying and Undying entities each having their own interests. Perhaps only Sha Zhou didn't care about these resources, as Sha Zhou cared most about this close friend, Ice Peak Ancestor.

Yuan was well aware of the friendship between Sha Zhou and Ice Peak. For Ice Peak, Sha Zhou would stop at nothing.

"Three Thousand Six Hundred World Groups! We cannot lose a single region in our Cultivator Territory." Yuan looked around, "Everyone knows, we've reclaimed all other invaded territories. It's only the hundred-plus world groups you've occupied remaining. Our Cultivator Lords will use the 'Space-Time Net' to hunt down all enemies within the territory."

"You dare!" Three identical-looking figures stood up, all glaring at Yuan.

"You dare to take action against us?"

"Your Cultivator Camp is expanding, is it wrong for us to occupy these hundred-plus?"

These three identical-looking figures kept shouting angrily. After joining the Ice Peak Camp, they loved attacking and occupying places the most! Nearly half of these hundred-plus world groups were occupied by them.

Other Undying and Undying entities also opened their mouths to angrily reprimand, while some calmly watched.

"The Three Thieves of Wind and Thunder Sea!" Yuan looked at the three identical figures, sneering, "Without the power of the Ice Peak Camp, would you three thieves dare to occupy? In front of the Cultivator Camp, what are you?"

The Three Emperors of Wind and Thunder Sea, weak in strength, ranked among the lower tier among Ancestors! Yet due to mastering the characteristic of highest power, they were all Undying and Undying.

The three relied on 'Undying and Undying', relying on the power of the Ice Peak Camp, yet they loved causing trouble the most.

In the Land of Eternity, all three were among the bottom ranks, so they banded together!

"Yuan!" The Three Emperors of Wind and Thunder Sea became furious hearing Yuan call them 'three thieves'.

"Don't forget, one Mo Man wiped out all three of you." Yuan sneered, indeed belittling these three thieves. Clearly weak in strength, yet always bouncing around!

Lord Mo Man once, in anger, struck, forcibly obliterating their bodies and seizing their weapons and treasures. But these three... No matter how much they were obliterated, they would still regain power.

"Hmph." The Three Emperors of Wind and Thunder Sea were infuriated, but they also knew Mo Man restrained the three the most, Starlight and Jin also possessed the strength to obliterate three bodies.

"Yuan, it's only a hundred-plus world groups, why harm the friendship between us?" Wugu Ancestor spoke with a smile.

"It’s you hurting the friendship! One word - you must return them!" Yuan said, looking around.

Among the highest level of the Ice Peak Camp, twelve Undying and Undying entities, each had their thoughts. Among them, besides the ’Three Thieves of Wind and Thunder Sea’ who were quite weak, there were also those with extremely formidable strength.

"How about this."

Ice Peak Ancestor finally spoke, "Yuan, both of our sides are allies. Our greatest enemy is the ’Innate Primordial Camp’. "

The Ice Peak Camp and Innate Primordial Camp needed almost the same resources.

"You know the Ice Peak Camp is quite dispersed, many matters are difficult for me to forcefully control." Ice Peak Ancestor sighed, "Let’s be considerate of each other, so Ice Peak Camp will return more than half of the world groups! Retain sixty world groups, and I can appease internally."

Around, a group of Undying and Undying entities also looked at Yuan.

Yuan listened, then stood up.

"Not a single world group can be missing from our Cultivator Territory." Yuan’s gaze swept over the twelve Undying and Undying entities, "If you insist on occupation, then... Our Cultivator Camp will officially go to war with you!"

The faces of the twelve Undying and Undying entities from the Ice Peak Camp all changed.

War?

"Elder, you better think carefully." Ice Peak Ancestor looked at him.

"Call me Yuan!"

Yuan looked at him, "Those occupying Cultivator Territory aren’t

qualified to be my brother!"

Ice Peak Ancestor's face turned cold as well, "Yuan, I've already conceded a step, your Cultivator Camp wants war, we who are Undying and Undying will not fear?"

"Very well." Yuan nodded lightly, "But I warn you, once war begins, the battlefield won't be confined to this fallen territory! All territories of your Ice Peak Camp will become targets of our Cultivator Camp. Dare to invade here, you must be prepared to be invaded back."

"What?" Some Undying and Undying entities were startled.

Counter-invasion?

"We in the Ice Peak Camp would fear the battlefield expanding?" Ice Peak Ancestor sneered, these Undying and Undying entities don't much care about middle and lower-tier death.

"Then wait for it." Yuan swept his gaze and disappeared with a step.

The hall fell silent.

The twelve Undying and Undying entities each had their thoughts.

Are we really going to war?

Ice Peak Ancestor glanced around in anger.

"So this is your decision!" Ice Peak Ancestor said deeply, "You all insist on occupying the sixty world groups with the most vital resources! The result is out, Yuan and their eight lords are going to war with us."

Chapter 433 - 15: The Eight Lords

Chapter 433: Chapter 15: The Eight Lords

Cultivator Territory, Mingyu World Groups, this is the absolute territory of the Cultivator Lord 'Ming Huang'! The order of the entire world group operates according to the will of 'Ming Huang'.

Here, there is no soil for sin to survive.

The core Holy Land of the Mingyu World Groups 'Ming Huang Holy Land', gathers cultivators from all corners of the world group. To come to 'Ming Huang Holy Land', two conditions must be met: one is strength, the other is merit! Both are factors of consideration.

For those weak in merit, strength needs to be extremely strong!

With extremely high merit, even low strength can bring one to the Holy Land, to be close to the great Lord!

If 'burdened with sin', no matter how strong, one will be punished, and has no qualification to receive the Lord's teachings.

"Buzz—"

Endless light of thunder illuminates the entire Ming Huang Holy Land.

Ming Huang Holy Land's cultivators are peaceful, in the place where the Lord resides, no trace of sin can exist.

"Cultivator 'Fu Tianyi', a Half Primordial Enlightened. In pursuit of

escaping the Braided Cage, he cultivated using billions of souls as nourishment. In the past three hundred twenty million eras, he has cumulatively devoured creatures exceeding one trillion in number. The sin is heavy, I suggest the death penalty."

"The death penalty requires reporting, to be executed by World-Level Primordial personally. I think the death penalty is unnecessary, we can sentence him to 'endless wind punishment', which serves both as deterrent and contribution to the Cultivator Camp in the Wind Punishment Land."

Wind Punishment Land, a mine within the Endless Primordial Space, where life in the Braided Cage originally cannot survive! However, with formation, prevents the erosion of endless Primordial Force.

There, even without erosion of endless Primordial Force, the natural 'wind' within the mine will repeatedly make the Half Primordial Enlightened suffer as if being flayed, while continually mining. The sentence is eternal!

Unless 'escaping the Braided Cage', there is hope for a change in fate.

For those Half Primordial Enlightened, they would rather endure endless punishment, seeking the chance to escape the Braided Cage.

"Such sin, he doesn't deserve to live, I suggest the death penalty."

"I also suggest the death penalty! Great sin warrants execution! Cannot give him a shred of vitality!"

"Fu Tianyi is quite gifted, 'endless wind punishment' is enough deterrent. Without escaping the Braided Cage, never to rise again."

One by one, suggestions were made.

"Among our nine, three suggest 'endless wind punishment', six suggest 'death penalty', final decision—death penalty! Report immediately!"

In Luo Feng's absolute territory, the matters were handled by 'Cheng', who commanded numerous high-level Primordial Life.

In Ming Huang's absolute territory, however, a World-Level Primordial was responsible for commanding and handling various matters.

"Fu Tianyi, death penalty?"

A majestic figure learned the news, glanced at the weapon brought forth, the weapon once used by Fu Tianyi.

If he were the Lord, a thought leveraging causality could descend as memory pollution. Even if there is Source World Origin blocking, the information transmitted by the Lord could lead a small being in the Braided Cage to have their soul self-collapse and become annihilated.

World-Level Primordial needs to rely on objects to descend causality attacks.

If the 'pollution' of High-Level Primordial Life, the Half Primordial Enlightened within the Braided Cage might still endure. Pollution descended by World-Level Primordial Life... even if it's merely memory pollution, unless the Half Primordial Enlightened's will escapes the Braided Cage, they can't survive.

"Buzz!"

The majestic figure, looking at Fu Tianyi's weapon, leveraging the causality of the weapon, saw Fu Tianyi hiding in the Source World.

With a glance, memory pollution transmitted.

"Ah—" Fu Tianyi, already anxious and uneasy, painfully clutched his head, in a few moments his soul twisted and collapsed, completely annihilated.

In Ming Huang Holy Land.

Beside a vast lake, there is a wooden hut where Ming Huang resides alone.

She has set the rules, her followers will act accordingly! Within her 'absolute territory' depending on the severity of sin, various levels of punishment exist! However, for a World-Level Primordial to directly

execute, it is rare.

After all, there are laws in place, and those daring to breach them are few.

"My Primordial Thunder Path, eight parts thunder, two parts water path."

"Star can comprehend the second Primordial Level Path, why can't I?"

To become a Lord, one has to be extremely proud.

"I'm entirely possible to create the 'Primordial Water Path', focusing on water."

"Though extremely difficult, progress exceedingly slow! Yet as long as progress continues slowly... there's hope!" As long as not encountering a bottleneck, Ming Huang won't give up.

Aside from Starlight, other Lords are attempting ways to strengthen.

Like Yuan, Nai Gu, all can see hope.

Like Wulan, Ming Huang, Jin, Mo Man are all trying to create a second Primordial Level Path, but their progress is painfully slow because the first Primordial Level Path aligns closely with their nature, the second Primordial Level Path is less aligned, making comprehension harder.

Luo Feng's nature places more emphasis on life! Primordial Life and Death Dao, focusing on life, cultivation proceeds smoothly. Even succeeded with Power Breaking Technique.

Yet Primordial Blade Path focuses on destruction! Though Luo Feng has deep research into destruction, the degree of alignment clearly diminishes. Even with the current Lord level insight, comprehension, thinking speed... comprehending complete 'Primordial Blade Path' remains challenging.

Luo Feng, who employs Power Breaking Technique, comprehending the second Primordial Level Path, is merely slow. Like Ming Huang, Jin, their progress is absurdly slow, and always at risk of hitting a

bottleneck.

"Focusing on water."

Ming Huang feels discomfort as she comprehends.

Her strong personality, focusing on the water path, is excessively challenging for her.

"Ming Huang." Yuan's voice sounded, "Negotiations failed, prepare to battle with the Ice Peak Camp."

"Battle?" Ming Huang's eyes burst with golden thunder, compared to comprehending and cultivating, battle was much less difficult.

"It's time!"

Ming Huang's fighting spirit surged.

In her bones, she never fears battle!

...

Jin, currently seated on a throne.

Above his head are twelve silver-white sharp horns like a crown, his sharp fingers gently tapping the armrest, while holding a glass of blood-like fine wine in the other hand, his silver-white scale armor tail slowly swaying on the ground.

He is leisurely, content, watching over his absolute territory.

In his absolute territory, the Myriad Clans compete for supremacy, a life-and-death struggle!

"This is the allure of life!"

"Under the threat of death, life shines with its most brilliant colors!" Jin admires some of the strong among the Myriad Clans' confrontation. "If it were too comfortable, it would only raise a group of useless individuals."

"Ah, Luo Feng also follows the Primordial Life and Death Dao; I

thought he would understand me best."

"Although he acknowledges the survival of the fittest, he is so hostile towards Tribulation Cultivators." Jin gently shook his head, "What about Tribulation Cultivators? They can, with their own abilities, become an eternal tribulation of a Source World! That is also a testament to their own exceptional capabilities."

Jin, on the contrary, appreciates those who, through cycle after cycle, completely suppress the Tribulation cultivators that threaten a Source World. He considers them the most exceptional selected under the 'survival of the fittest'!

Although Lord Mo Man does not hold the Tribulation Cultivators in as high regard, he also acknowledges it as the natural outcome of 'survival of the fittest' and does not oppose it.

"Since the temperaments do not match, then stay away from each other." Jin, inherently proud, as a Lord, an undying being, sees no need to please anyone.

"Jin." Yuan's voice sounded, "The negotiation has failed. Prepare to go to war with the Ice Peak Camp."

"Ha ha, it has come!"

Jin smiled.

This is what he likes the most!

Whoosh!

In an instant, Jin had already vanished.

...

"Is it going to be war? It's here." Wulan, transformed into a massive celestial body, laughed and already traversed time and space. He never feared any battle, nor any opponent.

...

"Is it going to war?" Within the endless Primordial Space, a vast land of flesh suddenly merged into Lord Nai Gu.

Lord Nai Gu was very excited, as long as it was about hunting the Ancestor, he would be very willing.

Every Ancestor's corpse would become his gain.

...

"War?"

Countless fluctuations spread through the endless Primordial Space, even spreading to some naturally Primordial races, sensing the souls of countless creatures, their joy, anger, hatred, all these strands of fluctuations merged into the Primordial Fluctuation, even the Ancestors couldn't detect it.

"Interesting!"

Countless fluctuations were annihilated and dissipated while in the home Source World the fluctuation rapidly strengthened! With the speed of energy absorption by the 'home Source World' Origin, in a few breaths, Lord Mo Man had returned to Pinnacle state.

Under usual circumstances, he was dispersed into innumerable fluctuations, blending into the endless Primordial Space. Only under special circumstances would he concentrate into the main battle Avatar.

"Ice Peak Camp?" Lord Mo Man's eyes showed anticipation.

...

"I have arrived." Starlight Lord had fully observed the entire negotiation process, even predicting the reaction of the Ice Peak Camp earlier than 'Yuan', he had already set out in advance.

...

Origin Continent Origin World.

Luo Feng was in secluded Cultivation, as the youngest Lord, he was comprehending the Primordial Blade Path.

In the early stages of comprehension, being in the 'Accumulation Stage', there were no bottlenecks, and a large amount of insights continually surged to his mind.

"Luo Feng, the negotiation failed, prepare to go to war with the Ice Peak Camp." Yuan's voice sounded.

Luo Feng, in seclusion, opened his eyes.

"It has come."

Clad in a blood-colored robe, Luo Feng instantly left his home Source World across endless distances, directly to meet up with Yuan.

******

The assembly point chosen by Yuan was also meticulously considered, being nearest to the slowest 'Wulan'. Although there were differences in arrival times of the Lords, the difference wasn't large, allowing all to gather together.

"All present." Yuan nodded.

Jin, Wulan, Ming Huang, Nai Gu, Starlight, Mo Man, Luo Feng, each full of fighting spirit.

During the prior Council Hall meeting, the eight Lords had already decided to first eliminate all other weak forces, then negotiate with the Ice Peak Camp. If the negotiation succeeded, so be it; if not...then go to war!

The Three Thousand Six Hundred World Groups, absolutely not allowed to be occupied!

"Starlight, do you think the Ice Peak Camp dares to wage war against us?" Jin asked.

"They are not as united as we are." Starlight smiled, "Facing numerous undying beings, even the Ice Peak Ancestor's control is

limited. Our eight Lords jointly threatening them will cause disarray internally."

"As for whether to go to war?" Starlight looked into the distance, "It's uncertain."

"Let's see how strong they are." Lord Nai Gu said coldly, among the Cultivator Lords, he was considered mediocre, but in facing those Ancestors, he was extremely strong.

"Move out." Yuan ordered.

Whoosh——

The eight Lords set out together, heading straight for the conquered territory.

Usually, the Cultivator Lords are busy with their own affairs, it's rare for even two or three to act together! Eight Lords' main battle Avatars acting together? That's enough to attract attention from all forces across the Infinite Primordial Space.

"The Cultivator Camp, eight Lords acting together!"

"Are they going to war with the Ice Peak Camp?"

Many forces peered from afar, somewhat excited.

Eight Lords!

Individually already extremely intimidating, eight moving together frightened even smaller forces.

Wars among the three major camps are the most intense within the Infinite Primordial Space. In this level of warfare, the likelihood of Ancestors falling is the highest.

Chapter 434 - 16: The Ice Peak Camp’s Decision

Chapter 434: Chapter 16: The Ice Peak Camp’s Decision

"Let the battle begin!"

"It’ll be exciting when they fight!"

"I bet in the first clash, the Cultivator Camp will lose! But in a prolonged fight, the Ice Peak Camp probably won’t hold out."

"Haha, it would be best if the Cultivator Territory of the Three Thousand Six Hundred World Groups turns into ruins!"

"Hmph, if it really turns into ruins, then the eight Lords will have no worries, that would be the most terrifying!"

"That would be interesting!"

In the Land of Eternity, a group of spectators gathered, unfazed by the impending chaos.

Besides the eight Lords of the Cultivator side and the twelve Undying and Undying entities from the Ice Peak Camp, the other nine Undying and Undying entities all had Avatars appearing in the Land of Eternity.

They include the Infinite Snake Ancestor, Inference Fire Ancestor, Initial Ancestor, and the Mother of Space-Time from the Innate Primordial Camp. Moreover, five individuals unaffiliated with any faction.

These five are Mogus, Kafu, Feather Emperor, Demon Ruins, and Hermit.

Among these five, four possess strength high enough to be ranked in the top ten within the Infinite Primordial Space. The Hermit, whose strength is unknown, is the only one in the Infinite Primordial Space whose True Body cannot be found.

These five live freely without joining any faction.

"The more heated the battle, the better." Kafu laughed heartily, clad in white Battle Armor, "Infinite Great Serpent, your Innate Primordial Camp fought the Cultivator Camp for so long and lost quite a few Ancestors, right? If the Ice Peak Camp goes to war in a large scale with the Cultivator Camp, a few Ancestors will probably die too."

The Infinite Snake Ancestor, unimpressed, said, "Through the trials of life and death, there's hope for strength improvement. Those who fell only deserved it for their strength wasn't strong enough."

Unlike the Cultivator Lords who are all Undying and Undying, among over a hundred Ancestors who participated from the Innate Primordial Camp in the past, only a handful were Undying and Undying, while most faced the threat of death.

Under the threat of death, they fought many battles with the Cultivator Camp. Some surviving Ancestors had gained something, requiring time to slowly assimilate these gains.

"There are too many Ancestors!"

Mogus, with a chilling aura, spoke as well, "Those weaker Ancestors should be eliminated! The Ice Peak Camp also has 26 ordinary Ancestors, some of whom should die!"

"Mogus, if I'm sensing correctly, hasn't your power been wiped out over 95%?" Kafu asked.

"Can you battle against Starlight?" Mogus sneered.

"I may not be able to fight him, but he can't do anything to me either." Kafu shook his head, "Unlike you, who only bullies the weak

and is powerless against Starlight."

Mogus snorted coldly.

"Initial," the mysterious cubic Demon Ruins sat beside the absolute spherical Initial Ancestor, both shared deep ties, "I've heard you recently went to the 'Fire Prison Wall'?"

In the Infinite Primordial Space, there are several Mysterious Lands. These lands vary in strength, some particularly powerful offering not even a hint of hope for the Ancestors to refine and control them.

The Fire Prison Wall belongs to such lands.

The Fire Prison Wall is an endless majestic wall stretching across the length of about a hundred World Groups, with a width comparable to a World Group! Among the Mysterious Lands, its vastness ranks in the top three.

Ninety-nine percent of the Ancestors daring to approach the Fire Prison Wall would be turned to ashes.

Wulan once ventured to the Fire Prison Wall and was severely burned, retreating immediately, unable to delve deeper.

The only one capable of traversing the Fire Prison Wall is the Initial Ancestor!

The Initial Ancestor responded, "Yan Huo, Sha Zhou, and several old friends asked for my assistance, and I led them to the Fire Prison Wall." Back in the ancient times when factions hadn't formed yet, Sha Zhou, Initial, and Demon Ruins were all quite familiar with each other.

"Did you find the Origin of the Fire Prison Wall?" Demon Ruins inquired.

"No," Initial answered.

Inference Fire Ancestor nearby also said, "Even though we traversed the entire Fire Prison Wall, we still couldn't sense the 'Origin of the Fire Prison Wall'."

"If none can sense it, then refining it is even beyond reach," Kafu remarked.

"In the Fire Prison Wall, the highest level Flame Power we've discovered has accumulated to twelve kinds," Inference Fire Ancestor expressed with amazement, "There, the icy flames can even freeze Ancestors, while endless scorching flames burn everything. There's Thunder Fire, destroying all, Ash Flame, annihilating everything. Violent Flame..."

The simultaneous cover of multiple flames can only be traversed by Initial.

"If the Fire Prison Wall has an Origin, it at least contains twelve kinds of Highest Level Power. To refine it? One would have to master nearly half of the Highest Level Power," Infinite Snake Ancestor stated, "Across all Creatures in the Infinite Primordial Space, at most two Highest Level Powers are mastered! That's why 'Fire Prison Wall' can't be refined."

"It's indeed impossible," conceded Inference Fire Ancestor.

Any Ancestor who excelled in flames harbors ambitions for the Fire Prison Wall.

Such a terrifying Mysterious Land, once controlled, would certainly upgrade one's strength significantly! Such as Inference Fire Ancestor, currently one of the Nine Emperors, with slightly lesser strength than Infinite Snake Ancestor. But if one were to grasp the Fire Prison Wall, surely, they'd overpower Infinite Snake Ancestor! They might even aspire to claim the strongest position within the Infinite Primordial Space.

Of course, places like the Fire Prison Wall, the Land of Eternity, Abyss of Destruction, are renowned for their strength and show no prospect of refining.

...

Inside the vast and majestic palace.

The Ice Peak Ancestor amongst twelve entities gathered here.

"Look," a grand figure pointed with its massive hand, revealing a scene in the midair of the eight Cultivator Lords on their journey, "It's evident what the eight Lords of the Cultivator side intend—they will directly initiate war if we try to take control of these World Groups!"

This grand figure, with a body like yellow stone, glared furiously at those present, "I, Xiu Saiwei, have not encroached upon a single World Group in the Cultivator Territory, nor taken a share of any resources. Regardless of whether you join this war... I, Xiu Saiwei, will not participate!"

Chapter 435 - 16: The Decision of the Ice Peak Camp (Part 2)

Chapter 435: Chapter 16: The Decision of the Ice Peak Camp (Part 2)

"Xiu Saiwei! We twelve are a whole; once a collective decision is made, you must join the battle!" The three rulers of Fenglei Sea immediately came out to rebuke angrily.

"After all, we are a whole." Wugu Ancestor also spoke, being the only true body here, he had the most at stake.

Xiu Saiwei sneered, "If I don't join the battle, what can you do to me?"

Ice Peak Ancestor watched this scene, feeling a headache as well.

The Ice Peak Camp, twelve undying beings, along with the other 26 ancestors. It seemed imposing! But precisely because the upper echelons were undying... they were very difficult to manage. Even the weakest, the three rulers of Fenglei Sea, were quite troublesome.

"Compared to the eight lords of the Cultivator Camp, they are evenly matched with us twelve. We also have 26 ancestors! Once the war officially starts, we have the absolute advantage. We can crush them like dry weeds and rotten wood, and even occupy a wider territory!"

"Teach the Cultivator Camp a lesson! Let them understand that an alliance with us, Ice Peak Camp, must be led by us!"

"You two fools, when the Cultivator Camp was weak, we were the

leaders! But now they can even fight with the Innate Primordial Camp which comprises hundreds of ancestors, would they still fear us?"

"I haven't invaded the Cultivator Territory, nor sought resources. My thoughts are clear, I definitely won't join the battle!" A small figure finished speaking and then disappeared directly.

"Gone?"

"Pu Cheng actually left early?" The three rulers of Fenglei Sea were extremely furious.

"Shut up then."

Ice Peak Ancestor glanced at the three rulers of Fenglei Sea, wanting to expel them from the 'Ice Peak Camp', but because back then twelve existences from the Land of Eternity allied together, lacking sufficient reason, it wasn't good to expel them directly.

"Pu Cheng left." Ice Peak Ancestor scanned the surroundings, "His attitude is clear, he won't join the battle. What about you all?"

"I also won't join the battle." Xiu Saiwei said, "Our Ice Peak Camp, like the Innate Primordial Camp, needs a lot of resources to grow the Life Core. But the eight lords of the Cultivator Camp focus on enlightenment. They don't care about resources. I don't understand why have a fallout over invading world groups."

"The Cultivator Camp has always relied on us! Now they've become powerful and started turning against us?"

"I think it's time for a fight. The ancestors who relied on us only enjoy the resources; it's time to make them fight desperately."

There were quite a few present wanting to start a war.

Ice Peak Ancestor felt quite a headache, quietly transmitted a message to Sha Zhou.

Beside him, the gray-clothed woman 'Sha Zhou' glanced at Ice Peak Ancestor and looked around before speaking: "This war is

meaningless, I won't join!"

Suddenly, the hall quieted down.

Sha Zhou won't join?

Sha Zhou and Starlight Lord rank among the top two in strength in Infinite Primordial Space. If Sha Zhou doesn't join, and neither do Pu Cheng and Xiu Saiwei, this war could be lost!

The twelve undying beings, with the three rulers of Fenglei Sea at the bottom, yet the others were getting stronger.

Pu Cheng's strength could match a Cultivator Lord! Hence, he dared to leave first, not giving face to anyone.

Xiu Saiwei's strength could also rank in the top thirty in Endless Primordial Space.

"Pu Cheng, Xiu Saiwei, and eldest sister Sha Zhou won't join the battle, I feel this war has no assurance, it's not suitable to start a war." Ice Peak Ancestor's gaze swept over the surroundings, "Return all previously occupied world groups to the Cultivator Camp. Any opinions?"

No opposing voices arose from the hall.

...

"They've decided to retreat!"

Luo Feng and others were on their way, Starlight Lord suddenly spoke.

"Retreated?" Yuan showed a joyful expression.

To be honest, the lords were still very concerned about the numerous creature worlds in their territories. Most of the twelve undying beings in the Ice Peak Camp were belligerent! They didn't care about the lives of the lower levels at all.

Xiu Saiwei and Pu Cheng were among the few who cared about their

own clans! They also worried about full-scale war affecting their own clans.

"During negotiations with Ice Peak Ancestor later, follow my lead." Starlight Ancestor could glimpse countless future possibilities, some of which once pushed almost certainly become reality.

"Okay." Yuan nodded, trusting Starlight was the right choice.

Half a day later—

Led by Starlight Lord, the eight lords came together to the border area of the fallen territory.

On Ice Peak Camp's side, six figures appeared, Ice Peak Ancestor and five others came to greet them.

"Elder brother Yuan, don't be angry." Ice Peak Ancestor smiled as he approached, "You said to start a war, after some intimidation. I barely managed to unify the internal opinions."

"What opinion?" Yuan asked.

"Of course to return the occupied territories." Ice Peak Ancestor said with a smile, "It's unnecessary for our sides to go to war."

"Just return them? I checked carefully, your Ice Peak Camp was quite ruthless, plundering wantonly, even devouring many Source World Origins." Yuan said coldly, "Now just returning the territories, and you think it's enough?"

Ice Peak Ancestor slightly frowned, feeling a bit unhappy.

Not going to war had his secret encouragement.

But he, Ice Peak Ancestor, also cared about face.

"What do you want?" Ice Peak Ancestor looked at Yuan.

"I don't ask you to compensate much, return all resources plundered in the Cultivator Territory." Yuan said, "Then the matter is settled! Otherwise, whoever robbed, I will rob back double!"

Ice Peak Ancestor nodded expressionlessly, "I can promise you."

"Ice Peak." Beside him, Wugu Ancestor and the three rulers of Fenglei Sea were somewhat anxious; they had seized the most, should they return it?

"I said, I promised." Ice Peak Ancestor glanced at them, "Whoever is unwilling, negotiate with the Cultivator Camp yourself."

Wugu Ancestor and the three rulers of Fenglei Sea could only endure.

Just them alone? Facing eight Cultivator Lords, they would be completely torn apart.

"Elder brother Yuan."

Ice Peak Ancestor looked at Yuan, smiling slightly, "Your Cultivator Camp has changed."

At least in facing Ice Peak Ancestor, the attitude had become much tougher than before!

"I also have to report to the other seven lords." Yuan looked at Ice Peak Ancestor, "Believe Ice Peak you can also understand."

"Understand." Ice Peak Ancestor nodded.

The two looked at each other.

Both understood that some things had changed.

Soon, everyone from Ice Peak Camp left, and Wugu Ancestor, along with the three rulers of Fenglei Sea, would need to return all plundered resources shortly.

"Invading our Cultivator Territory, making them retreat and return the plundered resources, is already quite lenient." Jin said coldly, "According to my temper, whatever they looted, we should counter loot ten times!"

"Our strength is still insufficient." Starlight spoke, "Forcing them to return the plunder is already the maximum extent. Asking for more?

With Ice Peak’s arrogance, they would certainly go to war! If he decides to go to war, Sha Zhou will definitely join."

Luo Feng had just become a lord and hadn’t interacted much with Ice Peak Camp, only silently watching all this.

"No matter what, the Cultivator Territory of Three Thousand Six Hundred World Groups has been completely recovered." Yuan showed a smile, looking at Luo Feng by his side, "Luckily Luo Feng broke through to become a new lord, otherwise, who knows what would happen to the Cultivator Territory."

The other lords also felt good at the moment.

Until now, this war could be considered completely victorious!

Chapter 436 - 17: A New Member of the Land of Eternity

Chapter 436: Chapter 17: A New Member of the Land of Eternity

The Cultivator Territory has been completely reclaimed, and only then did the eight Lords truly relax.

"Starlight, those damaged Space-Time Nets need you to rearrange them." Yuan requested.

"It’s simple to destroy, but troublesome to arrange." Starlight Lord rarely showed a trace of helplessness, "To repair all the damaged Space-Time Nets, it will take at least a millennium of busy work."

At the time when it was decided to expand the territory, the cultivators chose the densest group of Three Thousand Six Hundred Worlds, precisely because some world groups were too far apart, making the arrangement of time nets extremely difficult.

Starlight Lord is now just ’repairing’ the Space-Time Nets of a few hundred world groups, which already requires a millennium of effort.

"Brother Starlight, if you need help, just let us know." Luo Feng said.

"Repairing the Space-Time Nets just requires some special materials." Wulan chuckled on the side, "Starlight is far richer than you Luo Feng, there’s no need for you to help."

Starlight shook his head: "I do have a very important matter that requires Luo Feng’s help."

"Oh?" Luo Feng was curious.

"Once everything is ready, I'll discuss it with you in detail." Starlight smiled slightly. As the being with the strongest temporal insight in the Endless Primordial Space, he was the one who understood it the most.

He also had some troubles, but no other Lord could assist him, and he thought that once Luo Feng, who mastered two Primordial Paths, appeared, he might be able to help.

In the future observed by Starlight, Luo Feng, who masters the two Paths of Life and Death, would have much stronger combat power.

"Alright, feel free to call on me anytime." Luo Feng nodded, he admired Starlight greatly, for Starlight's contributions to the entire cultivator camp were immense! As soon as Starlight spoke, Luo Feng was naturally willing to assist.

Jin watched this scene from the side.

He and Luo Feng were considered a 'perfect combination,' with Luo Feng around, he could use the Forbidden Technique of his Burning Main Battle Avatar as a common technique! Luo Feng could also shield him from numerous dangers. Yet, a trace of dissatisfaction in his heart made Jin reluctant to speak further.

"Luo Feng, if you're willing to help Starlight, you'll have to help me in the future as well." Lord Mo Man laughed.

"Whenever I'm free, I surely will." Luo Feng replied.

Ming Huang smiled slightly on the side, as she now understood Luo Feng's nature, knowing that if she asked, Luo Feng would definitely assist.

Jin, Mo Man, and Ming Huang, these three... were very suitable for collaborating with Luo Feng! Once they cooperated, they could even achieve an effect greater than the sum of their individual parts.

"Next, let's properly rebuild the previously ruined territories." Yuan said.

All the Lords nodded.

In their respective territories, there were parts that had fallen. During the fall, they all suffered varying degrees of damage.

...

The Cultivator Territory entered a 'major construction phase,' and the entire camp finally returned to calm.

The Innate Primordial Camp, which suffered significant losses, and the Ice Peak Camp, which recently faced setbacks, no longer dared to offend the Cultivator Camp. As for other weaker forces? At this time, they dared not emerge at all.

The Three Thousand Six Hundred World Groups gradually resumed their usual lives.

Within one of the source worlds of the Dark World Group.

Inside a sealed cave mansion.

There was only one creature, living in solitude here.

"Hold on!"

"I must hold on!"

A figure curled up there, trembling, his consciousness sinking and struggling in countless illusory realms.

He was precisely the City Builder of Yulan City, 'Yuan Xiang Palace Master,' who, after leaving Yulan City to Luo Feng, dismissed all external avatars and returned home to his source world to fully resist the pollution.

But over time, the pollution of memories grew heavier, and he could no longer regain consciousness, constantly struggling in illusions.

His strong will to survive still struggled on.

Unwilling!

Struggling out of one illusion, only to face yet another.

He couldn’t even distinguish between reality and illusion.

"Ah, I can’t tell, I can’t tell what’s real and what’s illusion." Yuan Xiang Palace Master felt immense pain.

"Being able to realize ’can’t distinguish’ means I haven’t completely succumbed."

Yuan Xiang Palace Master’s consciousness had been deeply corrupted by pollution, only his strong will was sustaining him.

"Brother Yuan Xiang, Brother Yuan Xiang!"

A voice rang out.

Rumble——

A force broke through the closed cave mansion, appearing beside Yuan Xiang Palace Master.

"I’ve sent messages, yet there’s no response. You’ve completely lost control of even your own cave mansion." This figure watched the twisted, trembling Yuan Xiang Palace Master, gently shaking his head.

This was his guide on the path of cultivation, once mastering two and a half Primordial Paths! Now, he couldn’t even control his own cave mansion.

He couldn’t allocate even a single thought, losing all perception of the outside world.

"Brother, your luck is truly good." This blue-robed figure stretched out his hand, held a jade vial, and a drop of crystal clear dew fell, landing on Yuan Xiang Palace Master, merging into his body.

This crystal clear dewdrop fused into Yuan Xiang Palace Master’s soul, cleansing away all impurities, strengthening his soul considerably.

Yuan Xiang Palace Master opened his eyes, staring blankly at the cave mansion scene before him, looking at the blue-robed man in front of him.

"This is reality."

Yuan Xiang Palace Master felt unprecedented certainty.

At this moment, he was in peak condition!

He could even fully exert his pinnacle strength. Although 'memory pollution' was still present, his powerful soul was fully able to suppress the pollution.

"Du Fang, my dear friend, what is going on?" Yuan Xiang Palace Master looked at his old hometown friend, "The pollution brought by high-level Primordial Life, logically, only my spiritual will breaking out of the cage can resist it. How do I suddenly feel better? I even feel my soul has become much stronger."

"This is a drop of 'Life Dew' bestowed by the great Lord Luo Feng." Du Fang smiled, "He instructed me to bring it to you. This drop of Life Dew can transform and strengthen your soul, naturally suppressing the pollution."

For a Lord, solving memory pollution brought by merely high-level Primordial Life can have many solutions.

A drop of Life Dew that nourishes the soul is enough.

"Lord Luo Feng also said, if one needs to completely solve memory pollution, they can visit him in the Dark World Group. He will personally erase this memory pollution hidden in your soul," Du Fang said, "The Lord also mentioned that this pollution becomes harmless and instead offers a honing effect once your soul grows stronger."

Yuan Xiang Palace Master listened in a daze.

"Lord Luo Feng?" Yuan Xiang Palace Master, since returning to his hometown Source World, had self-sealed himself, focusing solely on fighting pollution, and was unaware of matters outside.

"Just not long ago, our Cultivator Camp birthed a new great Lord! Lord Luo Feng!" Du Fang said with excitement and pride, "Lord Luo Feng, allied with Yuan, Jin, and other Lords, thoroughly defeated the Innate Primordial Camp! We have already won this war completely."

"The Dark World Group, as the hometown of Lord Luo Feng, has been greatly developed. The present 'Dark Sacred Realm' is far more prosperous than before, with Lord Luo Feng's true body residing there permanently, served by thousands of high-level Primordial Life, and frequently visited by world-level Primordial Life."

Yuan Xiang Palace Master listened in shock.

That...

That talented young junior Luo Feng, who solved the disaster in Yulan City? Became the highest-level existence 'Lord' in the Endless Primordial Space?

Yuan Xiang Palace Master was well aware that Lords were the true pinnacle existence in Endless Primordial Space, for ancestors had flaws and could fall! But Lords were truly undying and immortal.

"Luo Feng became a Lord?" Yuan Xiang Palace Master still vividly remembered the first scene when meeting Luo Feng.

Back then, he felt Luo Feng had great potential, stronger than Wei Yang Palace Master and Master Gai Tao, so he gifted fifty billion Primordial Crystals! As for later contributions to Yulan City, that was because Yulan City faced a life-and-death calamity, and Luo Feng was the savior of Yulan City, which doesn't qualify as a favor.

The true favor was the fifty billion Primordial Crystals! To the then weak Luo Feng, it was of great help! One must know that before this, Luo Feng could only practice impoverished cultivation methods, unwilling to purchase Primordial Bloodline references.

"Lord Luo Feng said, you can go to the Dark Holy Land to meet him at any time." Du Fang was very envious that a weak Cultivator within a braided cage wished to meet the true body of a Lord? So rare.

"I understand." Yuan Xiang Palace Master was well aware that his

single act of goodwill earned a return of far over billions of times.

The favor towards a Lord?

Only when the Lord was very weak, was there hope to achieve it.

...

Dark World Group.

Luo Feng gazed into the distance, his eyes penetrating countless barriers and seeing Yuan Xiang Palace Master at that moment.

Through his journey, he remembered those who had shown him goodwill.

"Time to go to the Land of Eternity."

With a thought, Luo Feng immediately projected a mind in a Void space close to the Land of Eternity in the infinite distance, starting to gradually condense his avatar.

If it were warfare, naturally, a main battle avatar would be dispatched! Because avatars absorbed energy too slowly; restoring to the strength of a 'main battle avatar'... efficiency in traveling would be far greater.

Merely attending the Land of Eternity required only a regular avatar.

"Hu——"

Amongst the floating mountains of a Primordial Void, a Luo Feng avatar was formed, then began gradually absorbing energy. The avatar was very weak, and naturally absorbed very little energy.

As time progressed, snowballing seemed to occur, with the avatar gradually strengthening and absorbing more energy.

Approximately one Earth day later, it finally restored to about three ten-thousandths of energy reserves. Barely considered a weak avatar! Capable of clearing all World-level Primordial Life.

"Go to the Land of Eternity."

Only then did Luo Feng head towards the Land of Eternity.

No choice, the Land of Eternity's suppression of outsiders is terrifyingly strong. Only with Luo Feng's body's robust nature, possessing energy reserves of three ten-thousandths, could he be fully confident of not being pulverized.

Luo Feng's avatar condensed in a region very close to the Land of Eternity. Utilizing the 'Shadow Power' condensed into a bloody robe on the surface, Luo Feng reached the Land of Eternity in merely a moment.

"Boom——"

Luo Feng gazed upon this vast and flat land, feeling considerable pressure. His energy reserve of three ten-thousandths equated to 'Lord Mo Man's' reserve of about three percent! He still felt pressured, evidently indicating that this environment... only suited Ancestor-level and Lord-level Life Forms.

In the center of this vast, flat land, there was only one ancient round table, alongside now twenty-nine quaintly arranged seats.

"Lord Luo Feng has arrived." A peculiar cubical structure, its voice resounding in Luo Feng's ear, carried goodwill.

"Your seat has long been prepared; you came only today." Kafu, dressed in white battle armor, smiled, looking at Luo Feng.

One by one, silhouettes appeared.

As long as the first imprint was left on the seat, one could later project there upon thought, avoiding further suppressive consequences from the Land of Eternity.

Soon——

A total of twenty-eight silhouettes entirely emerged and became visible. Including seven Lords from the Cultivator Camp before, four of the Nine Emperors of the Innate Primordial Camp, twelve from the

Ice Peak Camp, and five independents, they all looked at Luo Feng.

Luo Feng also moved next to a seat, a strand of power permeating the seat, and with a thought, refining took place.

The instant of refining, utilizing the Land of Eternity, Luo Feng sensed these twenty-eight entities.

"Among us, we have gained a new companion, Lord Luo Feng!" The peculiar cubical structure 'Demon Ruins' sounded with strength, filled with joy.

In the Endless Primordial Space, only these undying and immortal existences can continuously play the role of chess players! The others, the ancestors, though strong, cease to exist once fallen.

Only they embodied eternity.

Today they welcomed their new companion—Lord Luo Feng!

Chapter 437 - 18: The Road Ahead

Chapter 437: Chapter 18: The Road Ahead

The Land of Eternity, twenty-nine beings rarely gathered.

"Luo Feng, when will your celebration as a lord take place?" Kafu asked with a smile, "I haven't been to your Cultivator Territory for a long time, so I could also take the opportunity to explore it well."

The other undying beings also looked at Luo Feng.

For Luo Feng's celebration, they would almost all send avatars to attend.

"The Mysterious Land I control, the 'Blood Crane Territory', is currently migrating back to the Cultivator Territory," Luo Feng said with a smile, "once the Blood Crane Territory reaches my hometown, that will be the time for the celebration."

Those who rely on controlling a Mysterious Land to remain undying usually hold their celebrations in the Mysterious Land, so no one was surprised by Luo Feng's decision.

"Sister Sha Zhou, do you have time to venture into the Tong Valley together?" the peculiar cube 'Demon Ruins' asked.

"Alright." The grey-robed woman Sha Zhou nodded, "I can go whenever."

"Let's set off after this gathering." Demon Ruins looked around, "Anyone who wants to join us can come along."

"Together," the Infinite Snake Ancestor also chimed in.

In total, six undying beings were willing to journey together to the Tong Valley.

Luo Feng listened from the side; he had also learned much about the Mysterious Lands from the information cache of the Land of Origin.

Tong Valley is a mysterious valley nurtured by the Endless Primordial Space, where terrifying attacks descend without pattern. Only a handful have crossed the entire Tong Valley.

The greatest benefit of the Tong Valley is experiencing 'attacks' that surpass all life forms! It has a certain impact on exploring one's own path forward.

Sha Zhou has visited the Tong Valley the most, and some of her killing techniques were developed based on the 'attacks' of the Tong Valley.

"The twenty-nine beings of the Land of Eternity, and the four major factions." Luo Feng observed their conversation and noticed some interesting points.

The Innate Primordial Camp, Cultivator Camp, Ice Peak Camp, and the Independent Faction. The first three major factions hardly pay attention to each other.

Instead, the 'proposals' from the Independent Faction are more likely to be accepted by all parties.

"We eight lords of the Cultivators are indeed different." Luo Feng listened to the conversation, "These Ancestors meet for adventures, meet to explore treasures. But the Cultivator Lords rarely get involved."

The Cultivator Lords mainly rely on Enlightenment! Occasionally exploring mysterious lands that resonate with them, as for other resources? Protecting the resources of the 'Three Thousand Six Hundred World Groups' is enough, they have no ambition for resources in a broader territory.

...

After traveling for a full Ten Eras, the Mysterious Land 'Blood Crane Territory' finally arrived at the Dark World Group.

Now the Dark World Group has been renamed the 'Galaxy World Group', and the Dark Sacred Realm has been renamed the 'Galaxy Sacred Realm'! This is something every lord does, each will rename their Absolute Territory to a name they like.

Blood Crane Territory, vast and boundless, is home to over 7.5 billion High Level Primordial Life Forms 'Blood Crane Territory Clan'. Only a small portion remains under Luo Feng's command, while others have been sent to work hard in other lords' territories.

This is the case for all eight Cultivator Lords. Even if they personally enslave 'High Level Primordial' and 'World-level Primordial', they will still share with the entire camp.

"The celebration is finally over." Luo Feng sent off many guests.

Even the Innate Primordial Camp sent avatars, with six Emperors including the Infinite Snake Ancestor, and there were as many as thirty-one avatars from the ordinary Ancestor! The Ice Peak Camp also sent as many as twenty-one avatars, along with avatars from many weaker forces.

More than a hundred Ancestor avatars came to witness.

The 'number of Ancestor avatars' from the spectators can also reflect the influence of the celebration host in the Endless Primordial Space. Like the 'Three Emperors of the Thunder Sea', their celebrations attract far fewer spectators.

"We've left."

"Brother Luo Feng, no need to see us off."

After all the other guests departed, the other seven Cultivator Lords left one by one, with only Lord Mo Man remaining at the end.

"Luo Feng." Mo Man approached Luo Feng and said, "You promised to

help me before."

"Right now?" Luo Feng asked, "I can set off anytime."

Mo Man smiled upon hearing this, pleased with Luo Feng's straightforwardness, "It's not time yet, there's a very special Mysterious Land, a 'Fluctuation Land', which I can only discover once every hundred thousand eras. It will appear again in about five thousand eras. Once it appears, we must set out immediately."

"Okay, no problem," Luo Feng responded.

"Thanks!" Mo Man took a step, and his entire figure transformed into a wave and disappeared.

Luo Feng stood amidst the Endless Blood Sea, the blood-colored robe on his body fluttering in the air.

"Finally, I have time to retreat completely and contemplate the 'Primordial Blade Path'." Luo Feng thought as he gazed into the distance. Not far away in space-time is the Origin Continent Source World.

Blood Crane Territory is very close to the Origin Continent Source World.

If, in the future, unthinkable crises arise, Luo Feng will move the 'Blood Crane Territory' again. It would take only a few moments for the Blood Crane Territory to reach close to the Origin Continent. The Endless Blood Sea can fully protect the 'Origin Continent Source World'.

According to known circumstances, nothing should be able to threaten the source world where I personally reside.

But the 'source world of my hometown' is related to the life and safety of my relatives and friends. With the Origin Continent Source World in place, I can easily resurrect Creatures. But if the Source World is gone, there's no way to resurrect! Luo Feng must ensure that the hometown Source World is safe and sound.

******

In the Endless Primordial Space, conflict never stops!

The 'Ice Peak Camp', which was just at a loss in the Cultivator Camp, had some Ancestors bully weaker forces around them, forcibly taking more resources. These weaker forces refuse to join the major camps; they do have some confidence, and naturally, the fights are fierce!

The Innate Primordial Camp and the Cultivator Camp remain relatively quiet, having fought too fiercely before; one side lost eleven Ancestors, the other saw many territories fall, and numerous Source Worlds were destroyed. Both sides are now resting and recuperating.

"This time, the war was truly worth it!"

A colossal sphere of light, containing endless light within, this is the true body of the Infinite Ancestor.

As one of the top three powers of the Innate Primordial Camp, the Infinite Ancestor has never reached the stage of 'Undying and Undying'! Therefore, it stands firmly with the Main Battle Faction! It needs enough trials, needs ample resources, to help itself advance further.

"Through the long ages, countless obstacles, until today, I have finally grasped the hope of 'Undying and Undying', truly seeing the path ahead clearly." At this moment, the Infinite Ancestor is very joyful.

"I must thank this war, must thank Lord Luo Feng."

It was due to Luo Feng's 'Origin Great Destruction', the terrifying might of that swept over a vast area, as the Infinite Ancestor focused on rescuing companions, its 'Endless Light' endured the impact under Luo Feng's Origin Great Destruction.

That terrifying energy storm! That incredibly dazzling light! Sweeping across dozens of Ancestors, gravely injuring as many as twenty-six Ancestors!

"That is the true Endless Light!"

"Endless Light, should have infinite might!"

The Infinite Ancestor understands, that is its path forward.

It only needs to go further, then it can transform into that incredibly dazzling light!

"To have infinite might, I need to be even purer! Even the Life Core must completely integrate into the light! At that time, the Life Core will be everywhere, can appear in any ray of light in the Endless Primordial Space, then I will be truly Undying and Undying!" The Infinite Ancestor glimpsed its path, then immediately began absorbing the resources accumulated over the long ages.

With resources supplied, actively guiding the growth of the Life Core, the Life Core also starts to transform very slowly.

This process is also full of hardships and obstacles, the clearer the understanding of the path ahead, the smoother the Life Core transformation can be.

...

"Where is my path?"

Silent Extinction Ancestor, one of the Nine Emperors of the Innate Primordial Camp, is also one of the top three powers within the camp.

It also searches bitterly for the path to Undying and Undying, yet finds no hope.

"I explore all possibilities; only one path has a glimmer of hope—to achieve Undying and Undying, one must first return to silent extinction, seeking immortality in extinction."

"But this path, the likelihood of complete death is probably over ninety-nine percent."

Silent Extinction Ancestor sighed.

This path, it is unwilling to take! Because the possibility of success is too slim.

In terms of strength, it already rivals the Cultivator Lords, even if the Cultivator Lords joined forces, they can't kill it. There's only a theoretical possibility of it being 'killed.' Such an existence, how could it gamble on a path with a 'death rate over ninety-nine percent'?

...

"Marvelous, marvelous, marvelous!!!"

In the Cultivator Camp, in the Land of Origin, Yuan is currently reading the legacy written by Luo Feng.

"Brother Luo Feng's research on 'Origin' can be described as the best in the entire Infinite Primordial Space." Yuan is very delighted, the eight Lords all have achieved Enlightenment, their depth of research is generally much greater than that of the Ancestors.

Luo Feng's Primordial Life and Death Dao focuses on life, with the Origin System being the core of his path.

"My path just needs the Origin System!" Yuan carefully studies the legacy, absorbing the parts beneficial to himself.

The 'Primordial Rule Operation Path' he practices, as the number of 'Divine King Ultimate Realm Paths' he discerns increases, the power of this Rule Operation Path also enhances! But Yuan failed in his attempt to create a Source World.

It is because...

The Source World requires, besides rule operation, the integration of many Daos into 'Origin.'

"Luo Feng, it's the Life and Death Origin."

"And I need to combine many Great Daos into 'Origin,' a source world requires at least nine Great Daos. Nine Great Daos combined into Origin. Much more complex than Luo Feng's Life and Death Origin." Yuan is also quite troubled.

The Primordial Life and Death Dao, is a fused single Dao, due to its

many characteristics in the direction of life, can easily transform into Origin, constructing 'one billion and eighty million Origins' with ease.

"At least nine Great Daos, to be combined into Origin."

"If I pursue more Great Daos, the Origin integration system becomes even more complex."

Despite feeling that the road is difficult, Yuan is still very joyful! Because Luo Feng's very detailed 'Origin System' has pointed him in the direction!

But once successful—

The Primordial Rule Operation Path, with an added Origin System, that will be a true qualitative change.

Inside as Origin, outside as rule operation.

Internal and external as one, can then create the Source World.

"At least the path ahead is clear." Yuan continued to practice in seclusion.

...

The eight Lords of the Cultivator Camp, each had their own affairs.

Starlight diligently repaired various parts of the space-time net! Jin once again ventured alone to explore the 'Abyss of Destruction'! Mo Man continued to roam transformed into ripples in the Endless Primordial Space! Wulan leisurely nurtured the bloodline descendants, while Luo Feng was comprehending the Primordial Blade Path within the Blood Crane Territory...

Unconsciously, three thousand eras have passed.

Chapter 438 - 19: The Primordial Blade Path Takes Shape

Chapter 438: Chapter 19: The Primordial Blade Path Takes Shape

The endless, vast Blood Sea floats alone, and this enormous mysterious land now has only one creature—Luo Feng! As for the submitted Blood Crane Territory Clan, they have all been dispatched to serve the Cultivator Camp.

In the Blood Sea, an island condenses, and on the island are some rare trees and plants.

Luo Feng sits alone, drinking a fine brewed wine. As a lord, his demand for 'external things' is very low, and some resources are specifically used for brewing wine and making gourmet food.

"Three millennia, and I've encountered a bottleneck." Luo Feng drinks his wine and suddenly feels something, gazing afar.

His gaze penetrates through endless time and space to a very remote place from the Cultivator Territory, where there is a Source World.

The creatures of that Source World cultivate without any guiding inheritance, relying entirely on their exploration, making it countless times more difficult than the Source Worlds within the Cultivator Territory. They frequently face being devoured by World-level Primordial or even 'Ancestors'. Even innate primordials like to devour the creatures within Source Worlds.

In such a harsh environment, the Source World currently has a creature, who has cultivated to the Ultimate Realm of the Godly King, breaking through the 'Source World Membrane Wall' with a secret technique, and temporarily staying outside the Source World, curiously observing the scene of the Infinite Primordial Space.

"Is this the world beyond?" The creature is very curious.

In his home Source World, he is absolutely invincible. Because there is no complete cultivation system, other than him, no other creature can explore to the Godly King Tier.

He is the pathfinder of this world!

"Beyond the Cultivator Territory is a place full of tribulations. You can summarize a cultivation system and achieve the Ultimate Realm of the Godly King; it's indeed impressive." A wave appears next to him, it is Lord Mo Man, "Come with me, little one."

Lord Mo Man directly guides this little being.

Luo Feng watches from afar.

Mo Man transforms into countless waves, spreading across the Infinite Primordial Space, and occasionally brings back extraordinary talents from countless Source Worlds outside the Cultivator Territory. Starlight Lord observes past, present, and future, and once discovering talented ones, he also goes to guide them.

The task of guiding talented cultivators outside the Cultivator Territory mainly falls on Mo Man and Starlight.

What they can do is only this much! Even the lords can't protect all Source Worlds.

"Outside the Cultivator Territory, there's an even vaster range... the countless Source Worlds and creatures there are truly living in the Nightmare World." Luo Feng is very aware of this but feels powerless.

The Three Thousand Six Hundred World Groups are just a small area in the Infinite Primordial Space.

Because this area's world group is dense, resources are dense, the Cultivator Camp fully protects it.

In fact, given the vastness of the Infinite Primordial Space... even if the world's groups in other regions are sparse, their cumulative total amount is still much more than the Three Thousand Six Hundred World Groups.

"Why only the Innate Primordial Camp wars with us, while other forces aren't as hostile? It's because there's still much vaster areas with many world groups providing food for those innate primordials." Luo Feng's eyes hold coldness.

The rules of this Infinite Primordial Space operate too cruelly for cultivators!

He admits, the individual strength of a lord is immense.

But among the countless Source Worlds' creatures, how many can break out of the cage?

Without breaking out of the cage, the countless creatures of the Source Worlds have no capacity to resist against the innate primordials! Even the Source World Origin will be devoured by World-level Primordials and even Ancestors.

"Without lordly protection, those Source Worlds are repeatedly devoured, and even the eating speed must be planned." Luo Feng's gaze penetrates various time-spaces, and he can see many nightmare-like scenes if he chooses to look.

Whether it's the Innate Primordial Camp, the Ice Peak Camp, or other weaker forces! Primordials born are part of their food range.

Of course, the food at the level of Source World Origin can only be enjoyed by World-level Primordials or Ancestors.

"The Cultivator Territory is peaceful, but what about outside the territory?" Luo Feng easily sees world-level primordial devouring one Source World after another, and the creatures within Source Worlds are exterminated.

Every moment, countless creatures face extinction.

"Yet I can do nothing." Even as a lord, what he can do remains limited.

The distances are too far; reaching many areas would take hundreds of days or even longer at his speed.

If he merely sends a thought over long distances, he cannot rival a world-level primordial.

"Only eight lords guarding 3,600 World Groups, and they already face wars."

"If we want to protect all Source Worlds in the Infinite Primordial Space... I'm afraid all foreign forces would unite." Luo Feng understands this, innate primordial camp, Ice Peak Camp, and numerous weak forces would probably join forces!

Numerous undying beings and a larger number of Ancestors would quickly crush the entire Cultivator Camp.

"Still too weak!"

Luo Feng is confident, but currently, among the eight lords, he isn't sure he ranks third. In the Infinite Primordial Space, he isn't sure he is in the top ten.

"Primordial Blade Path!"

Luo Feng frowns, "With my current comprehension, insight, and thinking speed, in three millennia, I have already understood ninety percent of the 'Primordial Blade Path', and have a clear prototype, but I've encountered a bottleneck."

In fact, it's already much faster than Wulan, Jin, Ming Huang, etc. people.

Three millennia of continuous progress form a clear framework! A complete prototype!

Yet, there was still a bottleneck obstructing me!

"My Primordial Blade Path consists of approximately 87% Destruction and 13% Life, fused together."

The small integration of the life system mainly involves aspects such as 'Life Qi Mechanism Lock', 'Life-cutting', 'Life Entanglement', etc.

When it comes to locking onto a target,

Destruction also has 'Killing Intent Lock', and when merged with 'Life Qi Mechanism Lock', the ability to lock onto enemies naturally reaches a very high level.

Luo Feng's Primordial Blade Path is all about 'locking onto the enemy' and pursuing various destruction techniques, the stronger, the better!

"Yet my Primordial Blade Path still lacks something to form a perfect whole." Luo Feng was quite vexed, "The deficiency should be the accumulation in the area of 'Destruction'.

Luo Feng once thought the accumulation in Destruction was deep enough since he had comprehended all the high-level Primordial materials, world-level Primordial materials, and Ancestor-level materials accumulated by the Cultivator Camp.

He also reviewed the heritages of the other seven lords. Jin's heritage focused on 'Destruction', but Jin's personality... made his path incompatible with Luo Feng, who could only extract parts of the information.

Having previously grasped the Primordial Life and Death Dao! At that time, the accumulation in Destruction was sufficient.

But now, focusing on Destruction, the accumulation is no longer enough.

"The Sky Splitting Saber originates from the 'Abyss of Destruction'." Luo Feng turned his hand to look at the saber in his hand, "Across the entire Infinite Primordial Space, the Abyss of Destruction undoubtedly contains the most 'Destruction Power'.

The Abyss of Destruction is the highest tier mysterious land!

Like the Land of Eternity and Fire Prison Wall, they are all recognized by various powers of the Infinite Primordial Space as the highest tier and are seen as places where the hope of refining and control is unseen, and even the origins of these places cannot be found.

The Abyss of Destruction contains every known and unknown Destruction Power!

"The Abyss of Destruction is like a bottomless abyss."

"From the outermost first layer of the Destruction World, one can continuously delve into the second layer, third layer..."

"It is necessary to kill through all obstacles in a layer and imprint one's life mark onto the 'origin phantom' of that layer to become the master of that layer of the Destruction World." Luo Feng had long known the detailed information of the Source of Destruction.

In fact, almost every Ancestor in the Infinite Primordial Space has explored the Abyss of Destruction.

How is the true combat strength of these ancient beings in Infinite Primordial Space, ranked in the top ten, top twenty, top thirty, determined?

It mainly depends on their performance in the Abyss of Destruction!

Up till now, the deepest layer reached in the Abyss of Destruction is by the Ice Peak Camp's 'Sha Zhou', and she is the master of the twenty-seventh layer of the Destruction World!

The Starlight Lord is the master of the twenty-sixth layer of the Destruction World!

The reason why Starlight is one layer behind is that Sha Zhou rose to dominance too long ago, taking the twenty-seventh layer first, thus using terrain to block Starlight from breaking her obstacles and refining the twenty-seventh layer.

Starlight has also tried, but could not kill through the twenty-eighth layer of the Destruction World! This shows that the capabilities of Starlight and Sha Zhou in Destruction are nearly indistinguishable.

They are also recognized as the top two in strength in the Infinite Primordial Space.

Weaker than them is the master of the twenty-second layer of the Destruction World, 'Demon Ruins'. As for the twenty-third to twenty-fifth layers of the Destruction World, they are unclaimed! This also represents that the Starlight Lord and Sha Zhou are clearly stronger than the other beings.

The twenty-second layer to the first layer, all have masters! From this, their strength can be judged to some extent.

Aside from the new lord Luo Feng, the other seven lords each have an avatar occupying a layer in the Abyss of Destruction.

Yuan is in the nineteenth layer of the Destruction World.

Mo Man is in the thirteenth layer of the Destruction World.

Jin is in the twelfth layer of the Destruction World.

Ming Huang is in the eleventh layer of the Destruction World.

Nai Gu is in the ninth layer.

Wulan is in the seventh layer.

Thanks to their performance in the Abyss of Destruction, Starlight is acknowledged as having one of the top two strengths, Yuan is acknowledged within the top ten of the Infinite Primordial Space, and the other lords are all stable within the top twenty strengths.

But this ranking has a flaw; it's not very friendly to those who excel in survival. For example, the 'Initial Ancestor', with the strongest defense, has a rather mediocre kill ability, and couldn't even take the first layer of the Destruction World. Wulan, the Cultivator Lord, although slower in speed and clumsier with techniques, wields enormously powerful moves, allowing him to occupy the seventh layer.

Yet all sides know, at critical moments, beings like Initial, Wulan, and Luo Feng, who specialize in defense and life, might play a bigger role.

The Abyss of Destruction proves only one’s ability to kill enemies.

"The Abyss of Destruction contains all known and unknown Destruction Power." Luo Feng stood within the Blood Crane Territory, clad in black, draped with a blood-red robe, "Go to the Abyss of Destruction, continue to enhance my accumulation in ’Destruction’, hoping it helps me to break through the bottleneck and fully master the Primordial Blade Path!"

Carrying the Sky Splitting Saber, this avatar of Luo Feng, the main battle avatar, stepped forth out of the Blood Crane Territory and headed towards the Abyss of Destruction.

Chapter 439 - 20: Abyss of Destruction—Layer 1

Chapter 439: Chapter 20: Abyss of Destruction—Layer 1

The time and space of the Infinite Primordial Space is very mysterious, with a structure not stacked like 'thousand-layer cakes', but rather like a multi-dimensional spider web. Hence, the 'Land of Origin' is hidden in a certain time and space, and no other forces can find it.

"Hoo."

Shadow Power is one of the highest-level forces that mirror numerous spaces. Luo Feng, using the mysteries of Shadow Power contained in the Blood Crane Territory, traverses the Shadow Power space layer, each step spanning immense distances of space and time.

Even then, after traveling non-stop for fifty-five days, Luo Feng finally arrived at the Abyss of Destruction.

The Abyss of Destruction is hidden in the depths of time and space, making it hard for World-level Primordials to peer into! But upon reaching the Ancestor Level, one can sense and delve into the depths of time and space to reach the Abyss of Destruction.

"Arrived." Luo Feng takes a step, crossing multiple time-spaces, reaching near the Abyss of Destruction.

The outermost layer of the Abyss of Destruction lies deep within time and space.

Each layer penetrates further into greater depths. Even the Starlight Lord cannot discern the bottommost layer of the Abyss of Destruction.

"The most powerful layer of Mysterious Land." Merely seeing it, Luo Feng feels its immovability! This 'Abyss of Destruction' personifies the entire Infinite Primordial Space, with an oppressive force surpassing even the Land of Eternity.

Compared to it, the Blood Crane Territory is far different.

Both are Mysterious Lands, yet worlds apart.

"Let's go to the first layer first." Luo Feng steps forward, breaking through numerous spatial obstacles, forcibly entering the first layer of the Abyss of Destruction.

...

The first layer of the Abyss of Destruction is occupied by an Ancestor named 'Bawei Yu'. To occupy a layer of the Destruction World, he is among the top thirty existences in the Endless Primordial Space.

Nine huge figures of Exotic Beasts prostrated respectfully: "Ancestor."

"Bringing you to the Abyss of Destruction is to let you experience the Power of Destruction. If you can make further progress and master this Power of Destruction... you can step into the Ancestor Level." A figure with eight hooves and sixteen eyes, each eye in different colors, watches its clan descendants.

"Our Bawei Clan, up till now, only has two Ancestors, too weak." Bawei Yu said.

These nine World-level Primordial Lives are equally eager for further advancement.

"I will arrange for the 'World Envoy' of the first layer of the Abyss of Destruction to spar with you. The World Envoy will ensure that you are not killed." Bawei Yu's sixteen eyes look at the clan descendants, "Go now! Truly experience this Power of Destruction."

"Yes." The nine World-level Primordials respectfully withdraw.

Bawei Yu immediately appoints a World Envoy to spar with the clan descendants.

Suddenly, Bawei Yu senses something—

"Hmm?"

Bawei Yu looks outside, seeing a black-haired man in a blood-red robe forcibly enter the first layer of the Abyss of Destruction.

"Is it the Cultivator Lord 'Luo Feng'?" Bawei Yu naturally recognizes him, his sixteen eyes spinning cautiously.

He is not afraid.

Every Ancestor, having mastered the highest level power, has Life Cores evolved to a very high level, with terrifyingly strong Life Force! During the war between the Innate Primordial Camp and the Cultivator Camp, before Luo Feng's breakthrough, Mo Man, Jin, and Ming Huang did not dare to burn their main battle avatars. They relied on countless techniques accumulated over time to gradually accumulate and slowly kill enemies.

Even with Luo Feng joining the battle, Mo Man and others burn their main battle avatars to use their strongest techniques, requiring several of them to cooperate to kill an Ancestor!

This was with the cooperation of Yuan and Starlight! Without Yuan and Starlight's cooperation, those Ancestors had various ways to escape.

Starlight suppresses all time and space.

Yuan can envelop a vast surrounding area with rule operations, restricting all forces.

With their cooperation, Luo Feng's energy supply, and Mo Man and others burning their main battle avatars' forbidden techniques... they managed to kill a few Ancestors when the Innate Primordial Camp was caught off guard!

Truly one on one, Ancestors have their ways.

In the Infinite Primordial Space, at the Ancestor Level and Cultivator Lord Level, there has yet to be a one-on-one kill! It always takes several working together to cut off all hope for the opponent, making possible a kill.

Bawei Yu, who is ranked among the top thirty in the Infinite Primordial Space, hasn't joined any camp! He has enough confidence to handle dangers!

In the Infinite Primordial Space, the so-called 'weak forces' are relative compared to the three major camps. In reality, they are quite formidable, each with some reliance. The weakest Ancestors who cannot handle crises generally have long joined the Innate Primordial Camp or the Ice Peak Camp.

"Lord Luo Feng." Bawei Yu's voice rumbles.

Luo Feng has already entered this first layer of the Destruction World, a vast and expansive world, several times the size of the Source World. It also contains a force of destruction that tears everything apart.

This Destruction Power lurks in every corner of this world layer. Because this first layer has the owner 'Bawei Yu', these lurking Destruction Powers have not erupted.

"Bawei Yu." Luo Feng looks.

Bawei Yu wields a highest-level force known as 'Multi-Dimensional Divine Light', known for its strong destructive power. It specializes in binding and imprisoning enemies with its sixteen-colored Multi-Dimensional Divine Light and is highly skilled in fleeing. Its escape ability surpasses even the Shadow Lord of the Blood Crane Territory.

Compared to Luo Feng, who can only partially harness Shadow Power, Bawei Yu's escape is much superior.

"Do you want to claim the first layer of my Destruction World?" Bawei Yu seriously asks Luo Feng, "If you want it, I can yield it to you."

He has self-awareness.

Luo Feng, even against joint obstruction from the three Lords of the Blood Crane Territory, could forcibly break through, ultimately refining the Blood Crane Territory.

He alone, as 'Bawei Yu', would be unable to stop Luo Feng! He would certainly leave a life imprint on the 'Shadow of Origin' of the first layer of the Destruction World.

"Rest assured, I will not take the first layer of the Destruction World." Luo Feng said, "However, please summon all the World Envoys to besiege me. Let me feel the power of this layer of the Destruction World."

"Good." Bawei Yu smiled, his beard curled.

Everything was as he expected! Among the previous seven Lords of the Cultivators, those who could master the Primordial Path were all formidable. Even the clumsy 'Wulan' occupied the Seventh Layer of Destruction World. How could Luo Feng possibly regard the First Layer?

Luo Feng, as a Lord, might not care, but Bawei Yu did!

"Lord Luo Feng, I will mobilize all World Envoys to besiege you, so be careful." Bawei Yu said.

Luo Feng stood in mid-air, nodding slightly: "Thanks."

...

Not far from Bawei Yu, nine World-level Primordials had just battled against a World Envoy, being wantonly ravaged, and then discovered the arrival of 'Lord Luo Feng'.

"The First Layer of Destruction World can mobilize 3,000 World Envoys, each being undying and immortal, Lord Luo Feng needs to be careful." After Bawei Yu finished speaking, all of them, including the World Envoy who fought against the nine World-level Primordials, charged towards Luo Feng.

Whoosh whoosh whoosh!!!

Dense and numerous, three thousand World Envoys appeared, surrounding Luo Feng.

This scene made the hearts of the nine World-level Primordials tremble.

"Luo Feng, one of the eight Lords of the Cultivators?"

"Even the Ancestor was actually so polite to this Lord Luo Feng, willing to voluntarily yield this layer of Destruction World?"

"I've heard the eight Lords of the Cultivator Camp are each extremely difficult to deal with."

These nine World-level Primordials curiously observed.

They saw!

Under the overwhelming siege of three thousand World Envoys, Luo Feng seemed like an unmovable mountain, resisting all attacks! The blood-colored robe he wore fluttered, enduring all attacks. Even a casual counterattack could turn ten or eight World Envoys into nothingness.

...

Luo Feng stood in mid-air, holding the Sky Splitting Saber, with a single slash, the Blade Light swept across, slaying several World Envoys. These obliterated World Envoys would condense and reappear from nothingness.

World Envoys are the carriers of the power concentrated in each layer of the Destruction World, undying and immortal! Although their strength is very weak, only containing the incomplete 'Power of Destruction', yet three thousand of them combined remain very terrifying.

The so-called 'piercing through a Destruction World' is to break through all the obstacles of the World Envoys, forcibly leaving a mark on the 'Shadow of Origin' of a layer's world.

In the First Layer of the World, breaking through the obstacles of three thousand envoys requires strength close to that of 'Bawei Yu'.

Like in the 28th Layer World, even Starlight cannot break through all the obstacles of the World Envoys.

"Slash." A World Envoy instantly transformed into a ray of light, which slashed onto Luo Feng's blood-colored robe. The robe's surface still had a Protective Energy Layer flowing, although a crack was made, it could not cause any damage.

"Kill!" Another World Envoy instantly disappeared, with a ray of light exploding within Luo Feng's body. Luo Feng's body, with the added power of Blood Sea, was far more resilient than before, completely resisting the damage.

Three thousand World Envoys, strange and unpredictable.

From all directions, from within, besieging Luo Feng.

"These World Envoys can only summon a small amount of the 'Power of the First Layer of Destruction World', but when combined, they are almost able to glimpse the full picture of this power." Luo Feng carefully perceived.

The various methods of the three thousand World Envoys combined can be called the 'Power of Breaking'! Or perhaps the 'Power of Split'.

This form of highest-level Destruction Power can cause everything to fracture!

"A Destruction Power that causes everything to fracture?" Luo Feng carefully felt, even consciously retracting the blood-colored robe, using his physical body to more finely experience the techniques of these World Envoys' siege.

In the Abyss of Destruction, each layer of the Destruction World contains a form of highest-level Destruction Power.

Moreover, each weapon nurtured contains a form of highest-level Destruction Power!

"Slash, all things can be cut!" Luo Feng felt the attack of the World Envoy slashing on his body surface. The body nurtured by the Primordial Life and Death Dao, even without the added power of Blood Sea, only showed some wounds on the surface.

"Split, the natural splitting of life." A World Envoy transformed into a black light appeared within his body, before the black light touched the flesh, the flesh naturally began to split.

Luo Feng felt various injuries.

All are mainly 'Destruction' fused with other mysteries forming these powers.

In the Abyss of Destruction, all 'Powers of Destruction', where the Destruction mysteries contain at least over eighty percent. Others may contain mysteries from life, matter, infinite, fire, space, and many other paths.

"Much richer than I originally understood. The so-called 'Power of Breaking', is not just breaking in one stroke, but also the natural breaking of life and all things. Luo Feng showed a happy expression.

"The Power of Breaking, destruction accounts for eighty percent, life accounts for twenty percent. It's the most common form of 'Power of Destruction' contained in the Abyss of Destruction." Luo Feng carefully pondered, because he already accumulated deeply, he faintly felt, "This specific 'Power of Breaking', given a bit of time, I am able to master."

His 'Primordial Blade Path' has already created its embryonic form, creating a Dao is very difficult, but mastering one form of power corresponding to this Dao is much easier.

In Endless Primordial Space, mastering the same kind of power is still recognized as a form of highest-level power.

Like a Cultivator Lord, mastering a Primordial level Dao! If willing, it's easy to master several forms of highest-level power of this Dao, but several same-origin powers add nothing to strength.

Different kinds of powers provide more significant assistance.

Like Starlight Lord mastering two Primordial level Daos, actually, one Dao primarily focuses on 'space', while the other primarily focuses on 'time'. Such assistance is great. Time paired with space achieves a qualitative change.

What Luo Feng pursues is life and destruction. Like the Infinite Snake Ancestor mastering 'infinite' and 'space' two kinds of highest-level powers, plus the Mysterious Land 'Infinite World' enhancement.

"Once mastering the highest-level Destruction Power—'Power of Breaking', it will surely be greatly beneficial to my comprehension of the Primordial Blade Path." Luo Feng felt the difficulty wasn't high, at least simpler than the bottleneck of the Primordial Blade Path, and immediately began to ponder elaborately.

Chapter 440 - 21: Destruction Weapons

Chapter 440: Chapter 21: Destruction Weapons

Luo Feng stayed on the first layer of the Abyss of Destruction for more than one epoch.

During this time, the Three Thousand World Envoys tirelessly launched continuous attacks, and Luo Feng constantly observed the partial Power of Destruction they invoked.

"It's about time. I've thoroughly studied all the powers of the Three Thousand World Envoys. Staying here is meaningless," Luo Feng realized naturally one day.

Luo Feng looked into the distance and spoke, "Bawei Yu, thank you for your assistance! I'm ready to proceed to the next layer of the Destruction World."

Bawei Yu, who had been silently paying attention, also breathed a sigh of relief, and immediately dispelled these World Envoys.

Luo Feng nodded at him and then directly broke through the obstruction of space, heading towards the next layer of the Destruction World.

"Finally gone." Bawei Yu was completely relieved. As long as Luo Feng stayed here, he had been worried that Lord Luo Feng might turn against them and forcibly occupy this layer of the Destruction World. Unfortunately, their strength was too weak to provoke the Cultivator

Camp.

The nine World-level Primordials had also been looking forward to this day. During this epoch-long period, they had no World Envoys for practice and didn't dare to make a big fuss, fearing to anger that Cultivator Lord.

"Continue cultivating," Bawei Yu immediately arranged for a World Envoy to accompany these nine clansmen.

...

Second layer of the Abyss of Destruction.

"Cultivator Lord Luo Feng?" A fat giant beast, with smooth hair that changed colors endlessly, each strand containing infinite wonders and a vast internal space.

The master of this layer of the Destruction World was one of the Nine Emperors of the Innate Primordial Camp, the 'Primal Beast Ancestor'.

"Primal Beast Ancestor." Luo Feng also saw the opponent.

The Primal Beast Ancestor, the strongest existence in the 'Domain' of the Endless Primordial Space, its body itself was a domain! Of course, it was only good at domains; in other aspects, it was relatively weak. In terms of direct combat, it was much weaker than Wulan, only managing to occupy the second layer of the Destruction World with much difficulty.

"Lord Luo Feng, what are you doing here?" The Primal Beast Ancestor stared at Luo Feng, quite vigilant.

It had experienced the explosive might of Luo Feng's 'Origin Great Destruction'.

Together with the Black Tide Ancestor and the Giant God Emperor, the trio was invincible. But one-on-one? Compared to any Cultivator Lord, it was weaker.

"I have no intention of seizing this layer of the Destruction World. Please, Primal Beast Ancestor, dispatch all the World Envoys of this

layer to attack me with full force," Luo Feng said.

The Primal Beast Ancestor was wary in its heart, but still slightly nodded on the surface, "Alright."

With a thought, numerous black-haired envoys appeared. Eighteen hundred black-haired envoys, fierce and dominant, their bodies much stronger, surrounded and attacked Luo Feng.

A red robe fluttered wildly on Luo Feng's body, letting the attacks fall on him as he meticulously comprehended them.

"The Power of Destruction contained in the second layer should be called the 'Power of Shattering', being eighty percent destruction and twenty percent matter," Luo Feng quickly made a judgment, having profound insights into Destruction.

Eighty percent destruction and twenty percent matter. Not suitable for him to master, but he could comprehend the mysteries of destruction within.

Luo Feng engaged in battle with these envoys, often deliberately enduring these attacks physically for deeper comprehension.

Boom—

As he casually slashed down a saber, killing an envoy, an invisible ripple appeared, and a gray weapon descended from a hidden space.

Luo Feng's eyes lit up, immediately reaching out to grab it. It was a gray spear, possessing extremely strong destructive power.

"This is the first Destruction Weapon I've acquired in the Abyss of Destruction!" Luo Feng smiled. According to the information he gathered, during the explorations in the Abyss of Destruction, while destroying one Destruction World after another, weapons were occasionally found. Previous seven lords had obtained some Destruction Weapons, the least having five or six, and the Starlight Lord had even acquired more than twenty.

All these are Destruction Weapons, not very suitable for the lords. So, most lords stored them in the Land of Origin for the later Cultivators

to exchange.

During the moment of despair in previous wars, the lords temporarily opened up exchange permissions, allowing Luo Feng, who hadn't yet broken out of the cage, to have the opportunity to acquire the 'Sky Splitting Saber'. At that time, many treasures were opened up, and several were as precious as the Sky Splitting Saber.

"These Destruction Weapons provide little assistance to me." Luo Feng put away the spear with a flip of his hand. This spear was comparable to the Sky Splitting Saber, but he personally preferred blade techniques.

The Sky Splitting Saber at this level of weaponry was an ordinary weapon for ancestors and lords, providing very limited enhancement to strength.

A treasure capable of significantly boosting the strength of Cultivator Lords would be extremely precious.

"According to intelligence, the Land of Destruction holds certain special opportunities that can yield extremely precious items." Luo Feng understood the information; for instance, the white Battle Armor of Kafu was obtained from the Abyss of Destruction!

Jin had braved the dangers time and again, even wanting Luo Feng's help to enter the Abyss of Destruction, seeking those special opportunities to acquire a very powerful weapon or battle armor.

On his own, his exploration range was limited. If Luo Feng assisted, many layers of the Destruction World could not stop them.

Refining the Shadow of Origin requires relying on one's own strength.

But simple exploration? Collaborating in exploration is very normal.

"According to intelligence, the deeper you go into the Abyss of Destruction, the higher the chance of encountering special opportunities." This was the experience summarized by other lords.

In the first ten layers, there had been no rumors of special

opportunities appearing! It could also be that the discoverers kept it secret and never disclosed it.

Beyond ten layers, special opportunities occasionally appeared. Kafu, a long time ago, encountered an opportunity during an exploration on the 19th layer, going through hardships, and finally obtained that white Battle Armor, which accompanied him for endless ages. The benefits of that white Battle Armor greatly enhanced his defense against various external attacks, comparable to the benefits of refining and mastering a Mysterious Land.

Chapter 441 - 21: Destruction Weapons

Chapter 441: Chapter 21: Destruction Weapons

Rumor has it that beyond the twentieth layer, there are more unique opportunities!

However, there are only four who've occupied beyond the twentieth layer of the Infinite Primordial Space: the 21st layer by Infinite Snake Ancestor, the 22nd by Demon Ruins, the 26th by Starlight Lord, and the 27th by Sha Zhou.

Yuan is at the 19th layer. But it doesn't mean he is weaker than Infinite Snake Ancestor or Demon Ruins.

Occupying each layer of the Abyss of Destruction favors the first occupier! Because for Yuan to occupy the 21st layer, he needs to face the joint blockade of 'Infinite Snake Ancestor and numerous World Envoys having strength almost as strong as Infinite Snake Ancestor'!

"Let's take it slowly." Luo Feng felt the siege of the surrounding black-haired envoys, familiarizing himself with the highest level power of destruction, 'Power of Shattering'.

The Master of the Destruction World, 'Primordial Beast Ancestor', watched from afar, quite envious: "These Cultivator Lords, every one of them has mastered the Primordial Path. As for me, I rely more on my innate talent, born as an Ancestor. Even if I grow to this point, I am unmatched in domain within the Infinite Primordial Space! But I can't achieve 'Undying and Undying'."

"My body itself is my domain, which makes my domain incredibly strong, but also confines me." Primordial Beast Ancestor, having lived too long, accumulated too much, understood his own shortcomings, "I want to be undying and undying, I must break free from the constraints of the physical body... make my domain fully integrate into the Infinite Primordial Space."

"At that time, I will be part of the Infinite Primordial Space itself, and so, I can be undying and undying."

"As for now, having a tangible physical body presents the possibility of being destroyed."

Previously, it experienced Luo Feng's 'Origin Great Destruction', and immediately got rid of the power of Luo Feng's Origin Great Destruction voluntarily. Despite that, both it and Black Tide Ancestor lost about ten percent of their physical bodies! If one were to completely block that terrifying power, Primordial Beast Ancestor might be completely annihilated.

Of course, it is not that foolish!

"Undying and undying..." Primordial Beast Ancestor yearned, yet couldn't take that step.

In a blink of an eye, more than one epoch passed.

"Primordial Beast Ancestor, no need to let World Envoys continue the siege. I am also ready to move to the next layer." Luo Feng said.

"Lord Luo Feng." Primordial Beast Ancestor suddenly spoke, "Do you think, how can my Void body fully integrate into the Infinite Primordial Space?"

"Fully integrate?"

Luo Feng glanced at it, then said, "To integrate, you must first understand it enough! You should carefully comprehend the Infinite Primordial Space, if you can't comprehend the Primordial Space Dao, at least comprehend a kind of highest level space power."

"Comprehending a kind of space power?" Primordial Beast Ancestor

subconsciously gave up the idea of comprehending the Primordial Space Dao, as that isn't something an Ancestor like it can aspire to.

But comprehending a new highest level power is still overwhelmingly challenging.

"Thank you." Primordial Beast Ancestor expressed gratitude.

Luo Feng smiled slightly, then moved on to the next layer.

Among the Cultivator Camp Lords, there is different treatment for the Innate Primordial Camp! Hostility is deep towards the Main Battle Faction, while towards the 'Anti-Battle Faction,' the Cultivator Camp is much friendlier.

From the Nine Emperors, 'Giant God Emperor' 'Black Tide Ancestor' 'Primordial Beast Ancestor' are the leaders of the Anti-Battle Faction! Previously, when 'seventy plus Ancestors' couldn't retreat smoothly, making the entire camp likely to lose, only then did these three join forces.

The Cultivator Camp befriends the three of Giant God Emperor, hoping to reduce the number of 'Main Battle Faction'. Because when fighting, although the Lords are fine, many world groups suffer heavy casualties.

"Mastering a highest level power is really not easy." Luo Feng secretly lamented.

Back then, starting on the basis of mastering the Primordial Life and Death Dao, he comprehended 'Blood Power,' which took over three epochs.

This time his Primordial Blade Path is just in its infancy, comprehending 'Power of Breaking' is noticeably harder. Of course, it's still easier than comprehending a complete Primordial Blade Path.

His potential and comprehension, with accumulation in Dao, makes comprehending a single highest level power so difficult.

Those Ancestors usually grow through their Life Core, with innate talent generally grasping one highest level power, mastering a

second? The difficulty naturally skyrockets.

For example, within the Giant God Emperor clan, none can refine and control the Giant God Realm! Within the Infinite Great Snake Clan, only 'Infinite Snake Ancestor' fully masters two highest level powers, while other Ancestor level Infinite Great Serpents are significantly weaker.

...

Luo Feng stays in each Destruction World for one or two eras, familiarizing with the highest level power of destruction within that layer!

In the fifth layer of Destruction World, Luo Feng encountered 'Lotus Prison Mountain Master', who is hostile towards every Cultivator Lord, naturally deeply hostile to Luo Feng, completely unwilling to cooperate.

Luo Feng could only make a move, asserting a stance of forcibly occupying the 'fifth layer of Destruction World,' although Lotus Prison Mountain Master is skilled at resisting attacks, direct confrontation is weaker than Luo Feng himself, otherwise, he wouldn't be occupying only the fifth layer. With Luo Feng's assertive stance, Lotus Prison Mountain Master was forced to go all out and resort to cooperation with eight hundred World Envoys in joint siege.

The battle soared amidst dim skies and dark earth.

Luo Feng continued battling for more than one epoch, thoroughly researching the power of 'eight hundred World Envoys', before proceeding to the sixth layer of Destruction World.

"These Cultivator Lords, each is domineering!" Lotus Prison Mountain Master felt dissatisfied, but powerless.

...

The seventh layer of the Abyss of Destruction.

Luo Feng finally arrived here.

"Brother Luo Feng." Wulan's booming laughter reverberated through the entire seventh layer world, "I sense you stayed for one or two eras in each layer of Destruction World, are you comprehending the power of destruction?"

All other lords understood that after Luo Feng used Power Breaking Technique, he would definitely attempt a second Primordial Dao.

They also believed that given Luo Feng's speed in Power Breaking Technique, the second Primordial Dao should not take too long.

"Comprehending the second Dao, I've hit a bottleneck." Luo Feng shook his head, "So I came to the Abyss of Destruction to increase my accumulation."

"Whatever help you need, just ask." Wulan said.

"Could you, Brother Wulan, deploy all envoys of this layer to siege me." Luo Feng requested.

"Alright."

With a single thought, Wulan mobilized six hundred World Envoys.

These six hundred World Envoys, each like a molten lava beast, extremely fierce, sieged Luo Feng, allowing him to encounter a new power of destruction 'Violent Power'.

Violent Power comprises eight parts Destruction Path, two parts Fire Path.

Luo Feng experienced it for more than one epoch, then let Wulan remove these envoys.

"Brother Wulan, I need to stay in this layer of destruction world for a while." Luo Feng said.

"Hahaha... Feel free to stay as long as you like. This avatar of mine usually sleeps." Wulan's laughter boomed, echoing within this layer of destruction world.

With a single thought, Luo Feng transformed the land, soon forming a

simple cave mansion.

"I won’t disturb Brother Luo Feng." Wulan laughed, his massive body slowly sinking, into the depths of the earth, into a state of slumber. Only to awaken upon the arrival of outsiders.

"Having experienced seven power of destruction, all mysteries have been pondered, it needs to be well digested and absorbed, making them a part of my path." Luo Feng began to seclude himself within the cave mansion.

——

Thanks to the new Alliance Hierarch ’Eternal Voyage for Immortality’ for the reward!

Chapter 442 - 22: Consecutive Breakthroughs!

Chapter 442: Chapter 22: Consecutive Breakthroughs!

In the blink of an eye, Luo Feng had been in seclusion on the seventh layer of the Abyss of Destruction for over three hundred epochs.

In a hidden location within the territory of the Innate Primordial Camp.

A super large radiant sphere was expanding repeatedly, with its terrifying pulsations affecting an ever-widening area. Surrounding some of the innate Primordial races, fear seeped in the face of this dreadful energy fluctuation.

"What's going on?"

"Has the Infinite Ancestor lost control?"

The five Ancestors and thousands of world-level Primordials under the Infinite Ancestor looked towards the true body of the Infinite Ancestor.

Even when cultivating, the Infinite Ancestor did not conceal itself, existing in the form of an ultra-massive radiant sphere. Its light illuminated creatures across an endless expanse.

"What is this?" The five Ancestors and thousands of world-level Primordials who dared to gaze upon the 'true body of the Infinite Ancestor' all saw black patterns appearing on the surface of the ultra-

massive radiant sphere!

The radiant sphere, originally filled with endless light, began to be covered by black patterns.

These black patterns twisted, resembling numerous evil and ugly black snakes. When seen, these black snakes would infiltrate the viewer's heart, naturally permeating the entire body, and penetrating the soul.

"Ah, ah—" Thousands of world-level Primordials hopelessly discovered that a terrifying pollution was corroding and drowning them.

During the years following the Infinite Ancestor, they had become accustomed to watching the true body of the Infinite Ancestor. In the past, the pollution of the 'true body of the Infinite Ancestor' was very low and had no effect on world-level Primordials.

"Do not gaze!"

"Do not gaze upon the true body of the 'Infinite Ancestor'!" Those five Ancestors urgently ordered, as they were not afraid of pollution, and could even clearly see that those ugly and evil black patterns were actually exceedingly intricate black Secret Patterns.

However, the profoundness contained was too deep. Merely looking closely at it would severely pollute the world-level Primordials.

"These thousands of world-level Primordials are heavily polluted."

"Let them see for themselves, if they can resist the pollution, they will survive; if not, they will die."

These five Ancestors did not care about these world-level Primordials, instead, they watched anxiously as the ultra-massive radiant sphere at the moment. The ultra-massive radiant sphere, with countless black patterns coiling, became ferocious and terrifying! Its power was far more terrifying than before.

"What on earth is happening with the Infinite Ancestor?"

"The pollution of its true body has never been this terrifying."

The five Ancestors were puzzled.

The true body of an Ancestor always possessed pollution, but to make it difficult for world-level Primordials to gaze upon was very rare.

Suddenly—

The ultra-massive radiant sphere rapidly expanded, in an instant transforming into an incredibly dazzling light, utterly destroying and affecting the vast surrounding territory! Fortunately, the earlier commotion had ensured no creatures dared remain nearby.

This pulsation, with extensive reach, felt slightly uncomfortable even to the five watching Ancestors.

The pulsation continued to spread, crossing vast space-time, causing even some distant high-level Primordial Life forms to shatter and die instantly upon contact. As for the low-level Primordial Life, they were directly annihilated into energy.

"This terrifying power could even match seven or eight-tenths of that of Lord Luo Feng's self-detonation." These five Ancestors were quite astonished, although the Infinite Ancestor was always among the top three of the innate Primordial Nine Emperors, it had never been this powerful!

"Hahaha..."

Accompanied by laughter, another radiant sphere appeared, emitting pulsations on its surface, "I tried exploding myself once, yet sadly after the explosion, I could only recover less than one-tenth of my body. Much less recovery than Lord Luo Feng."

"Infinite, you can self-detonate?" The five Ancestors could not believe it.

Ancestors have a vital Life Core, and generally dare not perform self-detonating techniques.

"I must thank Lord Luo Feng, making my 'Endless Light' advance

further, henceforth my Life Core has also turned into Endless Light, truly reaching undying and undying status. Hahaha... hahahaha..." The Infinite Ancestor was too delighted, its laughter thundered, resonating across the infinitely vast space.

It did not care at all, because it tried to perform a self-detonating technique, affecting countless weak innate Primordial Life forms.

"Undying and undying?" The five Ancestors exclaimed in amazement and joy upon hearing it.

"Congratulations, Infinite Brother."

All five were filled with joy and envy, for before this, only four Ancestors in the entire innate Primordial Camp had reached the 'undying and undying' level, and now the Infinite Ancestor also reached this stage.

"Infinite Brother, what do you plan to do next?" One of the Ancestors asked.

"Naturally, I will prove my power to the Infinite Primordial Space to secure a seat in the Land of Eternity." The voice of the massive radiant sphere resounded mightily.

In the Cultivator Camp, as long as a Lord emerges, they naturally gain a seat in the Land of Eternity. However, those Ancestors are different, as most of them have no seat, even after a breakthrough, they must prove their strength to the outside world, only then they are recognized.

"The simplest way to prove strength is to penetrate deeper layers of the Destruction World!" The massive radiant sphere brimmed with fighting spirit.

...

The Infinite Ancestor originally occupied the fourteenth layer of the Abyss of Destruction. In fact, its power was comparable to that of Lord Mo Man, being able to occupy a deeper layer purely due to the advantage of initial occupation.

After a breakthrough in strength, the Infinite Ancestor began to delve deeper.

The fifteenth layer was its old friend, the Silent Extinction Ancestor, which it did not challenge.

The occupier of the sixteenth layer was 'Mogus.' The Infinite Ancestor, in a mad frenzy, forced Mogus to mobilize all the World Envoys to fight it together. The current Infinite Ancestor was illuminated by endless light and exuded a terrifying aura.

With its own power, it completely suppressed Mogus and all the World Envoys combined, forcing its way to where the 'Shadow of Origin' resided. However, it did not leave a life imprint but instead laughed and continued to the next layer.

The seventeenth layer was occupied by the Feather Emperor! The Feather Emperor also mastered two types of highest level power, one being 'Light Power,' the other 'Feather Power.' It could also be omnipresent, its movement technique not inferior to the Infinite Ancestor's. Moreover, the Feather Emperor had the 'Feather Realm' support and carried all the World Envoys to join forces! In a great battle, the Feather Emperor was very aggressive in frontal combat, firmly blocking the Infinite Ancestor.

"I only suppressed it with the help of the World Envoys. If it were one-on-one, I would be at a disadvantage," the Feather Emperor realized, "Its endless light is much stronger than before!"

The eighteenth layer was occupied by Kafu.

The Infinite Ancestor fought with Kafu! Kafu was powerful in close combat and also had the assistance of all the World Envoys. But Kafu's movement technique was much weaker. The Infinite Ancestor restrained Kafu with part of its power, repelled all the World Envoys, and forcibly left a mark on the 'Shadow of Origin,' successfully occupying the 'eighteenth layer.'

The Infinite Ancestor had already realized that it hadn't taken the seventeenth layer, and had only barely managed to capture the eighteenth layer by means of restraint. The nineteenth layer was the

impeccable 'Yuan,' and each subsequent layer was more difficult; its hopes of occupying them were slim.

"I actually lost," Kafu felt rather frustrated.

He had nothing to say.

Even with the help of the World Envoys, he lost. What could he argue? One could only say that the Infinite Ancestor was too restraining for him! The 'Endless Power' and 'Light Power' contained within the Infinite Ancestor combined to form 'Endless Light,' which wasn't very strong in the past, but its power was now significantly improved. Under its restraint, Kafu couldn't break through the layers of light in a short time and watched it defeat the World Envoys and occupy the Shadow of Origin.

Nineteenth layer! The Infinite Ancestor fought against Yuan.

The Primordial Rules of Yuan operated, making the entire layer of the destruction world seem like a whole, which the Infinite Ancestor couldn't break through. There was no need to mobilize the World Envoys; it easily stopped the Infinite.

"The Infinite Ancestor is stronger than before," Yuan said solemnly, watching the Infinite Ancestor move to the next layer, "Its Endless Light's power is even more terrifying, and its Life Core is now integrated into the light, leaving no flaws."

If there were a Life Core entity, in Yuan's formation, it would not escape detection.

From the twentieth layer onward, the Infinite Ancestor tried one by one and failed each time.

But it could be confirmed that its strength was now on par with the 'Infinite Snake Ancestor,' 'Yuan,' and 'Demon Ruins,' only because it was a newcomer that it only managed to occupy the 18th layer of the destruction world.

...

"The Infinite Ancestor has broken through, reaching the state of

undying and immortal, and has occupied the eighteenth layer of the Abyss of Destruction?" Luo Feng was somewhat surprised upon receiving the news during his closed-door cultivation.

In the war between the two camps, the Innate Primordial Camp, having consumed the Source World Origin of hundreds of world groups, had also produced several ancestors. However, the Cultivator Camp did not care about these ordinary ancestors, but the birth of an 'undying and immortal' being was of great importance to the eight Lords.

Infinite Ancestor's power had already reached the level of Yuan!

"The Innate Primordial Camp's strength has increased significantly again." Luo Feng felt the pressure, as the entire Infinite Primordial Space had an inherent opposition between his camp and the Innate Primordial Camp.

******

The Land of Eternity welcomed its thirtieth member—Infinite Ancestor.

On Infinite Ancestor's first arrival in the Land of Eternity, all 29 other members manifested their avatars.

"Last time it was Lord Luo Feng, this time it's the Infinite Ancestor. War indeed breeds strong ones more easily," said the Demon Ruins.

"In the war between the two camps, although some ancestors have died, two undying and immortal beings have emerged," the Infinite Snake Ancestor spoke leisurely, feeling quite pleased, as it very much welcomed the Infinite Ancestor's breakthrough. The birth of the Infinite Ancestor had significantly heightened the deterrence of the entire Innate Primordial Camp, and since the Infinite Ancestor had no tribe, there was no need to compete for ordinary tribal resources.

"Lord Luo Feng," the Infinite Ancestor took the initiative to speak.

Luo Feng looked at it.

"I was able to take this step and reach the undying and immortal

state, all thanks to you," the Infinite Ancestor's voice was grand, "It was your self-detonation technique that gave me the impetus for my transformation, allowing my Endless Light to undergo a qualitative change."

Luo Feng sat there, calmly saying, "No need to thank me, it was because your accumulations were deep enough!"

After the gathering ended, Luo Feng dissipated to continue his closed-door cultivation.

Even the celebration subsequently held by the Infinite Ancestor, Luo Feng did not attend. The Cultivator Camp's side sent avatars of Yuan, Jin, and Mo Man to participate. Luo Feng's absence made the Infinite Ancestor at the celebration feel quite a bit of regret.

...

Luo Feng was solely focused on his closed-door cultivation, which had continued for over five hundred epochs.

Originally, his Primordial Blade Path already had a complete framework, a rudimentary form, and more than ninety percent of it had been comprehended. Coming to the Abyss of Destruction, he meticulously studied seven highest level powers of destruction, further enriching his accumulations.

The seventh layer of Destruction World.

In the cave mansion, Luo Feng suddenly opened his eyes, which contained a terrifying sharpness, belonging to the highest level power of the Destruction Path.

"I finally comprehended it!" Luo Feng felt rejoiced in his heart, although there was still some distance to a complete 'Primordial Blade Path,' he had finally comprehended one of the highest level powers, the 'Power of Breaking.'

The pursuit of destruction's 'Power of Breaking' would greatly compensate for his shortcomings.

Chapter 443 - 23: How Is This Possible?

Chapter 443: Chapter 23: How Is This Possible?

Luo Feng wore a black robe, draped with a blood-colored cloak, sitting cross-legged there, yet his aura was completely different.

In the past, Luo Feng's aura was heavy and vast, heavier than a Source World! Even those ancient Ancestors felt a headache when they saw it, knowing that even dozens of Ancestors besieging would have difficulty destroying Luo Feng's body, as it ranked among the top in the Infinite Primordial Space in terms of defense capability.

But many Ancestors were not afraid of such strong defense capabilities.

There were 30 Undying and Undying! What would strong defense count for then?

What Ancestors feared were those strong in slaughter!

And Luo Feng had only one move, 'Origin Great Destruction', purely relying on the self-explosion move backed by sufficient energy reserves that all sides were wary of, but Ancestors were not fools; having witnessed it once, they naturally would prepare for it.

"My 'Primordial Life and Death Dao', after all, is primarily centered on life. Although there are some means in the aspect of destruction, there is an essential gap to the 'Highest Level Power.'" Luo Feng thought.

The highest level power represents qualitative change.

Just like the 'Blood Power' of the Blood Crane Territory, compared to Luo Feng's Primordial Life and Death Dao, it is inferior in various aspects. But that is compared to Luo Feng! Compared to many Ancestors, energy reserves, life force, and recovery power, etc., are already terrifying!

"This 'Power of Breaking', compared to the Primordial Blade Path I pursue, certainly has many deficiencies."

"But after all, it is the highest level of destruction power."

"Completely changing my destructive side qualitatively."

Luo Feng revealed a smile.

Relying solely on 'Power of Breaking', compared to Jin, Ming Huang, and Mo Man, naturally, it is somewhat inferior. But when the Primordial Life and Death Dao and 'Power of Breaking' combine, that's different.

"My life form is nearly a hundred times stronger than Jin and Mo Man! Any random move of explosive energy from me can match them burning their main fighting avatar."

"Under the terrifying energy maneuvering the 'Power of Breaking', what level of power can it reach?" Luo Feng wasn't sure how strong he was now.

Ancestor, who mastered two highest-level powers, generally could rival a lord.

If combined perfectly enough, with the mysterious land's blessing, some special opportunities, one might even surpass a lord. Ancestors like the 'Ice Mountain Ancestor', 'Infinite Snake Ancestor', 'Kafu', 'Demon Ruins', etc., fall into this category.

"The Infinite Snake Ancestors have a combination of two different highest-level powers."

"And I have a Primordial Level Dao and a highest-level power! It

should be stronger than them!" Luo Feng had a vague understanding; he believed he could surpass all other opponents.

Only two!

Starlight and Sha Zhou!

Luo Feng had no certainty! But undoubtedly, with the highest level of a destruction route power, after thoroughly mending the flaws and combining it with the life direction, there will naturally be qualitative change.

Luo Feng's techniques were no longer just substantial to satisfy but, on the foundation of being substantial, every bit of power was extremely profound and contained the highest level of destructive mysteries.

"Hiss hiss hiss～～～" Luo Feng's aura also contained part of the destruction essence.

"This is not yet my strongest state; if I master the Primordial Blade Path, it will be stronger than now." After realizing the 'Power of Breaking', Luo Feng then understood what his biggest bottleneck was to create a complete Primordial Blade Path!

"To realize the Primordial Blade Path, my biggest obstacle must be my inner self." Luo Feng thought.

Any lord, the path they are best at, aligns most closely with their true heart!

And the second path, the alignment with one's true heart greatly diminishes. Just like Luo Feng, seeing Jin's created legacy, he disliked the spiritual power contained within the legacy. Destroy the heavens and the earth, for one's strength, can destroy everything? Luo Feng couldn't accept.

"My inner self must align adequately with the direction of destruction to create a Primordial Blade Path mainly of destruction."

Luo Feng's heart was like a blade, capable of cutting through all obstacles.

Through endless honing in the bygone eras, the heart was like a blade, growing sharper. But this heart of cutting was only barely capable of realizing the highest level of 'Power of Breaking', but far from enough to comprehend the complete Primordial Blade Path.

"When I accumulated adequately, I found the biggest flaw was the inner self. Heart and Dao Harmony, only then can one create the 'Dao.'" Luo Feng pondered.

"First, accumulate."

"The more adequate the accumulation, the better."

Luo Feng's path of cultivation was always this way, with preparations in every aspect so abundant, the road then became smoother!

Buzz~~~~

With Luo Feng's thought, this cave mansion naturally dissolved, energy returned to this Destruction World.

"Brother Wulan, I will continue exploring the next layer." Luo Feng said.

"Congratulations, Brother Luo Feng."

When Luo Feng just broke through, the invisible fluctuation already disturbed the owner of this Destruction World 'Wulan', thinking Luo Feng gained some insight in cultivation, Wulan didn't believe Luo Feng created a second Dao.

Creating a second Primordial Level Dao, such a major event, is not only Luo Feng's big event, but also a major event for the entire Cultivator Camp; it definitely needs to be communicated to other lords.

...

Abyss of Destruction, this mysterious land, named for 'destruction', is revered as the Holy Land in the minds of many Ancestors in the entire Infinite Primordial Space!

Being able to have a seat in the 'Land of Eternity' signifies Undying and Undying.

Being able to occupy a layer in the 'Abyss of Destruction' signifies a strength ranking in the top thirty! It's important to know that even well-known existences like the 'Lotus Prison Mountain Master' and the 'Primordial Beast Emperor' are only in the top five layers.

These two Holy Lands represent survival ability and combat ability respectively!

"The eighth layer!"

Luo Feng traversed the barriers of time and space and entered the eighth layer of the Abyss of Destruction.

This eighth layer was shrouded in mist, and a towering black figure emerged from the ground. His body was covered in black scale armor, and a solitary eye blazed with blood-red flames as he coldly stared at Luo Feng: "Lord Luo Feng, have you come here to seize this layer of the Destruction World?"

"Wugu Ancestor." Luo Feng looked at the other.

This black towering figure was indeed one of the top five among the twelve undying and undying existences of the Ice Peak Camp, the Wugu Ancestor!

"I'm sure you sensed it. I've delved continuously from the first layer of the Destruction World, spending several eras on each layer," Luo Feng said. "I'm exploring the Abyss of Destruction to hone my own cultivation. I won't seize this layer of the Destruction World from you."

"Do you think I'd believe that?" Wugu Ancestor angrily retorted, "Your Cultivator Lords have seized from me more than once!"

This is the eighth layer, with Lord Nai Gu on the ninth layer, Ming Huang, Jin, and Mo Man on the eleventh to thirteenth layers respectively.

Wugu was of the same era as Yuan! But later, he was surpassed one

by one by the Cultivator Lords, each of whom caused Wugu much headache, making him appear rather clumsy.

"I can promise not to seize this layer of the Destruction World. I only ask one requirement: arrange all the World Envoys to besiege me, just for one or two eras." Luo Feng said.

"To aid your cultivation?" Wugu Ancestor lightly shook his head, "You wish!"

Even without seizing, Wugu Ancestor didn't want to cooperate.

Previously, the Ice Peak Camp invaded the Cultivator Territory, and it was the Wugu Ancestor who invaded the most! At that time, Wugu Ancestor's true body was stationed in the occupied territory! But all the hard-earned gains had to be returned.

To have the things he seized returned? Wugu Ancestor was really unhappy about it.

Being undying and undying, when had he ever endured such humiliation? But at that time, the entire Ice Peak Camp decided together, so he couldn't go against it.

But at this moment...

"I can't possibly cooperate with you. Just get out of here, go to the next layer." Wugu Ancestor coldly sneered.

"Not cooperating?" Luo Feng's face turned cold, "Then I can only force you to cooperate."

"Force me to cooperate? Hahaha... If I don't want to, you can't even touch a World Envoy!" Wugu Ancestor coldly sneered, "Enough, quickly get out of this layer of the Destruction World!"

At a mere thought, billowing dark clouds rolled over, vast and mighty.

The endless dark clouds instantly engulfed Luo Feng, and in these clouds was the added 'Power of the World' of this layer of the Destruction World! This power could be concentrated into hundreds

of envoys or used to enhance oneself.

Concentrating into World Envoys was, after all, the best way to maximize combat power. After all, the 'Power of Destruction' contained in this layer of the world was not what Wugu Ancestor excelled at.

"Get out!"

Wugu Ancestor already possessed combat strength at an average lord level, slightly inferior in fighting ability, but quite powerful in the domain aspect.

His Life Core could be integrated into his power and appear in any avatar. That's why he dared to station his true body in the occupied territory alone at the time! At that thought alone, the Life Core integrated from an infinitely distant place into this avatar, naturally making this avatar a true body! With the continuous supply of Destruction World power, it quickly rose to the strongest state. Even enhanced by the 'Power of Destruction World,' it became three times stronger than the true body in its normal state!

"Boom～～～" Boundless dark clouds crushed towards Luo Feng, trying to force him out.

These clouds were extremely heavy, with a terrifying sense of oppression.

"Get out—" Wugu Ancestor was rather disdainful, wanting him to cooperate for cultivation? This Cultivator Lord was truly dreaming!

Suddenly, a cold blade light shimmered!

This blade light instantly pierced through the layers of dark clouds, even touching Wugu Ancestor's body. Wugu Ancestor only felt a terrifying force instantly slashing through his body, as if his body willingly split apart!

"Split apart?" Wugu Ancestor was shocked and angry, turning his head to look.

That blade light, wrapped around a figure, had already slashed into

the depths of this layer of the Destruction World, heading straight for the core 'Shadow of Origin.'

"Not good." Wugu Ancestor was shocked and angry. His speed was far less than that of Luo Feng at this moment. The 'Power of Destruction World' that was originally enhanced on his body quickly dissipated, rapidly forming as many as 550 World Envoys.

"Stop him!" Wugu Ancestor hurriedly ordered with a thought.

This group of World Envoys joining forces was only slightly inferior to him. As long as they could stall Luo Feng for a while, he would be able to join forces with the World Envoys!

World Envoys, acting on orders, tried their best to block.

"Whoosh!"

The blade light was sharp, fleeting; it sliced over three hundred World Envoys in half with one slash.

Almost unhindered, the blade light had already reached the place where the 'Shadow of Origin' was.

Wugu Ancestor hadn't even had time to catch up, but he felt he had lost control of this layer of the Destruction World.

"Wugu, you're no longer needed, get lost." Luo Feng appeared on the surface, his blood-red robe fluttering, coldly looking at him.

"How is this possible? This, this, this is impossible!" Wugu Ancestor couldn't understand, how under the World's power enhancement, not even for an instant could he intercept? This Luo Feng had never displayed such terrifying strength during the battles between the two camps!

Chapter 444 - 24: Battle on the First 18 Levels of the Abyss of Destruction

Chapter 444: Chapter 24: Battle on the First 18 Levels of the Abyss of Destruction

Luo Feng looked at the Wugu Ancestor coldly, "Still not giving up? Still want to fight?"

After all, the Wugu Ancestor is a being comparable to the Cultivator Lord, naturally insightful! His domain and physical body were effortlessly severed, over three hundred World Envoys were cleaved with a single stroke. This terrifying might, the Wugu Ancestor was well aware of its implications.

"I really didn't expect that the Cultivator Camp would have a Starlight Lord, and then you, Lord Luo Feng!" The Wugu Ancestor snorted coldly and then immediately plunged into time and space, heading to a higher layer of the Abyss of Destruction.

...

The Ice Peak Camp's territory.

"Ice Mountain Master." A manifestation of the Wugu Ancestor descended, immediately seeking the Ice Peak Ancestor.

A towering ice mountain figure opened its eyes, composed entirely of deep blue ice, naturally emitting an endless chill, making it impossible for low-level Primordial and high-level Primordial beings

to survive over the surrounding vast area.

"Wu Gu." The Ice Peak Ancestor looked at the Wugu Ancestor, "Do you have something to say?"

Ranked among the top three in the Ice Peak Camp, respectively are Sha Zhou, Ice Mountain, and Pu Cheng. But 'Pu Cheng Ancestor' is the most disobedient among the twelve Undying and Undying. Although the Wugu Ancestor is somewhat greedy, it is at least more obedient, so the Ice Peak Ancestor values the Wugu Ancestor.

"Ice Mountain Master, I encountered Luo Feng in the Abyss of Destruction." Wu Gu solemnly said, "I went all out, but the result was my body being severed in one stroke, and the control of the eighth-layer Destruction World was also taken away."

The Ice Peak Ancestor was shocked, "Impossible!"

"Before engaging, I wouldn't have believed it either." The Wugu Ancestor said while waving his hand, showing the previous battle scene in mid-air beside him.

Since battles often occur in the Abyss of Destruction, the various forces can't keep an eye on it all the time. The confrontation between the Wugu Ancestor and Luo Feng happened too quickly, and no one noticed.

"When I fought with Luo Feng, no other powerhouse was paying attention to the Destruction World in this layer at that time." The Wugu Ancestor said in a deep voice, "This battle remains a secret for now."

Even if one tries to observe the past, generally, the confrontation at this level isn't visible.

Observing the past can reveal battles at the Ancestor and Lord level, yet in the entire Endless Primordial Space, only a handful can achieve this.

As for observing the future? The past is set, but the future holds countless possibilities, walking on different future timelines can confuse many strong beings. It's far more difficult than observing the

past.

"Could this Luo Feng really be so strong?" The Ice Peak Ancestor commented after watching the entire battle scene, "Though your physical body isn't particularly strong, among the Ancestors, it's considered 'upper-medium,' with a strong domain as well, and even with the Power of Destruction World to boost you, you didn't block a single move! This destructive power has surpassed Mo Man, Jin, and Ming Huang from the Cultivator Camp."

The Wugu Ancestor nodded, as he had engaged with Mo Man, Jin, Ming Huang, among others due to some struggles over the Destruction World: "This Luo Feng is certainly much stronger than Jin, Mo Man, and the others."

Simply relying on the 'Power of Breaking' is naturally far inferior to Jin and the others. Yet, when the Primordial Life and Death Dao is combined with the 'Power of Breaking,' some of Luo Feng's killing moves can instantly unleash one-tenth of the Energy Reserve. This is much more substantial than the energy burned by Jin, Mo Man, and Ming Huang when they burn their main battle Avatar. Luo Feng's blade naturally severed the Wugu Ancestor's body with ease.

"Though Yuan is powerful, his expertise lies in formation, he can't achieve what Luo Feng has!"

"This destructive power directly targets Starlight and Sha Zhou! It's already considered the highest tier of the Infinite Primordial Space!" After watching the complete battle scene, Ice Peak Ancestor made his judgment, but his mood wasn't good.

The Cultivator Camp, which once depended on him, has already become quite disobedient, and now that Luo Feng's strength has increased once again, the Cultivator Camp will only become more dominant!

The Wugu asked, "Ice Mountain Master, how should we respond?"

"Endless just broke through, and now Luo Feng breaks through." The Ice Peak Ancestor indeed felt somewhat exhausted.

After the Infinite Ancestor breakthrough, he became Undying and Undying, rivaling the Ice Peak Ancestor in strength. Moreover, the Innate Primordial Camp is originally the strongest faction, and now it's even stronger.

The rising star in the Cultivator Camp, Luo Feng, is advancing close to the level of Starlight and Sha Zhou.

As the leader of the three camps, 'Ice Peak Camp,' how could the Ice Peak Ancestor not feel exhausted? Within his own camp, Pu Cheng is disobedient, and the three monarchs of Feng Lei Sea are always stirring up trouble!

"Don't worry, the strongest conflict with the Cultivator Camp is with the Innate Primordial Camp! The Innate Primordial Camp owns half of the Ancestors in the entire Endless Primordial Space. Their hunger for resources, their thirst for the Source World Origin, makes them destined mortal enemies." The Ice Peak Ancestor opened his mouth, "Let them fight first. The harder they fight, the greater the hatred, and the harder it is to reconcile."

The Wugu nodded.

The number of Ancestors in the Ice Peak Camp is far less than half compared to the Innate Primordial Camp!

"Now this Luo Feng has only been a Lord for how long?" The Ice Peak Ancestor sighed, "Our Ice Peak Camp hasn't had a strong force appearing for a long time."

"This Luo Feng is indeed somewhat terrifying." The Wugu Ancestor was quite proud.

Yet, Luo Feng's growth rate still startled the Wugu.

"Indeed, now he is directly challenging Starlight and Sha Zhou, what about the future?" The Ice Peak Ancestor felt as if the Cultivator Camp was about to surpass their Ice Peak Camp, and that Ice Peak Camp had no way to deal with it—a sense of powerlessness.

...

The eighth layer of the Abyss of Destruction.

"Shadow of Origin, indeed peculiar." Luo Feng quickly left his mark on the Shadow of Origin, now that the Wugu Ancestor had departed, Luo Feng began to carefully study the Shadow of Origin.

Unlike the normal origin of a Mysterious Land, it’s more illusory.

"No wonder it’s called ’Shadow of Origin’ by the Ancestors and Lords. It’s so ethereal, seemingly dependent on the entire Abyss of Destruction for its existence." Luo Feng vaguely perceived.

Chapter 445 - 24: Battle on the First 18 Levels of the Abyss of Destruction (Part 2)

Chapter 445: Chapter 24: Battle on the First 18 Levels of the Abyss of Destruction (Part 2)

"Even at the eighth level, all the Power of the World augmenting me, does it only increase my strength by twenty percent?" Luo Feng tried it out, the Power of Destruction World augmenting himself was indeed very weak.

One must know that within the Blood Crane Territory, my strength can multiply several times.

Even at a far distance, the power of the Blood Crane Territory's support is still quite helpful.

"Once I leave this layer of Destruction World, the augmentation of the Power of Destruction World will weaken." Luo Feng was already aware of the information, "By that time, there's only one usage; the weakened Power of Destruction World can be used to augment weapons, enhancing their destructive power."

This is also the only suitable usage.

The destructive power of weapons varies depending on the strength of the Destruction World, generally increasing the weapon's destructive power by ten percent.

"But Ancestors and Lords, many techniques do not use weapons and therefore have no augmentation." Luo Feng thought, for instance, some domain techniques or long-distance techniques are not suitable for weapon execution, rendering the Power of Destruction World unhelpful.

So compared to mastering a Mysterious Land, mastering a layer of Destruction World is relatively weak assistance.

However, no matter what, being able to enhance a weapon's power by about ten percent is still significant to an Ancestor or a Lord. After all, at their level, enhancing one's strength is extremely difficult.

Luo Feng, having just broken through with Break Laws with Force, is still in a period of rapid growth. If in the future he truly comprehends the 'Primordial Blade Path,' Luo Feng, like other Ancestors and Lords, will face the same situation where even a small step of improvement is extremely difficult.

"Attack me!"

Luo Feng sat cross-legged on the eighth layer of the Abyss of Destruction, and with a single thought, 550 World envoys formed, each madly attacking.

"The highest level power of destruction on this eighth layer can be called 'Power of Extinction,' with Destruction occupying eighty percent, and the World occupying twenty percent." Luo Feng calmly sensed, "This Abyss of Destruction, each layer contains different powers of destruction... It is said that on deeper layers, there are powers of destruction where three Daos are fused."

According to the intelligence he understood, the 'Power of Destruction' beyond the twentieth layer is all a fusion of three Daos.

For instance, on the 26th layer where the Starlight Lord resides, called the 'Black Fire Tribulation Power,' Destruction accounts for eighty percent, the Fire Path for ten percent, and Darkness for ten percent. This layer of the world has only 50 World envoys, though they can only borrow a portion of the Black Fire Tribulation Power, their joint efforts are enough to pressure the Starlight Lord.

"As the Abyss of Destruction continually deepens, the more Daos are fused, does this mean... the more Daos fused, the stronger one becomes?" Luo Feng thought.

Based on the experience of Ancestors and Lords.

Ancestors who master the highest level power, the more they master, the more perfectly combined, the stronger they become. Especially refining and mastering a 'Mysterious Land,' there's a very high requirement on the 'quantity' of the highest level power mastered.

The Blood Crane Territory contains three types of highest level power, those containing four types, five types, or even more highest level powers, the threshold for refining is imaginable.

All Ancestors, the different highest level powers an individual can master, are currently at most just two types.

Cultivator Lords mastering Primordial Level Dao, are also at most two types currently.

Everyone knows that 'more' Daos, 'more types' of the highest level power, will certainly enhance strength. But the further along, the difficulty rises sharply.

"Root yourself in the path under your feet, and continue walking your own way." Luo Feng felt the assault from 550 World envoys, studying the various mysteries of this power of destruction, increasing his own accumulation.

...

While Luo Feng was cultivating, chaos was erupting on the previous layers of the Abyss of Destruction.

The Wugu Ancestor first contended with Wulan of the seventh layer, but Wulan, with his World envoys assisting, easily blocked him.

Then he clashed with Xiu Saiwei of the sixth layer, who was also from the Ice Peak Camp. Wugu Ancestor and Xiu Saiwei already had a poor relationship; this time, he attacked forcefully without any concern for face, but was still blocked by Xiu Saiwei.

Ultimately, Wugu Ancestor succeeded in seizing control of the fifth layer from the 'Lotus Prison Mountain Master.'

The Lotus Prison Mountain Master excelled in defense, but Wugu Ancestor's domain could restrain the Lotus Prison Mountain Master, simultaneously dealing with the World envoys, ultimately securing control over the fifth layer.

The Lotus Prison Mountain Master, having lost the Destruction World, could only go to fight for other Destruction Worlds, clashing again with the 'Inference Fire Ancestor' on the fourth layer...

Finally, no layer among the first few was stable, each was forced to engage in battle.

...

After more than one epoch on the eighth layer, Luo Feng moved to the ninth layer of the Abyss of Destruction.

On this layer, three gorgeously dressed female figures simultaneously looked at Luo Feng. Among these three women, one was petite and adorable, one tall and aloof, and one had an expressionless, serene gaze.

"Lord Luo Feng," the three women looked at Luo Feng.

"Ancestor Liuyue," Luo Feng greeted courteously.

Ancestor Liuyue was born with three bodies, sharing a single Life Core that could transfer between the three bodies at any time! Her current strength ranks in the top twenty of the Endless Primordial Space. Yet because of her 'Three Body Form,' she has yet to achieve Undying and Undying.

Nevertheless, due to the Three Body Form, completely killing her is extremely difficult.

She is quite aloof, seldom involving herself in disputes, nor joining any camp.

Not long ago, the ninth layer of the Abyss of Destruction was Lord

Nai Gu! However, with the 'Infinite Ancestor' seizing control of the 18th layer from Kafu, a chaotic battle erupted from the ninth to the eighteenth layer, changing the occupants.

Counting the chaos resulting from Luo Feng's seizing of the eighth layer from Wugu Ancestor, strictly speaking, battles occurred across the first eighteen layers with significant changes in occupants.

"Lord Luo Feng has traveled from the first layer all the way here, staying for more than one epoch on each layer, is it for cultivation?" Ancestor Liuyue inquired courteously, as long as one does not provoke her, she is amicable to any faction.

Provoking her naturally leads to fierce retaliation.

"Yes, I also hope for Ancestor Liuyue's assistance in organizing all the World envoys to attack me," Luo Feng requested.

"A trivial matter." Ancestor Liuyue happily nodded; commanding the World envoys is merely a matter of thought, requiring no resource expenditure, so she gladly took the opportunity to make a friendly connection with Lord Luo Feng.

Soon, 500 World envoys besieged Luo Feng, and he continued to experience the new power of destruction.

More than one epoch passed.

Luo Feng bid farewell to Ancestor Liuyue and proceeded to the next layer.

"Being able to fight through layer by layer, staying at least an epoch on each, Lord Luo Feng surely has some formidable techniques for one-on-one combat," Ancestor Liuyue realized, for not every layer yielded to Luo Feng; sometimes, strength was necessary.

Ancestor Liuyue also began to follow Luo Feng's subsequent journey with interest.

Beyond the tenth layer, the difficulty escalates significantly compared to below ten layers.

Further down, it’s soon the level of the Infinite Ancestor, Yuan, Ice Mountain Master, Infinite Snake Ancestor, and beyond that are Starlight, Sha Zhou, and further still... the unsolved Destruction World.

"I wonder how far Lord Luo Feng will eventually go." Ancestor Liuyue looked on from afar.

——

Thank you, Old K, for your Alliance Hierarch reward again!

Chapter 446 - 25: Attention

Chapter 446: Chapter 25: Attention

The 10th layer of the Abyss of Destruction, where Lord Nai Gu currently resides.

Lord Nai Gu, with his deep blue skin, looked up and smiled as Luo Feng descended, "Luo Feng, I've been waiting for you."

"Nai Gu, you've reached the 10th layer?" Luo Feng replied casually, as moving down layer by layer in the Abyss of Destruction to come into contact with various powers of destruction was relatively easy for the lords occupying those layers.

"All thanks to that Infinite Ancestor, who seized the 18th layer from Kafu, causing chaos, which naturally allowed us to advance somewhat," Lord Nai Gu remarked, "The Abyss of Destruction rarely sees such changes."

Luo Feng agreed.

The occupiers have the help of the World Envoy, so unless someone as powerful as Luo Feng or the Infinite Ancestor comes, the positions won't change easily!

"I sensed the Abyss of Destruction carefully, has Mogus disappeared?" Luo Feng inquired.

"Kafu, having lost the 18th layer, went to bully the severely weakened Mogus. Mogus, hunted by Starlight, was left with less than ten percent of his life forms! Naturally, he couldn't withstand Kafu. A weakened Mogus has no chance to contest any layer for now," Nai Gu smiled.

Luo Feng was pleased to hear this.

The entire Cultivator Camp was hostile towards 'Mogus', but in reality, across the Infinite Primordial Space, the only real nemesis of Mogus, who excelled in the highest level of soul power, was the Starlight Lord! Other factions generally didn't wish to offend Mogus.

Mogus cared not for other resources, only for the souls of the weak! Those factions naturally tolerated him.

Moreover, with Mogus being undying and ranking within the top ten, closely rivalling the Infinite Snake Ancestor, the Ice Peak Ancestor, and Yuan, and having no attachments... who would dare provoke him?

Even if his power was greatly diminished, few dared to seize his Destruction World, fearing his vengeance after recovery! Only the lone 'Kafu' dared to forcibly take from Mogus.

"Mogus is terrifying," Nai Gu lamented, "He mastered the highest level of soul power. In the past, no Ancestors or Lords could threaten him. Our Cultivator Camp faced endless difficulties. In the most harrowing times, his power infiltrated over one-tenth of the Source Worlds in our camp, devouring countless souls."

Luo Feng remained silent, feeling a weight in his heart.

No lord could tolerate more than one-tenth of the Source World creatures in their camp having their souls devoured.

"Even the pursuit by Starlight is not easy; he has to scour the entire space-time to find and hunt Mogus, only temporarily weakening him. Mogus will inevitably return," Nai Gu explained.

Luo Feng felt helpless.

The power of the highest level of soul power! It can hide within any life form below the Ancestor level! What can Luo Feng do? The vastness of the Infinite Primordial Space and the multitude of creatures left him at a loss.

"If our Cultivator Camp could produce a lord mastering the Soul Path,

perhaps he could counter Mogus," Nai Gu mused.

"It's too difficult. Even now, not a single Godly King at the Ultimate Realm in the Soul Path has emerged," Luo Feng shook his head, saying that the complete Soul Path wasn't even contained within the Great Dao in the Source World Origin, with no direct reference available.

Historically, there have been 93 Fusion Dao Cultivators at the Half Primordial level, yet not a single Godly King at the Ultimate Realm in the Soul Path! And the Ultimate Realm of the Soul Path is still a long way off from the Primordial Level Soul Path.

"Nai Gu, I'll need you to arrange for all World Envoys to attack me to aid in my cultivation," Luo Feng requested.

"Alright." Nai Gu immediately commanded the World Envoys to assault Luo Feng.

Though once a Tribulation Cultivator like Jin, Nai Gu was eager to befriend Luo Feng. Because he knew that with Luo Feng's 'Power Breaking Technique', he might be his greatest help in obtaining the Ancestor Bloodline in the future.

Whoever could help him obtain the Ancestor Bloodline, Nai Gu would draw close to!

Jin, however, maintained more pride.

One's character could be glimpsed from their path: one embraced the 'Primordial Bloodline Dao', aiming to encompass all Ancestor Bloodlines, while the other pursued the Primordial Destruction Path, with a strong Heart of Destruction.

...

The 11th layer of the Abyss of Destruction is presided over by 'Pu Cheng Ancestor', the third most powerful in the Ice Peak Camp. Pu Cheng Ancestor is small in stature yet extremely tenacious! In combat ability, he's not far behind Mo Man, Jin, and Ming Huang, and with a robust body, his overall strength surpasses them.

Among the twelve immortal existences in the Ice Peak Camp, Pu Cheng Ancestor has the worst relationship with the Ice Peak Ancestor.

"Lord Luo Feng, my Pu Cheng Clan has always had good relations with your Cultivator Camp, and Yuan is my friend," Pu Cheng Ancestor greeted Luo Feng courteously, "You are welcome to visit our territory anytime."

"Thank you, Pu Cheng Ancestor." Luo Feng also knew that of the twelve beings in the Ice Peak Camp, the ones with the best relations with the Cultivator Camp were 'Pu Cheng Ancestor' and 'Xiu Saiwei', both having deep friendships with Yuan.

Xiu Saiwei becoming immortal had ties with Yuan! This debt of gratitude made Xiu Saiwei's relationship with Yuan extraordinary.

The good relationship between Pu Cheng Ancestor and the Cultivator Camp primarily stemmed from the significant conflict between the Pu Cheng Clan and the Ice Peak Clan, being the two most powerful clans within the Ice Peak Camp, they fiercely contended for resources.

"Need the World Envoy to attack you?" Pu Cheng Ancestor chuckled, having observed Luo Feng several times and knowing he'd been assaulted in those Destruction Worlds for one or two eras.

"One or two eras is enough, it's a bother to you," Luo Feng stated.

Pu Cheng Ancestor nodded, immediately sending a thought to deploy the World Envoys for the assault.

Chapter 447 - 25: Attention_2

Chapter 447: Chapter 25: Attention_2

...

The 12th to 14th levels of the Abyss of Destruction are Mo Man, Jin, and Ming Huang. After all, they are all part of the Cultivator Camp and naturally cooperate well.

"From now on, you need to be careful. From the 15th level onward, you might have to battle continuously," Mo Man said.

Luo Feng nodded, "I know."

Luo Feng's eyes were filled with fierce battle intent. The further he goes, the more terrifying the opponents will become! For Luo Feng, who loves combat, since becoming a lord, a thrilling battle has become quite precious.

"I will cherish every opponent," Luo Feng's eyes burned with intensity.

Whoosh—

Luo Feng directly crossed through space and time, entering a deeper layer of the Abyss of Destruction.

******

The 15th level of the Abyss of Destruction is enveloped in endless darkness, occupied by the 'Silent Extinction Ancestor', one of the top three in the Innate Primordial Camp.

"Luo Feng?" A massive dark light coalesced and appeared, with a figure faintly resembling both a human and a bird within the dark light.

"Silent Extinction Ancestor." Luo Feng also looked at the other party.

"I've observed you traversing the Abyss of Destruction. You don't seek detailed exploration but want to be besieged by the world envoys of each level?" Silent Extinction Ancestor spoke.

Exploration?

Luo Feng cared most about the power of destruction on each level, as for exploration? Luo Feng knew well that the greater opportunities lay further down, so there was no need to spend effort exploring the shallower destruction worlds.

"Silent Extinction Ancestor, can you have all the world envoys besiege me?" Luo Feng asked.

"My true body is not here," Silent Extinction Ancestor's voice resonated throughout the world, "But you, a cultivator lord, expect me to help you? What a joke!"

Luo Feng nodded with a smile, "Then I can only take forceful action to make you cooperate!"

"Give it a try." Silent Extinction Ancestor was quite confident, "Even if my true body is not here, you can't do anything to me."

"Oh."

Luo Feng extended his hand, and the Sky Splitting Saber appeared in his grip. Although he had traversed through many layers of destruction world, during confrontations with the world envoys, he acquired six destruction weapons, but none had anything special beyond the level of the Sky Splitting Saber.

"Humph." Silent Extinction Ancestor initiated a thought, and instantly 260 violet avian appeared.

Each violet avian was covered head-to-toe with dense violet scales,

their surface adorned with innumerable secret patterns, each 'violet avian' resembling a weapon, borrowing part of the highest level power of destruction, imposing a terrifying force.

At the same time, Silent Extinction Ancestor split into forms, descending dark light on each avian.

Generally, ancestors enhance themselves with the power of destruction world or condense it into a group of world envoys. However, Silent Extinction Ancestor, whose true body is absent, used his strength to enhance the world envoys.

Silent Extinction Ancestor excelled in the 'dark power' and 'power of death', these two highest level powers, whose combined force is called 'power of annihilation'. This power could target both physical bodies and souls, posing a grave threat.

Although not reaching the undying and immortal state, he still ranks among the top three in the innate primordial camp, reflecting the extraordinary nature of his strength.

"Kill—"

world envoys avian, each wielded the power of annihilation, fearlessly besieged Luo Feng.

These accumulative world envoys themselves had about eighty to ninety percent of Silent Extinction Ancestor's strength. Now, enhanced with the power of annihilation, they were slightly stronger than Silent Extinction Ancestor's complete true body.

"Buzz buzz." Two avian directly tore through the air with their claws, grasping onto the surface of Luo Feng's blood-red robe, creating ripples.

Luo Feng felt the damage of these attacks, casually counterattacking, with blade light slicing through like threads around, effortlessly cutting dozens of violet avian. This made Silent Extinction Ancestor, whose force imprinted on the avian, change color.

"With my enhancement, these world envoys are still so fragile before him?" Silent Extinction Ancestor couldn't believe it.

"Buzz buzz buzz."

Luo Feng did not exert full strength; while feeling the mysterious aspects of the attacking power of destruction, he casually tried targeting with his saber, leading to the downfall of numerous avian.

"With my enhancement, these world envoys now slightly surpass my true body, yet in front of Luo Feng, they have no resistance at all?" Silent Extinction Ancestor felt a bit apprehensive.

The blade light seemed subtle, but it was indeed unbreakable, all things could be cut.

Upon touch, it would cut in half!

Luo Feng frowned at the scattered flight of more than ten violet avian, saying, "Silent Extinction Ancestor, could you arrange for all the world envoys to besiege me with full effort? I need them to last one or two eras! If you are unwilling to cooperate, then I can only take control of this level of destruction world."

He didn’t care for control over this level of the world.

"I can’t stop you; I shall cooperate," Silent Extinction Ancestor said.

At this moment, Silent Extinction Ancestor felt that this cultivator lord Luo Feng was quite good-natured! Having enough power but not taking control of this level’s destruction world.

He relinquished his enhancement on the world envoys’ power, and with a thought, commanded the world envoys to besiege at full force! Also, each time a world envoy dies, power will again condense new world envoys to attack unceasingly.

Luo Feng was immersed in cultivation, paying no heed to Silent Extinction Ancestor.

"This Luo Feng doesn’t even look up to me." Silent Extinction Ancestor had mixed feelings. Despite being one of the top three in the innate primordial camp, the number of layers he occupied in the Abyss of Destruction deeper than him were all recognized among the top ten.

"What? Silent Extinction Ancestor was easily defeated in front of Lord Luo Feng?"

"Even if it’s not the true body, with the world envoys united, they shouldn’t be so fragile."

The scene of Luo Feng’s battle with Silent Extinction Ancestor was observed by quite a few powerful beings.

The cultivator lords, along with ancestors like Liu Yue Ancestor, Wu Gu Ancestor, and others, since it was already the 15th level of the Abyss, this deep-level confrontation between two powerful beings naturally attracted attention.

"Lord Luo Feng’s strength is even stronger than during the two factions’ war!"

"Silent Extinction Ancestor isn’t his true body! The exerted power is limited. From the 16th level onward, it’ll be completely different. From the 16th level onward... the occupants are all ranked among the top ten existences, and each possesses a true body."

"The true body cooperates with world envoys unless the strength gap is huge or complete suppression. Otherwise, one cannot win."

Many ancestors watched with anticipation, eager for the upcoming stronger conflicts.

The seven lords of the Cultivator Camp also noticed the strengthening of their comrade Luo Feng.

"Luo Feng, have you comprehended the second Primordial Path?" Yuan transmitted eagerly.

"Not yet! I’ve just figured out a form of Power of Destruction," Luo Feng replied.

Yuan still felt delighted.

With two different highest level powers, well-coordinated, they can exhibit very strong potency.

Luo Feng wielded one Primordial Level Dao combined with one Power of Destruction, his foundation was vastly formidable! Moreover, Luo Feng's strength of one life and one destruction, the combination was intensely suited for combat.

More and more were noticing Luo Feng.

"Luo Feng?"

On the 16th level of the Abyss of Destruction, the current occupant here was Kafu Xiu.

Kafu Xiu wore white battle armor, his gaze piercing through space-time to observe Luo Feng on the 15th level, with unprecedented fervor! Kafu Xiu, solitary and famed as the most belligerent in the endless Primordial Space, views combat as the greatest pleasure of his prolonged existence!

A thrilling battle was what Kafu Xiu dreamed of!

"Luo Feng, my 16th level won't be easy to breach!" Kafu Xiu already anticipated the forthcoming battle.

Chapter 448 - 26: Luo Feng's True Strength

Chapter 448: Chapter 26: Luo Feng's True Strength

When Luo Feng headed to the 16th layer of the Abyss of Destruction, more than thirty ancient beings from the entire Endless Primordial Space looked over, including the Infinite Snake Ancestor and the Ice Peak Ancestor, all giving this battle immense attention.

"Although I'm slightly stronger than Kafu, once he teams up with the World Envoy, I will also be at a disadvantage!" The Ice Peak Ancestor's eyes were cold. As one of the few with the highest status in the entire Infinite Primordial Space, his strength was among the top ranks, and with Sha Zhou supporting him wholeheartedly, his power was self-evident.

Yet the Cultivator camp, which once relied on him, was growing stronger, and naturally, the Ice Peak Ancestor was not pleased with this.

"This battle will also reveal Luo Feng's true strength!" The Ice Peak Ancestor watched indifferently.

Kafu's strength is recognized as powerful! Previously, he occupied the 18th layer.

After the breakthrough of the Infinite Ancestor, he failed to contest the 17th layer. The Feather Emperor and numerous World Envoys joined forces to suppress the Infinite Ancestor. In terms of frontal combat strength, the Infinite Ancestor slightly surpasses Kafu, but is

still no match for 'Kafu and the World Envoy teamed up'! At that time, the Infinite Ancestor relied on his 'ubiquitous' advantage to hold Kafu at bay and was the first to grasp the Shadow of Origin.

"The strength of Kafu and the World Envoy, when combined, can rival the Demon Ruins," the Infinite Snake Ancestor gazed from afar, "Enough to clearly witness Luo Feng's strength."

If a 'third strongest' must be selected in the Endless Primordial Space, it would be the Demon Ruins! If 'Initial' represents the ultimate of the Defense Dao, the 'Demon Ruins' represents the ultimate of Destruction! It is only due to the weaker movement technique and clumsy techniques that it is notably weaker than Starlight and Sha Zhou.

"I broke through, did Luo Feng also break through?" The Infinite Ancestor also watched.

Because of Luo Feng's battle, it was inspired and managed to reach the Undying and Undying Realm, establishing an immortal bond, making the Infinite Ancestor view Luo Feng in a different light.

Of course, being from opposing camps, it did not harbor much gratitude; rather, in its eyes among the over two hundred Ancestor and Lord-level beings in the Endless Primordial Space, Luo Feng was a very special one.

"I grow stronger, Luo Feng grows stronger. Indeed, this Cultivator camp is the biggest rival to our Innate Primordial Camp."

"The Cultivator camp has grown stronger." The gray-clad woman Sha Zhou, ranking the 27th layer, and also the being that delved deepest into the Abyss of Destruction in the Endless Primordial Space, "In the near future, it might completely surpass the Ice Peak Camp."

The Innate Primordial Camp possesses nearly half of the Ancestor Level beings, and there are continually new Ancestors being born.

The Cultivator camp has countless Source Worlds as their foundation and is also birthing one Lord after another! Every Lord is a master of the 'Primordial Dao,' immensely powerful individuals who, when

cooperating, are even more terrifying.

Both camps have continued to grow stronger, causing the Ice Peak Camp to fall behind gradually.

...

Luo Feng could sense over thirty pairs of eyes focused on him, and he could even trace back to determine the origin of each gaze.

"The encounter with Kafu indeed draws significant attention," Luo Feng mused silently, never before had so many strong beings watched a confrontation.

Finally breaking through layers of temporal and spatial barriers, entering the deeper 16th layer.

The 16th layer of the Destruction World was filled with innumerable dark green gigantic plants, growing immensely lushly across the world, everywhere.

A figure stood atop the crown of the tallest tree, it was Kafu!

Kafu was dressed in white battle armor, his eyes fervently watching Luo Feng.

"Lord Luo Feng, come battle me!" Kafu’s voice was mighty, resonating throughout this layer of the Destruction World, "As long as I enjoy the battle, even if you lose, I’ll arrange a World Envoy to assist in your cultivation. But if you’re too weak, I’ll simply expel you!"

Luo Feng looked at Kafu.

Their eyes met from afar, understanding each other’s resolve.

"I enjoy the passion of battle, but this Kafu... was born for combat!" Luo Feng could feel this, his heart had family, a tribe. But Kafu’s heart held only battle!

"Hope you won’t be like the Infinite Ancestor, just restraining me and evading me, that’s utterly dull." Kafu stared at Luo Feng, "Clash with me face to face! As long as you can take the upper hand, this layer of

the Destruction World is yours!"

"Rest assured, I will face you head-on." Luo Feng nodded, while speaking, he reached out, the Sky Splitting Saber appeared in his hand.

"Hahaha!"

Accompanied by resounding laughter throughout the Destruction World, Kafu's figure moved; immediately, an enormous hand covering half the sky loomed over, as if an immense mountain was crashing down, causing this layer of the Destruction World to begin twisting.

"Boom——" Luo Feng stood there, casually waving his saber.

The Blade Light was like a long whip, drawing an arc across the sky, even the Destruction World had split open, and this Blade Light struck the huge hand. The huge hand split directly, countless blood flowed down, like a lake.

The vast blood poured down enveloping Luo Feng, the blood like snakes, layer upon layer binding Luo Feng.

"Break!!!"

Luo Feng remained motionless, from his center, countless Blade Lights erupted from his body, sweeping outwardly in all directions, severing and annihilating the encroaching blood and hand.

All of this blood and the energy formed by the severed hand flew back, merging into Kafu's body in the distance.

"Able to hurt my body, Luo Feng, your blade is indeed formidable." Kafu stood there.

The white battle armor on his body began to spread, extending onto his hands, spreading onto his head, enveloping his entire body, with white glinting in his eyes.

Kafu's figure moved, approaching Luo Feng, commencing close combat.

Every finger held the power to destroy heaven and earth, the force terrifyingly strong, incomparably sharp, with immense destructive power. Even 'Jin' Lord was oppressed in direct combat with him, Kafu's combat skills had almost reached the Primordial Level Dao! His body itself served as a weapon everywhere.

"Clang clang clang—"

Luo Feng wielded the Sky Splitting Saber. With the Primordial Blade Path taking form, his blade technique became comprehensive, complemented by the endless sharpness brought by the 'Power of Breaking'. Luo Feng didn't immediately use 'Endless Energy' to overwhelm his opponent; instead, he aimed to hone his blade technique.

The Sky Splitting Saber collided numerous times with Kafu's body, striking the white battle armor. The impact was weakened by the armor, leaving Kafu's body seemingly undamaged.

"Compared to Kafu's combat skills, my blade technique is still too immature. The manipulation of ten billion eight million units of origin power is still too raw, not fully unleashing my potential." Facing Kafu, the most combative in the Endless Primordial Space, Luo Feng quickly realized many imperfections in the nascent 'Primordial Blade Path'.

He controlled the energy burst so that each blade technique was slightly more powerful than the opponent's, yet Kafu could compensate with combat skills.

On the surface, the two seemed evenly matched.

"Hahaha, hahaha..." Kafu fought with great excitement, laughing wildly during the battle. Despite trying every means and exerting full strength, the evenly matched duel was exhilarating.

If the battle were one-sided! Even if Luo Feng crushed Kafu, Kafu might gain something but wouldn't feel the same passion in battle.

It has to be an evenly matched, head-on confrontation for it to be enjoyable.

"No matter who wins or loses this battle, I can offer you this layer of Destruction World," Kafu laughed heartily. "Luo Feng, from now on, you are my friend."

"Friend Luo Feng, let's have a good fight!" Kafu relished the battle.

It had been too long since he experienced such a thrilling battle.

"Kafu, from now on, you are my friend too!" Luo Feng also benefited greatly from this battle. The 'combat skills' requirement of the Primordial Blade Path was extremely high, and in terms of combat skills, Kafu was unparalleled.

During the clash, Luo Feng continuously absorbed insights, gradually perfecting the Primordial Blade Path.

Although the energy burst level didn't increase in battle, Luo Feng began to gain the upper hand! The destructive power of his blade was on the rise.

One day, two days, three days...

They fought from the sky down to the depths of the trees, and then into the ground, engaging in different environments.

They enjoyed the battle.

"Good, good, good." Kafu fought with extreme enjoyment. The opponent's strength was slowly rising, increasing the pressure on him, forcing Kafu to tap into his combat potential.

The integration of the two highest-level powers he mastered occasionally produced a brilliant technique!

Under pressure, each new technique mastered brought immense joy to Kafu! This continuous stream of joy made the battle extremely enjoyable for him, as he hadn't encountered such a fitting opponent in a long time.

He once thought that Jin, who mastered the Primordial Destruction Path, was a suitable opponent, but Jin turned out to be one who resorted to all means for victory, even ambushing Kafu while

competing with other opponents for opportunities.

Kafu looked down on those who ambushed. He preferred honorable battles! As for winning or losing, Kafu didn't care; he enjoyed the process of the battle. Even if he lost, he would laugh heartily.

As for underhanded tactics or ambushes, Kafu despised them.

In his view, being Undying and Undying meant there was no need to care about victory or defeat. One should enjoy the passion of battle!

...

This battle lasted more than one Era. It was no longer an ordinary battle but a form of cultivation between Luo Feng and Kafu, both relishing the various gains from the fight.

"In direct confrontation, Luo Feng fully suppressed Kafu!"

"His strength is now comparable to the Ice Mountain Ancestor and Infinite Snake Ancestor."

More and more ancient beings watched the battle; these ancient entities could multitask millions of tasks, splitting a single thought to watch long-term. They gathered extensive information from the battle to assess the strength of Luo Feng and Kafu.

"Brother Luo Feng, I know your strength is far beyond this, no need to hold back for me," Kafu laughed heartily. "Go all out, let me truly experience your strength!"

Kafu, with his exceptional combat skills, deduced from their exchanges that Luo Feng was restraining his strength.

"Alright, I will use my newly realized ultimate move to end this battle!" Luo Feng also had a great liking for Kafu; this more than an era of time significantly helped in perfecting his Primordial Blade Path.

"Come on," Kafu anticipated.

Luo Feng swung his blade!

The first blade, the blade light was dim, seemingly like an endless, heavy earth crushing down. The blade light made the hearts of the many ancient watchers tremble, as it contained one-tenth of Luo Feng's energy reserve! Just as this blade touched Kafu's body, the second blade was already unleashed.

The second blade, the blade light was dazzling and resplendent, as if the brightest light appeared in the world! It carried the elegance of Luo Feng's original 'Origin Great Destruction', but this dazzling light was more concentrated, merging the mysteries of life and the 'Power of Breaking', landing on Kafu just after the first blade.

The third blade, this blade was already majestic! Like a river of destruction obliterating all obstacles.

These three blades, each containing one-tenth of Luo Feng's energy reserve! The combination of three blades formed the ultimate killer move of Luo Feng's current perfect technique.

Kafu let him unleash his full potential!

To thank this friend, he fully displayed his newly realized ultimate killer move!

Chapter 449 - 27: Awe-Inspiring Across the Endless Primordial

Chapter 449: Chapter 27: Awe-Inspiring Across the Endless Primordial

Kafu's palms were like mountains, blocking the first strike. The momentum of the first strike was too terrifying, crushing his palms and slashing across his entire body! The might was so overwhelmingly heavy, and although it was weakened by the battle armor, still seventy to eighty percent of the force spread throughout his entire body, causing the powerful body of Kafu to tremble, as countless cracks appeared.

"Hmm." Kafu couldn't help but let out a low hum, with eyes becoming more fervent.

At the same time, the second strike arrived.

The dazzling second strike was completely different in style from the first! This strike carried the force of 'All Things Can Be Cut', penetrating the battle armor, and slicing into Kafu's body! In an instant, Kafu's body was cut into dozens of pieces, as if shattered porcelain pieced together.

"Wonderful." Even while fragmented into dozens of pieces, Kafu praised with surprise.

"Boom——"

The third strike followed.

The third strike surged like a river, continuous and unending! After being weakened by the battle armor and transmitted into Kafu's body, it also stirred the forces of the first two strikes that were entrenched inside Kafu. The third strike triggered the power of the first two strikes, and all the power completely erupted in an instant!

Bam!

Kafu's powerful physical body exploded into a vast blood mist! However, the massive blood mist quickly condensed within the white battle armor, coalescing back into Kafu's form.

Yet at this moment, Kafu's body energy reserve was depleted to only twenty percent. But he was continuously absorbing the Power of Destruction from the Destruction World, and his energy reserve was rapidly climbing.

"Three strikes, deplete eighty percent of my body's energy." Kafu laughed heartily, "Across the Endless Primordial Space, only Sha Zhou could achieve this before!"

Sha Zhou and Starlight are acknowledged as the two most powerful entities, yet the two have entirely different styles.

Starlight excels at manipulating time and space, can observe the past and future, and calculates every possibility, mastering prolonged battles, hunting down every ounce of the enemy's power.

Sha Zhou represents destruction! Destruction! And destruction again! The lethal techniques she comprehended from the Mysterious Land 'Tong Valley' have made many ancient beings fear her.

Despite Demon Ruins having extremity in destructive power, its techniques are too cumbersome, needing close proximity and the 'tip' of a bizarre cube to unleash the unbelievable destructive force. Ancestors and Lords, unless they're foolish, can easily evade it. But some of Sha Zhou's destructive techniques are unavoidable! This is why Sha Zhou is on the 27th level while Demon Ruins is on the 22nd level.

"Three strikes, capable of depleting eighty percent of Kafu's body! If

hacked at me, wouldn't I be finished? Cannot take it head-on, absolutely cannot take it head-on!"

"Judging by battling Kafu for more than one epoch, Luo Feng's strikes are hard to dodge!"

"How is Lord Luo Feng's power this formidable?"

The ancient beings, their eyes piercing through space-time barriers, witnessed this battle.

But this battle made them feel dread!

Over ninety percent of ancient beings adjudged: "Faced with Luo Feng, one can only flee! Absolutely must not engage in face-to-face combat!"

Engage head-on? Kafu is the example!

Kafu has top ten level power and battle armor, his physical body also considered formidable. Yet, three strikes resulted like this!

"I've heard that the hardest path to becoming a Lord from the Cultivator Camp is 'Break Laws with Force'." The Infinite Snake Ancestor, coiled with a body occupying most of the Destruction World, gazed at Luo Feng.

As the chief of the Innate Primordial Camp, naturally gathering boundless information on the Cultivator Camp, the few paths for cultivators to 'Breaking Out of the Cage' are no secrets, easily known by the Infinite Snake Ancestor.

"Starlight breaks laws with force, and Luo Feng does the same."

"Starlight's power matches Sha Zhou! Moreover, can observe past and future, nearly observing every possible future. Facing him, I am already quite troubled."

"Luo Feng has newly become a Lord, yet he is already on par with Starlight and Sha Zhou." The Infinite Snake Ancestor, naturally with detailed evaluation criteria for other Ancestors and Lords, after witnessing this battle, has already determined—

Luo Feng, Starlight, Sha Zhou, are at the same level! Representing the Pinnacle battle strength of the entire Infinite Primordial Space.

"I may be capable of suppressing Kafu, but no matter how long the combat is, I cannot destroy eighty percent of his body." The Infinite Snake Ancestor sighed internally; this is an entirely transcendent destructive power.

The leader of another great camp, the 'Ice Peak Camp', also meticulously watched this battle, remembering every exchange between Luo Feng and Kafu clearly, even analyzing countless times.

"This Luo Feng, his destructive force is stronger than mine." The Ice Peak Ancestor admitted internally.

If the difference were minor, there might be some refusal to concede.

Yet the disparity was too evident! There's no point in comparison anymore.

"He ranks equally as Sister Sha Zhou!" The Ice Peak Ancestor's eyes showed unwillingness; his influence and prestige mainly derived from 'Sha Zhou,' Sha Zhou steadfastly supported him, advancing and retreating together! His command in the Ice Peak Camp far surpassed the influence of the Infinite Snake Ancestor in the Innate Primordial Camp.

Know that within the Innate Primordial Camp, there are the 'Nine Emperors', nominally equal! The Infinite Snake Ancestor needs to ally with many Ancestors to have such influence. Even so, the factions of the Giant God Emperor still pay little heed to the Infinite Snake Ancestor.

But in the Ice Peak Camp, the entire camp is named after Ice Peak! Nominally, he is the absolute leader! In fact, besides the Pu Cheng Ancestor, all other Ancestors in the camp dare not truly oppose the Ice Peak Ancestor.

"I really look forward to confronting Luo Feng." An unusual cube was extremely excited at this moment, as he loved all adventures and the thrill of facing powerful opponents.

"The destructive power is comparable to mine!" The woman in gray stood on the deepest 27th level, a fighting spirit arising in her eyes. In the vast endless primordial space, there were very few who could tempt her to make a move! She had fought against Starlight before, yet couldn't even touch it, making such battles meaningless.

Sha Zhou preferred this: the extreme destructive power of both sides clashing! She was eager to see who would ultimately be stronger!

...

"Brother Luo Feng, do you need this level of Destruction World?" Kafu asked eagerly; for him, a thrilling battle was far more valuable than just one layer of a Destruction World.

"No need." Luo Feng shook his head, "Kafu, have the World Envoys attack me with all their might."

Occupy a Destruction World?

From the 23rd to the 25th level, they were unclaimed; taking over a layer wasn't difficult. It was possible that he might push further into the 28th and 29th levels... Naturally, he wouldn't require the layer offered by Kafu.

"Alright." Kafu nodded, and with a thought, he commanded 230 World Envoys to attack together. These World Envoys resembled plant life, with a multitude of branches like arms.

"This power of destruction?" Luo Feng stood there, beginning to feel the attacks from the World Envoys on his body, revealing a joyful expression, "Could be called the 'Power of Life Severing,' composed of seven parts destruction and three parts life?"

This layer's power of destruction greatly benefited him; it was the second type of 'Power of Destruction' he had encountered, where life and destruction fused, while adventuring in the Abyss of Destruction.

Luo Feng was immersed in cultivation, yet his battle with Kafu stirred massive waves in the endless primordial space, affecting more and more factions.

...

The Innate Primordial Camp occupied more than half of the endless primordial space's territory.

Many regions had no Source World, yet still many low-level primordial life and high-level primordial life thrived and reproduced, for devouring the 'Source World Origin' bore a threshold, requiring at least a World-level Primordial Life! The growing 'low-level primordial life' and 'high-level primordial life' required fewer resources to develop.

In such a remote region, one of them was under the command of the 'Water Foolish Ancestor.'

Water Foolish Ancestor sheltered his own tribe, along with numerous weaker tribes who also were under his protection.

He didn't wish to join any conflict. However, his strength, even at the Ancestor level, was too weak, making it necessary to align with a powerful camp for the survival of the tribe. Thus, he allied with the Innate Primordial Camp and selected the relatively peace-loving 'Giant God Emperor' faction.

Not every Ancestor loves war. They join a major camp solely for better survival opportunities for their tribe.

If one roams freely with no ties, an Ancestor can live lavishly, residing anywhere or concealing their Life Core in hard-to-find places. However, for large tribe responsibilities, one has to be either strong enough to defy any other force, or join a great power for their protection!

By joining the 'Innate Primordial Camp,' Water Foolish Ancestor enabled his entire tribe to reproduce peacefully. No one dared to threaten an Ancestor of the Innate Primordial Camp recklessly, as that'd mean challenging the whole camp.

Indeed, he was a staunch supporter of the Giant God Emperor faction, receiving its protection. But, of course, when a critical moment arrived, previous engagements of his faction required his

participation.

"It’s truly terrifying, even more so than the previous wars between the two major camps!" Water Foolish Ancestor gazed into the Abyss of Destruction, having witnessed the battle between Luo Feng and Kafu.

The Abyss of Destruction was where the strongest entities of the endless primordial space resided. Water Foolish Ancestor feared that he couldn’t step into even the first level without being blasted out by ’Bawei Yu!’ Although Bawei Yu maintained a low profile in front of Luo Feng, he was ultimately ranked among the top thirty beings, and someone like Water Foolish Ancestor, an ordinary Ancestor, stood little chance in his presence.

"To face one of the top ten like Kafu, a figure I can only look up to, and have most of his body destroyed in just three strikes?" Water Foolish Ancestor marveled, "This Lord Luo Feng is probably at the very pinnacle within the endless primordial space."

"Facing such an existence, I must flee immediately, unable to withstand directly."

The weaker the frontal combat strength of an Ancestor, typically the stronger they are at self-preservation! After all, they possess at least one highest-level power. In their area of expertise, their brilliance shines.

...

There were too many watching Ancestors, even if a few hadn’t seen it firsthand, they were quickly given combat footage from their friends, allowing them to clearly witness the entire struggle between Luo Feng and Kafu.

These ancient beings mostly had no qualification to contend for the first level of the Abyss of Destruction, yet they possessed certain observation secret techniques allowing some degree of judgment.

They could all discern Lord Luo Feng’s approximate level!

Any contact would mean fleeing! Unable to confront head-on!

"Marvelous!" Lord Mo Man was overjoyed, "No wonder they use Power Breaking Technique; his strength rapidly surpassed ours."

"He’s already stronger than me." Jin remarked from the 13th level, watching Luo Feng cultivating on the 16th level.

Even so, Jin disliked Luo Feng’s strategy of managing the territory.

Luo Feng sought to eliminate any chances for ’tribulation cultivators,’ believing that one tribulation cultivator viewing all creatures of the Source World as resources to cycle through realms, monopolizing the entire Source World, severing all weak hopes was unacceptable! Luo Feng, considering the countless weak, believed the ’hopeless-severing’ tribulation cultivators shouldn’t exist!

Jin, however, greatly admired tribulation cultivators, thinking of them as the elite, forged through countless lives. He himself followed this path! With differences in Dao, they couldn’t work in unity! Jin was willing to occasionally join forces with Luo Feng for the camp’s overall interest but preferred keeping his distance otherwise.

"Just because you’re stronger doesn’t mean you’re right. Both Nai Gu and I are tribulation cultivators; perhaps a third or fourth tribulation cultivator might emerge in the future." Jin contemplated.

Chapter 450 - 28: Merging into One

Chapter 450: Chapter 28: Merging into One

On the 17th layer of the Abyss of Destruction, Feather Emperor stood there, calmly watching the scarlet-robed figure descending from above.

"Lord Luo Feng." Feather Emperor looked at him.

"Feather Emperor." Luo Feng also observed him. Each of those ranked in the top ten had their own methods. Kafu was proficient in face-to-face combat, similar to Luo Feng, and was completely dominated in their most adept area.

But Feather Emperor's style was entirely different.

"I know you want the World Envoy to assist in your cultivation." Feather Emperor looked coldly at Luo Feng, "Defeat me, and I can arrange for the World Envoy to cooperate with you."

Having once been besieged jointly by Mo Man, Jin, and Nai Gu, he was extremely embarrassed that time, naturally harboring some resentment towards other Lords in the Cultivator Camp.

"Please." Luo Feng said politely.

This battle was not a malicious fight for this layer of Destruction World, but rather a contest between the two! Feather Emperor did not call upon the World Envoy for assistance.

"Boom!"

Feather Emperor stood there, suddenly radiating endless light, shining throughout this layer of Destruction World. Luo Feng was also illuminated by this light, feeling the 'light' transform into countless threads, entwining and suppressing him.

Feather Emperor's large-scale domain was extremely terrifying, combining the power of Feather and Light, with the support of the mysterious land 'Feather Realm'. This domain's might was enough to halve the strength of a normal Ancestor.

"Boom—" Luo Feng moved, transforming into a blade light, instantly tearing through all luminous obstructions, passing by Feather Emperor as if he had completely sliced him apart.

Feather Emperor seemed to remain in his original place but appeared in another location, unharmed.

In terms of movement technique, he was omnipresent, on the same level as the Infinite Ancestor! Even with the added power of Blood Crane Territory, Luo Feng couldn't touch Feather Emperor in the slightest.

"His movement breaks through the time limit." Luo Feng frowned, the so-called omnipresence refers to 'the same time point', being able to exist at any of numerous positions! Position changes entirely by heart.

The Infinite Ancestor, back then, was able to save many ancestors during the wars between the two camps, despite the temporal suppression of Starlight.

"Only this move left." Luo Feng instantly unleashed his saber.

He swung the Sky Splitting Saber in his hand, and countless blade lights followed the life lock to strike out! In a moment, thousands of blade lights cleaved out, traversing through space and time, locking onto all Feather Emperor's energy around.

Every 'light' was slaughtered by these blade lights! Luo Feng continued to unleash truly terrifying, highly condensed blade lights!

In just two or three moments, the entire Destruction World

simultaneously existed with more than a hundred thousand massive blade lights! These huge blade lights occupied one-third of the Destruction World area, and chased from above and below!

Luo Feng's Primordial Blade Path ultimately wasn't perfected, but under the cooperation of the Primordial Life and Death Dao's 'life lock', each blade's energy wasn't strong! To know, when dealing with 'Kafu', a single blade contained one-tenth of the energy reserves.

Yet maintaining the life lock, the blade light's power was far weaker, though equivalent to some ordinary techniques of Mo Man and Jin! The key was that Luo Feng unleashed too many blade lights!

Too much quantity!

Luo Feng was entirely using sheer force to overpower! His energy reserves were enormous, and the energy reserves recovered in each moment were slightly more than the total energy reserves of Feather Emperor's entire body.

"No need to continue." Feather Emperor looked at the densely packed blade lights across the sky, each enormous and full of spirituality, destroying all 'light'. If he didn't release his domain, it would lock onto his true body, and he spoke, "Did not expect I couldn't evade Lord Luo Feng's blade."

In the Abyss of Destruction, with a continuous supply of energy, he could compete with Luo Feng.

But outside, he would have to flee within ten moments!

"If Feather Emperor wants to escape, it's just a thought to flee from my Blade Technique range." Luo Feng also understood his problem, his blade light chase had a range! Feather Emperor, Infinite Ancestor, they could cross many spaces in one step, eluding Luo Feng.

"Yes, only escape." Feather Emperor gently shook his head.

Nai Gu, Mo Man, and Jin teamed up to besiege him.

But Luo Feng alone forced him to only escape.

"I'll arrange for the Plane Envoy to besiege you." Feather Emperor immediately thought, summoning two hundred World Envoys from this layer of Destruction World to jointly besiege Luo Feng.

...

At this moment, on the 18th layer, the Infinite Ancestor also watched the entire battle clearly.

"I'm slightly stronger than Feather Emperor, but facing Luo Feng's pursuit with tens of thousands of blade lights, I still can't break it." Infinite Ancestor was quite troubled. In the Destruction World, he had energy supplementation to endure, but he was well aware that everyone compared in normal combat environments!

Truly going all out, Luo Feng could easily ignore them, break through all obstructions, and imprint a mark on the Shadow of Origin to control a layer of Destruction World.

No matter how well they stealth, they couldn't stop Luo Feng from slicing off eighty percent of Kafu's body in three cuts! It's only that Luo Feng wasn't interested in seizing the Destruction World, enabling a friendly competition.

"How to break it?" Infinite Ancestor began to ponder deeply.

However, over one epoch later, Luo Feng arrived at the 18th layer.

A match between both sides.

Infinite Ancestor still lost!

His style was the same as Feather Emperor, the only advantage being his 'Infinite Power'! The outburst was stronger, but Luo Feng could withstand the siege of dozens of ancestors with his formidable physique, now enhanced by the power of Blood Crane Territory, the Infinite Ancestor's attack couldn't affect Luo Feng at all.

Luo Feng's blade lights filled the sky! Life lock chased all Infinite Ancestor's energy.

Infinite Ancestor simply conceded!

...

Various forces and many ancient beings closely watched Luo Feng's series of battles, Luo Feng consecutively defeated 'Feather Emperor' and 'Infinite Ancestor', which was also within their expectations.

After all, in their hearts, they had already regarded Lord Luo Feng as the highest level of combat power.

On the 19th layer of the Abyss of Destruction.

Luo Feng arrived here.

"Luo Feng." Yuan grinned widely, smiling happily. He had led the entire camp to reach today's status from its weakest period in the Cultivator Camp! He had experienced too many frustrations, suffered much hardship. Having another Lord of 'highest combat power level' in the camp, Yuan couldn't be happier!

The stronger the lord, the brighter the future for his own camp.

"Incredible, Kafu, Feather Emperor, Infinite Ancestor, you can all defeat them directly," Yuan laughed. "Even I am not confident in defeating that Infinite Ancestor."

"The Infinite Ancestor is omnipresent; now I can only deplete his energy reserves," Luo Feng understood this well. He only mastered one supreme level of destruction power, and with life lock-in cooperation, the strength he could exert was limited.

If he had a complete Primordial Blade Path, in conjunction with the Primordial Life and Death Dao, his techniques would be much more.

"How long have you been a lord? You're already quite formidable," Yuan laughed. "Should I arrange for World Envoys to besiege you now?"

"Thank you, Elder Brother," Luo Feng nodded.

Soon, a total of 150 World Envoys appeared on this level and began to besiege Luo Feng. Luo Feng once again started to meticulously experience this latest kind of destruction power, sensing the

mysteries of destruction within it.

Although the 19 supreme levels of destruction power he has sensed to date mostly do not integrate the mysteries of life, he believed that insights can be gained from all aspects. Luo Feng's exploration of the mysteries of destruction still enhanced his accumulation in terms of destruction.

Luo Feng felt that his choice was correct.

The bottleneck encountered in comprehending the 'Primordial Blade Path' can be overcome by increasing 'destruction aspect accumulation' in the Abyss of Destruction, which is indeed efficient.

"I can feel it, my accumulation in the aspect of destruction should be sufficient," Luo Feng had this judgment in the midst of it.

"No rush, accumulation can never be too much."

"Each level of the Destruction World only consumes one or two eras of time. First, finish traversing the Abyss of Destruction," Luo Feng was in no hurry to leave the Abyss of Destruction; he could explore it fully before returning to the Cultivator Territory.

"It's strange to say; I've already reached the 19th level yet encountered no opportunity." This thought flashed through Luo Feng's mind, but he didn't dwell on it.

Unlike other existences who confidently explore, when he reaches each level, it's primarily to confront World Envoys! Naturally, the probability of encountering opportunities is much lower.

Regardless, the main purpose of coming to the Abyss of Destruction has been achieved.

Accumulation is sufficient! The next step is to integrate all accumulations and insights into one! Moreover, 'Heart and Dao Harmony' is required, perfectly merging one's mind into the Dao to achieve the Primordial Blade Path.

"Integration into one, Heart and Dao Harmony. These are the next two major hurdles."

Before coming to the Abyss of Destruction, Luo Feng wasn't clear about the obstacles on the path to the Primordial Blade Path. But now, he can definitively identify there are only these two remaining barriers.

"Elder Brother, withdraw these World Envoys, please," After more than one epoch had passed, Luo Feng said.

Yuan immediately withdrew them with a thought, laughing, "Ready to go to the next level?"

"I'll first retreat and train for a while on this level," Luo Feng said. He felt he had accumulated enough, and he would first attempt to integrate his insights into one! Even if he failed, he could go to the 20th and subsequent levels to continue accumulating and then try again.

Different accumulations will lead to different insights when attempting to integrate into one.

Yuan joyfully watched Luo Feng construct a cave mansion and begin his retreat and cultivation.

"I will also continue my cultivation," Yuan immediately returned to his cave mansion and became completely immersed, as he too was comprehending the origin system of the 'Primordial Rule Operation Path'.

...

"Hmm? Not coming to the 20th level?"

Ice Mountain Master was in the 20th level, ready for Luo Feng's challenge, but Luo Feng, who had stayed on the 19th level for more than one epoch, then withdrew the World Envoys and began retreating.

This made the Ice Mountain Master sigh with relief.

Because he knows he is no match for Luo Feng!

But as the leader of the Ice Peak Camp, he was reluctant to let Luo

Feng step on him to achieve fame, yet he could not prevent it from happening.

He had thought of different ways to maintain his dignity even in failure! Yet, when he was fully prepared mentally, Luo Feng didn't come for now!

...

In the 19th level cave mansion, Luo Feng retreated for cultivation.

Facing those World Envoys was easy for him; he casually made moves, sometimes even facing them head-on. Yet, at this moment, trying to integrate insights into one to fully form the Primordial Blade Path required him to experiment with powerful techniques repeatedly.

"Boom." With a casual flick of his finger, a sharp blade light tore through the heavens and the earth.

With a frown, lightly grasping with five fingers, five terrifying blade lights descended, forming a Blade Formation that annihilated all enemies within.

In this process of thinking, integrating, and attempting, the Primordial Blade Path became increasingly clear in Luo Feng's heart.

Luo Feng lightly tapped with a finger.

A point of blade light instantly pierced through the space-time obstruction of the entire 19th level Destruction World, even penetrating down to the 20th level, startling the Ice Mountain Master.

Suddenly——

A time-space fluctuation occurred, which swept over Luo Feng, causing the cross-legged sitting Luo Feng to disappear.

"Hmm?" The master of the 19th level, 'Yuan', was taken aback, "Suddenly a time-space fluctuation, and Luo Feng disappeared?"

"Luo Feng, what's going on?" Yuan immediately contacted Luo Feng's other avatars.

"I should have encountered an opportunity," Luo Feng replied.

"An opportunity?"

Yuan was stunned.

He recalled that long ago, Kafu also encountered an opportunity during the exploration of the 19th level Destruction World, entering a hidden space-time and obtaining that battle armor that accompanied him for endless ages.

"Kafu and Luo Feng both passed through here, stayed for a short time, and got opportunities. I've been residing here forever and even controlling this level; why haven't I ever encountered an opportunity?" Yuan felt somewhat bitter at this moment.

Chapter 451 - 29: Mountain of Destruction

Chapter 451: Chapter 29: Mountain of Destruction

Countless layers of time and space intertwine, sheltering the core. Additionally, an immense vortex of destruction power forms, surrounding that core, twisting and shattering time and space. The closer you get to the 'core', the smaller and more concentrated time and space become, and once caught, it's easy to get completely lost.

Luo Feng is currently being swept by a ripple of time and space, aimed at the core.

"Luo Feng, what's happening?" Yuan is currently contacting Luo Feng's other avatars.

Luo Feng gazes in awe at the distant core. This isolated time-space cuts off all connection with the outside! All time-space detection methods, life qi mechanism detection methods, causality detection methods, cannot detect this place.

"I think I've encountered an opportunity." Luo Feng responds, then carefully observes the core.

The surrounding vast vortex of destruction power contains countless mysteries, with destruction as the main essence, and life, matter, water, fire, wind, thunder, causality, darkness, earth, time, space, force, and other mysteries also integrated, ultimately forming an overwhelming and irresistible 'power of destruction'.

"What a terrifying power of destruction, even my body would be annihilated in just a few moments." Luo Feng briefly senses it and makes a judgment! Perhaps in the entire endless Primordial Space, only the 'Initial' stands a chance to withstand this terrifying power of destruction.

But the Initial cannot even reach here! It can't even hold the first layer of the Abyss of Destruction.

Luo Feng is swept by time-space ripples, and the destructive power naturally avoids him, not harming him at all! Even though the layersfolded time-space would take Starlight ages to decipher, Luo Feng is carried, continually approaching the core.

"I see it now."

Luo Feng finally sees, amidst the overwhelming destruction power, barely visible, a mountain! This mountain seems to be the source of all 'destruction', even his Sky Splitting Saber trembles slightly.

"So many weapons." Luo Feng vaguely sees various weapons stuck into the Mountain of Destruction; swords, spears, axes, and many other forms of weapons.

Countless destructive weapons are just a part of this mountain.

"Occasionally obtained destruction weapons when exploring the Abyss of Destruction should be nourished here." Luo Feng speculates.

Woosh!

Under the sweep of time-space ripples, Luo Feng gets closer and closer to the Mountain of Destruction.

"Boom."

When he finally flies out of the vortex of destruction power, the Mountain of Destruction appears clearly in front of him.

The mountain itself is pitch-black, with thick black mist flowing over its body. The weapons it nurtures emit some gloss, and most conspicuous are clusters of light, a total of 34 clusters on the

Mountain of Destruction, like 34 stars in the dark. Their lights converge and flow, resembling the veins of the 'Mountain of Destruction'.

"The third ultimate life form to arrive at the Mountain of Destruction, if you can pass the seven trials, you can control the Abyss of Destruction!" Luo Feng, upon reaching the outermost part of the Mountain of Destruction, receives a message.

Luo Feng is slightly surprised, eyes shimmering.

"Pass the seven trials, and you can control the Abyss of Destruction?" The entire endless Primordial Space doesn't know the origin core of the mysterious land 'Abyss of Destruction', nor how to control it.

Unexpectedly, as soon as he arrived here, he learned this secret.

"Besides me, two other ultimate life forms also know this secret." Luo Feng thinks.

"Kafu once encountered an opportunity in the 19th layer of the Abyss of Destruction and obtained that piece of battle armor. Other strong figures who explored the Abyss of Destruction have occasionally encountered opportunities, but never obtained anything too precious."

Only Kafu obtained something truly precious, which is known to the outside world.

"If Kafu has been here, it means there has been another strong figure here too." Luo Feng looks at the Mountain of Destruction in front of him, "If Kafu hasn't been here, then who are the other two ultimate life forms?"

"The other seven Lords of my Cultivator Camp might not have been here." Luo Feng thinks.

Regarding the information on the Abyss of Destruction, the seven Lords have shared their records, but none have recorded this place.

Either they haven't been here!

Or they've been here and kept it a secret!

"Starlight isn't one to be so petty, if he hasn't recorded here, he probably hasn't been." Luo Feng vaguely understands, strength alone doesn't ensure entry to this place.

To come here, there must be some screening threshold!

Counting himself, only three have been screened!

"Let's get a closer look." Luo Feng is quite curious about the 34 clusters of light on the Mountain of Destruction and immediately flies over.

At the foot of the Mountain of Destruction lies a vast land. As Luo Feng flies closer, the sense of invisible suppression grows stronger, and eventually, he has to land.

Like the mysterious 'Land of Eternity', where suppression is generally very strong throughout the vast area, the suppression within this hidden time-space of the 'Mountain of Destruction' in the Abyss of Destruction is much smaller and grows stronger the closer you get! Even the weaker Ancestors will be pinned down, unable to advance.

Luo Feng walks forward, his speed is extremely fast, and he also sees a 'mountain path'.

The 34 clusters of light on the Mountain of Destruction converge into veins, naturally shaping into a path that leads directly from the foot to the top of the mountain.

"With my strength, being suppressed means I cannot fly."

"Therefore, to reach the top of the Mountain of Destruction, one should only be able to go via the path." Luo Feng speculates, but of course, this is only speculation.

"Hmm?"

Luo Feng looked ahead.

At the foot of the mountain, there were seven sculptures.

The first sculpture was a massive bird of prey! The material of the sculpture was the same as the 'Mountain of Destruction', both made of black matter.

The second sculpture was a nine-headed giant snake, closely resembling the 'Infinite Great Serpent' clan.

The third sculpture was a misty form with an eye on its surface! It was very similar to the undying 'Hermit'.

The fourth sculpture was a large cube, but this cube was made up of 125 smaller cubes.

The fifth sculpture was a black star.

The sixth sculpture was a black mountain, very similar to the 'Mountain of Destruction'.

The seventh sculpture was actually a miniature 'Abyss of Destruction'. Within this miniature abyss, each layer had smaller sculptures, and Luo Feng could recognize them as Bawei Yu, Primordial Beast Ancestor... Wulan, Jin, Ming Huang, Mo Man... Mogus, Feather Emperor, Kafu, Infinite Ancestor, Yuan, Ice Peak Ancestor... Starlight, Sha Zhou!

"In history, those who have once controlled a layer of Destruction World, besides me, are all included in the seventh sculpture?" Luo Feng was shocked in his heart.

Hum——

Information came through.

Luo Feng immediately understood, these seven sculptures were the seven trials! According to the sequence, only by defeating the weaker sculptures could one qualify to challenge the stronger ones. Once all seven sculptures are defeated, one could control the entire Abyss of Destruction.

Luo Feng walked towards these sculptures.

"Boom!!!"

As Luo Feng approached a certain distance, the bird of prey sculpture suddenly erupted in terrible flames! Its eyes lit up, and its head tilted slightly, scrutinizing Luo Feng.

The endless flames from the bird of prey sculpture rushed in all directions, also impacting Luo Feng's body surface. Luo Feng's blood-red robe flapped fiercely, and a protective energy layer on its surface resisted these erosive impacts.

The bird of prey sculpture grinned.

Bang! The bird of prey sculpture was already upon Luo Feng, its movement resembling 'Feather Emperor' and 'Infinite Ancestor', omnipresent. So even though Luo Feng had the power of the Blood Crane Territory as an enhancement, he couldn't avoid this pounce.

The wings of this bird of prey sculpture, like a giant sharp blade, slashed onto Luo Feng's blood-red robe. The protective energy layer was torn apart, the blood-red robe shook, and Luo Feng's body slightly trembled, stepping back a pace.

His retreating step caused the ground to tremble violently, creating numerous cracks.

Immediately following, the giant claws of the bird of prey sculpture appeared out of thin air, already grasping towards Luo Feng's chest. Luo Feng extended a hand and caught this fierce claw. The fiery bird of prey struggled fiercely but couldn't break free. From within Luo Feng, ten billion eight hundred million units of origin energy erupted, with one hand grabbing the fiery bird of prey, hurling it fiercely against the ground!

"Boom!" Luo Feng smashed it into the ground with a single hand, but at the instant of 'smashing the ground', the bird of prey sculpture dispersed into endless flames.

Yet again, a giant bird's head appeared in front of Luo Feng, spewing terrifying five-colored flames, scorching Luo Feng's body! Luo Feng endured the five-colored flames, taking a step, his silhouette transforming into blade light, slashing through the bird's head.

The confrontation was extremely rapid!

The bird of prey sculpture gathered and dispersed unpredictably, omnipresent! The flames fierce and violent, the body immensely powerful!

"This bird of prey sculpture, although its techniques are clumsy, its power is extremely strong, comprehensively, it ranks within the top twenty in Endless Primordial Space." Luo Feng judged, "Comparable to the 'Infinite Ancestor' before breaking through. And this is only the first sculpture?"

In the brief exchange, each time Luo Feng cleaved open the flaming sculpture's body, he also identified the location of this bird of prey sculpture's energy core.

As the bird of prey sculpture re-converged—

"Slash!"

Luo Feng stretched out his hand, five fingers instantly emitting five dazzling blade lights.

Five beams of blade light descended majestically, forming a terrifying formation! The blade formation completely enveloped the area of the flaming bird of prey, and within it, the blade light tore through, finally reaching the core within the flaming bird of prey.

At the moment of contact, the flaming bird of prey completely dissipated.

Flames gathered not far away, re-forming into the original bird of prey sculpture! Motionless!

Luo Feng's scattered blade light was naturally absorbed by the ground beneath, forming a trace that Luo Feng also understood. Just like a seat in the Land of Eternity, after leaving a trace, he can directly transform and descend next time, without painstakingly traveling over.

The Mountain of Destruction is similar; passing the test of the first sculpture grants one the qualification to leave a trace, allowing direct

descent in the future.

"Hum."

As his own trace merged into the ground beneath, Luo Feng also felt as if the majestic Mountain of Destruction before him became much more intimate, and the originally intangible rule obstacles completely dissipated.

The 34 glows on the Mountain of Destruction, now without rule obstacles, also became incredibly clear.

These 34 glows, in their true form, are light clusters outlined by 34 types of highest-level secret patterns of the power of destruction.

Chapter 452 - 30: Waves of Emotion and Memory

Chapter 452: Chapter 30: Waves of Emotion and Memory

"The essence of the thirty-four forces of destruction is right in front of you!" Luo Feng observed carefully. The biggest purpose of coming to the Abyss of Destruction was to accumulate insights on the 'Destruction Path'.

Previously, he personally felt the encirclement of the World Envoys, pondering the mysteries of destructive forces himself. But his own speculations were not necessarily perfect. Unlike now, all mysteries are fully displayed before his eyes.

Although he has accumulated enough mysteries of the Destruction Path to reach the threshold of 'creating the Primordial Blade Path', the deeper the accumulation, the smoother the path to create the 'Primordial Blade Path'!

"These thirty-four light clusters, each contains all the mysteries of one type of destructive force." Luo Feng was somewhat surprised, "Moreover, they include the destructive forces from layers one to nineteen of the Abyss of Destruction."

"Could it be... could the entire Abyss of Destruction consist of exactly thirty-four layers?"

Luo Feng couldn't help but speculate, but he didn't care too much about it; his thoughts were more focused on these mysteries.

Luo Feng sat cross-legged, patiently observing and comprehending.

In the blink of an eye, thirty eras passed, and Luo Feng had grasped all those destructive mysteries in his heart.

"These veins?"

Luo Feng noticed the glow of thirty-four light clusters intersecting, forming veins throughout the Mountain of Destruction. These veins integrate the mysteries of thirty-four types of destructive forces, perfectly unified.

At this moment, Luo Feng thought of the Primordial's 'Life Core'.

The Life Core is formed by one mystery as the main and multiple mysteries as the complementary ones, forming a complete whole!

"Is this more like a 'Life Core' path in the direction of destruction?" Luo Feng vaguely sensed, "With 'destruction' as the main, compatible with multiple mysteries in the Life Core. Following the guidance of the Mountain of Destruction, theoretically one can explore thirty-four types of destructive forces and perfectly integrate them into a whole?"

Of course, this is the most perfect situation.

"This path is only suitable for Ancestors, not for us Cultivator Lords."

Luo Feng understood this point.

Ancestors are born with Life Cores in their bodies, which are naturally nurtured by the Infinite Primordial Space, allowing them to contain multiple mysteries. Containing dozens of mysteries is very common.

But Cultivator Lords need to comprehend by themselves! To understand a Primordial Level Dao is already a rare achievement.

"Indeed." Luo Feng pondered, "Mysterious places can nurture some highest-level powers. But no matter how special the mysterious place is, it cannot nurture a 'Primordial Level Dao'!"

Like the mysterious place 'Fire Prison Wall', twelve types of the highest level flame power have been discovered!

The Blood Crane Territory also contains three types: Blood Power, Undying Power, and Shadow Power.

Without a doubt...

All mysterious places, the maximum nurtured power is the highest level.

But 'Dao' is a collection of rules! It requires one's own insight and pioneering!

The Endless Primordial Space originally did not have 'Primordial Level Dao', it was only after the pioneers developed it that Dao existed!

While various powers exist innately!

"From this perspective, Ancestors and some mysterious places are relatively compatible, as they are born with Life Cores. Some are even born as 'Ancestors'." Luo Feng thought, "But we Cultivators are not so compatible."

"We Cultivators don't have Life Cores! We must start from nothing and create our own paths."

"But once a Dao is developed, one immediately becomes the highest level life form, immortal and undying. If one masters two Primordial Level Daos, one immediately rises to the pinnacle of the Endless Primordial."

Luo Feng still felt that the Cultivator Lords were stronger.

Cultivators rise from the lowest level, step by step to the pinnacle!

The lowest level Cultivators are insignificant in front of 'Low Level Primordial Life', unable to withstand even a breath.

The highest level Cultivators, however, have the ability to overpower all Ancestors.

Even if the power of Starlight and Sha Zhou is equivalent.

Sha Zhou is known for destruction! But Starlight excels in many areas, observing the past, present, and future! The control of time and space! Combining multiple layers, Starlight is much better than Sha Zhou.

"The fact that the Mountain of Destruction can lead me inside indicates that I, a Cultivator Lord, am also suitable to be its master." Luo Feng stood up smiling, bypassed the sculptures, and thoroughly explored the area around the Mountain of Destruction.

As long as sufficient distance is maintained from those seven sculptures, it won't trigger combat.

"This Mountain of Destruction nurtures quite a lot of weapons."

Luo Feng bypassed those sculptures, gradually approaching the Mountain of Destruction, and the weapons embedded on the mountain became more apparent, and the scenery on the mountain became clearer, with some twisted large trees faintly visible.

Finally, Luo Feng arrived in front of the mountain body of the Mountain of Destruction. At his current level, he couldn't discern any gaps in the material of the mountain rock. Its surface bears lines containing a hint of destructive flavor, and naturally condenses some black mist.

As an immortal and undying being, Luo Feng naturally dared to attempt everything.

"Buzz."

Luo Feng extended his hand and touched the rock of the Mountain of Destruction.

Buzz!

At the instant of touch, an endless cold killing intent instantly spread throughout Luo Feng's body, rushing into his spiritual consciousness! However, Luo Feng's spiritual will was also cultivated to an extremely strong level. Even when the Silent Extinction Ancestor and

others joined forces for a soul attack, they couldn't shatter Luo Feng.

At this moment, this cold killing intent brought pressure to Luo Feng's spiritual will, but he completely withstood it.

At that moment, Luo Feng felt many emotions of killing, hatred, with countless slaughter scenes appearing in his mind! Those were historical scenes of 'slaughter, destruction' that occurred in the Endless Primordial Space, all filled with incredibly intense emotions.

Love, hate, passion, enmity! Even the Innate Primordials are filled with intense emotions.

Of course, the richest of these emotions most often come from the Creatures of the Source Worlds.

Each Source World can give rise to so many lives! And most of these lives are short-lived, experiencing so many tribulations, countless among them have endured the repeated disasters brought upon by the Innate Primordials.

"Everything I have was destroyed by these Innate Primordials! Kill, kill, kill!" A Cultivator frantically charged toward a wisp of breath descending from a World-level Primordial Life.

For a World-level Primordial Life, a mere wisp of breath descending constitutes a catastrophe that countless creatures in a Source World find hard to resist! Even the strongest among them amount to nothing more than playthings for the World-level Primordials.

"To dare to raise a blade against me, you're quite brave indeed!" Thereafter, the twisted figure formed by that wisp of breath devoured the Cultivator.

"Why, why can't we resist? Why can we only await death?" Even as the Cultivator died, he was filled with unwillingness.

And there were beloved friends and family embracing each other, welcoming the arrival of the catastrophe together.

Indescribable love and reluctance! Really reluctant to let go! But what else can they do?

...

At this moment, overwhelming icy killing intent and countless scenes surged into Luo Feng's memory. Three parts were the killing intent of the Innate Primordials, and seven parts were the killing intent of countless Source World Cultivators. These Cultivators bore too much hatred, resenting the vast difference in power, resenting their own impotence! They cursed the injustice of the Great Dao!

"I am also a Cultivator."

"I consider myself strong enough, yet those World-level Primordials approach me only to die, and most of those Ancestors flee in disarray."

"But what can I do?"

Luo Feng's Spiritual Will can withstand the impact of the Mountain of Destruction's killing intent, but these intense scenes filled with hatred somewhat stimulated him. Although he had previously witnessed the miserable states of many Source Worlds from the 'non-Cultivator Territory,' merely watching and experiencing it firsthand are worlds apart.

Now feeling those overpoweringly intense emotions as though living through those scenes himself, it greatly impacted him as a Lord.

Luo Feng's eyes couldn't hide the killing intent!

"The Innate Primordial Camp, the Ice Peak Camp, including many weaker forces, as long as they are among the Innate Primordials of 'World-level Primordials' and some weaker 'Ancestors,' the Source World Origin is the best food for their Life Core growth."

"The eight Lords who aim to protect all Source Worlds will face far greater resistance than now!"

Luo Feng understood this point.

At that time, not only would they be unable to protect other Source Worlds, but even the current 'Three Thousand Six Hundred World Groups' might be implicated.

"Just like what Elder Brother said, our Cultivator Camp isn't strong enough!" Luo Feng touched the Mountain of Destruction's body, the killing intent and memory scenes gradually dissipating, no longer impacting his heart.

However, once a Cultivator Lord experiences it, he will never forget.

Touching the Mountain of Destruction this time, personally experiencing that endless killing intent, hatred, and countless scenes, all of it Luo Feng naturally kept in his heart.

"This Mountain of Destruction?" As the shock dissipated, Luo Feng touched the mountain's body and sensed new information, "On this Mountain of Destruction, precious 'Destruction Fruits' will condense. These Destruction Fruits can promote the growth of Ancestor Life Cores in the 'Destruction' direction."

"Each time a sculpture is defeated, one fruit is obtained. The more sculptures defeated, the more Destruction Fruits gained. Destruction Fruits can not only be consumed to promote Life Core growth but can also be used to exchange for treasures nurtured by the 'Mountain of Destruction'?"

According to the sensed information, he was eligible to take one Destruction Fruit, or he could choose not to take a fruit and exchange it for a treasure.

One fruit, used to exchange for a treasure... any one of them is more precious than the Sky Splitting Saber! All are among the finest from the vast weapons and treasures nurtured by the Mountain of Destruction, including battle armor and others.

"One fruit can select one item from 3000 treasures. This battle armor closely resembles Kafu's." Luo Feng found a piece of battle armor among the sensed treasure information.

"Kafu should be one of the three who came to the Mountain of Destruction; he didn't consume a fruit but chose to exchange it for this battle armor?"

Luo Feng pondered.

He doesn't have a Life Core, even if he takes away a Destruction Fruit, it would only be sold to other strong beings. From a strength perspective, Luo Feng still planned to exchange it for a suitable treasure.

"No rush, the more sculptures defeated, the more Destruction Fruits there are, the better treasures can be exchanged for." Luo Feng could feel that the Abyss of Destruction was guiding, trying to cultivate a truly supreme existence in the direction of Destruction!

Whether it's the 'veins' displayed by the Mountain of Destruction, or the Destruction Fruits, all guide the growth of Life Cores in the direction of Destruction.

"Based on clues, it should be me, Kafu, and Sha Zhou who came to the Mountain of Destruction." Luo Feng speculated, which he considered most likely! Sha Zhou only mastered two Highest Level Powers, yet her destructive power far surpassed the Endless Snake Ancestor and Ice Peak Ancestor, now occupying the 27th layer of the Abyss of Destruction!

Luo Feng had reason to suspect that Sha Zhou had been here and might have even consumed a Destruction Fruit! Otherwise, how could her combination of two powers be so perfect?

This Mountain of Destruction is indeed a great opportunity.

But the help it offers is even greater for Ancestors!

For Luo Feng, one can comprehend the mysteries of Destruction, two can accumulate Destruction Fruits to exchange for sufficiently powerful weapons and treasures. Three, these Seven Sculptures also make excellent opponents!

If completely defeated, there is even hope to wield this Highest Level Mysterious Land!

"The first sculpture already has the strength of the top twenty of the Endless Primordial Space. Let's see the strength of this second sculpture." Luo Feng, after touring the Mountain of Destruction and finding no other gains, actively approached the Seven Sculptures in

the distance again.

As he got closer to the Seven Sculptures, the bird sculpture still did not move, but the 'Nine-headed Giant Snake' sculpture of the second kind slowly awakened.

As the Nine-headed Giant Snake awakened, its body rapidly enlarged, and in barely a moment, its massive form extended over the entire land where the Mountain of Destruction resided, its serpentine body coiling over the ground more than a full circle, nine heads staring at Luo Feng.

The sheer formless dominance surpassed the 'Infinite Snake Ancestor'!

Luo Feng frowned slightly: "The second sculpture is already this strong? Did Kafu only defeat one sculpture?"

At this moment, Luo Feng realized the seven trials were much harder than he had previously anticipated!

Chapter 453 - 31: An Unfair Victory

Chapter 453: Chapter 31: An Unfair Victory

The nine-headed giant snake, coiling around the entire expanse of the Mountain of Destruction, observed Luo Feng.

"What a gigantic form." Luo Feng was secretly amazed. Size isn't always better. The Infinite Snake Ancestor can enlarge its body to rival a world cluster, but it doesn't have destructive power at that size.

Energy reserves are finite. Every lord or ancestor has an optimal size for combat. Deliberately enlarging can actually make them weaker.

"Its energy reserve is much stronger than the Infinite Snake Ancestor." Luo Feng could sense it.

"Boom!"

Without any warning, it was as if the whole world collided with Luo Feng, the terrifying momentum causing him to suddenly fly backward, plowing long furrows in the ground! Luo Feng's protective energy layer vibrated and distorted, and his blood-red robe showed some cracks.

"Such power! This is the most powerful opponent I've encountered so far." Luo Feng was startled, realizing he was struck by the serpent's body.

"Boom!"

Unable to perceive it, unable to resist it, Luo Feng was hit again!

The serpent's tail whipped onto Luo Feng, with a force equal to twenty or thirty ordinary ancestors' combined strike, sending Luo Feng flying!

"Boom!" "Boom!" "Boom!" "Boom!" "Boom!" "Boom!"

On the vast lands at the foot of the Mountain of Destruction, the nine-headed serpent, though huge, kept hitting Luo Feng repeatedly! He had no time to defend, no time to dodge.

Yet Luo Feng's defenses were strong. The terrifying force of the serpent was weakened after passing through the protective energy layer and the blood-red robe, unable to harm Luo Feng.

"Interesting."

Luo Feng allowed himself to be hit, remaining unhurried.

With his current strength, finding a close match in the entire Endless Primordial Space was incredibly rare! Especially with the 'Seven Sculptures,' once he defeated one, the next challenge would be even stronger.

Thus, Luo Feng cherished this 'nine-headed serpent' as an opponent!

He wasn't in a rush. He would rather spend more time understanding this nine-headed serpent thoroughly before defeating it with full strength!

"Huff."

After withstanding hundreds of strikes, Luo Feng was still unscathed.

Suddenly, Luo Feng felt the surrounding space change, and he found himself inside the body of the 'nine-headed serpent.' The body began to shrink, time and space began collapsing, trying to crush Luo Feng.

"This nine-headed serpent's methods are very similar to those of the Infinite Great Snake Clan." Luo Feng pondered, "It's practically the perfect form of the Infinite Great Snake Clan."

During the war between the two great camps, Luo Feng had seen multiple ancestor-level 'Infinite Great Snakes,' and he was also very familiar with the largest clan of the Innate Primordial Camp.

According to intelligence, the Infinite Great Snake Clan's strength lies in their ability to merge with each other! For instance, three world-level primordial perfect 'Infinite Great Snakes' can merge into a 'three-headed giant snake.' At higher primordial levels, due to the vast numbers, there were instances where nine Infinite Great Snakes merged into a 'nine-headed giant snake,' which is the clan's fusion limit.

"What stands before me is a nine-headed giant snake. Moreover, its body's secret patterns are more perfect than those of ancestor-level 'Infinite Great Snakes'! Its aura is even stronger than the 'Infinite Snake Ancestor'!"

"It's a more perfect version of the Infinite Great Snake than the 'Infinite Snake Ancestor.'" Luo Feng surmised.

"Each of the Seven Sculptures in the Mountain of Destruction has its origin." Luo Feng thought, "Does each sculpture have a prototype?"

The third sculpture is similar to the 'Hermit.'

The fourth sculpture is a massive cube formed by 125 smaller cubes, bearing great similarity to the 'Demon Ruins.'

The fifth sculpture is a black star. Some ancestors have a star shape, and even some mysterious places have a star shape...

"Especially the seventh sculpture, it's always changing." Luo Feng thought, "The seventh sculpture harbors all who control the Destruction World, apart from the 'Challenger,' like the Infinite Ancestor at the deeper level of 'Kafu.' It's known that the Infinite Ancestor surpassing Kafu is a recent event."

Undoubtedly, the seventh sculpture changes according to external circumstances.

"The Mountain of Destruction absorbs the killing intent, hatred, and intense emotions within the Endless Primordial Space." Luo Feng had

previously touched the Mountain of Destruction's surface and had been greatly impacted.

The Abyss of Destruction, this mysterious land, made Luo Feng increasingly curious.

Crack, crack, crack~~~

The nine-headed serpent used its body as a cage, like a world of cages, to bind and crush Luo Feng. However, Luo Feng's strong physical body withstood all crushing attempts.

"Its force is strong, but it seems somewhat clumsy?" Luo Feng noticed this.

Whether the first or the second sculpture, their power is terrifying. But in terms of combat techniques? They seem rather clumsy and direct.

"No need to continue."

Luo Feng realized that the nine-headed giant snake's clumsy techniques no longer warranted him holding back.

Instantly drawing his blade, an incomparably dazzling blade light sliced through, cutting through all obstacles, splitting the world in two! Naturally, it also severed part of the serpent's body!

"Slash!!!" Luo Feng stood his ground, showing no mercy. Beam after beam of blade light emerged, each blade light possessing the terrifying power of 'All Things Can Be Cut,' slicing the enormous, twisting body into dozens of pieces.

However, the dozens of snake parts quickly remerged, with minimal energy loss! The nine-headed giant snake instantly vanished, hiding deep within the Void.

"Ten Directions Extinction!"

Luo Feng sheathed his blade, then stretched out both hands!

Within him, ten billion and eighty million origins burned through

five percent of the energy reserve in an instant, releasing an endless surge of explosive energy. Under Luo Feng's spiritual will, these energies transformed into ten incredibly fierce 'blade lights,' each following through the ten fingers of Luo Feng.

The ten blade lights crisscrossed the endless void, forming a Ten Directions Blade Array, completely sealing off everything within the area where the Mountain of Destruction was located.

The surrounding world, all within the range of the Ten Directions Blade Array!

All things can be cut!

Extinguish all!

This is Luo Feng's insight into the 34 mysterious forces of destruction within the Mountain of Destruction, perceiving how these destructive forces intertwine, further advancing his 'Five Directions Blade Array' to the perfected 'Ten Directions Blade Array.'

Allowing five percent of the energy reserve to be sustained within the Ten Directions Blade Array, Luo Feng's current control over energy surpassed his strength when he first became a lord. Back then, he could only cause explosive 'Origin Great Destruction,' but now he perfectly controlled and condensed power into blade light without any dispersal.

"Buzz!"

Under the slaughter of the Ten Directions Blade Array, a dense black mist circulated on the surface of the Mountain of Destruction, resisting all slaughter. Even the six sculptures remained unmoved, unharmed under the blade array.

Only the 'nine-headed serpent' could not hide, even the Void was annihilated, and its massive winding body could not resist the terrifying blade light, shattering into thousands of pieces! Although it continuously reformed as one, the continuous grinding of the blade array finally reached its core.

Hua.

The nine-headed giant snake instantly dissipated, reforming into a sculpture at its original position!

Luo Feng stretched out his hand, and the vast blade light constituting the Ten Directions Blade Array flew back into his body. The energy consumption of the Ten Directions Blade Array was not great, and about eighty to ninety percent of the energy returned.

"Finally defeated the second sculpture." Luo Feng looked at the sculpture of the nine-headed giant snake and secretly sighed.

Once he unleashed his power, he managed to forcibly defeat this nine-headed giant snake head-on.

But Luo Feng clearly understood...

Even if Starlight took action, it might not necessarily shred this nine-headed giant snake.

"Although the nine-headed giant snake is foolish, its power is immense, comparable to the combined force of twenty or thirty Ancestors. Its body is extremely resilient; aside from me, perhaps only Sha Zhou could tear its body apart," Luo Feng thought.

Just the second sculpture was already so formidable! It forced me to give my all!

Luo Feng looked toward the third sculpture, which resembled the 'Hermit' figure, and immediately walked over.

Hum—

As he approached a certain range, the third sculpture, the 'Fog Sculpture,' began to flow slowly from its previous solidified state, and eyes formed on the surface of this fog to observe Luo Feng.

It glanced at Luo Feng.

Luo Feng then realized the world had changed!

Surrounded by white mist, the mist flowed around and over Luo Feng's body.

"Hmm?" Luo Feng's expression changed slightly as he realized every movement was incredibly strenuous, even walking was extremely hard.

"Fog Domain? And it's stronger than the domain of the Primordial Beast Ancestor?" Luo Feng was shocked; the Primordial Beast Ancestor was the strongest Ancestor within the domain of the Endless Primordial Space, yet the domain suppression of the white mist formed by the third sculpture was even stronger.

Every move Luo Feng made was immensely difficult.

"Cut!"

Luo Feng couldn't wield his blade, so the ten billion eight hundred million Origins within him burned, sending dazzling blade light flying from his body! These blade lights barely traveled a short distance through the fog before being completely worn down; the energy from the worn-down blade light was absorbed by the white mist, which remained vast and its energy did not weaken in the slightest.

"Boom~~~~"

Under the cover of the white mist, Luo Feng attacked repeatedly, even using some newly devised techniques. But the white mist was incredibly resilient, easily wearing down Luo Feng's blade light.

Even within this fog domain, the Ten Directions Blade Array could not be set up! The blade light would be eroded in a short time.

"Can't even fight!" Luo Feng felt helpless; he considered his techniques to be extremely powerful, but they simply couldn't dent the white mist, and this was only the third sculpture.

"Hua hua hua~~~~"

The endless mist suddenly began to contract.

Luo Feng could see with the naked eye that the mist's density quickly increased, and its constraint and suppression on him surged.

"What?" Luo Feng was surprised; earlier he could at least move and wield his blade.

But gradually, Luo Feng found moving difficult and was unable to wield the blade.

"Shh shh shh~~~"

The increasingly dense white mist wrapped around Luo Feng like liquid.

Its scope grew smaller and the constraint and pressure intensified! Luo Feng was unable to move, the white mist had shrunk into a stream, twisting around and strangling Luo Feng!

"Can't move at all." Luo Feng felt the restraint power was terrifying; weaker bodies would be shredded to pieces, but his own body was inherently resilient, and along with the 'Shadow Power' and 'Undying Power' from the Blood Crane Territory, he was barely resisting the terrible erosion and strangulation.

"No other techniques available."

Completely restrained and unable to move, Luo Feng was left with no choice!

He didn't expect that just the third sculpture would force him into this predicament, unable to use any blade techniques against this Hermit sculpture.

With a thought!

Luo Feng's physical body transformed into energy, merging with the ten billion eight hundred million Origins, which shone like a cluster of brilliant stars, forming a Formation!

With mastery of the highest level of 'Power of Breaking' and increased accumulation in the Destruction Path, the current 'Origin Great Destruction' Formation was naturally optimized, and its self-detonating prowess improved by roughly twenty percent compared to during the camp wars.

"Boom—"

The Formation formed by the ten billion eight hundred million Origins instantly transformed into energy that annihilated everything.

When pure energy breaches a certain limit, it creates a special reaction, causing all space-time to obliterate, and all matter to extinguish. The energy from this obliteration merges with the self-detonating energy, making the impact more terrifying.

Instinctively, the eyes of the 'white mist stream' that restrained Luo Feng showed a trace of astonishment.

Bang—

Too close! It completely restrained Luo Feng, being intimately close.

To pursue power, it kept shrinking.

This resulted in it bearing the most terrifying impact at the closest proximity.

Despite its resilience, it was torn apart; its energy core was struck, and at the moment of impact—this white mist stream naturally annihilated.

"Boom!!!" The aftermath of the explosion swept across the land of the Mountain of Destruction.

The energy post-explosion, guided by an invisible will, gathered back, coalescing into the image of Luo Feng in black robes! Leveraging the connection with the Mysterious Land's 'Blood Crane Territory,' new Blood Crane Territory energy continuously transmitted over, forming new scarlet robes on his body.

"Did I... did I win?" Luo Feng looked at the distant third sculpture forming, a bit stunned.

Winning against the third sculpture, he felt it was somewhat unfair.

——

Thanks to the Old Alliance Leader ’VERY’ for the reward!

Chapter 454 - 32: Leaving the Mountain of Destruction

Chapter 454: Chapter 32: Leaving the Mountain of Destruction

Every bit of energy Luo Feng possessed contained potent spirituality and his spiritual will. Even when unleashing the 'Origin Great Destruction,' he could still reclaim twenty percent of his energy reserve.

"I was lucky to win this time." Luo Feng, clad in a blood-red robe, reflected on the previous battle and had to admit that the "Third Sculpture" had comprehensively surpassed his current self.

According to the Ancestors of the Endless Primordial Space, reaching such a level, they would already be undying and immortal! No matter how much he utilized the Origin Great Destruction, it posed no threat.

It's because the Seven Sculptures were a test, they all had the "Energy Core" as a weakness, giving him the slim chance of victory.

"My blade technique still cannot match the power of 'Origin Great Destruction,' there's a significant difference." Luo Feng thought.

With his blade technique, Luo Feng was on the same level as Starlight and Sha Zhou.

But a move of the Origin Great Destruction's level could heavily injure the three Giant God Emperors and over twenty Ancestors! This move caused chaos in the Innate Primordial Camp's army, ultimately

deciding to cease fighting.

This time, Luo Feng again relied on this move to narrowly defeat the Third Sculpture.

Sadly, once such a move is seen, it won't foolishly work again.

"Sigh."

Luo Feng took a step forward, approaching the Mountain of Destruction, and reached out to touch it once more.

This time the touch again underwent hatred, killing intent, and numerous scenarios impacting his soul, which made Luo Feng's expression colder.

After enduring the impact, he sensed the Destruction Fruit, treasures, and other information.

"Now I can obtain three Destruction Fruits and can exchange them for other treasures. Treasures exchanged for three Destruction Fruits... are such treasures even exchangeable?" Luo Feng was quite surprised.

One Destruction Fruit can make a Life Core evolve in a 'destruction direction' to a certain extent, or it can be exchanged for a treasure on the level of Kafu's battle armor.

Treasures exchanged for three Destruction Fruits undergo a qualitative change! Enough to excite any Ancestor or Lord.

"Of the treasures exchangeable, there are six in total, choose any one of them."

"A seed, a stone, a drop of water, a cluster of flame, a blob of golden liquid, a ray of colored light."

These six treasures are mysterious lands yet to grow, considered in their 'embryonic' form.

The reason they haven't matured is that they each only nurture one type of highest level power.

That seed, in Luo Feng's perception, had an endless intense vitality and toughness! It contained a kind of supreme life power.

That stone was extremely stable and immovable. It contained some supreme defensive power.

The latter four corresponded to water, fire, matter, and light types of highest level power.

"These six treasures, though undergoing gestation in the Endless Primordial Space, haven't grown into true mysterious lands. But in their most primitive form, they can be refined and carried around." Luo Feng understood this from the sensed information.

A formed mysterious land, even a relatively ordinary one like the Blood Crane Territory, is enormous. It took Luo Feng ten eras to move it from its original position to beside the Origin Continent Origin World. Some particularly massive ones cannot be moved.

This 'embryonic' form mysterious land, however, can be carried around with no burden.

"A formed mysterious land, even if refined and controlled, only all its power can be utilized within its boundaries. Once outside...only partial strength can be borrowed from afar, increasing one's power by thirty percent at best."

"But this embryonic form, since it can merge into the body and be carried around, allows full power utilization."

Even if only nurturing one type of highest level power, once all power can be borrowed, it is still greatly beneficial to oneself.

Because it's borrowed! There isn't deep research into this power, unlike those Ancestors who delve into a type of supreme power for their whole lives. It is estimated that seventy or sixty percent of the power can be exerted.

"If I were to choose, I would definitely pick the one that aligns with 'life and destruction' more closely."

"My defensive ability is already strong enough, so I'd definitely prefer

the one strong in offensive capabilities."

The latter three treasures would all be helpful to me.

The supreme flame, paired with life and destruction, will surely enhance destructive power.

The golden liquid, flowing like a sharp blade, seems like a natural weapon.

It contains a kind of highest level matter power, which is also beneficial to me. The key is that in terms of enlightenment, beyond life and destruction, my third best area is the Dao of Matter. Of course, comprehending the Dao of Matter is hundreds of millions of times more challenging than life and destruction.

The ray of colored light contains some light power! Once mastered, I will possess the 'ubiquitous' ability, the blade technique will be omnipresent, and it should have the same 'certain hit' ability as Ming Huang. The blade power could also increase.

"In terms of power enhancement, the ray of colored light should help the most."

"But from a long-term perspective, from the angle of enlightenment, the golden liquid suits better."

Luo Feng thought for a moment.

"No rush, once I create the Primordial Blade Path, perhaps I can try to defeat the Fourth Sculpture. By then, obtaining another Destruction Fruit should allow for better treasures." Luo Feng contemplated for a while, then looked toward the Fourth Sculpture.

It was a giant cube composed of 125 smaller cubes.

"It should be much stronger than the Third Sculpture."

"I expect I would lose quite badly." Luo Feng predicted, but still walked towards these sculptures. While researching treasure information, his body had already returned to the pinnacle state.

Chapter 455 - 32: Leaving the Mountain of Destruction (Part 2)

Chapter 455: Chapter 32: Leaving the Mountain of Destruction (Part 2)

The previous three sculptures had completely fallen silent. The Fourth Sculpture, a massive cube, suddenly began emanating an aura, much stronger than the 'Demon Ruins' aura, with invisible waves locking onto Luo Feng.

Luo Feng wielded the Sky Splitting Saber, ready to face it with all his might.

...

Abyss of Destruction, 19th layer.

"Hmm?"

Yuan suddenly sensed a spacetime fluctuation, a familiar figure crossing time and space to arrive on this layer. At this moment, Luo Feng seemed somewhat desolate, with less than ten percent of his energy reserve remaining, extremely feeble.

"Luo Feng." Yuan immediately came forward, asking urgently, "Where did you go before, staying away for over thirty eras?"

"It was a hidden space-time in the Abyss of Destruction," Luo Feng said with a smile, "Later, I'll record all the information about this

hidden space-time and place it in the Land of Origin."

There's no need to keep this opportunity a secret from the other Lords.

However, the threshold for entering is extremely high. Including himself, only three so-called 'Ultimate Life Forms' have ever entered!

"Alright." Yuan nodded with a smile, still very curious about this opportunity.

Kafu and Luo Feng both encountered opportunities on the 19th layer of the Abyss of Destruction. As the master of this layer, he was naturally very curious about this hidden space-time, wondering why he had never been able to enter.

"Why is your aura so weak?" Yuan asked, "Is it very dangerous there?" He was well aware of how strong Luo Feng's defensive capabilities were, especially after mastering the Blood Crane Territory, his ability to preserve his life had significantly increased.

Yet now, with less than ten percent energy reserve, the weakness of his aura could hardly be concealed.

"It's not really dangerous, I ended up like this by pushing myself too hard," Luo Feng smiled, saying it was just a test there.

Yuan understood: "Are you planning to continue your seclusion, or proceed to the next layer?"

"I'll stay here for a while," Luo Feng said.

Yuan nodded and stopped disturbing Luo Feng.

Inside the Cave Mansion on the 19th layer of the Abyss of Destruction, Luo Feng sat cross-legged, his mind revisiting the scenes of his previous battle with the Fourth Sculpture.

He had lost terribly!

Crushed overwhelmingly! Completely powerless to fight back!

He could only rely on his defensive abilities to resist, but this kind of pure beating was very frustrating for Luo Feng. He found a single opportunity and unleashed an 'Origin Great Destruction,' but amidst the massive explosion, the enormous cube split into 125 smaller cubes and dispersed, with only 9 of them being annihilated, while the others remained intact.

And the 9 annihilated small cubes quickly reformed, completely undamaged. After unleashing the Origin Great Destruction, his power plummeted, ultimately being repeatedly struck by the 125 cubes. When his energy reserve dropped below ten percent, Luo Feng fled directly!

After leaving a mark on the Mountain of Destruction, he could descend with an avatar or go there in his True Body, and leave with his True Body!

Luo Feng was unwilling to be completely annihilated, so he chose to flee.

With close to ten percent of his energy reserve, he could recover to a Pinnacle state, which would take about fifteen minutes Earth time. If he were blasted into annihilation, recovery would be much more troublesome.

"My current true strength is much lower than that of the Third Sculpture. In front of the Fourth Sculpture, I have no power to resist," Luo Feng thought, "Trying to master the Abyss of Destruction is indeed extremely difficult."

In the Endless Primordial Space, among the top mysterious lands, mastering the refining difficulty of each is extremely high, and sometimes, the refining method can't even be found.

Luo Feng immediately split his thoughts and recorded the intelligence of the Mountain of Destruction, reserving it in the 'Land of Origin' for inspection by the Lords only.

...

"The latest intelligence on the Abyss of Destruction?"

Mo Man noticed this new intelligence the moment Luo Feng stored it, and began reading it.

Apart from the power details of the 'Fourth Sculpture' and the details of the combat process, Luo Feng detailed everything about the Mountain of Destruction.

"By passing the Seven Layers of Test, one can command the Abyss of Destruction?" Mo Man's eyes lit up, finally knowing how to refine and master the mysterious land of the 'Abyss of Destruction.' "Including Luo Feng, only three have ever entered?"

"The Seven Sculptures, the First Sculpture's power is comparable to the Infinite Ancestor before his breakthrough?"

"The Second Sculpture, comparable to two Infinite Snake Ancestors joining forces?"

"The Third Sculpture even suppressed Luo Feng?"

Lord Mo Man trembled slightly as he read this intelligence.

Though passing some tests could yield Destruction Fruits, which could be exchanged for treasures with great allure, the difficulty of these Seven Sculptures' tests was excessively high.

"Jin brother, take a look at this intelligence, recorded by our brother Luo Feng. You must find it very interesting," Lord Mo Man immediately contacted Jin.

"Hmm?"

Jin immediately began reviewing this intelligence.

He was indeed very interested in the Abyss of Destruction, each layer of the Destruction World contained a type of 'Power of Destruction,' and Jin always thought that the Abyss of Destruction was worth his effort.

"So, this is the method to refine and master the Abyss of Destruction," Jin reflected on the intelligence. "Seven Layers of Test, and the opponent in the first test is comparable to the past Infinite Ancestor?"

Jin’s heart shook.

Before the Infinite Ancestor’s breakthrough, he was on the 14th layer of the Abyss of Destruction, while Jin was on the 12th layer. Though the Infinite Ancestor had the advantage of being the ’initial settler,’ Jin had to admit that their strengths were quite similar.

"I probably can’t even pass the first test?" Jin realized the difficulty.

The mysterious land, naturally nurtured by the Endless Primordial Space, doesn’t understand what ’Primordial Destruction Dao’ is. It follows only one rule — the stronger the destruction capacity, the more it favors it.

According to the natural path it nurtures, Ancestors need to discover 34 types of destruction power along the ’path of destruction,’ as similar destruction powers provide little help. So these 34 types of destruction power incorporate the mysteries of dozens of Dao, and this path is enough to drive any ancestor to despair.

Chapter 456 - 32: Leaving the Mountain of Destruction (Part 3)

Chapter 456: Chapter 32: Leaving the Mountain of Destruction (Part 3)

The Cultivator Lord, Starlight created two Primordial Level Daos, while Jin created one Primordial Destruction Path, yet none could enter that hidden space-time.

It shows that even the entry threshold is extremely high.

The difficulty of mastering it is even more unattainable.

As a mysterious land without consciousness, it won't even consider whether the difficulty is too high because everything is a natural evolution.

"Kaf Xiu and Luo Feng were both led into the 19th layer of the Abyss of Destruction. Perhaps being able to reach the 19th layer is the minimum strength threshold?" Jin pondered.

"Kaf Xiu, Luo Feng, and Shazhou, all mastered a supreme Power of Destruction. So at least mastering one 'Power of Destruction' is also an entry threshold?"

In the intelligence recorded by Luo Feng, it was confirmed that Kaf Xiu had been inside! Because that battle armor and the Mountain of Destruction could be exchanged like treasures. There is also a strong suspicion that 'Shazhou' had been inside.

Since the ones stronger than Kaf Xiu, who also mastered the power of destruction, are only 'Demon Ruins' and 'Shazhou.' Demon Ruins were born this strong, without obvious enhancement. Shazhou, however, had a growth period, growing to the pinnacle of the Endless Primordial Space.

"I wield the Primordial Destruction Path, and the power I unleash is the highest level of the Power of Destruction."

"The only issue is that my strength is insufficient," Jin contemplated.

The Ancestors pursue the mining of more power.

The Cultivator Lords pursue the creation of more Daos.

"My Primordial Destruction Path is nine parts destruction and one part life. I have my own understanding of life too," Jin thought. "But the mystique of life I understand... is not enough to form a 'life-dominated' Dao."

To comprehend a Dao, the required insight is immense.

Before breaking out of the cage, Luo Feng had already realized the Primordial Life and Destruction Dao with 'seven parts life and three parts destruction,' his destruction insight was profound. Even after becoming a lord, one must still go to the Abyss of Destruction to enhance destruction accumulation.

As for Jin, even the accumulation of understanding is far from enough.

"I am even less proficient in comprehending other mysteries." Jin felt powerless; cultivation is just like that.

For some strong individuals, reaching the World-level Primordial is already their limit.

For others, realizing a Primordial Level Dao is their utmost.

Compared with those unable to break out of the cage, they are already very dazzling, but ultimately they have their limits!

Even beings like Starlight and Luo Feng, who break laws with force, have their limits!

...

Luo Feng, in the 19th layer of the Abyss of Destruction.

Luo Feng calmed his mind and gazed at the outside world.

His gaze pierced through endless space-time, following causality, seeing domain after domain, the territory of the Innate Primordial Camp, the territory of the Ice Peak Camp, and the territory of some weaker forces.

"I have come into contact with countless killing intents and hatred on the Mountain of Destruction, with many memory scenes, almost experiencing them first-hand."

"These scenes are countless; many occurred long ago. Yet, some disasters are still ongoing."

"There are 3916 disasters currently ongoing."

Luo Feng sat cross-legged and instantly sent out 3916 thoughts, descending upon those domains, with each thought starting to gather power and gradually growing.

For any of these domains, just traveling would take tens of days or even longer! To simultaneously change 3916 calamities, the true body would not make it in time; only avatars can descend and grow.

The 3916 thoughts, gathering power and slowly growing, took about 15 Earth hours to all grow to the 'one ten-thousandth' energy reserve form of Luo Feng's true body, a form strong enough to sweep and annihilate any World-level Primordial.

"Action."

Killing some World-level Primordials, Luo Feng naturally wouldn't hesitate.

black-clad Luo Fengs acted simultaneously.

Chapter 457 - 33: Luo Feng?

Chapter 457: Chapter 33: Luo Feng?

A massive creature with hundreds of slender appendages lay atop a Source World, much like a small ant resting on an egg.

It cautiously extended a sliver of power into the Source World, fearing that too much commotion could slay the countless creatures within. Its power meticulously orchestrated disasters to absorb the 'fear' emotion of these creatures.

"These Source World creatures, though so weak, possess immense wisdom and intense emotions." It absorbed the fear emotions, integrating them into its life core.

Previously, the Innate Primordial Camp's invasion of the Cultivator Camp to seize Source Worlds was extremely barbaric, focusing mainly on devouring the 'Source World Origin'! The value of countless Source World creatures was only partially utilized.

Such as allowing 'Mogus' to consume the souls of over six million Source World creatures.

In a war context, resource utilization efficiency was low.

However, in the 'World Groups' within their own territory, every Source World was utilized to its utmost resource limit!

The emotions, desires, physical bodies, souls of Source World creatures, these are all resources! The 'Source World Origin' is the most precious resource and must be used most sparingly.

"No, no, nothing can resist it! I can create Universes, yet still I cannot

oppose disasters!"

"Why?"

"No—"

A Universe Group within the Source World faced its ultimate catastrophe, after countless struggles and failures, it met its end in complete despair... utterly annihilated.

And this Universe Group was merely the tip of the iceberg of the entire Source World.

Outside the Source World, that massive creature waited patiently, intending to maximize the 'fear' emotion of these creatures for optimal sustenance.

Furthermore, it sought to 'sustainably' consume! Dividing the entire Source World into multiple regions, leading each region in turn to be consumed, and once all regions were consumed, the first regions would begin to nurture new life...

Continuously, continually contributing power to it.

"My achievements allow me to enjoy the Source World creatures for one hundred thousand epochs. But the Source World's origin must not be touched." This World Level Primordial understood this clearly.

The Source World's origin is usually the most valued food for the 'World Level Primordial' and even some Ancestors.

"Hmm?"

The World Level Primordial was startled to see a black-clad man appear in front of it out of nowhere.

Seeing the appearance of this black-clad man, it felt fear deep from within.

"Cultivator Lord!"

As a core member of their race, it received the attention of the

Ancestors and knew about the most terrifying existences in the Endless Primordial Space. The eight Cultivator Lords were something their entire race dared not provoke.

Whoosh!

A ripple passed over this World Level Primordial, immediately ending its vitality and causing instantaneous death! At the moment of death, its physical life core remained intact.

Yet there was not a trace of vitality left.

Even Luo Feng's avatar, using only a ten-thousandth of his reserves, needed to take action to extinguish the World Level Primordial. If it were his main battle avatar, a mere gaze could obliterate these World Level Primordials.

Luo Feng waved a hand to collect the World Level Primordial's corpse. At his level, opening a space with a thought to store countless corpses was effortless. If Luo Feng wished, with slight effort, he could create world after world.

The entire Cultivator Camp consisted of billions more worlds than the Source World, all created by the Lords.

Mastering the highest level of the 'Dao', their Dao could easily become the origin of a world. However, the life nurtured by innumerable worlds had significantly less potential compared to that of the Source World.

"This Source World..." Luo Feng gazed upon this Source World, and with a single thought, a weak avatar manifested within.

His avatar allowed the Source World's rules to suppress it, restricting its power to the 'Primal Chaos Realm's limit'.

If one resisted the 'Source World Rule Suppression', violent conflicts could easily trigger an energy storm capable of destroying all creatures within the Source World! The same applied to those World Level Primordial lives; when facing an ownerless Source World, they could forcibly take action! They could even slowly absorb the Source World Origin.

...

Inside the Source World.

Luo Feng's Primal Chaos Realm-level avatar stood in a void, gazing at the distant Universes.

"The interior of this Source World has been deliberately destroyed! The central continent has long been shattered, giving birth to over a million Primordial Universes." Luo Feng observed that this Source World lacked a core akin to the 'Land of Origin', consisting entirely of individual Universes.

The energy was too dispersed, easily nurturing over a million Primordial Universes, yet the creatures were generally very weak.

The strongest creatures were only at the eternal true god level.

And upon reaching the eternal true god level, they were soon faced with a crisis of death!

"A million Primordial Universes, all creatures, are merely food for the Innate Primordials." Luo Feng's gaze was icy.

Luo Feng beckoned.

A white-haired woman appeared beside him, vigilantly watching Luo Feng.

"Who are you? Are you here to kill me?" she asked Luo Feng. "I know, once I take the final step, the crisis of death will soon arrive. But even in death, I want to know the truth."

Luo Feng looked at her with admiration, praising: "You are exceptional."

The white-haired woman remained extremely cautious.

For she had risen from weakness step by step, experiencing too many terrifying events! Sometimes what seemed a surprise was actually a greater fear of despair. As her power grew, so did her sense of hopelessness, seeing no possibility of transcendence at all.

"An eternal true god, but with a spiritual will capable of reaching the threshold of a Godly King." Luo Feng remarked with admiration, "When I was at the eternal true god stage, I was only like this."

The white-haired woman looked at Luo Feng, silently listening.

Perform, just keep performing!

I will never trust any 'surprise'! Always consider the 'most terrifying' possibilities when viewing all events.

"Your telepathy method is quite unique, severing the self-spirit? And you've done it three times in a row?" Luo Feng glanced over, seeing all of the white-haired woman's life from birth till now, with complete clarity.

Before him appeared the true body of the one called 'E Xu', who had also split out three avatars, her self-created 'Heart Cutting Cultivation Method' allowing her to possess a Godly King level spiritual will even at the eternal true god stage.

To know, her pain, her despair, her intensely strong emotions... could be absorbed by the core of the Abyss of Destruction, 'Mountain of Destruction', all are indescribably intense emotions.

"Who are you?" The white-haired woman slightly frowned upon hearing someone see through her heart-cutting.

"This source world is within the territory of the Innate Primordial Camp, I can't always protect it." Luo Feng looked at her, this little girl E Xu was too cautious, so Luo Feng immediately sent an imperceptible wave affecting the woman, "You are excellent, so I will take you away, and I can help you take away a universe's creatures."

The space opened by his weak avatar can at best carry away the creatures of one universe.

Under Luo Feng's voice fluctuation, E Xu naturally trusted fully.

She quickly chose a universe and also migrated some friends.

"Hoo."

Soon, the primal chaos realm avatar of Luo Feng executed the secret technique, sending all the creatures of the source world through 'Boundary Breaking Transmission', delivered to the avatar outside the source world with one ten-thousandth energy reserve.

"Let's go." In Luo Feng's avatar's sleeve, there naturally opened a normal world to easily bear one universe's creatures.

Luo Feng, carrying E Xu, flew away.

E Xu firstly saw Luo Feng's robe sleeve could hold a Primordial Cosmos creature, and then saw them traversing countless space-times at an unimaginably fast speed.

Luo Feng glanced at her, and a large amount of information instantly flooded into E Xu's mind, it was the situations of the cultivator camp and other camps, also allowing 'E Xu' to understand the current circumstances.

"Your spiritual will has quite potential, would you like to become my registered disciple, Luo Feng?" Luo Feng looked at her.

"The disciple is willing." E Xu said, excitedly.

Luo Feng nodded.

...

Luo Feng's 3916 avatars were all moving, some fast, some slow, those intense emotions absorbed by the Mountain of Destruction, represented spiritually strong individuals! Unfortunately, many of these potential juniors were already dead, only their numerous clansmen still persevering.

According to Luo Feng's estimate, this action might be able to recruit over a hundred registered disciples.

"Hmm?"

A serpentine great snake clung to a source world, it was indeed an Infinite Great Serpent, slowly absorbing the Source World Origin.

Having started absorbing the origin, the inside of the source world was already in ruin.

This serpentine snake looked into the distance.

In the distance appeared a silhouette of a man in black.

"Arrived late." Luo Feng slightly frowned, taking less than one day to condense an avatar was still a bit late.

"Lord Luo Feng?" This serpentine snake recognized Luo Feng and fearfully bowed its head slightly, "Greetings to the great Cultivator Lord."

Though it was a noble member of the Innate Primordial Camp's largest race 'Infinite Serpent' clan member, when alone and encountering a cultivator lord, the only action was to be respectful, seeking a slim chance of survival.

At this moment, the surrounding space-time seemed to solidify, all life qi mechanisms were locked, this snake could feel, it wouldn't be able to transfer back to its home infinite world.

"Lord Luo Feng, I am from the Infinite Race..."

Whoosh.

A ripple, the World-level Primordial's infinite snake's eyes dimmed, its vitality severed.

"Who! Who dares to kill my clan member!" An enraged voice transmitted through distant space-time, furthermore, space-time wave distortions twisted, at the other end of the twisted space-time, a massive silhouette resided within the infinite world.

Luo Feng in black clothing, looked over coldly: "It is I!"

"Luo Feng?" That massive silhouette had intended to use the infinite world to descend across space-time, yet upon seeing that black-clothed silhouette, its heart trembled.

That was Luo Feng!

With just three strikes severely injured Kafu ranked in the top ten!

Power enough to suppress any ancestor of the innate primordial camp!

The whole Endless Primordial Space, known as one of the top-tier existences!

Moreover, it wasn't long since he became a lord! His growth too ferocious!

"Lord Luo Feng, what's the reason? Why did you kill my Infinite Race clan member?" The massive silhouette's voice softened considerably.

Luo Feng coldly looked at him, already vexed by arriving slightly late, a weak ancestor still nagging at him.

"Are you questioning me for a reason?" Luo Feng stared at it.

The massive silhouette dared not argue further, twisted space-time returned to normal.

"A bunch of trash!"

Luo Feng's gaze was icy.

In the Innate Primordial Camp, only five were truly undying and undying! The other over a hundred ancestors all potentially mortal!

"My Heart of Destruction, is still not strong enough." Luo Feng murmured.

Chapter 458 - 34: Heart Honing

Chapter 458: Chapter 34: Heart Honing

In a vast region, here, dazzling divine light illuminates everywhere, causing space-time to collapse and twist into a gigantic space-time maze.

Inside this twisted space-time maze, at the source of the dazzling divine light, there is an enormous figure with eight hoofed feet and sixteen multicolored eyes observing multiple space-times.

He is Bawei Yu, a powerful existence ranked among the top thirty in the Endless Primordial Space.

"Who killed my clan member?" Bawei Yu sensed something, and an uncontrollable rage surged through him. For any tribe, a world-level Primordial is considered a core member! A name on the Ancestors' key focus list.

Bawei Yu followed the sensation and gazed into the distance.

In terms of Void mastery, he is among the top ranks and could immediately see the place where his clan member perished, where a man in black clothes with black hair was standing.

Bawei Yu's heart trembled.

"Luo Feng?" Bawei Yu instantly calmed down.

"Why did he kill my clan member?" Bawei Yu was puzzled. His sixteen eyes were watching that area from a distance, observing everything that happened in the past.

He clearly saw his clan member devouring a Source World Origin and encountered Luo Feng during the process. The moment Luo Feng descended, he annihilated that world-level Primordial.

"Was it because my clan member was consuming the Source World Origin, so Luo Feng came to kill him?" Bawei Yu pondered, "But this is my clan's territory! These Source Worlds are food for my clan. Facing such fatal disaster for consuming food?"

"These Cultivator Lords all originate from within the Source World! They care about every single Source World... Is that why they took out their anger on my clan member?"

"But they have already occupied 3600 World Groups, and still not satisfied?"

Bawei Yu knew very well that the Cultivator Lords have been striving to expand their domain.

From the beginning with just one lord, 'Yuan', as more lords emerged, the Cultivator Territory continuously grew! Now with Luo Feng, the newly advanced lord, who is terrifyingly powerful, has already ranked among the strongest in the Endless Primordial Space!

"Do they want to expand their territory again?" Bawei Yu pondered.

If the death of a clan member had been at the hands of other Ancestors or other world-level Primordials, Bawei Yu would not rest easily!

However...

Since it was Luo Feng, the leader of the Cultivator Camp, who acted, Bawei Yu decided to turn a blind eye.

No choice, as a weak force, Bawei Yu couldn't afford to provoke the Cultivator Camp!

"If the Cultivator Camp truly wants to expand its territory, the ones who will have the most trouble are the Innate Primordial Camp and the Ice Peak Camp." Bawei Yu thought, "I'd better keep my distance."

...

"Such boldness, who dares to kill my clan member?"

The Thousand Eyes Ancestor was shocked and angry. Being a friend of 'Silent Extinction Ancestor,' one of the Nine Emperors, it held a considerable status within the Innate Primordial Camp. Its clan only had a few dozen world-level Primordials, each highly valued by it.

In the vast territory under its command, there were also numerous world-level Primordials from other races! If world-level Primordials of other tribes perished, the Thousand Eyes Ancestor could handle it calmly. But this time, the one who died was a 'world-level Primordial of its own clan,' naturally infuriating the Thousand Eyes Ancestor.

The Thousand Eyes Ancestor followed the sensation and gazed from afar, wanting to see who dared to kill its clan member.

Thus, it saw that black-haired, black-clothed figure.

The enraged Thousand Eyes Ancestor immediately calmed down.

"Luo Feng?"

The Thousand Eyes Ancestor whispered, "These Cultivator Lords are truly unscrupulous!" It didn't dare seek trouble with Luo Feng and promptly informed its friend, Silent Extinction Ancestor, of the news.

The Nine Emperors are the highest ruling echelon of the Innate Primordial Camp.

...

With 3,916 avatars, Luo Feng killed about 3,000 world-level Primordials in a short time, around 500 from some weak forces, about 800 from the Ice Peak Camp, and about 1,700 from the Innate Primordial Camp.

The weak forces endured it, as the losses, relatively speaking, were minor.

"What is this Luo Feng doing?" The Ice Peak Ancestor on the 20th

floor of the Abyss of Destruction, originally waiting for Luo Feng's challenge, received the news that many of Luo Feng's avatars acted across various domains, annihilating quite a few world-level Primordials.

The death of around 800 world-level Primordials did not concern the Ice Peak Ancestor.

After all, more than 90% of these world-level Primordials were not the clan members of the Ancestors! For one race to produce an 'Ancestor' is extremely difficult.

In the Endless Primordial Space, there are over 30,000 world-level Primordial races! With barely over 200 Ancestors!

"He's not solely targeting the Ice Peak Camp but all world-level Primordials acting against 'Source World.'" The Ice Peak Ancestor quickly discovered this fact.

"These lords are all very concerned about those Source Worlds."

The Ice Peak Ancestor, annoyed.

Whenever a Cultivator Lord is born, their power can stabilize within the top twenty. Yet, each of them is undying and undying.

It should be noted that out of the top twenty, the Cultivator Camp occupies eight!

Thankfully, the Cultivator Lords are not greatly covetous of 'resources' and do not frantically plunder numerous resources. This is also why the Ice Peak Camp and the Cultivator Camp have historically had good relations.

But as the Cultivator Camp continues to grow stronger and more lords emerge, the Ice Peak Camp is also feeling the pressure.

"The Innate Primordial Camp occupies the most expansive territory, let the Innate Primordial Camp and the Cultivator Camp fight." The Ice Peak Ancestor silently watched and endured.

...

"Killed nearly 1,700 of our world-level Primordials?"

"All encountered Luo Feng's avatars while acting against the Source World?"

The Infinite Snake Ancestor, having understood the situation, was also quite frustrated.

"These Cultivator Lords kill as they please! They often intervene even with Source Worlds outside their domain." The Infinite Snake Ancestor had encountered such situations many times.

Like the Starlight Lord and Lord Mo Man, they frequently recruit some talented cultivators from countless Source Worlds outside the Cultivator Territory! While recruiting, they often crush some world-level Primordials acting against the Source World as well.

It must be known that the Cultivator Camp has collected the bloodlines of all 'world-level Primordial' races! Over 30,000 races, 100% documented! Mostly achieved by the Starlight Lord.

The Starlight Lord, in order to document the bloodlines, once caused great panic among all world-level Primordials throughout the Endless Primordial Space!

Especially in some races that only have one world-level Primordial! Even more terrified!

"This Cultivator Camp, in the end, will become a significant threat!" The Infinite Snake Ancestor last attempted to push the entire camp into a large-scale war, but it ended as Luo Feng broke through.

Now, merely killing such a small number of world-level Primordials?

This won't even trigger a large-scale war!

After all, as opposing camps, small-scale conflicts often occur under normal circumstances.

"Luo Feng's strength already rivals Starlight and Sha Zhou. Even if a hundred ancestors from our side join forces, we can't be sure of defeating the entire Cultivator Camp." The Infinite Snake Ancestor

was quite troubled.

"Unless, unless we join forces with the Ice Peak Camp."

The Infinite Snake Ancestor immediately rejected the idea.

In terms of conflicts, the inherent conflict between the Innate Primordial Camp and the Ice Peak Camp is even greater!

The Cultivator Camp only cares about the Source World! They place far less importance on other resources.

The Ice Peak Camp, however, competes for all the resources needed by the Innate Primordials! The enmity between the two sides has lasted for endless ages!

******

Innate Primordial Camp Territory.

The black-clad, black-haired Luo Feng stood in the void, looking at a Source World ahead. In his vision, the past history and past sufferings of this Source World unfolded one by one.

He saw that this Source World once flourished, with myriad forms of life and the Myriad Clans vying for supremacy.

Just like his hometown Source World, there were also human-like clans and other races, all creatures within this Source World. Their cultivation systems influenced and borrowed from each other, exploring as they progressed forward.

Among them, Primal Chaos Realm had also been born!

But afterward, a World-level Primordial came...

"Everyone died, all the creatures of a Source World perished."

Luo Feng looked at the past of this Source World.

After becoming a Lord, Luo Feng had long been able to see beyond the Cultivator Territory, to see numerous Source Worlds beyond the

dominion, and to see the hardships those Source Worlds had endured.

Every time, Luo Feng felt both angry and oppressed; reason told him that only greater strength could change the situation. In the past, he was unwilling to watch for too long.

Because it was indeed too tragic.

Both the countless creatures inside the Source World and the Source World itself were mere food.

The combined strength of the eight Lords was still insufficient to change it all. So, he couldn't bear to keep watching.

But now...

Luo Feng continued to watch.

He even watched the histories of these Source Worlds, carefully observing every bit of suffering.

As he watched, scenes of tragic and oppressive moments filled Luo Feng's heart, and his murderous intent within kept rising, the flames of his anger burning ever hotter! Luo Feng seemed to be forging a weapon, and this continuously accumulated murderous intent and anger were refining his 'heart'.

"My Heart of Destruction is still not strong enough!"

During his first contact with the Mountain of Destruction in the Hidden Space-Time of the Abyss of Destruction, he was struck by endless murderous and hateful intent, and memories surged into his mind as if he were personally experiencing them.

That incident triggered Luo Feng, intensifying his murderous intent.

He seemed to transform into each sufferer, going through countless despair, filled with endless hatred towards those Innate Primordial Lives!

At that moment, Luo Feng realized...

He had found a path to 'forge his Heart of Destruction'!

His Heart of Destruction was indeed not strong enough!

After all, he became the highest-level life form in the Endless Primordial Space, an Immortal Lord! He had also turned the tide of the Cultivator Camp's wars, protecting the 3600 World Group. Most crucially... his hometown Source World, with all those beloved friends and family that he cared deeply about, could all be revived from the rivers of time.

Everything about his hometown Source World was what he cared about the most.

When they could all come back to life, Luo Feng was exuberantly happy, and with his heart filled with joy, his Heart of Destruction naturally became less intense.

As for the countless Source Worlds beyond the Cultivator Territory... in the end, he was just a bystander! Though a bystander might be angry, it falls far from forging a 'Heart of Destruction'.

Only upon touching that Mountain of Destruction did he truly feel...

That it was a personal experience, which truly stimulated Luo Feng.

"The Origin Continent Origin World is the most important to me, the place where I guard with my life."

"But outside the Origin Continent Origin World... in what way are other Source Worlds different? They are all the same Source World creatures."

"Because my strength is not enough, I cannot protect the innumerable Source Worlds beyond the territory."

"In the future, if my strength is not enough, even the 3600 World Group could be flattened!" Luo Feng understood this well, because not long ago, had he not broken through, the Innate Primordial Camp might have achieved their goal, flattening the entire Cultivator Territory.

"If the 3600 World Group is flattened, could my hometown Source World survive alone?"

The Endless Primordial Space has never been a safe haven.

The Cultivator Camp is also in competition with other camps, and those Ancestral Beings are more numerous and can give rise to some extremely powerful existences as well.

All parties are competing!

If we do not advance, we retreat!

If satisfied with the current strength, someday in the future, should a potent individual master the highest-level Mysterious Land and flatten the Cultivator Territory with invincible power, annihilating the hometown Source Worlds of all Lords?

Even if I am immortal, what then? If my hometown Source World is destroyed and all beloved friends and family are gone? For me, it would be endless torment.

"With blood and fire, eliminate all enemies."

"With endless destruction, protect the lives of the clan."

Luo Feng's 3916 avatars walk through different territories, observing Source Worlds one by one, watching all that happened in the past.

Those scenes of suffering told Luo Feng.

If the Heart of Destruction is not heavy enough, I cannot protect what I wish to protect!

Numerous Source Worlds had experienced suffering in the long years past, devoutly watched by Luo Feng, as every bit of suffering was etched deeply into his mind. These sufferings seemed like pieces of firewood, fueling the 'fire' in Luo Feng's heart to burn ever brighter, and this 'fire' was refining Luo Feng's Heart of Destruction.

And in the Hidden Space-Time of the 'Destruction Mountain', Luo Feng also sent down an avatar.

The avatar sat cross-legged next to the Destruction Mountain, occasionally reaching out to touch it, feeling that endless murderous and hateful intent, as if becoming a creature that died with endless grievances, experiencing everything they had once gone through.

Chapter 459 - 35: Desire in the Heart

Chapter 459: Chapter 35: Desire in the Heart

Time flows by.

Luo Feng, with black clothes and black hair, walks within the Endless Primordial Space, gazing into the distance. His eyes fall upon a Source World, within which the 'Sea of Chaos' nurtures countless Small Universes, each containing numerous 'Plane Worlds'.

Luo Feng's gaze rests on one of these Plane Worlds, for in it, there too flourishes humanity, bearing eight or nine parts resemblance to the humans of Earth.

The lifespan of these humans is mostly no more than a hundred years.

"Culturally, it bears seven or eight parts similarity to Earth." Among countless civilizations across countless Source Worlds, Luo Feng rarely encounters one so similar to his home Earth.

In this world, the people face the threat of 'Phantom Demons'.

Generations upon generations have fought against these Phantom Demons, forming a unique cultivation system.

"What is true? What is false? Is your strength false?"

"Borrowing the false to cultivate the true is also possible!"

Within this world, a master is teaching his disciple.

"Master, is there a way to completely eradicate the Phantom Demons?" the disciple asks.

"There is," the master replies, looking at his disciple.

"But generation after generation, the ultimate fate of us cultivators is to perish at the hands of the Phantom Demons." The disciple feels helpless, having uncovered the truth of the world since beginning his path of cultivation.

Regardless of the sect, generations of disciples continue to die!

"What couldn't be done in the past doesn't mean it can't be done in the future." The master smiles faintly and then looks up, "The Dharma has been passed down to you. I must now do what I need to do."

The disciple is stunned. He has only just begun his journey.

"Wolf Demon Mountain has plagued the Northwest Thirteen Cities. I cultivated to eradicate Wolf Demon Mountain. Now that the lineage of Zuo Mountain has been passed down, I have no more attachments." The master smiles, patting the disciple on the head before turning away.

Swoosh, in an instant, he traverses the sky, leaving a mark of torn sky high above, heading straight for Wolf Demon Mountain.

"Master." The disciple kneels, crying as he watches this unfold.

Wolf Demon Mountain is the entire world's second only to 'Heavenly Calamity', an 'Earth-level Calamity', shrouding a region with the forces of the Phantom Demons.

A terrifying battle within Wolf Demon Mountain.

The master, with an incomparable natural talent, sacrifices much of his life but finally extinguishes the Phantom Demon of Wolf Demon Mountain! Just as he feels great satisfaction watching the Phantom Demon perish, a force descends upon the deceased Phantom Demon. That 'Wolf Demon', after absorbing this force, not only revives but

also sees a surge in strength.

"Rumble~~~" The influence range of the entire Wolf Demon Mountain quickly expands.

"Ha ha, because of you, I broke through in desperation, and from now on, Wolf Demon Mountain shall be a 'Heavenly Calamity'." The Wolf Demon laughs.

"Heavenly Calamity?" The heavily wounded master looks incredulously at this scene.

How could this be?

"Heavenly Calamity will harm half a nation. I am a sinner, a sinner." The master can't accept everything he sees at this moment; he has cultivated for thirty years for this one moment to destroy the Wolf Demon. Who would have thought he helped the Wolf Demon grow even stronger.

This world, already ravaged by hardship.

Has now gained another Heavenly Calamity?

"It's truly powerless." The master watches the blood-thirsty maw of the Wolf Demon envelope the heavens, ready to swallow him.

The transformed and strengthened Wolf Demon... he has no more strength to resist! He can only face death.

At that moment—

Luo Feng, in the Endless Primordial Space, from a remote time and space, watches this Source World's 'Sea of Chaos' among countless universes, sees all that unfolds in the Plane World.

"The layout of World-level Primordial, how can you little ones possibly resist?" Luo Feng lightly shakes his head.

In this Source World, there is an avatar of World-level Primordial Life, and the avatar remains at the 'Primal Chaos Realm upper limit'.

With the power of the Primal Chaos Realm upper limit, it can secretly scheme and wreak havoc in countless universes!

This Source World is overly scattered in strength. Each universe is less than a ten-thousandth of the Primordial Cosmos! The strongest native cultivate here doesn't even reach 'True God Level'. Naturally, the 'avatar' of the World-level Primordial Life manipulates everything with ease.

All life continually feeds intense fear, despair, anger, hatred, and other negative emotions.

Even with lifespans of just several decades, their high intelligence, intense emotions, and vast numbers make them the 'food' World-level Primordial beings covet! After all, the accumulated intense emotions of such large numbers far surpass the emotions of the far scarcer Innate Primordial Life.

Even across distant time and spaces, Luo Feng, with a single thought, sends an avatar descending into that Source World.

Luo Feng's avatar also possesses the strength of the Primal Chaos Realm upper limit.

Yet this avatar, using his hand as a blade, lightly swings it.

"Annihilate!" Luo Feng's avatar softly utters a word.

Words become law!

The Blade Light follows the Life Qi Mechanism and slaughters the avatar of the World-level Primordial! Furthermore, it annihilates the numerous 'calamitous' forces of this Source World. The Wolf Demon, merely one of countless calamity forces, is naturally directly obliterated.

"Hmm?"

Wolf Demon Mountain, the master stares at the blood-thirsty maw of the Wolf Demon swallowing the skies.

Suddenly, the Wolf Demon vanishes soundlessly.

All Phantom Demons throughout the entire world vanish.

Even all disaster forces across the entire Source World, all universes, disappear entirely, without a trace.

"What happened?" The master stands up, bewildered, glancing around.

He discovers that the sky is brighter than ever before!

The dark and gray aura representing the Phantom Demon completely vanished, the sky cleared, and for the first time, the sunlight thoroughly illuminated the entire world.

Between heaven and earth, all Phantom Demon power was entirely gone.

"Is this real, or fake?" The master couldn't believe it at that moment, "Have I fallen into an Illusory Realm?"

As he verified the truth time and time again.

"It's real."

"This world is real; the Phantom Demons are gone, gone." The master was beside himself with excitement, "Our world has finally completely eradicated the Phantom Demons."

Although he told his disciples there was hope to completely destroy all Phantom Demons.

But in his heart, he didn't believe it!

All he could do was burn himself, making the world a little better.

But today... the scene he dared not even dream of finally appeared.

...

Luo Feng stood in the Endless Primordial Space, looking at all of this from afar, with a faint smile on his face.

The joy of the people also infected Luo Feng, and he too felt pleased.

"Once, I was like them, the most ordinary and humble life in this Source World." Luo Feng watched, "They are weak, but they have love and hatred, desires, and pursuits."

Luo Feng cares about these most bottom-level sufferings, and he empathizes with the weak.

Because he once was a life of this level!

'Golden' Lord, after all, was born as part of the Destruction Demon Clan! From the start of life, it was accustomed to destroying countless lives; their clan feeds on the law of the jungle, selecting the most powerful Destruction Demon Clan members.

Golden Lord had no mercy for the weakest at the bottom level. Since birth, it was about slaughtering these weak ones, so why would there be compassion?

But Luo Feng pities them!

Because Luo Feng was once one of them.

"What I can do now is very limited." Luo Feng looked around.

The countless Source Worlds that have gone through incredibly intense suffering and are still experiencing it... all of this tells Luo Feng over and over again.

The consequence of weakness!

For the homeland Source World, not to fall to this point!

Also for these countless weak ones...

Strong desires naturally burgeoned in Luo Feng's heart.

"One day, I, Luo Feng, will ensure that in the entire Endless Primordial Space, no creatures dare devour any Source World." Luo Feng silently vowed.

To achieve this, one needs immensely terrifying strength!

To truly instill fear in the Ancestors!

"My blade isn't sharp enough yet." Luo Feng continued walking in the Endless Primordial Space.

...

Luo Feng's numerous avatars traveled everywhere, watching the past and present of various Source Worlds; if they encountered any World Level Primordial Life devouring the 'Source World Origin or creatures', Luo Feng would effortlessly kill them.

The deceased World Level Primordial numbers appeared not significant.

Yet, over time, the accumulated number became substantial.

"Recently, don't touch the Source World."

"Whether it's the creatures of the Source World or the Source World Origin. Just by attempting to devour... will attract that Lord Luo Feng! Once he appears, we stand no chance of resisting and face certain death."

"Let's not exchange Source World resources for the time being."

As Luo Feng killed one World Level Primordial after another, the spreading news made nearly all World Level Primordial in the entire Endless Primordial Space temporarily refrain from devouring Source World resources.

They even dared not descend avatars upon the Source World, fearing Lord Luo Feng's wrath!

Thus—

The suffering of countless Source Worlds suddenly vanished during the time when Lord Luo Feng's numerous avatars roamed.

"Even the World Level Primordials can feel fear."

"In the entire Endless Primordial Space, there are over 2 million

World Level Primordial Lives." As the founder of the Primordial Life and Death Dao, Luo Feng can sense the life qi of all World Level Primordial Lives with a single thought; the ratio of these Innate Primordial Lives birthing World Level Primordials is indeed much higher than that of the cultivators.

"Among them, the Innate Primordial Camp consists of over 800,000 World Level Primordial Lives. Many World Level Primordials also inhabit very remote places."

"I have walked for only hundreds of epochs and cumulatively killed just 7000 World Level Primordials, yet it scared all of them." Luo Feng sighed somewhat; he used to believe he was powerless against the countless Source Worlds outside the Cultivator Territory.

Yet upon acting, he discovered...

Merely slaughtering over 7000 World Level Primordials dramatically improved the environment of countless Source Worlds.

"Hence, some things need to be attempted."

"When done, there will be an appropriate feedback." Luo Feng looked far ahead.

Faraway, time and space began to twist, faintly connecting with a distant place, a grand silhouette looking at Luo Feng from afar; it then directly crossed through time and space, arriving at this vast expanse.

An endlessly winding great serpent hovered in mid-air, precisely the Infinite Snake Ancestor, the Nine Emperors' leader within the Innate Primordial Camp.

"Luo Feng, stop right there!" Infinite Snake Ancestor looked at Luo Feng.

Chapter 460 - 36: Heart and Dao Harmony

Chapter 460: Chapter 36: Heart and Dao Harmony

Luo Feng looked at the endless winding serpent before him, its cold eyes fixed on Luo Feng, filled with wrath.

"Stop?" Luo Feng looked at the other, smiling indifferently, "Infinite Snake Ancestor, I haven't done much killing recently."

The Infinite Snake Ancestor glared at Luo Feng, unwilling to accept the fact, yet it knew clearly... this newly ascended Cultivator Lord has become a terrifying enemy to the Innate Primordial Camp!

This formidable foe is incredibly powerful, and it's rising rapidly. According to their predictions, this Lord Luo Feng might surpass the Starlight Lord in the future, becoming the greatest threat.

"Lord Luo Feng," the Infinite Snake Ancestor spoke, its voice thunderous, "In the recent hundred epochs, you have intercepted and killed all 'world-level primordial life forms' devouring the Source World. More than 7000 'world-level primordial' have died by your hands! You indeed haven't continued killing recently, and that's because... those world-level primordial beings are scared, no longer daring to devour Source World resources."

"That's a good thing." Luo Feng nodded slightly, "Innate Primordial Life, born to break free from the Braided Cage! The Endless Primordial Space nurtures a variety of resources that can facilitate their growth. They fundamentally don't need to devour the Source

World Origin."

"Without devouring the Source World Origin, Innate Primordial Life can still grow stronger and become Ancestors." Luo Feng smiled, looking at the Infinite Snake Ancestor, "In this way, Innate Primordial Life and Source World Creatures need not become mortal enemies!"

The Infinite Snake Ancestor paused.

Not devouring?

Innate Primordial Life comprises various species; some species benefit greatly from devouring the Source World Origin, while others gain little effect! Some species have no effect at all.

However, the Infinite Race is deemed the species with the best effect from devouring the Source World Origin! Making them abandon the Source World Origin would diminish their hope of birthing Ancestors by seventy to eighty percent! This cannot be tolerated.

"Impossible!" The Infinite Snake Ancestor roared in anger, "The Source World is scattered across the Endless Primordial Space, why should I abandon this resource?"

"Luo Feng!"

The Infinite Snake Ancestor stared at Luo Feng, "You should know, most Innate Primordial Life's species need the Source World Origin! By blocking this... you're turning against all Innate Primordial Life!"

"You don't represent all Innate Primordial Life." Luo Feng looked at it, "Since you aim to devour the Source World, being counterattacked by Source World Creatures is only right!"

To devour the Source World, only to be counter-slaughtered by Source World Creatures! This is causality!

"I remind you," the Infinite Snake Ancestor said, "Preventing many species from devouring Source World resources, short-term patience can be endured, but over time, it will trigger new wars. Then the flames of war will spread across your Cultivator Territory, many World Groups will fall, and these consequences you must also bear."

"Infinite Snake Ancestor, rest assured." Luo Feng looked at it, "I promise you, once war begins, the fires will certainly spread to your territory."

"In the last war, I had just become a lord, my means were average, only managing to kill a few Ancestors." Luo Feng grinned, "Recently, I've made a breakthrough in strength. If another war starts, I'll definitely bring you a bigger surprise!"

The Infinite Snake Ancestor immediately thought of it.

Thought of that terrifying 'Origin Great Destruction'! Luo Feng's current strength has clearly further advanced, his means would definitely be more troublesome.

"Your Cultivator Camp just needs to bear the consequences!" the Infinite Snake Ancestor left coldly, then its figure turned to void, completely vanished without a trace.

Luo Feng stood in mid-air.

"Start another war? Do you have that capability?" Luo Feng mockingly thought.

Not looking down on the Infinite Snake Ancestor, but the Cultivator Camp and Innate Primordial Camp have been at odds for too long, both sides know each other too well.

Infinite Snake Ancestor, indeed the most influential in the Innate Primordial Camp, yet still limited!

First, those Ancestors of species not much needing 'Source World resources', are unwilling to start a war! Those weaker in power, at risk of dying, are also unwilling to start a war.

The faction of the Giant God Emperor doesn't like war either.

How many Ancestors can the Infinite Snake Ancestor rally for battle?

One must know, all eight Cultivator Lords are undying and imperishable! Among the Innate Primordial Camp, those Ancestors, only five are undying and imperishable, others over a hundred may

face death. Without sufficient advantage, without sufficient safety, how many would be willing to fight?

"Merely intercepting thousands of world-level primordials, is enough to start a war?" Luo Feng doesn't believe, nor does the Starlight Lord who can observe countless future possibilities!

...

The Innate Primordial Camp, the Nine Emperors Avatars gathered.

"Luo Feng is stronger! Once war breaks out, the casualties are unpredictable." Initial said.

"Luo Feng has not wantonly slaughtered, as long as Source World Origin is not devoured, there's no conflict." The Giant God Emperor remarked, "Infinite, I think your Infinite Race overestimates the Source World Origin. Occasionally abstaining from the Source World Origin might better assist the evolution of the Life Core."

"Having insufficient strength and forcibly starting a war would only be more disgraceful!" the Black Tide Ancestor said indifferently.

The Infinite Snake Ancestor looked at the scene before it.

Even among the Nine Emperors, those willing to start a war are few because their interests aren't affected.

"Should we just let this Luo Feng oppress us?" the Silent Extinction Ancestor spoke, longing for the outbreak of war, seeing its old friend 'Infinite Ancestor' already undying and imperishable, while it was still lacking.

"It's not exactly oppression." the Infinite Ancestor smiled, "The two camps often have conflicts, Innate Primordial Life also venture into the Cultivator Territory to seize resources. What Luo Feng has done is much more restrained than the Starlight Lord."

Once, the Starlight Lord, to collect the Innate Primordial Bloodline, killed world-level primordial life numbering several tens of thousands!

At least Luo Feng is reasonable, targeting only world-level primordial life devouring the Source World.

Starlight was unreasonable, just to gather the bloodline, killing each one outright!

"It's not suitable to start a war," suddenly spoke the Mother of Space-Time.

"Hmm?"

The other eight looked at the Mother of Space-Time.

Although the Mother of Space-Time couldn't observe countless timelines of the future like Starlight, she could still see glimpses of a few futures. The other eight took the opinions of the Mother of Space-Time very seriously.

"I can see it," the Mother of Space-Time said, "the outcome of starting a war is not favorable for our Innate Primordial Camp!"

The Mother of Space-Time foresaw a war even more brutal than the last!

The Cultivator Camp might pay a certain price, but the price the Innate Primordial Camp would pay would be much more painful.

"Let's wait for now," said the Inference Fire Ancestor. "Isn't Luo Feng exploring the Abyss of Destruction? The deeper he probes, the greater the danger will be. He will also reveal more of his strength. Once we clearly understand his power, even if war breaks out in the future, we will be better prepared."

"Alright, let's wait for now," the Infinite Snake Ancestor also realized that pushing wasn't possible, and relative to other lords, Luo Feng's strength was indeed a mystery.

Understanding the enemy and oneself leads to better responses.

"Demon Ruins and Sha Zhou are both belligerent. Facing off against them, Luo Feng is sure to reveal more of his power," Inference Fire Ancestor looked forward to it.

...

Time flew by, and it had been five hundred epochs since Luo Feng intercepted and devoured the World Level Primordial Life of the Source World.

In these five hundred epochs, no further World Level Primordials dared to consume 'Source World resources', not even the Ancestors did so temporarily.

Some newly ascended weaker Ancestors might still gain some benefits from consuming the Source World Origin. However, as their strength grew, the effects of the Source World Origin would become increasingly negligible.

For those at the level of the Silent Extinction Ancestor, consuming more Source World Origin was already useless.

"Hua hua hua~~~~"

Beside the Origin Continent Origin World, within the Mysterious Land of the Blood Crane Territory, the tides of the Endless Blood Sea surged.

On an island in the depths of the Blood Sea, Luo Feng, draped in blood-red robes, with black hair and clad in black, sat cross-legged!

"Five hundred epochs, I've seen all the Source Worlds," Luo Feng's eyes were complex; over these five hundred epochs, numerous avatars had roamed various places, observing the history of each Source World.

Not only outside the Cultivator Territory, but even all the Source Worlds within the Cultivator Territory, Luo Feng had seen them all.

Those Source Worlds within the Territory could be divided into two eras—the era of the Lords' rule and the era of the Innate Primordials' rule! In the era of the Innate Primordials' rule, the Source Worlds within the Territory were equally tragic, left to be devoured at will.

The rise of the Lords, guarding each region, changed the situation.

Only then did countless Source Worlds have hope!

"Buzz."

All the historical memories of countless Source Worlds resided within Luo Feng's heart.

These memories, time and again, tempered Luo Feng's inner heart, forging that heart of destruction.

The sheer volume of these memories was enormous, after all, they encompassed countless civilizations and the lifetimes of innumerable creatures, yet Luo Feng, as a Lord, could still perfectly integrate all the historical memories.

The experiences of a creature determine its soul.

These incomparably heavy 'historical memories' also influenced Luo Feng's heart.

"The more one loves this world, loves this multitude of life, the more they need an unwavering 'heart of destruction.'"

"Because, being merciful to those Innate Primordial Lives that devour the Source Worlds is to be cruel to the Cultivator species."

"The greatest mercy to the Cultivator species is to destroy all those who devour the Source Worlds!"

Anyone who devours the Source Worlds, who devours the life of the Source Worlds, will be killed without mercy! Not a single one left!

With the influence Luo Feng now holds, he can temporarily impact those Innate Primordials' consumption of the Source Worlds, but over time, those Innate Primordial species wouldn't endure it! At that time, the Innate Primordial Camp might unite with the Ice Peak Camp and weaker forces altogether!

"Destroying all Source World devourers, this goal is immense!"

"Even if I comprehend the Primordial Blade Path, it may not be achievable."

"But I, Luo Feng, am willing to, in the endless epochs to come, act like the foolish old man who moved mountains, and do it step by step." Through this interception of a World Level Primordial Life, Luo Feng understood a principle: action leads to results.

With strength comes results.

As long as he acts, he will indirectly shelter countless creatures.

Luo Feng smiled.

"The heart of destruction is formed, the next step is to harmonize heart and Dao, to completely integrate!" Luo Feng immediately attempted, letting the heart of destruction govern the entire Primordial Blade Path, as countless mysteries of the Blade Path began to integrate into one.

Luo Feng's aura began to transform, resembling a destructively sharp blade, the aura of destruction far more terrifying than 'Jin' and 'Kafu'...

Chapter 461 - 37: Honing the Blade (Part 1)

Chapter 461: Chapter 37: Honing the Blade (Part 1)

As the highest level life form in the Infinite Primordial Space, Luo Feng's thought process speed far exceeds that of the past. With sufficient accumulation in destruction and life perception, his heart and Dao aligned, and in just one day, he created the first version of the 'Primordial Blade Path'.

"My Primordial Blade Path takes the 'Great Destruction System' as its core, pursuing ultimate power!"

He needs to perfectly combine the 'Primordial Life and Death Dao' with the 'Primordial Blade Path'! Hence, he must consider the strongest advantage of the Primordial Life and Death Dao, 'Infinite Energy', to make the strong stronger, which is the best combination.

With infinite energy, combined with extreme power, it can threaten those ancestors with tenacious life force.

"Let's give it a try."

Luo Feng sat cross-legged on an island deep within the Blood Crane Territory. With a casual wave of his hand, his palm became like a blade, and a terrifying blade light erupted, tearing through endless time and space, splitting the vast Blood Sea in two.

"This first version of the Primordial Blade Path has too many flaws." Luo Feng frowned, "It's only good at close-range energy locking. If

the distance is far, it lacks the assurance of locking on."

Reaching the level of a Lord or Ancestor, a single movement technique can cover quite a distance. It requires ensuring absolute locking within a certain range to be a sufficient threat to the enemy.

"Let's try the power of the Origin Destruction."

Luo Feng waved his hand, and countless brilliant stars flew out. A total of 360 million origin stars floated in the air, forming a formation exuding endless destruction aura, which is a weakened version of the Origin Great Destruction.

"The control is more perfect now, and it can accurately target the locked area." Luo Feng nodded slightly.

Boom——

Watching the incredibly splendid destruction scene, the glow reflected on Luo Feng's face made it much brighter. He frowned slightly, "This weakened version of Origin Great Destruction only improves power by fifty percent?"

He didn't need to try to know that the more challenging 1.8 billion origin stars version wouldn't enhance the power much either.

"This version has too many flaws."

Luo Feng shook his head lightly, this is far from the 'Primordial Blade Path' he envisioned.

...

Luo Feng sat cross-legged on the island deep within Blood Crane Territory, deducing one version of the Primordial Blade Path after another. His insight, comprehension, and thinking abilities were too terrifying, and unconsciously, he had already created 10,938,103,329 versions of the Primordial Blade Path without feeling tired.

Back then, Luo Feng tried creating the Primordial Life and Death Dao more than 30 million times before breaking out of the cage, feeling like he had exhausted all possibilities, and his soul was almost empty.

Now he easily surpassed a hundred billion times.

"I've tried every possibility." Luo Feng was very calm. The creation of a hundred billion times consumed him less than thirty eras.

"Among them, seven versions are the most outstanding."

"But there's still a bit left to succeed."

Only by succeeding can the Dao be eternal and indestructible, becoming part of a Lord's life.

"The Blade Path is ultimately used for killing enemies. Let's sharpen the blade further in actual combat." Luo Feng thought, his aura rapidly weakened, while the aura of Luo Feng's avatar, closed in the 19th layer of the Abyss of Destruction, rapidly increased.

...

The 19th layer of the Abyss of Destruction.

This avatar of Luo Feng reached peak state before opening his eyes.

"Elder Brother Yuan."

Luo Feng walked out of the secluded cave mansion, speaking through transmitted sound, "I'm ready to head to the next layer."

Yuan's avatar condensed and appeared nearby.

"Preparing to break through layer by layer?" Yuan laughed.

"Yes." Luo Feng nodded, "First, I'll try challenging all opponents."

Relying on the Primordial Life and Death Dao and the highest level of destruction power 'Breaking Power', Luo Feng was confident in battling Sha Zhou! With the more perfected seven versions of the Primordial Blade Path, Luo Feng was even more confident.

These opponents are the whetstones for his blade!

"Then I'll watch with anticipation." Yuan seemed expectant.

Luo Feng nodded, taking a step through layers of time and space, heading to the deeper 20th layer Destruction World.

Yuan watched him leave.

"According to Starlight's observations, Luo Feng is perfecting his second Primordial level Dao..." Yuan observed, "Once he breaks through, our Cultivator Camp's strength can be greatly enhanced!"

"Luo Feng also regards the countless Source Worlds outside the territory as his kin." Yuan highly appreciated the behavior Luo Feng displayed over the past five hundred eras.

Intercepting and devouring world-level primordial life forms from the Source Worlds represented Luo Feng's acknowledgment of the countless Source Worlds outside the territory.

As the first Lord of the Cultivator Camp, the entire Cultivator Camp inherently had no territory! It was with the rise of one Lord after another that the territory continuously expanded until reaching the current 3,600 World Groups.

In Yuan's eyes, the territory will expand.

All creatures of the Source Worlds are within the range of the recognized Cultivator tribe.

"I will expand the territory in the future, and Luo Feng should agree." Yuan thought, then dispersed his avatar, continuing to focus on cultivation, carefully perfecting his 'Origin System' of the Primordial Rules Operation Path.

******

The 20th layer of the Abyss of Destruction, the cold wind howled, sweeping everywhere.

Luo Feng descended onto the vast icy ground, seeing the figure looming in the distance like an ice mountain, 'Ice Peak Ancestor'. The Ice Peak Ancestor slowly opened his eyes, standing as if integrated with the entire Destruction World.

"Ice Peak Ancestor," Luo Feng spoke.

"You've finally come," Ice Peak Ancestor smiled and said, "How do you need me to cooperate with you?"

Based on Ice Peak Ancestor's research, cooperation can maintain face. If not, Luo Feng might have to use force, which would be even more embarrassing.

With the other party being so friendly, Luo Feng couldn't be too excessive.

"I kindly ask the Ice Peak Ancestor to help and join all World Envoys to deal with me." Luo Feng requested.

"Hahaha, if I join hands with all the envoys, it's not so easy to handle!" Ice Peak Ancestor laughed heartily, "Be careful."

Then the Ice Peak Ancestor extended his hand.

As his palm stretched out, it rapidly enlarged, the surface of the palm spreading endless cold, causing the hand to continuously extend and expand. Meanwhile, in the endless cold, 120 black figures condensed.

"Here it comes."

After the Ice Peak Ancestor enlarged his palm, it was as big as half the world. Moreover, that gigantic palm seemed to be one with the entire ice land, exerting an oppressive power that surprised Luo Feng.

"Ice Peak Ancestor, you can indeed rival the elder brother Yuan." Luo Feng marveled in his heart.

Unlike Yuan's formation, mysterious and unparalleled.

Ice Peak Ancestor, who can be called a more perfect 'Wulan,' possesses a body comparable to Wulan's powerful body! And his attack methods are even stronger!

"Bang~~~~~"

The incredibly large palm merged with the earth, where 120 twisting

black shadows surrounded Luo Feng.

"Hmm?"

Ice Peak Ancestor was slightly surprised, he could feel the pain in his palm.

Luo Feng remained standing there, unmoved!

He forcefully withstood the striking of the gigantic palm and the encirclement by 120 World Envoys. Because in the Mountain of Destruction, he had seen all the mysteries of the 20 levels of destructive power, now just slightly sensing the World Envoys' siege, he could see through it all.

"This body of Luo Feng is like a blade."

Ice Peak Ancestor realized that his palm seemed to have struck a knife's edge, already showing injuries.

Within Luo Feng, one billion, eight hundred million origin energy circulated, making him appear as a terrifying blade!

Suddenly—

Luo Feng moved.

A dazzling and brilliant blade light forcefully pierced through the Ice Peak Ancestor's palm, creating a gap in the massive icy palm, and the blade light flew out along the gap, dazzling and brilliant as it cut onto the Ice Peak Ancestor's chest, leaving cracks on his chest surface.

But these cracks were insignificant to Ice Peak Ancestor; the ice cracks on his body surface rapidly healed, with virtually no energy loss.

"Such a terrifying body."

Luo Feng's mind stirred, the dazzling brilliant blade light turned silently, already disappeared without a trace.

The blade light was hidden in the dark.

Invisible, undetectable, it kills all vitality.

"Hiss hiss hiss～～～"

The ice on the Ice Peak Ancestor's body surface turned into flying ash, layered into annihilation.

Clearly, no blade light was detected, yet the vast body of Ice Peak Ancestor was losing some of its power and vitality; without vitality, naturally, it leads to extinction.

Previously, relying only on the 'Primordial Life and Death Dao,' Luo Feng's life-cutting technique had relatively low impact on the Ancestors, and he himself didn't prioritize it enough. But when combined with the destructive killing intent, it produced a remarkable effect against Ice Peak Ancestor.

"This invisible knife deals greater damage to me?"

Ice Peak Ancestor was also slightly surprised.

A figure gathered in the distance, precisely Luo Feng's figure.

Luo Feng stood there, somewhat puzzled.

"The combination of two Daos indeed greatly enhances the life-cutting effect. All life needs vitality... without vitality, it means death."

"Not targeting matter, nor some special energy, just 'vitality,' it makes no noise killing the enemy, but it's very effective."

The encounter between Luo Feng and Ice Peak Ancestor made him realize——

The combination of two Primordial Daos elevated the power of 'life-cutting'!

This seemingly insignificant, noiseless technique has great potential.

"Origin Great Destruction pursues the utmost power to destroy an enemy with 'extreme power.'

"Life-cutting, however, is very suitable for my other path, I need to improve this path properly. My attention to it has been inadequate."

Luo Feng stood there, various plans to improve it quickly emerged in his mind.

It's difficult to fully understand the strengths and weaknesses of the Dao while secluded in enlightenment.

But during combat, it becomes clearer.

"Lord Luo Feng, do you want to continue?"

Ice Peak Ancestor remained cordial.

"No need, I'm preparing to move to the next level," Luo Feng said with a smile.

"Move to the next level?"

Ice Peak Ancestor was astonished.

According to Luo Feng's previous habits, he would always let the World Envoys siege for one or two eras; it's too fast now!

Luo Feng took a step and had already gone deeper into the Destruction World.

...

The skirmish between Luo Feng and Ice Peak Ancestor, though brief, also attracted the attention of ancient beings in the endless Primordial Space! From this battle, they could see that the proud Ice Peak Ancestor had no advantage in the encounter with Luo Feng, even somewhat falling behind.

"Lord Luo Feng's strength, after all, is comparable to Sha Zhou. Ice Peak Ancestor being unable to match is normal."

This confrontation was within everyone’s expectation.

If Ice Peak Ancestor won, that would surprise everyone.

In the 21st layer of the Abyss of Destruction, Infinite Snake Ancestor was also watching.

"So fast it came?"

Infinite Snake Ancestor watched the silhouette of the black-haired man descending into this layer of destruction world, a bit confused, it came too quickly! It originally thought Luo Feng would stay on the 20th layer for one or two eras.

Luo Feng looked at the Infinite Snake Ancestor, full of battle intent.

Compared to the defensively robust and simple attacks of Ice Peak Ancestor, Luo Feng was more interested in Infinite Snake Ancestor. Infinite Snake Ancestor, capable of changing shape and space, mysterious and intriguing, was more suitable for testing various blade techniques.

Hitting Ice Peak Ancestor was as it should be. Because Ice Peak Ancestor doesn’t dodge!

To strike Infinite Snake Ancestor, that proves the prowess of the blade technique.

"Infinite Snake Ancestor, please give it your all," Luo Feng looked at it.

"I cooperate with you?"

Infinite Snake Ancestor sneered; it could see that Luo Feng was cultivating. As an adversary and the head of the Nine Emperors of the Innate Primordial Camp, it had its pride and could not cooperate with Luo Feng in cultivation.

Luo Feng gently shook his head: "Then I’ll have to force it!"

Chapter 462 - 38: Honing the Blade (Part 2)

Chapter 462: Chapter 38: Honing the Blade (Part 2)

The Infinite Snake Ancestor was confident that, with the support of the 'Infinite World', it could achieve complete void transformation. In an absolute void state, no material energy could harm it in the slightest! Of course, in that state, it couldn't harm the enemy either.

This 'absolute void' state is a unique ability of the mysterious land of the Infinite World.

With this ability, the Infinite Snake Ancestor was fearless in the face of Luo Feng.

"Boom!" "Boom!"

Neither the Infinite Snake Ancestor nor Luo Feng held back, both went all out right from the start.

This layer of Destroyer World instantly turned into a Void Maze, with the Infinite Snake Ancestor and the entire Void Maze as one, moving stealthily, disappearing at will, appearing at will, attacking Luo Feng crazily.

...

This battle attracted more attention in the entire Infinite Primordial Space! Everyone knows that the Cultivator Camp and the Innate Primordial Camp are mortal enemies and have fought for too long.

Land of Origin.

Yuan, Jin, Wulan, Ming Huang, Nai Gu, Starlight, Mo Man, the seven lords were also watching the battle. They were very concerned about their companion 'Luo Feng's growth. With Luo Feng's speed of breaking laws with force, they predicted... it wouldn't be long before Luo Feng should grasp the second Primordial level Dao. They all looked forward to that moment!

"Although Luo Feng's blade technique is fierce and violent, the Infinite Snake Ancestor is too elusive, Luo Feng's techniques can't touch it." Ming Huang frowned and watched.

"Luo Feng has unleashed over a hundred blades, each one terrifying, yet none can touch the Infinite Snake Ancestor." Wulan also shook his head lightly, "Throughout the Infinite Primordial Space, in terms of void mastery, the Infinite Great Serpent is second only to Starlight."

The Starlight Lord nodded in acknowledgment: "The Infinite Snake Ancestor hasn't even exhibited the 'absolute void' ability yet. With void control alone, it's avoiding all of Luo Feng's attacks."

Under void control, wherever Luo Feng's blade light fell, it would veer off too far.

"Hmm?"

Yuan and the others' eyes brightened.

Luo Feng's blade technique changed, its power greatly reduced, but each blade flew out with a sort of spirituality, swiftly carving bizarre arcs, piercing through layers of spacetime barriers, hitting the Infinite Snake Ancestor hidden within the Void Maze.

Each blade must hit! There was nowhere to hide!

No matter how formidable the void mastery of the Infinite Snake Ancestor was, it couldn't escape.

"Absolute hit?" Yuan laughed.

Ming Huang, Jin, and Mo Man all nodded, as all three possessed the

ability of absolute hit.

"Luo Feng is still relatively unskilled; to maintain absolute hit, the power of each blade cannot be too strong." Jin laughed, "He should learn from me."

"Luo Feng's each blade isn't considered powerful, but he strikes swiftly." Mo Man exclaimed.

Indeed.

Dense and intertwined blade lights all flew with spirituality, dividing into several streams, ultimately piercing through spacetime barriers, landing on the body of the Infinite Snake Ancestor.

The series of attack from the massive amount of blade lights caused the Infinite Snake Ancestor's body to deplete rapidly, needing the energy supply from this layer of Destroyer World to maintain its pinnacle state.

"Hmph."

The Infinite Snake Ancestor disdain relying on the 'Destroyer World energy supply,' after all, in normal external environments, it's impossible to receive such abundant energy supply.

It began to exhibit absolute void transformation!

When the river-like abundance of blade lights from Luo Feng fell on the Infinite Snake Ancestor, it completely voided, receiving not the slightest damage.

"Hit doesn't mean you can harm the opponent." Yuan watched, just like the Initial Ancestor allowing the enemy to attack, the enemy could hit, but couldn't threaten the Initial Ancestor in the least.

The absolute void of the Infinite Ancestor, although not as impeccable as the 'Initial Ancestor,' still ranked among the foremost in difficulty.

"Nothing can be done." Ming Huang shook his head.

"All of Luo Feng's techniques can't threaten the Infinite Snake Ancestor." Nai Gu watched.

At this moment, Luo Feng wielded his blade with ferocity, roaring through the Destroyer World. He even deployed a 'blade formation,' constituted of fifteen terrifying blade lights, obliterating every corner of the Destroyer World.

Yet the 'absolute void' Infinite Snake Ancestor effortlessly regarded everything, occasionally seizing moments to attack stealthily.

"Absolute hit can threaten most ancestors, but with some ancestors, hitting them is useless." Luo Feng tested his techniques on the Infinite Snake Ancestor, gradually perfecting his Primordial Blade Path during the experiment.

Suddenly——

Luo Feng swung his blade.

This time as the blade swung, no blade light could be seen, undetectable.

The absolutely void Infinite Snake Ancestor's body, suddenly some scales silently vanished, leaving the Infinite Ancestor startled.

"The life severing is effective." Luo Feng's eyes brightened.

Not severing the physical body, not severing the soul, only severing the vitality!

This was something Luo Feng could do after mastering the Primordial Life and Death Dao.

"Shhhh."

Luo Feng stood still, a surge of power on the surface of his body, at once hundreds of 'life severing' blade lights burst forth, these blade lights were undetectable, only severing vitality. The snake scales on the surface of the Infinite Snake Ancestor began to vanish more and more, even muscles started to vanish.

"How can this be?" The Infinite Snake Ancestor was somewhat panicked. Under the cover of the Void Maze, with Absolute Void added, it still got injured?

This scene shocked many ancestors in their hearts.

"Absolutely cannot act alone; the true body appears in front of Luo Feng." Although every ancestor has tough life force and has developed numerous life-saving secret techniques, Luo Feng's current methods are clearly much more terrifying, and they dare not gamble.

If the gamble is lost, then it's complete death.

"Because of the power of 'Origin Great Destruction' previously, I centered the Primordial Blade Path around the 'Great Destruction System,' and there's no mistake in that."

"But I underestimated the role of 'Life-cutting.'"

This is a technique gained after mastering the Primordial Life and Death Dao! And when first becoming a lord, Luo Feng's means of killing were relatively weak, and the 'Life-cutting' effect hadn't truly manifested, only suitable for bullying some World Level Primordial Life.

But with the gradually perfected 'Primordial Blade Path,' greatly increasing the power of the 'Life-cutting' technique, 'Life-cutting' revealed its dreadful nature.

It is an unavoidable technique.

Omnipresent? Absolute Void?

As long as it is life, there's no escape from the 'Life-cutting' technique!

"This technique follows the life force transmission but limits the energy ceiling," Luo Feng pondered.

Life force sensing is like a passageway.

It can transmit 'Blade Light,' but this passageway has a limit to the

energy it can bear. This limit is determined by Luo Feng's mastery of life force, as he is already the highest in achievements related to life in the Endless Primordial Space. This limit cannot be improved anymore.

"Can't improve the energy ceiling, then find ways to increase the speed of striking, research blade technique intricacies, and continue enhancing the power," Luo Feng thought.

In the future, once the Blade Path reaches perfection, the power can certainly rise again.

"Whoosh whoosh whoosh—"

Luo Feng kept pondering while also trying out variations of the blade technique.

Such a worthy opponent, of course, deserves to test all hypothesized techniques to the fullest.

...

"How is it possible? The Absolute Void Infinite Snake Ancestor, I can't harm it either." Jin looked incredulous, "How can Luo Feng harm it?"

In terms of destruction achievements, he was much stronger.

"It's the life force."

The Golden Lord also had considerable accumulation in life matters and quickly realized this point, "Merely following life force sensing, he can unleash Blade Light to cut life force? Cut life force? How is life force cut?"

Jin could understand life force sensing and life lock, but couldn't comprehend how 'cutting life force' was achieved, as it far exceeded his life's accumulated knowledge.

"Life force can be cut?"

Among the three lords who escaped from the Blood Crane Territory, the Blood Lord grasped the highest level life power 'Blood Power,'

also very strong in life force mastery. He found it hard to understand at this moment: "Through life force sensing, I can barely transmit a sliver of energy, maybe severely injure World Level Primordial Life. But that sliver of weak energy... for an ancestor of the same level, it's not worth mentioning at all!"

The deeper the understanding of life, the more one realizes the difficulty of this technique.

"The combination of the two Daos is beginning to show its power." Starlight watched this scene with delight, "Life and destruction, the combination of these two Daos... is most adept at destroying life!"

Starlight had observed countless future timelines long ago.

The combination of life and destruction, these two primordial level Daos, complementing each other, poses a terrifying threat. He had long believed that Luo Feng would be the most terrifying existence in future battles, the most core figure on the front battlefield of their Cultivator Camp! Luo Feng's blade... would be the sharpest weapon in the entire Cultivator Camp, slashing through all obstacles!

"The second Dao is gradually forming, it's getting close, getting close." Starlight's eyes also saw the future.

He saw it.

Luo Feng's Primordial Blade Path was on the verge of forming at any moment.

...

All other methods cannot threaten the Infinite Snake Ancestor; only a trace of life force sensing can still deploy the 'Life-cutting' technique. Luo Feng repeatedly uses it, the Infinite Snake Ancestor, with 'Unlimited World Power' in support, is also desperately blocking, even striving to conceal its life force.

An excellent opponent forces Luo Feng to continuously perfect the Life-cutting technique.

The gradual perfecting of the Life-cutting technique also makes the

overall ’Primordial Blade Path’ more perfected.

But gradually, the Infinite Snake Ancestor brings no challenge anymore, its evasive abilities now completely familiar to Luo Feng.

"Infinite Snake Ancestor, release the World Envoys." Luo Feng spoke.

"You want me to cooperate?" The Infinite Snake Ancestor sneered, though this Life-cutting can continuously dissolve its body, if external, it would force it into a sorry retreat. But in the Destruction World, it can absorb energy to maintain at the pinnacle.

"Hmph." Luo Feng snorted coldly, instantly transforming into a terrifying Blade Light, tearing through the sky, heading straight for the core of the Destruction World Source upon this level.

If unwilling to cooperate, then seize this level of Destruction World!

"Enough!" The Infinite Snake Ancestor’s voice echoed, also showing a trace of helplessness, losing to this Lord Luo Feng wasn’t disgraceful. It’s estimated that even ’Sha Zhou’ might not compare to this Lord Luo Feng.

Accompanied by its sigh, Luo Feng was originally rushing toward the ’Shadow of Origin,’ suddenly a hundred World Envoys manifested in front, each burning with blue flames, collectively besieging Luo Feng.

"Hard words, yet practical actions." After only a few breaths exchanging blows with these World Envoys, the insights gained at Mountain of Destruction were confirmed against reality, rendering these World Envoys useless.

Chapter 463 - 39: Honing the Blade (Part 3)

Chapter 463: Chapter 39: Honing the Blade (Part 3)

Level 22 of the Abyss of Destruction.

This level of the Destruction World is all twisted and shattered, distorted into surging energy flows. Endless energy flows rotate around the peculiar cube known as 'Demon Ruins,' sensing Luo Feng's presence from afar.

"He is here." Demon Ruins was incredibly expectant.

He was born standing at the Pinnacle of the Endless Primordial Space, undying and undestructible! His close-range destructive power was considered the strongest! However, neither the Ancestors nor the Lords would foolishly engage him in close combat.

His movement technique was weak, so his deterrence naturally fell short, occupying only the 22nd level of the Abyss of Destruction, far behind Sha Zhou and Starlight.

A figure traversed space-time to arrive; it was precisely Luo Feng.

"You are here." Demon Ruins emitted waves of excitement.

Luo Feng observed his surroundings, this level of the Destruction World already shattered and twisted around 'Demon Ruins.' This scene reminded Luo Feng of the Fourth Sculpture in the Mountain of Destruction, an existence formed by 125 smaller cubes similar to

Demon Ruins, which was far stronger than Demon Ruins in its methods, formidable in both close and ranged attacks, completely overpowering the current Luo Feng.

"Demon Ruins has potential, hopeful to evolve to the form of the 'Fourth Sculpture'." Luo Feng thought, "Currently, his techniques are still too simple."

After all, since its conception and birth, Demon Ruins' strength hasn't significantly improved.

"How should I cooperate with you?" Demon Ruins asked with enthusiasm, "Shall we go one-on-one, or have World Envoys attack you together?"

"Either is fine." Luo Feng replied with a smile.

He bore hostility with the Infinite Snake Ancestor, yet harbored no enmity with Demon Ruins.

Against such solitary, undying, immensely powerful beings, no faction would make an enemy of Demon Ruins.

"Hahaha, then let's go one-on-one first!" The colossal cube of Demon Ruins unleashed terrifying waves, then roared and tore through the sky, carrying endless energy flows.

This flight speed seemed incredibly fast, yet at the Lord and Ancestor level, it was considered a weak movement technique.

The mighty ones like the 'Infinite Snake Ancestor' and 'Feather Emperor' are capable of being everywhere! Luo Feng, utilizing the power of the Blood Crane Territory, could also change positions bewilderingly within short distances.

Even Wulan, the slowest among the eight Lords, was slightly faster than Demon Ruins.

"Don't dodge, don't dodge!" The massive cube attacked, filled with anticipation; it loved going head-to-head. If Luo Feng dodged, the confrontation would be too uninteresting.

Draped in a blood-red robe, Luo Feng indeed stood firm, without moving a single step.

Looking across the entire Infinite Primordial Space, there wasn't a single life form that could force him to dodge! Luo Feng was also very curious, exactly how strong was the so-called 'near supreme-level' destructive power?

"Boom——"

"Hmm?" Luo Feng was carefully sensing as the 'tip' of that giant peculiar cube collided with his protective energy layer.

The protective energy layer, supplied by 1.08 billion Origin Energies, formed through the mysteries of the Primordial Life and Death Dao! Further empowered by the power of the Blood Crane Territory, it possessed characteristics of 'immortal' and 'shadow.'

"Sssss~~~" As the tip touched the protective energy layer, it caused a depression; the sharpest point easily penetrated the layer. Then it contacted the blood-red robe, also piercing it, and stabbed into Luo Feng's skin and bones...

"This?"

"Truly marvelous."

Although he had engaged the Fourth Sculpture in Mountain of Destruction before, that sculpture no longer needed to use such foolish techniques. Luo Feng hadn't experienced such a 'pure' method.

The tip of that peculiar cube! Its 'sharpness' even surpassed the theoretical limits of the Infinite Primordial Space!

That point possesses an unthinkable destructive force. Just speaking of 'one point,' its terrifying destructive power surpasses dozens of Ancestors working together. But it also has a fatal flaw—

This sharp point is smaller than the theories of the Endless Primordial Space.

One must know Luo Feng's body is immensely large, a third of the size of a 'normal Source World!' Moreover, his entire body has no critical points. Thus, even if this 'smallest point' pierces obstacles, the damage to Luo Feng remains lightweight.

"Despite having the point of Unbreakable, the damage area is too small." Luo Feng stood there, the tip of the peculiar cube stabbed in, the edges sharp beyond compare, the overall power extremely strong, forcibly embedding into part of Luo Feng's body, yet ultimately becoming completely stuck.

The attack dealt minimal energy loss, which Luo Feng immediately recovered from in an instant.

"Daring to go head-to-head with me, Luo Feng, I like opponents like you." Demon Ruins was unbelievably excited; his goodwill towards Luo Feng quickly surged.

He had once fought against the Starlight Lord, yet the Starlight Lord stood right in front of him, unreachable and unharmed! Nor would the Starlight Lord foolishly go head-to-head with him. 'Sha Zhou' transformed into endless flames, omnipresent, similarly avoiding head-to-head clashes.

Luo Feng's strength was immensely powerful and could go head-to-head; naturally, Demon Ruins was pleased.

"I also like opponents like you." Luo Feng rapidly comprehended Demon Ruins' 'Breaking Point Strike,' that point, Unbreakable! It was because it was extremely small.

"Its sharp point is not matter, but a rule."

"In a point beyond the theoretical limit, no matter or energy can exist independently. Only a rule can exist there, forming an extremely destructive point."

"The rules of this point are the incredibly vast Extreme Point and Destruction two rules' mysteries interweaving together."

Luo Feng's Primordial Blade Path also pursued the destructive power where All Things Can Be Cut, but it fell far behind compared to

Demon Ruins' natural gift.

"Here I come." Demon Ruins' voice roared through the heavens and earth; he crashed back and forth, clashing with Luo Feng time and again! Luo Feng, too, initiated confrontations repeatedly, rapidly familiarizing himself with the opponent's destructive techniques.

"My 'Extreme Point' is Unbreakable, but it is too small! Even if the enemy is destroyed at one point, the injury is very minor." In battle with Luo Feng, the more Demon Ruins felt its own powerlessness, "Kafu once told me... he had seen a sculpture, and I could evolve toward that form."

"Split myself? Split into 125 of me? I've tried, once split, each sub-body would be very weak, my strength declining instead of rising." Demon Ruins also pondered the way of evolution.

Yet even with Kafu's help, knowing there is such a direction.

But he still did not understand, how to evolve in that direction? How to become more powerful after evolution?

"I understand!"

Luo Feng, who had long mastered the 'Power of Breaking', had accumulated profound experience in the Primordial Blade Path. After repeated confrontations with the Demon Ruins, he finally glimpsed the sharp aspect of the secret of destruction.

The reason Demon Ruins possessed such destructive power was that it inherently contained 'Power of Extreme Point' and 'Power of Destruction', making its power terrifying. And the 'Power of Extreme Point' also granted it the ability to be undying and immortal.

It and the Initial represent two extremes. However, for them to make any slight improvement is extremely difficult.

Because their inherent power is already near perfect.

What Luo Feng glimpsed was merely the mystery of destruction and he couldn't grasp this innate technique of the Demon Ruins.

After that glimpse, Luo Feng began experimenting with other techniques in the Primordial Blade Path. The Demon Ruins, enjoying the battle, summoned 90 world envoys to jointly attack Luo Feng, yet even together they were still lacking.

With Luo Feng's Blade Formation deployed, he could easily breach through those world envoys.

Until suddenly, the Demon Ruins stopped, floating there as if in a daze. The world envoys continued their assault on Luo Feng according to previous orders.

Seeing the opponent in a daze, Luo Feng did not disturb them. He took a step through space and time, breaking away from the world envoys and proceeding to the 23rd layer.

...

This confrontation was within the expectations of the various forces in the Endless Primordial Space. The flaw of the Demon Ruins was obvious, and no one believed it could rival Luo Feng!

The 23rd, 24th, and 25th layers of the Abyss of Destruction.

These are the layers that neither Yuan, Ice Peak Ancestor, Endless Snake Ancestor, nor the Demon Ruins could conquer in the Destruction World.

Luo Feng traversed layer by layer, honing his blade technique, easily passing through these three layers to reach the 26th layer.

This layer was where the Starlight Lord resided.

Temporarily residing on the 26th layer, Luo Feng did not engage with Starlight, causing disappointment among many Ancestors watching from afar.

...

Land of Origin.

Yuan, Jin, Wulan, Ming Huang, Nai Gu, Starlight, and Mo Man, the

seven of them gathered to meet Luo Feng.

"Luo Feng." Yuan smiled, "Do you need opponents now?"

"There's no need for our sparring among lords to be known to the outside world." Starlight smiled, "The seven of us will accompany you one by one."

Jin looked at Luo Feng, "I want to see whose Destruction Path is stronger, yours or mine!"

The lords were well-aware of each other's capabilities. They all knew Luo Feng became a lord through the Primordial Life and Death Dao focused on 'Life'. Then, the easiest second path for Luo Feng at the Primordial Level must be the pathway focused on Destruction.

"Among us seven, I became a lord the latest." Mo Man smiled, "Let me go first!"

Luo Feng smiled, "Thank you, everyone, I will not refuse!"

While roaming in the Abyss of Destruction, he hadn't confronted any lord in battle. Yet, in reality, lords mastered at least one Primordial Level Dao, making them the most masterful in combat skills.

Thus...

In the Land of Origin, Luo Feng and the seven lords maintained only ten percent energy reserve, competing one after another.

These confrontations made Luo Feng feel the threat brought by each Primordial Dao the others wielded! Though in terms of energy reserves, the others were far inferior to Luo Feng, the lords surpassed Luo Feng in their areas of expertise.

These engagements tested the 'Primordial Blade Path' from various aspects.

Luo Feng's understanding deepened significantly, and he became extremely clear on what kind of 'Primordial Blade Path' he desired.

...

The 26th layer of the Abyss of Destruction.

Luo Feng, sitting cross-legged, opened his eyes to see the distant Starlight Lord.

"If you wish, you should be able to establish the Primordial Blade Path, right?" Starlight Lord looked at Luo Feng.

"Yes, I can establish the Primordial Blade Path at any time."

Luo Feng nodded in acknowledgment.

During the battles with the seven lords, he had an overwhelming urge to establish the 'Primordial Blade Path'.

"But I have one more battle." Luo Feng looked towards the deeper Abyss of Destruction, "After the battle with Sha Zhou, it will be the most suitable time to establish the Primordial Blade Path!"

Starlight nodded in agreement with a smile.

"I am setting off now." Luo Feng said, and with a step, he headed to the 27th layer.

Sha Zhou will be the last opponent in this training, also the one with the most terrifying destructive power and breaking power.

And at this moment, the eyes of more than two hundred Ancestor-Level and Lord-Level beings in the entire Endless Primordial Space pierced through space and time, unwilling to miss this battle.

Chapter 464 - 40: Primordial Blade Path (End of Volume)

Chapter 464: Chapter 40: Primordial Blade Path (End of Volume)

The Abyss of Destruction, 27th Layer.

The ground was a colorful crystal, and upon this crystalline land, a woman in a gray robe stood.

Winds that could obliterate a world-level primordial life blew, yet they could not move a hair on her head. Her gaze pierced through the obstacles of time and space, focusing on Luo Feng, who was on a higher layer.

She had long awaited this battle.

Swoosh.

A man with black hair draped in a blood-colored robe finally descended to this layer of the Destruction World.

"Luo Feng." Sha Zhou smiled slightly, her smile possessing a strange allure.

At this moment, various forces within the endless Primordial Space, including some very secretive existences, were watching this battle!

...

"Sister Sha Zhou." Yuan watched, seeing Sister Sha Zhou smile once more.

Sha Zhou was of a very reclusive nature, wholeheartedly pursuing the path of the strongest! Her smile was very rare, and in Yuan's memory, it had occurred only a limited number of times.

Ever since the Cultivator Camp and the Ice Peak Camp drifted apart, he and Sister Sha Zhou had rarely acted together.

"Among many ancestors, Sha Zhou's 'Destruction Talent' is the highest. Relying on two highest level powers, she can exert such might," Starlight also marvelled.

Ice Peak Ancestor, Infinite Snake Ancestor, Kafu, Feather Emperor, Demon Ruins, and the like—all mastered the two highest level powers, with a combination considered extremely strong. Even among them, there are those who mastered the Mysterious Land.

But Sha Zhou, among the ancestors, was uniquely powerful!

"In terms of destruction and damage, I am also a notch below her," said Starlight. He matched Sha Zhou only through multi-faceted methods.

"Sister Sha Zhou is very pure," Yuan nodded. "If we talk about who among this group of ancestors might understand the 'Primordial Level Dao,' I think Sister Sha Zhou has the most potential."

...

"Sister Sha Zhou."

The Ice Peak Ancestor gazed from afar. Long ago, before he established the Ice Peak Camp, his strength was far weaker than it is now. He and Sister Sha Zhou once roamed the endless Primordial Space together, exploring some Mysterious Lands. Back then, Sister Sha Zhou protected and cared for him.

After the Ice Peak Ancestor reached the Undying and Undying level, Sha Zhou began to let go.

"Sister Sha Zhou, I believe you will win," the Ice Peak Ancestor said. "Even though Luo Feng's talent is high, he is still not as strong as you."

Sister Sha Zhou had not lost since becoming invincible.

******

On the 27th layer of the Abyss of Destruction, on the crystal land, Luo Feng and Sha Zhou looked at each other.

"I've waited for you for so long," Sha Zhou smiled, her eyes full of battle intent. "Luo Feng, give it your all."

"Sha Zhou, you too, give it your all!" Luo Feng's battle intent was equally fierce.

He was already at the point where he could open up the Primordial Blade Path at any moment! But Luo Feng still wanted to see what kind of strength the longest undefeated Sha Zhou in the endless Primordial Space held.

For Luo Feng, finding a suitable opponent at his current realm was rare! Sha Zhou was a suitable opponent!

"Be careful now." As Sha Zhou's words fell, her gray-robed figure naturally dissipated, transforming into an endless flame.

This flame, in an instant, spread through this layer of the Destruction World.

The crystal land, as the matter of the 27th layer of the Abyss of Destruction, was extraordinary, yet under the pervasive flames, it melted into a colorful flowing liquid. More colorful 'mist' rose, mingling within the flames.

The flame was an ashen white! Burning everything!

"Sizzle sizzle sizzle~~~~"

Luo Feng stood there, his protective energy layer resisting the flame's invasion. He watched the land melt and flow, understanding that it had likely melted and solidified countless times before.

"Fire as the root, destruction as the fruit!" A cold voice resonated in the endless flames.

In the endless flames, a black flame coalesced! This black flame, the moment it appeared, was already burning on the surface and inside Luo Feng's body simultaneously.

In the blink of an eye, the endless flames throughout the Destruction World transformed into black flames. These black flames surrounded Luo Feng, burning both inside and out.

"Ignoring all defense? Burning everywhere?" Luo Feng felt his body consume about one-tenth of his energy reserve every breath, a shocking realization.

This destructive capability was too terrifying.

"I knew it, Lord Luo Feng possesses the power of life. For this battle, I created the 'Life Burning' technique. Yet it still doesn't threaten Lord Luo Feng."

A voice echoed through the heavens and earth.

"Next, I'll use my most confident killing move; I'll burn my True Body to unleash my strongest strike." The cold voice echoed everywhere.

"Please." Luo Feng stood there, patient enough. He very much wanted to witness Sha Zhou's strongest strike burning her True Body.

"Buzz!"

In the void of the heavens and earth, flames enveloped Luo Feng.

The black flames, already burning inside and outside Luo Feng's body, instantly converged.

"Origin Great Destruction?" Luo Feng's expression changed. All the flames spreading throughout this layer of the Destruction World instantly gathered inside Luo Feng's body. Luo Feng couldn't stop this process.

This flame was formless and intangible, impossible to obstruct.

When they all condensed inside Luo Feng instantaneously—

Something akin to the 'Origin Great Destruction' explosion began!

The most terrifying part of this explosion was the ultra-high power at the point where all flame forces condensed, 'leveraging' a certain rule's mystery, initiating the self-destruction of the entire Destruction World! It triggered the self-destruction of space-time! Triggered the self-destruction of all forces...

Even Luo Feng's own Physical Body, his own power, was affected.

"Boom!"

Luo Feng delightedly felt the terrifying great destruction happening deep within his body.

In his delight, Luo Feng urged his body to explode, making his energy momentarily spread throughout the entire layer of the Destruction World.

"This is what I wanted to see," Luo Feng was immensely delighted.

His Primordial Blade Path revolves around the 'Great Destruction System' as its core, striving for the same amount of energy to exert 'supreme might.' Yet Sha Zhou's bout utilized only about a tenth of Luo Feng's energy reserve, but its impression reached seven to eight-tenths or more of Luo Feng's Origin Great Destruction.

The key was, her move was indefensible! It could directly erupt at the enemy's innermost core!

In comparison, Luo Feng's Origin Great Destruction was far clumsier.

"Boom～～～"

In this terrifying destruction, this layer of the Destruction World transforms into endless energy flow.

Yet these energy flows partially condense once again, forming the figure of Luo Feng! Still maintaining seventy percent of the energy reserve. And as time goes on, rapidly recovering.

"Your energy recovery is so fast." Even endless energy restores into

the appearance of a gray-robed woman 'Sha Zhou,' who looked at Luo Feng in amazement. She controlled this layer of Destruction World to recover so quickly, "But within the Destruction World, my power flows endlessly, I can continuously use killer moves!"

As soon as the words fell.

Boom—

Luo Feng slightly sensed and voluntarily scattered his body.

"Boom! Boom! Boom!"

This 27th layer of the Destruction World erupts into great destruction repeatedly, each time an attack burning the True Body, then the residual power utilizes the strength of the Destruction World to execute another killer move.

The continuous killer moves, ceaselessly! Making this layer of Destruction World seem like boiling water.

"Sha Zhou, you can't do anything to me."

Luo Feng's voice rang out through every part of the Destruction World, "Your killer move unleashes at a single point! My body is scattered across the heavens and earth... you can only slightly injure me each time."

"You also take one move from me! This is a new killer move I've comprehended through venturing into the Abyss of Destruction!"

Luo Feng, amidst Sha Zhou's incessant destruction, naturally understood the 'Secret of Destruction' of Sha Zhou's move due to his accumulation powerful enough to establish the Destruction Path. However, Sha Zhou's move is a combination of 'Flame Power' and 'Power of Destruction,' and Luo Feng could only research the aspect of destruction, unable to emulate.

But seeing Sha Zhou's move also increased Luo Feng's insight into the Great Destruction System at the core of the Primordial Blade Path.

Reaching this step, Luo Feng could no longer suppress it.

An immensely profound insight, naturally in his heart, sketched the Secret Patterns, forming a complete Primordial Blade Path.

Everything was as if naturally conceived.

"Swoosh!"

Luo Feng stood there, swinging the knife in his hand.

This swing sent a shiver throughout the heart of Sha Zhou, who was the embodiment of endless flame, seeing a stronger direction.

This knife carried an unshakeable will, and when it was swung, the 27th layer of this Destruction World utterly cracked, even extending to crack the deeper 28th layer, and further into the 29th layer!

This knife penetrated through three layers of the Abyss of Destruction!

"Swoosh!" Even Sha Zhou's intangible fiery figure was consumed, with eighty percent of the body erased in an instant, due to the severe damage to the 27th layer of the Abyss of Destruction, leaving momentary power shortages for Sha Zhou's recovery.

The broken 27th layer of Source of Destruction, the completely cracked 28th layer, the half-cracked 29th layer...

"So strong." Sha Zhou's figure in the gray robe condensed, with a blazing look in her eyes.

Too strong.

In comparison to other Ancestors, she was extraordinarily powerful.

But compared to her, Luo Feng was extraordinary.

"Primordial Life and Death Dao, Primordial Blade Path." Just now, Luo Feng naturally combined two Primordial Level Daos, exerting a terrifyingly formidable knife without holding back.

"I lost." Sha Zhou opened her mouth, she had lost, yet she was incredibly excited.

She saw the way forward.

It was justified that the Mountain of Destruction set the Seven Layers of Test, with Lord Luo Feng completely suppressing her.

"Luo Feng, your knife can be deemed the most terrifying blade throughout the endless Primordial Space!" Sha Zhou said, "The entire Cultivator Camp will change because of you."

Sha Zhou also felt a bit complicated inside, she knew that the Ice Peak Camp couldn't compare to the Cultivator Camp anymore.

The Starlight Lord manipulated time and space, with impeccable strategy.

Luo Feng was unopposable.

Yuan Geng could perfectly combine all Lord powers.

With these three present, the foundation of the Cultivator Camp was set! Unshakeable!

"You're overrated." Luo Feng was still pondering the Primordial Blade Path he just comprehended.

Sha Zhou looked at Luo Feng, hesitating a bit, then conveyed through mind transmission, "Luo Feng, based on your Destruction Talent, you should have been to the Mountain of Destruction, right?"

Luo Feng looked at Sha Zhou and nodded, "Yes."

"How many layers of test did you pass?" Sha Zhou inquired further via transmission.

"Three layers," Luo Feng didn't keep it a secret.

Sha Zhou realized, "Indeed stronger than me."

Sha Zhou looked at Luo Feng, unable to suppress her eagerness, and transmitted, "I want a Destruction Fruit, if you can give me a Destruction Fruit, I can promise to fully support your Cultivator Camp in the future."

Luo Feng looked at Sha Zhou, surprised.

The Destruction Fruit is very precious, one fruit is equivalent to the empowerment of a regular Mysterious Land. But if Sha Zhou aligns with the Cultivator Camp, it on one hand signifies a departure from the Ice Peak Camp, and on the other hand, represents a significant increase in the strength of the Cultivator Camp, akin to adding a new Lord.

"You can come find me anytime." Sha Zhou transmitted.

She is a lone traveler, with no deep attachment to the Ice Peak Camp; she also grew weary of the Ice Peak Camp disputes. Moreover, the 'Ice Peak Ancestor' she cared about is already Undying and Undying, not needing her constant protection.

She consumed two Destruction Fruits, and to acquire the third Destruction Fruit, she was willing to stand with the Cultivator Camp.

However, she wasn't sure if Luo Feng would agree. After all, a Destruction Fruit is too precious.

"I need to think about it carefully." Luo Feng replied.

"No rush." Sha Zhou had patience, "Would you like a World Envoy to assist you in sparring?"

"Alright." Luo Feng smiled slightly.

(End of this episode)

Pause updates tomorrow, the day after tomorrow starts updates for the final episode!

Swallowed Star 2 Land Of Origin is estimated to conclude in August! The story of Devouring Starry Sky, beginning from 2010, will reach its final conclusion in August 2025, marking the end of Luo Feng's story.

Tomato also extends thanks to everyone for your continued support.

Chapter 465 - 12: A New Era

Chapter 465: Chapter 12: A New Era

In the Innate Primordial Camp, within the towering great hall, the thoughts of the Nine Emperors descended one by one.

"The battle between Luo Feng and Sha Zhou, did you all see it?" The Infinite Snake Ancestor spoke.

"That blade strike was truly terrifying!" lamented the Silent Extinction Ancestor.

After Luo Feng fully mastered the Primordial Blade Path, he unleashed a terrifying strike by combining two Primordial level Daos! That strike pierced through three layers of the Abyss of Destruction, astonishing many ancient beings.

"In history, there has never been a one-on-one killing of an Ancestor," said the Infinite Snake Ancestor. "But Luo Feng's offensive power has surpassed that of Starlight and Sha Zhou! He stands at the highest level of the entire Endless Primordial Space! I have a premonition that he has the potential to kill an Ancestor one-on-one!"

"Ancestors who have lived till now are not so easy to kill," spoke the Mother of Space-Time.

At least in some future possibilities she saw, there was no scenario where an Ancestor was killed one-on-one.

To become an Ancestor, one's Life Core has evolved to a level akin to the Source World Origin, possessing extremely strong life-preserving methods.

Taking as an example the three former Lords of the Blood Crane Territory—the Blood Lord mastered the highest level 'Blood Power,' able to transform into a Blood Sea, with energy reserve and life recovery abilities only slightly weaker than Luo Feng. The Crane Lord mastered 'Undying Power,' a weakened version of Wulan. The Shadow Lord mastered 'Shadow Power,' also difficult to deal with.

These three were considered ordinary among many Ancestors, unqualified to occupy any layer of the Abyss of Destruction, nor qualified for a seat in the Land of Eternity.

As for some who are more formidable, like the Lotus Prison Mountain Master! Even with all eight Cultivator Camp Lords attacking together, they can at most force him into a disordered retreat.

Those even more formidable are truly undying and undying.

As for those with severe life-preservation deficiencies? Such are rare. Throughout the long years of conflict among various forces, these kinds of Ancestors are the first to be eliminated. The Innate Primordial Camp, Ice Peak Camp, and some previous powerful forces have all witnessed the fall of many Ancestors.

"Mother of Space-Time, did you see it?" inquired the Giant God Emperor.

"In some future visions I've seen, there's no image of a one-on-one killing of an Ancestor," said the Mother of Space-Time. "But as soon as he cooperates with Starlight, or he cooperates with Yuan, they can slay an Ancestor! I've seen this future possibility!"

The other eight felt a sudden tension.

In the past, it was typically large-scale wars that led to the fall of Ancestors!

"Two Lords joining forces can assassinate an Ancestor?" the Inference Fire Ancestor expressed worry. "Luo Feng can suppress all life fluctuations, as can Starlight and Yuan."

Suppressing all fluctuations makes it very difficult for the Ancestors' many sensing Secret Techniques to detect anything.

Because Secret Techniques that probe causality and vitality are too difficult to avoid.

However, the Cultivator Lords are existences that have mastered the Primordial level Dao. Luo Feng, Starlight, Yuan, and Mo Man, these four can completely conceal themselves, making it impossible for the same level to detect them. Wulan, Jin, Ming Huang, and Nai Gu, those four, on the other hand, cannot hide themselves.

"Previously, they couldn't launch sneak attacks. Because even if Starlight, Yuan, and Mo Man joined forces, the resulting force would find it difficult to eliminate an Ancestor quickly. I could immediately descend through the 'Infinite World' to provide support," stated the Infinite Snake Ancestor.

The Infinite Great Serpent Clan can all descend through the Infinite World, which is their unique characteristic.

"Indeed," continued the Mother of Space-Time, "but the offensive power unleashed by Luo Feng is too terrifying. By himself, he can destroy the majority of an Ancestor's power. The Starlight Lord and Lord Yuan only need to pursue and kill the remaining power. Therefore, any collaboration between Luo Feng and Yuan, or Starlight, can potentially kill an Ancestor in a short time."

Starlight and Yuan are both very adept at pursuing and killing the remaining power.

"The era has changed."

"The rise of Luo Feng signifies the entry of the entire Endless Primordial Space into a new era," stated the Mother of Space-Time. "In this new era, the fall of Ancestors becomes easier."

All the Nine Emperors understood that in past eras, it was only occasionally in large-scale wars that Ancestors fell.

But from now on, any collaboration between Luo Feng and Yuan, or Starlight, can suppress all fluctuations, appearing beside an Ancestor without any forewarning! Assassinating an Ancestor in a short time.

"Our strategy for dealing with the Cultivator Camp should also

change," said the Infinite Ancestor solemnly. Although it was undying and undying, it did not want to see the Innate Primordial Camp weakening.

When the camp weakens, it means fewer resources owned. As one of the Nine Emperors, it would also receive fewer resources!

"Giant God Emperor, if you still refuse to act, once the entire camp weakens, the resources for your Giant God Race cannot be ensured," the Infinite Snake Ancestor looked at the Giant God Emperor, "Surely we can't be the ones fighting desperately while you enjoy the resources, right?"

The Giant God Emperor nodded slightly, "I understand, our Giant God Race will not shirk responsibility."

The Giant God Race boasts more than ten Ancestors, plus numerous world-level and high-level primordial level races. As the second largest race in the entire camp, their resource consumption is enormous.

"In future wars, the strategy should change as well," the Initial suddenly suggested, "I suggest focusing on preservation, with killing as a secondary objective."

"I agree," said the Mother of Space-Time, "In previous wars, we always aimed to kill the enemy! And we treated the Cultivator Camp as a grindstone, occasionally losing one or two Ancestors, considering it as 'weeding out' the weak."

"Future battle arrays need to focus more on Ancestors with strong defensive capabilities, taking them as the core."

"Only by doing so can we guarantee absolute superiority," said the Mother of Space-Time.

With a battle array primarily focused on killing, by aligning several Ancestors who can perform soul attacks simultaneously, this kind of arrangement enhances attacking power but severely weakens life-preservation capabilities.

"For example, using Ancestors who have mastered the highest level

’Life Power,’ ’Defense Power,’ ’Water Power,’ ’Earth Power,’ ’Power of the World,’ ’Power of Matter,’ and ’Domain Power’ as the core, to ensure they are unshakeable," the Mother of Space-Time spoke, reflecting on some future possibilities.

Although what it had seen was far less than the Starlight.

At least seeing some successful directions can help avoid many detours.

An ordinary Cultivator Lord can generally match two or three Ancestors working together.

Before the Cultivator Camp, seven Lords united, bolstered by Yuan’s formations to multiply their battle strength, yet they were at an absolute disadvantage! They relied on Starlight to observe countless future possibilities, Yuan’s formations for sustenance, and the intricate cooperation of the Lords’ Daos, with ’defense’ as the main strategy, occasionally retaliating... Even so, they repeatedly failed, and territories fell one by one.

After Luo Feng became a Lord, the Giant God Emperor and two of his companions joined the battle! The three of them directly captured Luo Feng, while the Infinite Snake Ancestor trapped Wulan.

Only Luo Feng’s Origin Great Destruction caused damage and induced panic among some Ancestors. They felt that it wasn’t worth risking their lives to fight against a group of undying and eternal Lords for merely 3600 World Groups, resulting in a ceasefire.

"If we don’t ensure the Ancestors’ safety, I’m afraid many of the weaker ones will refuse to participate in the war," said the Silent Extinction Ancestor.

"I never thought we would also be forced to prioritize survival in setting up our Battle Array," lamented the Inference Fire Ancestor.

Who were they?

They were the first major camp, occupying half of the Endless Primordial Space!

The Cultivator Camp, Ice Peak Camp, and numerous scattered forces combined to occupy the other half of the territory.

"The cultivators have established their foundation," said the Infinite Snake Ancestor, "From now on, they will surpass the Ice Peak Camp and become our greatest adversary!"

The Ice Peak Camp, even with 12 undying and eternal beings, also had an additional 26 Ancestors.

Yet, for the Born Primordial Camp with over 120 Ancestors, the current threat from the Cultivator Camp was greater.

"Countless innate Primordial Lives will continuously emerge as world-level primordial, even Ancestors," said the Mother of Space-Time, "As long as we prioritize survival and value each Ancestor's life, it will become extremely difficult for the Cultivator Camp to kill even one Ancestor! In the endless long years that can be foreseen, we will continue to be the most formidable force!"

...

"It cannot be suppressed any longer."

The undying and eternal beings of the Ice Peak Camp realized this the moment they witnessed Luo Feng's blade.

At this moment, the Cultivator Camp officially surpassed the Ice Peak Camp!

...

"What a terrifying blade!"

The Blood Lord, Crane Lord, and Shadow Lord of the Blood Crane Territory Clan watched this battle from afar.

They had enmity with Luo Feng! First, the Shadow Lord led his followers to plunder the Cultivator Territory, then Luo Feng forcibly refined the Blood Crane Territory and seized it. Their enmity was irreconcilable.

"Although our survival ability is strong," the Blood Lord watched from afar, "now Luo Feng is too terrifying. If five or six Cultivator Lords teamed up to encircle and kill us, they could succeed. We must align with a faction."

Previously, relying on their strong survival ability, they hadn't hurried to join any faction.

"Indeed, we must join a faction." The Crane Lord and Shadow Lord agreed, as Luo Feng was now much more terrifying than when he refined the Blood Crane Territory! Had they known Luo Feng would become so fearsome, the Shadow Lord would have never dared to plunder the Cultivator Camp's territory.

"The Innate Primordial Camp is the strongest and has always invited us," the Blood Lord said, "Let's join the Innate Primordial Camp."

"They are mortal enemies with the Cultivator Camp and will surely protect us," the Shadow Lord agreed.

With their decision made,

Soon they led the entire Blood Crane Territory Clan to seek refuge with the Innate Primordial Camp.

The Innate Primordial Camp, building their battle formations with 'survival first', naturally welcomed the Ancestors with strong survival abilities, such as the Blood Lord and his companions, with open arms.

******

Luo Feng was unaware that his blade had carved out a new era.

His unparalleled power above Sha Zhou made ordinary Ancestors gradually lose their sense of security.

Indeed, as individual limits rise higher, the situation for ordinary Ancestors becomes more perilous! In future years, Ancestors will act more cautiously, unlike their current nonchalance.

Even the most powerful Innate Primordial Camp has chosen to establish Ancestor battle formations with 'survival first', underscoring

the perceptiveness of these Ancestors.

"Sha Zhou, thanks." Luo Feng exited the 27th layer, his figure like a blade cutting through the temporal barriers, arriving at the 28th layer of the Abyss of Destruction.

Sha Zhou gazed into the 28th layer, where the combined might of thirty World Envoys was terrifying. Both Sha Zhou and Starlight had tried in vain to penetrate this layer. However, Luo Feng, wielding a blade light strong enough to destroy everything, effortlessly slashed through all the World Envoy barriers, easily leaving a life imprint on the Shadow of Origin at the 28th layer.

After mastering the 28th layer, Luo Feng did not rush to push further but instead settled there to create a complete combat technique based on his Primordial Blade Path.

At this moment, the seven Avatar Lords at the Land of Origin smiled brightly.

"The era has changed," said Starlight, smiling.

From now on, the offensive and defensive stances have completely switched!

———

The final Chapter of 'Lord Luo Feng' is starting its updates; regarding Swallowed Star 2 Land Of Origin, if there are any loose ends, feel free to comment.

Lastly, thanks to the new Alliance Hierarch 'Gentle Dragon Cat' for the reward!

Chapter 466 - 2: Combat Technique

Chapter 466: Chapter 2: Combat Technique

"I think, with the strength of our Cultivator Camp, the Three Thousand Six Hundred World Groups are too few," Lord Nai Gu said with deep green skin. "We can now definitely command Eight Thousand World Groups!"

"Oh, Nai Gu, don't you often say wars can be lost?" Jin swung his tail covered in scale armor slowly and chuckled sneakily. "And now you're the first to call for war?"

"I always felt that strength and territory should match," Lord Nai Gu said. "Before Luo Feng appeared, we seven lords were indeed weak, unable to even contend with the Ice Peak Camp, let alone the Innate Primordial Camp. And indeed, the result of the fight was as expected, with world group after world group faltering."

"It's not that we wanted war; it was the Innate Primordial Camp that wanted to eradicate our foundation," Yuan said. "We had no choice but to fight!"

"I understand, it's all because we were weak. Even if we're willing to compromise, they want to uproot us," Nai Gu smiled. "But it's different now. Luo Feng has mastered two Primordial Level Daos! And they're Life and Destruction, both extremely adept in battle... A single lord like him is equal to two Sha Zhou! Our overall strength has surpassed the Ice Peak Camp and can pose a certain threat to the Innate Primordial Camp."

"The Innate Primordial Camp occupies fifty percent of the Endless

Primordial Space! Ice Peak Camp also occupies twenty percent, yet we hold just ten percent? It doesn't match our strength at all," Nai Gu said.

The Endless Primordial Space also has many dark desert territories, with resources nearly negligible.

The Innate Primordial Camp occupying fifty percent territory refers to the valuable territories.

"Our ten percent of the territory is the most densely packed with Source Worlds," Wulan said. "Simply in terms of the number of Source Worlds, it's much more than the Ice Peak Camp's."

"Everyone, please don't rush," Yuan spoke.

Everyone looked at Yuan; they were still willing to listen to Yuan.

"My 'Primordial Rule Operation Path' is not far from a breakthrough," Yuan smiled. "We will make decisions after my breakthrough."

"Breakthrough?" Ming Huang, Mo Man, Jin, Wulan, and others were somewhat excited.

The lords all knew well that currently, in terms of direct combat, Luo Feng is the fiercest and strongest! When it comes to mastering time and space without errors, it's naturally Starlight's forte. But regarding the importance to the entire camp... Yuan is the most important.

His formation can combine the Primordial Level Daos of each lord to form a perfect battle array, boosting the overall strength several times! Allowing the lords to counter the massive armies of the Innate Primordial Camp without fearing the army of the Ice Peak Camp!

"How long?" Jin asked eagerly.

"As little as tens of thousands of epochs or as much as millions of epochs," Yuan said.

The hearts of the lords present rejoiced; being able to state a precise timeline means Yuan has full confidence in a breakthrough.

Tens of thousands to millions of epochs? Such a time is trivial to the lords.

"Then we shall wait," Ming Huang said. "After Yuan's breakthrough, our overall strength will be even stronger, and the resistance encountered during territory expansion will be much reduced."

Starlight watched this scene unfold.

"Luo Feng has finally become the strongest in direct combat in the Endless Primordial Space, and Elder Brother Yuan is about to break through; everything seems perfect," Starlight thought. "But in reality, in the vast years to come... there's no possibility of a new lord breaking through."

In countless future timelines, many of his avatars roam and observe.

It can be confirmed that the current World Level Primordial Lives in the Cultivator Camp have no hope of achieving lordship.

Those 'invincible beings' within the Braided Cage, brought to the Initial World, even compared to Nai Gu, let alone Luo Feng, fall far short, without hope either.

The ninth lord is far, far away!

"Because of the recent continuous improvement of the camp's strength, every one of them is brimming with fighting spirit. Luo Feng has previously intercepted all World-level Primordials devouring Source Worlds; his ambition might fear larger," Starlight sighed secretly. "But even if more territories are taken, they still need to be defended!"

"With just eight lords, how much territory can they defend?"

Starlight gazed upon the scene.

"No matter what, with a powerful external enemy, the lords can also set aside their differences and unite."

"The days when the lords are united are quite good."

Starlight cherishes this time dearly.

******

Beside the Origin Continent Origin World, within the Mysterious Land 'Blood Crane Territory,' Luo Feng was in retreat, creating combat techniques.

On one hand, he occasionally needed to test techniques, and in the Abyss of Destruction, it was easy to penetrate two or three layers of Destruction World. On the other hand, to create combat techniques, naturally, secrecy is needed.

Within the Blood Crane Territory he controlled, privacy from all probing was achieved.

"Boom~~~"

A terrifying destructive momentum erupted deep within the Blood Crane Territory.

Repeated Origin Destructions, with some powers already surpassing the might Luo Feng exhibited during the camp war with 'Origin Great Destruction.'

"Forget flexibility, pursue ultimate power!"

Luo Feng desired to merge the Primordial Life and Death Dao, Primordial Blade Path, and create suitable combat techniques.

The first set of techniques to create was the 'Primordial Destruction Battle Technique,' which had shown remarkable results in the past! Luo Feng's current energy utilization had greatly improved, allowing a single power to produce greater destructive force. Even the destruction caused by working a formation of '3.6 billion Origins' was nothing less than the previous Origin Great Destruction.

Time passed, and after spending over three hundred epochs.

The first set of 'Primordial Battle Technique' was completely perfected!

This set of techniques is divided into nine techniques; the first three are commonly used lethal moves, each of which can be performed every one or two moments. But the later six techniques explode in different ways with 1.08 billion Origins, all considered Forbidden Techniques. Performing a Forbidden Technique once greatly reduces power.

The power of the forbidden technique is three to four times that of the past 'Origin Great Destruction'.

The previous 'Origin Great Destruction' represented the limit of the Endless Primordial Space's power, and Sha Zhou's ultimate move reached about seventy to eighty percent of the initial strike by Luo Feng.

But now... is it three to four times stronger than before?

"From now on, what about group battles? I can crush a group of Ancestors with a single strike!" Luo Feng's 'Origin Battle Technique System' is aimed at group combats.

"Begin the next set of combat techniques." Luo Feng began creating the second set of combat techniques, the 'Life Cutting Battle Technique'.

This battle technique is silent, does not cut matter, does not cut energy, it only cuts the profound and mysterious 'vitality'.

The biggest 'flaw' of the Life Cutting Battle Technique is that the energy transfer limit through vitality is fixed! Luo Feng can only find ways to enhance the destructive power of 'Life Cutting'.

This battle technique seems to lack power, but it can have marvelous effects at critical moments.

After more than two hundred eras, the second battle technique was perfected.

"The third set of combat techniques, the Shadow Blade Technique, the sword technique is like a shadow, it must hit!"

Because it seeks to ensure every hit, the power of the blade technique

must be perfectly controlled, which also limits its power.

This blade technique can strike enemies from extremely long distances.

Separated by several World Groups, Luo Feng can still strike!

Of course, the further the distance, the higher the difficulty, and the lower the power of the blade technique. But the 'vast range' of this blade technique can serve many purposes. It's extremely difficult for the enemy to completely escape Luo Feng's pursuit range.

"The fourth set of combat techniques, the Destruction Blade Technique! This is a close-range blade technique! It doesn't seek to hit, but to... destroy everything around!" When the distance is relatively close, there is no need to worry about hitting, just cover the entire area.

Everything within a certain range is annihilated!

...

A strand of fluctuation merged into the entire Endless Primordial Space's fluctuations, drifting along for endless years, sensing everywhere, understanding and feeling the various aspects of the endless Primordial Space from the perspective of 'a single fluctuation'.

Suddenly, a special fluctuation appeared.

"Hmm?"

A wisp of fluctuation transformed into a tall and thin man in a black cloak, he is Lord Mo Man.

Lord Mo Man carefully sensed this special fluctuation, his eyes lit up. Among countless fluctuations, this special fluctuation blended in, seeming unremarkable. But Mo Man, who mastered the 'Primordial Fluctuation Dao', understood the extraordinariness of this special fluctuation.

"I've finally waited for it." Lord Mo Man smiled.

"Luo Feng, the Fluctuation Land has appeared, we need to set off immediately." Lord Mo Man transmitted the message from afar, "You can set off now, right?"

Within the Blood Crane Territory.

Luo Feng had been in seclusion here creating combat techniques for over 900 eras, consecutively creating the 'Origin Battle Technique', 'Life Cutting Battle Technique', 'Shadow Blade Technique', 'Destruction Blade Technique', and was now in the process of creating the fifth combat technique 'Clone Battle Technique', although this fifth technique was still under creation with many imperfections.

"Of course I can set off." Luo Feng immediately responded.

He had promised Mo Man long ago, and his combat technique system was relatively complete, just the right opportunity to test his methods.

"Good." Lord Mo Man was overjoyed, "Let's meet at the Mysterious Land 'Flame Mountains' near the Abyss of Destruction."

"I'll set off now."

Luo Feng was straightforward, the avatar at the 28th layer of the Abyss of Destruction immediately absorbed energy and grew to the 'main battle avatar' level, also carrying two suitable weapons, he set off promptly.

During his exploration of the Abyss of Destruction, Luo Feng had accumulated a total of 15 weapons, all on the same level as the Sky Splitting Saber.

Although he could exchange the Destruction Fruits in the Mountain of Destruction for sufficiently powerful weapons, Luo Feng was not in a hurry! He wanted to accumulate more Destruction Fruits for better treasures.

"Hoo."

Luo Feng's main battle avatar left the Abyss of Destruction, traveling

with the aid of the Blood Crane Territory's power, he reached the Flame Mountains in just one day.

The vast and continuous flaming mountains before him distorted space, with energy flowing like water, presenting a rather unique scenery.

Of such 'flame-type' Mysterious Lands, seven have been discovered to date, with the strongest undeniably being the 'Fire Prison Wall', an enormous Mysterious Land stretching about a hundred World Group lengths. By comparison, the Flame Mountains are quite ordinary, comparable to the Blood Crane Territory.

"The Fluctuation Land, I've never heard of it before. Even Mo Man, who masters the Primordial Fluctuation Dao, discovers it only once in about a hundred thousand eras, it seems very unusual." Luo Feng was quite curious.

"Luo Feng."

Finally, accompanied by a voice, the black-cloaked Lord Mo Man descended and appeared.

"Thank you for this." Lord Mo Man said with a smile, he always lacked a helper like Luo Feng; with Luo Feng's presence, he could repeatedly use the forbidden techniques of his 'Primordial Fluctuation Dao', hoping to explore the Fluctuation Land in greater depth.

"It's nothing." Luo Feng smiled, asking curiously, "Where is the Fluctuation Land?"

"Follow me."

Mo Man smiled, and a wisp of fluctuation wrapped around Luo Feng, and they both vanished into thin air.

Chapter 467 - 3: Fluctuation Land

Chapter 467: Chapter 3: Fluctuation Land

Mo Man carried Luo Feng, transformed into a wave moving forward.

"How wondrous."

Luo Feng also felt it was quite novel. It was different from traversing space-time or using shadow power to escape. From a space-time perspective, it might be an extremely distant distance, but a wave could reach it in an instant! By connecting different domains through 'waves,' it could even instantly cross vast territories.

"Among the eight lords, the fastest is Starlight, followed by Mo Man." Luo Feng thought. Starlight moves as if stepping out of the Endless Primordial Space, turning the vast space into a map, walking on it.

But looking across the Endless Primordial Space, though Starlight is the fastest, the 'Infinite Great Snake Clan' can descend upon any part of the Endless Primordial Space at any time by using the unique properties of the Infinite World. In this aspect, the Infinite Great Snake Clan's travel efficiency is the highest. Even the world-level 'Infinite Great Serpent' can descend anywhere.

The only drawback is that the Infinite Great Snake Clan's descent and departure via the 'Infinite World' can only be used by themselves. They cannot carry any life.

"The Infinite World is indeed remarkable." Luo Feng also had to admit the extraordinariness of the 'Infinite World.'

The Infinite Snake Ancestor, with this blessing, can achieve Absolute Void! No matter or energy can harm it. I can only use 'Life-cutting' to hurt it, but Life-cutting has an energy limit.

"Now that I've mastered the Primordial Life and Death Dao and the Primordial Blade Path, I can try to find a Mysterious Land that suits me." Luo Feng thought.

The Blood Crane Territory, belonging to the ordinary Mysterious Land, most of the mysterious lands refined by lords and ancestors are of this level.

The Infinite World is considered an intermediate Mysterious Land and has various mystical features. This level of Mysterious Land is also the extreme that lords and ancestors aspire to control.

Eternal World, Abyss of Destruction, and Fire Prison Wall are recognized as the highest level of Mysterious Land. There's not a glimmer of hope for refining them.

Luo Feng also only thought of finding a suitable intermediate Mysterious Land.

"We're almost there." Mo Man suddenly spoke.

"Oh?"

Luo Feng continued to travel while also sensing carefully, vaguely detecting some 'waves.' Even Luo Feng, who didn't understand the mysteries of fluctuation, could sense the waves, indicating that the 'waves' were already very strong.

"Boom~~~" As they got closer, the intensity of the fluctuation quickly rose.

"The Fluctuation Land greatly affects the mind, guard your inner heart," Mo Man said.

"Alright." Luo Feng's 'mind consciousness system' is a key part of the Primordial Life Dao, and he was confident in handling it.

Then Mo Man took Luo Feng for the final crossing.

After this crossing, they had completely arrived at the Fluctuation Land.

"What is this?"

Luo Feng was shocked as he looked at the scene in front of him.

Great waves, materialized, converged here, and each wave produced a tremendous sound, even resonating with Luo Feng's heart! The myriad waves interwove to form an incredibly awe-inspiring song.

"How beautiful." The numerous vast waves wove together without the slightest confusion, perfectly forming a song.

This song's level of awe surpassed the countless intense emotions' impact of the Mountain of Destruction.

At this moment, Luo Feng, in a trance, saw the void continue and time evolve...

Saw worlds being nurtured and born like seeds...

Saw Mysterious Lands converging and forming...

Saw countless creatures—weak Source World creatures, numerous Innate Primordial Life, and even Ancestor-level life just born...

"How beautiful." Luo Feng was captivated by the song, which refined his heart. For world-level Primordial Life, hearing the first note would cause their soul to disintegrate and die. For some weaker-willed Ancestors, it could lead to a slumber...

For Cultivator Lords, they could resist.

If they withstand it, it becomes a heart-refining experience instead.

"Luo Feng's spiritual will is indeed extraordinary, feeling no pain but rather enjoyment," Mo Man observed from the side, patiently waiting for Luo Feng to listen to the song without rushing his exploration.

A day later, Luo Feng awoke as if from a great dream, instantly saying, "Mo Man, sorry to keep you waiting."

"I invited you here to help," Mo Man smiled, "Such a short time is nothing. By the way, what do you think of this song?"

"Remarkable."

Luo Feng marveled, "It's the most incredible song I've ever heard! Anyone who could play this song would solely, by this ability, become an Ancestor."

Throughout the process of listening, Luo Feng remained conscious. But the song was so pleasing that he didn't want to wake up, hence it lasted a day.

"This is a song of the entire Endless Primordial Space," Mo Man said.

Luo Feng appeared slightly puzzled.

"Everything in the Endless Primordial Space, including space-time, all things, Mysterious Lands, and even all life... has its fluctuations," Mo Man explained, "And the countless fluctuations gathered here formed the Fluctuation Land, naturally composing such a song."

Luo Feng understood that this had already transcended the realm of a simple earthly melody.

"The waves are constantly changing."

Mo Man said, "Every about one hundred thousand epochs, reaching the peak of fluctuation, it completely manifests. It remains visible for about one epoch, and then, with the fluctuation changes, it completely conceals. Even in its manifested state, only I can perceive and follow the waves to find it."

"Looks like you are fated with this place." Luo Feng smiled.

"I hope so."

Mo Man's eyes burned as he gazed at the vast, materialized waves before him, "I've tried repeatedly before but couldn't delve into the Fluctuation Land. This time, with you, Luo Feng, helping, I'm hoping to explore its core."

"I can’t understand anything about this Fluctuation Land. Whatever I need to do, just say it." Luo Feng looked ahead. To him, it was merely numerous vast, materialized waves.

Pure fluctuation—what is there to explore?

"When I need energy supply, Brother Luo Feng, please supply it with all your might," Mo Man said, "Let’s go in now."

"Enter?" Luo Feng was slightly confused. Enter where?

Whoosh.

Mo Man took Luo Feng with him, and they transformed into a wave that merged into a larger, more powerful wave, swiftly delving deeper by following the tune woven by these waves.

Luo Feng curiously observed his surroundings as they weaved through wave after wave.

"These countless waves can be called a super labyrinth. Only by mastering the art of primordial fluctuations can one decipher the labyrinth," Luo Feng speculated, his surroundings already a world of waves.

Gradually, Mo Man slowed down with Luo Feng.

Mo Man frowned, carefully sensing.

"I need to start burning my main battle avatar, Luo Feng. You need to support me constantly to keep me at my pinnacle state," Mo Man said.

"No problem," Luo Feng replied easily. Mo Man’s small frame has an energy reserve only about one percent of his own! All he needed to do was supplement Mo Man’s energy consumption, which was indeed easy.

Boom!

Mo Man’s aura surged, his power igniting as he began to forcibly influence the fluctuations.

He transformed himself into a source of fluctuations to impact the countless waves of the fluctuation land. This consumed a lot of energy, but with Luo Feng's help, Mo Man had the confidence to do it.

"Haha, the power is greater, and the effect is wonderful," Mo Man laughed, unable to squander energy like this when exploring alone. Now he could exert any technique without worrying about energy.

Through his exploration, Mo Man, taking Luo Feng with him, seemed to have become a part of the "fluctuation land," constantly delving deeper.

Clearing paths through mountains, building bridges over water!

Once his momentum was strong enough, Mo Man's progress was much smoother.

"Hmm?" A moment later, Luo Feng suddenly saw a massive object in front of him, resembling a "giant egg," expanding and contracting, producing numerous fluctuations.

Mo Man looked excited as he stared at it: "This is my first time here."

Mo Man extended his hand, a phantom wave hand lightly touching the membrane wall!

Upon touch, Mo Man immediately understood the structure of the membrane wall.

"Luo Feng, can you cleave open its membrane wall with a single blade? Please control the power," Mo Man said, "Just break the membrane wall without harming the inside."

"Alright."

Luo Feng nodded.

He could sense that this egg-like massive object radiated strong vitality, allowing him to determine the membrane wall's thickness through this vitality sense.

"Swoosh." Luo Feng instantly drew his blade.

A flash of the blade light.

With one-tenth of his energy reserve embedded in this strike, the blade light was extremely restrained without the slightest overflow! The blade light gently sliced the massive membrane wall, creating a silent crack.

With this blade, the membrane wall was split open without any power affecting anything else.

It seemed like an ordinary blade strike, but Mo Man understood that in the Endless Primordial Space, only Luo Feng could accomplish this!

Considering the sheer energy in this strike equated to ten of Mo Man's bodies and encapsulated the fusion of two primordial level paths, the momentum was self-evident. It was precisely such a tenacious membrane wall that split so easily.

"If it were me, I'd need to execute several techniques to break open the membrane wall without internal damage," Mo Man thought, immediately taking Luo Feng with him through the newly opened crack.

After they entered, the crack in the membrane wall healed entirely in just a few breaths.

Inside the membrane wall.

Mo Man and Luo Feng stood on a vast land with a stone-like heart floating above, emanating waves.

"Finally, I see it," Mo Man excitedly stretched out his hand, forming a massive phantom wave hand to lightly touch the stone heart. However, at the moment of contact, Mo Man's wave hand silently vanished.

"So strong," Mo Man observed.

"What is this?" Luo Feng examined the stone heart.

"This is the core of the fluctuation land," Mo Man smiled at Luo Feng, "In the history of Endless Primordial Space, only the two of us have seen this core. Up next, I need to delve into understanding this core. Luo Feng, if you're interested, you can try sensing it too."

"Don't mind me, go ahead with your comprehension," Luo Feng smiled.

Mo Man nodded and sat down on the ground, focusing on comprehending that stone heart.

He had longed for this day for who knows how long, naturally cherishing the time.

Luo Feng watched from the side, releasing a wisp of the power of life and death to touch the stone heart. At the moment of contact, he felt terrifying turbulent obliteration, along with an unfathomable vast pressure that annihilated his power instantly.

"So powerful!" Luo Feng was startled, "It seems like a source of fluctuations, requiring a profound mastery over 'fluctuations' to even attempt comprehension. Moreover, its internal structure seems tied with the endless primordial space. When I touch it, I face a crushing force equivalent to a trace of the endless primordial space's power."

Luo Feng had a premonition that even if his main battle avatar gave its all, the result would still be destruction.

Clearly, one couldn't be forceful with this stone heart! Only by gently and meticulously comprehending its mysteries could there be hope to refine and control it.

"Judging from its power, it's much stronger than the Blood Crane Territory Origin."

"I estimate it's at least an Intermediate Mysterious Land." Luo Feng speculated.

At least an Intermediate Mysterious Land, making refining incredibly difficult. Even if Mo Man had Luo Feng's help reaching this place, refining depended entirely on his own efforts.

Thanks to the Old Alliance Leader 'Venerable Xu Xin' for the reward!

Chapter 468 - 12: The Three Poles

Chapter 468: Chapter 12: The Three Poles

Within the membrane wall, Lord Mo Man was concentrated on studying the ’stone heart’, while Luo Feng sat cross-legged nearby, assisting with protection.

Looking at that stone heart, Luo Feng was quite curious, but he dared not use the power of life and death to touch it. Instead, he cautiously let a sliver of thought penetrate: "Trying to sense a thing or two."

As the thought penetrated, he sensed the terrifying fluctuations emanating from the stone heart, and with Luo Feng’s knowledge, he could not comprehend the mysteries of these fluctuations.

His thought perceived the stone heart itself, feeling an infinite heaviness. This heaviness surpassed everything Luo Feng knew about life forms, even Lord Wulan and the Initial Ancestor were not as substantial as the stone heart.

"Nothing to do with ’life’ or ’destruction’, I completely cannot understand." Luo Feng was somewhat puzzled, "Unlike the corpse materials of those Ancestors, with relatively stable Secret Patterns. I can at least distinguish different categories. But the mysteries I perceive in this ’stone heart’ are fluctuating and changing."

"If one does not understand the ’Fluctuation Path’, they cannot comprehend the changes." Luo Feng gently shook his head, "The threshold for enlightenment is genuinely high."

Even Mo Man, who mastered the ’Primordial Fluctuation Dao’,

needed my assistance to reach here.

One can guess that the enlightenment threshold is extremely high.

But the stronger the Mysterious Land, the higher the threshold to see the 'core'!

Like the Land of Eternity, although Luo Feng and others could take a seat in the Land of Eternity, none could see its core.

In the Abyss of Destruction, there have only been three spots for entering the 'Mountain of Destruction'! Even till now, the core has not been found, it is only known that 'passing the seven layers of test' can make one master the Abyss of Destruction.

For the Fire Prison Wall, only the Initial Ancestor can cross it by themselves. As for the core? It is also unseen.

"Compared to those three places, the Fluctuation Land, where one can see the core, is already not bad." Since Luo Feng could not make sense of it, he no longer wasted time and instead focused on his combat techniques.

The combat techniques I created by combining the Primordial Life and Death Dao and the Primordial Blade Path are only four types, I am also continuing to perfect the fifth one, the 'Clone Battle Technique', Luo Feng continued his improvements.

...

"The two of them should have entered the Fluctuation Land."

The cold-faced youth named 'Starlight' looked into the distance, although he could not spy on the Fluctuation Land, because Mo Man had once invited him to help, he knew the periodic cycle of the appearance of the 'Fluctuation Land'.

That time, he accompanied Mo Man, yet his temporal techniques were useless in the 'Fluctuation Land', and the help he provided to Mo Man was very limited. In the end, they still could not reach the core of the Fluctuation Land.

"Since they have not appeared for such a long time, perhaps they could enter the core?" Starlight smiled slightly, "In my judgment, the Fluctuation Land should be an intermediate Mysterious Land."

Some Ancestors will hide their methods. For instance, does Sha Zhou control a mysterious world? A bit more detailed intelligence about the Hermit? Does the Pu Cheng Ancestor control a mysterious world? These are difficult to verify.

But based on known information, only the 'Infinite Snake Ancestor' controlling the Infinite World can be considered an intermediate mysterious world. The Infinite Snake Ancestor successfully refining it may have taken advantage of the Infinite World's nurturing of life. After all, even 'world level Infinite Great Serpent inclinations' can leverage the power of the Infinite World, capable of descending upon any place within the Endless Primordial Space, and can also return.

"The Infinite Snake Ancestor can be considered the first to control an intermediate mysterious land."

"I wonder who will be the second to achieve it." Starlight mused, "I'll ask Luo Feng for help once his combat techniques become more mature."

Starlight's understanding of the Endless Primordial Space is second to none, and he discovered a place that fits him as an intermediate Mysterious Land.

As a master of two Primordial Level Paths, the ordinary mysterious land 'Time Star' provides him with little help, and his power has long reached a bottleneck, making progress extremely hard. A suitable intermediate Mysterious Land is enormously important.

******

Unknowingly, one era passed.

The Fluctuation Land, within the membrane wall.

"Hmm?"

The nearby Luo Feng, who was assisting with guarding, suddenly

noticed that the membrane wall around started to become illusory, and the vast, almost tangible fluctuations outside the membrane wall also began to become illusory, gradually disappearing.

"The fluctuations are weakening. Is this Fluctuation Land beginning to hide?" Luo Feng carefully observed.

The previously extremely solid stone heart, its surface solid material also became illusory and fragile, revealing its inside, a point of incomparably bright 'light', seemingly a 'wave'...

"Is this the true face of the core?" Luo Feng attempted, allowing a thread of thought to penetrate.

The weakening fluctuations made the stone heart extremely fragile, the material on its surface completely vanished, leaving only the core point.

Luo Feng's thought encountered no obstruction, successfully touching that point—

"Buzz!"

At the instant the thought touched.

Luo Feng vaguely saw the entire Endless Primordial Space.

But it was seen from the perspective of 'fluctuation', where in the world of 'fluctuation', one source world after another appeared inconspicuous, and Luo Feng even felt some stronger Mysterious Lands.

"That was—"

Luo Feng sensed, three terrifying fluctuation vortexes.

These three places! They are three enormous fluctuation vortexes, remarkably apparent. With Luo Feng's understanding of the Endless Primordial Space territory, he quickly deduced the corresponding locations of these three vortexes.

"Abyss of Destruction, Land of Eternity, Fire Prison Wall." Luo Feng

confirmed that these three places correspond to the three largest fluctuation vortexes.

In the world of fluctuation, the Fire Prison Wall emitted endless 'heat' fluctuations, overpoweringly scorching.

It spanned the length of hundreds of World Groups, exceeded the width of a World Group, and everywhere extended various highest level flame powers... This endless heat fluctuation transmitted, relaying to every corner of the endless space.

Whether within the source world life or countless innate primordial lives, the vast majority of them could be born, all have been influenced by the invisible heat fluctuations.

"The Fire Prison Wall, with its endless heat fluctuations, is actively radiating outwards."

"Abyss of Destruction, but it devours countless fluctuations?"

In the world of fluctuations, the Abyss of Destruction absorbs the intense hatred, killing intent, unwillingness, resentment, and other negative emotions of endless beings. These negative emotions also influence the will of the Abyss of Destruction.

"The Land of Eternity is the key to the sustenance of the Endless Primordial Space?"

In Luo Feng's perception, the Land of Eternity balances the 'Fire Prison Wall' and the 'Abyss of Destruction', and even indirectly affects all mysterious lands, influencing countless world groups.

The existence of the Land of Eternity is what ensures the Endless Primordial Space can continue to exist eternally.

Otherwise, the terrifying energies within the Endless Primordial Space would have long formed recurring energy storms, making it impossible for so many weaker life forms to exist.

"The Fire Prison Wall, Abyss of Destruction, Land of Eternity, they are more like the three poles of the Endless Primordial Space!" Luo Feng, from the perspective of fluctuations, gained more awareness of the

Endless Primordial Space.

"I need to pay more attention to the Abyss of Destruction."

"Ideally, I can pass the Seven Layers of Test and take control of the Abyss of Destruction." Luo Feng thought, among these three poles... the other two places he saw no hope of refining, at least the Abyss of Destruction showed a direction.

Whoosh——

While Luo Feng was sensing the 'world of fluctuations',

that point, or rather, that wave completely disappeared.

The Fluctuation Land vanished entirely! The place where Luo Feng and Lord Mo Man stood also returned to a normal time and space.

"Gone?" Luo Feng was somewhat at a loss, as the core of this Intermediate Mysterious Land had greatly enhanced his understanding of the Endless Primordial Space.

"The Fluctuation Land seemed to exist in reality. That stone heart seemed unbreakable. But in actuality, it was all a combination of fluctuations." Lord Mo Man said with a smile from the side, "Once everything's fluctuation surpasses its peak, they disperse and completely vanish."

Luo Feng said, "I feel like the Fluctuation Land has completely dissipated."

Lord Mo Man looked at Luo Feng: "Strictly speaking, at the peak of fluctuations, the Fluctuation Land is most solid. And once the fluctuations decrease, the Fluctuation Land rapidly disperses. In my estimation of the 'lowest valley' of fluctuations, the Fluctuation Land should have dispersed throughout the entire Endless Primordial Space."

Luo Feng understood: "Small as a point, large as to spread throughout the Endless Primordial Space? Interesting!"

Such a perpetually changing mysterious land is indeed unique.

"Let’s go." Lord Mo Man said with a smile.

"Mo Man, are you confident in refining it?" Luo Feng asked.

Lord Mo Man shook his head: "Not enough strength."

Even if he managed to cunningly reach the core, he still couldn’t refine it.

"Is there anything I can help with?" Luo Feng asked.

"You’ve already helped a lot this time." Mo Man smiled.

Luo Feng didn’t say more and immediately left together with Lord Mo Man!

"Fluctuation Land..."

With a black cape billowing, Lord Mo Man’s eyes gleamed mysteriously, "This time I finally know how to refine it! For me, the simplest method is to comprehend a highest level ’Power of the World’."

Primordial Fluctuation Dao, plus a Power of the World! This is already the simplest direction.

Because Lord Mo Man has perceived every part of the Endless Primordial Space in the form of a wave for countless epochs, his understanding of the World is very high, and he believes the highest level ’Power of the World’ is his most likely hope.

"Besides the Fluctuation Path, to comprehend a Power of the World? This path is very difficult, and even endless epochs may not be enough." Lord Mo Man thought, as he had decided to walk down this path.

Once successful on this path, with an additional highest level power, along with the support of ’Fluctuation Land’! His strength would greatly increase.

"Once I master the Power of the World, I won’t need Luo Feng’s help to enter the core myself." Lord Mo Man thought.

...

After accompanying Lord Mo Man to the Fluctuation Land, Luo Feng continued to retreat to create combat techniques.

After more than a hundred epochs.

"The fifth combat technique has been achieved."

In the 28th layer of the Abyss of Destruction, Luo Feng's aura surged rapidly, quickly reaching the state of the main battle avatar.

"With five combat techniques, my entire combat system is now formed." Luo Feng was well aware that even if he were to ponder one or two more combat techniques, there wouldn't be any significant improvement.

Having mastered two Primordial Level Daos and possessing a complete set of five combat techniques, his strength had already reached a bottleneck.

From now on, even the slightest progress would be extremely difficult!

Starlight was also in this state. As for comprehending the third Dao? The hope was too slim.

"Abyss of Destruction, from the perspective of fluctuations, is one of the three poles of the Endless Primordial Space."

"I wonder if my current strength can reach the deepest level of the Abyss of Destruction?"

Swoosh!

Luo Feng took a step, traversing time and space to enter the deeper 29th layer.

Chapter 469 - 12: Deep into the Abyss of Destruction

Chapter 469: Chapter 12: Deep into the Abyss of Destruction

Luo Feng slowly descended, overlooking the 29th level of the Destruction World.

Before him lay a vast expanse of dark red, half-melted metallic land. Most of this expansive land had melted and was flowing slowly. Only some surface areas remained solid, forming islands of metal.

"This 29th level of the Destruction World is a precious mineral deposit," Luo Feng thought. He could sense that the harsh environment here could incinerate a world-level primordial. Yet these metal materials still existed, indicating the extraordinary nature of the materials.

"Buzz." Luo Feng attempted to collect them with a thought, only to find that these metal materials seemed to be one with the earth, unable to be collected.

"Boom." "Boom." "Boom." The flowing metallic land thundered as towering figures emerged from beneath the melted earth, each in a semi-melted state, exuding terrifyingly powerful auras.

A total of twenty towering figures appeared, all staring at Luo Feng.

"Are there really 20 World Envoys on this level?" Luo Feng was quite surprised.

He was the first to break through the 28th level, and as for this 29th level... no strong figure had set foot here before. The environment and the information about the World Envoys here were unknown.

"On the first surface level of the Abyss of Destruction, there are 3000 World Envoys, but as you go deeper, they become fewer in number and stronger in power," Luo Feng sensed. The aura of these twenty towering figures was no less than that of the ancestors.

Suddenly—

The twenty World Envoys moved, transforming into streams of light charging toward Luo Feng.

With a single thought, Luo Feng summoned a vast domain!

In the past, Luo Feng's Realm of Life and Death radiated a pale cyan glow, best at enhancing comrades' vitality and replenishing their energy reserves. It posed little threat to enemies.

But now, Luo Feng's Realm of Life and Death had become a fusion of cyan and black, a combination of two primordial level Daos, significantly increasing its threat to enemies, truly living up to the name 'Realm of Life and Death.'

This domain was part of the fifth combat technique, the "Clone Battle Technique," of Luo Feng.

For Luo Feng, every bit of his power contained spiritual consciousness, like small avatars! As countless powers spread to form a domain, it was as if countless avatars were forming a formation.

Thus, the Realm of Life and Death was also categorized within the 'Clone Battle Technique' system.

"Rumble~~~"

The Realm of Life and Death enveloped the space, isolating it from external prying, allowing Luo Feng to freely target the twenty World Envoys.

...

"Invisible now."

"This Lord Luo Feng has cast a domain, isolating his actions from prying eyes."

When Luo Feng entered the 29th level, several ancestors watched from afar and even spread the footage to their friends. In no time, over a hundred ancestors were watching the battle.

Below the 28th level of the Abyss of Destruction was a mystery. Luo Feng was the first to enter.

All factions wanted to see, and they also wanted to know how strong the cultivator side's 'Lord Luo Feng' was.

No one expected Luo Feng would use the Realm of Life and Death to hide his combat process.

"This Lord Luo Feng is concealing his means," said a woman draped in veils who was watching from afar, somewhat regretful. She was the 'Yunmo Ancestor,' not belonging to any faction, protecting her own kin, and seldom participating in conflicts.

Yunmo Ancestor mastered the highest level of life power! Just with a type of life power, she had not reached the theoretical 'undying and undying.'

Because she only excelled in life power, her killing ability was weak. And with her being the only ancestor in her race, her race often suffered bullying; in the most tragic instance, about two-thirds of her kin were devoured.

This fueled a murderous intent in Yunmo Ancestor, secretly pursuing killing abilities ever since.

"His accomplishments in life far surpass mine," Yunmo Ancestor murmured, "and he is very similar to me. The second power I mastered after many long years is the 'power of destruction.'

Externally, Yunmo Ancestor, who did not participate in conflicts, was known for life power, but unknown to others, she had secretly mastered a form of destructive power, already planning for revenge.

"I have mastered both the highest level powers of life and destruction. With utmost effort, I might barely break into the top ten. But he masters two primordial-level Daos of life and death... far stronger than me." Yunmo Ancestor really wanted to see Luo Feng's battle techniques in the Abyss of Destruction, but unfortunately, she could not see them.

"This Lord Luo Feng is probably now the strongest in the entire Endless Primordial Space of this era," an exotic beast raised its head within a Source World, glancing towards the direction of the Abyss of Destruction.

"Watching their faction struggles is quite interesting," the exotic beast noted.

Within the exotic beast resided a unique creature.

This creature was a mind-type innate primordial life, born from the intertwining of the spiritual power of countless Source World creatures and innate primordial lives, with its life core naturally merged with spiritual power, making it undying and imperishable...

It was different from Mogus.

Mogus liked to devour the souls of countless lives.

It, on the other hand, enjoyed feeling the joys and sorrows, desires and hatreds of countless creatures. It could wander amidst the 'minds' of countless creatures, with countless avatars within them, experiencing their spiritual perceptions. For those it admired, it would leave help.

Its existence was entirely spirit-based. Therefore, to this day, no ancestor or lord has been able to detect its presence.

Not being discovered was also partially because it never killed any life form, nor did it engage in conflicts with any ancestor or lord.

...

Luo Feng could sense over a hundred forces prying from afar. His Realm of Life and Death spread, isolating their prying eyes. He

intended to give his enemies some surprises in future confrontations and mustn't reveal his techniques so easily?

Against the onslaught of the twenty World Envoys, Luo Feng took a moment to familiarize himself before slashing them apart, leaving life imprints on the Shadow of Origin.

After gaining control of the 29th level, Luo Feng attempted to collect the precious minerals within this Destruction World again, finding it much easier this time as countless rare minerals were collected.

Luo Feng collected the most precious part, equivalent to about one-tenth of the entire level's matter.

"The deeper one goes into the Abyss of Destruction, the more precious the material comprising the worlds becomes." Luo Feng was quite pleased, "Let's proceed to the next layer."

Upon descending to the 30th layer, Luo Feng immediately deployed the World Domain, enveloping the entire world of this layer, isolating it from any prying eyes.

...

"This Luo Feng is really stingy!"

"Just stepping into the 30th layer, he deployed his domain to envelop the entire world, cutting off all prying eyes. The unique aspects of the material composition of this layer's Destruction World, how many World Envoys there are, everything is now invisible."

The various Ancestors couldn't help but curse under their breaths.

Even without seeing Luo Feng's battle, gaining more understanding of the deeper layers of the Destruction World would be beneficial.

Yet, who would have thought, Luo Feng kept everything tightly under wraps!

...

"Hahaha, well hidden! It should be hidden!" Jin Yaoyao watched, as

he was equally curious about the deeper sections of the Abyss of Destruction, yet through the long years, he could not delve deeply himself, and naturally wouldn't want those Ancestors to easily see the deeper secrets.

"Indeed, it should be hidden." Ming Huang nodded.

"The deeper one goes, there might be secrets of the Abyss of Destruction involved," said a clone of Luo Feng, "Those Ancestors have sharp eyes, if they were to see the deeper levels, perhaps they could penetrate some secrets."

The Abyss of Destruction was the 'three extremes' that resonated most with Luo Feng, and he naturally did not wish to share intelligence with the outside world.

Those Ancestors want to explore? If they have the skill, let them explore themselves.

"Once I finish investigating the Abyss of Destruction, detailed intelligence will be left in the Land of Origin," Luo Feng said, though it would only be accessible by the Lords.

"Thank you." Jin spoke up, among the eight Lords, aside from Luo Feng, Jin had the greatest interest in the Abyss of Destruction, yet his current strength was not strong enough, unable even to enter the Mountain of Destruction.

As a Mysterious Land, the Abyss of Destruction doesn't understand the distinction between 'Primordial Level Dao' and 'Highest Level Power', its natural operations only know to recognize those who grasp the power of destruction, the stronger the better.

With just one Dao, Jin was still too weak, among the over two hundred Ancestors and Lords, being in the top twenty was impressive, but the Abyss of Destruction's requirements for strength were too high, the threshold of the Seven Layers of Test was unimaginably high.

"The Abyss of Destruction starts with 3,000 World Envoys from the first layer, as one goes deeper, the World Envoys decrease. The 29th

layer had only twenty World Envoys," said Starlight.

"The 30th layer had only ten World Envoys, the 31st layer only five World Envoys," said Luo Feng.

His primary combat avatar had already left its mark on the Shadow of Origin of the 31st layer, beginning to collect some precious materials of this layer's world.

"Only five envoys?" Yuan was surprised.

"I am now entering the 32nd layer, the 32nd layer has only three World Envoys," Luo Feng said.

...

The 32nd layer, this layer has only three World Envoys! These three World Envoys, in terms of physical sturdiness, could rival the level of Wulan and Ice Mountain Master, and their explosive might was even comparable to Sha Zhou!

Three incredibly robust 'Sha Zhous', wielding the power of destruction, furiously attacked Luo Feng.

Luo Feng's Realm of Life and Death was also significantly weakened.

In the previous layers from the 29th to the 31st, the Realm of Life and Death had worked wonders, as facing group attacks, the domain could target all enemies within.

But as he delved deeper, and the number of World Envoys decreased while their individual strength rapidly increased, the effectiveness of the Realm of Life and Death was waning.

"Hmph~~~"

The 32nd layer, the world was shrouded in darkness.

Under the cover of the Realm of Life and Death, directions were inverted, time and space were chaotic, exerting full binding force on each World Envoy, with vague blade shadows standing at various spots, forming a massive Blade Formation.

Countless Blade Lights suppressed and slaughtered these three World Envoys.

"Roar——" One of the World Envoys opened its mouth, its mouth like a bottomless abyss, swallowing countless Blade Lights, reducing the formation's might, but Luo Feng continued to supply energy to maintain the formation's power.

Another World Envoy's body contorted like lines, these line-like bodies coiled around the entire world and coiled toward Luo Feng, Luo Feng's Blade Lights struck its body, yet its soft, line-like body easily resisted all slashes.

"Hmph."

The last World Envoy had already approached Luo Feng, carrying an apocalyptic aura to grasp at Luo Feng.

Luo Feng was under great pressure.

One against three, each one stronger than Sha Zhou! He was at a disadvantage.

Swish swish swish!!!

Luo Feng, draped in a blood-colored robe, used the power of the Blood Crane Territory to become unpredictable, with the Realm of Life and Death making his movement technique 'omnipresent' within a small range, and terrifying Blade Lights attacked the supple line-like World Envoy, as that World Envoy had wrapped its body around the Shadow of Origin.

Boom——

With an incredibly terrifying explosion, it was one of the forbidden techniques of the "Primordial Battle Technique", finally blasting apart a section of that supple, line-like World Envoy's body, leaving a trace imprinted on the Shadow of Origin.

"Success."

It wasn't necessary to completely defeat the World Envoys, just

disrupting the World Envoys and imprinting the Shadow of Origin counts as success.

"This is just the 32nd layer, and it forced me to use the Primordial Battle Technique?" Luo Feng looked at the three World Envoys returning to normal before him, now the three World Envoys were unbelievably docile, following commands.

Chapter 470 - 12: The Lowest Level

Chapter 470: Chapter 12: The Lowest Level

Luo Feng relaxed at this moment, as the pressure from these three World Envoys was indeed quite intense.

Neither Starlight nor Sha Zhou could make it past the 28th layer. Although I am the strongest level in the Endless Primordial Space in direct combat, I had to start using clever tricks at the 32nd layer.

To seize control of one layer of the Destruction World, there are two approaches. One is to crush the World Envoy with absolute strength, leaving a mark on the Shadow of Origin. The other is to use clever tactics, evading the World Envoy's obstruction successfully to leave a mark.

"In this layer, I'm at a disadvantage, so I must use clever tactics."

"And what about the even more difficult 33rd layer?"

Luo Feng wasn't in a hurry to explore but stopped at this 32nd layer to reflect on his combat techniques. Based on some previous battle experience, he began to address some shortcomings in his combat techniques.

During the process of addressing these shortcomings, Luo Feng often used the three World Envoys as his training partners.

After staying on this layer for over one epoch and collecting the special products of the Destruction World on this layer, Luo Feng then proceeded to the deeper 33rd layer.

...

"Lord Luo Feng has proceeded to the 33rd layer."

"Does the Abyss of Destruction actually have a 33rd layer? How many layers does it actually have?"

The Ancestors and Lords were watching in the distance.

When there was no life exploring, they only felt that the Abyss of Destruction below was filled with endless energy, extremely tranquil, with nothing to observe.

Once Luo Feng broke in, the World Envoys were born through condensation, and only then would the energy of destruction on this layer start to surge! Only then could the outside world catch glimpses of the scene on this layer.

"It's blocked again!"

"As soon as Lord Luo Feng entered the 33rd layer, he cast his domain to cover the entirety of the layer, isolating all observations."

"If it were me charging into the 33rd layer, I would also shield it! Such deep layers of the Destruction World, how could they be easily revealed to the outside world?"

These ancient existences exchanged words through transmissions, though under the covering, they couldn't see the situation on the 33rd layer. But at least they understood one point—the Abyss of Destruction has a 33rd layer.

******

The 33rd layer of the Abyss of Destruction.

The Realm of Life and Death thoroughly enveloped every place. Luo Feng looked ahead, where two towering figures were forming. One of them bore a seven to eight parts resemblance to the 'Giant God Emperor,' but its form was even more massive! Its entire body was covered in pure black scales, and a pair of scale-armored wings blocked out the sun, exuding terrifying power. The other was an

enormous flame avian! When this avian spread its wings, its coverage was even more expansive, with endless flames spreading over one-third of this layer of the Destruction World, forcibly burning through Luo Feng's Realm of Life and Death.

"I have explored 33 layers, and the destructive power of these 33 layers is all encompassed in the 34 types of destructive power within the Mountain of Destruction. Furthermore, the World Envoys are reduced to only two."

"The Abyss of Destruction should truly have only 34 layers."

This was a hypothesis Luo Feng had when he was at the Mountain of Destruction. As he delved deeper into the Abyss of Destruction, his speculation grew increasingly likely!

"These two World Envoys, their auras are more terrifying, each enough to rival me." Luo Feng observed his opponents.

"These two are distinct forms of this layer's destructive power, one dark, one fiery."

"Moreover, the two of them have different combat forms, one is in a matter state and the other an energy state, which might relate to their combat techniques." In the Mountain of Destruction, Luo Feng had already grasped the wonders of this layer's destructive power, and he had various assumptions regarding the fighting style of these two World Envoys.

The flame avian focused on Luo Feng, and with a flap of its wings, its immense wings transformed into endless flames that completely engulfed Luo Feng.

Engulfed within endless flame, Luo Feng furrowed his brows slightly.

"The 'Primordial Beast Ancestor,' one of the Nine Emperors, its physical form itself is a domain. This Flame Messenger is the same, built of flame, and when it unfurls, it exhibits the strongest domain. In terms of suppressive power, it surpasses my Realm of Life and Death by roughly threefold." Luo Feng instantly judged.

As the flames swept through, the Realm of Life and Death retreated

in layers.

But Luo Feng wore a blood-colored robe, with a protective energy layer shielding him from the flames.

"Buzz."

The Dark Messenger, with black scales, gave a slight tremor of its wings and immediately appeared before Luo Feng, its gigantic hand matching Luo Feng's height, it instantly descended upon Luo Feng.

Boom——

Luo Feng stepped back two steps, as his protective energy layer, protective robe, and the muscular and skeletal structure of his body endured the horrific force, with only a slight bleeding on the surface of his skin and minimal energy loss.

"Such a swift attack." Luo Feng deliberately took this hit with his body, knowing the more he understood his enemy, the easier it was to find their vulnerabilities.

"Huge physique, extremely fast speed, the strength of might comparable to mine." Luo Feng instantly assessed the enemy's strength, "Under the suppression of the fire domain, I'm at a disadvantage facing it."

Boom! Boom! Boom!

The Dark Messenger chased after Luo Feng time and again, its body too massive, with any casual move covering half of Luo Feng's body, and Luo Feng's blade light repeatedly sliced it, leaving cuts and bruises over its form, yet with a constant supply of Destruction World energy, it instantly healed completely.

"Hiss hiss hiss～～" Under the fire domain, wisps of flame formed into small snakes, entangling Luo Feng's limbs, infiltrating every part of Luo Feng's body.

Luo Feng was quite vexed.

It felt like he was fighting against an equally strong opponent while

shackled.

"I can’t get close to the Shadow of Origin." Luo Feng tried to bypass the Dark Messenger.

However...

Under the full-scope suppression of the fire domain, Luo Feng couldn’t manage to perform a short-distance ’omnipresence,’ and once he tried to approach the Shadow of Origin, the Dark Messenger was already there intercepting him.

If it was one-on-one, with the Crane Leader’s Power, Luo Feng’s speed would surpass that of the Dark Messenger!

Chapter 471 - 6: The Lowest Depths (Part 2)

Chapter 471: Chapter 6: The Lowest Depths (Part 2)

But now it's one against two, and under the suppression of the fire domain, Luo Feng's speed is a step slower than the Dark Messenger, completely unable to shake off the opponent.

"Swish～～"

Luo Feng's body suddenly divided into three avatars, one of which maintained eighty percent energy reserve, while the other two held only ten percent energy reserve! Trying to approach the Shadow of Origin, the Dark Messenger couldn't intercept him, because once its power was dispersed, its strength would decay far beyond Luo Feng's, while Luo Feng could maintain his normal physical body with just a ten percent energy reserve.

The Flame Messenger's gaze became fierce, and the endless fire domain rapidly constricted.

Fire birds, when power is dispersed, transform into domain.

Once constricted, the flame snakes binding Luo Feng's hands and feet became increasingly solid, and all three avatars were entangled by them. The two weaker avatars were directly obliterated, while the strong avatar held its ground against these flame snakes.

The main battle avatar recovered to its pinnacle state, and the body surface burst with strands of blade light tearing through these flame

snakes, which reformed once again.

Each small snake seemed like an ordinary Ancestor, and at the moment, dozens of flame snakes were all wrapped around Luo Feng, their power terrifying, making Luo Feng's movement slower than Wulan.

"There's no way..." Luo Feng thought to himself.

The physical body turned into energy, all rushing into the billions of Shadow of Origin floating in the air! But those flame snakes still fearlessly tangled up.

Boom——

Terror of great destruction swept through, dozens of flame snakes were instantly obliterated by seventy to eighty percent, and the Flame Messenger's power decreased by half. However, the energy of Destruction World continuously replenished the Flame Messenger.

"Can't fight anymore." Luo Feng had only two percent of energy reserve left, so he took a step back, forcibly breaking through the barriers of time and space and returned to the 32nd level.

Leaving was easy, but approaching the Shadow of Origin was incredibly difficult.

...

"Luo Feng has returned to the 32nd level?"

"The 33rd level has returned to calm."

The many ancient beings could perceive that the 33rd level had returned to calm, making it impossible to spy at all.

"It seems this 33rd level is very tough, and Luo Feng failed too."

"Perhaps he succeeded and returned to the 32nd level to collect resources."

Since the Ancestors couldn't probe, they could only speculate.

Successfully exploring the 33rd level indicates that Luo Feng at least mastered the 32nd level, something the other Ancestors and Lords look up to! After all, the one only second to Luo Feng, 'Sha Zhou,' has mastered the 27th level.

...

The 32nd level.

Luo Feng's energy reserves rapidly restored, and he frowned.

"The Dark Messenger and the Flame Messenger can both rival me. One has a close combat style, while the other excels at domain and restraint." Luo Feng was very troubled, as the cooperation of such strong characters was too difficult to handle, "Moreover, they have Destruction World energy supply, not afraid of energy consumption."

"How can I shake them off?"

Luo Feng contemplated.

The Flame Messenger's domain is stronger than the 'Primordial Beast Emperor,' one of the Nine Emperors. Facing such a domain is simply impossible to escape.

"Cannot shake off the Flame Messenger, but the Dark Messenger is still possible."

"My only advantage is that my methods can be more intricate."

Luo Feng contemplated, and a combat plan targeting these two messengers gradually took shape.

"Let's do it!"

Luo Feng returned to pinnacle state, took another step, and ravaged his way back into the 33rd level.

The 33rd level of the Abyss of Destruction, Luo Feng just came in and instantly enveloped the surroundings with the Realm of Life and Death, while holding the Sky Splitting Saber and gazing into the distance, where distant majestic world envoy figures emerged.

"Seal!"

Luo Feng stretched out his hands, and numerous blade light flew from his fingers, forming a formation with a total of thirty blade lights, isolating space and time, severing all energy transmission, sealing the area around the Dark Messenger.

Each blade light contained one percent of Luo Feng's energy reserve, consuming three percent overall for the formation.

This was the 'Triple Absolute Blade Array' of Luo Feng's Clone Battle Technique. The formation was divided into three layers, even if one layer was damaged, the other two could replace it. Additionally, Luo Feng could continuously supply energy.

This blade array primarily served to trap the enemy.

"Huh?" The Dark Messenger just formed and looked at the surrounding cage of blade formation in shock.

"Boom." Its hoof claw fiercely kicked the blade array, and the blade light layered densely, filled with endless life spirituality, dispersing and weakening the impact through the entire formation, easily resisting it.

The blade array isolated inside and outside, severing space and time and energy channels, even causality couldn't connect.

While maintaining the blade array, Luo Feng also sensed that as the two world envoys formed, the Shadow of Origin appeared too.

"Swoosh." Luo Feng couldn't be bothered to waste time and darted directly toward the Shadow of Origin.

Swish!

The fire domain covered a vast area, restraining Luo Feng, with flame snakes appearing on the body surface.

"Sever!"

Luo Feng suddenly burst with blade light on the body surface, each

slicing at a flame snake, and while the flame snakes fractured and regrouped, the fire blade light continued attacking. At that moment, hundreds of blade light surrounded Luo Feng, filled with spirituality, pursuing these flame snakes.

These hundreds of blade light were each formed by 'dual blade light in bright and dark'.

What could be seen was the shadow saber combat technique that aimed accurately, locking onto the target, chasing and striking relentlessly, until energy depleted.

What couldn't be seen was the Life-cutting Blade Light! Severing the vitality and spirituality of these flame snakes, the entangling flame snakes around Luo Feng grew sluggish and were repeatedly severed, greatly reducing their blocking ability.

"Hoo."

Protected by hundreds of blade light, Luo Feng rushed toward the Shadow of Origin.

The Dark Messenger, with its robust physical body, was temporarily trapped by the 'Triple Absolute Blade Array.' Although its techniques were extraordinarily fierce, consuming the blade array greatly, it couldn't break through the formation barriers.

The Flame Messenger, proficient in domain, was weaker in direct combat. Even though it maneuvered the fire domain with full effort to obstruct, it could only watch helplessly as Luo Feng reached the Shadow of Origin and left a mark imprinted within it.

At the moment of imprinting, the Dark Messenger and Flame Messenger also returned to calm, henceforth surrendering to Luo Feng.

"It's done." Luo Feng breathed a sigh of relief.

"These two world envoys were skilled only in one direction of the destroyer power of this level, their methods relatively single-focused. That's why I managed to leverage my technique advantage to succeed against the odds," Luo Feng thought.

The Abyss of Destruction at the 33rd level, which I've experienced, from 3000 world envoys at the first level to now, where two world envoys, these envoys used only a portion of the power of the world of their level, making their methods somewhat flawed.

Of course, despite the flaws, it's illustrated that neither the starlight nor Sha Zhou could break through the 28th level! It indicates that faced with overwhelming strength disparity, intricate techniques couldn't take hold.

Luo Feng could succeed because he was on par with the Dark Messenger and the Flame Messenger, relying on the intriguing techniques.

"According to my estimate, the 34th level should have only a single world envoy."

"This world envoy should possess all the abilities of the power of the world at this level."

Luo Feng thought it over, then took a step into the next level.

At that moment, all forces within the Endless Primordial Space sensed the updated layer of Destruction World, also understanding that Luo Feng had conquered the 33rd level and stepped into the 34th level.

The 34th level of the Abyss of Destruction!

The Realm of Life and Death enveloped the surroundings, isolating all external probing.

Luo Feng looked around; it was a dim, dark land, solid as though a cohesive entity, the surface glistening with a faint black mist, representing the materialized essence of boundless grudges and resentment, where each portion of the land's matter was the solid manifestation of 'grudges and resentment.'

Simultaneously, an extremely majestic figure condensed.

"World Envoy." Luo Feng observed the figure.

This figure, draped in a black cloak, with dark red light flowing across its surface, containing countless life’s wails, overlooking Luo Feng, its face obscured beneath the cloak.

"Indeed, only one world envoy." Luo Feng concluded.

"Here, is the deepest layer of the Abyss of Destruction." The cloaked figure spoke, "Since my inception, I’ve awaited here, you are the first ultimate life form to arrive."

Chapter 472 - 7: The 7 Parts of the Abyss of Destruction

Chapter 472: Chapter 7: The 7 Parts of the Abyss of Destruction

"The bottom layer?" Luo Feng revealed a smile.

Even for him, reaching the bottom ’34th layer’ was quite an achievement. After all, in the Abyss of Destruction, one of the three poles of the Endless Primordial Space, among many Ancestors and Lords, he was the first to arrive here.

"Are you the World Envoy of this bottom layer Destruction World?" Luo Feng didn’t rush to make a move, but curiously inquired.

It’s rare to encounter a World Envoy that can communicate, so Luo Feng was eager to learn some secrets of the Abyss of Destruction from the other party.

"Yes," the robed figure said with a smile.

"The World Envoys of the previous 33 layers seemed to lack wisdom." Luo Feng said, noting those World Envoys operated more on instinct.

"They can’t compare to me," the robed figure replied, "As for developing wisdom, be it Innate Primordial Life, or Source World Life like you, they all possess wisdom. Being an existence born from the Abyss of Destruction, isn’t it normal for me to have wisdom too?"

"You know that I’m a Source World Life?" Luo Feng was surprised.

"The Abyss of Destruction gathers the hatred, killing intent,

grievances, and so on of all creatures, thereby naturally observing the entire ecology of the Endless Primordial Space," the robed figure said, "Although I cannot step out of the Abyss of Destruction, what I know might even surpass yours."

"Eternal Land, Fire Prison Wall, and the Abyss of Destruction being of the same level, do they also contain wise existences?" Luo Feng questioned.

"Possibly," the robed figure replied.

Luo Feng understood this point; the Ancestors and Lords knew very little about those two places, not even having seen the core. Even if wise existences were born, the threshold to witness them would likely be very high.

"You can make your move against me now," the robed figure said, "I'm different from the World Envoys of the previous 33 layers. Once you defeat me, you will fully control the 'Destruction World'."

"Control Destruction World?" Luo Feng's heart stirred.

Previously after entering the secretive Mountain of Destruction, he knew that 'Passing through the Seven Layers of Test allows one to control the Abyss of Destruction'.

Now this World Envoy claims that defeating it grants control over the Destruction World.

"What is the difference between controlling the Destruction World and the Abyss of Destruction?" Luo Feng asked.

"The Abyss of Destruction is divided into seven parts," the robed figure said, "Destruction World is the least threshold-required, can be accessed directly. As long as you break through the 34 layers of Destruction World, you can control the 'Destruction World'. The power of the Destruction World is about one-seventh of the Abyss of Destruction."

"What about the other six parts?" Luo Feng was curious.

"They all have thresholds to explore," the robed figure said, "For

example, the 'Mountain of Destruction' you entered is the core of the Abyss of Destruction. That mountain contains three parts of the power. Passing the 'Sixth Layer of Test' can also get one part of the power. As for the others? You haven't encountered them, I can't tell you either."

Luo Feng was secretly shocked.

Destruction World is one power, Mountain of Destruction conceals three, passing the six-layer test also grants one. That's five parts. There are clearly two parts he has yet to encounter.

"Seven parts of power might have different controllers," the robed figure said, "And once a great existence passes the Seven Layers of Test, they will fully control the entire Abyss of Destruction. Your power will be completely stripped away."

Luo Feng understood; they were still in a competitive relationship.

No existence controlling the Abyss of Destruction has emerged, so it is possible that several strong beings individually control some parts of the power.

"Of course, it's still far away from saying this, as there hasn't been anyone mastering even a part of it yet," the robed figure stated.

"Alright, what you need to know, you now know too." The robed figure slightly raised its head, "Here comes the challenge."

Whoosh—

Its towering figure instantly transformed into endless black mist, the thick mist easily annihilating Luo Feng's Realm of Life and Death, completely enveloping Luo Feng.

Whether it was Luo Feng's Realm of Life and Death envelopment or this World Envoy's black mist power coverage, all creatures from the outside world couldn't glimpse into this 34th layer.

"Such intense pressure!" Luo Feng's Protective Energy Layer, holding the characteristics of 'Immortal, Shadow', still felt the black mist's overwhelming pressure. Even under such suppression, the Crane

Leader's Power couldn't spread, unable to utilize Shadow Power for movement.

Boom! Boom! Boom! Boom! Boom! Boom! Boom!!!!!!

Luo Feng, without hesitation, drew his blade.

In an instant, the incomparably dazzling Blade Light, densely packed, slashed forward! These Blade Lights cooperated with each other, like surging waves rising and falling, tearing through all black mist obstructions.

This was precisely one of Luo Feng's five Combat Techniques, the 'Destruction Blade Technique'.

Destruction Blade Technique doesn't care about locking onto targets, it pursues extreme destruction within close range!

"Your Blade Technique power isn't bad," a calm voice sounded, as the black mist rapidly coalesced into water, the black water incomparably thick, rolling over.

Even Luo Feng's Blade Light barely managed to slice some black water, the black water flowed to continuously suppress, layers upon layers of Blade Light ultimately only leading to collapse.

"Just a Domain alone makes me struggle to inch forward?" Luo Feng frowned, knowing that unless a group of Lords and Ancestors collaborated, none had such deterrence.

"Sever!"

Inside Luo Feng, one billion eighty million primal origins frantically burned energy, and his physical body began partial energy conversion, endless energy burst in an instant, Luo Feng integrated with the Split Sky Blade, becoming an incredibly condensed Blade Light.

The forbidden technique of the 'Destruction Blade Technique' was 'One Cut Two Break'!

'Power of Breaking' was the Destruction Power Luo Feng initially

mastered, and his Spiritual Will exceptionally matched this path. In creating the 'Primordial Blade Path', Luo Feng naturally leveraged his advantage, creating numerous severing techniques.

Without self-destructing, burning thirty percent of energy reserve in an instant, turned himself into an incredibly condensed Blade Light, this was Luo Feng's ultimate mastery of energy control.

There's no way, his energy reserve is too high! Even if I burn more energy reserve, such immense energy... even Luo Feng, who has mastered the 'Primordial Life and Death Dao' and 'Primordial Blade Path', isn't confident in making the energy incredibly condensed without a bit of leakage.

Such a condensed blade light, carrying the power of 'All Things Can Be Cut'.

"Tear——"

A very gentle sound.

Where the blade light passed, the black water naturally split open, and this condensed blade light rushed straight towards the location of the Shadow of Origin.

"This strike is powerful enough!" A voice of praise sounded.

In the black water, a chain condensed and appeared, tough and solid, blocking the front of the blade light.

"Puff."

The blade light swept across, directly severing the chain.

This forbidden technique was originally used for slaying enemies, and at this moment, Luo Feng used it to cut through thorns, intending to rely on it to reach the location of the Shadow of Origin.

But within the black water, more and more chains were converging, one by one covering over. The broken chains dissipated on their own and new chains condensed in front of the blade light again.

There were a total of 34 chains, but they gathered and dispersed unpredictably, capable of condensing anywhere in this layer of Destruction World.

After breaking, new chains would intercept in front of Luo Feng once again.

These chains surrounded and intertwined, continuously covering over.

Puff puff puff——

The terrifying blade light that Luo Feng transformed into, after continuously severing the chains hundreds of times, finally weakened in power. As the momentum diminished, the chains immediately covered over him, and in the blink of an eye, they bound Luo Feng's true body.

"Boom——"

A terrifying explosion erupted, instantly annihilating the 34 chains that bound him, and even obliterated a small part of the surrounding black water.

However, the range of the explosion's annihilation was too small, and with the endless supply of power from the 'Destruction World', the black water immediately surged again, and 34 new chains once again condensed.

"The forbidden technique of 'Primordial Battle Technique' merely blasted open such a small range?" Seeing this, Luo Feng's body, condensed with residual power, could only retreat one step before the black water enveloped, quickly returning through spacetime to the 33rd layer.

His power greatly diminished, he couldn't fight at all.

...

33rd layer.

Luo Feng fell to less than twenty percent of his energy reserve, in the

midst of recovery.

"With the domain cooperating with the chains, my other battle techniques, including 'Primordial Battle Technique', can only annihilate a small area." Luo Feng frowned, "Only by transforming into blade light and performing the forbidden technique can I sever hundreds of chains, and fly a certain distance."

This was the furthest method of flight.

"But once the move weakens, I'll be immediately bound."

"What should I do?"

With himself still far from the Shadow of Origin, it was already this difficult. According to his experience, the closer to the Shadow of Origin, the more frenzied the World Envoy would become.

"The domain and chains are probably just part of this World Envoy's methods." Luo Feng, after all, understood the mysteries of this lowest level of destructive power, and could speculate on some of the World Envoy's methods.

If the Dark Messenger and Flame Messenger of the 33rd layer were on par with him, then the sole World Envoy of the 34th layer was oppressing him in every way.

"The gap is somewhat large." After pondering for a moment, Luo Feng couldn't come up with a solution to break through the seemingly simple Black Water Domain combined with the chains.

"Go take a look at the Mountain of Destruction."

...

The hidden location of the Abyss of Destruction, 'Mountain of Destruction'.

Hoo.

Luo Feng came to the Mountain of Destruction once again.

Looking at the massive mountain before him, the Mountain of Destruction was pitch black, and its surface was covered with ink-like black mist, while 34 luminous spots akin to stars were interconnected, like the veins of the Mountain of Destruction.

The World Envoy said, "The Mountain of Destruction contains three forms of power."

"But from the surface, it nurtures numerous weapons, and even nurtures Destruction Fruits and other things. It also has 34 types of destructive powers, and harbors countless negative emotions," Luo Feng observed.

"The vein diagram outlined by these 34 types of destructive powers is the evolutionary direction of the Life Core on the Destruction Path." Luo Feng's heart moved, "Perhaps evolving the Life Core along this direction to a certain extent can lead to a path of acquiring 'a form of power'."

Among the seven types of power in the Abyss of Destruction, perhaps the power of 'Destruction World' is the easiest to access, as any Primordial Lord can enter the outermost layer of Destruction World.

Luo Feng carefully observed, touched, and studied the surroundings of the Abyss of Destruction.

The only 'mountain road' entrance to the mountain was blocked by seven sculptures, and without challenging the seven sculptures, there was no way to ascend the mountain.

Chapter 473 - 8: Master of the Destruction World

Chapter 473: Chapter 8: Master of the Destruction World

Luo Feng studied the Mountain of Destruction for a long time but still couldn't find a way to obtain the other powers of the Abyss of Destruction.

"As the highest level mysterious land, even for partial powers, the screening threshold is very high."

"Forget it, don't think too much about the other six powers for now. Let's focus on 'mastering the Destruction World' first." Luo Feng looked at the seven sculptures in the distance. Although the strength of the lowest level World Envoy is exceptionally strong, he is still confident to handle them.

The confidence lies in...

He has not yet exchanged the Destruction Fruit from the Mountain of Destruction for any treasures! As long as he exchanges for treasures, his strength can be enhanced!

"The more Destruction Fruit, the better treasures can be exchanged." Luo Feng walked towards the seven sculptures.

The fourth sculpture, the 'Massive Cube', gradually awakened, its aura rising, naturally locking onto Luo Feng.

Last time, Luo Feng defeated the third sculpture by sheer luck. Facing

the fourth sculpture, it was an utter defeat! But now, he has comprehended the Primordial Blade Path and created five combat techniques, a complete transformation!

Previously, his combat power was equivalent to Sha Zhou's.

Now, he completely crushes Sha Zhou!

"Based on the experience from the last encounter, I should have the confidence to defeat the fourth sculpture." Luo Feng extended his arms, and in an instant, a series of condensed blade lights flew out, naturally falling around.

A full fifty massive blade lights, each blade light is one percent of Luo Feng's energy reserve! These fifty blade lights, each like an avatar of Luo Feng, form an extremely powerful destruction blade formation—"Five Directions Life and Death Reincarnation Killing Formation."

This is the formation that draws the most power from Luo Feng, and is the most powerful killing formation.

Once the formation is out, it isolates inside and outside.

"Boom!!!" The massive cube instantly turned into a shadow and flew out, attempting to rush out of the blade formation range.

"Kill!"

Luo Feng moved his mind.

The killing formation operated, within the Five Directions Life and Death Reincarnation Killing Formation...

Countless blade lights wound like fingers, binding and entangling the massive cube!

The immensely condensed terrifying blade light, nothing cannot be cut, even causing the massive cube to fracture, starting to split into 125 small cubes.

Some blade lights cut lifelines, weakening the life spirituality that the Abyss of Destruction bestowed upon the 'Massive Cube'.

There is also extreme penetration...

And a combination of many life and death blade lights, like gears grinding...

Various means, perfectly combined, more like reincarnation, continuously!

"Boom boom boom." The massive cube gathered and dispersed as desired, even if penetrated and shattered dozens of small cubes, it would instantly fully recover. They would also form a complete massive cube to collide with the blade formation.

Its tip at that point has a terrifying impact force.

However, even if one blade light in the formation gets damaged, other blade lights would temporarily take its place, and Luo Feng would immediately replenish it to maintain.

The entire blade formation has continuous vitality, while trapping the enemy, the formation's various forces continue to siege the enemy.

Sever seventy or eighty small cubes?

Grind a large number of small cubes?

The formation's power is obviously stronger! But as long as one small cube remains intact, the other damaged small cubes can all recover.

"Just relying on the killing formation, you can't destroy this fourth sculpture?" Luo Feng was a bit surprised, he extended his hand, holding the Sky Splitting Saber, and actively stepped into the killing formation.

"Boom boom——"

Luo Feng swung the saber.

Simultaneously as the blade formation grinds, ferocious and terrifying blade lights surged out, it was Luo Feng's close-range destruction of everything—the "Destruction Blade Technique."

The range of the blade formation is not large, just suitable for the play of the destruction blade technique.

"Boom——" The cooperation of the blade formation and destruction blade technique, the power climbed again, thoroughly smashing all 125 small cubes! At the moment they were all shattered, the energy core that could shift among the 125 small cubes was finally affected.

All the broken and shattered small cubes condensed into energy flew back to the distance, reforming into the original massive cube sculpture.

The seven sculptures still remained calm in the distance.

"Done." Luo Feng revealed a smile.

If he failed this time, he would try to use the 'trapping formation' in conjunction with the 'Primordial Battle Technique'.

Fortunately, the killing formation coupled with the destruction blade technique had already succeeded.

"I master two Primordial Level Daos of Life and Death, almost exhausting every effort, just to defeat the fourth sculpture." Luo Feng looked at the other three sculptures, "To pass the seven-layer test, the difficulty is indeed incredibly high."

"Try the fifth sculpture again, see how big the gap is."

Luo Feng felt that the chance of success was not high, but he had to try.

...

When fighting the fifth sculpture 'Black Star', there were no surprises, he lost rather miserably.

Luo Feng was not bothered at all, he would have found it strange if he had won!

"It's time to exchange for treasures."

Luo Feng walked to the Mountain of Destruction, gently touched it, again undergoing impacts of hatred, killing intent, resentment, etc., and the impact of various memory scenes on the soul, Luo Feng calmly faced all these.

After experiencing the impact, Luo Feng perceived some information.

"I can choose four Destruction Fruits, or I can exchange them for other treasures." Luo Feng examined the abundant information about the treasures.

One fruit, two fruits, three fruits, four fruits, respectively what can be exchanged, a lot of information emerged.

Luo Feng was very cautious.

Once these four fruits are exchanged, before 'mastering the Abyss of Destruction', he can only accumulate one or two Destruction Fruits at most, and the treasures exchanged will be far inferior to now.

"Now, I must exchange for treasures, only by leveraging external objects, can I defeat the World Envoy of the 34th layer in a short time." Luo Feng understood this point, after mastering two Primordial Level Daos, he reached a bottleneck period. In the long future, it would be very difficult to improve even a tiny bit through comprehension and cultivation.

Relying on the mysterious land's blessing, relying on special weapon secret treasures and other external forces, on the contrary, there is more hope for improvement.

"Four fruits, only three treasures can be exchanged." Luo Feng sensed the information.

These three treasures are respectively a black robe, a black sphere, and a sharp blade.

These are the strongest Weapon Secret Treasures nurtured by the Mountain of Destruction.

The black robe, once worn, merges into the body, making it nearly indestructible! According to Luo Feng's judgment, even the most

ordinary Ancestor's physical body, once equipped with the black robe, can rival the level of Wulan and the Ice Peak Ancestor.

The black sphere can transform into a Black Water Domain! The domain's power is estimated to be no less than the domain of the Primordial Beast Ancestor.

A sharp blade can transform into any weapon and contains endless sharpness that can cut through all matter and energy.

"The strongest three Secret Treasures nurtured by the Mountain of Destruction. Cloak Treasure, Domain Secret Treasure, Weapon." Luo Feng contemplated.

Under normal circumstances.

Of the same grade, Domain Secret Treasures are generally the most valuable, followed by Defense Secret Treasures, with weapons being the least.

"The Mountain of Destruction should specialize in nurturing 'Destruction' category treasures." Luo Feng thought. The sharp blade contained a phrase in the information—capable of cutting through all matter and energy.

This information is extremely significant.

Considering his own Primordial Blade Path.

"I'll choose it." Luo Feng decided on that sharp blade in an instant.

"Boom——"

The Mountain of Destruction trembled slightly, and a vast aura of destruction rose to the sky, within which was a sharp blade that soared into the sky, flying towards Luo Feng.

Luo Feng extended his hand, and the blade reached his hand. This sharp blade had no handle, with all sides being the edge.

However, with Luo Feng's intent, the blade naturally transformed, ultimately taking the shape of his favorite Bloodshadow Knife.

Holding the strongest weapon nurtured by the Mountain of Destruction, Luo Feng was momentarily reminded of his youth, when he practiced with the Bloodshadow Knife in the martial arts hall.

"Bloodshadow Knife, in the endless long years to come, stay by my side." Luo Feng smiled slightly.

The treasures that can be exchanged from the Mountain of Destruction all have a common flaw—they must be carried with you!

Whether it is the 'Embryonic Form' of the weak Mysterious Land that can be exchanged for three Destruction Fruits, or the strongest Secret Treasure that can be obtained for four Destruction Fruits, or the battle armor exchanged for one Destruction Fruit like that of Kafu, they all must be carried with you!

In life-and-death battles, it's possible to have the body shattered and the treasures taken!

"With my Blade Technique, paired with this Bloodshadow Knife, I will cut through everything in my path. No one can stop me." Luo Feng was confident that even if he faced the siege of a hundred Ancestors, he could carve a path.

"Go to the 34th layer of the Abyss of Destruction to test the power of this Bloodshadow Knife."

With a thought, Luo Feng traversed time and space, leaving the Mountain of Destruction.

...

The 34th layer of the Abyss of Destruction, the bottommost layer, where the Realm of Life and Death once again shrouded the area.

The World Envoy once again condensed into a robed figure.

"You've come." The robed figure looked at Luo Feng, and then at the Bloodshadow Knife in Luo Feng's hand.

As one of the three extremes of the Endless Primordial Space, 'Abyss of Destruction,' it has nurtured the strongest blade! The robed figure

knew very well... this blade contained unimaginable sharpness, but only the truly powerful could obtain and be recognized by this weapon from the Abyss of Destruction.

"Your strength is substantial, and to show my respect, I went to the Mountain of Destruction to exchange for this weapon." Luo Feng said.

"Good." The robed figure nodded slightly.

Crash.

Its imposing figure transformed into endless black mist, enveloping a vast area, including where Luo Feng stood. The black mist condensed into countless black water, starting to suppress Luo Feng in all directions.

"Buzz——"

Suddenly, Luo Feng became one with the blade, transforming into an incomparably refined blade light. At the point of this blade light was the 'Bloodshadow Knife Blade' itself.

Sizzle!

Compared to last time, Luo Feng felt much less resistance, as if the black water was 'actively' avoiding him. The Bloodshadow Knife Blade naturally had the characteristic of 'cutting through all matter and energy,' and Luo Feng wielded it with his mastery of two Daos and the burning of thirty percent of his Energy Reserve.

Where the blade light passed, everything was divided in two.

Even chains formed through condensation silently cracked under the blade light.

"All things can be cut, this is truly all things can be cut. Nothing can withstand my blade." Luo Feng marveled, knowing well that merely cutting in two was not fatal to Ancestors and Lords, but it had a significant impact.

"Boom——"

The black water could not block it, the chains could not intercept it, and an imposing figure also stood in front of the Bloodshadow Knife —it was the 'World Envoy's' formidable body.

Puff!

The blade light flashed past, already piercing through the World Envoy's body.

"This——" The World Envoy looked at the scene helplessly, as Luo Feng's terrifying strength combined with that blade was truly unstoppable.

Luo Feng, in the form of blade light, had already reached the Shadow of Origin.

Luo Feng felt it was too easy.

When he exchanged for treasures, he chose this blade among the three. On one hand, to make his specialty stronger, and on the other, to master the Destruction World. Luo Feng was concerned that the Domain Secret Treasure might be weaker than the World Envoy's domain, and the Cloak Treasure only increased defensive capability. He worried these two couldn't help him refine and control the 34th layer.

"The profound mystery of cutting through all things, together with the strongest weapon that can cut through all things." At this moment, Luo Feng even had a thought, "I wonder if my blade can cut the Initial Ancestor in two."

In a state of elation, Luo Feng's thoughts easily imprinted onto the Shadow of Origin.

At the moment of imprinting.

"Boom."

Luo Feng sensed the reality of the entire Abyss of Destruction.

He saw the surface 'True World'—the 34-layer Destruction World! This is where Ancestors and Lords find it the easiest to explore.

He also saw the inner 'Spirit World'—the Sea of Destruction! It's a terrifying sea formed by the accumulated negative Spiritual Power of all living creatures in the Endless Primordial Space over countless ages.

He also saw the innermost core layer—the Mountain of Destruction.

At this moment, as the master of the surface 'Destruction World,' Luo Feng also sensed the various forces of the Endless Primordial Space.

Chapter 474 - 12-9: Over 200,000 Eras

Chapter 474: Chapter 12-9: Over 200,000 Eras

Previously, while exploring the Fluctuation Land with Lord Mo Man, Luo Feng had perceived the Endless Primordial Space from the perspective of fluctuations. At this moment, perceiving the Endless Primordial Space from the perspective of the Abyss of Destruction brought about a new change.

The Abyss of Destruction, Land of Eternity, and Fire Prison Wall are the three major pillars of the Endless Primordial Space! Missing any of these pillars is not acceptable.

"The Abyss of Destruction and the Fire Prison Wall, no opposition whatsoever, but instead perfect collaboration?"

Luo Feng felt.

The Fire Prison Wall is like an infinite energy radiation spreading across the Endless Primordial Space, allowing countless creatures to grow, giving birth to various resources.

The Land of Eternity, like a stabilizing needle in the ocean, stabilizes the entire Endless Primordial Space.

The Abyss of Destruction swallows all that is harmful to the Endless Primordial Space. It’s like a ’garbage cleanup’.

The three of them all aim for the Endless Primordial Space to

continue its eternal existence.

"I can sense that the duty of the Abyss of Destruction, besides devouring the most intense negative spiritual power, is crucially... destruction!" Luo Feng could vaguely sense the Abyss of Destruction was always accumulating power, "When the burden of the number of creatures affects the stability of the Endless Primordial Space! The Abyss of Destruction might erupt with accumulated power over endless ages, forming a great catastrophe, affecting the entire Endless Primordial Space."

"By then, nine-tenths of the Innate Primordial Life might die, Ancestors not at the 'Undying and Undying' level might perish in large numbers too."

"Even if the Source World is resilient enough, it might still suffer extensive destruction."

Luo Feng could vaguely sense.

This is a kind of self-cleansing for the Endless Primordial Space!

Of course, it only happens when the burden is extremely great! Since the birth of the Endless Primordial Space, no destruction eruption has ever occurred.

"Once a 'Master of the Abyss of Destruction' appears, they can refine the cleansing of the Endless Primordial Space." Luo Feng understood this.

The one-time eruption of the Abyss of Destruction's accumulated power is too terrifying, indifferent to friend or foe, wantonly destructive.

Once there is an owner, as the master, while departing the Abyss of Destruction, they can only borrow part of the power, and the destructive force is much weaker. If they do not wish to see 'indiscriminate mass destruction,' the master will naturally cleanse the Endless Primordial Space periodically.

"To erupt the accumulated power of the Abyss of Destruction in one go, is also a great depletion of energy for the Abyss of Destruction."

"So having a master actively cleanse is greatly beneficial for both the Abyss of Destruction and the Endless Primordial Space."

"Because 'being the master of the Abyss of Destruction' is very challenging, there are multiple candidates, and I am one of them." Luo Feng realized, the Abyss of Destruction divides its powers into seven parts, allowing for up to seven candidates.

Candidates can also 'periodically cleanse' the Endless Primordial Space.

As for those who are weaker?

The Abyss of Destruction holds them in disdain; such strength is not qualified to 'periodically cleanse' the Endless Primordial Space.

"As a candidate, I also face challenges."

He controlled the 34th layer of the Destruction World, but other Ancestors or Lords could descend layer by layer if they are strong enough! If defeated in the 34th layer, they could also seize control from him and the World Envoy, thereby taking the authority to 'master the Destruction World'.

"The one who occupies first has advantages; defeating me and the World Envoy?" Luo Feng smiled.

Luo Feng could only evade the obstruction by the World Envoy after he obtained weapons.

After mastering the Destruction World, Luo Feng had overall superiority over the World Envoy.

The latecomer...

Must face not only the World Envoy but also the cooperative efforts of Luo Feng as the master of the Destruction World, making the difficulty significantly higher.

"Unfortunately, I cannot expel some hostile Ancestors within the Destruction World." Luo Feng pondered, even though he mastered the Destruction World, he only left a mark on the 'Shadow of Origin' in

the 34th layer of the Destruction World. And the Shadow of Origin... is just a strand of power from the core of the Abyss of Destruction.

His authority is granted by the Abyss of Destruction.

Only when the core of the 'Abyss of Destruction' is fully refined one day, can he be considered the master of the Abyss of Destruction.

"After me, those closest in power are at the 26th and 27th layers in the Abyss of Destruction, quite a far gap from me." Luo Feng didn't feel too much pressure.

Indeed, after understanding the secrets of the Abyss of Destruction, Luo Feng also decided not to give any more Destruction Fruits to Sha Zhou, even if obtained in the future.

Sha Zhou's power evolved significantly after obtaining two Destruction Fruits. If he gifted her one, what if it caused a qualitative change in her Life Core's evolution? Actively cultivating an opponent is not something one should do.

Besides, are Sha Zhou's promises necessarily believable? What would one do if she broke her promises?

Ancestors have broken promises and flipped faces more than once or twice.

In the past, Yuan and Sha Zhou, the Ice Mountain Ancestor had such a good relationship, but later the Ice Peak Camp also took advantage of the 'Innate Primordial Camp warring against the Cultivator Camp,' seizing over a hundred world groups from the Cultivator Camp? When Wu Gu Ancestor, the Three Kings of the Wind and Thunder Sea, engaged in plundering and slaughter, didn't the Ice Mountain Ancestor silently approve? Even to reclaim territory, eight Lords had to issue threats of war stance before the Ice Mountain Ancestor eventually returned it.

All promises and friendships can become jokes in the face of time or camp interests.

"Rely on mountains, and they collapse; rely on people, and they run. The most trustworthy remains one's own strength!" Luo Feng

murmured.

At the deepest layer of the Abyss of Destruction.

On this land formed by the condensation of endless resentment and hatred, a cave mansion appeared, within which Luo Feng had an avatar residing long-term. Perpetually perceiving the fluctuating power of the Abyss of Destruction.

...

The future holds countless possibilities, branching into numerous timelines.

Some of these timelines will collapse, while others will persist.

The Starlight Lord has numerous avatars, traversing various timelines, observing the myriad possibilities of the future. When a world on a 'future timeline' suddenly collapses, it signifies the complete disappearance of that possibility.

"What's happening?"

"This..."

Numerous avatars of the Starlight Lord, while observing the future, suddenly discovered something shocking.

"Why can I no longer see Luo Feng in any of the future timelines?" The Starlight Lord realized this point; in all future timelines, Lord Luo Feng was greatly influential, often sighted.

"Previously, only the Hermit was hard for me to observe. Now, there's another one—Luo Feng." The Starlight Lord speculated, "There must be some special power concealing his trace."

The true form of the hermit was completely concealed.

Luo Feng was also hidden from view.

"Luo Feng has been staying in the depths of the Abyss of Destruction lately. Could he have mastered some sort of power from it?" Starlight

Lord speculated.

As the highest tier of mysterious lands, the slightest interference from the Abyss of Destruction was enough to make it difficult for the Starlight Lord to observe.

"Whatever the reason, he must have grown stronger." The Starlight Lord smiled.

...

Before long, Luo Feng left some intelligence in the Land of Origin.

More detailed information about the 'Abyss of Destruction'.

Yuan, Jin, Wulan, Ming Huang, Nai Gu, Starlight, and Mo Man all saw this information.

"The Abyss of Destruction requires passing seven layers of tests to control it, which is extremely difficult."

"The Abyss of Destruction is divided into seven powers."

"The surface True World — Destruction World, contains one power, which is currently under my control."

"The inner Spirit World — Sea of Destruction, contains two powers."

"The core 'Mountain of Destruction' has three powers."

"Upon passing the sixth layer of tests, one can also obtain a power. The latter six powers are currently unclaimed, with unknown thresholds."

Luo Feng shared the information he explored with other lords, hoping that if there should be another chosen one, it would be another lord!

This intelligence shocked the seven lords somewhat.

The eight lords thus gathered in the Land of Origin.

"Gaining control of the surface Destruction World is relatively the easiest, but one still has to cut through 34 layers of the Destruction

World." Jin shook his head lightly, "I've only occupied the 13th layer now. Obviously, just having a single primordial level Dao isn't enough to impress the Abyss of Destruction."

"Though I have mastered two primordial level Daos of life and death, grasping control of the 'Abyss of Destruction' remains distant." Luo Feng smiled, "Being able to wield one power is already very fortunate."

There is still the advantage of being the first occupier.

Later comers, even with equal strength! It is difficult to control a single power.

"After all, it is the highest tier of mysterious lands," said Starlight.

"After Luo Feng took control of the Destruction World, his power increased significantly. I think our previous territorial expansion plan was too conservative." Nai Gu said with a smile.

"Let's wait for Yuan to break through first." Ming Huang said, "Then we'll discuss it."

Luo Feng nodded as well.

Yuan's breakthrough will noticeably enhance the overall strength of the cultivator camp. If Yuan's 'Primordial Rule Operation Path' undergoes further transformation, it can harmonize the strength of the eight lords even better.

The overall combat strength will increase significantly.

By then, my plan can also proceed more smoothly.

"Just waiting for Brother Yuan to break through," Luo Feng laughed.

"Soon, soon." Yuan laughed boisterously.

...

In the blink of an eye, more than two hundred thousand epochs passed, and Yuan was still cultivating in seclusion.

For Yuan, over two hundred thousand epochs is a very short cultivation time. For Luo Feng, from cultivating as an eternal true god to becoming the 'foremost in the Endless Primordial Space', the time spent is less than twenty thousand epochs.

Luo Feng's homeland, the Source World.

The Land of Origin is now incredibly vast, with a total of 360,000 Primal Chaos Prefecture of varying sizes!

The lifespan of a true god is only thirty thousand epochs. Over two hundred thousand epochs... is enough time for the Land of Origin to spawn countless creatures, and many originally desolate and remote areas have also been newly built with many cities.

In one of the thirty-six thousand Primal Chaos Prefecture, Zhentan Primal Chaos Prefecture, in the main city, a tavern.

The lord of this Primal Chaos Prefecture, 'Marquis Zhentan', was enjoying the delicacies, and the entire tavern staff was serving with care.

"I never expected that simply following the conventions of the Duan Dong River lineage, just leaving a legacy as normal, would... change the fate of the entire Duan Dong River lineage of 192 generations." Marquis Zhentan still feels how lucky he was.

Including himself, all 192 successors of the Duan Dong River and their closest relatives have been resurrected! The Duan Dong River lineage was always a single lineage, but now all the past generations live in the same era.

"Who could have thought that the 193rd Duan Dong River would be the great Lord Luo Feng, and it was the legacy I left him." Zhentan felt extremely fortunate.

The resurrected Duan Dong River of past generations, only the third-generation ancestor and the 192nd 'Duan Dong River * Zhentan' received special favor from Luo Feng! Because strictly speaking, the legacy left by the third-generation ancestor greatly helped Luo Feng, and the 192nd Duan Dong River had the grace of passing on the

teachings.

Other Duan Dong River of past generations only received some cultivation resources, and they must forge their own path in the future.

Of course, this 'some resources' already excited the Duan Dong River of past generations.

The 192nd Duan Dong River was granted a fief in a Primal Chaos Prefecture! In today's Land of Origin, even a godly king needs multiple approvals to possibly obtain a fief. He utilized numerous resources to further step into the Primal Chaos Realm.

The third-generation ancestor 'Jueyi God King', not only received a fief but was also granted a cave mansion in the Galaxy Capital City, along with numerous valuable resources.

"The Duan Dong River lineage stops at Lord Luo Feng. Thus, there will be no 194th Duan Dong River." Zhentan thought.

He is the 192nd, Luo Feng is the 193rd, and there will be no more successors.

Although the Duan Dong River of past generations are scattered across the Land of Origin, they are all part of the same lineage and do communicate, occasionally gathering. They consciously maintain this group identity. Over two hundred thousand epochs have passed, and among the 192 Duan Dong River, five have become godly kings, marking a formidable force on the Land of Origin.

Chapter 475 - 12-10: Yuan’s Breakthrough

Chapter 475: Chapter 12-10: Yuan’s Breakthrough

The Infinite World, as the first world born in the Endless Primordial Space, has countless clouds floating in its sky, each corresponding to a Source World, seemingly innumerable.

The ground, however, is endless black soil, and from its depths emerge small snakes, precisely the ’Infinite Great Serpent’ clan.

One by one, small snakes protrude their heads from the soil layer, peering through the Void to witness the endless Primordial Space at every corner.

"That Lord Luo Feng is too domineering! As soon as anyone dares to devour a Source World, he immediately strikes down with one blade."

"My sister couldn’t help but sneakily consume a Source World, thinking she could return to the Infinite World before Lord Luo Feng approached. But she was still a distance of one or two World Groups away when she was struck dead by Lord Luo Feng’s Avatar with a single slash."

Each of these small snakes is a descendant of the world-level Primordial-class Infinite Great Serpent clan.

To the Infinite Great Serpent clan, the best resource is the Source World Origin! And the effect of consuming the Source World Origin is best for ’world-level Primordial Life.’ Thus, these world-level

Primordial Infinite Serpents are quite dissatisfied with Lord Luo Feng.

Yet they can do nothing about it!

As the leading tribe in the foremost camp! The Infinite Great Serpent clan has always been proud, but in the face of 'Lord Luo Feng,' they just want to hide far away, and even several World Groups apart, they do not feel safe.

"I heard that the Inference Fire Ancestor went to negotiate with Lord Luo Feng, and Lord Luo Feng slashed away most of the Inference Fire Ancestor's True Body, and now, no ancestor dares to negotiate."

"After all, he occupies the 34th layer of the Abyss of Destruction! His power far surpasses any ancestor!"

The greatest pride of these Infinite Serpents is their leader 'Infinite Snake Ancestor' and the over a dozen ancestor-level existences within the clan!

But they understand that even if their ancestors join forces, they still fear they cannot rival Lord Luo Feng!

Too strong!

With one slash, he severely injured the undying and undying Inference Fire Ancestor.

Who dares to jump around?

Anyone who devours a Source World is hunted by Lord Luo Feng, an undertaking that has lasted for over twenty million epochs! This has also caused some dissatisfaction among the ancestors, who secretly connect, yet still dare not start a collective war.

After all, over twenty million epochs, to the ancestors, is just the time for one cultivation session, they can still endure.

If Luo Feng were still at the strength of occupying the 28th layer of the Abyss of Destruction, a group of powerful ancestors would have long since joined forces to trouble him! But now, occupying the 34th layer... the ancestors are also somewhat panicked.

These ancestors are all unwilling to be the 'early birds,' thinking they can still endure a bit longer!

Let other ancestors test Luo Feng's power! Explore the real situation of Lord Luo Feng!

As for over twenty million epochs? This amount of time, they still have patience.

******

Endless waves of blood ripple, and the mysterious land 'Blood Crane Territory' has been renamed Galaxy Territory.

In the solitary Galaxy Territory, there is only Luo Feng.

He often cultivates here, with blade light sharply intertwining over the vast blood wave. With his current strength, practicing techniques here is terrifyingly powerful, and only in this mysterious land can he enjoy its full deployment.

At this moment, on the island within the Galaxy Territory, Luo Feng sits cross-legged, draped in a black robe. This black robe is woven from the 'Power of Destruction World' and 'Crane Leader's Power,' primarily black, with some red line outlines.

Crane Leader's Power accounts for thirty percent, while the Power of Destruction World accounts for seventy percent.

Crane Leader's Power primarily has the characteristics of 'Undying' and 'Shadow,' more beneficial for movement technique and defense, while the Power of Destruction World is mainly destructive.

"Trying to comprehend the third Primordial Level Dao is indeed too difficult." Luo Feng sits cross-legged, a hint of helplessness between his brows.

Even though his battle power is unparalleled in the Endless Primordial Space, he still encounters setbacks.

Continuously cultivating for over twenty million epochs does not tire Luo Feng; it feels like the time for a mortal to drink a cup of tea.

"Outside of Life and Death, I also have a slight talent for the Path of Matter."

Luo Feng has chosen to focus on practicing the Path of Matter in the endless future years.

An endless lifespan still needs a goal to strive for.

"I exchanged for the sharpest weapon, and while mastering the Destruction World, I barely managed to defeat the fifth sculpture." Luo Feng pondered, "To completely defeat the seven sculptures, I estimate grasping three Primordial Level Paths is needed."

The difficulty those ancestors pursuing the Life Core route face to pass the seven layers of tests is something Luo Feng does not fully understand.

But for Lords comprehending the Primordial Level Dao, it's estimated they need to master three Dao and require some external aid to hope for success!

"The third Dao—the Path of Matter."

"I carefully comprehend each branch, even sending down countless Avatars, descending into Source Worlds containing the 'Path of Matter,' traversing and comprehending." Luo Feng thought, "Over twenty million epochs, I have only finally comprehended all branches of the Path of Matter and begun to attempt fusion, stepping into the Second Realm of Godly King."

Integrating all branches of the Path of Matter into one forms the complete Path of Matter, entering the Ultimate Realm of Godly King. This is considered the first stage, and it is the easiest stage, after all, there is the 'Path of Matter' within the Source World Origin as a reference.

The second stage is fumbling in the dark until reaching half-step Primordial.

The third stage is from half-step Primordial to 'Primordial Material Path.'

Especially the third stage, the difficulty skyrockets by over a billion times compared to the first two stages.

But after over twenty million epochs, he is still trapped in the first stage, having just reached the Second Realm of Godly King.

"No wonder, Ming Huang, Jin, Wulan, each one of them finds it difficult to progress in comprehending the second Primordial Level Dao. I now understand." Luo Feng smiled slightly.

He is not in a rush; he was mentally prepared for comprehending the third Dao.

"Take it slow."

Luo Feng was well aware of the magical time.

In endless ages, Ancestors would slowly progress, as would Lords.

The progress seemed exceedingly slow, but what about in two billion epochs? Or two hundred billion epochs? Or even longer?

******

The Land of Origin, the first mysterious place of the Cultivator Camp, a mysterious place controlled by Yuan, which he also contributed to becoming the foundation of the Cultivator Camp.

"After endless years of cultivation, I have finally taken this step today."

Yuan opened his eyes, feeling an inner joy.

"My Primordial Rule Operation Path's foundation is thoroughly established, and henceforth, I only need to comprehend more Great Dao." Yuan felt very pleased.

The Primordial Rule Operation Path, externally, was rule operation, but internally, it needed to constitute the origin.

He had long conceived ideas, yet progress was difficult.

The 'Origin System' of Luo Feng's Primordial Life and Death Dao solved many of Yuan's problems, allowing Yuan smooth advancement, spending over two hundred millennia to finally thoroughly comprehend his own Origin System.

The Origin System integrated into the 'Primordial Rule Operation Path' is considered Perfection. From now on, only embellishments are needed.

"Sister Sha Zhou, now in terms of strength, I fear I'm no weaker than you." Yuan thought.

Compared to Sha Zhou, he had always been inferior over the long years.

Until today, even though Sha Zhou excelled in frontal combat and Yuan in Formation, Yuan was still confident to directly match.

"Everyone, I have broken through."

Yuan immediately transmitted this thought to the other seven Lords.

"Broken through?"

Each Lord, including Nai Gu, Wulan, Luo Feng, and Ming Huang, was overjoyed. They had all been waiting for Yuan's breakthrough! Once Yuan broke through, the power of the Cultivator Camp would indeed improve again.

Luo Feng's strength was individual strength.

Yuan's strength lay in Formation, which could elevate the overall strength of all the Lords working together. This made a more evident difference in the Camp's battles.

...

The Land of Origin, Council Hall.

Around a round table made of Dark Realm Crystal, eight figures appeared, seated in their respective positions.

"Brother Yuan, with this breakthrough, what level of strength have you reached?" Lord Mo Man asked, and the other Lords also watched Yuan.

"I'm not very good at frontal combat, about the same level as Sha Zhou and Starlight." Yuan replied with a smile.

Starlight glanced at him, "Not good at combat, only equals me?"

"Hahaha..." Wulan, Jin, Ming Huang, Mo Man, Nai Gu, among others, laughed, yet they also felt envy. They had cultivated for so long, yet a qualitative breakthrough seemed a distant prospect.

Luo Feng also smiled, watching this scene.

Compared to other camps, the Cultivator Camp had the advantage of being much more united.

"I have cultivated the longest." Yuan gazed at his companions, "When you all cultivate to a similar extent as I have, I'm sure you'll also break through."

"Hopefully, as you say, Yuan," Jin sighed, "Of the eight Lords, I'm second in age only to you, hoping that in the near future, I too can break through."

Starlight laughed, "Let's discuss our next plan now. Since Brother Yuan has broken through, our Cultivator Camp's overall strength has improved, and we should expand territories to protect more Source Worlds!"

"For the past twenty thousand millennia, it has been Luo Feng traversing the Endless Primordial Space, slaying Source World devourers, and deterring the Innate Primordial Life. But those Ancestors can endure for a short time; over time, they will erupt," Nai Gu stated, "The best way is to outright occupy a large swath of territory, making those Source Worlds nominally our domain, and letting those Innate Primordial Lives give up completely."

"Which territories do you think we should occupy?" Wulan asked, "Some good territories are mainly occupied by the Innate Primordial Camp and Ice Peak Camp, and taking them would make us their

enemies."

"With Luo Feng here, combined with Yuan's Formation commanding power, does the Ice Peak Camp dare to contend with us?" Jin remarked, "Our strength thoroughly suppresses them, and we should occupy more extensive territories. I believe our target this time should be to expand to at least 8000 World Groups!"

"8000 World Groups is quite troublesome," Mo Man frowned, "After all, our 3600 World Groups are the densest territories, other territories' World Groups are relatively sparse, I think expanding to 6000 World Groups is quite an achievement."

"8000 World Groups impose substantial pressure, needing to occupy nearly half of the territory," Ming Huang also shook his head.

The 3600 World Groups occupy about one-tenth of the territory primarily because those World Groups are densest there.

World Groups, however, represent nearly half the territory.

"We have too few Lords," Starlight also stated, "Forcibly occupying would be hard to defend and could force the Ice Peak Camp and Innate Primordial Camp to ally."

"I think occupying 5000 World Groups is enough." Luo Feng suddenly spoke.

The seven Lords fixated on Luo Feng.

With Luo Feng's current strength, his influence within the Cultivator Camp was naturally significant.

"5000 World Groups?" Jin couldn't help but comment, "Isn't that too few?"

Starlight watched this scenario unfold.

"It is a bit too few," Luo Feng nodded, "Hence, the Innate Primordial Camp, Ice Peak Camp, and other forces must compensate by handing over all their Source Worlds within their territories for us to govern."

"All Source Worlds?" Yuan’s eyes lit up upon hearing this; this was indeed his ultimate goal. The other Lords also held their breath.

Chapter 476 - 11: Action

Chapter 476: Chapter 11: Action

"I agree!" Ming Huang's eyes lit up as she spoke, "We have been too cautious before. With our current strength... we can completely occupy all Source Worlds in the Endless Primordial Space!"

Luo Feng nodded, "We are most concerned with the Source Worlds, but the Innate Primordial Life forms care about all evolutionary resources, and the Source Worlds are just one of those resources!"

Wulan laughed heartily, "Different Innate Primordial Life forms have different needs, and some races don't need the Source Worlds that much. We could just focus on 'Source Worlds' and abandon other resources... many Innate Primordial Life races would be willing."

"Mm, the hostility from Innate Primordial Life forms will be significantly reduced." Yuan agreed.

This is also a strategy to divide the enemies.

If we expand our territory on a large scale and occupy everything including the Source Worlds, many Ancestors might join forces! The Innate Primordial Camp and Ice Peak Camp, along with some weaker forces, might unite.

If we only want the Source Worlds, those races that don't really need them wouldn't fight desperately.

"We Lords focus mainly on Enlightenment," Luo Feng stated, "Those evolutionary resources are of little use to us. Making the entire world oppose us for those resources is pointless. After all, there are still some undying existences."

If we push too hard, the undying existences might fight to the death with the Cultivator Camp, which would be unbearable for us.

"Luo Feng, do you think expanding to over 5000 World Groups is to occupy this region?" Starlight Lord waved his hand, and a space-time map of the Endless Primordial Space appeared in mid-air, delineating a region comparable to the Cultivator Camp's territory.

Luo Feng nodded, "This region has 1600 World Groups, and its World Group density is only second to our current territory. Once occupied... we'll have two-tenths of the valuable territory in the Endless Primordial Space! Considering that future generations in the Cultivator Camp will need some resources, two-tenths of the territory is sufficient."

The present Lords also nodded.

"This region can barely accommodate a space-time network." Starlight Lord looked at it and nodded slightly, "But the difficulty is considerably higher than our current Cultivator Camp."

The territories are comparable.

One area has 3600 World Groups, and another area has 1600 World Groups with large barren Dark Areas, making the space-time network more difficult to establish.

"We must occupy this region." Yuan spoke, "We need to sufficiently threaten the Innate Primordial Camp! If they don't agree to hand over all Source Worlds, we'll continue expanding our territory."

"Choose one of the two." Starlight Lord smiled and nodded, "They are likely to prefer handing over all Source Worlds, though the Infinite Great Serpent Clan will fiercely resist."

For the Infinite Great Serpent Clan, the Source World Origin is what they need the most.

Mo Man also laughed, "As long as the Innate Primordial Species is internally divided, only the Infinite Great Serpent Clan will not make a big impact."

"First occupy the 1600 World Groups to intimidate the Innate Primordial Camp and all other forces. Then proceed to negotiate... using non-expansion as a condition to exchange for all Source Worlds." Yuan looked at the other Lords, "Does everyone agree?"

"Agree."

"Agree."

Jin, Wulan, Ming Huang, Nai Gu, Starlight Lord, Mo Man, and Luo Feng all agreed.

Absolutely occupy two-tenths of the territory, and then command all Source Worlds within the remaining territory! All eight Lords thought it was sufficient!

"Starlight Lord, please perfect the plan." Yuan looked at Starlight Lord, "Once the detailed plan is confirmed, we'll start the operation."

"Alright." Starlight Lord nodded.

He would consider countless future possibilities and devise a plan with the highest chance of success.

"Let's start by rehearsing the cooperative techniques." Yuan looked at the seven Lords, "I need to create several formations that suit everyone."

"Haha, I've long wanted to see how strong Yuan and Luo Feng have become now." Wulan laughed.

"Then let's begin." Jin was also quite expectant.

The eight Lords all used only a weak avatar (one-tenth energy reserve) to rehearse their cooperation in the Land of Origin! The Land of Origin, as the Mysterious Land, couldn't withstand the full-force training of the eight Lords' main avatars.

This rehearsal also astonished the other seven Lords with Luo Feng's strength!

Yuan's formation also reached an incredible level, more perfect than

before, maximizing collective strength.

This made the Lords very confident!

...

The 20th layer of the Abyss of Destruction.

"Hmm?" Ice Peak Ancestor, who had turned into a towering Ice Mountain, sensed Yuan suddenly entering his layer, causing Ice Peak Ancestor to naturally open his eyes and look at the familiar figure with curiosity.

"Brother Yuan." Ice Peak Ancestor looked at Yuan.

Was Yuan going to challenge him?

"Just passing by." Yuan smiled slightly and then continued to advance into deeper spaces.

Ice Peak Ancestor was a bit stunned.

...

"What's going on?" Both the Infinite Snake Ancestor on the 21st layer and the Demon Ruins on the 22nd layer saw Yuan rush past, entering deeper layers.

This made some Ancestors in the Endless Primordial Space begin to notice Yuan.

The 23rd to 25th layers were ownerless.

Once you enter, you are sure to face attacks from World Envoys.

"Boom..."

Yuan walked leisurely, with formations enveloping all directions, rendering the attacks of the World Envoys unable to touch Yuan! Those World Envoys were lost within the formations, and their attacks deviated in direction.

Yuan very calmly passed through the 23rd layer and the 24th layer,

finally leaving a mark on the Shadow of Origin at the 25th layer.

"What?"

"How is this possible?"

All factions were dumbfounded.

The power dynamic in the Abyss of Destruction was that Luo Feng occupied the unique 34th layer, Sha Zhou and Starlight Lord respectively occupied the 27th and 26th layers belonging to the second tier, followed by Demon Ruins, Infinite Snake Ancestor, Ice Peak, and Yuan in the 22nd layer and some weaker layers.

But now Yuan easily occupied the 25th layer! Judging by the battle scene, Yuan clearly wasn't giving his best.

"In the Endless Primordial Space, among the top four in direct strength, the Cultivator Camp occupies three positions?"

"Mastering the Primordial Level Dao, is the advantage really that great?"

Countless Ancestors felt uneasy in their hearts.

The Endless Primordial Space has over two hundred Ancestors, yet only eight Lords! However, once these eight Lords achieved their position, they became Undying and Undying, and their direct power was so formidable.

"We Ancestors have also fallen throughout history, those who survive to this day are already quite formidable. But even the weakest of these eight Lords are among the top twenty in strength."

"Although in terms of numbers and overall strength, all Innate Primordial Ancestors united are stronger, after all, there are over two hundred Ancestors. But individually, the gap is considerable."

It seems that there are the Cultivator Camp, Innate Primordial Camp, Ice Peak Camp, and some weaker forces, but in terms of life, there are essentially two categories.

One category is the Creatures from the Source World who have cultivated to Lords. Only eight.

The other category is the Ancestors achieved by Innate Primordial Life, totaling over two hundred. There are twenty-two who are Undying and Undying.

...

Yuan's easy conquest of the 25th layer of the Abyss of Destruction indeed stimulated all the Ancestors.

27th layer.

Sha Zhou watched the familiar figure approach her layer.

"Big Sister Sha Zhou." Yuan smiled at Sha Zhou.

"Did not expect the little guy from back then to catch up to me now." Sha Zhou looked at Yuan, "Come, let me see your techniques."

Yuan nodded.

A great battle erupted, as numerous Ancestors and Lords watched this battle from afar.

Sha Zhou still possessed a might that made all sides' hearts tremble, while Yuan's Formation seemed like the heavens and earth, enduring all attacks and counterattacking.

This confrontation ultimately ended in a draw.

Sha Zhou could not threaten Yuan, who was protected by layers of Formation.

Yuan's attacks also could not harm Sha Zhou.

Sha Zhou looked at Yuan and transmitted, "Did Luo Feng tell you about the Destruction Fruit?"

Yuan was startled.

He knew about the Destruction Fruit from the intelligence Luo Feng

provided, but was not aware of Sha Zhou's former proposal.

"I'll ask Luo Feng." Yuan responded.

Soon after contacting Luo Feng privately, Yuan understood the entire situation.

"Big Sister Sha Zhou, have you agreed to fully join the Cultivator Camp?" Yuan transmitted, "Even if it means being at odds with the Ice Peak Ancestor and all Innate Primordial Life Ancestors, will you still stand with us forever?"

"I didn't say I would join you; I said... I would fully support you." Sha Zhou transmitted, "I can help you deal with the Innate Primordial Camp, even if you oppose the Ice Peak Camp, I can remain neutral."

Yuan gently shook his head.

He understood Sha Zhou too well.

Sha Zhou, at her core, is very cold-hearted and can be completely ruthless except towards the 'Ice Mountain.'

"Luo Feng said he has already exchanged the Destruction Fruit for treasures, so there's none left." Yuan said, and then turned to leave.

"Exchanged for treasures, none left?"

Sha Zhou was taken aback.

In the Mountain of Destruction, she could only defeat two statues; the third statue completely overwhelmed her, leaving her without any hope of victory.

Kafu's Destruction Fruit had long been exchanged for Battle Armor, and Luo Feng's was her only hope to obtain a Destruction Fruit.

"With his strength in occupying the 34th layer, even if all Destruction Fruits are exchanged for treasures, the obtained treasures could greatly boost his strength, possibly allowing him to defeat another statue and obtain another fruit." Sha Zhou thought.

In Sha Zhou's view, the possibility that Luo Feng possesses at least one Destruction Fruit is very high!

...

Land of Origin.

The eight Lords gathered avatar for the main battle.

"Sha Zhou mentioned to Luo Feng, and now to me, about the Destruction Fruit." Yuan was somewhat worried, looking at Starlight, "From what I know of her, she clearly desires this Destruction Fruit very much."

"Brother Yuan, don't let emotions cloud your judgment." Starlight shook his head, "Sha Zhou's nature is very cold and ruthless. Even if she gets one Destruction Fruit, she will still desire a second one... She won't serve us forever just for one fruit."

Luo Feng listened on the side.

After mastering the Destruction World, he indeed defeated the fifth statue and can still exchange for one Destruction Fruit. But Luo Feng does not trust Sha Zhou, nor does he want to cultivate a competitor.

"For this operation, we need to face many Ancestors, a group of Undying and Undying beings. As for Sha Zhou? Don't think too much." Starlight said.

Everyone present nodded; they were all aware of the detailed action plan.

Yuan smiled, "Then let's set off and first take the 1,600 World Group."

"Luo Feng, when the time comes, be ruthless, just as you did when you slashed me." Wulan laughed, previously split in two during a spar to feel Luo Feng's blade of 'All Things Can Be Cut.'

"Rest assured."

Killing intent brewed in Luo Feng's heart; when sparring with the Lords, he had been very restrained. After mastering 'Destruction

World,' he had not yet fought a full-strength opponent.

This time, he should be able to fight to his heart's content.

"This time will be very interesting." Mo Man smiled.

"I can't wait." Jin's battle intent surged, Ming Huang smiled slightly, while Nai Gu's eyes were filled with bloodlust.

Starlight Lord controlled time and space, carrying Yuan, Wulan, Ming Huang, Nai Gu, Starlight, Mo Man, and Luo Feng on their mission together.

The eight Lords left the Land of Origin together and headed straight to their target territory.

Chapter 477 - 12: Occupying the Southern River Territory

Chapter 477: Chapter 12: Occupying the Southern River Territory

Infinite World.

"Hmm?" Amidst the clouds, a large serpent took shape; it was the Infinite Snake Ancestor, sensing the Cultivator Territory from afar.

"Eight Lords acting together?"

The Infinite Snake Ancestor felt uneasy.

Among the eight lords, Yuan, Starlight, Mo Man, and Luo Feng could suppress all life force fluctuations, but Wulan, Jin, Ming Huang, and Nai Gu couldn't.

In the Endless Primordial Space, over ninety percent of ancestors couldn't conceal all life force; any collective action would alert other powerful beings.

This time, to intimidate the entire Endless Primordial Space, Luo Feng and Yuan did not conceal their life force.

"Eight Lords acting together?"

"What are they up to?"

At this moment, all sides were on guard.

The weakest of the eight lords ranked in the top twenty in combat

strength, and the strongest was in a league of his own. The eight of them together could suppress the Ice Peak Camp's 'twelve undying and undying existences and 26 ancestors combined'!

...

The eight lords made no attempt to hide, letting all sides observe as they sailed powerfully towards their target territory.

Under Starlight's lead, they flew for about a day.

"We're here."

Luo Feng and others arrived at the border of this territory.

"Southern River Territory, 1600 World Group, we of the Cultivator Camp claim it." Yuan directly transmitted his voice, echoing to all ancestors within this 1600 World Group, "You must relocate quickly! If you do not leave, we will be forced to take action."

In the Endless Primordial Space, most regions are barren. Even if there are resources, they are so scarce that it's hardly worth the effort to mine them.

Southern River Territory, resembling a heart in shape, contains approximately 1600 World Groups! In terms of world group density, it is second only to the cultivator's original territory.

Outside the Southern River Territory is an extraordinarily vast wasteland.

The flourishing Southern River Territory has 29 ancestors leading countless Innate Primordial Factions, thriving here. They have long relied on this territory's resources for sustenance. The abundant Source Worlds of those 1600 Worlds were originally their food, but due to the recent interception by Lord Luo Feng, they dared not consume them for the time being.

"What?"

"The entire Southern River Territory, the Cultivator Camp wants it all?"

"They demand we relocate quickly?"

The ancestors scattered throughout this territory were shocked; whether in their true bodies or dispersing, they were anxious.

"If you have not started relocating within one day, you will be killed without mercy! If you are still within the Southern River Territory after twenty days, you will still be killed without mercy!" Yuan's cold voice echoed in the ears of these 29 ancestors and in the ears of over 230,000 World-Level Primordial Lives.

The threat of the eight lords caused the ancestors of the Southern River Territory and the World-Level Primordial Lives to panic; how could they provoke the eight lords?

The ancestors in this territory reported to the Nine Emperors while also preparing to relocate! According to the demand of the eight lords, relocation must begin within a day.

They have been rooted here for so long that relocating in a short period is not easy; many long-managed mines must be abandoned! The dispersed clans can only try to gather as much as possible.

Some clans in remote places, if they are World-Level Primordial Lives, can travel to meet up with their clans on their own. As for the High-Level Primordial Life? Traveling is too slow; they simply can't reunite with the clan in time.

...

The eight lords stood in the Void, their might spreading in all directions.

Suddenly, avatars descended, exactly the Nine Emperor Avatars of the Innate Primordial Camp! The Nine Emperor Avatars gathered.

"Yuan, what are you Cultivator Camp trying to do?" the Infinite Snake Ancestor shouted angrily, "Southern River Territory is part of our Innate Primordial Territory, and you just say you'll occupy it?"

"Haha..." Yuan laughed, "You Innate Primordial Camp invaded our Cultivator Territory, wantonly slaughtered, devoured Source Worlds.

Can we not occupy your territory?"

"Yuan, you are going too far!" the Giant God Emperor also said angrily, "Southern River Territory is a full 1600 World Groups, and you forcefully occupy them?"

"We indeed have over a hundred ancestors, while you only have eight lords. You don't need much resources; wouldn't 3600 World Groups be sufficient?" the Infinite Ancestor also said.

"Who says we lords don't need resources?" Wulan sneered.

"According to you, you take fifty percent of the territory, and our Cultivator Camp gets only ten percent?" Nai Gu laughed coldly.

"Do we have to fight after all?" the Silent Extinction Ancestor said coldly.

Luo Feng said coldly, "This Southern River Territory is just the beginning! With the strength and potential of our Cultivator Camp, even twenty percent of the territory is too small."

"Just the beginning?"

"You intend to occupy more?"

The Nine Emperors were both shocked and angry.

"A bunch of avatars, stop spouting nonsense here." Starlight Lord waved his hand, directly annihilated the Nine Emperor Avatars. As they vanished, the avatars of the Nine Emperors couldn't believe it; the arrogance of the Cultivator Lords was astounding.

"After all, we have to fight." Yuan said softly.

According to the original plan, they must absolutely control twenty percent of the territory and command all Source Worlds in the remaining territory! To achieve this goal, mere words are useless.

They must fight!

Because the negotiating objects of the Cultivator Camp are not only

the Innate Primordial Camp but also the Ice Peak Camp and many smaller factions! They want all 'Source Worlds' within the domain of every power.

"Must display enough power! That's the key to advancing the plan." Starlight said, getting all factions to agree is not an easy task.

"Haha, let's have a good battle!" Wulan's eyes were fervent.

"They have bullied us for too long!" Jin said.

His Primordial Destruction Path and Luo Feng's Primordial Blade Path are very different.

Luo Feng's Primordial Blade Path, destruction occupies 87%, life occupies 13%, and the life mysteries include 'Life Qi Mechanism', 'Life-cutting', 'Life Entanglement', and other components. The mysteries derived from destruction focus on the pursuit of power.

Jin's Primordial Destruction Path, whether in terms of destruction or life, is vastly different from Luo Feng's, naturally forming a different 'Dao'.

Even while pursuing a similar 'Dao', different lords ultimately grasp different Dao.

"The Innate Primordial Camp also senses our threat, so their battle formations prioritize survival and complement destruction, making them even more difficult to deal with," said Starlight, envisioning part of the future.

Luo Feng and the others also knew.

Among the Ancestors, there are those skilled in 'Life', 'Defense', 'Domain', 'Immortality', 'World', and other powers. Once a defensive system is constructed with these Ancestors at the core, the survival ability of the Ancestors' battle formations will greatly increase.

"In the past, they relied on their absolute numerical superiority and disdainfully ignored defensive battle formations, focusing on aggressive offense," said Mo Man with a laugh. "It forced us to be cautious, defending with all our might. Even so, we suffered defeat

after defeat, with world groups falling one after another."

Fortunately, the lords were undying and immortal, and even when a world group fell, they could quickly recover and gather to fight again.

"In the past, even ignoring their defensive formations, killing an Ancestor was not easy for us," Jin lamented.

"Now it’s different," said Yuan.

The attending lords looked at Luo Feng.

"Luo Feng, it will depend on you when the time comes," said Ming Huang with a smile.

During sparring, they had witnessed the terrifying power of that blade.

All Things Can Be Cut, Unbreakable!

"Luo Feng’s power surpasses limits; they cannot foretell Luo Feng’s future. This time, Luo Feng will give them some surprises," said Starlight. What he didn’t say was that even he couldn’t foresee Luo Feng’s future, only inferring some information from Luo Feng’s influence on countless future timelines.

"This time, we need to not only shock the Innate Primordial Camp but also intimidate other forces," Luo Feng understood this point. In this battle, he would cooperate with the battle formation with all his might, unleashing his utmost power.

...

Within the Southern River Territory.

A World Level Primordial Life was flying and collecting a large number of High-level Primordial Lives; its body surface naturally spawned worlds where those High-level Primordial Lives temporarily resided.

"Under my command, I’ve only managed to gather seventy percent of

the High-level Primordial Clan, and there's no time left," the World Level Primordial Life thought desperately, "I must meet with the Ancestors. If I'm late and don't leave in time, I might be slain by Lord Luo Feng from afar with a single blade."

This World Level Primordial Life immediately tore open a Space-Time Channel to travel.

"Hurry, hurry, hurry."

"I must rendezvous; we must leave the Southern River Territory within twenty days."

The Innate Primordial clans on the border of the Southern River Territory had some time, but the clans in the core region were panicking; their time was too tight! They had to ensure their travel, then, with the remaining time, try to take away as many resources and gather as many clans as possible.

"Ancestors, can't we resist the Cultivator Camp?"

"Are we just going to run away?"

Many World Level Primordial Lives were unwilling.

They were the first major camp! Just scared off like that? The Ancestors aren't resisting?

"Don't worry, the Nine Emperors will lead many Ancestors to face the challenge. We'll retreat temporarily. Once we win, we'll return," the Ancestors responded one by one.

...

The Innate Primordial Camp was indeed gathering, with the Nine Emperors participating! Many Ancestors' True Bodies were also in the fray.

"A total of 89 Ancestors."

"It's the most perfect battle formation combination tested before."

These Ancestors, merely gathering their True Bodies, took over ten days. They took various forms, some beast-like, some resembling celestial bodies like stars or clouds, some akin to water flows or mountains, others humanoid...

"This Cultivator Camp is too arrogant to actively invade our territory," the Infinite Snake Ancestor raged.

In the past, the Innate Primordial Camp had always oppressed the Cultivator Camp.

This time, the tables turned, with the eight lords occupying, even attempting to seize a tenth of the Endless Primordial Space in one go.

Though the 'Southern River Territory' only consists of 1600 world groups, in the eyes of the Innate Primordial Camp, its value isn't much different from the original territory of the Cultivators. After all, resources in other aspects are still abundant.

Such a vast territory? Claimed, just like that?

The resistance faction could not tolerate this!

"Those eight lords even said that occupying the Southern River Territory is just the beginning. They find it insufficient," growled the Giant God Emperor.

"This battle will show them that we are the mightiest," said the Inference Fire Ancestor, also irritated.

This battle, too, was a show of force for the Innate Primordial Camp! It was a declaration to all forces that... Endless Primordial Space, with their Innate Primordial Camp, remained the strongest!

"Depart!"

The Infinite Snake Ancestor, Infinite Ancestor, Silent Extinction Ancestor, Inference Fire Ancestor, Initial, Mother of Space-Time, Giant God Emperor, Black Tide Ancestor, Primordial Beast Ancestor and nine others commanded the selected eighty Ancestors in forming a colossal battle array.

Rumble~~~

Under the leadership of Mother of Space-Time, they grandly set out towards the eight lords.

At that moment, forces from other factions within the Endless Primordial Space watched from afar.

"They’re coming!"

The eight lords were also waiting, anticipating this moment.

This battle, too, was a show of force in the eight lords’ plans!

——

Thanks to the new Alliance Hierarchs ’Purified Steel is How It’s Made’ and ’Tomato Fried Rice With Egg’ for their rewards, and thanks for the support!

Chapter 478 - 13: Victory or Defeat (Part 1)

Chapter 478: Chapter 13: Victory or Defeat (Part 1)

In the Endless Primordial Space, every Ancestor and Lord is attentively watching. This imminent great battle will completely influence the future power structure of the Endless Primordial Space.

"It's almost here."

The 89 Ancestors of the Innate Primordial Camp were watching from afar, representing the largest power in the Endless Primordial Space! In the long years before, they occupied half the territory. Now, they faced challengers... the Cultivator Camp with just eight Lords!

The Cultivator Camp directly occupied the Southern River Territory's 1600 world group and also wanted to continue expanding, thoroughly inciting the entire Innate Primordial Camp! For their common interest, they must go all out!

"Buzz～～～"

A host of Ancestors traversed over distant space and time, their killing intent surging to the skies.

"Kill!" The twisted shadow of the Infinite Snake Ancestor obscured the vast Void. The moment they arrived, they didn't bother with words and immediately struck mercilessly, intending to annihilate the eight Lords of the Cultivator Camp.

Rumble~~~

Space-time twisted and surged!

The manipulation of space-time by the Mother of Space-Time, the Infinite Snake Ancestor, clashed with the Starlight Lord's manipulation, mutually affecting each other! There was also a vast and powerful Formation quietly operating, as if the whole world was subtly assisting the Starlight Lord.

"Space-time manipulation, they have the advantage!" The Mother of Space-Time and the Infinite Snake Ancestor were startled; in previous confrontations, the gap wasn't so significant.

"Yuan's Formation now has an even greater influence on the world." The Mother of Space-Time transmitted a message.

At this moment, all Ancestors took action.

This time among the many Ancestors participating in the battle, five mastered the highest level power of the Life Lineage, whether blood-colored, cyan, or green... Five highest level Life Forces spread out, affecting every Ancestor.

Various defensive forces, undying power, power of the world, domains, etc., were in operation.

There were 39 Ancestors proficient in life-saving, who had coordinated time and again to form the best cooperative method! The many forces deployed by the 39 Ancestors worked together as if they were one entity.

"Their domains are too strong, my Formation can't penetrate." Yuan was somewhat surprised, transmitting, "They now highly value life-saving methods."

The Innate Primordial Camp regarded the Cultivator Camp as a truly threatening opponent! Not considering victory, first considering defeat. Hence, life-saving was prioritized! The cooperation of 39 types of highest level life-saving power caused the eight Lords to somewhat change color.

Though each power was a weakened means of the Primordial level 'Dao', the sheer number was daunting.

"Boom!" "Boom!" "Boom!"...

This group of Ancestors coordinated with one another, numerous killing techniques directly descended.

They abandoned many close-combat techniques! For instance, the Giant God Emperor, Primordial Beast Ancestor, and Black Tide Ancestor coordinated to capture enemies up close; in the last war, they still dared to charge into the battle array of the Cultivator Camp. Now they dared not.

They abandoned risky techniques, developing numerous collaborative killing techniques!

Various illusions descended, infiltrating each Lord's spiritual will, but all eight Lords had exceptional spiritual wills, able to discern the illusions. Yet the mixture of chaotic illusions and real scenes also slightly affected the Lords.

"Boom～～～" With Yuan's assistance, leveraging Starlight Lord's space-time control, this time ensnared many Ancestors within the space-time techniques.

Numerous Ancestors found themselves on paths of time development, each timeline a complete Infinite Primordial Space, where the 'self' of the future resonated with the present self, affecting their power.

"Mother of Space-Time, suppress his timeline interference." Infinite Ancestor transmitted a message.

"With Yuan's Formation assisting, and the Starlight Lord constantly burning his main battle Avatar, his manipulation of the timeline is extremely strong this time." The Mother of Space-Time responded, she had done her utmost.

"Attack! Disregard everything else, full-force attack!"

While ensuring safety, various coordinated techniques poured towards the eight Lords of the Cultivator Camp.

There were all sorts of invisible poisons spreading, a few toxins even penetrated all barriers, directly infiltrating the physical bodies and souls of the Cultivator Lords.

There descended powers akin to the end of the world! Either overwhelmingly crushing everything, penetrating with a massive explosion, or silently eradicating all matter...

There were also invisible forces affecting each Lord, their bodies slowly 'decaying'...

There were also omnipresent forces, exploding again and again within the Cultivator Camp's battle array!

There were also attacks following causality...

And those targeting the soul...

Occasionally, there was extremely terrifying destructive power that could directly pierce through Yuan's Formation. Although Wulan and Luo Feng tried their best to fend it off, there were still destructive forces bypassing them, landing on other Lords...

"Hahaha, Yuan and Luo Feng's power has increased significantly, making it much easier for us!"

"Indeed, much better than before."

Mo Man, Nai Gu, Jin, Ming Huang felt much more at ease now.

Before Luo Feng became a Lord, under this overwhelming assault, their injuries would continuously worsen, ultimately leading to defeat. But now the situation was completely different.

"These slight injuries? Not worth mentioning."

"The consumption of my main battle Avatar is fully recovered in a blink."

Yuan and the Starlight Lord were constantly in a state of burning their main battle Avatars, consuming about ten percent of their energy reserves per breath.

Yuan's Formation commanded the power of the eight Lords, its might greater than before, reducing the 'attacks' falling on the Lords.

Starlight's advantage in space-time manipulation also made attacks on the Lords weaker.

With Luo Feng's treatments and supplementation of energy reserves,

the Lords felt at ease, perceiving it as merely 'some frost and snow'.

"The attack momentum of the Innate Primordial Camp cannot threaten us!" Yuan revealed a smile.

"Let's show them our power." Mo Man said.

"Time Killing Array!"

Yuan commanded.

The eight lords were very steady; only after blocking the attack from the Ancestor's side did they counterattack! Their move was one of the eight killing formations they had tested before, the 'Time Killing Array.'

"Buzz～～～"

The formation was activated.

Lord Mo Man's wave spread silently everywhere! No one could escape its surveillance.

"Sever."

Luo Feng also drew his blade.

The blade light was incredibly concentrated, like a thread of silk!

Blade light thread and the power of time and space achieve a perfect union, also resonating with the waves. Under the rules of the Primordial Void, the blade light thread even freely moves across timelines of past, present, and future, rendering many defensive techniques ineffective, unable to even touch the blade light.

In the eyes of the Ancestors, they found this blade light attacking simultaneously from different timelines, untouchable.

"Can’t see it clearly."

"Can’t be blocked at all."

They tried to dodge the blade light, tried to intercept it, but the blade light still attacked like an illusion.

"This blade light flows through different timelines, unless all timelines in this ’time segment’ are blocked, it is bound to hit." Mother of Space-Time transmitted to her companions, "Everyone rest assured, the blade light can flow through different timelines, but to kill the enemy, it must return to the present timeline! Moreover...the blade light that can flow through different timelines does not carry much power."

"Sizzle!"

The blade light instantly descended upon the present timeline, slashing across an Ancestor’s body, splitting the Ancestor’s body in two. However, with the omnipresent life power, that Ancestor instantly returned to their pinnacle state.

"The blade light power isn’t strong, yet it can easily split me in two!"

"Sizzle sizzle sizzle." The blade light of the Time Killing Array flowed repeatedly, passing by Ancestor after Ancestor, in just two or three moments, it swept through all the Ancestors.

These Ancestors were somewhat puzzled.

Split into two?

With an Ancestor’s life force, even split into tens of thousands, they wouldn’t die. Moreover, with multiple life-saving arrays working together, their survival ability had greatly improved.

"These 89 Ancestors have all had some information gathered." Starlight transmitted, the power of the Time Killing Array may not be great, but its technique easily bypasses array defenses and gathers

information quickly; knowing oneself and the enemy better increases the odds of victory.

Starlight immediately transmitted and laid out the plan.

The battle between the two camps had Starlight determining the battle plan. Of course, even if everything was meticulously planned, the ultimate victory still depended on strength.

"Be careful." The 89 Ancestors dared not be careless.

Although previously the eight lords mainly took hits and retaliated only with the relatively weak Time Killing Array, able to split the Ancestors protected by the formations in two, even though there was no loss in strength, it still made them wary.

"Boom rumble~~~" This time, the power of the eight lords was noticeably more ferocious.

The present timeline's momentum explosion was unrestricted.

The battle arrays of the Ancestors and the eight lords, numerous techniques clashed! The impact of the collision also made some Ancestors watching from afar uneasy.

"As predicted, the strength of the Cultivator Camp has surpassed my Ice Peak Camp." Ice Peak Ancestor looked from afar, wondering if the two-tenths of the territory the Ice Peak Camp currently occupied could still be defended.

"Even with 89 Ancestors working together, it's only equivalent to the eight lords?" Other Ancestors watching confirmed the strength of the Cultivator side at this moment.

Suddenly——

Luo Feng burned the main battle avatar, and the Bloodshadow Knife in his hand suddenly intensified, enhanced with the power of Destruction World, and slashed out instantly.

At this moment, all eight lords except 'Wulan' burned their main battle avatars, and with the formation's cooperation, the full power

was infused into the most sharp Bloodshadow Knife in Luo Feng's hand.

The Bloodshadow Knife contained unimaginable power, along with the ability to cleave through all matter and energy!

"Sizzle sizzle sizzle——"

The formation of the 89 Ancestors, though defensively strong, at this moment, the combined might of the eight lords directed by Luo Feng, was enough to cleave through all obstacles! Even the coordination of dozens of the highest-level powers couldn't stop this blade, all were severed!

The blade light was too fast, instantly landing on the 'Dark Roc Ancestor' protected within layers of formations.

At the instant it struck, waves, destruction, thunder, life-cutting... all kinds of powers erupted within the Dark Roc Ancestor's body, despite the many life-saving powers covering from the formations assembled by the 89 Ancestors attempting to save the Dark Roc Ancestor.

But the Dark Roc Ancestor was the easiest Ancestor to deal with, chosen by the Cultivator side through the 'Time Killing Array'!

At the moment the blade struck, numerous powers erupted simultaneously, instantly annihilating the hidden life core, its body vanished instantly pulled away by time and space.

Dark Roc Ancestor has fallen in battle!

The Innate Primordial Camp's number of Ancestors reduced from 89 to 88, stunning these Ancestors, and shocking the other forces watching the battle.

"Even being so cautious, an Ancestor has fallen?" The Nine Emperors found it hard to accept.

Chapter 479 - 14: Victory or Defeat (Part 2)

Chapter 479: Chapter 14: Victory or Defeat (Part 2)

In a showdown between two sides, naturally, they need to deploy Ancestors with formidable killing power.

This time, among the 89 Ancestors, 39 are adept at survival, which is quite abundant; the remaining 50 Ancestors excel in various killing techniques, but in terms of survival, they mostly rely on help from companions.

The first strike from the eight Lords is aimed at the easiest Ancestor to kill, causing some unrest within the Innate Primordial Camp.

The Dark Roc Ancestor was instantly killed? Will I be the next one?

"The protection capabilities of our Formation are still not perfect." Some Ancestors began transmitting messages.

The Infinite Snake Ancestor felt a tremor in his heart.

He understood...

When gathering the Ancestors, it was to make everyone feel that the Battle Array this time was perfectly coordinated, at least very strong in 'survival capabilities,' only then did these Ancestors willingly join the battle. However, once incidents of 'sudden death' occur one after another, there could be internal division among the Ancestors.

"We can't delay! Execute the killing move immediately!"

The Infinite Snake Ancestor immediately transmitted the message.

Logically, the battle between the two camps should last hundreds or thousands of eras, which is normal. The original plan was to learn more about the strengths and weaknesses of the eight Lords before using killing moves! Rushing to use them may not be as effective.

But the situation changed too quickly, there was no time to consider!

"Huh!"

The Infinite Snake Ancestor instantly transformed into a massive phantom, completely ethereal, no one could block it, and its enormous body encompassed all Ancestors and the eight Lords.

Then, the ethereal 'Infinite Snake Ancestor' suddenly solidified! Its enormous snake body naturally wrapped around 'Yuan'.

Yuan was trapped inside the snake's belly.

First ethereal, then solidified! This is the 'Infinite Snake Ancestor's' move for trapping enemies. Across the Endless Primordial Space, there are very few who can escape its 'trapping' technique.

"Huh?"

The faces of Luo Feng and the other seven Lords slightly changed.

Yuan, suddenly trapped within the Infinite Snake Ancestor! Inside, the Infinite Snake Ancestor's body suddenly erupted with terrifying fluctuations.

"Endless Light! Endless Might!"

This attack was a combined killing move, executed by the Infinite Snake Ancestor and the Infinite Ancestor! After the Infinite Ancestor broke through to the 'Undying and Undying' level, it also realized a burst technique similar to Luo Feng's Origin Great Destruction.

Such burst techniques can only be used once one achieves 'Undying and Undying'.

It was omnipresent!

Not blocked by the Infinite Snake Ancestor, it naturally appeared instantly within the 'Infinite Snake Ancestor,' close to Yuan.

Inside the snake body.

Yuan was unable to escape and could only watch helplessly as the 'Infinite Ancestor' appeared, transforming into an incredibly dazzling light! This dazzling light tore apart and destroyed everything, even with Formation blocking, ultra-close range still meant it was torn apart and pulverized, the body was crushed and annihilated.

"The Cultivator Camp's eight Lords, Yuan and Luo Feng are key points! Without Yuan, their coordination would be much worse, severely reducing their strength, they simply cannot withstand our attack. Without Luo Feng, their threat level will rapidly decline."

The Innate Primordial Camp had long understood this reasoning, to defeat the Cultivator Camp, the first key is Yuan, the second key is Luo Feng, and only then does Starlight come into play. If any of the three are eliminated, the frontal war can be won.

"Boom——"

Accompanied by Yuan's body's annihilation, the immense Battle Array offensive from the other Ancestors in the Innate Primordial Camp also enveloped them!

Beside Luo Feng, as Yuan was trapped inside the Infinite Snake Ancestor, a strand of Yuan's thought transformed into a weak Avatar beside Luo Feng, and under Luo Feng's power supply, quickly grew stronger!

As the main battle Avatar was destroyed, Yuan's Avatar had already swiftly grown to reserve energy of thirty to forty percent, while maintaining the Formation with burning power.

"Boom～～～"

Although the Battle Array was slightly weakened, under the assistance of Wulan, Luo Feng, and Starlight, they managed to

stabilize the situation for a moment, allowing Yuan's Avatar to quickly ascend to sufficient strength.

"His weak strand of Avatar ascended to the main battle Avatar state so quickly?" The Ancestors of the Innate Primordial Camp felt a chill in their hearts.

The key figures of the Cultivator Camp, arranged in order: Yuan, Luo Feng, Starlight!

Luo Feng had naturally strong defensive abilities, unmatched combat power! The killing move from 'Infinite Snake Ancestor and Infinite Ancestor' has no certainty against Luo Feng. Not even the Infinite Snake Ancestor's body could confidently trap Luo Feng's blade!

As for Starlight? No method to trap him has been found temporarily.

Thus, comparing the three, Yuan is relatively easier to target.

"Second strike!"

Yuan quickly recovered to the Pinnacle, and the eight Lords unhesitatingly combined forces to unleash the second strike.

With the power of their companions enhancing themselves, Luo Feng wielded the blade easily, slicing through the Battle Array formed by numerous Ancestors! The Initial Ancestor attempted to block Luo Feng's blade with its body.

Luo Feng was interested to know how his blade would fare against the Initial Ancestor's body, this spear and shield, which would prove stronger. But at this crucial moment, he couldn't allow himself to waste the battle opportunity.

The blade light flashed, easily avoiding the Initial Ancestor.

The massive spherical body of the Initial Ancestor moved slowly, unable to block Luo Feng's blade light at all!

"No——"

Another Ancestor was struck, it was precisely the 'Wind Devouring

Ancestor’.

The moment the blade light struck, multiple powers erupted, this Wind Devouring Ancestor had already dispersed its power into millions of ’winds,’ trying to escape. As long as one gust escaped, it could survive.

However, invisible fluctuations spread, instantly obliterating ninety-nine percent of the power.

Furthermore, thunder, annihilation, space-time, life-cutting, and other energies simultaneously followed the perception, destroying all escaping ’winds’.

None of the millions of winds could persist for a moment.

All were annihilated!

As verified by the Lords’ ’Time Killing Array,’ and based on the difficulty of targeting, this Wind Devouring Ancestor’s survival ability was weaker, completely countered by the combined efforts of the Lords.

With just one move, it was annihilated. Other Ancestors had no time to rescue.

"The Wind Devouring Ancestor is dead too." Some Ancestors felt a bit panicked.

"Third strike——"

Luo Feng and the others mercilessly unleashed the third strike.

But the third strike failed; that Ancestor’s life resilience was stronger than estimated, firmly holding out for a moment, receiving rescue from other Ancestors, five highest-level Life Powers simultaneously came to the rescue, and this Ancestor also quickly grew stronger.

The fourth strike succeeded.

The fifth strike failed...

Luo Feng and the other eight lords continuously wielded their blades eight times! Each strike was able to cut through the layered defensive formations, and although they weakened with each layer, the remaining blade light was still terrifying.

The final outcome was that three of these Ancestors perished in battle.

"We underestimated Luo Feng's blade!"

"We had a total of 39 Ancestors skilled in life-preservation techniques collaborating, utilizing various powers, yet his blade still cut through," said the Mother of Space-Time. "The futures I glimpsed showed no sign of Luo Feng. I thought... this defensive collaboration would definitely withstand the lords' combined killing techniques."

"Luo Feng's blade is somewhat unique!" The Silent Extinction Ancestor transmitted. "I vaguely sense that the blade seems to be the incarnation of the 'Abyss of Destruction.'

The Silent Extinction Ancestor has the keenest perception of the crisis of death.

On this blade, the Silent Extinction Ancestor sensed the threat of death, feeling as if it was about to return to the great extinction.

"His blade also gives me a hint of threat," the Initial Ancestor said.

The other eight were all surprised.

Who is the Initial Ancestor? The only existence in the Endless Primordial Space capable of crossing the Fire Prison Wall, able to withstand all its flames. Yet it sensed a trace of threat from Luo Feng's blade.

"His blade can break through all formation obstructions and strike the Ancestor's body."

"Once he figures out more details of our formations, perhaps more Ancestors might fall in battle."

The Nine Emperors understood this point.

In the initial confrontation, neither side knew the other's formations well, yet three Ancestors were killed. If the battle continues for a long time... perhaps two or three more Ancestors might die.

"Is there a chance to break the lords' battle array?" the Infinite Ancestor inquired.

"I see no hope," said the Mother of Space-Time. "Even if a certain lord is severely injured, Luo Feng can make his companion's avatar quickly recover to the pinnacle."

The Nine Emperors understood this point.

Yuan, Luo Feng is the key point!

Attempts have been made on Yuan's point, but they didn't even consider trying it with Luo Feng!

...

The remaining 86 Ancestors suddenly slightly retreated, completely reining in their power, with the Nine Emperors in the forefront.

The eight lords also temporarily reined in their power.

Both sides temporarily ceased hostilities.

This scene also allowed the Ancestors from various factions to see from afar, leaving them somewhat wistful.

"This time, the confrontation is a loss for the Innate Primordial Camp."

"But it can't be fully considered a loss. The three Ancestors who died were weak in life-preserving abilities, and the remaining 86 Ancestors... the Cultivator Camp also can't do much against them? Moreover, the Innate Primordial Camp still has more than thirty Ancestors who haven't participated in the battle."

"The Ancestors who haven't participated are mostly those with weaker strength."

Various parties discussed intensely.

No matter what, in this initial skirmish of the war, the Cultivator Camp held the upper hand.

...

The many Ancestors led by the Nine Emperors stood distantly across from the eight lords.

"The eight lords of the Cultivator Camp," the Infinite Snake Ancestor's voice rumbled, "Tell us, what exactly do you want? Not satisfied with forcibly occupying the Southern River Territory, still wanting to expand further?"

"Even if we occupy the Southern River Territory, we only claim two-tenths of the Endless Primordial Space territory," said Yuan. "And even though you've lost the Southern River Territory, you still hold four-tenths of the territory, twice as much as ours."

"Yuan."

The Giant God Emperor spoke, "After all, we have over a hundred Ancestors, and countless World-level and High Level Primordial Life. You, Cultivators, have only eight lords, your World-level and High Level Primordial Life are very rare... you don't need that many resources, so why compete with us?"

The Giant God Emperor was originally anti-war, but for the massive resources needed by the Giant God Race, it had to step up.

"I can take responsibility in yielding the Southern River Territory to your Cultivator Camp," the Giant God Emperor looked at Yuan, "but you must promise not to expand any further."

The Infinite Snake Ancestor, Inference Fire Ancestor, and others all remained silent, as this was clearly part of their plan.

If they couldn't win in battle, they'd yield the Southern River Territory!

"Have us promise never to expand?" Yuan gently shook his head.

"At least never invade the territories of our Innate Primordial Camp again," said the Giant God Emperor. "As for your dealings with the Ice Peak Camp and other forces, we naturally have no say."

Yuan, Luo Feng, Starlight exchanged glances.

"In the endless future, our Cultivator Camp may give rise to the ninth, tenth lord, or even more," Yuan spoke. "For just the Southern River Territory, you want us to promise never to expand towards you? The Southern River Territory is already ours, and taking our territory to force a promise from us?"

"What do you want?" the Infinite Snake Ancestor spoke deeply, sensing that the Cultivator Camp was willing to negotiate but wanted more.

Yuan calmly said, "Our demand for resources is indeed not that high, but all creatures of the Source World are our kin, our requirement is just one!"

"From now on, all Source Worlds within your territory shall forever belong to our Cultivator Camp's command."

"As long as you agree, we can promise never to invade your Innate Primordial Camp."

Luo Feng, Starlight, Wulan, Ming Huang, Jin, Nai Gu, Mo Man, and the other lords all nodded slightly.

This was their collective decision.

"All Source Worlds?"

The Nine Emperors and the many Ancestors were all startled.

"What impudence!" the Infinite Snake Ancestor couldn't hold back.

Chapter 480 - 12: Division

Chapter 480: Chapter 12: Division

The resource most suitable for the Infinite Great Snake Clan is the 'Source World Origin'. The Infinite Snake Ancestor itself has long been undying and undying. For the needs of the clan, it also cannot agree.

"Hand over all the Source Worlds in our territory to you? You're purely delusional!" The Infinite Snake Ancestor's eyes were cold. "This condition has no room for negotiation!"

"All Source World Creatures are our kin. Our Cultivator Camp has strived for generations and will definitely take them all back. We cannot tolerate the Source World Creatures serving as food for you forever!" Yuan said coldly.

The Infinite Snake Ancestor sneered, "Want all the Source Worlds? Then there'll be a full-scale war! By then, numerous Source Worlds in your Cultivator Territory will also be swept into the war!"

The numerous Ancestors and eight Lords radiated murderous intent.

"Full-scale war? Our Lords don't care." Yuan said indifferently, "The Lords are undying and undying, let's see how many of your Ancestors will fall in battle."

"Haha, our Innate Primordial Camp does indeed need enough blood and fire." The Silent Extinction Ancestor spoke, "Only blood and fire can make the Life Core grow and birth more undying and undying!"

"Full-scale war, who would be afraid?" The Infinite Ancestor also sneered.

The Ancestors who reached the level of undying and undying, don't care.

Those Ancestors very close to 'undying and undying,' like the Silent Extinction Ancestor, eagerly anticipate advancing further; a sufficiently brutal war is beneficial to their evolution.

As for the fate of the lower ranks?

They care for the continuation of the clan, and during this process, the elimination through wars doesn't concern them.

"The Innate Primordial Camp has been the first major camp in the Endless Primordial Space for too long!" Luo Feng spoke, "It's time for the first major camp to change."

Possessing the power to control the Destruction World, Luo Feng can conduct 'periodic clean-ups,' gaining favor from the Abyss of Destruction.

Luo Feng is prepared for a great massacre!

To command all Source Worlds, if negotiation fails, then war is the only option!

One side has eight undying and undying Lords! The other has five undying and undying Ancestors and over a hundred Ancestors of varying strengths. Should full-scale war erupt, the casualties are destined to be severe.

An Ancestor like the Silent Extinction Ancestor, nearing a breakthrough, instead yearns for this brutal war!

"Is all you want just the Source Worlds?" The Giant God Emperor suddenly spoke, causing the Infinite Snake Ancestor and Silent Extinction Ancestor to glare at it angrily.

"Yes."

Yuan nodded, "You should also know, resources for Life Core evolution aren't important to us Cultivator Lords! We only care for the Source Worlds, and apart from the Source Worlds, there's

countless other resources in the vast territory, all of which can belong to you. But of course, we will continue to fairly compete for the Mysterious Land."

The Mysterious Land, where all parties have always assumed fair competition! Refining and mastery depend entirely on individual ability.

"You promise, never to invade our Innate Primordial Camp's territory again for endless ages?" The Giant God Emperor continued.

"We eight Lords will promise all Ancestors 'never to expand'." Yuan stated.

The Giant God Emperor understood.

It turned to its companions and said, "Eight Cultivator Lords collectively promise, never to expand again. Only need to give them all Source Worlds! I think Source Worlds aren't that important to us."

"Source Worlds are very important to us." The Infinite Snake Ancestor stared at the Giant God Emperor.

"Our Giant God Race doesn't care." The Giant God Emperor looked at it, "Your Infinite Great Snake Clan certainly cares a lot, but... for the long ages, the strength of other Ancestors has hardly improved. Infinite Snake Ancestor, I think you rely too heavily on the Source Worlds. Thoroughly abandoning the Source Worlds is also a tempering for your Infinite Great Snake Clan."

"Your Giant God Race doesn't need them, can abandon them." The Infinite Snake Ancestor shook its head, "But this condition, our Infinite Great Snake Clan can never agree to!"

The Infinite Great Snake Clan, the proportion of world-level beings becoming Ancestors, far exceeds other clans because of absorbing the Source World Origin. Once abandoned, the subsequent emergence of Ancestors for the Infinite Great Snake Clan will quickly become extremely difficult.

"Many clans do not particularly need the Source Worlds." The Giant God Emperor looked behind, "I believe among the 86 Ancestors here,

many Ancestors don't care about the 'Source World Origin'."

Many Ancestors felt somewhat tempted.

Previously, they thought the Cultivator Camp was occupying the 'Southern River Territory' and was still unsatisfied, still wanting to expand! For their territory necessary for survival and reproduction, these Ancestors were united against the Cultivator Camp at any cost.

But now, the eight Lords promise never to expand!

This isn't an individual Lord's promise, nor a private promise! But eight Lords... a public promise to all Ancestors. Considering that the Cultivator Lords also lack Life Cores, the promise's credibility is quite high.

Never expand? Then why fight?

As for the Source Worlds, for their clan's reproduction and growth, it's merely a resource enhancing what's already favorable; missing the Source World doesn't make much difference.

"What the Giant God Emperor said also makes sense." The Initial Ancestor suddenly spoke, having been silent, "Your Infinite Great Snake Clan has always relied on the 'Source World Origin'. Perhaps breaking off from the Source World Origin is another tempering for Life Core evolution."

The Infinite Snake Ancestor realized the internal division.

Even among the Nine Emperors.

The Giant God Emperor, Primordial Beast Ancestor, and Black Tide Ancestor stood together.

Initial Ancestor and Mother of Space-Time leaned slightly neutral.

Friend 'Infinite Ancestor', since becoming undying and undying, alone without a clan, no longer cooperated as it once did.

"Are we facing the Cultivator Camp to retreat like this?" The Silent Extinction Ancestor spoke.

"We don’t need Source World Origin, why fight to the death over Source Worlds?"

"Yes, the Cultivator Camp never expands, why fight against them?"

The Ancestors communicated with each other.

The Nine Emperors were divided into three factions, and other Ancestors were similarly fragmented.

The majority of Ancestors joining the battle faced potential death! They were certainly unwilling to risk their lives for resources they did not need!

...

The eight Lords watched this scene, observing what seemed to be some internal strife within the Innate Primordial Camp. These Ancestors were likely communicating, and while they couldn’t hear the content, they could speculate.

"Are they arguing?" Mo Man observed.

"It is expected," replied Starlight.

Suddenly—

The Infinite Ancestor, among the Nine Emperors, spoke, "Eight Lords, regarding the demands you made, we need thorough internal discussion. We also need to consult Ancestors not engaged in battle, so let’s postpone the final negotiations for one Era. After one Era, our Innate Primordial Camp will give you a definite answer."

"Alright, then we will await your response," Yuan nodded.

Indeed, to yield all Source World within the camp, the Innate Primordial Camp needs a unified stance.

"Let us go."

Led by the Mother of Space-Time, a group of Ancestors immediately crossed into the space-time channel and departed.

Inside the shimmering space-time channel, the Ancestors continuously advanced.

"Giant God Emperor, you are truly unwilling to join the battle?" transmitted the Infinite Snake Ancestor, "Facing the Cultivator Camp, we must unite."

"As long as the Cultivator Camp adheres to their promises, my Giant God Race will not participate. Not only us, but quite a few other Ancestors are unwilling to fight," Giant God Emperor communicated, "Nearly half of the Ancestors do not need the Source World Origin; they are all unwilling to risk their lives."

The Infinite Snake Ancestor sighed inwardly.

"There is still one Era before the final negotiations," transmitted Giant God Emperor, "Do your best to find a way. If you can't, after one Era, my faction and many Ancestors will accept the Cultivator side's conditions."

Although the Infinite Snake Ancestor was strong, it could not force the faction supported by nearly half of the Ancestors led by Giant God Emperor.

"This Cultivator Camp is truly despicable. They do not expand territories, only want the Source World," the Infinite Snake Ancestor felt quite uncomfortable.

Never expanding indeed reduced a lot of hostility.

...

Southern River Territory.

"The objective of this confrontation has been achieved. We have displayed our strength to the entire Endless Primordial Space. Even within the Innate Primordial Camp, three Ancestors died before us," Yuan said, "We can take this opportunity to negotiate with all forces!"

Relying on war to seize all Source World is a bad strategy!

After all, there are more than twenty Undying and Undying beings.

Even if some Source Worlds are forcefully occupied, the Undying and Undying can still come back.

Negotiating a resolution is the best way.

"The negotiations will be entrusted to you, Starlight," Yuan said.

"Brother Yuan, Brother Luo Feng, you two send avatars with me to visit the major powers," said Starlight.

Luo Feng, Yuan both nodded.

With a single thought, they could gather a weak avatar in the targeted force's territory, where the three avatars could directly go to see the Ancestors of weaker forces.

"To see those weaker forces, I, Luo Feng, Yuan will send weak avatars," Starlight said, "But to visit the Ice Peak Camp and negotiate with them, our eight main avatars must go."

"The difficulty of negotiation with Ice Peak Camp is no less than that of the Innate Primordial Camp," Yuan also frowned and said.

In terms of strength, the Ice Peak Camp is indeed weaker than the Innate Primordial Camp.

But the leaders of the Ice Peak Camp are twelve Undying and Undying beings! These Undying and Undying beings do not fear war, so what if they lose? After all, Undying and Undying.

"To eternally command all Source Worlds while facing a group of Undying and Undying beings in Endless Primordial Space is not easy," Starlight couldn't help but sigh. Even though he could traverse countless future timelines, he still understood—it is impossible to resolve perfectly.

Mogus, who has a mortal enmity with the Cultivator Camp, is simply unsolvable.

Mogus, Undying and Undying, comes and goes alone, loves to devour countless soul of Creatures! Mogus is destined to always oppose the Cultivator Camp.

"Every one we can negotiate is one less," Yuan said, "Through negotiation, we can have much fewer troubles in the future."

Negotiations, to minimize opponents.

The fewer opponents, the less pressure there will be in the future.

"Whoosh—whoosh—whoosh—"

The main avatars of the eight Lords set off together, heading toward the direction of the Ice Peak Camp's territory.

At the same time, the weak avatars of Luo Feng, Yuan, and Starlight descended upon various weaker force territories to respectively visit Ancestors and commence rounds of negotiation.

Chapter 481 - 16: The Outcome of Negotiations

Chapter 481: Chapter 16: The Outcome of Negotiations

The avatars of Starlight, Yuan, and Luo Feng cross layers of time and space to visit Kafu.

"Although there are many weaker forces, most of them are easy to negotiate with." Starlight said leisurely. Among the top four powers in the Endless Primordial Space, they occupy three! Luo Feng is undoubtedly the first.

Such deterrence—how many Ancestors who have not reached the 'Undying and Undying' have the courage to oppose?

Yuan nodded in agreement: "The ones we need to handle cautiously are mainly those undying and undying existences. Among the weaker forces, there are only five undying and undying beings: Hermit, Mogus, Demon Ruins, Kafu, and Feather Emperor. The Hermit is elusive, and he hasn't occupied any territory. Mogus is our mortal enemy, hidden among countless life souls, also without any territory. For now, we should face Kafu, Demon Ruins, and Feather Emperor."

Luo Feng also smiled and said, "Feather Emperor still has concerns; he needs to consider the Feather Realm Clan. The Feather Realm Clan is not very eager for the Source World Origin, so it should be relatively easy to negotiate. The real focus is Kafu and Demon Ruins."

"They both travel alone, without any ties, and because of this," Starlight said, "we need to be more careful."

These untethered ones change faces at will.

"Here we are."

Starlight, Yuan, and Luo Feng looked ahead.

Within a dazzling cloud cluster lies Kafu's cave mansion, where he resides, and the surrounding 39 World Groups naturally become his territory! No force will penetrate into these 39 World Groups.

The countless innate primordial lives proliferating within this territory are all dependent on Kafu.

Although Kafu does not care for them, they remain extremely loyal, diligently serving, and daring not to defy him in the slightest. After all, they must have an Ancestor's protection to survive peacefully in this territory.

"Hahaha..." A hearty laughter echoed as Kafu stepped out of the cloud cluster, smiling at Luo Feng and his companions, "Luo Feng, my friend, why have you suddenly come here? Starlight and Yuan have arrived as well?"

"Kafu, I have something to ask for your help." Luo Feng smiled.

"Oh?" Kafu was puzzled.

"Here's the situation..." Luo Feng explained in detail, with Yuan and Starlight remaining silent, as Luo Feng was the closest to Kafu!

After Luo Feng's detailed explanation, he said, "The creatures of the Source World are of our Cultivator Lord's kin. We can do without other resources, but the Source Worlds must be reclaimed. Even if this era cannot fully reclaim them, future Lords will continue to strive for this!"

"I really envy you." Kafu sighed after hearing this, "You have companions and countless descendants."

Kafu was born into loneliness.

"As for the matter you asked me to help with, it's a small matter."

Kafu said.

"From now on, my world-level primordial lives are forbidden from consuming Source Worlds; those who defy will die!" Kafu's voice instantly echoed in the ears of thousands of world-level primordial lives under his command.

The thousands of world-level primordial lives living within his territory heard Kafu's command and were each frightened into respectful compliance.

None dared defy Kafu!

Kafu protects them, preventing them from being bullied by other forces. Yet, once Kafu issues a command, no innate primordial life dares defy.

Kafu's good relationship with Luo Feng makes him easy to talk with! Yet, looking across the Endless Primordial Space, Kafu is famous for his stubbornness.

"Alright, Luo Feng, my friend, I've done what you needed." Kafu said with a smile.

"Thank you." Luo Feng expressed gratitude, "I owe you one."

"It's a small matter." Kafu said with a grin, "After the Cultivator Camp finishes this busy period, I do have a little request for your help." He knows that Luo Feng's exploration of the Abyss of Destruction must far surpass his own, and he hopes to gain some intelligence from Luo Feng.

"Certainly." Luo Feng nodded in agreement.

...

"I have just one request: accompany me through the 34 layers of the Abyss of Destruction to broaden my horizons." Demon Ruins said to Luo Feng. Under his command, all world-level primordial lives are forbidden from consuming Source Worlds; Demon Ruins does not care at all.

"Alright, I agree." Luo Feng nodded.

Demon Ruins always felt a connection with the Abyss of Destruction, yet born from birth till now, made little progress, nor gained the Abyss of Destruction's recognition.

Luo Feng, as the controller of the lowest level of the Abyss of Destruction...

Demon Ruins indeed has a request from Luo Feng.

...

"It's possible, but your Cultivator Camp must promise to assist when my Feather Realm Clan faces a crisis in the future." Feather Emperor spoke quite well.

"We can promise you; when facing a crisis, all eight Lords will assist." Yuan said.

Feather Emperor nodded in satisfaction.

He himself has long been undying and undying, but the overall power of Feather Realm Clan is still too weak.

...

After negotiating with the three undying and undying existences, the other Ancestors were easier to speak with; as long as they 'didn't want to die', they wouldn't remain obstinate in the presence of Luo Feng, Starlight, and Yuan.

Within a day's time, all weaker forces were persuaded!

Of course, those without territories, such as the 'Hermit' and 'Mogus', did not count.

******

The avatars of the Cultivator's eight Lords rush directly to the core of the Ice Peak Camp.

"The weaker forces have been negotiated." Yuan said with a smile, "Thankfully, there was Luo Feng, otherwise Kafu and Demon Ruins wouldn't have agreed so readily."

The other seven Lords also showed cheer.

The first phase of negotiations was a great success.

The union of weaker forces also occupied two-tenths of the territory, and from now on, all Source Worlds within this two-tenths territory belong to the Cultivator Camp.

"The Innate Primordial Camp and the Ice Peak Camp are the most troublesome," Starlight said.

Luo Feng also nodded.

One side has over a hundred Ancestors, each with their own agenda.

The other side has twelve undying and undying entities.

"Try to win them over," Yuan said, "I'll send avatars to have private talks with them first."

Among the twelve undying and undying entities of the Ice Peak Camp, the top five in strength are Sha Zhou, the Ice Peak Ancestor, the Pu Cheng Ancestor, the Wugu Ancestor, and Xiu Saiwei.

When Yuan became a lord, the Cultivator Camp had only one lord, and he mainly advanced and retreated together with the Ice Peak Camp. For a long time, the Cultivator Camp was a staunch ally of the Ice Peak Camp.

Only as the Cultivator Camp continued to grow stronger did the two sides gradually drift apart.

But in terms of friendship, Yuan and the Ancestors of the Ice Peak Camp, many friendships are extraordinary.

"Brother Yuan, we're counting on you," Starlight said.

...

With a thought, Yuan divided many avatars to visit nine Ancestors, excluding the 'Three Emperors of Wind and Thunder Sea'!

The Three Emperors of Wind and Thunder Sea have a bad relationship with Yuan. Yuan knew visiting them would only humiliate himself, so he didn't bother to waste time.

"Yuan, I owe you the most for becoming undying and undying," said Xiu Saiwei boldly, "I will definitely help you with this matter."

"Thank you. Xiu Saiwei, I will remember your friendship. If you ever need anything, you can always find me or the entire Cultivator Camp," Yuan said, quite moved, as Xiu Saiwei had helped him many times over the years.

Xiu Saiwei never asked for anything in return and proactively offered assistance.

"If I ever run into trouble, I will certainly speak up," Xiu Saiwei said with a smile.

In Xiu Saiwei's view, the two major forces within the Ice Peak Camp, 'Ice Peak Ancestor and Sha Zhou' and 'Pu Cheng Ancestor,' are rather selfish. Yuan, on the other hand, is loyal.

Loyalty is rare among the undying and undying.

Xiu Saiwei is more willing to help Yuan!

...

"This is a resource list. If you can agree, all the resources on this list will be delivered immediately," Yuan said as he looked at the Pu Cheng Ancestor in front of him.

The two largest groups within the Ice Peak Camp are the Ice Peak Clan and the Pu Cheng Clan.

The Pu Cheng Ancestor has long been undying and undying, and he cares most about the future of his clan.

"Besides these resources," the Pu Cheng Ancestor smiled, "I need your

Cultivator Camp to agree, to agree for Lord Luo Feng to help me explore a Mysterious Land once."

Yuan hesitated slightly.

"Luo Feng has already agreed," Yuan said.

"Then it's settled," Pu Cheng said with satisfaction.

The Cultivator Camp doesn't have much demand for Life Core resources, but the Pu Cheng Clan craves them! The large amount of resources on this list is enough in the Pu Cheng Ancestor's eyes to offset the benefits of the Source World.

******

Eight lords were hurrying with their avatars for the war.

"Among the twelve undying and undying entities of the Ice Peak Camp, the Three Thieves of Wind and Thunder Sea are not to be bothered with. I visited nine of them privately," Yuan frowned, "I've reached agreements with four, but Ice Peak and Sha Zhou... have made demands."

"Sha Zhou needs a Destruction Fruit," Yuan looked at Luo Feng, "As long as we give the Destruction Fruit, Ice Peak and the others will agree to our requests. Otherwise, they will not hand over their Source Worlds."

"It's useless,"

Starlight frowned, "Even if a Destruction Fruit is given, Sha Zhou will not keep his promise. In the future I foresee, once Sha Zhou gets the Destruction Fruit, the Ice Peak Ancestor will intentionally fall out with Sha Zhou! The Ice Peak Ancestor will lead some undying and undying to join forces with the Infinite Snake Ancestor, and Sha Zhou will use the opportunity to demand a second Destruction Fruit."

Yuan nodded.

He also knew that Sha Zhou's nature was solitary and selfish, caring about no one except the Ice Peak Ancestor, and could even make a

direct move against the Cultivator Camp.

"Brother Yuan, the results of your private negotiations are already good," Starlight smiled, "Excluding the Three Thieves of Wind and Thunder Sea, you reached agreements with four of the nine undying and undying. This will cause a division in the 'Ice Peak Camp' regarding this matter, limiting their power to act against us."

"The Innate Primordial Camp should also only oppose us with limited power."

"The Ice Peak Camp will also have only partial opposition."

Starlight's eyes were cold, "Ultimately, we still have to rely on slaughter! Especially those who haven't reached 'undying and undying', if they dare interfere in this matter, they must be killed if possible!"

"Only slaughter can weaken the resistance enough," Starlight said, "Once their strength is insufficient, the Infinite Snake Ancestor, the Ice Peak Ancestor, they will have to endure."

Luo Feng and the others all nodded.

Suddenly——

"Eight lords, you need not come," a thought descended upon this time-space, "We already know your intentions, but this matter requires a thorough discussion internally. We will reply to you in one era's time."

The eight lords were stunned.

"Alright," Yuan nodded, "Then we'll wait for your response."

"Is it also one era like the Innate Primordial Camp?" Nai Gu slightly frowned.

"We'll wait first."

Starlight said, "During this era, we also need to be wary of them joining forces!"

Chapter 482 - 17: Alliance

Chapter 482: Chapter 17: Alliance

"On the contrary, I hope that in this era, they can join forces." Lord Mo Man's eyes were cold, "Whether it's the Innate Primordial Camp or the Ice Peak Camp, there are opposition forces."

"These opposition forces, if not dealt with in a strategic slaughter! In the long years to come, they will oppose us time and time again," Lord Mo Man said, "If we can achieve total domination in one battle and completely crush their opposing thoughts, it would actually be a good thing."

Luo Feng, Yuan, and the other lords all nodded.

To completely command all source worlds in the Endless Primordial Space means there will be many opposition forces! These 'opposition forces' will not receive any mercy from Luo Feng and his group, who will unleash their full might in slaughter!

"There is more than a seventy percent chance they will act within one era," Starlight said.

"We're getting close to ultimate victory," Yuan laughed heartily.

Since the day he became a lord, Yuan has always wanted to protect more and more source worlds! In countless source worlds, he has left his footprints and opportunities.

And now, he is getting closer and closer to 'substantially commanding all source worlds'! How can Yuan not be passionate?

"We've been allied with the Ice Peak Camp for long years too," Jin,

the second-born lord, sneered, "But what was the result? The Ice Peak Ancestor does not remember old friendships at all! He won't give us the source worlds. In my opinion... in this strategic slaughter, the Ice Peak Ancestor might stand on the opposite side."

Yuan's eyes were also cold: "We are about to achieve ultimate victory, and at this time anyone who stands against us cannot be spared at all."

Luo Feng also nodded: "Those who oppose us now, send them on their way!"

The eight lords were filled with murderous intent.

Anyone who obstructs the Cultivator Camp shall be spared no mercy!

******

The majestic hall.

The Infinite Snake Ancestor coiled here, its eyes dark and cold.

"In terms of strength, my Innate Primordial Camp is not inferior to the Cultivator Camp. However, the eight lords are undying and undying," the Infinite Snake Ancestor pondered, "Even if they are defeated, they can quickly recover their strength and attack again."

This is also the reason that the Giant God Emperor and dozens of ancestors agreed to the Cultivator Camp's promise of 'never expanding'. Because in prolonged battles, losing another 20-30 ancestors is a normal matter. Those ordinary ancestors with weak survival abilities are unwilling to participate in the battle.

"Our Innate Primordial Camp is divided internally, and the Ice Peak Camp is also divided," the Infinite Snake Ancestor was well aware of the situation there.

The ancestors of the two major camps have been friends from a long time ago and exchanging information is a common practice.

Like the three emperors of Wind and Thunder Sea, they have a good relationship with the Infinite Snake Ancestor in private and reveal

many secrets.

"The two camps are divided over the demands of the eight lords because... the eight lords are extremely powerful and undying," the Infinite Snake Ancestor was very troubled.

"Infinite Snake Ancestor." A cold voice sounded.

The Infinite Snake Ancestor looked over.

An intangible force condensed into a gray-robed figure, seemingly illusory yet real, its smile cold.

"Mogus," the Infinite Snake Ancestor recognized the visitor, who was ranked in the top ten of the Endless Primordial Space in strength, also mastering the highest level of soul power.

In soul aspects, Mogus was acknowledged as the highest achiever.

Before the Starlight Lord was born, Mogus acted at whim and no one could threaten it.

"I heard," the gray-robed figure smiled, "the eight lords of the Cultivator Camp are extremely arrogant, negotiating with all forces simultaneously, wanting to command all source worlds."

"Indeed," the Infinite Snake Ancestor said to the gray-robed figure, "once they fully command, any of your devouring of source worlds would provoke their pursuit!"

The gray-robed figure's aura grew colder.

It had no desire to participate in other struggles, but its path required devouring countless souls. Compared to the souls of 'Innate Primordial Life,' the number of souls in source worlds was billions of times greater, which Mogus valued most.

"In the entire Endless Primordial Space, I once could enjoy my food endlessly," Mogus coldly said, "but the Cultivator Camp targeted me repeatedly, with Starlight Lord especially restraining me. So, Infinite Snake Ancestor... you should understand that the Cultivator Camp is my mortal enemy!"

The Infinite Snake Ancestor listened.

"Eight lords undying, you can't solve them," Mogus smiled slightly, "but I have a way."

"You have a way?" The Infinite Snake Ancestor scoffed; it did not believe.

"In terms of souls, I am number one in the Endless Primordial Space," Mogus said.

The Infinite Snake Ancestor admitted this.

Mogus's highest-level soul power was indeed terrifying, facing it, an undying existence could only exert 30-40% of their strength at best. Some weaker ancestors might even be dazed, only able to protect their life core with no power to resist.

It was truly terrifying.

Relying solely on soul techniques, it could fight into the top ten of the Endless Primordial Space!

"You've fought with the Cultivator Camp many times," the Infinite Snake Ancestor said, "you can't do anything to them. As for the newly-rising Luo Feng... in the previous camp battle we attempted, Luo Feng's spiritual will was extremely powerful."

"I know," Mogus smiled and nodded, "relying on my strength alone is not enough! Therefore, I need helpers."

"I need the Silent Extinction Ancestor, Thousand Eyes Ancestor, Star Luo Ancestor, Myriad Touch Dragon Mother, Nightmare Ancestor, and Dream Weaver to assist me," Mogus said, "Looking at the Endless Primordial Space, in terms of souls, they rank just below me. Working together... we can weave an unprecedented illusory realm.

"An unprecedented illusory realm?" The Infinite Snake Ancestor was somewhat skeptical, an illusory realm? Would it be effective?

"The ultimate of the Soul Path is more terrifying than you think," Mogus was quite disdainful, for it played with souls and did not

esteem other ancestors highly. "The Cultivator Camp has targeted me repeatedly; I have studied their spiritual weaknesses for endless years. This illusory realm can give them a huge surprise!"

"Who are you targeting with the illusory realm?" The Infinite Snake Ancestor asked.

"Yuan!"

Mogus said, "I am very familiar with 'Yuan,' for he has cultivated for endless years and has put immeasurable effort into the Cultivator Camp. The more effort he puts in, the more he cares about countless source worlds. The more serious he becomes, the better the effect of this unprecedented illusory realm will be."

"Once it succeeds, Yuan will be trapped in his spirit, and he won't even be able to participate in the battle," Mogus said, "Even if he can participate with difficulty, he might only exert one or two-tenths of his strength."

In the domain it excelled most, Mogus had utmost confidence.

It has been hunted too many times by the Cultivator Camp, and it hates the Cultivator Camp deeply.

"Even if I barely join the battle, can I only exert one or two percent of my strength?" The Infinite Snake Ancestor was somewhat excited, "Confined within the mind, how long can it affect him?"

"Possibly forever," Mogus said confidently.

The Infinite Snake Ancestor was overjoyed.

The Formation of Yuan greatly enhances the overall strength of the eight Lords! Once Yuan is incapacitated, the deterrence of the remaining seven Lords will rapidly decline.

"Are six helpers enough? There are some Ancestors skilled in Mind Techniques; wouldn't inviting a few more enhance our grasp?" The Infinite Snake Ancestor suggested.

"Those worthless ones aren't needed," Mogus said disdainfully.

"These six helpers are scattered across the Innate Primordial Camp, Ice Peak Camp, and smaller factions," Mogus said, "How to invite them will depend on you."

"Leave it to me." The Infinite Snake Ancestor was quite confident.

Three of them belong to his own camp. As for the Myriad Touch Dragon Mother, Nightmare Ancestor, and Dream Weaver, he is confident he can persuade them.

"I also need you to provide enough Life for me to restore my strength," Mogus said.

"To fully recover, how much Life do you need?" The Infinite Snake Ancestor asked.

"Not much, just the souls of ten thousand World-level Primordial Life, or ’one trillion’ High-level Primordial Life," Mogus grinned.

The Infinite Snake Ancestor also found it quite troublesome.

World-level Primordial Life is the core of the clans, protected by Ancestors. Even as one of the Nine Emperors, he can’t capture World-level Primordial Life so easily.

High-level Primordial Life is indeed abundant, but the number ’one trillion’ still puts a lot of pressure on the Infinite Snake Ancestor.

"I’ll find a way," the Infinite Snake Ancestor didn’t agree readily.

"Once prepared, place these Lives in the Infinite World," Mogus said, "Starlight has always been chasing me, but he doesn’t dare enter the Infinite World."

"Alright," the Infinite Great Serpent responded.

...

The Ice Peak Ancestor stood on the vast land, an endless cold aura spread, covering the ground in ice.

He stood alone, unable to quell his anger.

"Pu Cheng, time and again opposing me."

"This time, sixteen Ancestors actually oppose!" The Ice Peak Ancestor was furious.

Internal voting within the Ice Peak Camp.

Pu Cheng, leading four Undying and Undying beings and twelve ordinary Ancestors, were unwilling to stand against the Cultivator Camp.

"Xiu Saiwei as well, whose biases repeatedly favor the Cultivator Camp." The Ice Peak Ancestor was enraged; he already disliked the rise of the Cultivator Camp. This time Sha Zhou decided to suppress the Cultivator Camp. The Ice Peak Ancestor wanted to command the camp's strength and ally with the Innate Primordial Camp to secure an absolute advantage.

Alas, twelve Ancestors stood on his opposing side!

"Ice Peak." A thought descended, transforming into a large serpent, "Looking at your situation, it seems your Ice Peak Camp doesn't fully listen to you either."

"You're no better than me," the Ice Peak Ancestor coldly retorted.

"I have good news from Mogus," the Infinite Snake Ancestor said, and immediately divulged all the detailed information.

"Oh?"

The Ice Peak Ancestor's eyes brightened after hearing, "If we can truly confine 'Yuan' within the mind, the remaining seven Lords on the Cultivator side... their deterrence will weaken greatly."

Without Yuan, the Lords would be a disarray, their overall strength reduced to one-third or even a quarter of what it was before.

"The Nightmare Ancestor is from your Ice Peak Camp, you're responsible for inviting him. As for the Myriad Touch Dragon Mother and the Dream Weaver, I'll do the inviting," the Infinite Snake Ancestor stated, boasting superior networking skills compared to the

Ice Peak Ancestor.

The Ice Peak Camp has a total of 38 Ancestors, while the Innate Primordial Camp has over 120; the gap in their ability to recruit Ancestors is evident.

"Alright," the Ice Peak Ancestor agreed.

"There's a big problem now," the Infinite Snake Ancestor said, "Mogus has been hunted by Starlight for too long, and its strength is now very weak. It needs to devour countless souls to recover its strength. It stated it requires ten thousand World-level Primordial Life or one trillion Innate Primordial Life."

"That's too many." The Ice Peak Ancestor's expression changed upon hearing, "Capturing ten thousand World-level Primordial Life is certainly impossible; numerous Ancestors would be furious."

Luo Feng, who previously raided, had at least a justification.

Upon devouring Source World Origin, Luo Feng would raid, and even then, all parties needed to talk to Luo Feng! Only due to Luo Feng's deterrence did those Ancestors begrudgingly tolerate it.

If one of their Nine Emperors, their own leader 'Ice Peak Ancestor' were to massively capture World-level Primordial Life, it would cause internal division within the camp.

"Ten thousand World-level Primordial Kind is definitely not feasible; every death of a World-level points to Ancestors' attention. We should try to gather 'one trillion High-level Primordial Life'," the Ice Peak Ancestor said, "Judging by the numbers within our two camp's clans, you handle seven hundred billion High-level Primordial Life, and I'll take care of three hundred billion High-level Primordial Life."

The Infinite Snake Ancestor didn't argue further.

Both parties were sincere in cooperation and naturally would strive to achieve.

"Alright." The Infinite Snake Ancestor nodded.

Seven hundred billion High-level Primordial Life; such a task must be done quietly. The Infinite Great Snake Clan can appear silently in any region of Endless Primordial Space, figuring out ways to keep it discreet.

...

The opposing forces from both camps are quickly preparing.

Some Ancestors from weaker factions unwilling to join the battle, such as the 'Myriad Touch Dragon Mother' and 'Dream Weaver,' had previously negotiated with the Cultivator Camp. Now, faced with threats and enormous resource temptations, they all violate their agreements with the Cultivator Camp and bring their clans to join the Innate Primordial Camp, preparing to participate in this battle.

Simultaneously, over one trillion High-level Primordial Life were captured from various places and ultimately delivered to the Infinite World. Mogus is quietly devouring countless souls, rapidly restoring its strength.

Chapter 483 - 18: Targeting Yuan

Chapter 483: Chapter 18: Targeting Yuan

In a void within the Southern River Territory, a palace floats in the air, where the main battle avatars of eight Lords patiently await.

In one area of the grand palace, Luo Feng and Jin are drinking together.

"The many Ancestors of the two camps are gathering," Jin said while holding his wine cup. The gathering of the Ancestors could hardly be hidden from the eight Lords.

"The forces of the two camps have allied against our Cultivator Camp," Luo Feng nodded as well, "This is our greatest enemy; once we defeat them, we can hope to permanently command all Source Worlds."

"To permanently command all Source Worlds..." Jin murmured, "I never thought that one day our Cultivator Camp could truly protect all the cultivators."

Jin smiled at Luo Feng: "Luo Feng, when I became a Lord, there were only Brother Yuan and me in the Cultivator Camp! Back then, we were much weaker, and the survival environment was very harsh; over ninety percent of the territorial Source World creatures were food, we did not dare oppose them."

"Brother Yuan tried every means to cultivate the younger generation."

"I also tried to select sufficiently outstanding successors," Jin looked

at Luo Feng, "Throughout the Endless Primordial Space, all others are Ancestors; only Brother Yuan and I are cultivated from Source World creatures! Do you know that feeling?"

Luo Feng could understand.

Even now, Cultivator Lords and Ancestors feel different from each other. Only now, with eight Lords and enough strength... all parties must take caution.

"Brother Yuan clings to the Ice Peak Camp, which I actually disdain, as an Undying and Undying existence; I disdain flattering the Ice Peak Camp," Jin said, "But Brother Yuan persistently flatters them, and dragged me with him to charge into battle for the Ice Peak Camp! By leveraging the Ice Peak Camp, the territories we command could be larger, and we can be less disturbed."

"But even so, Mo Man still continuously devours the souls of Source World creatures. The Infinite Great Serpent Clan still continuously devours, what can we do?"

"With just Brother Yuan and me, two Lords only, how could we provoke the largest group of Innate Primordial Life—the Infinite Great Serpent Clan?"

"I want to tear them apart."

"But Brother Yuan won’t allow it; once torn apart, subordinate territories would be completely destroyed in short time, and we have no way to enter the ’Infinite World’; tearing apart, we suffer more losses!"

Jin said, "Endure, make friends! Brother Yuan has quite a lot of friends. Like the twelve Immortal existences of the Ice Peak Camp... in terms of influence, Ice Peak Ancestor ranks first. While Brother Yuan in terms of influence comes second."

"Someone who hasn’t joined the Ice Peak Camp, yet his influence follows right after Ice Peak Ancestor," Jin sighed, "My lousy temperament falls short, I don’t have any friends in the Ice Peak Camp!"

"What I can do is try to cultivate successors! No matter the method, as long as it can produce a Lord, it's the best method," Jin looked at Luo Feng, "Luo Feng, although I don't agree with some of your ideas... yet, I admire you a lot!"

"Because you, changed the entire Cultivator Camp, and even gave us the opportunity to command all Source Worlds."

Jin looked at Luo Feng.

Not agreeing with Luo Feng, but he cherishes the law of the jungle! Luo Feng is the 'strongest'! A great help in enhancing companion strength, the entire camp completely transformed with Luo Feng's breakthroughs.

"Because of the accumulation of you seven predecessors, there is now such transformation," Luo Feng said.

The deterrence of the Cultivator Camp relies on the eight Lords! Just with oneself, it is far from enough.

"Haha..." Jin raised his cup.

Luo Feng also raised his cup.

Although the two have differing ideologies, the ability to command all Source Worlds, from this point onwards, Source World creatures no longer become food! It is the pursuit of every Lord's goal.

The large-scale devouring of Source World creatures is a disgrace to every Lord!

...

Yuan and Starlight also sat together.

"Mo Man is rapidly restoring his strength within the Infinite World," Starlight said, "I can clearly sense him becoming quickly powerful, yet he hides in the Infinite World; I have no means."

The Infinite World gathers numerous Ancestors, plus holds the advantage of the Mysterious Land, it's difficult to attack.

When they come out, then it’s good to wage war!

"For us to command all Source Worlds, Mo Man surely can’t endure," Yuan said calmly, "He has long been our mortal enemy."

"Mo Man is the strongest existence on the Soul Path within the Endless Primordial Space," Starlight seriously reminded, "Once he has a group of Ancestors proficient in souls to assist him, the threat will be terrifying."

Souls are the foundation of life.

Every Lord knows this. Only ’Soul Path’ cultivation remains extremely difficult, as there is no Great Dao to reference, the difficulty far surpasses other paths, no creature has reached the Ultimate Realm of God King on the Soul Path so far.

"Mo Man has fought with us too long, he knows you quite well," Starlight said, "You and Luo Feng are the two key points of our entire camp, yet Mo Man knows little about Luo Feng; Luo Feng has even occupied the 34th layer of the Abyss of Destruction! Mo Man should not have confidence to deal with Luo Feng... According to my deductions, there is over ninety percent chance he will come at you."

Yuan slightly smiled: "Rest assured."

"He united with a group of Ancestors proficient in souls, these soul-type techniques, the power is unpredictable," Starlight worried.

Yuan gazed into the endless void, calmly saying: "For this day, I have waited too long. No one can stop me!"

Starlight looked on.

Yuan gazed at Starlight, grinning: "Relax, trust me, they will smash here bloodily!"

Starlight slightly nodded.

...

The eight Lords sensed the aura fluctuations of those Ancestors, and

they patiently awaited.

Time passed.

Throughout the entire Endless Primordial Space, ancient existences awaited the imminent outbreak of this battle; the outcome of this battle shall determine the fate of countless Source Worlds.

"They’re coming."

Yuan, Jin, Wulan, Ming Huang, Nai Gu, Starlight, Mo Man, Luo Feng, the eight of them stood in the void, silently watching ahead.

Rumble~~~~

Ahead, the void naturally cracked open, as if the curtain of time and space had been drawn, a total of eighty-two terrifying figures simultaneously descended.

Of these eighty-two figures, leading them were the Infinite Snake Ancestor, Ice Peak Ancestor, Sha Zhou, Infinite Ancestor, Mogus, and other fourteen undying and immortal beings, along with sixty-eight other selected Ancestors.

It should be known...

Now in the Land of Eternity, there are only thirty members in total. The two sides participating in this battle have as many as 22.

"Brother Yuan!" Among them, the Ice Peak Ancestor said coldly, "We’ve known each other long enough, never thought it would come to this. All of this is because you are too domineering! We, Innate Primordial Life, devour the Source World; that’s our nature! Yet you forcibly seize all Source Worlds, which is an insult to all of our Ancestors!"

Yuan looked at the Ice Peak Ancestor, then at Sha Zhou beside him. Sha Zhou, in gray clothes, stood there, his gaze devoid of any fluctuation.

"I can understand your need to consume the Source World." Yuan nodded indifferently, "But we are Cultivators, as long as we have the

ability, we naturally resist. We Cultivators ask for little, just to survive and reproduce. We have already promised... as long as you don't consume the Source World, we will never expand. Yet even so, you still refuse! Then, there can only be one battle!"

The two sides looked at each other.

On one side, 82 Ancestors, slightly fewer than the 89 Ancestors sent by the Innate Primordial Camp last time, yet the overall strength is more powerful! There are nine more undying and immortal existences, and they have even invited some extremely strong Ancestors from weaker forces at any cost.

On the other side, there are eight Cultivator Lords, the weakest of them can be ranked in the top twenty in power.

"Since there is no agreement, let's rely on strength." The Infinite Snake Ancestor's gaze was ice cold.

As soon as the words fell, the 82 Ancestors had already started to attack.

There are various protective life-saving arrays, among which the Three Emperors of Wind Thunder Sea are also members of the formation. Although their frontal combat strength is at the bottom among 'undying and immortal', their life-saving and protective capabilities are extremely strong, apart from the 'Lord Mo Man' and a few others who can restrain them, most of the Ancestors have no way to deal with them. Even Lord Mo Man can only temporarily destroy their bodies; they are still eternally alive, able to reunite their bodies.

Especially at this moment, the three of them are just a part of the formation, and with a large group of Ancestors setting up the formation together. This formation's thickness is naturally terrifying.

"Rumble~~~~"

In the midst of sky-covering attacks, Mogus also led the Silent Extinction Ancestor, Thousand Eyes Ancestor, Star Luo Ancestor, Myriad Touch Dragon Mother, Nightmare Ancestor, Dream Weaver in launching a joint attack. On the Soul Path, Mogus is unparalleled, the

remaining six are second only to it! The seven have never joined forces over the long ages.

This time, under the intimidation of the eight Lords, the seven Ancestors from two camps and weaker forces jointly attacked.

"Buzz."

The soul technique, silent and unstoppable, has already enveloped Yuan.

This move targets Yuan alone.

"Hmm?" Yuan, who was originally presiding over the battle array, had perfectly coordinated the power of the other seven Lords to counter enemy attacks. But upon being hit, Yuan stood there dazedly, completely abandoning control over the formation.

"What happened?" Wulan was shocked.

"Not good!"

Luo Feng and the other seven Lords all felt a tremor in their hearts.

The seven of them are skilled in various Daos, but they know little about their companions' 'Dao', wanting to perfectly coordinate the 'Dao' of all Lords, none of the other Lords can do it.

Without Yuan, the seven Lords became like scattered sand, only able to perform some simple coordination.

The coordination of their strength immediately declined sharply! The power of the battle formation dropped to about thirty percent of its original.

"Rumble~~~~" Facing the overwhelming attacks, losing Yuan's leadership, Luo Feng and the seven immediately felt immense pressure, with the entire battle array close to collapsing at any moment.

"This is bad!" Wulan, standing at the forefront, tried his best to resist, but without the formation's coordination, too many techniques

bypassed Wulan! Luo Feng's black robes fluttered; the red thread patterns on the robes tried to help.

The power from Blood Crane Territory and the Power of Destruction World intertwined forming these robes, fully defending against external attacks.

But some Ancestors' techniques were too slippery to intercept.

"Starlight, what do we do?" Lord Mo Man anxiously transmitted, his fluctuations spreading around, striving to weaken the enemy's attacks. But regardless of how wondrous his methods are, the combined might of the 82 Ancestors is absolutely overpowering!

"Starlight, what do we do?" Jin also anxiously transmitted.

At this moment, Starlight was observing many future branches, searching for a solution.

"Boom——"

Luo Feng's main battle avatar ignited, performing a blade technique, yet this time his blade technique was fully defensive.

"Take Yuan and retreat with full force." Starlight immediately made a decision, "We can't hold on. We must endure until Yuan regains consciousness, otherwise it can't be fought."

Luo Feng can let his companions stay at the pinnacle, often performing forbidden techniques, plus Luo Feng's own power! Luo Feng can double the entire battle formation's power.

But Yuan, his Primordial Rule Operation Path, can increase the battle formation's strength by threefold or even fourfold. Without Yuan... the Lords simply can't resist, having already fallen into a collapsing state upon first contact.

"Go!" Luo Feng's main battle avatar burned, terrifying power enveloping all companions.

Starlight, Mo Man, Ming Huang, Jin, Nai Gu, Wulan, all six coordinated their strength with Luo Feng.

At this moment——

All the Lords transformed into a blade, with Luo Feng's Bloodshadow Knife as the edge, the blade slicing through the sky, cleaving all hindrances.

"Trying to escape?"

On the Ancestors' side, there was Void Power, Infinite World Power, Space-Time Control, Endless Ice Cold Power, Void Ocean Power, Shadowy Cloud Cover... more than twenty ultimate level powers all excel at obstruction, all binding and hindering Luo Feng and them.

Chapter 484 - 19: External Form

Chapter 484: Chapter 19: External Form

Luo Feng’s Bloodshadow Knife can cut through all matter and energy. At this moment, with the assistance of six Lords, it easily cleaves through various obstructing forces.

The blade light flickered! It completely evaded the Ancestor’s side’s interference.

"Huff."

With the interference greatly reduced, Starlight’s control over space-time substantially increased, causing the blade light to pierce through the time-space instantaneously, making the Ancestor’s side give up on pursuit.

"Can’t catch up." The Ancestor’s side halted.

"That Luo Feng’s knife is very special," said the Ice Mountain Master, "Any force that tries to block it seems to split in two on its own."

"Can’t block it at all," the Wugu Ancestor agreed. "Even if the obstructing force is one or two times stronger, it still can’t stop that blade light."

The Mother of Space-Time said, "Yuan can perfectly integrate different forces, increasing the power of the battle array several times! Luo Feng is individually strong; if he wishes to leave, we can’t stop him at all."

"Luo Feng is very strong," the Initial Ancestor also felt the overwhelming power of that blade.

"Escape or not, it doesn't make much difference." The Infinite Snake Ancestor was in high spirits, his voice resounding around, "The eight Lords are undying and undying; even if occasionally one or two main combat avatars are defeated, they quickly recover! Therefore whether they flee or not is not important! What's important is... Yuan has indeed been heavily damaged!"

The Inference Fire Ancestor agreed, "Yuan has lost its sense of the external world, completely incapable of resistance. That's why Luo Feng and they fled in such a sorry state, not daring to fight anymore."

"Being thoroughly immersed in it seems to have worked well." Mogus chuckled softly.

Every Ancestor present was relieved, yet increasingly wary of Mogus.

Mogus, who mastered the highest level of soul power, managed to severely damage Yuan's mind with six companions aiding him? Then can the other Ancestors withstand such a soul technique?

"If he spends some time, he should be able to recover, right?" The Ice Mountain Master expressed concern, and Sha Zhou also looked at Mogus.

"Hmph."

Mogus confidently said, "I initially thought he could maintain some clarity and exert one or two-tenths of his strength. But the actual effect is better than I anticipated. He completely lost external perception! According to my estimate, even if he regains clarity, he will always be affected."

"Always be affected?" The Ice Mountain Master, Sha Zhou, the Infinite Snake Ancestor each had their thoughts.

"Even if he spends a long time, he can only barely suppress the effect, and it's good if he can exert fifty percent of his strength." Mogus appeared quite confident.

"Will an undying and undying entity also be affected so deeply?" The Wugu Ancestor spoke.

"Undying and undying?"

Mogus scanned the surroundings with his eyes, stating indifferently, "Who determined that you are undying and undying?"

The Ancestors present were slightly taken aback.

Undying and undying?

This is also a commonly accepted standard.

For example, refining and controlling a mysterious land, because the Life Core merges with the Origin of the Mysterious Land, as long as the Mysterious Land is not destroyed, one's self is undying! And throughout history, the Mysterious Land has never been destroyed... So 'controlling the Mysterious Land' is considered undying and undying.

The Life Core can completely merge with the highest level of force and can be condensed and manifested in any avatar of itself spread across countless avatars. This is also considered undying and undying.

Lords who mastered the Primordial Level Dao, as Dao is part of life, Dao is undying, and so is oneself, are also considered undying and undying.

"Undying and undying, it's all what you believe," Mogus sneered, "If one day someone can destroy the Mysterious Land! Then controlling the Mysterious Land wouldn't count as undying and undying. If one day there is a force that can instantly wipe out all the scattered thoughts and avatars of yours in the Endless Primordial Space... the Life Core, no matter how it hides, won't escape."

"Even if it's a Cultivator Lord? If from a soul perspective, we erase their cognition and even create new memories for them. Do you think they can be considered undying and undying?" Mogus laughed heartily.

The surrounding Ancestors remained silent.

"Only me!" Mogus exuded extreme confidence, "Mastering the highest

level of soul power, no one can affect my soul! My power is disseminated among countless life forms below the Ancestors, and even among countless Life Forms in the Source World... No one can erase me!"

"Mogus, don't scare us," the Ice Mountain Master said indifferently, "Even from a remote distance, even if Luo Feng projects a strand of power, he still can't kill a World-level Primordial! So annihilating all the ancestral avatars scattered in the Endless Primordial Space is impossible."

"Destroy the Mysterious Land? It's already challenging to refine the Mysterious Land, let alone destroy it? No one has ever heard of that."

Although these Ancestors collaborated with Mogus, they did not like him internally.

After all...

Besides devouring the souls of countless Source World creatures, Mogus also consumes the souls of countless Innate Primordial Lives. These Ancestors have no choice but to tolerate him.

"Hmph." Mogus let out a cold laugh, not bothering to disguise himself.

Apart from Starlight, none of the other Ancestors could do anything to him. Why should he show any respect? He looked down on these Ancestors, as even the so-called 'undying and undying' had flaws in his eyes.

"Even if Yuan regains clarity, his strength will greatly diminish. The threat of the eight Lords uniting is also greatly reduced." The Infinite Snake Ancestor's voice reverberated, "This battle, we've already won great victory."

"Let's head back first and hold a grand celebratory banquet. After the banquet, everyone can leave." The Infinite Snake Ancestor was in high spirits.

"Everyone, do not leave prematurely to avoid being attacked individually by the eight Lords," the Inference Fire Ancestor also

reminded.

It will take a few days to travel, completely departing the Southern River Territory, and then dispersing will be much safer.

Chapter 485 - 12: Form (2)

Chapter 485: Chapter 12: Form (2)

Now disperse?

The Lords can catch up and defeat them one by one in just moments.

"Let’s go."

"Hahaha..."

The Ancestors chatted happily, in high spirits.

...

"The Cultivator Camp side lost." Some Ancestors who didn’t participate in the battle also watched from afar, like the Giant God Emperor, Primordial Beast Ancestor, Pu Cheng Ancestor, Xiu Saiwei, Demon Ruins, Kafu, Feather Emperor, Hermit, and so on.

"After all, the Ancestors have greater numbers, and countless cooperative methods. Now they use soul techniques against Yuan, and Yuan hasn’t been able to withstand it."

"Mogus, extremely resentful towards the Cultivator Camp, probably prepared this technique for a long time."

All parties watching sighed.

If Yuan cannot recover to the pinnacle, the coordination of the eight Lords would only be sixty or seventy percent of the peak, and the intimidation level would be much lower.

...

Luo Feng and the seven others, carrying Yuan, have fled far away. With Starlight's mastery of time and space, they can ensure the Ancestor side cannot catch up.

"Yuan is completely trapped."

The seven Lords look at Yuan at this moment.

Yuan's expression is calm, as if he were asleep.

"Brother Yuan is completely trapped, entirely disconnected from the outside world," Wulan observes, "We can't help at all."

"Brother Yuan, he can only rely on himself," Starlight says.

Luo Feng watches silently too.

Yuan, always the most trustworthy in the entire camp! Yet now, he's fallen into the trap.

"I believe in Brother Yuan." Jin gazes at the seemingly asleep Yuan, "We are about to lead all Source Worlds. At this time, no one can stop Brother Yuan."

The seven Lords have no choice but to wait patiently.

...

In Yuan's spiritual world.

"I am already a Lord, long standing at the pinnacle of Endless Primordial Space! Why should I constrain myself? One should act freely!"

"These seven Lords, each indebted to me! I am the leader of the Cultivator Camp! As a leader, I should receive the most and the best! I've given too much, it's time for these Lords to pay up!"

"Ice Mountain, time after time deceiving me, I must pay it back! What it owes me, I want tenfold return!"

"Hahaha, why bother with so much, throw everything aside! That's

real freedom and leisure!"

"The Infinite Great Snake Clan, I've endured them for too long, repeatedly devouring and slaughtering... I am undying and immortal, why endure? Sweep through, indulgent slaughter. Just like Starlight and Luo Feng slaughtering those World-level Primordials, make them dare not devour Source Worlds."

"Discard all constraints, with enough ruthlessness and indifference, you have real intimidation power."

Yuan, at this moment, has seven consciousnesses.

Besides his self-consciousness formed over long ages, there are six consciousnesses shaped by the vast Illusory Realm he recently experienced. These six consciousnesses all naturally formed following his true nature.

There are those seeking great leisure!

There are domineering ones!

There are ruthless ones!

There are absolute fairness seekers!

During his cultivation years, due to various external environments repressing his nature, this time, each was guided to form sub-consciousnesses.

Each consciousness emerged naturally from his countless thoughts, being part of himself.

The seven consciousnesses naturally vie for control.

"These aren't my weaknesses." Yuan's main consciousness feels the six consciousnesses, the main consciousness after endless trials across ages remains the strongest and most stable. One alone can suppress six sub-consciousnesses.

But at the same time suppressing them weakens the mind consciousness used for external battle significantly.

"These, all things I have desired."

"My deepest desires, how could they be erased?" Yuan looks at the six sub-consciousnesses, smiling slightly, "Mogus did well, managing to nurture new consciousnesses from my endless thoughts. Because they originated in me, I can’t erase them."

Perceiving these sub-consciousnesses, Yuan knows, no matter how long, he can’t erase them.

Because many of them... he acknowledges.

"The operation of Primordial Rules, Origin as core, can encompass all rules. Be bright, be dark, be benevolent, be greedy, be fierce, be carefree..."

"These are all me."

Yuan decisively acts.

With the strongest main consciousness, he instantly and completely encompasses the six sub-consciousnesses, guiding all with his Mind Consciousness System of ’Primordial Rule Operation Path,’ gradually merging various consciousnesses into one.

Yuan’s consciousness begins to merge, his awareness starts to change.

"Guard the Origin!"

"All else are outer forms!"

In the process of fusion among the main consciousness and the six consciousnesses, they influence each other. The operation of consciousness also resembles Primordial Rule operation, ’Origin’ unchanged, outer forms ever-changing.

...

Luo Feng and the others suddenly feel something, seeing Yuan open his eyes.

"Hm?" Luo Feng and the others are somewhat surprised, they feel the

change in Yuan's eyes.

Yuan in the past, peaceful and reserved, friendly and social.

But now, Yuan's gaze is full of curiosity, like a newborn baby, curiously looking at this world.

"Brother Yuan," Jin speaks, "How are you?"

"Very well."

Yuan grins, the smile somewhat exaggerated, "Unprecedentedly good! I really must thank Mogus, it helped me rediscover myself. This actually is the complete me, hahaha... interesting, interesting, I hadn't realized before, the world is much more fascinating than I knew."

Different eyes see different sceneries.

Yuan now sees more landscapes.

Luo Feng and the seven Lords look at each other, finding Yuan different from how they knew him.

"Brother Yuan, your strength?" Lord Mo Man asks.

"Unaffected." Yuan confidently says, "Not the least affected!"

This was among the main reasons the original main consciousness chose to merge, only merging all sub-consciousnesses will remove interference, only then can strength be entirely manifested.

"These clothes feel uncomfortable too." Yuan finds his robe's color too dull, with a thought, the robe turns colorful, he even throws off his shoes, revealing his toes, toe-pinching comfortably, finally feeling at ease.

The seven Lords all gaze at Yuan.

"Don't be obsessed with outer form." Yuan shakes his head, casually saying, "Let's hurry with the serious business, the Ancestor side hasn't fled far yet, let's hurry and eradicate them."

Flee?

Luo Feng and they are silent, weren't they the Lords fleeing just now?

"Mogus's soul technique is rather impressive." Yuan says, "Earlier Mogus, Silent Extinction Ancestor, Thousand Eyes Ancestor, Star Luo Ancestor, Myriad Touch Dragon Mother, Nightmare Ancestor, Dream Weaver, they joined forces against me. If we fight again, we must first eliminate the threat of this soul technique. Otherwise, the soul technique will target Luo Feng, and target you."

"We indeed need to swiftly deal with this threat." Ming Huang looks at Yuan's bare toes, she can't bear changing like that.

"Let's use our predetermined long-distance lethal strike, first obliterate the relatively fragile 'Nightmare Ancestor,' then Thousand Eyes, Myriad Touch, Star Luo... in sequence, kill one, diminish their combined move's power." Yuan laughs, "Each one dying decreases the threat. The more die, the weaker the threat."

"Yuan, are you alright?" Jin is somewhat worried about his old friend.

Yuan looks at Jin, chuckling: "Never been better!"

"Then let's depart." Starlight says.

Luo Feng suppresses his concern for Yuan, the eight Lords together set off again, pursuing the Ancestor side.

The Ancestor side vigorously traverses through time and space, returning, not dispersing.

"Hm?"

"The eight Lords are coming."

The Ancestor side senses them.

"Yuan's strength has been restored?" Infinite Snake Ancestor, Ice Peak Ancestor they all glance at Mogus.

"Impossible." Mogus shakes his head, "He can't restore."

It’s incredibly confident.

It underestimated the current Yuan, Yuan’s ’Primordial Rule Operation Path’ was adept at many paths, and his Mind Consciousness System was rather strong. ’Lie Yuan Technique’ was casually created by Yuan. Since realizing the Origin System, after true Perfection of ’Primordial Rule Operation Path,’ Yuan’s Mind Consciousness System has grown even stronger.

To another strong figure, various disparate consciousnesses merging would only make a madman uncontrollable. It’s ’self-destructive behavior.’

But Yuan, he stabilized the core of his Mind Consciousness.

Guard the Origin, everything else is outer form.

Chapter 486 - 20: Power of the Abyss of Destruction

Chapter 486: Chapter 20: Power of the Abyss of Destruction

The eight Lords, including Luo Feng, quickly approached the Ancestral faction.

"The distance is sufficient!" Yuan's eyes were blazing, "As planned, execute the 'Curse Killing Array'!"

From a farther distance, and with the Ancestral faction having layered formation defenses, the only technique Luo Feng and his allies could use to disregard all defensive formations was the 'Curse Tribulation Killing Array'. This array could bypass all material and energy obstacles, directly reaching the target location.

The Curse Tribulation Killing Array combines Luo Feng's blade technique 'Life-cutting', Lord Mo Man's main combat avatar burning 'Fluctuation Kill', Golden Lord's 'Tribulation Destruction', and Starlight Lord's 'Space-Time Devouring'. Under Yuan's command, these four Lords' techniques flawlessly coordinated to jointly eliminate the enemy.

Techniques used by Luo Feng, Jin, and Starlight have various limitations! Even though Luo Feng mastered two paths, and wielded the Bloodshadow Knife with the Life-cutting technique, its power remains limited. Only Lord Mo Man, with his unique Primordial Fluctuation Dao, possesses techniques difficult for enemies to resist, often requiring brute force to withstand them. Therefore, he could completely burn his main combat avatar and unleash the deadly

Extinct Life Fluctuation.

Among the four of them, Lord Mo Man contributes fifty percent of the power, Luo Feng contributes thirty percent, Starlight fifteen percent, and Jin accounts for five percent. With Yuan's command, their combined power increased more than threefold.

"Buzz!"

Under Yuan's guidance, once the Curse Killing Array is launched, it operates like the rules of Endless Primordial Space, descending as a calamity.

This technique is imperceptible, difficult to sense.

The eight Lords gazed from afar, anticipating the outcome of this killing formation.

...

The Ancestral faction was on high alert, with layered formation defenses.

When the Curse Killing Array descended, most of the Ancestors were unaware.

"Not good." Less than ten Ancestors, including Mother of Space-Time, Mogus, Silent Extinction Ancestor, and Sha Zhou, sensed something. Though they could sense it, they could only judge whether the invisible crisis targeted them, but couldn't perceive the specific target.

Nightmare Ancestor possessed a colossal eye occupying most of its body, and it was highly skilled in creating illusory realms, its sole expertise.

However, it was not adept at close combat, and its physical body was quite average, hence hiding deep within the layered formations.

"Buzz."

As the calamity descends, it targets Nightmare Ancestor.

This calamity brought various forces from past and future, seemingly erasing it from time. Moreover, it obliterated the vitality in its life core, with terrifying fluctuations erupting within its life core... Multiple forces perfectly coordinated, causing Nightmare Ancestor's gigantic eyeball-form body to tremble, leading to its demise! In its death, the massive eyeball expressed deep regret.

The eight Lords, with their long-range technique 'Curse Tribulation Killing Array' disregarding all defenses, targeted the weakest-bodied among the seven Ancestors skilled in soul techniques—the Nightmare Ancestor—and achieved instant effectiveness.

In fact, out of these seven Ancestors skilled in Soul Path techniques, apart from one of the Nine Emperors, the 'Silent Extinction Ancestor', the other six had weak physical bodies! The undying Mogus with its soul power-composed body is similarly frail.

"Whoosh." At the moment of Nightmare Ancestor's demise, power immediately drew its corpse to another timeline, vanishing into thin air.

"What?"

"Nightmare is dead?"

"How could it die under the protection of the Grand Array?"

The Ancestral faction was filled with anger and shock.

Although the Curse Killing Array executed by the eight Lords was an instantaneous affair, the Ancestors were acutely aware of the 'Nightmare Ancestor's' life cutting off and the process of its body being taken away.

"Techniques that disregard all obstacles generally have weaker power. Among the eight Lords, although Lord Mo Man excels in such techniques, even burning his main combat avatar would only most likely injure an Ancestor. How could it possibly obliterate an Ancestor instantaneously?" Everyone present couldn't believe it.

The Innate Primordial Camp and the Cultivator Camp had battled for a long time, and during past wars, they had become familiar with

Lord Mo Man's various odd techniques, many of which quietly infiltrated, causing injuries to accumulate over time.

Even when Luo Feng broke through, enabling Mo Man to burn the main combat avatar, it shouldn't achieve the extinction of an Ancestor.

This time, it was Luo Feng's 'Life-cutting' blade technique that was strong enough to cooperate with Mo Man. Additionally, Yuan made a breakthrough, the newly mastered Primordial Rule Operation Path... further strengthening the Lords' combined power, thus facilitating the elimination of the Ancestor with a weak physical body.

Yet, this scene was enough to provoke immense anger among numerous Ancestors!

"Close the distance!"

While furious, the Ancestral faction immediately approached the eight Lords, collectively traversing space-time quickly.

Though Curse Tribulation Killing Array is technically a long-range killing technique, faced with 'space-time traversal', in just a breath, both sides were confronting each other. Lord Mo Man, having completely burned his main combat avatar, fully recovered with Luo Feng's assistance.

"Focus on Luo Feng!" Mogus glanced at Yuan, clad in colorful attire displaying large feet, and instantly transmitted his thoughts to five companions without hesitation.

With Nightmare Ancestor gone, their combined power declined.

Yet, with Mogus leading, five other Ancestors assisting, their soul technique power still maintained eighty to ninety percent of its former strength.

"Buzz!"

Like before, soul techniques remained imperceptible and unrecognizable; the moment of attack arrived silently.

Having just lost an Ancestor, the Ancestral faction was seething with fury, aiming to change the situation! Previously targeting Yuan, now they focused on another key figure from the Cultivator faction—'Luo Feng'.

"Can Luo Feng hold on?" Yuan, Starlight, and Mo Man were somewhat anxious. They greatly dreaded those soul techniques, thus using the Curse Killing Array from afar to first eliminate Nightmare Ancestor, trying to weaken the soul technique's power.

"Although Nightmare Ancestor is merely cooperating, Mogus is the core, and this soul technique's power should not be much weaker." Yuan's eyes also showed worry. He had personally experienced that technique and knew its terror.

If he hadn't comprehended the 'Origin System' in the Primordial Rule Operation Path, he wouldn't dare to merge numerous sub-consciousnesses. He estimated he would have to suppress many sub-consciousnesses, and it would be impressive to exert thirty to forty percent of their power.

"Luo Feng is too young, has experienced far less than I." Yuan worriedly looked at Luo Feng.

Suddenly, all seven lords were somewhat astonished.

Because in their moment of concern, the battle array they formed together operated without a hint of impact! Their united strength perfectly matched, resisting the overwhelming attacks from the Ancestor side.

"Luo Feng's strength wasn't weakened at all?" Yuan, Mo Man, and Jin were all extremely amazed.

To be hit by a soul technique and be impacted for some time is considered normal.

No impact at all?

"Why are you all looking at me?" Luo Feng looked at his seven companions.

"Didn’t you feel anything?" Yuan couldn’t help but ask.

"Didn’t feel a thing." Luo Feng shook his head.

The battle array operated perfectly, resisting all incoming powers.

On the other side—

When Mogus and five companions were using the soul technique.

"What is this?" As the caster, Mogus could perceive that its power had touched a kind of power that made it feel uneasy, and momentarily, Mogus seemed to see the Abyss of Destruction!

A part of the power from the Abyss of Destruction was constantly adding to Luo Feng.

As a top-level mysterious land, although Luo Feng had obtained only one-seventh of the power from the Abyss of Destruction, this one part had endless wonders; it transcended the realm of matter and energy and contained part of the Abyss of Destruction’s rules.

Talking about the uniqueness of the power alone, this portion of power from the Abyss of Destruction, from the aspect of ’quality,’ had already reached the theoretical limit of the Endless Primordial Space. All matter, energy, time, causality, souls... nothing could purely surpass it! It represented the ultimate.

Of course, Luo Feng could only borrow a part of it.

The Starlight Lord, observing countless timelines in the future, couldn’t probe into Luo Feng’s future due to interference from the Power of Destruction World.

"Ah!"

The moment the soul technique came into contact with the Power of Destruction World, Mogus momentarily saw the Abyss of Destruction and felt an impact from intense negative emotions such as killing intent, hatred, grievances, fear, etc. Its soul technique was also affected by the Power of Destruction World, with only thirty to forty percent of its power truly impacting Luo Feng.

"He has the protection of the Abyss of Destruction." Mogus immediately understood this point. "Even soul power would encounter obstruction and interference from the Abyss of Destruction's power!"

Previously, it had been very proud, always feeling that soul power, being at the same highest level of power, surpassed other forces.

But this time, in the face of the power from the Abyss of Destruction, soul power was also hindered.

"Indeed, it's the power of the top-tier mysterious land." Luo Feng could feel it, the Power of Destruction World was like his armor. With his spiritual will, even as the soul technique was weakened, he could completely withstand it and didn't fall into it at all.

From start to finish, he was absolutely clear-headed, as if he was just watching an illusory realm.

"Brother Luo Feng is amazing, truly amazing, much stronger than me. Hahaha... let's execute the Curse Tribulation Killing Array again!" Yuan laughed happily.

"Again!" Lord Mo Man excitedly burned his main battle avatar completely once more.

Once again performing the Curse Tribulation Killing Array.

Although Lord Mo Man's complete burning of the main battle avatar slightly weakened the defensive battle array of the lords, even without 'Lord Mo Man,' their battle array maintained ninety percent of its defensive capability! Luo Feng, Yuan, and Starlight were the three main cores of the battle array.

"No!"

Within the Ancestors camp, Thousand Eyes Ancestor was terrified and desperate, and in shock, its life core had already cracked.

Among the seven Ancestors skilled in soul techniques, the physically second most fragile Thousand Eyes Ancestor also failed to withstand the Curse Tribulation Killing Array, dying instantly. At the moment of

death, Thousand Eyes Ancestor’s body also disappeared.

Without a doubt, it was stolen by Starlight.

"It’s over."

"Oh no!"

"About to be defeated."

The Ancestors witnessing this scene all understood this point.

The eight lords united flawlessly, and even though Yuan was briefly affected by the soul technique, he had now recovered! Luo Feng felt absolutely nothing. As for Starlight? It was impossible to lock onto Starlight!

All three targets were unassailable, but two Ancestors specializing in soul techniques were already dead.

This war was already lost, and if they continued to struggle, more and more Ancestors would perish!

Chapter 487 - 12: The Initial Ancestor Is Lightly Injured

Chapter 487: Chapter 12: The Initial Ancestor Is Lightly Injured

"What should we do?"

"Next time, they will probably target us again."

At this moment, the most terrified were the Myriad Touch Dragon Mother, Star Luo Ancestor, and Dream Weaver, who excel at soul techniques!

Mogus is undying and unyielding, and the Silent Extinction Ancestor is also one of the Nine Emperors. However, the physical bodies of Myriad Touch Dragon Mother, Star Luo Ancestor, and Dream Weaver are much weaker, only slightly stronger than the two who have passed away.

"Among the eight Lords, the only ones with weak spiritual will are the Golden Lord and Lord Nai Gu." Mogus, having been defeated twice, was no longer as confident, "This time we deal with the weaker ones."

Previously, we were too overconfident, and because Mogus was very knowledgeable about Yuan, this killing move was meticulously prepared specifically for him. This technique would be relatively less effective against other Lords.

The key elements of the Lords' formation are Yuan and Luo Feng, which is why they've targeted these two consecutively.

Yuan was still hit, losing his ability to resist, although he recovered so quickly, which Mogus found hard to understand. But Luo Feng... was not affected at all, causing Mogus's confidence to plummet.

"Target the Golden Lord."

Mogus and his group of five launched their move.

The soul techniques silently enveloped the Golden Lord.

The eight Lords were resisting the overwhelming attack, waiting for Lord Mo Man to recover before proceeding with the 'Curse Killing Array.'

"Hmm?" Jin's expression suddenly changed, and his eyes glowed red as he fell into a vast illusory realm.

Jin's character is different from Yuan.

Yuan has suppressed his nature for too long, but Jin acts with utter abandon. Furthermore, with Nightmare and Thousand Eyes dead, the power of the soul techniques has diminished again.

"Unexpectedly, some tricky sub-consciousnesses have emerged." Jin, however, managed to stay clear-headed, his glowing red eyes scanning the surroundings, transmitting, "Everyone, I need to concentrate on suppressing some sub-consciousnesses. I can exert about sixty percent of my power."

"The team led by Mogus is indeed the greatest threat." Luo Feng and the others actually understood this, which is why they devised ways to attack and kill.

"Jin, you should rest. The four of us will move." Yuan immediately transmitted.

Mo Man, Luo Feng, Starlight, and Yuan, the four of them coordinated once more to unleash the Curse Killing Array! Without 'Jin,' it seemed the power was not much reduced. But sometimes, to completely annihilate an Ancestor, just lacks that strength.

"Buzz."

The Curse Killing Array landed on the Myriad Touch Dragon Mother protected within multiple formations.

The Myriad Touch Dragon Mother felt its timeline being erased, its life core vitality extinguishing, and its life core fluctuating violently. The numerous tentacles twisted painfully, yet it endured.

Its life force was inherently stronger than that of Nightmare and Thousand Eyes! The power of the Curse Killing Realm Array had weakened again, allowing it to fully withstand this move.

As long as it survived for a moment, the substantial life power from its companions replenished it, allowing it to quickly recover to its pinnacle.

"I survived, I survived." The Myriad Touch Dragon Mother rejoiced.

The Infinite Snake Ancestor, Ice Peak Ancestor, Sha Zhou, and many other Ancestors all felt relieved. If such a physically weak 'Myriad Touch Dragon Mother' couldn't be killed, those Ancestors with more terrifying physical bodies would be under much less pressure.

"A killing move that ignores all obstacles will inevitably have limited power." The Infinite Snake Ancestor transmitted to all sides, "Under the soul techniques, the Lords of the Cultivator side will continue to weaken, and eventually, they won't be able to stop us."

"Target Nai Gu!" Mogus's confidence increased a bit as the group of five's soul techniques enveloped once again.

In previous years, facing mind techniques, both Nai Gu and Jin had suffered! Their spiritual will was already considered very strong, but among the eight Lords, they were relatively weaker.

This time they were targeted again!

"Gurgle gurgle."

Lord Nai Gu's gaze turned colder, and he slightly twisted his neck, where one head after another began to grow, adding nine new heads.

"Nai Gu, how are you?" Wulan asked worriedly, while the other Lords

also looked at Nai Gu.

"My power isn't affected." Lord Nai Gu said calmly, "Fortunately, with the two Ancestors dead, this move is weaker, and the awakened alien bloodline will isn't too strong. With the Heart Cutting Technique, I can cut them off."

"Heart Cutting Technique?" Yuan was wide-eyed.

Luo Feng also frowned.

They had all read Lord Nai Gu's heritage tomes and knew that the 'Heart Cutting Technique' involved actively severing sub-consciousnesses yet still perfectly controlling these sub-consciousnesses.

This is somewhat similar to 'cluster consciousness,' where cluster consciousness has one main consciousness, and the rest are sub-consciousnesses.

But this path is ultimately not as pure as a singular 'main consciousness.' Lord Nai Gu's path is the 'Primordial Bloodline Dao,' but one of the challenges of mastering an Ancestor Bloodline is the residual bloodline will. Nai Gu had long since developed the Heart Cutting Technique, though he never used it before.

This time, the numerous Ancestor bloodlines within him were greatly strengthened in terms of residual bloodline will, which Nai Gu could no longer suppress, forcing him to use the Heart Cutting Technique, allowing the sub-consciousnesses to become independent.

Nai Gu may seem unaffected in strength, but his cultivation path has shifted from a singular main consciousness to the path of the 'Heart Cutting Technique.' The more sub-consciousnesses there are, the greater the influence on the 'main consciousness.'"

The other seven Lords were all quite helpless.

Jin's situation was much better than Nai Gu's. Having just been hit and able to maintain sixty percent of his strength, with time, he might recover to eighty or ninety percent! Even this training might make his spiritual will stronger.

Nai Gu, however, was experiencing a change in his cultivation foundation! Currently, his strength is unaffected, but what about the future?

"This is the cost of war," Starlight transmitted, "Find a way to continue to kill Myriad Touch, Star Luo, and Dream Weaver."

"Into the formation," Yuan also transmitted.

The Curse Killing Array couldn't even kill the Myriad Touch Dragon Mother, so naturally, it was not guaranteed to deal with other Ancestors.

The eight Lords didn't waste time, immediately joining forces to unleash another killing move, the 'Heaven-Slaying Saber Formation.'

The Heaven-Slaying Saber Formation uses the Bloodshadow Knife's ability to cut through all matter and energy; the eight Lords jointly maneuvered it, with Luo Feng even burning his main battle avatar, consuming thirty percent of his energy reserve into this move.

His thirty percent energy reserve was even more than Mo Man, Jin, and Ming Huang burning their main battle avatar energies.

"Boom——"

The eight of them, along with the Bloodshadow Knife, seemed like one entity, transforming into an extraordinarily dazzling blade light. The blade light was so brilliantly spectacular that even the Ancestors found it somewhat 'blinding'.

The moment the blade light appeared, a deep fear arose in the hearts of all the Ancestors.

"Can't stop it."

"No way to block it!"

All Ancestors had this realization deep within.

The blade light shone with extreme brilliance, as if patrolling the endless spacetime. Wherever it passed, it silently and seamlessly cut

through layers of the highest level of power barriers and sliced into the intricate formations of the Ancestors! These formation defenses were originally very strong, comprising a combination of various highest level defensive powers.

Yet, under this blade light, they were still cleaved apart.

"Deal with Nightmare." Mogus, Silent Extinction Ancestor, Myriad Touch Dragon Mother, Star Luo, and Dream Weaver quickly unleashed another soul technique.

The two with weaker spiritual will, 'Nai Gu, Jin', were dealt with, while other lords possessed very strong spiritual will.

"I'm fine."

Nightmare took this blow without a change in expression, and the slight sub-consciousness born in her mind was completely destroyed and obliterated under the terrifying spiritual will of her 'golden thunder' form!

"It's completely useless!" Myriad Touch Dragon Mother, Star Luo Ancestor, and Dream Weaver were anxious and communicated, "The eight lords are coming for us, we need to hide immediately."

"Don't panic, they need to break through many formations. The Initial Ancestor is right nearby and can take you in immediately." Silent Extinction Ancestor transmitted, "Let's first deal with Mo Man."

According to historical experience.

Wulan is the strongest in defense, with even his spiritual will like pure matter, unaffected by anything.

Starlight couldn't lock on, Yuan and Luo Feng both tried. The relatively weaker Jin and Nai Gu also tried.

It's worth trying once more on 'Nightmare, Mo Man'.

"Buzz."

If it were a soul technique at its peak power, it might pose a threat to

Nightmare or Mo Man. But at this moment, the soul technique's power was only sixty to seventy percent, and Lord Mo Man also withstood it, existing purely as 'Primordial Fluctuation Path', his main consciousness fluctuated like waves and easily crushed all derivative sub-consciousness.

"Kill!" The eight lords broke through layer upon layer of obstructions, having reached the core, directly pressing in on Myriad Touch Dragon Mother, Star Luo, and Dream Weaver.

"They're coming." Myriad Touch Dragon Mother, Star Luo, and Dream Weaver no longer wanted to engage, each actively charging towards the Initial Ancestor, who was right in front, silently encompassing them.

The three of them hid within the Initial Ancestor's body.

Inside the absolute sphere.

Myriad Touch Dragon Mother, Star Luo Ancestor, and Dream Weaver finally felt at ease.

"We're physically weak and shouldn't have joined the battle." Dream Weaver regretted somewhat. Under the coercion and enticement of resources from the Innate Primordial Camp and Ice Peak Camp earlier, they joined the battle.

But who would have thought the formations formed by the Ancestors couldn't withstand the eight lords.

"Shhh—"

Suddenly, a terrifying blade light forcibly cleaved into the internal space of this absolute sphere.

The three Ancestors looked in horror at the appearance of this blade light, as the moment it appeared, it swept past them, and their bodies were carried away by the blade light.

...

"What?"

The Ancestors were shocked and angered at this scene before them.

The terrifying blade light fully controlled by the eight lords forcibly sliced into the Initial Ancestor's body! The slash was incredibly thin but still managed to penetrate halfway.

"Our combined efforts couldn't even cut it in half?" Luo Feng and the eight lords were also surprised.

The body of the Ancestor, even if cut in two, generally would not be considered severely injured, with minimal energy consumption. Only when completely obliterated, even the Life Core destroyed, would it count as a kill.

Merely creating a fissure? The fissure couldn't even penetrate to half its depth? Barely considered a minor wound, the Initial Ancestor instantly fully recovered.

"All eight lords combined only managed to cut this deep. If I acted alone, it would just scrape the surface." Luo Feng realized this.

But this scene in front of them shattered the Ancestors' morale completely.

The slight injury to the Initial Ancestor was just a minor wound.

Yet it meant those hiding within the 'Initial Ancestor' could still be killed.

"Can't win at all."

"There's no way to fight."

"Retreat, retreat."

Many Ancestors were in panic, with more than half actively communicating the need to retreat.

Infinite Snake Ancestor, Ice Peak Ancestor, and other fourteen Undying and Undying beings, upon seeing the Initial Ancestor cut to half its depth, knew that blow, who among the non-Undying ones, could claim to withstand?

At this moment, there was no more fighting spirit.

At this moment, they all understood, this battle was utterly lost! They could no longer gather so many Ancestors to fight desperately again.

"Retreat." Infinite Ancestor was very unwilling but could only transmit.

"Retreat." Ice Peak Ancestor also ordered.

In fact, this battle, with their greatest hope pinned on the 'Mogus Team's' killer move, even Yuan's recovery meant the battle was tilting towards the cultivators.

Chapter 488 - 12: Curtain Falls

Chapter 488: Chapter 12: Curtain Falls

The Infinite Ancestor suddenly erupted with dazzling light, enveloping each Ancestor, and immediately these Ancestors vanished into thin air, all hiding within the 'Initial Ancestor'.

Only fourteen undying and undestroyable beings remained outside.

"Withdraw."

Mother of Space-Time, along with her companions, quickly delved into time and space to escape.

While fleeing, the Ice Peak Ancestor, Infinite Snake Ancestor, and Wugu Ancestor looked back at the eight lords.

"Don't pursue them," said Starlight.

This time, the participating Ancestors mostly had strong survival abilities. Previously, with layers of formations protecting them, it was very difficult to kill them! Now that they have hidden inside the Initial Ancestor, even if Luo Feng and the others could strike a blade into the Initial Ancestor, the residual power of the blade light would not threaten the more than sixty Ancestors inside.

If the Ancestors truly decided to flee, the eight lords indeed couldn't stop them.

Swoosh!

Mother of Space-Time, carrying her companions, moved silently forward, while the fourteen undying and undestroyable beings

remained silent.

They were forced to flee!

This result had already shown itself!

"Although unwilling to admit it, the result is right in front of us, we lost," the voice of the Infinite Ancestor rang out, "Even though we set up multiple layers of formations, the blade light formed by the eight lords could still penetrate the formations and threaten the safety of the Ancestors. The Ancestors are unwilling to continue fighting, and we can't force them."

The Inference Fire Ancestor added, "Those who reach the undying and undestroyable state are ultimately very few."

"I could have threatened the lords somewhat, yet you all had no other ways?" Mogus said, rather annoyed.

"They, the eight lords, are flawless in substance, energy, fluctuations, life... Moreover, with Yuan's perfectly coordinated formation forming the battle array, no matter what techniques we use, we can't break it," the Ice Peak Ancestor said helplessly.

Each lord had mastered their own path perfectly, and the eight of them working together could restrict all methods.

"Only in the soul direction are they not proficient," the Ice Peak Ancestor said.

"They are all Creatures of the Source World, cultivated from the very bottom, none of them have weak spiritual will," Mogus said coldly, "Even the relatively weaker 'Jin and Nai Gu' are of top-notch level among the Ancestors."

It was only after clashing with the lords that the fearsome nature of these lords was understood!

"I can confirm that under my soul techniques, Yuan, Jin, and Nai Gu have definitely been injured," Mogus said.

"Couldn't see their injuries just now in the fight," Infinite Snake

Ancestor and Ice Peak Ancestor both looked at Mogus.

Earlier, the one blade from the eight lords combined indeed had terrifying power.

Mogus remained silent.

It was indeed impossible to see any injuries on the eight lords in the recent fight. In truth, Yuan and Nai Gu were at peak strength, while only Jin's strength was compromised. Yet with the eight united, the impact of Jin's injury was quite minimal.

"I have done everything I could, and with six helpers, this is the extent of my capability," Mogus swept his gaze over the thirteen, "Unless you find a more formidable soul specialist, I won't engage in battles with the lords again."

Upon finishing, Mogus disappeared without a sound.

Being entirely composed of soul power, apart from Starlight, no one could trace its whereabouts.

"Mogus is gone."

The Infinite Snake Ancestor said, "In the future, it might not have the courage to directly fight the cultivator side; at most, it will covertly devour the souls of the Creatures of the Source World."

"What should we do next?" Ice Peak Ancestor looked at it.

"There's nothing we can do."

The Infinite Snake Ancestor said, "The Ancestors also fear death. Without enough security assurance, they cannot participate in large-scale wars! Only we, the undying and undestroyable, have no fear of them."

"But even if we join forces, we would be blasted apart head-on by them! We need to accumulate power." The Infinite Snake Ancestor said, "This time it was because of Luo Feng's rise that the cultivator camp underwent a transformation. Perhaps in the future, one of our Ancestors can emerge comparable to Luo Feng, able to cause our

power to transform. Or maybe a being similar to 'Yuan' can appear, allowing our formation cooperation to transform."

In terms of formations, the Ancestors fell far short compared to Yuan.

"Unfortunately, Pu Cheng, Xiu Saiwei, Giant God Emperor, Kafu, Feather Emperor, Hermit—all of them refuse to fight," Ice Peak Ancestor shook its head, "The power we two deploy barely amounts to half of the Ancestors' strength."

The cultivator camp, on one side befriend Kafu, Demon Ruins, Feather Emperor, Giant God Emperor, Pu Cheng, Xiu Saiwei, and other friends. On the other side, they only seek the Source World, no longer expanding the territory. Thus, greatly reducing the number of enemies.

...

In the Endless Primordial Space, the Ancestors who did not participate in the war were all remotely observing this battle.

"Even when the big snake and the Ice Peak joined forces, they couldn't suppress Luo Feng and the others," Kafu grinned, "The eight lords have openly promised not to expand, yet the big snake wants to press down on them? Isn't that just asking for humiliation?"

"Although they lost, the cultivator side will substantially lead; however, the big snakes will never acknowledge the rule of the cultivator side," said Feather Emperor.

"The big snake's temperament is such that it will never recognize it," Demon Ruins agreed, "Whenever the chance arises, it will definitely counterattack."

These are ancient beings who have lived for endless ages with enough patience.

The failure of this era does not mean permanent failure.

Who knows, a powerful ancestor might emerge? Perhaps the Infinite Snake Ancestor, Ice Peak Ancestor, or Sha Zhou's strength will make a breakthrough?

"There will be rarely any battles of this scale in the long years to come," the Hermit said.

"Yes, the ordinary Ancestors will not easily join the battle anymore," the Feather Emperor concurred. "The order of the Endless Primordial Space has changed starting today!"

******

Southern River Territory.

Luo Feng and the other seven were quite elated.

"In this great war, we paid some price," the Starlight Lord smiled and said, "but we have thoroughly shattered the Ancestors' morale, leading all Source Worlds without obstruction!"

"We've finally waited for this day," Wulan was quite excited.

"To lead all Source Worlds." Luo Feng, Yuan, Mo Man, and each Lord felt exhilarated.

Finally achieving this goal!

The creatures of the Source Worlds are no longer just food!

"Next, we eight Lords will have to work hard," the Starlight Lord said. "We need to divide our thoughts, descending a wisp of thought into each Source World. We need to guide the development and evolution of one Source World after another, completely annihilating the residual power of the Innate Primordial Life, while leaving some legacies to guide these Source World creatures in their cultivation."

Luo Feng and the others nodded.

The Source Worlds in those territories are indeed quite miserable.

"To divide countless thoughts, each thought needs to do many things in a Source World, indeed very arduous," Starlight looked at Yuan, "Brother Yuan, we need a simple division of territory, you preside over it."

"Hahaha..."

Yuan laughed heartily, "I've worked hard for endless eras, now I finally lead all Source Worlds. I think I can rest a little. This newly conquered territory I'll divide into ten portions, I'll take one portion and call it a day."

Everyone present was surprised.

In nurturing the next generation, Yuan was the most dedicated and proactive, yet now he only wants one portion of the territory?

"I don't want any territory in the newly occupied area," Nai Gu spoke deeply, "in the coming years, I need to fully focus on the 'Primordial Bloodline Path.'"

This time affected by the Soul Technique, starting early on the 'Heart Cutting Technique' path, Nai Gu knew it was necessary to concentrate all energy on cultivation. Once a problem arose, it would be a huge trouble.

"Nai Gu should indeed focus more on cultivation!" Starlight nodded.

"I'll take one portion," Ming Huang spoke.

"I also want one portion of territory," the wounded Jin didn't care about the injury, still wanted one portion of territory.

Wulan and Mo Man also only wanted one portion of territory each.

The accumulated territories in the Cultivator Territory and Southern River Territory were already enormous. The even more vast newly conquered territories? The Lords also felt pressured.

"Ten new territories, Nai Gu doesn't want any, we five will each take one portion. That leaves Luo Feng and Starlight," Yuan looked at the remaining two.

"The territory is too vast, traveling is difficult enough, I'll take two portions of territory," Luo Feng said.

Starlight, traveling through time and space, surpassed any existence

in terms of speed, fit to manage a larger territory.

"Three portions for you," Starlight said with a frown. "In the coming years, I need to set up the complete Space-Time Net in the 'Southern River Territory,' and for all newly conquered Source Worlds... more desolate and remote, although not requiring a complete Space-Time Net, a simple space-time transmission channel still needs to be set up. I also need to create a large number of worlds as space-time anchors! I really can't manage more, barely able to manage two more portions."

"Wherever you need worlds created, we will help you," Lord Mo Man said.

"Of course I need your help! Otherwise, the new territory scattered across the Endless Primordial Space, how could I manage it all alone," Starlight said. "In each of your territories, all worlds needed for space-time anchors, must be built by you yourselves."

Luo Feng listened.

"We need to build in our new territories?" Wulan, Jin, and the others all felt the pressure.

"You already have it easy; I need to construct the Space-Time Net, set up space-time anchors in the worlds you create, and in my territory, I also need to create worlds myself. Even in the Cultivator Territory and Southern River Territory, where the Space-Time Net is widespread, I must also garrison," Starlight looked at the seven, "even so, I still manage two territories. You guys must be understanding!"

The Lords remained silent.

Starlight was indeed too busy.

"Alright, I'll take three portions," Luo Feng immediately agreed.

"Luo Feng, your power makes some Ancestors fearful. You should take on more responsibility," Starlight said.

"Hahaha, now that it's settled, let everyone get busy," Yuan said with a smile.

Rustle, rustle, rustle!

The eight Lords each took action.

Luo Feng also instantly divided many thoughts, remotely descending into the Source Worlds within his new territories, manifesting in units of ’hundreds of millions’ of Source Worlds.

"In the Southern River Territory, my territory contains more than three hundred million Source Worlds."

"The newly conquered broader territory contains 2.7 billion Source Worlds."

Counting his territory within the original Cultivator Territory, the total number of Source Worlds he led was over three billion.

"Let’s work hard to develop them well first."

Luo Feng also began the arduous task of managing the Source Worlds.

Chapter 489 - 23: The Long Years

Chapter 489: Chapter 23: The Long Years

Luo Feng crossed the distant space-time and arrived at a desolate void.

"Based on the space-time position set by Starlight, a space-time anchor is needed here." Luo Feng stood there, with a thought, he began to use the 'Primordial Life and Death Dao' as the origin to create a Holy Realm.

Creating a Holy Realm is similar to creating a lord's physical body, but with less difficulty. Because there's no need to consider abilities like movement, combat, etc., it's only necessary to pursue the efficiency of 'absorbing primordial force' and the stability of the world.

Therefore, every Holy Realm can reach the average level of energy absorption efficiency of the true bodies of ancestors and lords.

"I am skilled in the Primordial Life and Death Dao and the Primordial Blade Path, but when it comes to creating a Holy Realm... the life route is more effective." Recently, Luo Feng has created one Holy Realm after another, becoming more adept through practice.

Using the Primordial Blade Path as the origin, the Holy Realm formed is smaller in scale! The energy absorption efficiency is also lower, and the living environment within the Holy Realm is harsher.

In contrast, using the Primordial Life and Death Dao as the origin, the Holy Realm formed, which Luo Feng calls the 'Life Sacred Realm', is

much larger in scale! The energy absorption efficiency is about three hundred times faster, the living environment is also better, and more friendly to weaker life forms.

Considering that the Holy Realms he constructs will migrate a large amount of life in the future, allowing cultivators to thrive here, Luo Feng naturally focuses on creating 'Life Sacred Realms'.

"Rumble~~~"

After spending twelve days, a complete Life Sacred Realm was formed.

"Hmm." Luo Feng looked at the Holy Realm in front of him with satisfaction, "It is not easy to nurture a source world within the endless primordial space. However, for us lords to create this slightly weaker Holy Realm is very easy."

In the Divine Emperor stage of cultivation, more than ninety-nine percent are born from billions of worlds.

It's precisely because creating a Holy Realm is too easy; Luo Feng can create a Holy Realm in just twelve days, and in the long ages to come, the number of 'Holy Realms' he creates can far exceed the number of source worlds under his command.

"The largest life form that can be born within a Holy Realm can only cultivate to the world-level primordial. So far, there hasn't been a single lord." Luo Feng also looks forward to the day when a lord emerges from the cultivators of billions of worlds, "Let's head to the next place."

Suddenly—

"Luo Feng, come to the council hall at once!" Starlight transmitted his voice.

"Okay."

Luo Feng's main combat avatar continued to go and create one Life Sacred Realm after another, serving as space-time anchor points. Meanwhile, his avatar also arrived at the council hall of the Land of

Origin.

...

Land of Origin, council hall.

The avatars of eight lords gathered together.

"Why summon us suddenly?" Lord Nai Gu asked, as he was previously in seclusion for cultivation.

"Our original plan was to wait until the new territory construction was finished and everyone was free to talk about the distribution of the spoils of war." Starlight sat there and said, "But when I was exchanging resources for the construction of the camp's space-time net, I found that Brother Yuan secretly transferred a considerable amount of resources."

"Transferred resources?" Luo Feng and the others were somewhat surprised.

All eight lords have always been very disciplined in their actions.

The spoils of war are divided into ten parts, with each getting a share, and the rest belonging to the camp collectively! If a lord needs to use them, they have to go through an exchange.

"I attempted to create a source world," Yuan laughed, "Creating a source world is exceedingly difficult and also requires the body of an ancestor as a resource. So I privately transferred the corpses of two ancestors and some minor resources."

"Two ancestor corpses?" Ming Huang frowned.

"Brother Yuan, in this recent war, we obtained a total of eight ancestor corpses successively, and some of the corpses are not complete." Jin looked at Yuan.

Ancestors like the Dark Roc Ancestor, and the Wind Devouring Ancestor only had remnants left.

"I took the corpses of Nightmare and Thousand Eyes," Yuan said,

"Their corpses are the most complete, and are more suitable for creating a 'source world', although even their corpses may not guarantee success, I might still need more ancestor corpses."

The seven lords were speechless.

"My contributions should be enough, just deduct them," Yuan said.

"Brother Yuan, your contributions are indeed immense. For countless ages, you have paid out of your own pocket for the group many times." Starlight said, "Even if you took all the ancestor corpses, it's just a minor issue."

Luo Feng and the others all recognized Yuan's contributions.

For example, in the recent war, during the negotiations with the Ice Peak Camp, Yuan paid a considerable amount of resources out of his own pocket and used his connections to draw in Xiu Saiwei and the others.

In terms of contributions, Yuan has given a lot! Much more than these few ancestor corpses.

"Brother Yuan, during the distribution of the spoils, you could have requested the corpses, and we could have let you have them." Starlight said, "But even before the distribution, you've directly transferred them... I feel that you're no longer suitable to keep the spoils of war, nor should the entire resources of the cultivator camp be stored in the 'Land of Origin' anymore."

The Land of Origin is a mysterious place under Yuan's control.

In the past, everyone trusted Yuan greatly.

The distribution of the spoils of war was hosted by Yuan. Before the distribution, it was also Yuan who was responsible for safekeeping them.

Throughout the long ages, there were never any issues.

"Brother Yuan, there's nothing wrong with this transfer; Starlight is right. In the future, you are no longer suitable to keep the camp's

resources," Ming Huang also said.

To manage camp resources, one must follow the rules.

"I know, I know." Yuan sighed helplessly, "Starlight is right. In the future, I will not keep the camp resources and spoils. If they are with me, I can't control myself."

Luo Feng, Starlight, Wulan, Ming Huang and others glanced at each other, all feeling uneasy.

A lord who can't control himself?

"Yuan, are you okay?" Wulan asked worriedly.

Everyone was looking at Yuan, who was dressed in colorful clothing.

"I feel quite good," Yuan said, looking at his companions.

Luo Feng had a headache.

The situation wasn't good.

"Luo Feng, should the camp resources be kept with you or at my Time Star?" Starlight looked at Luo Feng; apart from Yuan, only the two of them possessed a Mysterious Land.

"Keep it with you; it's convenient to access," Luo Feng said.

"Alright." The other lords agreed, as Starlight had been handling matters for countless ages, earning everyone's trust.

"Brother Yuan, please leave some of the flesh from the two corpses you took for me," Nai Gu said, intending to collect the flesh from the Ancestors' corpses, whether refined or not, as long as it was enough to refine the bloodline.

"That's no problem," Yuan agreed readily, "I'll take some leftover materials from the two corpses and keep them within the camp resources for everyone to exchange."

Taking advantage of the opportunity, everyone distributed the spoils

of war.

However, aside from Yuan, the seven lords weren't feeling great.

"Brother Yuan, something's not right." They were all worried about this older brother, who had dedicated endless years to successfully command all Source Worlds; was something wrong with Brother Yuan?

...

The vast river of time flowed on, and the seven lords gradually became more aware of Yuan's situation.

Yuan, at least, was awake and remained devoted to the entire cultivator camp. As for other aspects? He became somewhat 'without any taboos,' something 'unconventional.' This allowed the seven lords to breathe a sigh of relief; it was much better than they had imagined.

In the blink of an eye, three thousand million eras had passed since the battle.

During this lengthy period, despite a few daring world-level primordial lives attempting to devour the Source World Origin, they were all met with thunderous strikes from the eight lords!

Those who dared to devour the Source World, no matter where they hid, were doomed!

As for the Ancestors? The Ancestors were very patient; several tens of thousands of eras were very brief for them. None of the Ancestors, who weren't Undying and Undying, dared to devour the Source World.

Instead, the Three Emperors of Wind and Thunder Sea deliberately provoked, devouring some Source Worlds, only to be severely punished by the eight lords, destroying half of their territory and taking half of their kin as servants! The Three Emperors of Wind and Thunder Sea were driven mad with anger, but seeing their remaining kin, they refrained from further provocation.

"The cultivator camp's governance over all Source Worlds can be considered stable now."

Luo Feng, alone, sat cross-legged in his mysterious land, the 'Galaxy Territory,' his gaze sweeping across the endless vastness of space and over countless Source Worlds.

After long years of development, over three billion Source Worlds in his territory had entered a normal trajectory. As agreed by the lords, after annihilating the residual power of innate primordial life and leaving some basic heritage, the lifeforms of these Source Worlds would evolve naturally! They wouldn't interfere.

"Three thousand million eras, and my third Dao, the 'Path of Matter,' has just reached the Ultimate Realm of God King," Luo Feng chuckled self-deprecatingly.

Yet to start the Divine Emperor Stage of cultivation, let alone the billionfold difficulty of transitioning from 'Half Primordial to Primordial.'

"At this rate, I might forever be stuck at the 'Half Primordial Material Path,'" Luo Feng speculated gloomily.

"I'll focus on cultivating blade techniques instead!"

Due to the painfully slow progress of the Path of Matter, Luo Feng gradually shifted most of his effort to blade techniques. At least on this path, his power could see a 'very slow' improvement.

Throughout the three thousand million eras, besides refining his original combat techniques, Luo Feng primarily created two blade techniques.

"My current two strongest blade techniques."

"The first blade technique, conceived by understanding the power of the Abyss of Destruction, is 'As Deep as the Abyss Blade Technique.'" With a thought, Luo Feng could manifest the share of power from the Abyss of Destruction before him.

Though Luo Feng mastered the 'Primordial Blade Path' focused on

destruction, he could explore the mysteries of the Abyss of Destruction power.

The more he studied it, the more incredible Luo Feng found it!

This power encompassed 34 kinds of destructive force, perfectly integrated into one.

In this power, Luo Feng discovered ways to combine different forces. Using the Primordial Blade Path, the Primordial Life and Death Dao, and borrowed powers such as the Undying Power, Shadow Power, and Abyss of Destruction from the Mysterious Land, he experimented with coordination.

Thus, 'As Deep as the Abyss Blade Technique' was born!

With deep research, the coordination of the five forces became more refined, and the blade technique's power would slowly increase.

"The second blade technique, utilizing the Bloodshadow Knife's characteristic of slicing through all matter and energy, gave rise to the most compatible blade technique, 'Blood Shadow Blade Technique.'

Luo Feng continued to quiet his mind.

Compared to the Path of Matter, he preferred to dedicate his efforts to these two blade techniques.

"Luo Feng." A voice sounded.

Luo Feng turned to look, and a figure came across space-time, it was Starlight.

"The basic construction of all the space-time transmission channels is complete." Starlight smiled, "I also plan to take a break for a while. As mentioned earlier, I ask you to join me in visiting a Mysterious Land. Do you have time now?"

Starlight had spoken about this matter long ago.

"I have plenty of spare time," Luo Feng laughed; his blade technique

cultivation required a long span to accumulate, and there was no rush.

"Let’s go." Starlight nodded and immediately led Luo Feng away together.

Chapter 490 - 24: Recording Corridor

Chapter 490: Chapter 24: Recording Corridor

Starlight led Luo Feng, as if walking on a map, crossing over one domain after another.

"Hmm?"

Luo Feng discovered an independent space-time appearing, enveloping himself and Starlight. This independent space-time carried the two Lords, rapidly falling towards the depths of space-time. The continuous descent caused continuous distortion of space-time.

"Where is this going?" Luo Feng curiously watched the scene before him.

"You'll find out in a moment," Starlight chuckled.

The surrounding space-time distortion increased, far beyond the scope that normal Lords and Ancestors could fathom. In the end, Luo Feng and the others suddenly entered a hidden location.

"Hmm?"

Luo Feng looked surprised at what was ahead.

In front was a time corridor, at the end of which stood a towering altar.

"This is the Mysterious Land known as the 'Recording Corridor'," Starlight stood on the corridor, gazing at the outside world.

Luo Feng also looked at the outside world.

The Endless Primordial Space had become a 'giant sphere' reduced by countless times, with the Recording Corridor being the 'sphere's center'; standing on the corridor, one could see all areas of the Endless Primordial Space.

"Standing on the Recording Corridor, the Endless Primordial Space is all beneath one's gaze," Starlight said with a smile, "The Endless Primordial Space is very magical. From different angles, it shows different forms."

Luo Feng nodded, having observed it from the 'Fluctuation Land' angle and from the Abyss of Destruction angle, now observing it from the Recording Corridor angle.

"Follow me," Starlight walked forward along the corridor.

Luo Feng also looked along the corridor's sides.

The corridor's walls were engraved with numerous scenes from the history of the Endless Primordial Space.

There were scenes of the birth of the Demon Ruins, the Initial, the roaring Giant God Emperor, the Infinite Great Serpent winding and covering a World Group, and Yuan stepping out from the Source World alone...

"This is the past of the Endless Primordial Space," Starlight said, "On this corridor, moments significant to the entire Endless Primordial Space are recorded."

Luo Feng nodded as he walked and observed; all the eight Lords had moments recorded in the corridor.

Nearing the corridor's end, Luo Feng saw his own engraving...holding the Bloodshadow Knife, standing on the 34th layer of the Abyss of Destruction, with the World Envoy of the 34th layer expressing submission to him with respect.

The last scene at the corridor's end showed the eight Lords storming into the Ancestor side's formation core, with Blade Light cleaving half of the Initial Ancestor's 'absolute sphere' body, leaving the other Ancestors terrified.

At the end of the corridor was a towering altar.

The altar was shrouded by layers of phantom images, making it difficult to peek inside; occasionally, images would flash on these phantom images.

"These phantom images?" Luo Feng's face changed slightly.

Though they flashed briefly, he had already memorized them—a gray-robed woman, Sha Zhou, was in the Mysterious Land 'Tong Valley', where the endless terrifying power gathered on her left and right, completely under her control.

"Sha Zhou can refine and control 'Tong Valley'?" Luo Feng realized the significance of this scene.

"Luo Feng, don't worry too much about these,"

Starlight, however, appeared unconcerned, saying with a smile, "The more you understand about the future, the more you realize these scenes don't have much significance."

Luo Feng listened.

"What's fixed for now, as for the future?" Starlight smiled, "Let me give you an example, if a million epochs later, there are a hundred million possibilities for the future. Then, after ten million epochs? On the basis of these 100 million possibilities, each possibility can evolve into an average of a hundred million possibilities. The total accumulates into a 'hundred trillion possibilities'. The further from now... the possibilities of the future will exponentially soar."

"This is a simple example, while the actual evolution of the future is far more complex, even I can't probe very far into the distant future."

Starlight said, "What you saw just now of Sha Zhou controlling Tong Valley is probably just one of the innumerable future possibilities

billions of epochs later."

Luo Feng understood.

"For the future, we must look at probability," Starlight said, "If you repeatedly see the same future, then you need to be cautious."

Luo Feng saw another image on the altar's phantom.

It was the 'Infinite Snake Ancestor' forming a truly colossal figure, larger than any life in the current era.

"Infinite Snake Ancestor?" Luo Feng looked sternly.

"An undying and undying existence, the longer it persists, the more likely some 'powerful future' will appear," Starlight laughed, "Though if it only appears occasionally, it holds little significance."

"Starlight, have you seen any important future recurring multiple times?" Luo Feng asked.

Starlight paused, slightly nodded, "I've seen a future that appeared multiple times; it is a crisis for our Cultivator Camp, as well as a crisis for the Innate Primordial Camp and the Ice Peak Camp."

Luo Feng's face slightly changed.

"Nai Gu." Starlight said, "The source of this crisis is Nai Gu."

"Impossible," Luo Feng frowned, "Nai Gu is wholeheartedly for the Cultivator Camp."

"Nai Gu is destined to walk the 'Heart Cutting Technique' path. Even without the threat of Mogus's soul technique, after prolonged cultivation over years, he will still choose the Heart Cutting Technique path," Starlight looked at Luo Feng, "He will refine and control more and more Ancestor Bloodlines, twenty kinds, thirty kinds... Multiple Ancestor Bloodline wills will become 'sub-wills' within him. Do you think that when tens of kinds of Ancestor Bloodline wills simultaneously influence him, under this group consciousness, does he count as a Lord or an Ancestor?"

Luo Feng was slightly stunned.

He remembered that Nai Gu and Jin were both Tribulation Cultivators. These types of cultivators massacre billions for their own sake.

The importance they place on camps is probably not as much as me, Brother Yuan, or Ming Huang.

"At that time, he didn't care about the Cultivator Camp or the Ancestor Camp, only for himself," Starlight said.

"Of course, that's just a possible future," Starlight said, "because it's so distant. Even though I walk across countless timelines of the future, I can't observe it. I've only seen it many times in the altar's phantom."

"Is there a way to influence the future?" Luo Feng asked.

"By watching the scenes shown by the altar's phantom, I can deduce a lot of information," Starlight smiled, "Our Endless Primordial Space is very young and can still accommodate many Ancestors and Lords! There are still many variables."

"Now it seems that 'Tong Valley' is difficult to refine, but in the future... Sha Zhou might be able to take control of it."

"Like one of the three Mysterious Lands, the 'Fire Prison Wall', we haven't found its Origin yet. But I saw in the altar's phantom that the 'Infinite Ancestor' could utilize part of the Fire Prison Wall's power in the future."

"And some of our Lords, the Lords will become even more powerful."

Starlight looked at Luo Feng, "Even if Nai Gu truly becomes a threat, I believe there will still be a force to suppress him! For instance, you Luo Feng, can suppress him!"

Luo Feng looked at the layers of phantoms of the altar.

"Is it possible to see oneself?" Luo Feng asked.

"According to my experience, in the future shown by the altar's

phantom, you can never see yourself!" Starlight said.

Luo Feng didn't care too much, as he was already the strongest of his time, and he was confident in dealing with anything in future developments.

"Luo Feng, I now need to open the altar and need your help providing energy," Starlight said.

"Alright." Luo Feng nodded.

Starlight looked at this altar, immediately began to burn the main battle avatar, and unleashed surging power. Starlight's immense power started pouring into the layers of the altar's phantoms, starting to impact these phantoms, changing them.

With his achievements in space-time, maintaining 'extreme burning of the main battle avatar' has a significantly better effect. In just a moment, after consuming the equivalent energy of 'burning hundreds of main battle avatars', Starlight finally opened the altar.

The moment the phantoms of the altar separated—

Luo Feng saw a book.

The book floated in the center of the altar.

"Whoa." Starlight immediately split an avatar, entering the center of the altar.

And the altar returned to its closed state, layers of phantoms enveloped it.

"My avatar has entered the altar's core, and it can stay there for a long time," Starlight smiled at Luo Feng, "Thanks."

"That book?" Luo Feng inquired.

"The manifestation of the Origin of the Mysterious Land 'Recording Corridor'," Starlight smiled, "If I can refine it, I can control this Mysterious Land."

"Is refining difficult?" Luo Feng asked.

"In the Recording Land, time and space are only parts. The most core is the 'Causality Dao'," Starlight did not hide, "But my space-time path is strong enough. Plus, with your help, I can force my way in! In the years to come, I need to cooperate with the Origin to become a 'Recorder'. As long as I do well enough and spend more time, I can take control of the Recording Corridor."

Luo Feng nodded happily.

He saw that book and subtly sensed its hidden powers, which could judge the 'Recording Corridor' as an Intermediate Mysterious Land. Starlight's increased strength is beneficial for the entire Cultivator Camp.

"This altar's phantom, cannot see oneself?" Luo Feng looked, asking, "Have you seen mine?"

"Of course, I've seen it," Starlight smiled, "In the Endless Primordial Space, your Blade is the strongest."

Luo Feng chuckled.

The aspects of time, space, and causality in the 'Recording Corridor' were not what Luo Feng was good at. After staying in the Recording Corridor for some time, he also saw some future possibilities of 'Nai Gu', 'Yuan', and 'Ming Huang', and eventually, Luo Feng left.

In the altar's core.

Starlight sat cross-legged, holding a pen in one hand and a book in the other, recording.

"Luo Feng." Starlight looked up.

Looking outward from the altar's core, layers of phantoms could also occasionally show scenes. Starlight saw a scene—

It was a dim and majestic hall, and the aura emitted by the hall was enough to make the entire Endless Primordial Space tremble.

Inside the hall, there was a main seat, and on both sides of the main seat were 108 seats.

A towering figure sat on the main seat, that was Luo Feng!

Seated below him on the 108 seats were various figures, among them were Demon Ruins, Jin, Kafu, Infinite Ancestor, and even Sha Zhou...

"The greatest camp of the future!" Starlight lowered his head again and continued recording. He had seen this scene of Luo Feng many times before.

Chapter 491 - 25: Infinite World

Chapter 491: Chapter 25: Infinite World

The days of the Lords are dominated by tranquility.

Terrifying wars like the 'battle between the two major camps' or 'the war between the Ancestor's side and the eight Lords' are actually quite rare!

For Lords like Luo Feng, life primarily consists of cultivation, exploring mysterious lands, governing their territories, and spending time with family and teaching disciples.

...

In Luo Feng's territory, a very remote Source World.

An avatar of Luo Feng is acting as a blacksmith in this Source World, transforming the decayed into the miraculous by 'crafting' powerful divine weapons, which is also his way of cultivating the Path of Matter. At this moment, however, Luo Feng's avatar's expression changes as he looks outside the Source World.

An impossibly massive serpentine snake, its body so long it rivals this Source World.

Whoosh!

As this serpentine snake arrives, it starts forcibly devouring the Origin of this Source World.

"Infinite Great Serpent!" Luo Feng exclaimed in shock and anger, telepathically shouting, "Stop!"

The serpentine snake glanced at Luo Feng's avatar within the Source World, its eyes filled with coldness, sending a mental wave: "Lord Luo Feng, does a mere avatar think it can stop me?"

It doesn't care at all and continues to devour, the fluctuations caused by its devouring of the Source World Origin swept across the entire Source World, bringing an apocalypse to countless creatures.

Luo Feng watched this scene coldly.

His avatar didn't intervene in disputes. Yet he watched many cultivators grow in this Source World, and now the extinction of all creatures within this Source World still enraged Luo Feng!

"The day has finally come, the first Ancestor daring to devour a Source World after the great war!" Killing intent surged in Luo Feng.

He knew this day would come!

The territory absolutely controlled by the Cultivator Camp, originally consisted of 3,600 World Groups and 1,600 World Groups in the Southern River Territory, cumulatively covering over 5,200 World Groups, covered by the Space-Time Net, quite secure.

But the broader territories were regions occupied by other camp forces, and the Cultivator Camp only commanded the Source World. Even though basic space-time teleport channels were arranged, patrols and high-level Primordial Life, world-level Primordial Life avatars were assigned to help, the garrison forces were still too weak.

It couldn't be helped, high-level Primordial Life and world-level Primordial Life from the Cultivator Camp were extremely few.

"Thirteen Snake Ancestors of the Infinite Great Serpent Clan!" Luo Feng looked at the opponent, recognizing the other among the more than two hundred Ancestors in the Endless Primordial Space.

"Just an avatar, no need for nonsense." The snake didn't care in the slightest, sweeping over with invisible force, extinguishing Luo Feng's avatar.

It continued devouring the Source World Origin.

It always yearned to devour a Source World, but threatened by the eight Lords, apart from the three emperors of Wind and Thunder Sea, no Ancestor in the endless Primordial Space dared to devour.

It endured too long, and no longer would!

It prepared to devour a Source World and then hide long-term in the mysterious land 'Infinite World'.

...

"Thirteen Snake Ancestors of the Infinite Great Serpent Clan devoured a Source World?"

"It's got quite the guts!"

"The first non-undying Ancestor to dare devour a Source World post war! Now we await the Cultivator Camp's response."

All forces eagerly anticipated the Cultivator Camp's response.

...

The Council Hall in the Land of Origin.

The eight Lords gathered.

"One billion two hundred million epochs have passed since the great war!" Yuan sat there, with a half-smile, "The day finally arrived. I knew these Ancestors wouldn't endure forever."

"Kill one as a warning to others!" Luo Feng's killing intent was the strongest, especially as it's his garrisoned Source World, "It must die!"

"It's very cautious; it's estimated that it will return to the Infinite World in about a day." Starlight said.

"Hiding in the mysterious land 'Infinite World'?" Ming Huang frowned, "That would be troublesome."

Infinite World is an intermediate mysterious land!

In the external world, the Infinite Snake Ancestor can only utilize

part of its power. But within Infinite World, the power of the Infinite Snake Ancestor would surge greatly. The help effect is much stronger than ordinary mysterious lands like 'Galaxy Territory', 'Land of Origin', or 'Time Star'.

"This Thirteen Snake Ancestor, daring to devour a Source World, must have been prepared." Mo Man said, "It may soon hide in the Infinite World. After some time, it might come out a second time to devour. Repeated devourings, repeatedly hiding in Infinite World."

The Infinite Great Serpent Clan can appear close to any Source World by using 'Infinite World'.

It takes a long time for the main battle avatars of the eight Lords to rush over.

"It's impossible to predict where it will go next." Starlight shook its head; even while peering into the future, there are countless possibilities, "The only way to kill it is to strike into the Infinite World."

"Infinite World is no ordinary mysterious land." Wulan expressed concern.

"Once we take action, the Ancestors can sense us." Jin also expressed concern, "They might gather some Ancestors to help garrison Infinite World, making it hard to attack."

"This is not an attack, it's an assassination!"

Starlight shook its head, "This battle must be secret. If the Infinite Snake Ancestor summons a large group of Ancestors, with dozens guarding Infinite World, no one can shake it!"

"But the Ancestors aren't united; without an emergency, it's impossible for their true bodies to forever guard Infinite World." Starlight said, "Moreover, the other Ancestors are also on guard against the 'Infinite Snake Ancestor'."

Luo Feng and the others nodded.

Under normal circumstances, each Ancestor has its own stronghold,

also divided into multiple factions.

Within Infinite World, it’s primarily the ’Infinite Snake Ancestor’ and its subordinate primordial-level Great Serpents who guard it.

Chapter 492 - 25: Infinite World (Part 2)

Chapter 492: Chapter 25: Infinite World (Part 2)

"To remain absolutely secret, only we four—Starlight, Mo Man, Luo Feng, and I—can act together, as we can conceal all energy fluctuations," Yuan said.

"My main battle avatar is currently refining treasures," said Lord Mo Man. "I have been refining for tens of thousands of epochs, and it could take a few hundred to a few thousand more epochs to succeed. Can this battle be postponed?"

"Can't refining the treasures be paused?" Ming Huang inquired.

"I must suppress with my main battle avatar. If it goes to the Infinite World to fight and leaves only one or two-tenths of its strength, the treasures will slip away," Lord Mo Man replied helplessly.

Yuan shook his head: "The sooner this battle is fought, the better! Quick action has a deterrent effect!"

"The Infinite Snake Ancestor may also be recruiting allies, so the sooner we act, the better," Starlight agreed.

"The three of us should be enough," Luo Feng said, frowning.

Starlight glanced at Luo Feng.

He could see the futures of other Lords but could not see Luo Feng's future, leaving him unable to discern Luo Feng's exact strength.

"Since Lord Luo Feng thinks it’s enough, let’s try!" Yuan nodded slightly. "Even if we fail this time, we can find another opportunity. Surely, dozens of Ancestors can’t guard the Infinite World forever?"

"Agreed." Starlight nodded in agreement. "This time, we will go at all costs, with the fastest speed possible. Luo Feng, Yuan, and I will immediately descend as avatars by your side so that you can help us regain the strength of our main battle avatars."

Luo Feng nodded: "Okay."

It was the fastest way to gather.

Luo Feng, Yuan, and Starlight joined forces and immediately gathered, sparing no expense to reach the ’Infinite World’ with the fastest speed.

...

In the Mysterious Land known as the ’Infinite World,’ the sky was vast, and the dark earth stretched endlessly.

As ripples gently formed in the fabric of space-time from a cloud in the sky, a serpent-shaped creature crossed the ripples and returned to the Infinite World.

"Thirteen," a cold voice suddenly sounded.

The serpent-shaped creature was startled, turning to see the phantom head of the Infinite Snake Ancestor.

"Ancestor," the serpent-shaped creature responded obediently.

"I had long decreed that the Infinite Great Snake Clan is prohibited from devouring Source Worlds, at least not as the first Ancestor to do so," the Infinite Snake Ancestor said, furious. "It has been just over a hundred million epochs, and you couldn’t help yourself?"

"Ancestor," the serpent-shaped creature protested, "we can instantly reach far places and return instantly! If we are cautious, those Lords can do nothing to us."

"You underestimate them too much," the Infinite Snake Ancestor fumed.

"What can they do to me?" the serpent-shaped creature sneered. "In the previous Source World, Luo Feng's weak avatar was there, and I wiped it out with a single energy fluctuation."

The Infinite Snake Ancestor remained silent.

"You've violated the Lords' taboo, and they won't let it go," the Infinite Snake Ancestor said flatly. "If eight Lords join forces to come here, I will have a reason to summon many Ancestors for help."

"But if they don't come to kill you, then you'll have to be careful yourself." The Infinite Snake Ancestor didn't want to say more.

He was just one of the Nine Emperors.

Summoning the true bodies of dozens of Ancestors would be quite troublesome.

It should be noted that after the last great war, many Ancestors' true bodies have been hidden, and those acting outside are merely avatars.

"I'll just hide in the Infinite World." The serpent-shaped creature immediately burrowed into the dark soil.

"Perhaps I've sheltered them too much, so even this Thirteen dares not listen to me," the Infinite Snake Ancestor sighed inwardly. "He underestimates the Lords and that Lord Luo Feng too much."

In the top tier of the Endless Primordial Space, even becoming a Lord is so fleeting! Over a hundred million epochs passed, who knows what methods Lord Luo Feng has now?

The Infinite Snake Ancestor remained cautiously vigilant, sensing the positions of the eight Lords.

At this moment, many forces were monitoring the Lords' positions.

"They haven't acted collectively yet?"

The Infinite Snake Ancestor pondered.

As he worried, two days quietly passed. Two days are too short for the Ancestors; preparing for one action could normally take several hundred epochs.

"Hmm?" The Infinite Snake Ancestor suddenly turned to look in shock and anger.

A blade light incomparably sharp came from 'beyond the heavens,' cutting through the World Membrane to enter this world. As the controller of the Infinite World, the Infinite Snake Ancestor was naturally the first to notice.

"They've come?" The Infinite Snake Ancestor was very surprised. There was no sign before their arrival!

"The Lords have come? How is it possible?"

Inside the Infinite World, fifteen Ancestor Level 'Infinite Great Serpents' felt the sensation and saw that incomparably sharp blade light, instinctively feeling fear.

"How dare you!" The enormous body of the Infinite Snake Ancestor appeared in front of the blade light, with an incomprehensible amount of power converging on it.

The power of the Infinite World converged on the 'Infinite Snake Ancestor,' and its mere presence far surpassed that of Sha Zhou.

It should be noted that when Luo Feng first refined the Blood Crane Territory, after becoming a Lord, his power within the Blood Crane Territory could increase about threefold.

The Infinite Snake Ancestor was far stronger than Luo Feng when he first became a Lord. The Infinite World could enhance the Infinite Ancestor's power by about five times. This was an immensely terrifying power...

In the past, the Lords never thought of attacking the Infinite World.

"Slash!"

The blade light was chilling.

With the assistance of Yuan and Starlight, Luo Feng wielded one of the two perfected blade techniques over hundreds of millions of epochs: the 'Blood Shadow Blade Technique,' pursuing the ultimate 'All Things Can Be Cut' characteristic.

Sizzle!

The enormous and resilient body of the Infinite Snake Ancestor disappeared in a flash before the blade light, as if it felt no resistance, with the blade light heading straight for the distant earth.

"Not good." Seeing this, the Infinite Snake Ancestor immediately transmitted a message, "Inference Fire Ancestor, Infinite Ancestor, Mother of Space-Time, hurry over."

At this moment, only these three could arrive promptly.

At once, three thoughts descended.

The avatars of Inference Fire Ancestor, Infinite Ancestor, and Mother of Space-Time descended! Moreover, the vast power of the Infinite World supplied them, quickly strengthening the three avatars, with Life Cores ready to merge into these bodies at any moment.

"Inference Fire Ancestor, they need a moment to regain strength, so everyone do your best to block," the Infinite Snake Ancestor transmitted to his fifteen subordinate Great Serpent Ancestors, while he also mobilized the power of the Infinite World to stop them with all his might.

Void Maze? In front of Starlight, all Void techniques were a joke.

Blocked by Infinite Power?

In front of the blade light, all forces were divided in two!

"Quick, stop them."

"Stop them." The fifteen Great Serpent Ancestors were merely ordinary Ancestors! The most fatal flaw was that their strengths were

very similar, either Void Power or Infinite Power.

Similar strengths meant their methods of cooperation were limited.

"Stop!" Inference Fire Ancestor roared in fury. At this moment, this avatar had already increased its strength to fifty percent.

"Things can be discussed together," Infinite Ancestor also spoke up.

"We can compensate on behalf of the Thirteen Snake Ancestors," Mother of Space-Time urgently added.

Whoa!

The blade light severed all obstacles, effortlessly cutting through soil obstruction.

"No, no—"

The Thirteen Snake Ancestors were filled with terror, wanting to escape, but when Starlight arrived at the Infinite World, the space-time of the entire Infinite World was affected, making it unable to use space-time transmission to leave.

The blade light flashed by!

Passed through the body of the Thirteen Snake Ancestors.

In the grip of fear, the Thirteen Snake Ancestors died instantly, with their bodies vanishing.

——

Thanks to the new Alliance Hierarch ’Reader20240309000100689’ for the reward!

Chapter 493 - 26: A Single Strike

Chapter 493: Chapter 26: A Single Strike

In the Infinite World, the other fourteen 'Ancestor-level Great Serpents', upon discovering that even the Infinite Snake Ancestor couldn't intercept that terrifying blade light, were so frightened that they scattered, trying to stay as far away from the Thirteen Snake Ancestors as possible.

They all knew that the Lords were here to hunt down the Old Thirteen; being too close to the Old Thirteen could easily lead to collateral damage.

"Whew whew whew."

The fourteen Ancestor-level Great Serpents each used their methods to split up and escape, while constantly keeping an eye on that blade light.

The blade light cut through all obstacles, penetrated deep into the earth, and killed the Thirteen Snake Ancestor.

"Old Thirteen is dead!" These Ancestor-level Great Serpents were both frightened and furious, yet completely powerless.

"Come and join me!" The Infinite Snake Ancestor immediately sent a message to them. Among them, those skilled in Void Power escaped faster and had already reached the vicinity of the Infinite Snake Ancestor. Those skilled in Infinite Power, however, escaped more slowly.

Buzz!

Suddenly, dazzling light flared up, and with one flash, took away three Ancestor-level Great Serpents fleeing in this part of the Infinite World.

Due to the vastness of the Infinite World, even the Infinite Ancestor had to make several actions consecutively to gather all these Ancestor-level Great Serpents to one place.

"Thank you, Infinite Ancestor, for saving our lives." Indeed, these Ancestor-level Great Serpents were scared.

"Unexpectedly, in the Infinite World, the Snake Ancestor and your fifteen combined efforts couldn't stop those three." The Infinite Ancestor's mood was also very complex.

The Infinite Snake Ancestor sighed and said, "Even with my subordinates, channeling the Infinite World's power, we were still slightly inferior to the three of them. But the key to them being able to kill Old Thirteen so easily is that blade!"

Just slightly inferior, Luo Feng and the three of them should have flown relatively slowly in the Infinite World! And given the vastness of the Infinite World, just getting to the 'Thirteen Snake Ancestor' to kill them was difficult.

"They utilized that blade, transforming into a blade light! Their speed was extremely fast, even distorting space-time, allowing them to traverse the Infinite World in just two breaths." The Infinite Snake Ancestor was also quite helpless.

"First, drive them out." Inference Fire Ancestor spoke.

"Alright." Mother of Space-Time also agreed.

They all had recovered their strength to the pinnacle.

With Inference Fire Ancestor, Mother of Space-Time, and Infinite Ancestor assisting the Infinite Great Snake Clan, combining several different highest-level powers increases their overall strength by thirty to forty percent, enough to suppress Luo Feng and the three of them.

"Infinite Snake Ancestor, your clan's 'Thirteen Snake Ancestor' devoured Source World, massacring countless creatures of the Source World. Today, we three Lords of the cultivator camp have slain the Thirteen Snake Ancestor and exterminated over three hundred world-level primordial serpents as a minor punishment." Luo Feng, Yuan, and Starlight manifested, their powerful voices reverberating.

"Exterminated over three hundred world-level primordial"? The Infinite Snake Ancestor and the fourteen Ancestor-level Great Serpents all felt something was wrong.

Most of the world-level primordial serpents of the Infinite Great Snake Clan are out venturing and tempering themselves; some are in charge of leading a region, and others are undergoing life and death tempering. Only a few, which total just over three hundred, comfortably remain at the clan ground 'Infinite World'.

Luo Feng and his companions claimed 'exterminated over three hundred world-level primordial', indicating their intention to annihilate all the world-level primordial serpents currently in the Infinite World.

"Stop." The Infinite Snake Ancestor urgently transmitted.

But it was already too late!

As Luo Feng spoke, the three Lords had already begun their assault.

Luo Feng unleashed the 'Life-cutting' blade technique, while Starlight and Yuan each wielded their own techniques. In the 'Infinite World' environment, Luo Feng's Life-cutting was least affected, while Starlight and Yuan experienced greater interference.

But when the three of them struck simultaneously, all three hundred world-level primordial serpents died silently, without any ability to resist.

Due to the long distance in the Infinite World environment, under the combined efforts of Infinite Snake Ancestor and Mother of Space-Time, Starlight was slightly at a disadvantage, unable to retrieve those bodies from afar.

"Let’s go." Luo Feng and his companions transformed into blade light, slicing through the world membrane like cutting tofu, easily flying out.

...

Outside the Infinite World.

Luo Feng and his companions stood in the void, finally feeling somewhat relieved.

Within the Infinite World, the three of them needed to join forces constantly, supported by the ’Yuan’ formation, to withstand the terrifying powers of the entire Infinite World.

"Earlier, the Infinite Snake Ancestor and fifteen Ancestor-level Great Serpents were able to channel the Infinite World’s power... yet the three of us managed to hold a slight advantage." Yuan was also quite delighted.

"That’s because Luo Feng’s blade is formidable enough; otherwise, within the Infinite World, we’d struggle to move an inch." Starlight remarked. Every step faced the overwhelming suppression of the mysterious land’s power, a naturally distressing experience.

By joining forces and transforming into blade light, they manage to cut through the world power and effortlessly fly away.

Rumble~~~

The figures of Infinite Snake Ancestor, Inference Fire Ancestor, Mother of Space-Time, and Infinite Ancestor pursued them outwards, emanating boundless might in the void.

"Luo Feng, Yuan, Starlight! The three of you, based on strength, could rank among the top three in Endless Primordial Space!" The Infinite Snake Ancestor was furious and embarrassed beyond measure, "You intrude into the Infinite World, killing Old Thirteen is one thing, but slaughtering over three hundred world-level primordial serpents like a giant bullying the young is utterly shameless!"

Considering the conquest of the Destruction World, in terms of direct

combat strength, Luo Feng ranks first, followed closely by Starlight, Yuan, and Sha Zhou.

But everyone understands that besides direct combat, Starlight and Yuan excel in other aspects; Yuan's expertise in formations... during large-scale wars, his contribution surpasses Luo Feng's! Starlight is masterful in strategy, always gaining the upper hand; even in large-scale wars, the bodies of the Ancestor usually end up in Starlight's possession.

Chapter 494 - 26: A Single Strike (Part 2)

Chapter 494: Chapter 26: A Single Strike (Part 2)

Indeed, the outside world generally believes that Luo Feng, Xing Mang, and Yuan are among the top three in overall strength. This is also the foundation for the Lords to lead all Source Worlds.

"Bullying the weak?" Luo Feng said coldly, "That Thirteen Snake Ancestor devoured Source Worlds and conveniently slaughtered countless Source World Creatures within, is that not bullying the weak?"

"Hahaha..." Yuan laughed loudly, "Infinite Snake Ancestor, as long as you dare to devour Source Worlds, we dare to bully the weak! This time we only killed over three hundred World-level Primordial Great Serpents, next time at least we'll double it!"

"Not only World-level Primordial Great Serpents, but we also need to kill more High-level Primordial Great Serpents," Xing Mang said coldly.

The distant Infinite Snake Ancestor was furious.

If 'World-level Primordial Great Serpent' is the backbone of the group, then the massive number of High-level Primordial Great Serpents is the group's foundation. Losing billions is no concern to the Infinite Snake Ancestor, but if they're to be completely wiped out? The Infinite Snake Ancestor would be panicked.

With Xing Mang's strength, at any cost, it could completely annihilate ninety-nine percent of the High-level Primordial Great Serpent clan!

"This time, it's just a warning!" Luo Feng said, wielding the blade in his hand.

Blade Light flashed.

Infinite Snake Ancestor felt a moment of panic, instantly completely virtualized to avoid this blade, it could feel the fearsome nature of the blade.

"Buzz—"

This blade came suddenly.

Yet, it pierced through infinite space-time in an instant, a streak of Blade Light seemed to split the heavens and earth in two, slicing open the thick and tenacious infinite Primordial Void, creating a deep void canyon.

"This is—" Infinite Snake Ancestor, Inference Fire Ancestor, Mother of Space-Time, and Infinite Ancestor were all dumbfounded.

The length of the void rift cut by this blade surpassed the length of an entire World Group! To cover such a vast area while maintaining such strong power?

And after unleashing this blade, the terrifying blade scar seemed to be imprinted in the Primordial Void, persisting for a long time.

The Primordial Void instinctively wanted to heal. But the Sword Intent imprinted by this blade repeatedly tore at the void.

"Those who want to devour Source Worlds." Luo Feng glanced around, sensing that almost every Ancestor was looking here from afar, "Think first whether you can bear the price!"

Yuan looked at this terrifying blade with shock and joy, this was the most fearsome display of destructive power by Luo Feng.

"Let's go." Xing Mang also smiled.

Whoosh.

The three Lords broke through space-time and left immediately.

Infinite Snake Ancestor, Inference Fire Ancestor, Mother of Space-Time, and Infinite Ancestor watched this terrifying blade with increasing heart palpitations.

"What a powerful blade!" Kafu's avatar descended, delightfully watching this blade.

One after another, avatars descended.

In an instant, over a hundred Ancestor avatars gathered here, like a party.

"The Infinite World isolates external investigations, making it impossible to see what happened. But from their conversations, Lord Luo Feng went in, killed the Thirteen Snake Ancestor, and wiped out over three hundred World-level Great Serpents?"

"And left behind this blade as a warning?"

"This blade piercing a range exceeding a World Group, it's too terrifying."

"From now on, never appear with one's True Body before Lord Luo Feng, or risk being slaughtered by a blade."

"Why hasn't the power of this blade diminished?"

Many Ancestors observed the blade, noticing its mysterious aspect.

When Primordial Lords engage, the techniques used naturally diminish and disappear. Yet this blade cleaves the endless Primordial Void, so vast in scope, has it not diminished?

"Brother Luo Feng's Sword Intent is already beyond imagination." Kafu stared fascinated at the blade scar, saying, "His blade contains an everlasting vitality, a characteristic of immortality. Even after countless epochs, this blade will still exist."

"The Primordial Void has an instinct to heal its cracks." Hermit observed beside him, saying, "So the remaining terrifying Sword Intent constantly fights against the Void's instinct! Sword Intent will still diminish, but the years of decay will be very long. Currently... this Sword Intent can injure Ancestors, future, it should only be able to threaten World-level Primordial."

The gathered Ancestors agreed.

Eternal non-decay? That doesn't conform to understanding.

"From this blade, Lord Luo Feng's power surpasses the last great battle. No wonder he dared to charge into the Infinite World with Yuan and Xing Mang."

"How terrifying indeed."

These Ancestor avatars watching felt some fear.

Most Ancestors abandoned the idea of 'devouring Source World.'

...

Forcibly charging into the Infinite World, slaughtering Thirteen Snake Ancestors and over three hundred World-level Primordial Great Serpents. Also, leaving behind a terrifying blade, shocking all parties.

Indeed, it also quelled some eager Ancestors.

"After the great battle, we seldom obtained a complete Ancestor corpse, and now this Thirteen Snake Ancestor's corpse, Elder Yuan, you're going to monopolize?" Jin Du couldn't help but say, "Recently, over a hundred and twenty million epochs, you've repeatedly stolen and snatched, how many resources have you taken?"

"Little Brother Jin! You became a Lord, and I also contributed greatly, didn't I?" Yuan pouted, "How little resources have I taken from you, and you're jumping?"

"If I didn't give it to you, you'd directly rush into my Cave Mansion to rob it!" Jin was angry.

"Brother Yuan, you're indeed wrong to do that." Wulan also said.

"I didn't rob!" Yuan shook his head, "I just went to his Cave Mansion to borrow some treasures; if he didn't agree himself, how could I possibly rob a Lord's hidden treasures?"

Jin was furious.

Yuan disregarded shame, so he could only 'borrow.'

"I truly need this corpse." Yuan looked around, "I urgently lack it to create Source World."

Lord Mo Man also said, "Brother Yuan, you've been saying you want to create Source World, investing various resources, trying repeatedly... but what were the results? Haven't they always failed?"

"This time is different! I'm prepared with the corpses of Thousand Eyes Ancestor and Infinite Great Serpent as the foundation. One specializes in Soul Power, the other in Physical Power. With them as the foundation, this time it will surely succeed." Yuan said.

"Brother Yuan, you've said many times that it will succeed." Luo Feng was also helpless.

"Just this once, just once." Yuan looked around.

All seven Lords were helpless.

After all, every person who became a Lord owed Yuan a favor.

"The old rules then." Xing Mang said.

"Got it." Yuan smiled cheekily, "Leave some Ancestor flesh for Nai Gu, unnecessary bits remain as shared materials."

Yuan soon took the Thirteen Snake Ancestor corpse, leaving only two or three parts of the materials, took the rest, and once again started his Source World creation plan.

"Xing Mang, you need to take control of Elder Yuan, he's already gone too far." Jin said.

"It is a bit excessive." Lord Mo Man also said.

"Let’s vote fairly amongst us seven whether to manage Brother Yuan." Xing Mang smiled, "I think it’s not urgent yet."

"Just a few Ancestor corpses, a bit of resources, let’s observe for now." Luo Feng said as well.

The seven voted, Jin, Nai Gu, Mo Man thought to manage, the other four thought it wasn’t urgent yet.

"You’ll indulge him to become more excessive." Jin was furious, turned around, and left.

——

The grand finale tomorrow.

This also marks the completion of Luo Feng’s story.

Chapter 495 - 12-27: Eternity (Grand Finale)

Chapter 495: Chapter 12-27: Eternity (Grand Finale)

The river of time flows endlessly.

The Origin World too experiences cycle after cycle of reincarnation, with countless cultivators unable to escape its grasp. Those who survive into the next Reincarnation Era are exceedingly rare.

Meanwhile, the Land of Origin Origin World, home to Lord Luo Feng, exists beyond such cycles, free from the calamities of reincarnation. Through the passage of time, the Land of Origin has become increasingly prosperous, with strength abounding.

"Hahaha! I, Luo Hai, have finally come to the Land of Origin on my own!" A young man carrying a blade arrives at the Land of Origin, looking around in excitement.

For this day, Luo Hai has paid a great price.

"The suppression of heaven and earth in the Land of Origin is indeed formidable; I can't even fly." Standing on the vast wilderness, Luo Hai's mind stirs, sprouting a pair of silver wings from his back, allowing him to fly using the secret treasure of his wings.

Whoosh~~~

Flying high above, Luo Hai gazes at the expansive world below.

"Luo Hai!" A familiar voice calls out, and a black-robed child appears

out of thin air, smiling at Luo Hai.

"Barbat!" Luo Hai recognizes him, surprised, "Barbat, you can teleport within the Land of Origin?"

"I, Barbat, am now one of the seventy-two vice-governors of the ninth assembly of the Land of Origin!" Barbat declares confidently, "With the Governor Order in hand, I can easily reach any location within the Land of Origin. Plus, your father has even elevated my physical body to the Godly King Level threshold!"

The highest nine Great Governors of the Land of Origin serve indefinitely.

But the seventy-two vice-governors are regularly replaced! Barbat, due to gaining Luo Feng's trust, finally became one of the seventy-two vice-governors in the ninth assembly.

Barbat looks at Luo Hai, shaking his head: "You took so many long years just to become a True God! With talent like that? Even given more time, you'd never reach Godly King. Why not learn from your elder brother, let your father directly elevate you to the Ultimate Realm of Godly King! Or even raise you to the Divine Emperor Level, that's entirely possible."

With Luo Feng's Primordial Life and Death Dao, transforming life forms to Godly King Level, or Divine Emperor Level, is quite easy.

"That would be so dull."

Luo Hai shakes his head, "Dad became a lord, I have long been immortal. Given this, I should explore the path of cultivation with infinite time, carefully navigating the challenges and joys it offers. The path of cultivation is full of trials, and overcoming each difficulty is indeed a joyful task."

"Unlike you all, who have completely abandoned the path of cultivation." Luo Hai shakes his head.

His cultivation is not about believing he can cultivate to immense strength, but about enjoying the various landscapes along the cultivation journey.

True God, true god of void space, eternal true god... each stage has so many landscapes.

Relying on his father to become a Godly King, a Divine Emperor? Forever stuck at that realm? Too dull!

"Your path can be freely chosen, but not ours. We don't have the privilege of capriciousness," Barbat shakes his head. With Luo Feng's high status, surrounded by many friends and family, meeting him is not easy, so there's no room to nitpick.

Rarely meeting once, naturally, one should seize the opportunity and seek favors.

The ninth assembly's seventy-two vice-governors have just reached him, which shows how many people there are before him! All thanks to his deep friendship with Luo Feng, did Luo Feng specifically meet him, and thus he obtained the 'life type' Godly King Level First Realm physical body.

His former master 'Hu Yan Bo' only obtained some cultivation resources, plus three resurrection opportunities, without a chance for individual meetings with Luo Feng. As for cultivation? Hu Yan Bo entirely relies on himself.

Luo Feng, personally aiding in the transformation of life forms, does so rarely.

"Need me to accompany you? The Land of Origin is home to crouching dragons and hidden tigers, masters abound; for a minor True God like you, venturing through the Land of Origin is quite dangerous," Barbat offers.

"No need." Luo Hai shakes his head.

"Not even intelligence?" Barbat queries.

Luo Hai smiles: "I'm seeking exactly the surprises! Let me properly explore the Land of Origin myself."

Barbat, helpless, watches Luo Hai's wings flap as he flies away.

"Luo Ping and Luo Hai, such diametrically different personalities." Barbat laments, for now, the tangled forces within the Land of Origin are complex and perilous, yet Luo Hai seems wholly unconcerned.

...

Abyss of Destruction, at its core, lies the 'Mountain of Destruction'.

Luo Feng's primary combat avatar has arrived here.

"Little Hai finally became a True God, and has come to the Land of Origin." Luo Feng also smiles slightly, then looks towards the distant seven sculptures.

Throughout long millenia, Luo Feng has attempted many times, repeatedly defeated by the sixth sculpture.

Yet the gap continues to diminish.

"Through the ages of warfare, nineteen new Ancestors have emerged! Other Ancestors have experienced some growth in strength, with two more 'Undying and Undying' added." Luo Feng frowns, "But our cultivator camp has yet to birth new lords, our overall strength improvement remains minimal."

Starlight, Mo Man have yet to refine the intermediate mysterious land; other lords find little progress in cultivation, Yuan still tries creating Source Worlds, but Nai Gu's power increased somewhat.

But considering the cultivator camp overall, there's scant enhancement in strength.

"Endless Primordial Space harbors even more Ancestors; their strength steadily ascends," Luo Feng understands, "However, every new lord born in the cultivator camp marks a qualitative transformation."

The cultivator camp's strength leaps with every lord born!

"But birthing a new lord is incredibly difficult!" Luo Feng lightly shakes his head. Despite their diligent governance by eight lords, there's yet no hope for a new lord's emergence.

Luo Feng continues forward.

Within the seven sculptures, the sixth, 'Miniature Mountain of Destruction,' awakens, the intangible aura of this black mountain remotely locking onto Luo Feng, then slowly flying towards him, its speed leisurely.

Chapter 496 - 12-27: Eternity (Grand Finale) (Part 2)

Chapter 496: Chapter 12-27: Eternity (Grand Finale) (Part 2)

As the distance grew closer, the size of Black Mountain also became larger, eventually reaching a tenth of the size of the 'Mountain of Destruction'.

Luo Feng calmly watched his opponent. Having faced it many times, he was very familiar with this powerful opponent.

"Boom—" Black Mountain's speed suddenly increased dramatically, crushing forward, and under this terrifying momentum, spacetime was distorted, further restricting Luo Feng's movement.

But Luo Feng couldn't be bothered to dodge.

He directly drew his knife!

The blade light flashed!

"Pshh."

Silently and without a sound, this massive Black Mountain was split open with a crack, its gigantic body also brushing against Luo Feng, causing him to be blown back with a bang, severely injured! As Luo Feng flew backwards, he continued to swing his knife!

Luo Feng knew very well that cutting off life? Locking in? These techniques were meaningless.

For the massive Black Mountain, what was needed was destruction! To completely destroy this formidable body.

"Rumble~~~"

The massive Black Mountain charged recklessly, its momentum terrifying, whenever it brushed, bumped, or collided with Luo Feng, he would be sent flying repeatedly, sustaining injuries multiple times, and Luo Feng's energy reserves would restore to their pinnacle each time.

While continually being injured, Luo Feng also frantically swung his knife, the Bloodshadow Knife landing again and again on the massive Black Mountain.

The blade light, sometimes cleaving through everything, sliced open crack after crack.

Sometimes with hidden power, the blade light penetrated deep within the Black Mountain through the cracks.

Sometimes with terrifying power, it exploded within the depths of Black Mountain, igniting from inside and outside.

"Rumble~~~"

Luo Feng flew around erratically, his skin split open, blood dripping, with each hit losing at least one or two percent of energy reserves. This was the result under the augmentation of the Power of Destruction and the Power of the Galaxy Territory.

Black Mountain entirely relied on brute force, its crushing attacks, far fiercer than Luo Feng's, with a body as strong as Wulan's!

Of course, Wulan was a Lord, his body had no weaknesses. However, Black Mountain, as one of the Seven Sculptures, had a weakness in its Energy Core. This was also Luo Feng's hope for victory!

"Boom!"

Luo Feng fought fiercely against this Black Mountain for a long time, after slashing out hundreds of thousands of times, he finally reached

the core point within Black Mountain. In the instant the blade light passed over that core, the entire Black Mountain silently shrank back, returning to its original place, transforming back to its original sculpture form.

"Did I win?" Luo Feng was somewhat pleasantly surprised, revealing a smile.

The last large-scale war, he had already defeated the fifth sculpture. Over the long years until now, his blade technique progress had been very slow, and only with the accumulation of time did the gap with the sixth sculpture gradually narrow.

Until today, after a fierce battle of hundreds of thousands of slashes, he finally defeated the sixth sculpture.

Suddenly, an invisible fluctuation enveloped Luo Feng.

"Hmm?"

Luo Feng felt it, the immense power that he could freely control, power equivalent to the Power of Destruction World, evidently one of the seven portions of power of the Abyss of Destruction.

"The power of the Abyss of Destruction on me has doubled. If I were to face the sixth sculpture again, I should win more easily." Luo Feng also understood, this was a gift from the rules of the Abyss of Destruction! Only by mastering and refining the core can one truly control the Abyss of Destruction.

"Let’s try the seventh sculpture." Luo Feng looked expectantly at the last sculpture.

The seventh sculpture was a miniature Abyss of Destruction, each layer within containing some miniature sculptures, including Bawei Yu, the Primordial Beast Ancestor, and all other Ancestors and Lords who historically occupied the Destruction World, naturally including the other seven Lords of the Cultivator Camp.

This sculpture, once defeated, would grant control over the highest-level Mysterious Land, the ’Abyss of Destruction’.

"Let’s give it a try and see the power of this seventh sculpture."

Luo Feng walked forward.

When he got close enough, the seventh ’miniature Abyss of Destruction’ sculpture slowly awakened, and the miniature sculptures of the strong figures inside began to fly out, eventually transforming into 28 figures.

Yuan, Starlight, Sha Zhou, Ice Mountain Master, Infinite Ancestor, Infinite Snake Ancestor, Demon Ruins, etc., a total of 28 existences, each with no expression, exuding an aura of destruction.

"One against twenty-eight?" Luo Feng’s expression changed slightly.

In the Endless Primordial Space to this day, throughout history, there were a total of twenty-nine who had occupied the Destruction World!

Once occupied, it would be recorded by the seventh sculpture.

To face all the strong ones except himself?

"Boom!" The 28 figures, expressionless, attacked simultaneously.

Seeing them attack in an instant, Luo Feng let out a sigh of relief.

Because these 28 figures all used the Power of Destruction! Just the strength differed slightly.

"Thankfully all of them use the Power of Destruction. If Brother Yuan and the others came here with their true bodies, Brother Yuan’s formation could coordinate all companions, increasing their overall strength by several times, and in one move, they could destroy me." Luo Feng knew this very well.

This combination of 28, even with just casual cooperation, was enough to rival an ordinary hundred Ancestors!

If coordinated by Yuan’s perfect formation, amplified three or four times, the power... even a body as strong as Wulan’s would explode, and Luo Feng wouldn’t be able to withstand it!

"Rumble～～～"

As if the heavens and earth were collapsing, the endless power unleashed by the 28 figures poured down wantonly, all locked onto Luo Feng, leaving him nowhere to hide.

Holding the Bloodshadow Knife, Luo Feng felt suffocated. He immediately transformed into a beam of blade light to try to deflect the power. But under the boundless Power of Destruction, Luo Feng also turned pale, barely holding on to this move, his main battle avatar was left with only fifty percent of the energy reserves.

"Can’t fight!" Luo Feng directly retreated, in a thought he escaped the Mountain of Destruction.

As long as a mark is left in the Mountain of Destruction, one can freely enter and exit.

A few moments later.

After regaining his strength, Luo Feng returned from the lowest level of the Destruction World to the Mountain of Destruction, and the seventh sculpture had already returned to its place.

Chapter 497 - 27: Eternity (The Grand Finale)_3

Chapter 497: Chapter 27: Eternity (The Grand Finale)_3

"Although they all wield the power of destruction, a one against twenty-eight..." Luo Feng gently shook his head, "My body simply can’t withstand it!"

Outside, I can choose to transform into Blade Light and escape.

But to defeat the seventh sculpture, I must fight!

Facing unavoidable power, my own defense must be strong enough! Otherwise, I won’t survive.

"My seventh sculpture challenge is all the strong ones who have occupied the Destruction World except me." Luo Feng suddenly thought, "The seventh test faced by other strong ones should include me, right?"

Luo Feng smiled, then directly went near the Mountain of Destruction, reached out to touch the mountain, and began exchanging treasures.

There were already two Destruction Fruits, no need to wait anymore.

"The seventh sculpture, the power of destruction locked onto me, there’s nowhere to hide." Luo Feng thought, "Defense capabilities must be increased!"

With one face-to-face encounter, only half of the energy reserves are

left, greatly reducing strength, how can I fight?

This shows...

The controller of the Abyss of Destruction not only has strong destructive power but must also have strong self-defense capabilities, a very high threshold!

"Weapon Secret Treasures."

Luo Feng carefully reviewed the treasures.

One Destruction Fruit can choose any one among 3000 Weapon Secret Treasures, Kafu's battle armor being one of them.

Two Destruction Fruits can choose any one among 100 Weapon Secret Treasures.

"Proficient in defense." Luo Feng's mind shifted, quickly selecting a Cloak Treasure.

Whoosh!

A black Liu Guang flew out from the Mountain of Destruction, landed on Luo Feng, transforming into a black cloak exuding a terrifying aura of destruction, draping over him, protecting his whole body.

"A blade and a cloak, my two major treasures from now on." Luo Feng was quite satisfied, then looked at the distant seventh sculpture and walked over again.

As he approached, the seventh sculpture awakened once more.

This time, Luo Feng did not dodge, nor did he wield any weapon techniques, relying solely on brute force.

Twenty-eight figures burst forth terrifying destructive power, locked onto Luo Feng, completely enveloping him.

"Boom~~~~"

Luo Feng clearly felt, the destruction cloak on his body was

incredibly resilient, after the cloak's obstruction, only half of the power penetrated inside, able to touch the Protective Energy Layer, Crane Leader's Power, Power of the Destruction World.

"After resisting head-on, only losing one percent of energy reserves?" Luo Feng was rather satisfied.

With two forces from the Abyss of Destruction, the Power of the Galaxy Territory, and this treasure cloak, with these external assists, Luo Feng's physical body could finally match the strength of Wulan.

"At least I can compete now." Luo Feng attempted to make a move.

Moments later, Luo Feng gave up.

Because the seventh sculpture's explosive destructive power was continuous, keeping him always bathed in horrifying power, even using 'Blade Light's All Things Can Be Cut' to fly, he couldn't touch the twenty-eight figures.

Constantly getting hit, his various Blade Lights would be submerged in the torrent of destructive power. And the techniques like 'Life-cutting' had no effect on the sculpture.

"The gap is too big." Luo Feng understood this point.

From the sixth sculpture to the seventh sculpture, the difficulty increased significantly.

And as time goes on, the overall strength of the strong people in Endless Primordial Space improves, raising the difficulty of the seventh sculpture!

Because, it requires fighting against all the strong ones who have occupied the Destruction World except himself!

"The three highest-level mysterious lands, wanting to control them, are estimated to be very difficult." Luo Feng was still very confident because to 'master the Abyss of Destruction' before him, one needs to defeat sculptures representing a large group of strong ones including him, Yuan, Starlight, and many others.

...

In the subsequent years, Luo Feng occasionally went to the Mountain of Destruction to spar with the seventh sculpture of the 'Mountain of Destruction'.

After all, he has no other worthy opponents now! This seventh sculpture is the only one that can crush him.

"Hmm?"

During an encounter with the seventh sculpture, Luo Feng suddenly had a sense.

"Brother Yuan, succeeded?" Luo Feng showed a joyful expression.

...

In a vast void, a gigantic Source World appeared.

"Haha..."

Yuan smiled at the Source World before him, as if looking at the most perfect treasure of the Endless Primordial Space, also as if seeing his children nurtured over endless years.

He gave much for this Source World, numerous resources, long years of effort! When finally successful, Yuan just felt immensely satisfied.

"Source World?" Luo Feng, Starlight, Jin, Ming Huang, Wulan, Mo Man, Nai Gu each had a thought descend, forming avatars.

"It really is a Source World." Jin looked at the vast and serene Source World, now devoid of creatures, just formed, even the land, void, etc., were still in the process of shaping.

"The structure of the Source World is also very marvelous." Starlight marveled, "If we say this Source World is a big tree, then the corpses of Thousand Eyes Ancestor and Thirteen Snake Ancestors are its root system, nourishing the entire Source World."

"No way."

Yuan shook his head, "I can’t conjure up ’Source World Origin Essence’ out of thin air, so I had to use the corpses of Thousand Eyes Ancestor and Thirteen Snake Ancestors to substitute, converting them into Origin Essence was quite troublesome, trying for so long, finally succeeded."

Yuan didn’t want to talk about the bitterness involved, too tiring.

"What is its name?" Luo Feng curiously asked.

"I named it, World Heart Continent!" Yuan eagerly stated, "The center of many Source Worlds!"

"Everyone, I have one more request." Yuan looked at his companions.

The seven Lords felt a tightness in their hearts.

A request?

"Brother Yuan, speak." Luo Feng said.

"Next, I will carefully nurture this World Heart Continent." Yuan was quite expectant, "I want to compare... whether the creatures nurtured by the World Heart Continent have fundamental differences from other Source World creatures. So I need to select some outstanding cultivators from many Source Worlds, to let them reincarnate onto the World Heart Continent."

Chapter 498 - 27: Eternity (The Grand Finale)_4

Chapter 498: Chapter 27: Eternity (The Grand Finale)_4

"At that time, I might pick from your territories." Yuan looked at his seven companions, "Please don’t stop me."

"No big deal," Wulan said.

"Alright." Jin didn’t mind either.

"We’re putting a lot of effort into nurturing our successors," Luo Feng said, "I think there should be a limit." He transforms in every Source World of his territory, witnessing the rise of those Cultivators, guiding and cultivating the most promising ones. Yuan taking them all away, Luo Feng wasn’t willing.

"There should be a limit," Starlight agreed.

"Each of your territories, a limit of ten thousand Cultivators?" Yuan suggested.

"Let’s make it a thousand!" Luo Feng frowned and proposed.

"Luo Feng, you’re being stingy." Yuan shook his head.

Luo Feng was silent.

Being fleeced for so long, Luo Feng knew how to ’bargain.’

"A quota of a thousand is plenty, your territory has many Source

Worlds too," Starlight said, and with Luo Feng and Starlight agreeing, Ming Huang, Wulan, Mo Man, Jin, and others all agreed as well.

"Fine, fine, only a thousand total over the long ages of each territory? I guess I'll have to be more careful." Yuan sighed, noticing these seven Lords were increasingly disrespecting him.

...

Each Lord has their own pursuits.

Be it nurturing successors, pursuing their own paths of Cultivation, or Refining the Mysterious Land...

Besides Cultivation and challenging the Seventh Sculpture, Luo Feng primarily focuses on nurturing young ones within each Source World, often accompanying his wife Xu Xin on strolls through new Source Worlds.

In an ordinary Source World.

"Dong dong dong."

Luo Feng was acting as a blacksmith, hammer in his hand, repeatedly forging the Blade Embryo. As the hammering progressed, the Blade Embryo gradually took shape.

It seemed like the simplest and plain method, yet the matter inside the Blade Embryo was transforming, ordinary materials were shifting towards becoming a divine weapon.

"Honey." Xu Xin sat there, happily sipping a cup of fruit tea, shouting, "Can you stop forging? I found some great drinks, come and try them."

Having lived for so long and visited so many Source Worlds, Xu Xin's greatest hobby now was seeking various delicacies and stunning sights.

"Don't rush, let me finish," Luo Feng continued forging.

Xu Xin wasn't in a hurry either.

As someone with endless lifespan, she naturally possessed immense patience, sipping fruit tea and smilingly watching Luo Feng forge.

Who would know this blacksmith would be the mightiest existence in the Endless Primordial Space?

"It’s done." After finishing forging the blade, Luo Feng slightly frowned, dissatisfied, and casually put it away before walking towards his wife.

"Try this." Xu Xin placed a cup of fruit tea in front of him, saying, "I discovered it within one of the Universes in this Source World, and I think it’s quite good."

Luo Feng sat down, drinking the fruit tea.

"Hmm?"

Luo Feng suddenly looked far off into the distance.

"What’s up?" Xu Xin asked.

"Look." Luo Feng, with a thought, projected the distant scene before them—

The silver-robed ’Luo Hai’ carrying a saber, was fighting his opponent.

"Little Hai." Xu Xin watched, the reason she stayed in this Source World for so long was because her son ’Luo Hai’ was exploring and training in this Source World.

In the projected distant scene.

Luo Hai finally drew his saber.

With one slash, he eradicated his enemy.

Luo Hai befriended a young man in a white robe.

"Kid, you got guts!" Luo Hai said as he looked at the young man in white robes, "By the way, my name is Luo Hai."

"I'm Dong Bo Xue Ying." The young man in white robes also smiled.

"If you don't mind, let's be brothers!" Luo Hai said boldly, having the spirit of heroism in his bones, recognizing someone as a friend.

"Brother Luo Hai." The young man 'Dong Bo Xue Ying' called.

Luo Hai collected the Spoils of War and said, "Brother Dong Bo..."

The scene of their conversation, Luo Feng and Xu Xin watched from afar.

"Little Hai just made a friend, why are you paying so much attention?" Xu Xin asked confusedly.

"This one called Dong Bo Xue Ying is quite promising in this Source World," Luo Feng smiled, these little ones who haven't broken out of the Cage, Luo Feng could foresee some of their future possibilities.

"Quite promising?" Xu Xin asked.

"He should reach the Ultimate Realm of God King," Luo Feng said with a smile, "Perhaps he has a slight possibility of breaking out of the Cage!"

...

(The end of the book)

Luo Feng's story comes to an end here.

I wrote this work out of a fondness for the character 'Luo Feng,' trying to complete the story of his adventures in the Land of Origin and even beyond the Cage.

"Swallowed Star 2 Land Of Origin" is a dream-fulfilling book, attempting to close many gaps from "Devouring Starry Sky" and "Snow Eagle Lord" within this work.

The character Luo Feng and the world behind him, with the three novels "Devouring Starry Sky," "Swallowed Star 2 Land Of Origin," and "Snow Eagle Lord," are complete enough for him to forever live

in that world.

Lastly, I thank everyone for your continuous support!

Thank you!

Good night!
